May I add two more words. It seems to me that the difficulties of assuring a judicial resolution of the constitutional issues which I have discussed make it more than normally important that these problems be considered with the greatest care and deliberation in the Congress. The tendency to suggest that because the questions may be nonjusticiable the Congress need not worry, strikes me as wholly indefensible. If there are nonjusticiable problems presented the Congress owes a peculiarly nondelegable duty to resolve them. I am encouraged by your letter to believe that your committee recognizes this special responsibility. Finally I should like to add an expression of an opinion which you did not seek. I believe that it would be a mistake to make provisions at the present time for aid to private elementary and secondary schools. I express this strong opinion in order that you may realize that I have attempted to keep my political opinion and my professional judgment in different compartments of my mind.

Very sincerely yours,

MARK DEW. HOWE,
Professor of Law.

I think Professor Howe is deserving of high commendation as are his colleagues of high caliber who are furnishing constitutional opinions to the subcommittee. In my judgment he typifies the spirit of a true lawyer. He has put aside his own personal political judgment, as he says in his last paragraph. He himself, as a matter of public policy, obviously does not favor loans to private schools; but as a constitutional lawyer and a recognized scholar and authority in the field of constitutional law, he points out that, in his judgment, loans to private schools, properly safeguarded with certain criteria, are constitutional. It is on that premise that I find myself, and have always found myself, in complete agreement with the point of view expressed by Professor Howe.

Without taking the time to review my previously expressed judgment on the floor of the Senate concerning the constitutionality of an interest-bearing loan form of legislation, I ask unanimous consent that certain excerpts dealing with the overall constitutional problem, presented by me in the debate last year, be printed at this point in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

Mr. MORSE. Mr. President, I will now proceed to a discussion of the amendment.

PRIVATE SCHOOLS ARE PART OF EDUCATION SYSTEM

The Federal aid to education bill, S. 8, is one that I believe to be most important for our country. There can be no doubt that education in America stands in need of financial assistance from the Federal Government. There can be no doubt that the Federal Government stands in need of a sound education system in America. The measure proposed by the Senator from Michigan, Mr. MCNAMARA, would give such aid to the public schools.

However, I feel that I must express a very deep concern over the failure of the bill to consider the needs of all of American education. As presently constituted, S. 8 neglects the 15 percent of our Nation's youth who are receiving their education in nonpublic schools. That is where this 15 percent figure originated, Mr. President. We took the 15-percent figure in the first place because 15 percent of our boys and girls in the United States are going to private schools.

May I emphasize that they are receiving their education in nonpublic schools because they and their parents are exercising their rights within our democracy in choosing the kind of education they desire. This right is one that has been determined by decision of the Supreme Court.

I should like to recall to the Senate this decision, the so-called Oregon case decided in 1925, *Pierce* v. *Society of Sisters*. In it, the U.S. Supreme Court found an Oregon State law requiring compulsory public school education of children between the ages of 8 and 16 to be an invasion of the liberty guaranteed by the 14th amendment. This great decision is the charter of education freedom in America. Since that time, traditionally and juridically, every private school, attendance at which satisfies compulsory education laws of the States, is an integral part of the American educational endeavor.

Let me read a short excerpt from this great decision of the Supreme Court of the United States, which was a unanimous decision. The Justice writing for the majority was Justice McReynolds.

A 1922 Oregon statute required attendance at public schools of children between the ages of 8 and 16. The Society of Sisters, one of the groups which brought the action, was a Roman Catholic institution. The name "Pierce" in the decision is the name of a great Governor of our State at the time, later a Representative in Congress, the Honorable Walter Pierce.

The Supreme Court said:

"Under the doctrine of *Meyer* v. *Nebraska* (262 U.S. 390), we think it entirely plain that the act of 1922 unreasonably interferes with the liberty of parents and guardians to direct the upbringing and education of children under their control.

"As often heretofore pointed out, rights guaranteed by the Constitution may not be abridged by legislation which has no reasonable relation to some purpose within the competency of the State. The fundamental theory of liberty upon which all governments in this Union repose excludes any general power of the State to standardize its children by forcing them to accept instruction from public teachers only.

"The child is not the mere creature of the State; those who nurture him and direct his destiny have the right, coupled with the high duty, to recognize and prepare him for additional obligations."

Mr. President, it was that language and the other part of the decision in the famous Pierce case of 1925 which established the principle that when a State seeks to compel children to go to a public school it acts unconstitutionally, and that legislation which would so provide is in violation of the 14th amendment.

So, Mr. President, we have no single track system of education in this country; the States fortunately, have not preempted the field of education. The right of parents to send their children to schools of their choice has consistently been protected. The development of the American system of education has been in the direction of diversity, and it has been good for our Nation, exactly as diversity in our political and social life has been good for us. In 1930, the Court upheld the right of Louisiana to spend public funds for textbooks for private school children (*Cochran* v. *Louisiana State Board of Education*, 281 U.S. 370).

This tradition is one which should be preserved. We know that the public schools have serious problems, and because I recognize that fact I am a supporter of S. 8 and of the Clark amendment to expand the public school grants to include aid for teachers' salaries.

But the private schools are in serious financial straits, too, and we must not forget that fact when we deal with proposed legislation to raise and improve education standards in America.

The problems of the private schools affect the democratic rights of our citizens. For example, as the burden of taxation is increased, the ability of parents to finance the kind of education they wish for their children could be destroyed. In fact, the very existence of nonpublic schools could be destroyed.

The legislation we enact to aid education, then, should not be punitive nor should it place an intolerable burden upon any group. The legislation we enact should be designed with the needs of all of the schools in mind, public and nonpublic, if we are really to improve our education system.

The fact is that the nonpublic schools perform a remarkable service to the Nation in the share of the cost of education they bear. Today, 15 percent of all the children enrolled in elementary and secondary schools are in private schools.

I have been heard many times to draw the illustration of what we could expect if by some wave of the hand all the private elementary and secondary schools now in operation could be caused to disappear, so that all the youngsters attending them today were compelled to show up tomorrow morning at the public schools to continue their education.

More than 5 million children would appear. The figures being discussed in connection with the need of help for the public schools show that there are some 1,800,000 children enrolled in excess of the capacity of the schools to handle them. To add 5 million more would put an additional burden upon the States, school districts, and the Federal Government that is staggering to the imagination.

These private schools provide more than 170,000 classrooms. Using the average expenditure per child of $237 in the public schools and applying it to these 5 million children, the private schools and those who support them are saving the taxpayers some $1,185 million a year because that is how much more would have to come out of public funds if these children suddenly sought a public school education.

I pause a minute on that figure, Mr. President. That is a lot of money; $1,185 million is being contributed, in my judgment, to the public by the private schools today, and we are asking under this proposal for authority to lend with interest a mere $75 million, to be of assistance to these private schools in constructing the schoolrooms they need to meet their registration demands.

Is there a public interest involved? Mr. President, the whole burden of my argument in support of the amendment—and I rest my argument on this major premise—is that the taxpayers of the country will be greatly benefited by approval of my amendment. It is an economy amendment. It is an amendment which will save the taxpayers of America great sums of money. It is an amendment which will cost the taxpayers of the country not one red cent. It is an amendment which will return to the Treasury of the United States interest on the money loaned.

It provides for no grant to any private school in America. I want to get that fact firmly established in the debate, Mr. President. The Senator from Oregon, as I shall show later in the argument, does not favor grants, but he does take the position that these private schools ought to be helped because of the public service they render to the American people in the field of education, with interest-bearing loans for school construction, and school construction only, in the amendment.

TIGHT MONEY HURTING CONSTRUCTION OF BOTH PUBLIC AND PRIVATE SCHOOLS

The fact is that the rising interest rates upon funds the private schools have been borrowing to finance their construction is making borrowing more difficult all the time. It is just as difficult for the private schools to borrow in this high interest rate market as it is for the public schools. Construction is not keeping pace with enrollments.

Is it any solution to allow private school construction to be curtailed when the children who would expect to attend them are simply going to have to attend public schools and thereby increase the pressure upon the public schools?

I call attention to that point because it bears again upon my point that this amendment is an economy amendment, for the benefit of all the taxpayers of the country. If the private schools are not able to borrow money to build the classrooms to meet their enrollment demands, those youngsters will have to appear at the doors of the public schools, although their parents may desire to have them go to a private school, which the U.S. Supreme Court in the famous Pierce case of 1925, made perfectly clear was the very definite right of parents in our country.

We cannot abridge it by passing compulsory legislation requiring children to go to public schools; that would be unconstitutional, for it would be in violation of the 14th amendment. We should not try to accomplish the same end by indirection in the case of a single child or a group of children, or in the case of the many hundreds with respect to which we would be accomplishing it if we did not have lending facilities available to private schools so that they could borrow money to take any students who ask for admission to private schools.

Let me state that argument another way in order that it may be clear for the RECORD. I try to follow through on the principles of the Supreme Court decision by applying those principles to other operative facts when new circumstances arise. In the Pierce case, the Court made it very clear that if a State passed a State statute which sought to require all children between the ages of 6 and 16 to go to a public school, that would

be unconstitutional. One of the reasons it would be unconstitutional would be that in fact it would abridge a very precious natural right of a parent to determine the school to which his child should go.

If, in view of the educational crisis which faces our country, if in view of the financial problems which exist in our country, including high interest rates, private schools find themselves in a position where they cannot borrow the money in order to add to a school building the classrooms necessary to admit students who wish to enter the private school, are we not in fact indirectly following a policy which says to the parents, "You must send your children to the public school after all"?

As to those little boys and girls who are involved in that particular hypothetical situation, there is no denying the fact that they are required to go to a public school because no private school facility is open to them.

Mr. President, I think we must make sure, in this Federal-aid-to-education measure, that the private schools are able to maintain their share of the education burden. Further, I believe that the loan program set up in my amendment is the sound way to accomplish that purpose. We should not follow a legislative course of action that would justify anyone in saying that we are acting in a discriminatory fashion against the private schools, or to the disadvantage of the private schools. We owe the private schools so much for the great public contribution which they make each year to the educational system of our country. As I said a few moments ago, it would cost the public some $1,185 million a year to educate them.

CONGRESSIONAL PRECEDENTS

My next argument is that there are ample precedents in Federal legislation in support of the principle of my amendment. I wish to make my argument on that premise, although I am not one to say that merely because something has been done before it is all right to do it again.

On the contrary, we have many bad precedents, not only in the law, but in our governmental procedure, which should be overruled and discarded. But because the argument is made against me by those who have not done the necessary bookwork which, I respectfully say, ought to be done on this problem before they make this argument, that there is no precedent at all for the amendment I am proposing on the floor of the Senate this afternoon, I believe I owe it to my friends, supporters, and cosponsors to present the result of the research we have done on this particular point.

Mr. BUSH. Mr. President, will the Senator yield for a question?

Mr. MORSE. I yield.

Mr. BUSH. Did the Senator say he had no precedents?

Mr. MORSE. No. I said there were many precedents for the course of action I am proposing, but the argument has been made that there is no precedent.

Mr. BUSH. I thought the Senator said there was no precedent.

Mr. MORSE. I said that argument is made against me.

Mr. BUSH. I apologize. I am sorry. I misunderstood.

Mr. MORSE. That argument is made against the amendment, and I am about to show that there are a great many precedents in support of it.

Before going into the judicial aspects of Federal assistance, let us look at what Congress has already done in this area. For almost 15 years now we have kept in mind the needs of children in the private, nonprofit schools with reference to the school lunch program. Not only has the Department of Agriculture distributed food to them, but it has also administered a very small grant program to enable schools to construct the kitchen and cafeteria space and facilities needed to feed the children in private schools as well as public schools.

For 10 years, the college housing program has gone forward successfully, and I know something about that, because I was a member of the Senate Committee on Banking and Currency when that program was established. It applies to church colleges and universities of many denominations. I know of no instance where a question has been raised as to the constitutionality of including private—and church—colleges in the loan program for dormitories. Apparently it is all right to provide a place for them to sleep, but not a place for them to learn.

Two years ago, we applied the same principle to the National Defense Education Act. Where grants were authorized to the public schools for science facilities and minor remodeling to accommodate them, loans were authorized to private schools. Again, I know of no challenge to the constitutionality of that program, and scarcely any objection even to its advisability.

Another program related to this question is the Hill-Burton Hospital Construction Act. It will be remembered that in the 2d session of the 85th Congress, we considered and passed an amendment to the Hill-Burton Act making it possible for hospitals operated by churches to borrow funds for hospital construction, if they preferred to do that rather than accept the grants. This change was made at the request principally of the Baptist hospitals.

Before reviewing the official position taken by the Baptists, I wish to stress for the RECORD the fact that under the Hill-Burton Act we grant huge sums of money in total to denominational hospitals—Catholic and Presbyterian and of other denominations. The history of this subject is a very fascinating and interesting one.

The Baptists took the position that they could not accept grant money. Therefore, I now take the Senate through a very interesting bit of history as to what has happened in the administration of the Hill-Burton Act.

LOAN ACCEPTABLE AS SUBSTITUTE FOR GRANTS

In presenting their point of view to the House Committee on Interstate and Foreign Commerce, several Members of Congress who declared their affiliation with the Baptist Church, advocated this change on the ground that accepting grants for Baptist hospitals conflicted with their traditions, but that a loan program would not.

In addition, Dr. John H. Buchanan, who testified on behalf of the Baptist hospitals, gave the following statement on May 7, 1958:

"It so happens, as has been intimated by both Congressman HAYS and Congressman HARRIS, that during these 12 years of its existence our Baptist people have not felt free to accept a grant because of a peculiar tradition we have on the separation of church and state. We have gone ahead in constructing hospitals and financing them with great difficulty from private sources and from benevolent funds."

I digress to say that this refers to the 12 years of the existence and operation of the Hill-Burton Act.

"This amendment offered by Congressman HARRIS, H.R. 6833, if approved, would make available to the Baptists—and there are some other groups across the Nation which have taken the same position who have never accepted grants—long-term loans for the help of these groups in making their added contribution to the health of the Nation.

"It would make available to us these funds simply as loans, long-term loans, enabling us to expand our facilities and add to the total health program of the Nation.

"So I come this morning simply to bring that plea, that you give consideration to those of us who have never availed ourselves of the use of these funds, because of this principle which some of our brethren hold. But this will make it possible for us to expand our facilities, pay back to the Government what we borrow, and meet increasingly a tremendous need across our Nation."

It is interesting to note here that no question was raised as to the constitutionality of extending or accepting a grant for hospital construction on the part of a church organization.

But those groups which had their own objections to the grants, came before Congress asking for a loan program so as to remove their objetcion to accepting grants.

Let me say, Mr. President, that neither has any question of constitutionality with respect to the loan program been raised in connection with hospitals. Now let us get this premise of my argument clearly understood. There is no difference as a matter of law whether we lend money for use by hospitals or lend it for use by schools. Not a bit.

If the argument is that somehow or in some way the amendment violates the first amendment to the Constitution with respect to the separation of church and State, I will discuss those cases in a moment, but at this point I wish to say that Congress, in connection with the school lunch program, has been granting food to private schools; in connection with dormitory programs for sectarian colleges we have been lending money; and now, under the Hill-Burton Act, we have provided extended grants to sectarian hospitals—hospitals run by Catholic and other religious groups—and then, when we ran into objection by Baptist church officials, who said that practice conflicted with their tradition, we have provided that they could borrow money, although we were perfectly willing to grant it to them.

So I think that at least I have sustained my burden of proof of showing that there is ample legislative precedent for this program and that there has been no successful constitutional contest throwing out this loan program of the Hill-Burton Act or any of the other programs I have enumerated.

What Congress did in connection with the Hill-Burton program for meeting the health needs of the American people now needs to be done in regard to our education needs. That is what we are asking for in S. 8 and in my private school loan amendment.

COURT RULINGS ON SEPARATION OF CHURCH AND STATE

But beyond the fact that Congress has again and again included private and even church schools and hospitals in Federal programs of assistance to the general welfare, what have the Federal courts, and the U.S. Supreme Court in particular had to say on this subject?

There is no specific Federal judicial precedent on the exact point of Federal grant or loan programs. But there are precedents on other points. I have already mentioned the 1925 and 1930 cases, the latter upholding the expenditure of public funds by a State for textbooks for private schools.

In 1946, the Supreme Court again had occasion to pass upon a State statute extending another form of assistance to its children. This was the New Jersey law furnishing school-bus transportation, upheld by the High Court in 1946.

At that time, in *Everson* v. *Board of Education* (330 U.S. 1), the entire Court concurred in the following general interpretation of the first amendment ban upon the establishment of a religion:

"Neither a State nor the Federal Government can pass laws which aid one religion, aid all religions, or prefer one religion over another."

The dissenting judges concurred in that conclusion, drawing their difference over

what constitutes "aid." It was the decision of the majority that the granting of "aid" could not be construed so narrowly as to cut off welfare services for children attending the private schools, even if they are church-affiliated schools.

Shortly thereafter came the McCollum case, which has been cited to me as rendering my amendment unconstitutional. There are those who have called upon me during the last few days, and insisted that my amendment cannot be reconciled with the McCollum case. I told them that I completely disagreed with their interpretation of the McCollum case, and suggested that they hear me through my argument when I make it on the floor of the Senate. I do not believe that their construction of the McCollum case holds water.

In the 1948 case of *McCollum* v. *Board of Education* (333 U.S. 203), issue was made over a released time program in Champaign, Ill., where the children were released from class during the school day to receive religious instruction on school premises, provided the parents consented to the release. Other children continued their academic work.

Although the Illinois Supreme Court upheld this practice, the U.S. Supreme Court did not. Opponents of the released time program contended it was an "aid to all religions" and hence, unconstitutional. This view prevailed with the Supreme Court. Its majority declared:

"Here not only are the State's tax-supported public school buildings used for the dissemination of religious doctrines. The State also affords sectarian groups an invaluable aid in that it helps to provide pupils for their religious classes through the use of the State's compulsory public school machinery. This is not separation of church and state."

But this was not the last of the Court's statements on the subject, nor do the facts conform with the loan program under consideration in my amendment. In fact, the facts of the McCollum case have nothing whatsoever to do with any loan program.

The next released time case brought before the U.S. Supreme Court was from New York and was decided in the case of Zorach against Clauson in 1952. In this instance, the released time for religious instruction also required the consent of the parents, and occurred during the school day, but the religious instruction did not take place on school premises.

The Supreme Court found this entirely constitutional. Justice Douglas delivered the opinion of the Court, and declared:

"No one is forced to go to the religious classroom. A student need not take religious instruction. He is left to his own desires as to the manner or time of his religious devotions, if any.

"There is a suggestion that the system involves the use of coercion to get public school students into religious classrooms. The present record indeed tells us that the school authorities are neutral in this regard and do no more than release students whose parents so request."

In emphasizing the historic development of this Nation, Justice Douglas went on to say in the Zorach case of 1952:

"There cannot be the slightest doubt that the first amendment reflects the philosophy that church and state should be separated. And so far as interference with the free exercise of religion and an establishment of religion are concerned, the separation must be complete and unequivocal. The first amendment within the scope of its coverage permits no exception; the prohibition is absolute. The first amendment, however, does not say that in every and all respects there shall be a separation of church and state. Rather, it studiously defines the manner, the specific ways, in which there shall be no concert or union or dependency one on the other. That is the commonsense of the matter. Otherwise the state and religion would be aliens to each other—hostile, suspicious, and even unfriendly. Churches could not be required to pay even property taxes. Municipalities would not be permitted to render police or fire protection to religious groups. Policemen who helped parishioners into their places of worship would violate the Constitution. Prayers in our legislative halls; the appeals to the Almighty in the messages of the Chief Executive; the proclamations making Thanksgiving Day a holiday; 'so help me God' in our courtroom oaths—these and all other references to the Almighty that run through our laws, our public rituals, our ceremonies would be flouting the first amendment. A fastidious atheist or agnostic could even object to the supplication with which the Court opens each session: 'God save the United States and this Honorable Court.'

"We are a religious people whose institutions presuppose a supreme being. We guarantee the freedom to worship as one chooses. We make room for as wide a variety of beliefs and creeds as the spiritual needs of man deem necessary. We sponsor an attitude on the part of Government that shows no partiality to any one group and that lets each flourish according to the zeal of its adherents and the appeal of its dogma. When the state encourages religious instruction or cooperates with religious authorities by adjusting the schedule of public events to sectarian needs, it follows the best of our traditions. For it then respects the religious nature of our people and accommodates the public service to their spiritual needs. To hold that it may not would be to find in the Constitution a requirement that the Government show a callous indifference to religious groups. That would be preferring those who believe in no religion over those who do believe."

In declaring what Government may not do, Justice Douglas continued:

"Government may not finance religious groups nor undertake religious instruction nor blend secular and sectarian education nor use secular institutions to force one or some religion on any person. But we find no constitutional requirement which makes it necessary for Government to be hostile to religion and to throw its weight against efforts to widen the effective scope of religious influence."

This philosophy of the U.S. Supreme Court has been implemented by Congress in the Hill-Burton Hospital Construction Act, in the GI bill of rights which financed the education of our veterans even in seminaries and theological schools, in the college housing loans, and the National Defense Education Act, to mention but a few laws.

I do not doubt for a moment that the key to what may be done and what may not be done lies at the point where the difference between providing for the general welfare becomes "aiding" religion. Note should be taken here of the fact that the present Oregon textbook law is again being taken through the courts.

Assurances have been given on both sides that it will be taken up to the Supreme Court of the United States for another ruling on whether a State may expend State funds on textbooks for boys and girls in private schools, including church schools.

That is all right with me. I welcome judicial rulings on the questions of where the boundary which separates church and state in America is placed. Neither Congress nor the courts mean to discourage, curtail, or in any way hamper, in my opinion, the right of American parents to educate their children in schools of their own choosing.

I further believe that in this education bill sound public policy calls for the inclusion of an encouragement to private institutions in providing services which are aided directly by the Federal Government in their public aspects.

HISTORY OF FIRST AMENDMENT

Mr. President, when one talks about the first amendment, I think it important that he keep in mind what the first amendment provides, and that he then relate what it provides to the history of the first amendment. So I take a moment to read it:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof; or abridging the freedom of speech, or of the press; or the right of the people peaceably to assemble, and to petition the Government for a redress of grievances."

Let us get this point clear: The whole question of separation of church and state stems from these words in the first amendment:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

But we need to keep in mind the facts which existed to our country, the controversy which was waged in our country, that caused the adoption of the first amendment. That is why it is so important that we get back to the views of our Constitutional Fathers. We need to remember that at the time the Constitution was adopted there were, if my recollection is correct, nine States which had State churches.

In other words, the first amendment was really the result of a controvery which was waged in this land at the time of the birth of the Republic, when there was strong opposition to the establishment by law of a state church.

That is not surprising, because all of us know that a great religious controversy had been waged for a long time in many parts of the world, and that some of our forefathers left Great Britain because of the so-called state-church issue. They were in revolt against state religious authoritarianism.

So it is not surprising that in the colonial days there was great controversy over the issue of whether the Federal Government should sanction—as some States already had done—a national church. Therefore, the Founding Fathers wrote this provision into the Constitution. I believe it is about as clear a provision as could be written, in bearing on this controversy:

"Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof."

When I read various articles which quote Madison, Jefferson, and others of that day, I am always at a loss to understand why the articles do not include a discussion of this very controversy, which was waged over the establishment of state churches. As we read the great language of Justice Douglas in the decisions to which I have just now referred, I believe it most important that we realize that he had clearly in mind the historic basis for the first amendment.

GENERAL WELFARE AT ISSUE

To provide for the general welfare is one of the principal duties of the Federal Government. That does not mean that in promoting the general welfare of the people, we may deal only with public agencies in Federal, State, or local governments. On the contrary, as we already have done time and time and time again, we as a Congress have the obligation to deal with private agency ways, means, and methods which will promote the general welfare within the framework of our constitutional guarantees. Congress did that in the Hill-Burton Act and in many other acts which were of some assistance to the church or private agencies; and

I propose that the same principle now be extended by way of the granting of loans to private schools, to provide classrooms for the boys and girls who attend those schools.

As I have said many times, as we pass judgment on these legislative proposals, I shall never take my eyes off the boys and girls. We should constantly ask whether the purpose of the particular bill is to help the boys and girls, and whether the money proposed to be provided is to be used for the benefit of the boys and girls. On that basis we justify the science facility program, the school-lunch program, the health program, the textbook program, the school-bus program, the dormitory program, and all the other programs I have cited this afternoon as precedents in support of the principle of my amendment.

Encouragement to the private schools of the Nation in their role of educating approximately 15 percent of our young people should be a part of the general aid-to-education bill. Under my amendment, no grant or subsidy will go to them; but the "high and impregnable wall of separation between church and state," as it has been called by Justice Black, does not preclude the Government from cooperating with church-sponsored activities which are in furtherance of the general welfare.

My loan proposal stays clear of the statement by Justice Douglas in the Zorach case—namely, that "Government may not finance religious groups" nor prefer one religious group to another.

In providing for the education of our servicemen after World War II and the Korean war, the Federal Government paid their tuition, so the Nation's colleges and universities, public, private, and sectarian, could do that job. That was not a matter of supporting or financing religions; it was a matter of educating the young people.

The need for that is the same as the need dealt with in the amendment which I have offered this afternoon. It is the same as the need which in my amendment we seek to meet.

Because I recognize the existence of strong feelings on the part of some groups of Americans in regard to this matter—feelings in opposition to the conviction I personally hold in regard to it—I ask unanimous consent to have printed at this point in the RECORD, in connection with my remarks, a letter which I have received from certain members of the Unitarian Fellowship for Social Justice. I believe it would be most unfair of me to make the argument which I make here this afternoon and not make clear, for the RECORD, that this group of very sincere and dedicated people who do not share my point of view in regard to this matter is opposed to my amendment. Therefore, I ask unanimous consent that the letter and the accompanying resolution be printed at this point in the RECORD, in connection with my remarks.

There being no objection, the letter and the resolution were ordered to be printed in the RECORD, as follows:

UNITARIAN FELLOWSHIP
FOR SOCIAL JUSTICE,
Washington, D.C., February 3, 1960.

Senator WAYNE MORSE,
Senate Office Building,
Washington, D.C.

DEAR SENATOR MORSE: At the meeting of the legislative committee of the Unitarian Fellowship for Social Justice held this morning, the following resolution was passed:

"The Morse amendment to the school construction bill violates the spirit of the Constitution because it would use the Government's financial facilities to aid religous schools, at the level of compulsory school attendance. The Government has never before gone so far in the direction of aid to parochial schools, and we believe that this creates a dangerous precedent. Loans can easily lead to grants, and soon the taxpayers may be asked to pay all the expenses of sectarian schools.

"More than 90 percent of the pupils attending such schools in America are in Catholic parochial schools. Since the Catholic bishops want full public support for such schools, any move in that direction should be resisted by citizens who believe in the American tradition of church-state separation.

"We also believe that this amendment is dangerous because it may provide an opening wedge for segregationists to obtain public money for private, segregated schools in the South. If Southern States abolish their public school systems, they might secure some Federal loans for private schools through this amendment.

"Coming at this moment, this raises a divisive church-state issue and a divisive race issue. We hope that you and your associates will be persuaded to withdraw it in the name of civil rights and the separation of church and state."

We are sending copies of this letter to your fellow Senators who joined you in this amendment, and to the press.

Sincerely,

MURIEL A. DAVIES
Mrs. A. Powell Davies, *President.*
ERNEST O. SOMMERFELD
Rev. Ernest O. Sommerfeld,
Chairman, Legislative Committee.

Mr. MORSE. Mr. President, of course as we read the letter and the resolution, in light of the argument I have already made, it is clear that I do not share their opinion that loans to be repaid to the American taxpayers with interest, and with no subsidy, for the construction of private, nonprofit elementary and secondary schools do not constitute aid to religious schools which falls under the proscription of the Supreme Court of the United States. If I believed it was unconstitutional, my colleagues may be sure that I would not be offering or supporting this amendment.

TERMS OF AMENDMENT

In conclusion, I point out that the definition of school facilities for which loans may be made under my amendments is the same as the definition which is applied to the public-school grants in Senate bill 8; namely, the term "school facilities" means classrooms and related facilities, including furniture, instructional materials other than textbooks, equipment, machinery, and facilities necessary and appropriate for school purposes for education. It specifically excludes "athletic stadiums, or structures or facilities intended primarily for events such as athletic exhibitions, contests, or games, for which admission is to be charged to the general public."

In other words, the educational facilities for which private school loans are authorized are the same as the ones for which grants are provided to the public schools.

I also point out that the assurances that construction will take place under the conditions provided in the Davis-Bacon Act are required for these loans, as in the case of grants for public schools.

Mr. President, in support of the legal argument I have made this afternoon in regard to the McCollum case, I should like to call attention to an article which appeared in the University of Pittsburgh Law Review, volume XII, page 154. The article was written by my very able administrative assistant, Mr. Berg, of whom I am very proud. The article was written in 1950, at the time when Mr. Berg was professor of law at the University of Colorado Law School. The article contains a very interesting analysis of the McCollum case.

So I ask unanimous consent—without taking time to read excerpts from the article—that certain excerpts from Mr. Berg's article be printed at this point in the RECORD, as part of my remarks, because they very effectively and in very scholarly fashion buttress the legal argument I have made this afternoon.

There being no objection, the excerpts from the article were ordered to be printed in the RECORD, as follows:

"[From the University of Pittsburgh Law Review]

"BOOK REVIEW: 'RELIGION AND EDUCATION UNDER THE CONSTITUTION,' BY J. M. O'NEILL

"The Constitution of the United States does not command the separation of church and state. Nevertheless, Mr. Justice Black, speaking for a majority of the U.S. Supreme Court in the much-discussed McCollum [1] case, announced that 'the first amendment has erected a wall between church and state which must be kept high and impregnable.' [2] In the same case, Mr. Justice Frankfurter referred to a 'constitutional principle requiring separation of church and state.' [3] In his recent book, O'Neill challenges these broad pronouncements, disagrees with the reasoning of the Court in the McCollum case and substantiates his position by a thorough documentation.

"The facts of the McCollum case are relatively simple. Members of the Jewish, Protestant, and Roman Catholic faiths formed the Champaign Council on Religious Education. The council, with the consent of school authorities, conducted classes in religious education for public school children of Champaign, Ill., on released time in public school rooms. These classes were not compulsory. Attendance was permitted only upon written consent of the parents. Mrs. McCollum, a parent of a child attending one of the public elementary schools of Champaign, attacked this program in the State courts. She failed at that level, but the Supreme Court of the United States with only one dissent, found the plan unconstitutional.[4] A majority of the Court, relying upon dicta in a decision handed down 2 years earlier,[5] in effect decided that the released time plan amounted to a State law 'respecting an establishment of religion' in violation of the first amendment, the prohibitions of which the Court found applicable to the States under the 14th amendment." [6]

"The constitutional prohibition against a law respecting an establishment of religion has been construed by the Supreme Court to mean: 'Neither a State nor the Federal Government can set up a church. Neither can pass laws which aid one religion, aid all religions, or prefer one religion over another,' and that 'in the words of Jefferson, the clause was intended to erect "a wall of separation between church and state." ' [7] O'Neill demonstrates that a majority of the Supreme Court, in defining the establishment clause in such sweeping terms and in making it applicable to the facts of the McCollum case, apparently did not understand the nature of the evils that the clause sought to eliminate.

"One who studies the materials collected by O'Neill will find ample support for the proposition that the establishment clause of the first amendment was designed to make doubly certain that the Federal Government should never establish a national church. As O'Neill says: 'My thesis is that the words "establishment of religion" meant to Madison, Jefferson, the members of the First Con-

gress, the historians, the legal scholars, and substantially all Americans who were at all familiar with the Constitution until very recent years, a formal, legal union of a single church or religion with government, giving the one church or religion an exclusive position of power and favor over all other churches or denominations.' [8]

"Recently the U.S. Supreme Court gave a fairly good indication of the canons of construction it would follow in determining the meaning of 'an establishment of religion.' In the Everson [9] case the Court, speaking through Mr. Justice Black, observed that it has long construed that clause 'in light of its history and the evils it was designed forever to suppress.' [10] Shortly thereafter, in the Adamson case, Mr. Justice Frankfurter stated that 'an amendment to the Constitution should be read in a "sense most obvious to the common understanding at the time of its adoption." ' [11] In view of these pronouncements, Mr. Justice Black could hardly have applied a different rule of construction in interpreting a constitutional provision in the McCollum case. It is true that the Court has often construed 'expanding' concepts, such as those of interstate commerce and general welfare, in light of modern conditions. But it is highly improbable that the Court would state specifically that a stable concept, such as the constitutional prohibition against a law respecting an establishment of religion, should have a present-day meaning different from that which prevailed when the first amendment was adopted.

"O'Neill's book makes it quite evident that the Supreme Court, in spite of the rules of construction quoted above, attributed to the establishment clause a meaning vastly different from that which it was intended to have 'in light of its history and the evils it was designed forever to suppress.' After reading this book one is tempted to agree with Mr. Justice Jackson's frank suggestion that the Court decided the McCollum case upon the basis of its prepossessions.[12]

"O'Neill lists many of the evils attendant upon an establishment of religion.[13] For example, it was not uncommon to find that important civil rights, such as those of holding public office, participating in jury service, and giving testimony in court, were reserved to members in good standing in the established church. There were 9 established churches—all Protestant—in the original colonies, and not until 1833 was the last of these disestablished.[14] In view of the extent of establishment in this country at the time of the first amendment and the seriousness of its infringement of human liberties, it is obvious that the facts of history support O'Neill's conclusion that the object of the establishment clause was the prevention of this intolerable situation at the Federal level.

"The Supreme Court has relied heavily upon the writings of Jefferson and Madison in construing the establishment clause.[15] Those who insist that the Supreme Court correctly interpreted Jefferson's and Madison's points of view in this respect will find little comfort in what O'Neill has to say. In two chapters devoted to a study of the attitudes, actions and writings of these two great statesmen on the subject of religion, O'Neill finds that neither advocated complete separation of church and state as that concept was defined in the McCollum case.[16] Of course, if one wishes to single out a sentence or paragraph written by either of these men, he may claim that he has found support for the Supreme Court's broad interpretation of the establishment clause. However, any such isolated statements of Jefferson or Madison become insignificant when compared with the entirety of their works and actions.

"O'Neill shows that the much-quoted metaphor, 'a wall of separation between church and state,' found in Jefferson's letter to the Baptists of Danbury, reflected disapproval of any 'formal legal union between one religion and the government.' [17] The author also collects for us convincing evidence that neither Jefferson, the citizen, nor Jefferson, the President, was an exponent of the idea of complete separation of church and state.[18]

"The chapter on Madison brings into clear light significant public manifestations of that great American upon the subject of religion.[19] From these it is evident that Madison, too, feared and fought the establishment of a religion by government, but that in his public life he did not espouse the cause of absolute separation of church and state.

"Other useful guides for ascertaining the meaning of the establishment clause are discussed by O'Neill. For example, he mentions many acts of Congress which inferentially involve Congress' interpretation of that clause. These substantiate his theory that an 'establishment of religion' means and has always meant to Congress 'only a single, formal, monopolistic union of one religion with the Federal Government.' [20]

"Another important guide to the meaning of the establishment clause is the interpretation placed upon it by recognized constitutional law authorities. His quotations from eminent writers in this field show that the Supreme Court has deviated far from the time-honored interpretation of the establishment clause.[21]

"Chapter 10 has a discussion of the 14th amendment and its application to the facts of the McCollum case. O'Neill says that the view adopted by a minority of the Supreme Court in the Adamson case [22]—that the 14th amendment makes the Bill of Rights applicable in toto to the States—'is an essential part of any possible theory of the constitutional validity' of the McCollum decision.[23] I do not think this conclusion necessarily follows. In the McCollum case the Court merely decided that the provision of the first amendment which prohibits any law respecting an establishment of religion is applied to the States via the 14th amendment.[24]

"I agree with O'Neill's conclusion that the Supreme Court erroneously enlarged the meaning of the establishment clause so as to

[16] Chs. 5 and 6.

[17] At the time this letter was written (1802) the Baptists were experiencing an establishment of the Congregational Church in Connecticut (p. 83).

[18] Pp. 76–86. Among other items, O'Neill brings out these important facts:

(1) Jefferson advocated the use of public funds in Virginia for a school of theology (p. 76).

(2) Jefferson recommended that a room at the University of Virginia be used for religious worship (p. 206).

(3) The four key provisions of Jefferson's bill for establishment of religious freedom in Virginia were aimed at the evils of an established state religion (pp. 275–277). These four provisions are now found in Virginia Code Ann. sec. 34 (1942).

(4) As President, Jefferson used public funds for chaplains in the Army and Navy and signed an Indian treaty requiring payment of public funds for the salary of a Catholic missionary priest (pp. 77, 116–117).

[19] Pp. 87–107, O'Neill mentions such facts as these concerning Madison's position:

(1) Madison was a member of the congressional joint committee that instituted the chaplain system in Congress (pp. 99–100).

(2) Throughout Madison's term as President public funds were used to provide chaplains for the Army and Navy (p. 102).

(3) During Madison's administration, public funds were used for religious purposes on the Indian reservations (p. 102).

(4) Madison's original draft of the portion of the proposed first amendment dealing with an establishment of religion read: "Nor shall any national religion be established" (p. 103).

(5) The Memorial and Remonstrance was a protest against making the Christian religion the established religion of Virginia (pp. 88–89).

[20] P. 109, illustrative are these:

(1) Congress has elected House and Senate chaplains as salaried officers since 1790 (pp. 110–111).

(2) Since the first Congress, provision has been made for Army and Navy chaplains (p. 111).

(3) Under the GI bill of rights, public funds are paid to religious schools and colleges (p. 120).

(4) Federal funds are paid to religious schools for the care of Indian children (p. 120).

(5) Shortly after the McCollum decision was handed down, Congress appropriated $500,000 to erect a chapel for religious worship at the United States Merchant Marine Academy (p. 120).

[21] Pp. 62–65. The author cites these works: "Story's Commentaries," secs. 1873, 1874, 1877 (5th ed. 1891); Cooley, "Constitutional Limitations," 584 (4th ed. 1878); Corwin, "The Constitution—What It Means Today," 154 (9th ed. 1947).

Not listed by O'Neill, but also important are Cooley, "Constitutional Law," 259 (4th ed. 1931); Black, "Constitutional Law," 518 (4th ed. 1927); Willoughby, "Constitutional Law," sec. 723 (2d ed. 1929).

[22] *Adamson* v. *California* (332 U.S. 46 (1947)). In this case a majority of the Court, speaking through Mr. Justice Reed, followed the view that only the provisions of the Bill of Rights that are "implicit in the concept of ordered liberty" are secure from State interference under the due process clause of the 14th amendment. A minority of the Court agreed with Justice Black. In his dissenting opinion he took the position that the 14th amendment made the Bill of Rights applicable to the States.

[23] P. 161.

[24] However, a dictum in the Court's opinion indicates that the 1st amendment is made applicable to the States by the 14th.

make its prohibition cover the facts of the McCollum case." [25]

NO SUBTERFUGE INTENDED

Mr. MORSE. Mr. President, I will turn now to my amendment to the amendment, which I want to discuss briefly. It deals with a problem that I do not think we should ignore. That is the question as to whether or not my amendment, if it should become the law, could be used as a form of subterfuge for undercutting the Supreme Court decisions in regard to nonsegregation in public schools.

Mr. President, I have a very brief argument to make in support of my amendment, but I am going to read the amendment and then send it to the desk. On page 4, line 4, after the period, I propose to insert a new sentence, as follows:

"In making loans within any State under the provisions of this section, the Commissioner shall give priority to applicants proposing to construct school facilities in areas where the public schools are in operation."

I want to make my argument on the amendment before I offer it.

Mr. DODD. Mr. President, will the Senator yield?

Mr. MORSE. I yield.

Mr. DODD. I do not want to interrupt the Senator's very cogent and persuasive argument, but I wish to say I am very happy to join with the Senator in support of his proposal.

Mr. MORSE. I am very proud to have the Senator from Connecticut join me.

Mr. DODD. I think the Senator from Oregon is making a very important and scholarly speech on this problem. I said this earlier today concerning the Monroney-Clark substitute, and it seems important to point it out again: Neither the committee bill nor the Monroney-Clark amendment makes any provision for private schools, which are educating 15 percent of all the schoolchildren in America.

I am sure the Senator will agree with me that there is another factor we should make note of here, and that is the expense which the parents of those children carry. They not only pay their share in taxes to support the public schools, which is proper and right, but they also pay the expenses of their own children in private schools.

The third point on which I commend the Senator is his having brought up and made clear to all the fact that the private schools are not seeking any grants. They seek only interest-bearing loans. I think this amendment offers a great opportunity for an investment in education in the United States, an investment that will reap not only a return of interest and the money loaned, but, more importantly, great and continuing dividends in the talents and aptitudes of the young people who are coming along in this country, and who will continue to come along. It is really an investment in the future of our Nation.

Finally, I should like to say I am very proud to be associated with the distinguished Senator from Oregon in offering this amendment; and I express, I am sure, the attitude of a great many people when I say we have reason to be grateful to the Senator from Oregon for his scholarly exposition this afternoon and for his fairness, his courage, his sense of justice, and his ability to see the issue clearly as one of national interest.

Mr. MORSE. Mr. President, I appreciate very much the statement of the Senator from Connecticut, who is a great lawyer, with a brilliant legal record. I particularly appreciate his evaluation of the argument I have sought to make.

I am convinced that the law is clearly on my side so far as the constitutionality of my proposal is concerned, or I would not be offering it. I am satisfied that the public interest is on my side, because the boys and girls who go to private schools are entitled, it seems to me, to the kind of facilities that are necessary in order to make it possible for them to get a good education. Our amendment seeks to provide for them, on a loan basis, the same adequate facilities we seek to get for public school students on a grant basis.

The Senator from Connecticut is so right when he points out the great contribution that the parents of private school students really make to the public school interests. I have used the figure in my argument this afternoon, but it needs to be used over and over again, because it is a telling one.

They contribute, really, $1,185 million to the taxpayers of the country, because if these boys and girls were not in private schools, that amount of money would have, to be spent in public schools for them. In fact, that is the minimum amount. It might be higher than that, because of the resulting problems of congestion and administrative difficulties that would be created in the public school system if all these boys and girls all at once walked into the front doors of our public schools, including the great increase in teachers' salaries which would be required because of the additional number of teachers that would have to be hired. I think the amount would be much more than $1,185 million.

That amount of money would have to come out of the public coffers to meet the educational needs that would be created by the admission into public schools of all the students now in private schools.

May I say also I think there would be another costly result. Because of all the difficulty that would be created by the additional number in public schools unequipped to meet their educational needs, there would be a great educational loss to America. There would be many a brain that would not be developed to its maximum potential.

Mr. President, if you want to be perfectly economically selfish about this question, you and I lose, in terms of national wealth, every time the potential brainpower of an American boy or girl is not developed to its maximum extent. So, Mr. President, I do not care how you look at this problem. I do not see how you can escape the force of the argument that we have an obligation to make money available, on a loan basis, to give these boys and girls a fair opportunity for an adequate education.

MORAL ISSUE AS WELL AS EDUCATIONAL ISSUE

Nothing has been said, but I will mention it in passing, because to me it is the controlling argument, about our moral obligation. We are a great people. We talk about our dedication to moral values. Mr. President, do you know of anything more valuable than the potential of a little grade school boy or girl in America? Do you know of anything more precious or priceless?

If you just look at the question from the moral standpoint, our duty, as people who believe in moral values, is to be unselfish, willing to sacrifice, if necessary, certainly willing to make some loan money available to give boys and girls an educational opportunity that they would not enjoy to their fullest potential if we did not follow such a course of action as I propose this afternoon.

Whether met on the legal argument, on the economic argument, or on the moral argument, I am satisfied that our amendment is correct.

Mr. President, many Senators wanted me not to offer the amendment. I am offering it because I think it is in the interest of my country, and I think we ought to agree to it this afternoon.

Mr. President, I turn now to a very brief discussion of the amendment to the amendment which I am about to offer. I offer it on my own responsibility.

On page 4, line 4, after the period insert the following new sentence:

"In making loans within any State under the provisions of this section, the Commissioner shall give priority to applicants proposing to construct school facilities in areas where the public schools are in operation."

My argument for the amendment is very brief, as follows:

Some issue has been made, and it is one I have thought about a great deal before offering this amendment, of the question of Federal support of some kind going to private schools which are racially segregated.

CONGRESS HAS IGNORED SEGREGATION QUESTION

Of course, that whole matter is ignored in the pending bill. Under S. 8, funds for construction would be assigned to State public schools which continue to be segregated, in spite of Supreme Court rulings to the contrary.

The sad fact is that the Congress of the United States has not come to grips with this situation in any of its Federal programs. We have Public Laws 815 and 874 extending grants of Federal aid to racially segregated public schools; the same is true of the grants of the National Science Foundation; the college housing loan program applies to both public and private segregated schools; so does the school lunch program. The Department of Defense carries on its reserve officer training programs in racially segregated institutions, both public and private.

It is my opinion that Congress should deal with this matter in general terms. It is not enough that we let the Supreme Court hold the bag, so to speak, on racial discrimination. The Congress, too, has an equal responsibility to uphold the Constitution, and the Supreme Court has made very clear that under it segregated public facilities are not permissible.

However, the courts have also laid down a rule of reason regarding the adjustment necessary in many States. For that reason, many Members of Congress take the view that no legislative directive is called for in a program like the one authorized in S. 8.

In the case of a loan to a private school, the position of the courts is less clear. So far as I have been able to determine, there has been no ruling on any of the grant or loan programs I have mentioned as they apply to institutions which are both private and segregated.

NEED BASIS JUSTIFIES AMENDMENT

Nonetheless, the purposes of S. 8 and my amendment are to expand the educational facilities of the American school system. It makes no sense to lend money for construction of private schools when the public schools nearby stand idle and empty.

Therefore, on the basis of the need alone, I believe that in making loans under my amendment the Commissioner of Education should give priority to those applications coming from areas where the public schools are also in operation.

To say that no Federal loan for this one level of private school construction shall go to a racially segregated school is to strain at a gnat after swallowing the camel, since

---

[25] "In all of the discussion in Congress apparently no one had in mind a change that would have any effect at all on any question of religion or religious education. This is not surprising when one considers that in the first century after the adoption of the Bill of Rights we find no evidence either in public discussion or legislative debate that anyone thought 'an establishment of religion' meant anything other than what it had meant to Jefferson, Madison, and the men who wrote, adopted, and ratified the first amendment" (p. 160). See also pp. 163–168, 185–186.

there is no such restriction on any other Federal loan or grant program to either private or public institutions. At the same time, the purpose of the bill we are considering is to help meet the demand for classrooms caused by our rising student population.

I believe that the purpose of this entire measure will best be served if the Commissioner of Education can take into account the fact that public schools are closed and available classrooms are unused in some areas in determining who shall be entitled to the limited loan funds under my amendment.

I wish to discuss this proposal very frankly, for the purpose of legislative history, Mr. President, in terms of two hypotheticals.

Let us suppose that my amendment becomes the law. Let us suppose that State X abolishes some of its public schools because it seeks to evade the application of the U.S. Supreme Court decisions in the school cases, and that private schools which the State seeks to adopt or which the State seeks to sponsor come before the Commissioner to ask for a loan.

Under my amendment, the Commissioner would be required to give priority to loans to private schools where the public schools continued in operation. Therefore, he would be in a position to deny a loan to a private school which was being set up as the result of State action which sought to subvert the great principle laid down by the U.S. Supreme Court, that under the 14th amendment segregation in public schools is unconstitutional.

Mr. President, I think that is a very fair and reasonable position for me to take, in view of my known dedication to the civil rights cause, a dedication in complete support of the Supreme Court decision, which caused me in 1957 to be the only northern Democrat who voted against the 1957 civil rights bill. In my judgment, when title 3 was stricken from that bill we in effect walked out on the U.S. Supreme Court by failing to include in the bill any enforcement procedure which would make it possible to give effective meaning to the Court decision.

It should be said, so that my colleagues will know, I have refused to propose an amendment which certain civil rights groups strongly—and "strongly" is a mild term—urged me to add to my amendment. Those groups wanted me to add an amendment which would provide for a complete denial of any loan to any private school in which segregation may now exist.

Mr. President, I take the point of view that we ought to pass a general civil rights bill, and that we should not try to add a little segment of civil rights to each piece of proposed legislation that comes before us, which would almost guarantee in advance that the proposed legislation would be defeated.

I took that position, Senators will remember, in 1949 when I opposed on the floor of the Senate and voted against an amendment which was offered to a public housing bill.

The amendment which was offered to the public housing bill, in my judgment, was offered by some, at least, who were motivated by a desire to "scuttle" the bill. It was a public housing bill which sought to make available to municipalities funds to be used for slum clearance and other public housing uses. I would not vote for an amendment to the bill which sought to embody in the bill a nonsegregation provision, because I felt that it was an attempt to prevent the passage of any bill at all, which would have resulted, in my judgment, had the amendment been added to the bill. I said then, as I say here on the floor of the Senate today, "count me in when you want to bring to the floor of the Senate a thoroughgoing civil rights bill which backs up the decisions of the U.S. Supreme Court in respect to the meaning of the 14th and 15th amendments."

But I am not going to destroy any chance of having my amendment passed on the floor of the Senate in the year 1960 by offering an amendment which is not contained in the public school section of Senate bill 8, which is not contained in the Hill-Burton Act, and which is not contained in a single one of the legislative precedents which I cited earlier in my argument this afternoon.

At the same time, my amendment should not be used as a subterfuge in a controversy which might develop in States X and Y in regard to a proposal to close public schools.

AMENDMENT ESTABLISHES PRIORITY

So all my amendment provides is that the Commissioner of Education must give priority to requests for loans from applicants proposing to construct school facilities in areas where the public schools are in operation.

Thus we have the kind of hypothetical to which I have referred, namely, a situation in which a State abolishes its public schools and then seeks to use the Morse amendment as a way of getting money for a segregated school which it seeks to establish in order to evade the decision of the U.S. Supreme Court. My amendment would become applicable, and the private school would not get the funds, because obviously priority would be given to others, and the requests would be so great that there would not be any funds available for a private school which was only a subterfuge.

That is my amendment. I think it is a very fair solution of what we all must admit is a very delicate problem. We all must admit that unless we rise above blind partisanship and prejudice in connection with this issue we may jeopardize all good legislation in this field. I think this is a very workable compromise. I send my amendment to the desk and ask that it be stated.

Mr. MORSE. Mr. President, again I ask that all Senators give very careful study to a most able memorandum opinion which has been submitted to our subcommittee, at our request, by the Department of Health, Education, and Welfare. Secretary Ribicoff's letter of transmittal points out that the Department has drawn upon the advice and opinion of some of the most able lawyers within the Government. I shall express some respectful dissents from certain conclusions in that memorandum opinion at a later time, but I stress that all of us are greatly indebted to Secretary Ribicoff for making what I think time will prove to be a very constructive contribution to this historic debate.

My plea is that all of us, irrespective of what our past views may have been on this subject matter, become students of this problem for the next few weeks, to the end of trying to devise in the Senate the best and soundest Federal-aid-to-education program we can.

Let us not forget that we as elders may engage in a controversy over the constitutional rights of the little boys and girls of this country; but also let us not forget that while we are engaging in that conflict and controversy, those little boys and girls are entitled to better educational assistance than they are now receiving to develop their intellectual potential.

All I want to do, so far as my part in the debate is concerned, is to try to find that ground on which a substantial majority of us can agree, so that in 1961 we can, for the first time, put on the statute books of the United States a Federal-aid-to-education bill. The Federal Government can then start to perform a part of the responsibility which I think it owes to the States in bringing to all boys and girls at least minimum standards of education. In my judgment, in many parts of the country, these standards can never be attained except through some form of assistance from the Federal Government.

I shall never lose sight of that issue. I shall never lose sight of those little boys and girls, whether they attend public schools or private schools. I shall never take the position that so far as public responsibility is concerned, children should suffer because of the religious faith of the family into which they were born.

I think that, as legislators, we have a duty to try to resolve this controvery as best we can, in the best interests of those little boys and girls.

Mr. President, I do not believe there can be any denying the fact that private schools are making a contribution to public education, in the sense that they are assuming a substantial part of the cost of educating our boys and girls.

I am not a Solomon, and I am not asking other people to be Solomons, but I should think it ought to be possible to find that line of division which will make it possible for us to legislate in the interests of the education of little boys and girls, separate and distinct from questions relating to the religious faith or the religious leanings of their parents. It is the problem of statesmanship which confronts us to do this.

I make the plea that we do our best to try to find that line of division in enacting legislation which will be of assistance to all boys and girls, irrespective of whether they attend a public or a private school. I make this plea that we do not continue to take the position summed up by the statement: "It is just too bad if the children were born into families whose parents believe in having them attend private schools."

Let us not forget also, that the States and the Federal Government have a responsibility to make certain that each boy and girl receive uniformity of treatment by having the opportunity to receive the same kind of education to which every other boy or girl is entitled.

I do not intend ever to lose sight of the relationship of the whole Federal aid-to-education issue to the security of my country. I believe that in the next 20 to 40 years, from the standpoint of the security of America, we cannot justify waste in the potential brainpower of our country. We will continue to waste it unless we enact some Federal aid to education legislation which will be of assistance to all boys and girls, irrespective of the kind of school, public or private, which they attend.

SKYLINE CRANE LOGGING EXPERIMENT

Mr. MORSE. Mr. President, the access roads program of our Federal forests has long been of deep interest to me. Accordingly, I was highly pleased to

learn of an experiment being conducted by the Forest Service at Cascade Head, Oreg., in cooperation with the Publisher's Paper Co. It has been designated as the skyline crane project.

It has long been a matter of concern to all conservationists that logging, with its requirements for skidding roads on steep hillsides, may create tremendous disturbances of the soil and to water retention capabilities.

The Forest Service has been conducting extensive experiments on techniques of timber removal which reduced the need for spur roads and their attendant soil disturbances. The details concerning the skyline crane experiment, which if successful will substantially reduce the need for construction of spur roads, are discussed in a letter, dated February 28, addressed to me by Acting Director Harris, of the Pacific Northwest Forest and Range Experiment Station, and in articles dated April 1960, and May 1960, prepared by Mr. Robert H. Ruth and Mr. David D. Wooldridge, respectively. I ask unanimous consent that these items be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. MORSE. Mr. President, I shall leave at my desk a photograph of this new skyline method of logging which is being explored. This is an exciting development. The area logged has virtually no surface disturbance, and almost every log has been picked up and transported through the air on lines to the loading point, so that it can be trucked to the mill. The logging area, instead of seeming to have been hit by a tornado, looks as though a giant mower and sweeper had been used to extract the logs, leaving the ground surface practically unscarred. The Forest Service is to be commended on its research. I hope that this work can proceed with vigor; and I suggest that the Forest Service consider, when the facts so indicate, the use of this method of logging as a requirement on appropriate timber sales.

There appears to be a good case for encouraging this sort of soil conservation. Possibly the Forest Service could provide in timber contracts that logging be carried on by this skyline method, with an allowance made in the contract price of the timber to enable subcontractors to provide this sort of log-yarding service. I believe that under the impetus of this leadership, the Forest Service could revolutionize the present logging procedures in steep mountain country, thereby producing great benefits for the cause of soil conservation.

I urge the Forest Service and the Bureau of Land Management to accept the challenge of this extremely interesting experiment, to demonstrate what can be done on this new type of logging.

EXHIBIT 1

U.S. DEPARTMENT OF AGRICULTURE,
FOREST SERVICE,
Portland, Oreg., February 28, 1961.

Hon. WAYNE MORSE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MORSE: Thank you for your inquiry of February 17 regarding the Skyline Crane project on the Cascade Head Experimental Forest.

This project is testing one of several modern forms of skyline logging which offer promise of minimizing soil erosion on steep slopes. It is designed to compare skyline and conventional high-lead yarding to determine amounts of soil disturbance, effects on regeneration, and yarding costs.

The current study was started in August 1960 in cooperation with the Publishers' Paper Co. If the equipment proves feasible it will have wide application on steep rocky slopes and areas of unstable soil. Use of this equipment will reduce the mileage of spur roads and skidroads needed, but will have no effect on the mileage of main line access roads that must be built to the logging site. These main line access roads will always be the mainstay of the forest road system and equally important for recreation, fire protection, salvage and subsequent harvesting operations, and other uses on national forests under multiple-use management.

Yarding on the first test area of Cascade Head, as shown in the enclosed photograph, will be completed within the next 30 days. Maximum yarding distance on this area was 2,700 feet. No intermediate supports were needed for the skyline. Next month the equipment will be moved to an area with a 4,000 foot yarding distance. Intermediate support will be used and both uphill and downhill yarding will be tested. We will keep you informed of progress on this project.

Attached are two publications by members of our staff covering previous tests and observations of skyline logging in the Pacific Northwest. One demonstration on the Okanogan National Forest required 1 mile of spur road to log a 1,000 acre area. In contrast, it was estimated that 10 miles of spur and skidroads would have been necessary to log the same area by any standard method. This test also showed that soil disturbance occurred on only 3 percent of the area logged with skyline equipment. On a nearby area logged with tractors soil disturbance was 16 percent. Thus, on steep ground, where skyline systems are best adapted, there is a minimum chance for damaging soil erosion.

We are planning additional studies of high-lead and skyline logging methods on the H. J. Andrews Experimental Forest, near Blue River, Oreg. The studies will be conducted on two matched watersheds averaging 240 acres. For the high-lead system a total of 1.7 miles of spur roads will be needed while the skyline system will require only 0.1 mile of spur road.

We appreciate your continued interest in the Forest Service research program and will be happy to provide any additional information you may need. We will welcome an opportunity to show you the Cascade Head operation and other research underway on our experimental forests at your convenience.

Very truly yours,

R. W. COWLIN,
Director.

IT'S TIME TO LOOK AT YARDING PROBLEMS ON STEEP SLOPES

(By Robert H. Ruth [1])

In many parts of the Pacific Northwest, logging operations are moving into rugged terrain as access roads probe deeper into the back country. Because of this trend, it's time to look more carefully at steep slopes and decide on the best possible management practices consistent with maximum protection against erosion.

Until recently the forest manager could avoid this decision. Road construction progressed up main drainages and into principal tributaries until steep slopes and difficult construction were encountered. At this point, operations were often shifted to another drainage where road costs were less and the timber was of better quality than the so-called inferior species growing at high elevations. This was done despite the fact that merchantable timber on most steep slopes has long been included in management plans and allowable-cut calculations.

Economics and the steady progress of timber harvesting have changed this situation. Most of the gentle topography has now been opened up with a road system. The lower quality timber on steep slopes and the high-elevation species are becoming more valuable every year.

How much commercial timberland is included in these problem areas? Estimates for the national forests of Oregon and Washington range from 1,500,000 to 3,800,000 acres. These are lands that should be managed with special effort to minimize soil disturbance, an objective calling for fewer roads and therefore longer yarding distances. Included are very steep slopes, together with erosive- or shallow-soil areas, and some municipal watersheds. In U.S. Forest Service management plans prepared 15 to 20 years ago, the most rugged of these areas were labeled "inoperable" and left out of allowable-cut calculations.

What problems are involved? For one thing, road costs normally increase as slope increases. More soil must be moved, back and fill slopes must be longer, creek crossings are more difficult, rock is more prevalent, and—except in rock areas—maintenance is more costly. Second, the road system occupies a greater part of the logging area. Silen and Gratkowski found that about 5.2 miles of road per square mile are needed to log with standard high-lead yarding techniques and an average maximum yarding distance of 700 feet.[2] This figure was for a typical Douglas-fir drainage. It was estimated that 6.2 percent of the total surface area was disturbed by road construction, and an additional 3.6 percent was disturbed by the construction of the areas needed for landing and loading the logs. For steeper topography, the percentage of disturbed area would be greater, perhaps averaging 11 or 12 percent.

Part of the disturbed area is taken permanently out of timber production. In the study mentioned above, this was estimated to be 2.9 percent for roads, plus 1.2 percent for landings. These amounts also would be greater on steep slopes. A total production loss figure of 5 percent, due to roads and landings, is frequently used in management planning.

European foresters were faced with problems similar to these immediately after World War II. Readily accessible timber had been exploited during the war, and still more was needed for reconstruction. Consequently, attention was turned to stands on the upper slopes, and this led to development of a new cable-yarding technique combining the principles of high-lead yarding and aerial transportation. In one continuous operation logs are yarded laterally, lifted to a suspended cable (skyline), and transported either uphill or downhill to a landing. Usually the logs are lowered down the skyline, with gravity supplying the power.

Gravity-skyline systems offer a solution to some of our problems on moderate as well as on steep slopes. Disturbance to ground surfaces and stream channels is min-

[1] Research forester at the Station's Corvallis Research Center, maintained in cooperation with the School of Forestry, Oregon State College.

[2] Silen, Roy R., and Gratkowski, H. J. An estimate of the amount of road in the staggered-setting system of clearcutting. U.S. Forest Service, Pacific Northwest. Forest and Range Experiment Station Res. Note 92, 4 pp. (processed), 1953.

imized because logs are quickly lifted off the ground. Yarding distances of a mile and more are possible, thus permitting a substantial reduction in costly road construction, and thereby reducing the capital investment needed to open up an area. Reduced road construction means reduced soil disturbance and less land taken out of production. Also, the wide road spacing would make it easier to locate the roads away from areas of unstable soil. Yet with gravity-skyline systems, road spacing would still appear adequate for protection and recreation needs.

Gravity-skyline yarding is adaptable to a variety of cutting methods. It can be used for selective logging as well as for clear cutting. There is also the possibility that, like the Europeans, we can use it for thinning and shelterwood cutting, thus bringing intensive management to steep slopes.

What action should be taken? One of the first steps should be to thoroughly investigate gravity-skyline yarding to see if it is applicable to Northwest conditions. Two test operations conducted in the State of Washington indicate some promise for the method. A Swiss skyline crane used on the Okanogan National Forest caused only a quarter of the soil disturbance resulting from a standard tractor-yarding operation on a nearby area. Road construction needed for the skyline operation was only 10 percent of that estimated necessary had the same area been yarded by tractors.[2] A recently developed modification using a radio-controlled carriage is now operating on the Mount Baker National Forest.

These and other gravity-skyline systems need further study to determine logging costs, silvicultural effects, and amounts of soil disturbance. When this information is available, problem areas can be reexamined, and improved management policies can be formulated.

[From the Journal of Forestry, May 1960]

WATERSHED DISTURBANCE FROM TRACTOR AND SKYLINE CRANE LOGGING

(By David D. Wooldridge)

As logging operations in the West continue to move farther into the mountains, an increasing volume of timber is being harvested from steep slopes. In these areas, where access is more difficult, road-building costs are greater. And on precipitous mountainsides, soil normally disturbed in logging is more susceptible to damaging slough and erosion. Because of these problems, many acres of timberland are considered inoperable with conventional logging methods.

Methods and equipment that will surmount some of these difficulties are available. Various overhead cable systems have been used in America for many years. Recently, interest has been centered in modified forms of skyline logging, prompted by the development of several European systems that combine the principles of high-lead logging and aerial transportation. One of these, which has been tested in several places in the United States and Canada, is the Swiss-developed Wyssen skyline crane.

One demonstration of the skyline crane was started October 1954 in a mixed conifer stand typical of the eastern flanks of the Cascade Range in Washington. Performance was good enough to warrant further tests, now being planned, and to encourage the adoption of modified skyline systems. For example, two recent contracts for sale of timber in rough, broken areas of the Cascades have prescribed logging methods similar to those of the skyline crane. Purpose of this requirement is to provide a means of satisfactorily harvesting a valuable resource on erosive soil types and otherwise inoperable terrain.

Relatively few studies have been made in the Northwest to determine the amount of soil disturbance caused by logging. Prior to introduction of the skyline crane, Garrison and Rummell examined forest-range conditions following logging in eastern Oregon and eastern Washington. They found that exposure of mineral soil averaged 20.9 percent of areas logged with tractors, 15.2 percent of areas logged with cables (jammer), and 11.8 percent of areas logged with horses. Fowells and Schubert found 22 percent bare ground following removal of 40 to 90 percent of a stand in the California pine zone logged by crawler tractor.

Soil disturbance caused by skyline logging in the Northwest has apparently not been measured, but an opportunity was provided by the trial operation of the skyline crane. In August 1957, after logging was completed, the study described herein was made to determine the extent and severity of soil disturbance. For purposes of comparison, similar measurements were made on a nearby area logged by a standard tractor operation.

As a secondary feature, damage to residual trees by the two logging methods was also examined.

STUDY AREAS

Both study areas are located on the Okanogan National Forest in north-central Washington, near the town of Twisp. Elevations on the area logged by the skyline crane range from 3,000 to 5,000 feet; on the area logged by tractor, from 2,000 to 3,500 feet. General topography of the tractor area is more moderate, although in both operations slopes in excess of 60 percent were logged. A slightly smaller volume of timber was available on the tractor area and the cut per acre was consequently smaller (table 1).

TABLE 1.—*Comparative data for areas logged by skyline crane and by tractor*

Item	Skyline Crane area	Tractor area
Size of area.....acres..	1,000	750
Total stand volume.....M b.m..	8,973	5,547
Ponderosa pine.....M b.m..	6,030	4,540
Douglas fir.....M b.m..	2,034	1,007
Western larch.....M b.m..	909	0
Average volume per acre (before logging).....M b.m..	9.0	7.4
Total volume cut.....percent..	81	65
Average volume cut per acre M b.m..	7.3	4.8
Average volume per acre (residual stand).....M b.m..	1.7	2.6

Keen's tree classification was used as a basis for marking ponderosa pine (Pinus ponderosa) for cutting in both logging areas. In general, all class 4 trees and all class 3 trees except those of good thrift were marked for cutting. Class 1 and class 2 trees were left unless they were defective. On the skyline crane study area, 90 percent of the Douglas-fir (Pseudotsuga menziesii var. glauca) and western larch (Larix occidentalis) was marked for cutting. On the tractor area, all Douglas-firs of poor thrift or vigor and those with 50 percent or more of the crown infected with mistletoe were marked. No western larch was present in the tractor area.

LOGGING METHODS

Skyline Crane.—The Wyssen skyline crane has been described in detail by Matson (4), and will be reviewed only briefly here. The basic unit is a single-drum yarder powered by an air-cooled, 4-cylinder diesel engine. The yarder operates from the ridgetop, lowering logs to the landing by means of a traveling carriage on a fixed, 1-inch-diameter skyline cable. A single operating cable yard logs to the skyline, where the choker locks to the carriage by a special hooking device. Then the carriage is released and travels by gravity down the skyline. The operating line and a large, air-cooled brake on the yarder control the speed of the carriage and its turn of logs as they descend to the landing.

Slightly more than 1 mile of truck road was constructed in the 1,000-acre area logged by the skyline crane. In contrast, it was estimated that 10 miles of road (including spurs) would have been needed for logging by any standard method.[1]

Tractor-arch: A nearby area selected for comparison was logged with a typical tractor-arch combination. Numerous landings were located along 4.1 miles of truck road. An additional 4.5 miles of main-haul tractor road was used for skidding logs to the landings.

STUDY METHODS

Estimates of soil disturbance in the two logged areas were based on measured samples along 3-chain transects extending from point established on a base line. Transects were spaced at 5-chain intervals and oriented by compass bearings paralleling the general contour. Along each transect, soil disturbance was classified and the lineal extent of each class measured with a tape to the nearest tenth of a foot. These measured lengths were then converted to percentage of total transect length. Transects and the 5-chain distances between them were paced.

Three classes of disturbance caused by yarding and skidding operations were defined. They were adapted from Garrison and Rummell, with slight modification:

1. Litter disturbance: Indicated by breaking down of brush or reproduction and disturbance to litter cover, but without removal of litter and soil cover.

2. Shallow soil disturbance: Indicated by renewal of ground vegetation, litter, and humus, exposing the mineral soil to a depth of less than 1 inch.

3. Deep soil disturbance: Same type of disturbance as class 2, but indicated by removal of soil to depths greater than 1 inch.

Observations for damage to residual stands were made in strips along each transect. All trees over 6 inches diameter breast height within 6.6 feet of the compass line were tallied and checked for crushing and breakage in the root systems and crowns and for scarring of the main stems.

RESULTS

Results from 131 transects indicate that both shallow and deep soil disturbance are significantly less in areas logged by skyline crane than in comparable areas logged by tractor (table 2). Differences in litter disturbance by the two methods, however, are not significant. Some soil disturbance was recorded on 91 percent of all three-chain transects in the tractor area, compared with 78 percent in the skyline crane area.

Tractor logging also caused more damage to the residual stand. A tally of the number of damaged trees showed that 21 percent were affected by tractor logging whereas only 13 percent received similar damage on the skyline crane area. Damage to the residual stand was found on 60 percent of all sample strips in the tractor area and on 30 percent of those in the skyline crane area.

DISCUSSION

The most conspicuous effect of logging in both areas is the exposure of mineral soil. This disturbance is not necessarily synonymous with damage. Still, because it represents a potential source of erosion, the comparative extent of exposed soil is the most

---

[1] U.S. Forest Service. Timber Sale Report, Jack Creek Area, Okanogan National Forest (1954). (Unpublished report; copy on file at regional office, Portland, Oreg.)

significant result of the study. Add the percentages of shallow and deep soil disturbance shown in table 2, and it becomes evident that tractor logging left exposed mineral soil on 22.2 percent of the area, compared with 5.4 percent left by the skyline crane.

It is interesting to note that total area of soil is disturbed by tractor logging in this study agrees closely with values reported by Garrison and Rummell and by Fowells and Schubert. Differences in topography, soils and timber stand conditions prevent direct comparisons but, significantly, in these three independent studies soil disturbance by tractors falls within the relatively narrow range of 20.9 and 22.2 percent. If 20-percent disturbance is assumed, tractor logging leaves about 128 acres of bare soil per section compared with about 35 acres for the skyline crane. (Based on the study by Garrison and Rummell, jammer and horse logging can be expected to expose about 97 acres and 75 acres of soil, respectively.)

TABLE 2.—*Average percentage of disturbance on areas logged by tractor and by skyline crane, by class of disturbance*

Logging method	Class of disturbance [1]			Total disturbance
	Litter	Shallow soil	Deep soil	
Tractor (67 transects)	7.2	6.3	15.9	29.4
Skyline Crane (64 transects)	5.7	2.2	3.2	11.1
Difference	1.5	[2] 4.1	[2] 12.7	[2] 18.3

[1] See "Study Methods" in text for definition.
[2] Significant at 99-percent level of probability.

The extent of litter disturbance caused by tractor logging was not significantly greater than that caused by the skyline crane. In both study areas about equal volumes of timber were removed, so one might expect about 7-percent litter disturbance when 70 to 80 percent of the timber stand is harvested. Since the soil surface remains covered with litter, this type of disturbance is considered unimportant in assessing effects of logging on watershed conditions.

An important phase of logging disturbance is the manner of crossing intermittent and permanent drainages. Though no quantitative data were taken, observations were made comparing this factor in the two logging areas. Many turns of logs were transported by the skyline crane across a stream channel without causing disturbance. In general, drainage crossings in the area logged by tractor were well planned, but even with the best of precautions the crossings still constituted a source of silt and debris during periods of runoff.

It is generally recognized that construction and use of logging roads contribute a large part of stream sediment. Logging with the skyline crane required about 10 percent of the truck road system estimated to be necessary for logging the same area by standard methods.

SUMMARY

In a comparative study of logging methods, soil disturbance caused by a Wyssen skyline crane was only a quarter of that caused by a standard crawler tractor operation. Soil disturbance on the skyline crane area was found on fewer transects, less damage was evident in the residual stand, and less road construction was needed. These advantages suggest the possibility of using skyline logging systems for harvesting timber in municipal watersheds and other areas previously closed to logging because of erosive soil conditions or steep, broken terrain.

RATIFICATION OF 23D AMENDMENT TO THE CONSTITUTION

Mr. MORSE. Mr. President, as one who long has labored in the vineyard of home rule for the District of Columbia, I am very gratified that at 1:30 p.m. a measure of citizenship was awarded the hitherto voteless District residents.

To be permitted to vote for the President and Vice President of the United States is no small right. Recognition of this fact was made apparent by the speed with which the amendment moved through the constitutionally required processes of congressional adoption and State legislative ratification. Such celerity is a demonstration of the disapproval with which we, as a people, regard any denial of democratic rights. It is an earnest of the approval which, in my judgment, the citizens of the Nation would give to the adoption of municipal home rule for Washington, D.C.

A portion of the goal has been achieved. But there yet is work to be done: National representation in the Congress and devolution to the District of Columbia voters of political control of the municipal affairs of the city of Washington remain to be achieved. Both can be done by statute.

It is my hope that the public-spirited men and women who gave unstintingly of their time and efforts to press for ratification of the 23rd amendment will now devote their considerable talents and energies to the remaining job.

As a member of the Senate Committee on the District of Columbia and as the author of home-rule bills which have been passed by the Senate, I gladly invite the aid and assistance of my colleagues as well as the assistance of the now partially enfranchised District of Columbia residents, in the next phase of the struggle.

In closing, I wish to extend to my colleagues here and to the members of the House of Representatives who in the first instance voted for the amendment, my heartiest congratulations. Likewise deserving of our thanks are the members of the State legislatures who, with their ratification votes, had the high privilege of crowning our work and that of our colleagues at the other end of the Capitol. As an Oregonian, I am proud that my State was in the forefront of those which gave their approval to this long overdue reform.

Mr. McNAMARA. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HICKEY in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate now stand in recess, subject to the call of the Chair.

The PRESIDING OFFICER. Is there objection?

There being no objection, at 7 o'clock and 8 minutes p.m., the Senate took a recess, subject to the call of the Chair.

At 7 o'clock and 31 minutes p.m., the Senate reassembled when called to order by the Presiding Officer (Mr. SMATHERS in the chair).

Mr. KERR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. SMATHERS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF SUGAR ACT OF 1948—CONFERENCE REPORT

Mr. KERR. Mr. President, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For the conference report see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. KERR. Mr. President, the House conferees receded from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, 6, and agreed to the same. Those numbers identify the amendments which have to do with the duration or term of the extension of the act, the term being extended to 15 months rather than 21 months.

The Senate receded from its amendment numbered 8, which was the so-called Anderson amendment. The Anderson amendment was cosponsored by the Senators from Oklahoma and many other Senators. With reference to that amendment the chairman of the House conferees, Mr. COOLEY, and the other members of the House conferees gave the Senate conferees definite assurances as follows:

First, that beginning in the early part of the month of May of this year the House committee would begin hearings on another sugar bill and would move with all their ability and make every effort of which they are capable to secure enactment of a sugar bill by the House and get it over to the Senate in time for action by the Senate this year.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. HOLLAND. Does the Senator mean a so-called permanent sugar act, as contrasted with a temporary extension of the present act?

Mr. KERR. Those words were not used. It was our understanding that they were talking about a sugar bill which would provide for an extension of years rather than one that would deal with an emergency which had been created or permitted to develop.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. KERR. In a moment. They further requested that the Committee on Finance of the Senate began holding hearings concurrently with them in order that the matter might be fully heard by both committees of Congress this year, in order that during the current session of Congress it would be possible for Congress to act on this question for a longer period of time than that provided in the bill.

Mr. BENNETT. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. BENNETT. When the chairman of the House committee said he would invite representatives of areas which hoped to get new beet acreage to be the first witnesses at his hearings, the Senator from Utah gained the impression that the House committee was expected to go into all phases of the sugar bill, with the thought that it would come forth with what we would call permanent legislation.

Mr. KERR. That was the impression I obtained from the statement by the chairman of the House conferees and the chairman of the House committee. Mr. President, the Senate conferees were a little rough in their language to the chairman of the House committee. They referred to what amounted to almost a lack of appreciation of the extent to which he had made efforts heretofore to get this legislation to the Senate in time for full and appropriate action by the Senate.

The conference broke up in a spirit of good will prevailing, which was to some degree to my surprise, because the conferees had talked to each other quite frankly, and the representatives of the Senate had expressed to the House conferees the opinion that the Senate felt that there ought to be a greater effort on the part of the House committee, to make it possible for a further consideration by the Senate and a greater degree of cooperation. I was delighted not only that the response to the language used and the statements made by the Senate conferees was constructive, and one which not only had spoken words of assurance, but also that the manner of the conferees was such as to be calculated to let the Senate conferees feel the sincerity of the assurances then being given.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. AIKEN. Pending the enactment of permanent legislation, what will be the authority of the Department of Agriculture relative to the purchase of sugar from Latin American countries, particularly Brazil, Peru, and any of the other countries?

Mr. KERR. I do not believe I understood the Senator's question.

Mr. AIKEN. What will be the authority to purchase from neighboring states to make up the deficiency caused by the reduction in the quota from Cuba and possibly other countries?

Mr. KERR. That question was not in conference. I do not believe any change was made from the law of last year.

Mr. AIKEN. It will be the same authority that has been in existence since last July. Is that correct?

Mr. KERR. Yes. An amendment had been offered by the Senator from Kansas. The language of the House bill provided that consideration would be given to countries that were purchasing agricultural commodities from this country. The House conferees would not take the word "preference" in the amendment of the Senator from Kansas. The representatives of the Department of Agriculture were present, and they said they could not administer an act with that word in it. The word "special" was agreed to, and therefore the language now reads that special consideration will be given to those countries which purchase agricultural commodities from the United States.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. CARLSON. I wish the RECORD to show that there was considerable discussion of the need for adjustment of this situation, and that we ought to give consideration to it. In the final analysis, in connection with the commodities to be purchased from the United States, I was convinced, as the author of the amendment that there would be some difficulty with the word "preference." We were assured that special consideration would be given in dealing with this problem.

Mr. KERR. I agreed with the Senator from Kansas. I must say that I was more convinced of their objection to the word "preference" than of the difficulty of administration of the act with the word "preference" in it. However, the protests and objections were just as vehement as if they were describing accurately what they believed to be difficult.

Mr. SMATHERS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. MONRONEY in the chair). Does the Senator from Oklahoma yield to the Senator from Florida?

Mr. KERR. I yield.

Mr. SMATHERS. I should like to make an addendum to what the Senator from Utah has said about Mr. COOLEY indicating that he would hold hearings, and that the first witnesses would be those seeking additional quotas for beet sugar production. I add also that he included those who seek additional quotas for cane sugar production.

Mr. BENNETT. The Senator from Utah was in error in singling out those growers who were seeking acreage. It was new growers who were seeking acreage; yes.

Mr. KERR. Either beet or cane.

Mr. President, I now have a copy of the language which is in the report of the managers on the part of the House of Representatives in the conference. It reads:

The Senate receded from this amendment—

That is amendment number 8, or the Anderson amendment—

with the understanding that hearings on a long-range—

That was the phrase I tried to think of in replying to the Senator from Florida. He used the word "permanent," I believe.

The Senate receded from this amendment with the understanding that hearings on a long-range sugar bill will be started by the House Committee on Agriculture early in May and that every effort will be made to report a bill and pass it through the House at this session of Congress. The House conferees also expressed the hope that the Senate Committee on Finance would undertake hearings contemporaneously with those of the House so that long-range sugar legislation might be enacted at the earliest practicable date.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. HOLLAND. The explanation just made by the Senator from Oklahoma is very helpful. The phrase "long range" probably expresses what I had in mind better than the word "permanent." Am I correct in understanding that all conferees, of both the House and Senate, signed the conference report?

Mr. KERR. I believe they did.

Mr. HOLLAND. I congratulate the Senator from Oklahoma and the other conferees on the very happy termination of the conference.

Mr. KERR. I recommend approval of the conference report.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mr. KERR. I yield.

Mr. MANSFIELD. The Senator has mentioned the fact that the House would start hearings on a long-range act in May, and that it was their suggestion that the Committee on Finance of the Senate should consider the possibility of acting concurrently on the same matter. Is it the Senator's impression, as chairman of the Senate conferees, that when these committees meet they will also discuss at the same time the Douglas proposal, which was adopted by the Committee on Finance?

Mr. KERR. That is the desire and purpose of the Senator from Oklahoma, and the belief of the Senator from Oklahoma. The distinguished Senator from Virginia [Mr. BYRD], the chairman of the Committee on Finance, assured us that he would cooperate in every possible way to hold early and adequate hearings this year.

Mr. DIRKSEN. Mr. President, will the the Senator from Oklahoma yield?

Mr. KERR. I yield.

Mr. DIRKSEN. Do I correctly understand that the Senate conferees approach their responsibilities with customary candor and vigor, and that on occasions the language was ruggedly classic or classically rugged, one way or the other.

Mr. KERR. Or both.

Mr. DIRKSEN. And that the Senate conferees really upheld the full tradition of the Senate?

Mr. KERR. I thank my great friend from Illinois and say to him that I have no basis on which to disagree in the slightest extent. [Laughter.]

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. KERR. Mr. President, I move that the vote by which the conference report was agreed to be reconsidered.

Mr. CARLSON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to consider executive business.

Mr. MANSFIELD. Mr. President, sundry nominations were reported today from the Committee on Armed Services. I ask for their immediate consideration.

The PRESIDING OFFICER. The nominations will be stated.

U.S. MARINE CORPS

The Chief Clerk read the nomination of Lt. Gen. Thomas A. Wornham, U.S. Marine Corps, to be placed on the retired list in the grade of lieutenant general.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

U.S. AIR FORCE

The Chief Clerk read the nomination of Lt. Gen. Donald N. Yates, 584(A) major general, Regular Air Force, U.S. Air Force, to be placed on the retired list in the grade of lieutenant general.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

NOMINATIONS ORDERED TO LIE ON THE TABLE

The Chief Clerk proceeded to read sundry nominations which had been ordered to lie on the table.

Mr. MANSFIELD. Mr. President, I ask that the nominations be confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations will be considered en bloc; and, without objection, they are confirmed.

Mr. MANSFIELD. Mr. President, I move that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith of the confirmation of the nominations.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

THIRD SUPPLEMENTAL APPROPRIATION BILL—CONFERENCE REPORT

Mr. MANSFIELD. Mr. President, on behalf of the Senator from Arizona [Mr. HAYDEN], the chairman of the committee, I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill—H.R. 5188—making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read for the information of the Senate.

The legislative clerk read the report.

(For conference report see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

Mr. MANSFIELD. Mr. President, I did not wish to have the conference report agreed to; I simply wished to have it brought before the Senate, because the chairman of the committee, the distinguished Senator from Arizona [Mr. HAYDEN], will be present tomorrow to explain the report.

I ask unanimous consent that the action of the Senate, just taken, in agreeing to the conference report be reconsidered.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Montana that the action of the Senate, just taken, in agreeing to the conference report be reconsidered? The Chair hears none, and it is so ordered.

ORDER OF BUSINESS

Mr. MANSFIELD. Mr. President, is the conference report on the third supplemental appropriation bill now the pending business?

The PRESIDING OFFICER. It is the pending business.

TRANSACTION OF ADDITIONAL ROUTINE BUSINESS

By unanimous consent the following additional routine business was transacted:

ADDITIONAL BILL INTRODUCED

Mr. HRUSKA, by unanimous consent, on behalf of himself and Senators COTTON and KEATING, introduced a bill (S. 1484) to provide for the representation of indigent defendants in criminal cases in the district courts of the United States, which was read twice by its title and referred to the Committee on the Judiciary.

(See the remarks of Mr. HRUSKA when he introduced the above bill, which appear under a separate heading.)

REPRESENTATION OF INDIGENT DEFENDANTS IN CRIMINAL CASES IN DISTRICT COURTS

Mr. HRUSKA. Mr. President, on behalf of myself, the Senator from New Hampshire [Mr. COTTON] and the Senator from New York [Mr. KEATING], I introduce, for appropriate reference, a bill to provide for the representation of indigent defendants in criminal cases in the district courts of the United States. I ask unanimous consent that an explanatory statement of the bill, prepared by me, may be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The bill (S. 1484) to provide for the representation of indigent defendants in criminal cases in the district courts of the United States, introduced by Mr. HRUSKA (for himself and other Senators), was received, read twice by its title, and referred to the Committee on the Judiciary.

The statement presented by Mr. HRUSKA, is as follows:

STATEMENT OF SENATOR HRUSKA

The problem of representation for indigent defendants has long been the concern of our courts, the legal profession, the Department of Justice, and the Congress. There is common and widespread dissatisfaction with the present system of assigned counsel which imposes a heavy burden upon the bar; nor is it fair to destitute defendants who are often represented by counsel inexperienced in criminal matters even though they may be distinguished and even outstanding in other fields of the profession. A serious fault in the present system is that the bar is required to serve without compensation or, for that matter, even without reimbursement for expenses which are incurred in the preparation of the case.

The urgent need for a more practicable means to fulfill the requirement of the sixth amendment that in all criminal prosecutions the accused shall have the right to the assistance of counsel for his defense was recognized by the Senate Judiciary Committee in favorably reporting S. 895 in the 1st session of the 86th Congress. This bill was passed by the Senate on May 20, 1959. I was happy to give my full support to the measure both in committee and on the floor.

I am sending to the desk a bill which is a revised version of the measure passed in the last Congress. Many of the amendments which it contains are based on comments and recommendations made by members of the Federal judiciary, law school deans and professors, and members of the American Bar Association as reported in the House Judiciary Committee print of a survey on legislation related to this subject.

The bill introduced today provides for the appointment of public defenders by district courts on either a part-time or full-time basis, as dictated by the volume of work in those courts. It also leaves the district courts with the option of appointing special counsel for particular cases, if they feel this method would be more advantageous than the use of public defenders. Certain limitations are placed on remuneration paid and expenses incurred.

Before any public defender or assistant public defender is authorized in any district, there must be approval of the Judicial Council of the circuit. The bill provides for the appointment of clerks and investigators and the hiring of technical experts and other special personnel, subject to the approval of the court or the Administrative Office, whichever is appropriate in that case. It provides authorizations for the courts to use appointed special counsel when in their opinion such appointments are justified.

The bill makes it clear that counsel should be made available to indigent defendants as early as the preliminary examination and arraignment. It provides that the public defender and his assistant have at least 5 years of practice before the bar and that they be appointed for a term of 4 years.

The bill specifies that the salary of a public defender shall be in an amount determined by the Judicial Conference of the United States and that it shall be exceed that of the U.S. attorney in the district concerned.

The bill provides for payment of assigned counsel at a rate determined by the court but not to exceed $50 a day with a maximum limitation for the aggregate costs of such counsel in any district for 1 year of $10,000.

In view of the increasing importance which has been attached to legislation on this subject, it is hoped that the Senate Judiciary Committee will schedule hearings on all pending bills at an early date this year.

ADJOURNMENT

Mr. MANSFIELD. Mr. President, if there is no further business to come before the Senate, I move that the Senate adjourn until 12 o'clock noon tomorrow.

The motion was agreed to; and at 7 o'clock and 53 minutes p.m., the Senate adjourned until tomorrow, Thursday, March 30, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 29, 1961:

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

John M. Leddy, of Virginia, to be U.S. Executive Director of the International Bank for Reconstruction and Development for a term of 2 years.

U.S. ATTORNEYS

Floyd M. Buford, of Georgia, to be U.S. attorney for the middle district of Georgia for a term of 4 years, vice Frank O. Evans.

Edward F. Boardman, of Florida, to be U.S. attorney for the southern district of Florida for a term of 4 years, vice James L. Guilmartin, resigned.

Charles A. Muecke, of Arizona, to be U.S. attorney for the district of Arizona for a term of 4 years, vice Jack D. H. Hays, resigned.

James B. Brennan, of Wisconsin, to be U.S. attorney for the eastern district of Wisconsin for a term of 4 years, vice Edward G. Minor.

Joseph P. Hoey, of New York, to be U.S. attorney for the eastern district of New York for a term of 4 years, vice Cornelius W. Wickersham, Jr.

U.S. MARSHALS

Joseph N. Tierney, of Illinois, to be U.S. marshal for the northern district of Illinois for a term of 4 years, vice William W. Kipp, Sr.

John Terrill, of Wyoming, to be U.S. marshal for the district of Wyoming for a term of 4 years, vice Noah W. Riley.

CONFIRMATIONS

Executive nominations confirmed by the Senate March 29, 1961:

U.S. AIR FORCE

Lt. Gen Donald N. Yates, 584A (major general, Regular Air Force), U.S. Air Force, to be placed on the retired list in the grade of lieutenant general, under the provisions of section 8962, title 10, of the United States Code.

U.S. MARINE CORPS

Lt. Gen. Thomas A. Wornham, U.S. Marine Corps, to be placed on the retired list in the grade of lieutenant general in accordance with title 10, United States Code, section 5233.

Maj. Gen. Alan Shapley, U.S. Marine Corps, to be lieutenant general while serving in commands and other duties as determined by the President to be within the contemplation of title 10, United States Code, section 5232.

U.S. ARMY

The following-named officers to be placed on the retired list, in the grades indicated, under the provisions of title 10, United States Code, section 3962:

To be general

Gen. Carter Bowie Magruder, O15155, Army of the United States (major general, U.S. Army).

To be lieutenant generals

Lt. Gen. Emercon Charles Itschner, O15516, Army of the United States (major general, U.S. Army).

Lt. Gen. Robert Milchrist Cannon, O16163, Army of the United States (major general, U.S. Army).

Lt. Gen. Thomas Leonard Harrold, O16051, Army of the United States (major general, U.S. Army).

Lt. Gen. Gordon Byrom Rogers, O15620, Army of the United States (major general, U.S. Army).

Lt. Gen. John Albert Dabney, O16602, Army of the United States (major general, U.S. Army).

The following-named officers under the provisions of title 10, United States Code, section 3066, to be assigned to a position of importance and responsibility designated by the President under subsection (a) of section 3066, in rank as follows:

Lt. Gen. Guy Stanley Meloy, Jr., O16892, Army of the United States (major general, U.S. Army), in the rank of general.

Maj. Gen. Andrew Thomas McNamara, O17324, U.S. Army, in the rank of lieutenant general.

Maj. Gen. John Knight Waters, O18481, U.S. Army, in the rank of lieutenant general.

Maj. Gen. Hugh Pate Harris, O18518, Army of the United States (brigadier general, U.S. Army), in the rank of lieutenant general.

The nominations beginning Harry W. Miller 2d, to be captain, and ending William W. Watkin, Jr., to be professor of earth, space and graphic sciences, U.S. Military Academy, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on March 3, 1961.

IN THE NAVY AND MARINE CORPS

The nominations beginning Richard V. Aamodt, to be an ensign in the Navy, and ending Mel J. Swanborn, to be a first lieutenant in the Marine Corps, which nominations were received by the Senate and appeared in the CONGRESSIONAL RECORD on March 20, 1961.

HOUSE OF REPRESENTATIVES

WEDNESDAY, MARCH 29, 1961

The House met at 11 o'clock a.m.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

John 3: 17: *God sent not His Son into the world to condemn the world; but that through Him, the world might be saved.*

Almighty God, during this Holy Week, we are commemorating events in the life of our Lord, whose spiritual significance our finite minds cannot comprehend.

We rejoice that when there was no eye to pity and no arm to save, then in the fullness of time Thou didst send Thine only begotten Son, who, on Good Friday, laid upon the altar the acceptable sacrifice of His own life.

May these days be for all of us not only a time of commemoration but of consecration when we are seeking to share in our Master's redemptive ministry.

Show us how we may release the hidden splendor of humanity, emancipating it from everything that defiles and degrades the soul of man and mars the image of God in which we have been created.

Hear us in the name of the Captain of our salvation. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Ratchford, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 107. An act to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes.

S. 1358. An act to repeal section 12 of the act of June 26, 1884, prohibiting a charge or collection of fees by consular officers for official services to American vessels and seamen, and to repeal the provisions of the act of June 4, 1920, authorizing the free issuance of passports to seamen.

The message also announced that the Vice President had appointed Mr. Charles William Engelhard, Jr., of New Jersey, Mr. Elmo B. Roper, Jr., of Connecticut, Mr. Douglas Wynn, of Mississippi, Mrs. Edith S. Sampson, of Illinois, Mr. Alex Warden, of Montana, Mr. Christian A. Herter, of Massachusetts, Mr. William F. Knowland, of California, Mr. Ben Regan, of Illinois, Mr. David

Rockefeller, of New York, and Dr. Francis S. Hutchins, of Kentucky, to the U.S. Citizens Commission on NATO.

THIRD SUPPLEMENTAL APPROPRIATION BILL

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the managers on the part of the House may have until midnight tonight to file a conference report on the third supplemental appropriation bill, H.R. 5188.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. GROSS. Mr. Speaker, reserving the right to object, this deficiency appropriation bill has been tremendously increased in cost since it left the House by reason of some 90 amendments put on the bill by the other body. I would hope that the House would have ample time to study this conference report before it is called up. I assume the request of the distinguished majority leader means that it could be called up tomorrow morning or tomorrow afternoon; is that correct?

Mr. McCORMACK. Well, if I might make an observation, I am simply a conduit to make the request. Now, in answer to the gentleman's question, I would say that if the conference report is not filed tonight, the only opportunity to read the report would be in the morning. I think that observation is practically correct.

Mr. GROSS. I am only pleading for time for Members of the House in view of the fact, as I understand it, that there are some 90 amendments to this bill to study and know what is in the conference report.

Mr. McCORMACK. Of course, this is the customary way to do it.

Mr. GROSS. I am well aware of that. But, I do believe that Members should have an opportunity to examine the conference report that may carry an abnormal number of amendments and changes of language.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. HALLECK. Mr. Speaker, further reserving the right to object, I knew, of course, of the addition of these very substantial amounts in the other body. To my mind, they are completely unjustified. It may be that some consider it a matter of bookkeeping, but I believe it is more than that. Now, I shall not object to this request because I am quite sure that the managers on the part of the House are not going along with those additions that were made in the other body. I certainly do not think they should. I think they ought to stand for the House position.

We passed a bill providing for supplemental appropriations that I think contained all that is needed at this time. As far as I am concerned, I am not going to object, but I express the hope that the managers on the part of the House will maintain the House position.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

EDUCATION SUBCOMMITTEE OF COMMITTEE ON EDUCATION AND LABOR

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the Subcommittee on Education of the Committee on Education and Labor be permitted to sit during general debate today.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

CALL OF THE HOUSE

Mr. KILBURN. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. McCORMACK. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The Clerk called the roll, and the following Members failed to answer to their names:

[Roll No. 31]

Alford	Harrison, Va.	Shelley
Breeding	Holifield	Short
Buckley	Jensen	Spence
Cannon	McDonough	Taber
Celler	McSween	Thompson, La.
Davis, Tenn.	Macdonald	Willis
Durno	Morrison	Wilson, Calif.
Findley	Morse	Wright
Fino	St. Germain	

The SPEAKER. On this rollcall 405 Members have answered to their names, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

SUBCOMMITTEE ON UNEMPLOYMENT AND AUTOMATION

Mr. HOLLAND. Mr. Speaker, I ask unanimous consent that the Subcommittee on Unemployment and Automation of the Committee on Education and Labor be permitted to sit today during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMITTEE ON WAYS AND MEANS

Mr. MILLS. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means may have until midnight Friday, April 7, to file a report on the bill H.R. 6027, including minority views and individual supplemental views.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

AREA REDEVELOPMENT ACT

Mr. PATMAN. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (S. 1) to establish an effective program to alleviate conditions of substantial and persistent unemployment in certain economically distressed areas.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the further consideration of the bill (S. 1), with Mr. Boggs in the chair.

The clerk read the title of the bill.

The CHAIRMAN. When the Committee rose on yesterday, the gentleman from Texas [Mr. PATMAN] had 52 minutes remaining and the gentleman from New York [Mr. KILBURN] had 58 minutes remaining.

The Chair recognizes the gentleman from Texas [Mr. PATMAN].

Mr. PATMAN. Mr. Chairman, I yield 10 minutes to the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, first of all I want to express my wholehearted support of S. 1 as amended by the House Committee on Banking and Currency. I shall leave questions of technicalities and the composition of the legislation to members of the Committee on Banking and Currency.

It will be my purpose, Mr. Chairman, since my State of West Virginia has the greatest unemployment and is at the bottom of the economic totem pole to devote the time allotted me to the consideration of some situations in West Virginia.

This photograph shows a typical mine tipple in West Virginia. More than one-half of the tipples in West Virginia are now closed and they are crumbling to waste material because the mines are no longer in use. The point I want to make here is that coal is an important factor in national defense. If mine installations like this one are allowed to depreciate, what will be the situation in a basic fuel as necessary as coal in the event we had a third world war? I mention that to show its importance to our national defense. This is a typical mine tipple. You can see what is happening to it.

Here is a mine that has been closed. Here is the mine foreman. There are no men working. This is another installation that is depreciating, but it may be needed before many more years.

Here is a typical mine company store, boarded up, not in operation during the last year. Four hundred miners were employed at that installation.

This shows a typical notice on the side of the company house telling them to apply for jobs, but the window is boarded up. There are no jobs.

Mr. Chairman, I want everybody to see this one. Here is a bus used by the company to transport miners to their mines. Today it is occupied by a family of four as a home for an unemployed miner.

Here is a typical situation in a miner's home in West Virginia in which this family lived. You can see the coal burner there and the wrack and ruin inside the home of a typical miner.

I hope you all have an opportunity to observe this one. This is the unemploy-

ment situation in West Virginia areas of substantial unemployment. I call your attention to the fact that the distressed areas in West Virginia parallel largely our areas of coal production. Coal is in difficulty, and every coal area in West Virginia is in difficulty. In these red areas indicated on this map there is an excess of unemployment of 30 percent. While in the State as a whole it is not that high, these are the outstanding areas of unemployment. In these areas marked in red over 35 percent of the people are living on surplus foods.

On this map the counties marked in red have lost population in excess of 40 percent between 1950 and 1960.

Here are the public assistance payments. Notice the rise during the 10-year period, and they are still mounting.

Here is the out-migration, showing the percentage of people who have left West Virginia to try to find jobs in other areas. This would indicate that some counties have lost from 20 to 50 percent of their population, and some even more. The others are less, of course. But the people of West Virginia have honestly tried to find jobs abroad but have not been able to find them because of the fact that 101 of the 154 economic areas have the same situation, although not quite as bad as West Virginia has, but there is unemployment all over the Nation.

Here is your per capita income for West Virginia. Notice that these red areas here are $900 to $1,299 of income. In the white areas the income is from $1,300 to $1,699. In the other areas like this area here it is $1,700 to $2,099. The national average is $2,247. West Virginia's average is $1,700, over $500 below the average income of the people throughout the Nation.

I know my time is limited, but I would like to make this appeal to you. Ten years ago when we found approximately 4,000 of our school districts throughout the country impacted you rallied to my legislation and set up legislation for making payments by the Government for having impacted school districts. It was a very popular piece of legislation. I submit that the Federal Government by legislation on the statute books, overt action by the Congress itself, has impacted these distressed areas.

Seventy-five percent of the economic troubles in the State of West Virginia and the unfavorable conditions in West Virginia have been brought about by the administration as well as the maladministration of our present trade agreement policies. Do not let them tell you that our troubles in West Virginia are due to automation. We have lost 27½ million tons of our soft coal markets as a result of the importation of cheap residual oil from Venezuela. As a result of the way our present trade policies are being administered, we have had just as much of an impact as a result of the actions of the Government in these distressed areas as there was in the 4,000 school districts.

When it comes to the matter of school districts, I have been witnessing as chairman of the committee hearing Members of Congress tell about how terrific the Government impact has been on their districts, and I am a little bit surprised that there is not a little more interest shown on this economic impact as a result of the trade agreement policies that is very, very serious, indeed.

Let me tell you that testimony was brought out before my Committee on Education about a week ago showing that schoolteachers in the State of West Virginia are receiving as their basic, beginning pay as low as $1,500 a year.

The CHAIRMAN. The time of the gentleman from West Virginia has expired.

Mr. PATMAN. Mr. Chairman, I yield 2 additional minutes to the gentleman.

Mr. BAILEY. Mr. Chairman, my State of West Virginia is not asking for charity. All we want in West Virginia is jobs. At least six and possibly seven of the major industries in the State of West Virginia are suffering under the handicap of too much competition from foreign imports. If that situation were remedied, we would not be in a bad economic condition in West Virginia. I ask you to give serious consideration to the needs not only of my State of West Virginia but to the needs of all of the other States that have been impacted by Government activities and by Federal legislation.

Mr. Chairman, I want to express my appreciation for what was done by the Committee on Banking and Currency. Section 5 of the original bill stated that these grants and loans are being made to compensate distressed areas for injury suffered as a result of certain Federal laws and the reciprocal trade agreements act was named as being one of those Federal laws. I asked the committee to take that out because I would feel somewhat embarrassed to support a bill which would not solve the economic difficulties of the State of West Virginia. The passage of this bill will not solve the problems we face in my State. It will be a temporary shot in the arm, but it will not solve these economic problems. We are simply asking you to give us the same consideration that was given to large parts of this Nation.

Mr. Chairman, I appreciate this opportunity to plead the cause of my State of West Virginia before my colleagues.

Mr. KILBURN. Mr. Chairman, I yield 7 minutes to the gentleman from Pennsylvania [Mr. SCRANTON].

Mr. SCRANTON. Mr. Chairman, coming from an area which is highly interested in this legislation, as almost everybody in this Chamber knows, it would be very remiss of me at this time if I failed to thank the Republican leadership of the House for the opportunity to serve on this committee, and to thank the eminent ranking minority member of this committee [Mr. KILBURN] for giving me the opportunity to serve on the subcommittee. I am exceedingly grateful to that distinguished Member of this body, the gentleman from Kentucky [Mr. SPENCE] who heads our committee and the distinguished Member, the gentleman from Texas, the head of the subcommittee [Mr. PATMAN], for their courtesies and kindnesses shown me in the hearings and in the meetings of the committee.

There is a reason for this gratitude, and the reason goes deep: A great many people of my area have had this condition of chronic and persistent unemployment for a period of many years. This area was one of many which immediately after World War II started an effort of its own to establish a community organization, to establish more businesses and more enterprises, and to build plants. The results were amazing.

Because this was the first such approach, the first such community corporation formed, it was copied and followed by a great many others, in foreign countries as well as our own, and we have had as many as 200 delegations come to our county to learn what we have done and to follow in our path.

Many depressed areas have tried to the best of their ability to provide self-help. They have gone to the people over and over again. Some 51,000 people in Lackawanna County alone have given money in order to pick themselves up by their own bootstraps; and these people and many others in the country have established such organizations and have done the best they could to help themselves. The result is that we now have a great number of such community corporations. In addition there are many smaller communities in long-distressed areas which unfortunately are in no financial shape today, nor have they been over many years, to carry on such self-help without some outside source of financing.

Essentially, therefore, I support this bill, not to give these places of persistent and substantial unemployment certain advantages over more prosperous communities, but simply to give them an opportunity to compete or, to put it colloquially, "to catch up." They have tried on their own, they have obtained bank help, they have obtained some help from insurance companies, some State help, but, unfortunately, a great many of them have now run out of money or are in the process of running out, or are in such condition that they are unable to borrow because of legal limits on their indebtedness.

The fact is that in this Nation today financing of industrial plants has become a common practice, so common in fact, that industry just assumes it will be available. It is available almost without limit almost everywhere in the Nation except in distressed areas. So availability of financing through public or private means is assumed by industry, and that is exactly why the labor surplus areas find themselves at such a disadvantage without such financing.

Without this additional source of financing many of these areas are unable to develop public facilities, and this is a dire and extreme need in certain areas. Why? Because without industry you do not have the tax source to keep up with the rest of the Nation in the development of public facilities; and, without public facilities, industry is not interested in locating in an area. It is, in essence, a vicious spiral; one goes hand in hand with the other.

I have tried to describe a situation that maintains in a great many areas. Let us see how it occurs and why it is something

that must be attacked, why this program will work and why it will do the job. Let me give you just one example, an example from our own area, if you will, but which I think is extremely important.

Most of these communities, as you well know, have established a system of self-help. They have an organization. They have built plants. These plants have been leased or rented to industries. The result is that in the course of time by rentals, or by purchasing the plants the money comes back, and it comes back well and finally. The same thing is happening to all of our community organizations we have established; it is happening in States where they have aided in financing for this purpose, and it will happen with the Federal Government if it steps into the field.

Remember, this is not a handout, and a handout is not what we want. We want simply another source of financing, the kind of financing we have been doing in our States and the States have been helping us to do. These communities have gone to the people over and over again for money and many have reached the limit of what can be raised locally.

Likewise, we are not in the least interested in having Federal control over this system. We believe that having done it ourselves, through our own local leadership and initiative, that is the way to do it, that is the most effective way.

I am pleased to state to you, Mr. Chairman, that the Secretary of Commerce in his testimony before our subcommittee made it very clear he feels likewise; that local leadership and local initiative are the basic essentials of this program as they have been over the past 15 years.

In short, this whole program is not intended in any sense as a method of having the Federal Government get into an area where it does not belong. It is intended as a separate step of financing of exactly the same type we have been doing locally through the people, out of their own pockets, and with the help of banks and other institutions.

It is, as I say, an answer to this problem which, instead of giving out Federal money as a handout, acts as an impetus to private enterprise, so that private enterprise takes over the buildings just as we would like to have them do once they are paid for by rentals or by purchase.

Two last points. It has been pointed out before, and I reiterate, this bill is a better bill than any that has yet come before the House for consideration. Why? Because it has four features recommended by the Eisenhower administration—the direct method of appropriation, a strong antipiracy provision, criteria which was recommended by the Eisenhower administration and, last but by no means least, the administration of it is placed in the Department of Commerce.

That leads me to make my last point, which is basic, in my opinion. Certainly for a bill of this type which gives a great deal of discretion to the administrator it is very important as to how it will be administered. I recommend to every Member of this body that they read the testimony given before our subcommittee by the Secretary of Commerce, Mr. Hodges, not for any specific words but for his general approach to this problem. Here is a man who quietly and sincerely has the proper and correct approach.

He wants this legislation to be used as an impetus to private enterprise, and not as a Federal takeover. He makes it very clear that first and foremost in his mind is an effort to make this the kind of program that will fit into our private enterprise system. He wants this legislation used as it is intended for those areas that most need it so that we can revive the economic status of them and give them an opportunity to catch up.

Clearly I favor this legislation.

Mr. FULTON. Mr. Chairman, will the gentleman yield?

Mr. SCRANTON. I yield to the gentleman from Pennsylvania.

Mr. FULTON. I would like to compliment the gentleman on an excellent statement and also on his hard work on this subject. It is encouraging to find someone like him who went into this thoroughly and knows what he is talking about.

Mr. SCRANTON. I thank the gentleman.

Mr. Chairman, as a further extension of my remarks made during the course of today's debate on the Area Redevelopment Act, I submit the following:

ANSWERING OPPOSITION ARGUMENTS

In the subcommittee hearings, testimony in opposition to this legislation has centered around four main arguments. The first of these is piracy. All who testified recognize the necessity for freedom of movement by industry and, in fact, advocated such mobility. Industry will move, and does.

In the first instance, the corporation itself makes a decision to relocate. Then, there follow innumerable factors involved in picking the site. Financing is only one of these factors; others being markets, transportation, educational and recreational facilities, housing, labor relations, and so forth.

I firmly believe that pirating by depressed areas is tremendously overemphasized and, in fact, has ben turned into something of a "red herring" or shibboleth. In my own district, for example, of 32 new industries that have come to our area through our local financing arrangement, only two have been relocations which have involved only 155 employees. I think Secretary Hodges, in his testimony, hit the nail on the head, and I quote:

> Gentleman, these areas are now not in balance. They are not competitive economically with other places in the Nation. You can do a whole lot for them and still they won't be as good as the average industrial and rural community of this country.

The subcommittee and full committee have established the strongest antipiracy provision in the history of this legislation. It states unequivocally, in section 6(a), "Such financial assistance shall not be extended for working capital, or to assist establishments relocating, totally or partially, from one area to another." In addition, there is the very strong right arm of congressional pressure in the event of an attempt to use Federal funds for relocations of industry, once this legislation is passed.

The second main argument is that this legislation is discriminatory in favor of certain areas as opposed to others. This same argument may be used for almost anything that this Congress does. Any time you appropriate for airports, or dams, or rivers, or highways, or defense installations, or harbors, and so forth, you are using tax money obtained from certain areas for the benefit of others. I think this is no argument at all.

The third major charge made against this legislation is that it is based on a handout, or, at the very least, a Federal intervention into an area where the Federal Government does not belong.

This legislation was planned to assist certain areas that have been subjected to chronic unemployment for various reasons. I submit that it will not act as a handout and, in fact, is a far better way of handling this problem for the areas concerned and the unemployed than one of continued extension of unemployment compensation by both the National and State Governments. For this legislation helps to give a permanent answer to the problem, and not merely a temporary doling of money. It has, in fact, proved just that. It acts as an impetus to the creation of more private enterprise.

Let me give you an example. The programs of self-help in northeastern Pennsylvania have resulted in many new plants being built there. These plants are built and financed by community development, nonprofit organizations. They build plants and then lease them to industrial tenants who, over a period of years, pay off the investment of the community corporation and eventually, through rental payments or outright purchase, own the buildings.

This is no different than what occurs with insurance or other institutional financing or, for that matter, corporate financing itself.

With the advent of the Pennsylvania Industrial Development Authority, communities were helped by the State taking second mortgages on the buildings. These, too, are paid through the rental or the purchase of properties by the industries themselves.

Exactly the same course would take place with the Federal loans that are provided for in the legislation before us.

Accordingly, what happens is simply this—and it has happened over and over again in our area. The industries, through their payment of rent or outright purchase, pay back to the community corporation or the State government or the banks—and now perhaps the Federal Government—the funds that are used for this industrial development, and the plants themselves are in the hands of private enterprise, as we all desire them to be.

I repeat, this is exactly what has happened in our area, and what will continue to happen under this legislation.

The last main argument used against this legislation is that it is pointless be-

cause the money will simply be wasted and will accomplish no results. Or, that it is not enough money to do the job.

If the road to industrial rehabilitation is 20 miles long and a community like those of northeastern Pennsylvania that I have described has been able to travel the first 10 miles on its own resources, it is pure nonsense to argue that Federal funds needed now, for the last 10 miles of the road, will be used for the same purpose and in the same way as the now exhausted local money was used on the first 10-mile stretch.

Incidentally, is it not ironic that the same witnesses who tell us that this legislation is bad because it will be so effective that it will lead to pirating are invariably the same witnesses who tell us that this legislation is bad because it will not help the distressed areas at all§ These arguments, frequently offered by the same witness, are not even consistent. The truth, of course, lies where it usually does, somewhere in the middle. The truth is that Federal funds, though they contain no magic to pirate industry from one area to another, are absolutely essential if the economically distressed areas are going to be able to continue the self-help programs which they have so courageously begun.

ALTERNATIVES

I have attempted to answer the main arguments against this legislation. I now raise the question of what the alternatives are to it.

The U.S. Chamber of Commerce and others recommended moving the unemployed. I completely disagree with this thesis. Clearly, there will be, in the course of time, necessity for moving people from some areas that are not economically viable. But to take hundreds of thousands of people and tell them they must go somewhere else to live is, in the first instance, callous and inhuman and, looking at it utterly realistically, it is uneconomic.

The expense of moving people and the establishment of new houses, streets, sewers, schools, and all the facilities for same is far beyond the expense of establishing industry in the areas where they already live. In addition, of course, there is tremendous waste involved in abandoning the selfsame facilities in the areas where they now live. Unemployed peoples for the most part do not have the means to make such moves and, by moving, clearly they would lose most of their present assets.

The second alternative is what we are presently doing—paying unemployment compensation and public assistance. This, too, is fantastically wasteful in comparison with efforts for putting men to work. In the State of Pennsylvania, in the year 1960, $82 million was paid in unemployment compensation and $48 million in public assistance. If the unemployment rate were reduced to 3 percent, this would mean a $90 million per year saving in that State alone.

Besides being tremendously expensive, such sums do not solve anything. They simply help people to subsist temporarily. In contrast, this legislation, through its impetus to private initiative and enterprise, fosters a permanent solution to unemployment.

ADMINISTRATION

Much of the success of this legislation will depend on its administration. Personally, I was greatly impressed by Secretary Hodges' approach to this subject. He sees this in its proper light, designed to help those areas which are truly areas of substantial and persistent unemployment, and as a method of fostering their economic comeback through giving an impetus to a free economy.

I quote from his testimony:

Mr. Chairman, and gentlemen of the committee: I think that the very passage of this bill will give heart to many of these thousands. Now, it is true that they will not all be taken care of. Nothing ever does that. But we can make a start.

I would just like to say this: I am basically a conservative. I talked with three people the other day from one of the Western European countries who were over here, people I knew very high up in business and government, and that country has imported 300,000 laborers to take care of the jobs and there are still a hundred thousand more jobs than they have people. It is a country that we in this Nation helped to build up to its present condition, where now they not only have money, they have more jobs than they can take care of. They cannot find enough people.

It seems to be a shame that in areas, whether it is eastern Kentucky, eastern Pennsylvania, or where, that we cannot do something to help take care of some of our own people even though it looks on the face of it, at times, like we are trying to give away money. Actually, we can inspire these people in the various areas to do something themselves. I don't like to see the Federal Government do everything, and I believe we can inspire these various groups to do something. There have been various questions raised about piracy. I know what they are talking about because I have had letters from other States already, saying we are against this because we don't want somebody to move out of our State; we are afraid they will move to a depressed area, and so forth.

Gentlemen, these areas are now not in balance. They are not competitive economically with other places in the Nation. You can do a whole lot for them and still they won't be as good as the average industrial and rural community of this country.

So I think we ought to see, whether it is in Kentucky, West Virginia, where your coal mines are pulled out, or wherever, what we can do. You have the basic problem, of course, of people, whatever their economic condition is, not wanting to leave home. That adds to this difficulty, so it would call for retraining, it could call for some relocation of people in isolated places, but I hope we will make a start on it because I think it is the human and proper thing to do, and it is no more than we are doing for people in other parts of the world.

Mr. Chairman, by his testimony, the Secretary of Commerce, to whose Department this legislation will be assigned for administration, has shown a sound, sensible, and reasonable approach to the problem. In my opinion, his is the proper approach, for this legislation is designed to assist the areas of substantial and persistent unemployment, and not to be used as a "boondoggle" or as an opportunity for master planning of our entire economy. The Secretary sees it in the proper light, and hopefully will see to it that the administration of this legislation will follow his philosophy.

Mr. KILBURN. Mr. Chairman, I yield 10 minutes to the gentleman from North Carolina [Mr. JONAS].

Mr. JONAS. Mr. Chairman, I would like to congratulate the last speaker on a very fine and clear-cut statement of his position. I should like to ask him one question, if I may.

Have the communities or the development corporations in Pennsylvania made any use of their borrowing authority from the revolving fund of the Small Business Administration?

Mr. SCRANTON. Yes, they have. In fact, we have in the counties, for example, that I represent, many small business loans.

Mr. JONAS. I do not mean that. I mean loans to publicly owned investment and development corporations organized within the State, and not loans to individual small business concerns.

Mr. SCRANTON. Yes, they have, sir, to a certain extent. Our great problem, as I tried to point out, is that we are using now every source of financing but we still need more.

Mr. JONAS. I thank the gentleman. I asked that question because the Washington Star for March 27 quoted Mr. John E. Horne, head of the Small Business Administration, as inviting local chambers of commerce, planning organizations, and development agencies to take the initiative in organizing development companies which can make application for loans out of the revolving fund of SBA. The story says that fewer than 100 loans have been made to State and local development companies during the 2½ years that SBA has been authorized to make such loans.

I was interested in that, because my State is one which has a well functioning business development corporation, and it has already obtained a million dollar loan out of this revolving fund and has a commitment for another million dollar loan.

Now, the report of the Small Business Administration for the 6-month period ending December 31, 1960, shows that up to that date a total of $17,405,224 had been loaned to State and local development companies to be used by them to promote the purposes of this legislation. In addition, a total of $26,022,156 has been committed for future loans. This makes a total of $43,427,380 either already lent to these State and local development corporations or committed, and the report shows $152,422,881 available balance as of December 31, 1960. Now, that is a substantial sum of money and it appears to me that the States that have business development corporations are making a mistake if they do not take advantage of the borrowing authority out of this revolving fund.

While I am on this subject, may I ask the gentleman from West Virginia, who made a very appealing statement, a question if he is in the Chamber? Or, may I ask anyone on the committee, Is it true—and I read this in the testimony of one of the witnesses before the committee—that during the last 10 years more than $2 billion in new plant investment has been made in West Virginia? Is

that correct, or does the record confirm that statement?

Mr. BAILEY. That is not true.

Mr. JONAS. I saw that statement in the testimony before the committee and it was not challenged. The statement was that during the last decade $2 billion had been invested in West Virginia in plant expansion.

Mr. BAILEY. That is not true. It is true that we brought in an installation known as the Kaiser Aluminum Co. in the last 10 years, but no figure even approximating $2 billion in investment.

Mr. JONAS. May I ask the gentleman one other question? Does West Virginia have a business development corporation?

Mr. BAILEY. Just what does the gentleman mean by that?

Mr. JONAS. A publicly owned development corporation organized to help locate industry within the State or in expanding existing industry, with authority to borrow funds from the revolving fund of the Small Business Administration and otherwise to carry out its corporate functions.

Mr. BAILEY. We have a service carried on by our State Publicity Bureau, an industrial group set up by law.

Mr. JONAS. We have a development corporation of North Carolina, and I would like to call the Committee's attention to its record during the last 5 years.

Mr. BAILEY. Mr. Chairman, will the gentleman yield to me for just a moment?

Mr. JONAS. I yield.

Mr. BAILEY. We have a lot of so-called community groups over the State trying to interest industry to come in, but there is no active organization other than that carried on through our Governor's office.

Mr. JONAS. I thank the gentleman.

Mr. BAILEY. One other thought, please. Let me say that the State will only be benefited temporarily by this type of legislation. Basically something else will have to be done.

Mr. JONAS. Well, we have a business development corporation in North Carolina. It was organized under the leadership of then Governor now Secretary of Commerce Hodges 5 years ago and has had a very successful career as I will point out shortly. Before doing that, I would like to say that if we are going to have this legislation I am gratified that the administration will be under the direction of Secretary of Commerce Hodges instead of under a separate and new bureau. Secretary Hodges has had a great deal of experience, during his 6 years as Governor of our State, in the location of industry and I am sure he will do a better job of administering this program than one who might be brought in from the outside. It is not because of the responsibility of this proposed program is placed upon the Secretary of Commerce that I question the advisability of this legislation but for entirely different reasons which I will state later.

As a matter of fact, the Department of Commerce is already active in the field encompassed by this legislation. This activity is under the Office of Area Development and this Office has described its activities as follows:

> The Office of Area Development in the Business and Defense Services Administration serves as a central point in the Federal Government where State and local organizations, public and private, can obtain information on Federal programs available to communities seeking assistance in their economic development activities. Technical advice and guidance, based on the successful experiences of other communities, is a key factor in the Office's assistance to labor-surplus areas in developing new jobs.

But now I would like to give you a report on the experiences of the Business Development Corp. of North Carolina, to show what can be accomplished in bringing new industry to a State and in expanding existing business enterprises to provide new jobs. This corporation was organized for the purpose of promoting, developing, and advancing the economic welfare of our State. The fifth annual report shows that there are 1,802 stockholders of this corporation. Capital funds were supplied to the corporation as follows: 85 commercial banks provided $2,906,000; 13 life insurance companies provided $1,105,200; 40 building, savings, and loan associations provided $1,093,000. This makes a total of $5,104,200. In addition, the corporation has borrowed $1 million from the Small Business Administration and has in hand a commitment from SBA for another $1 million.

Since the start of operations in 1956, the corporation has approved 131 loans totaling $15,915,965. Some of the loans were to finance the construction of new plants and the expansion of existing ones, for the acquisition of machinery and equipment, working capital, and for payment of existing indebtedness. The direct result of this activity was maintaining employment for at least 8,356 people and creating employment for an additional 13,540 people, or a total of 21,896 jobs.

As of December 31, 1960, all installments on loans were current. Additional applications for loans are being processed daily. The operations of this development corporation have been so successful that at the October 12, 1960, meeting of the board of directors a dividend of 10 cents per share was declared on the capital stock. This is truly an example of how a State can by aggressive and imaginative action, and through the aid of existing agencies of the Federal Government, promote its own business prosperity and economic welfare.

Mr. Chairman, may I say also that we have other Federal programs that are available for assistance without setting up a new organization which will duplicate the work that is already being done by various other Federal agencies. For example, we have a Community Facilities Administration in the Housing and Home Finance Agency. May I quote one statement from the last report of that agency?

> By the end of November 1960 local communities had been assisted in the provision of new or improved facilities through 294 net approved loans for almost $90 million. In addition, 37 loans for $10 million have been canceled after approval due to subsequent availability of private financing.

The Community Facilities Administration also makes advances to local communities for advance planning on public works projects. This program is financed from a revolving fund to which appropriations are authorized up to $48 million. Through the end of fiscal year 1960, this agency approved advances amounting to some $34.2 million. Under the program for the current year and that proposed for fiscal year 1962, net approved advances will reach $55 million with a potential construction cost of $3.3 billion.

The Department of Agriculture, through the Farmers Home Administration, is making loans to farmers, and it also has a rural development program instituted in 1955.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. JONAS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. The gentleman earlier spoke about $2 billion in new plant investment, as testified to by somebody on page 230 of the subcommittee hearings. It reads as follows:

> When we consider that in the past decade more than $2 billion in new plant investment has been made in West Virginia, yet there remain areas of chronic distress, just what might be the effect of West Virginia's share of $389.5 million fund? * * * With the need for investment of at least $15,000 to create one job, just think of the inadequacy of these funds to meet the apparent present needs for jobs.

Mr. JONAS. That was the statement I remember reading in the hearings. I should like to quote one other statement made by the same witness, which I think points out the fallacy of this approach:

> The laws of economics cannot be revoked by the Congress. Neither can the facts of geography, the absence of natural resources, the location of markets, the desires of the consumer, or the personal will of the worker be radically affected by anything you place upon the lawbooks.

It is my judgment that credit, in addition to what is already available through Government agencies and from private and commercial sources, will not be decisive in locating industry in depressed areas. There are many and more important factors, such as aggressive leadership on the State and local level, availability of markets, labor supply, transportation, government, climate, availability of water and power, individual site characteristics—and of course many others—that will determine where industry will locate or relocate.

This bill will not do what its sponsors hope. If I thought it would, I would support it. I think the result will be a cruel disappointment to those who hope for so much from it.

Mr. PATMAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Washington [Mr. MAGNUSON].

Mr. MAGNUSON. Mr. Chairman, I rise in support of the area redevelopment bill, S. 1, as reported from the House Committee on Banking and Currency. The national economy has

reached a state that requires comprehensive and prompt action. As of January 1, 1961, 103 areas in 26 States and Puerto Rico were in such a state as to be considered depressed areas under the requirements of the administration bill, 3 such areas being in the State of Washington—Aberdeen, Anacortes, and Port Angeles. One community in Washington State reported as much as 37 percent of its work force idle. On January 1, 1961, 7.7 percent of the national labor force was unemployed. The nature and extent of this economic distress is such that the Government can no longer wait for it to pass.

There are two forms of unemployment. The first is the interim displacement of a worker who will shortly be rehired in the same occupational area. There is no need to retrain this worker, while the normal program of unemployment compensation—though, perhaps, inadequate—is sufficient to ameliorate his interim distress. The second is chronic or permanent displacement. This is essentially different from interim short-term unemployment. Here we refer to the worker who, though skilled, suddenly discovers that his particular skill is no longer needed by industry—in some cases the industry itself may cease to function. For this worker no amount of unemployment compensation is adequate. This worker will not be reemployed—will not be employable—unless he acquires the new skills demanded by industrial growth.

It is the relief of chronic or permanent unemployment with which the supporters of S. 1 are primarily concerned. Explicit in the bill is the recognition that this type of unemployment is an area-wide disability, not limited to the individual worker. Its causes are multiple: First, excessive reliance upon a single industry or occupation—the failure to diversify; second, technological change and systems advance; third, shifts in demand—the introduction of new products and materials; fourth, migration of industry; and fifth, the depletion of natural resources—minerals and timber.

The answer to the problem of chronic unemployment is obviously complex. Often the most grievously injured are the established workers who have plied their skills for many years, who may have families and homes. When chronic unemployment strikes, property values fall, while the worker who has placed his life savings in a home finds himself unable to retrieve his equity. Even should he relocate in another area, his seniority—his job security—is lost and he is the first to be laid off in slack times. Relocation would further entail the abandonment of heavy investment in schools, roads, public utilities, and private enterprise. To be sure, some workers, largely young workers, may be relocated, but clearly relocation is not the answer.

The proponents of the area redevelopment bill believe that at least part of the answer is to be found in the retraining of workers. The decline of certain industries, new technical processes, and the demands of the new industries of the space age for men of technical skills has created alternate scarcity and abundance which society has not proved sufficiently flexible to absorb. S. 1 would provide stepped-up programs for retraining workers in areas of chronic unemployment. Under the bill, 4.5 million would be appropriated annually for this retraining, to be conducted, in normal situations, by existing State vocational education agencies, with the assistance of the Department of Health, Education, and Welfare. In addition, a $10 million annual appropriation would be provided for retraining subsistence payments, to workers engaged in such a program and not receiving other compensation, to be paid for a period of up to 16 weeks and at a rate equal to the State unemployment compensation benefits. The significant element here is that at the end of the 16-week period, the worker might qualify for a position utilizing his newly acquired skills. Whereas, when the present system terminates, the worker is still displaced, still unprepared for productive reentry into the labor market, and compelled by necessity to rely upon the various welfare agencies.

The area redevelopment bill is geared to the presently distressed areas. Although we have every hope that it will serve its purpose, it can only be considered as an emergency measure. As reported from the Senate, the bill would lapse on June 30, 1965, unless renewed. In the interim it is incumbent upon the various areas of our economy to face squarely their responsibility. Trade unions, the traditional guardians of worker skills, must have the foresight to encourage their members to extend their capabilities, while apprenticeship programs must be directed to meet the challenge of technological advance. Private enterprise must recognize its social responsibility as a source of the commonweal, must look forward to meet market changes, and must cooperate with the trade unions in refitting and retraining to meet new requirements of our complex and growing economy.

The retraining of workers is only part of the answer. S. 1 proposed that the direction of retraining be determined by Department of Labor surveys. Extensive planning is essential at all levels to produce an efficient meeting of capability with demand. The program would be administered through an Area Redevelopment Administrator in the Department of Commerce. The local areas would survey their economic resources and with assistance from appropriate agencies, submit a program to the coordinating agency. Programs consistent with the economic needs of the area and Nation would then receive Federal matching funds in the proportion of 35 percent non-Federal and 65 percent Federal. Grants would be made available to areas where no other means of development could be found. Suitable industries would be encouraged to relocate in redevelopment areas, always on the basis of comparative advantage. Industrial diversification would be promoted. The bill extends the authority of the Small Business Administration and amends section 701 of the Housing Act of 1954, the latter to stimulate needed renewal projects both in residential housing and commercial district rehabilitation. Where a direct relationship could be shown to the total economic development, grants and loans would be made for public utility type projects—water and sewage systems, access roads, and so forth. For basic project assistance, both urban and rural, $375 million would be appropriated.

Obviously, the amount of planning necessary to conduct successfully such a program would be beyond the scope of strictly area groups—labor unions, private industries, planning bodies, and municipal and State agencies. The Area Redevelopment Administrator would, however, be expected to work in closest coordination with these area groups. The comprehensiveness of the program is its essence.

Essentially, this is a positive program. Instead of granting a mere subsistence dole, it endeavors to retrain workers and to renew their productivity. It encourages industry to relocate in areas of chronic unemployment. It encourages communities to plan for their future, and in this regard, supplies technical assistance. Mr. Chairman, it occurs to me that passage of this bill at this time is vital, not only to the depressed areas but also to the reinvigoration of our national economy.

Mr. PATMAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. MORGAN.]

Mr. MORGAN. Mr. Chairman, I am in favor of Senate bill 1, and I want to commend the House Banking and Currency Committee for the fine bill presented here today. For years I have been working to alleviate and aid the plight of the unemployed in my district. For the past 5 or 6 years I have joined many of my colleagues in sponsoring similar legislation. I have appeared before the Banking and Currency Committe to testify in behalf of area redevelopment bills and have also appeared before the Senate committee considering similar legislation. I have voted for every area redevelopment bill for the past 3 years and I joined in the attempt to override the President's veto. Therefore, I have a vital interest in this bill because I believe it will be helpful in offsetting the chronic unemployment in surplus areas, not only in my district, but in other parts of the State and country.

This bill makes provisions for loans for industrial projects; it provides for loans and grants for local public facilities; it provides for technical assistance; for urban renewal and planning aid and it provides for occupational retraining and subsistence payments.

In an area such as mine where we have had chronic unemployment for a number of years, we look to this bill as the means of helping some of our unemployed to find other jobs. We look to this bill in the hope that it will change some of our ghost towns into live communities once again. We look to this bill to relieve some of the human misery that results from continued and chronic unemployment. We realize, however, that passage of this bill will not bring immediate aid. It may be months and years before many of these areas will solve their unemployment problems.

With the passage of this bill, however, my congressional district will have Federal assistance in a coordinated attack on our number one problem.

Mr. Chairman, I am not going to burden the Members of this body with a repetition of facts, which I have presented on this floor many times. I do want to stress the change in conditions which have occurred in my district since we last considered area development legislation.

I have three counties in my congressional district—Fayette, Greene, and Washington. According to January ratings, the Uniontown-Connellsville area in Fayette County had an unemployment percentage of 27.9. This is not only the highest in the State of Pennsylvania, but it is among the highest in the country. This is an increase of 5.8 percent since November 1960. In Greene County, the rate of unemployment is 15.7 percent and in Washington County it is 17.4 percent. These figures do not begin to tell the whole story, however, because many of those unemployed are working only part-time, some only a day or two a week.

Our dominant industries in Fayette County were the coal and coke industries. During the past 10 years the coal industry has steadily declined due to the depletion of coal deposits and because of technological improvements. The coke industry has been gradually supplanted through the more economical production of byproduct coke.

Our steel mills in Washington County are operating at about 50 percent capacity. Many of the people who have been unemployed have used up their unemployment compensation benefits and depend upon public assistance for sustenance.

Our local people did not sit idly by, however, and watch conditions grow worse. They formed industrial groups and have been engaged in development activities. They have had industrial promotion campaigns, fundraising campaigns, and plant building programs. They have done a good job and together with the aid they have been able to obtain from the State Industrial Authority, they have been able to attract some new industry into the area. Funds from local sources are just about exhausted, however, and Federal cooperation and support, such as provided under this bill are needed to supplant the efforts of State and local communities.

Mr. Chairman, we do not want handouts. We do want the prospect of work, of new jobs, and new industries, which in itself will bring about a more healthy community life and a fuller utilization and development of our human resources. I believe this bill goes direct to the problem and holds real promise of practical and effective assistance. It has my wholehearted support and I hope sincerely that the bill will pass.

Mr. PATMAN. Mr. Chairman, I yield myself 4 minutes.

The gentleman from North Carolina [Mr. JONAS] in talking on this bill referred to the local development corporations. The local development corporations are doing a fine job. The reason for this bill is that the local development corporations cannot do the job alone. They have done all they can on their own. Now they must turn to the Federal Government. That is particularly true as to Pennsylvania and the area described by the gentleman from Pennsylvania [Mr. SCRANTON]. He knows all about this and was very helpful to the committee in bringing out those facts.

It is true that the Small Business Administration makes loans to these local development corporations. They are very careful about these loans, but they are making them nevertheless. Up to March 17 this year $10,700,000 had been loaned by SBA to these local development corporations. In voting for this bill you will vote for a provision that permits the Small Business Administration to continue to make these loans. This provision expires June 30 of this year, and they will be unable to make the loans, after that date. But in this bill we have a provision to make this lending authority permanent.

Mr. JONAS. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from North Carolina.

Mr. JONAS. I would be willing to vote to extend that authority and provide additional funds, but we already have this Small Business Administration in this field. That is the reason I do not want to set up another agency.

Mr. PATMAN. You would not want to leave this to the Small Business Administration, because they cannot meet the need in the depressed areas. Their loans are rather narrowly restricted, and are made to assist small business concerns only. This is for the purpose of helping these communities that are in distress.

The gentleman referred to as testifying on page 230 of the hearings was a witness for the U.S. Chamber of Commerce. He made a suggestion which I think was a cruel suggestion coming from the U.S. Chamber of Commerce. He suggested the remedy for this was not giving the people in these areas any Federal aid, not even the small amount that is offered here, but to see that they had opportunities to move from their homes and go elsewhere and seek jobs elsewhere, and leave these distressed communities.

He recommended to our committee to get after the employment services and to get the employment service to go into every distressed community in this country and take an inventory of the available manpower in those communities. He said we should induce unemployed people in these areas to leave their community where they were born and reared. That was his remedy for helping these distressed areas. We did not agree with him. We believe this bill is the minimum. We believe it will do some good. We know it is not a cure-all. It will possibly make unnecessary a general public works bill. If we do not pass this bill, we probably will be called upon to pass one that will cost billions of dollars instead of millions of dollars. This is a good step in the right direction and I hope the committee will support the bill.

Mr. KILBURN. Mr. Chairman, I yield 5 minutes to the gentleman from Texas [Mr. ALGER].

Mr. ALGER. Mr. Chairman, obviously I am out of step with many, both those for the substitute bill and for the committee bill. I will say what must be said as I see it.

I do not think most of the people in this country are in sympathy with this Federal regulatory effort. I am looking now at the committee bill, starting on page 44. I am not an attorney so probably I am outside of a privileged circle that understands this language. This language starting on line 18 is in both bills, and if this is not unconstitutional, then I do not know what is unconstitutional. I find it difficult to analyze how some of my colleagues can comprehend what the language actually means. This language is gobbledegook, if I ever heard it. It prescribes complete Government planning and regimentation. I just wonder if you realize, gentlemen, what some of us hear in the taxation committee? Do you realize that the lumber industry, as an example, all of which is now classified in the category of depressed areas, is coming before us saying, Do not impose on us any more Federal taxation. Do not give us any more of that kind of help. Do not bankrupt us. Yet today what are we doing in this bill? We are running up the Federal ante and it has got to come out of the hides of our people in taxes. What do you think is going to happen? I know what is going to happen. We are going to be asked now as in the past for billions of dollars. There is no limit to money expended at the Federal level. Yet the Federal Government has no money, only what it will take in future taxes. Of course, when it comes to that it means we will raise everybody's taxes and there is no limit to where that will take us, nor how much we may deficit finance as an alternative. I understand right at this very minute, while some may be willing to exercise independent judgment, the Secretary of Commerce is in the Speaker's lobby talking to some of the Members to be sure they understand how they ought to vote. I suppose that is the case—I do not know—I know he is there.

In any event, I think such pressure is wrong.

Now, let us look at the bill. I am looking at page 46 of the bill. It says the Secretary will designate the redevelopment areas. Then it goes on to give him more and larger powers as though he were the absolute dictator of American industry, the wishes of the people of the United States, if you please, notwithstanding. However, the substitute bill strikes the redevelopment area definitions. Of course, that is all to the good.

Then, another provision of the bill makes it clear that State government must first designate the areas. Then we are back in the old permissive area. Gentlemen, you understand when we pass a law that is permissive to the States we force the States to comply

or lose the return of their share of tax money they have already paid in. I say that is wrong. We are forcing them, indeed, bribing them with their own money to do as we at the Federal level prescribe.

If we would use anything like the effort to try to lighten the tax load on industry that we use to saddle them with additional tax burdens we would see a wave of prosperity sweep over the Nation the like of which has not been seen since New Deal legislators came down here to Washington to tell men how to run their business. What industry needs is tax relief, not increased Federal spending in the name of help, followed by higher taxes and/or deficit financing, and inflation.

When it comes to who gets these loans, the way it is set up must the recipient be of the right political party? Must he come to some congressional committee and declare his political connections and plead, please give me some help, I need a loan? I do not think that is right; I do not think the American people think that is right. Again, making Federal loans to some and not to others is unconstitutional.

On page 50:

The project for which financial assistance is sought must be reasonably calculated to provide more than a temporary alleviation of unemployment or underemployment within the redevelopment area wherein it is, or will be, located.

What does that mean? I feel it is impossible to tell anybody just what that means. This gobbledygook to support later bureaucratic decisions.

Page 51, starting on the bottom of page 50:

No such assistance shall be extended hereunder unless the financial assistance applied for is not otherwise available from private lenders or other Federal agencies on reasonable terms.

That means no one but poor risk cases. It says if they have suffered a turndown and are poor risks they can get attention from their Uncle Sam. Only poor risks need apply.

Page 61: There is so much talk about what information the Secretary can obtain. Under this he can get all the information he wishes. I read:

SEC. 10. The Secretary shall aid redevelopment areas and other areas by furnishing to interested individuals, communities, industries, and enterprises within such areas any assistance, technical information, market research, or other forms of assistance, information, or advice which are obtainable from the various departments, agencies, and instrumentalities of the Federal Government and which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment within such areas.

So here we have a ring-around-a-rosy of Federal and local officials conspiring to promote more Federal handouts. Obviously, this is not the intent of some but this language appeals to human beings to be human beings—that is, get all they can while the getting is good.

Then we find this—

The Secretary shall furnish the procurement divisions of the various departments, agencies, and other instrumentalities of the Federal Government with a list containing the names and addresses of business firms which are located in redevelopment areas and which are desirous of obtaining Government contracts for the furnishing of supplies or services, * * *

This will leave it in the hands of the Secretary to determine what areas and what firms shall receive this aid, placing industries in a supplicating position so much so that their business may succeed or fail based on dependence on Government aid and contracts.

Do we really understand what we are doing? We are going to catalog all industry and could then help those who support the right political party. Some might even say this is a reelection bill, judging from the support such faulty legislation is receiving. For my part I will not support either the committee or substitute bill. One may be the lesser of two evils but the evil either will do our private enterprise economy is something in which I will not be a participant. I regret that politics is in this bill on both sides. The people of this Nation as citizens and as business participants—management and labor alike—deserve better than this abrogation of constitutional protection.

This Nation will suffer to the degree that this bill is implemented in our economic system. Free enterprise and the right to own property, so greatly under attack worldwide, is here being dealt a staggering blow, one from which it could possibly not recover, unless—and this is my hope—as bad legislation it will not, in practice, become reality.

Mr. KILBURN. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania [Mr. SAYLOR].

Mr. SAYLOR. Mr. Chairman, I have listened with interest the last 2 days to those who spoke for this bill and to those who spoke against it. I have not been here as long as some of those who spoke either for or against it, but I have been here long enough to know that it depends entirely on which committee brings out a bill, and which part of the country gets the most out of the bill is where you get your support.

I want to tell you I am supporting this bill that came out of the committee, and I am supporting it right down the line. I introduced my first bill on this subject back in the 83d Congress and I have introduced similar legislation in every Congress since that time. My only regret is that there is not more in this for the people of this country.

Do you realize, Mr. Chairman, that since I have been a Member of this House, this Congress in its wisdom has given in foreign aid over $70 billion to countries all over the world? And most of the people who are living in the areas that will be helped by this bill, were working when the foreign aid program started. They were willing to pay their taxes and have their taxes spent where Congress determined.

These same people when working helped pay for all the farm programs that have cost the Nation untold billions of dollars in stores of grain and other agricultural products.

These people when working helped pay for all the reclamation projects in the 17 Western States.

These people when working helped pay for all the mineral subsidy bills that Congress passed to keep a healthy mining industry in this country.

These people when working helped pay for all the flood control projects throughout the length and breadth of our land, and all the other projects too numerous to mention.

Now through no fault of their own they are unemployed and live in areas of chronic unemployment. All this bill does is to say to American citizens who live in those areas, "Fellow Americans, you have helped all others when you could, now this is a little token from a grateful people for all you have done for others. It is a little encouragement to not give up hope—to carry on and help make our country a better place in which to live.

One of the current popular pastimes is to label everything you do not like as either socialistic or communistic. This is neither, but it is putting into practice what Abraham Lincoln—in my opinion the greatest of our Presidents—said was the duty of a government: "To do for its people what they could not do for themselves, or do so well for themselves."

I am very much interested to note that the minority views contain the name of the principal town in my home district. One of the reasons that they tell you not to vote for this bill is that my hometown community, Johnstown, Pa., being a depressed area and having been one ever since we set up the criteria in 1952, had enough community spirit to try to help themselves. But they are still good American citizens. They are people who love this country. They are not Communist. They are not socialist. They are red-blooded Americans who want to do some work and still are trying with all their heart to make their community a better place to live, a better place to raise their families, a better country for themselves and for all Americans and as a result they hope a better world for all. The people who lend money in this country still like to find that kind of spirit, and my community has that kind of spirit. When Johnstown wanted to borrow $5 million to complete a sewer system and sewage disposal plant to take care of and clean up the sewage out of the rivers and streams of that area, following the program that this Congress set up for all sections of the country, they presented such a picture of community spirit to the bond buyers in New York that they got themselves a better rate than they would have had if they had borrowed the money under this bill. The minority report concludes therefore because the city of Johnstown borrowed money at a pretty good rate of interest, nobody should give any money to a local community because if they borrow this money from Uncle Sam they will have to pay a higher rate of interest. That is poor logic as far as I am concerned. This is a very small amount of money. This is merely the American Congress saying to the people who find themselves in these areas, "Look, we know you are trying to help yourselves, we know you are trying to get ahead; here is just a little pat on the back and a little help

from some of those districts that are still enjoying this untold prosperity we are having in this country."

To you who benefit from the price support programs of the country, I ask you to support this distressed area bill.

To you who come from the reclamation areas and who have benefited so much from them, I ask you to support this distressed area bill.

You who have prosperity in your districts, I ask you to support this bill.

Not because of what you have enjoyed from your Government, but because as a Christian nation we have always believed in the Golden Rule. Here is a chance for each one of you to put it into action. Now let us take care of the people who live in the industrial areas in this country that are depressed. Vote for this bill, vote against any substitutes and against any amendments.

Mr. PATMAN. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. STRATTON].

Mr. STRATTON. Mr. Chairman, I take this time for two reasons, first to establish a little bit of legislative history with respect to one aspect of this bill and, secondly, to advise the membership of the House as to an amendment which I intend to offer when we reach the 5-minute rule.

Mr. Chairman, I am very much in favor of the bill S. 1; in fact, I have been, since becoming a Member of this body, a cosponsor of this legislation. I cosponsored it again this year. In fact, this year I introduced the same legislation which passed the Congress last year but which was vetoed by the White House.

Mr. Chairman, I am interested in the bill because of what it will do for the country. I am interested in it for what it will do to my home district. I have two areas in my district, Gloversville, a great glove manufacturing city, and Amsterdam, a carpet center, which qualify under the provisions of this bill as distressed areas, even under the somewhat more restricted provisions of the bill S. 1, as contrasted with the bill we adopted last year.

I am disturbed, however, because of the fact that perhaps the most important economic area in my district, the great industrial city of Schenectady, will not be helped by the bill. That city has lost 20,000 factory jobs in the course of the past 6 or 7 years, the greatest loss of any single city or community in the country. But under the present formula the great city of Schenectady cannot qualify as a redevelopment area for the reason that in determining the rate of unemployment in Schenectady, our city is considered as part of a larger metropolitan area which includes the city of Albany and the city of Troy. The city of Troy has been hit by unemployment, but Albany is the capital of the State, and it seems that no matter what the economic picture is the employees of the State government in Albany continue at the same high level.

Therefore, if unemployment is to be determined only on the basis of this overall metropolitan area, then the more critical situation in Schenectady would be counterbalanced by the more favorable situation in Albany, and the overall area would not qualify for help. I am sure that this is something which applies to other areas as well. Therefore, I would like to ask the distinguished chairman of the subcommittee, the gentleman from Texas [Mr. PATMAN], if it is not his understanding that under the provisions of the bill the Secretary shall, in fact, have the right to determine areas for consideration as redevelopment areas without regard to present boundary lines now in effect in the Department of Labor for reporting unemployment. Is that not the understanding of the chairman of the subcommittee? Let me say that it was the understanding of the other body and was so included in the report of the committee of the other body, but there is no reference to it in the report of the committee of the House.

Mr. PATMAN. I think a more correct statement would be that they would have the power to change the lines after they are once made. I think it is contemplated that they will follow the existing labor market area boundaries in the beginning. But, of course, this bill will have to be reconciled with the Senate bill, and whatever is in the public interest I feel the conferees will agree to it.

Mr. STRATTON. On this point, if I may say to the distinguished chairman, there is no difference in wording on this point between the House bill and the bill passed by the other body, but the report of the other body definitely says that these boundaries would not have to be identical with the standard labor market areas as presently defined by the Department of Labor. And, I am wondering if the chairman would agree with the interpretation which was made by the other body?

Mr. PATMAN. I would prefer not to express an opinion at this time on the particular situation to which the gentleman refers. If the gentleman had called it to my attention ahead of time, I would have been very glad to have been in a position to answer it more definitely, but I cannot, because I do not understand the situation sufficiently.

Mr. STRATTON. Perhaps this matter can be clarified before the debate is ended. It is my understanding that the Secretary does have this authority in the House version of the bill, and it seems to me that it is most important that a major city or a county like Schenectady, or other cities throughout this country, should not be penalized because there is some sort of device in effect in the Department of Labor at the present time which requires them to include other areas which are not seriously affected by unemployment when determining which areas should be called unemployment areas.

Mr. PATMAN. Personally I would not like to say, for another reason. There is more involved in this than appears on the surface, and I would like to give it more consideration.

Mr. STRATTON. I thank the chairman. The other point that I wanted to make, Mr. Chairman, was to advise Members of the House, as I have advised them by letter this morning, that I intend to offer under the 5-minute rule an amendment similar to the one offered in the other body by the distinguished Senator from Louisiana [Mr. LONG], which simply puts on the Secretary of Commerce the responsibility of examining the economic and employment impact of the closing down of military bases. In the State of New York, for instance, the Air Force has been talking about closing down a major function of the Rome Air Force Base, the air material area called Roama, with a loss of 6,200 jobs. Now, I am in favor of this bill. If the bill goes into effect and Rome should get a new industry that would bring in 200 or 300 or 400 jobs, that will be very fine. But if at the same time the Federal Government, which is trying to eliminate unemployment, closes down an operation which will take 6,200 jobs out of Rome, something seems to me to be very, very wrong. We have to coordinate the operations of our Government. We have to insist that if we are trying to combat unemployment, every agency of Government should understand the impact of unemployment before that action is taken. This is what the effect of my amendment will be. It is discussed in detail in the CONGRESSIONAL RECORD on pages 4037–4038 for March 15.

I hope that in view of the President's announcement yesterday that 73 defense bases here and abroad are going to be closed down—and the announcement I understand is going to be made in the very near future—that Members of the House on both sides of the aisle whose districts might be affected by this will listen to my amendment, and I hope that they will support my amendment.

Mr. KILBURN. Mr. Chairman, I yield 7 minutes to the gentleman from Illinois [Mr. ARENDS].

Mr. ARENDS. Mr. Chairman, on April 10, 1959, speaking on this same subject, I called the attention of the House to something that occurred in my own district, namely in Danville, Ill. At that time I had reprints of the talk made in pamphlet form which I sent to each Member of the House and Senate, and spread it about the country as much as possible, to tell the country what people can do who rely upon their own ingenuity and who through their own determination can and in this case did do. The following is what happened, and I should like to repeat for the House some of the words used at that time:

> Mr. Speaker, the Congress and the country should know the inspiring story of the city of Danville, Vermilion County, Ill., which I am privileged to represent. It is a story of how a resourceful people who, in spite of all economic adversities, built and maintained a thriving community. I speak of this with pride beyond measure.
>
> In truth, the story of the city of Danville, Ill., is the story of America and what has made our country great and strong. It is a factual account of what individual community initiative and ingenuity, self-reliance, and determination can accomplish.
>
> In the course of its history, Danville at one time was a depressed area. It suffered, as all communities do from time to time, to national economic changes, resulting from the development of new products, new manufacturing techniques, labor cost differentials, transportation facilities and costs, and a number of such economic factors.

There were occasions in the history of Danville that doubtless many thought at the time it would become a ghost town. But it did not. Its people decided to make it a thriving city with a prospect for continuing growth. They pooled their ideas. They pooled their resources. They devised plans and put those plans into effect.

Mr. Speaker, it is well that the Congress and the country know the history of the city of Danville, particularly at this time when so many communities are looking to the Federal Government to aid them in their present difficulties. The history of the city of Danville says in words much better than I can employ the true meaning of local responsibility, self-reliance, initiative, and ingenuity. It emphasizes what can be accomplished by following the true American traditions. They did not look to the Federal Government to solve their problems. They did it themselves.

I am inserting in the RECORD, as a part of my remarks, a memorandum, based on fact and not fiction, based on truth and not theory, of what one city itself accomplished on its own, without relying upon Federal aid and dictation.

This memorandum presents the story of a city that must be told over and over again—and there are doubtless other such communities who have and continue to do likewise but, unfortunately, they are becoming fewer and fewer. As we consider proposed legislation to establish a Federal agency to aid depressed areas bear in mind what Danville did for itself. If you take the proposed course of extensive Federal aid, you say to communities like Danville: Why exercise your own ingenuity, why risk your financial resources, why spend your time and effort—the Federal Government will do it for you? When that day comes, when the Federal Government attempts to do everything for us, then our American system of Government is no more.

The following story of Danville was prepared by the local chamber of commerce, a truly progressive and aggressive organization:

"THE STORY OF DANVILLE, ILL.

"'Cities do not grow and prosper by chance. They are the result of the vision, the sacrifices, and efforts, of its citizens.'

"Many cities have progressed through an economic crisis, and have been left prostrate for all time.

"Danville has experienced such a crisis, but fortunately for us survived.

"Too few of our citizens realize that had our city been left to take its natural course, their homes, their fortunes, and all they treasure in Danville could have been wiped out of existence.

"This is not a story of the Babylonian ages, nor of Colonial times, but one as modern as the last 20-odd years.

"Mr. Walter Bluecher, executive director of the American Society of Planning Officials, in reviewing our transition, said, 'This in Danville is not economic growth, this is industrial revolution.'

"This dramatic period in Danville's life is the story of our community's passage from one that grew and prospered by the exploitation of a nonreplaceable natural resource—coal.

"It is the story of how coal came to dominate our economy, and then how, in just 20 years, it declined to such an extent as to become a minor factor in our community.

"If our citizens would pause now, and look about them, and try to visualize our present coal mining operations, as our major employer of labor they would then have some idea of our possible economic paralysis and how our city, today, could be suffering economic chaos.

"This history of what is known in coal parlance as the Danville district covers an area embracing our own Vermilion County alone.

"It is the story of our major nonreplaceable natural resource, coal, dominating our community for a number of years, and then, its decline into a minor economic factor.

"Those hardy backwoodsmen of America's pioneer era, who made the hazardous trek to and from the banks of the Vermilion River, for their small, but precious supply of salt, did not realize that the troublesome earth fires that resulted from the wood fires, kindled beneath the iron kettles of boiling salt water, would some day become the force that would foster the growth of a busy metropolis on the river's banks.

"The rise of coal mining, as our major industrial employer, began in the 1850's. Then it was that coal was first mined locally, for local home use.

"The entry of the railroads into the community gave added impetus to the then simple mining activity.

"In 1866 several slope mines were opened in the Grape Creek area, followed in 1870 with the sinking of the first shaft mine in Illinois in what is now known as the Vermilion Heights area.

"This new force in our community life grew rapidly.

"It became not only the prime factor for our own growth and prosperity, but a factor also for the State of Illinois; in 1897 and again 1899, Vermilion County was the leading coal-producing county in Illinois.

"At the turn of the century, with a county population of just over 65,000 persons, there were approximately 3,000 persons engaged in the mining industry, or 1 in every 21 persons.

"In succeeding years, even with the introduction of new mining techniques and mechanization, our dependence upon mining for employment increased, and the impact of the increase, and the decrease, of mining employment, is reflected in our population figures.

"From 65,000 in 1900, our county population increased to 78,000 in 1910 and to 86,000 in 1920 but only increased about 900 persons from 1920 to 1950.

"Danville, itself, grew from 16,354 in 1900 to 27,871 in 1910, and to 33,766 in 1920; and to 36,765 in 1930, but it increased by only 154 from 1930 to 1940, and only by 945 from 1940 to 1950, or only 55 persons per year increase for 20 years.

"The causes of our small increases in population growth from 1930 to 1940 and again from 1940 to 1950 which so concerned and disappointed our citizens, is to be found in the period we are to review. People do not long remain in a community of rapidly decreasing employment.

"In the 1920's the peak of mine employment was reached.

"In 1926, out of a county population of 86,000 persons, 4,297 were employed in mining. Approximately one family in every six was dependent upon coal for existence.

"Commencing in 1927, certain economic factors entered into the economy of producing coal in the Danville district that initiated the decline in mining.

"The number of shipping mines decreased from a high of nine mines in the 1920's to one mine in 1951, and a peak of employment of 4,297 eventually dwindled in 1951 to a mere 451 miners.

	Miners employed	Shipping mines in operation
1926	4,297	9
1929	3,286	8
1934	3,097	6
1939	2,558	6
1944	1,735	5
1951	451	1

"In addition to the reduction in the number of mines and miners, the average days that the mines operated each year further decreased mine payrolls.

	Days
1920–25	183
1925–30	170
1930–35	136
1935–40	150
1945	115

"With the final closing of the Bunsenville mine in 1947, our county ceased to be a major producer of coal.

"In 1918, almost 4 million tons were mined in the country—largely hand mined.

"In 1947, we mined less than 500,000 tons even with the most advanced mechanization.

"Is it any wonder our community's population remained static?

"Had matters been left to take their course, Danville would today be just another ghost of its former self, as are a number of other cities in southern Illinois.

"Here was a community of some 40,000 people, its basic industry all but disappearing in 20 short years.

"The black gold that was the foundation of Danville's growth and prosperity declined into a minor role.

"Danville, known far and wide as 'the heart of a large coal mining area' lost the major product that was the source of its national fame, and the fortunes of its people.

"As if this, the loss of our major community support, were not enough, an additional blow was to simultaneously be struck at our economic foundation.

"Due to the abundance of coal, and the additional asset of local shale adaptable to brick manufacturing, it was only natural that brickmaking should become the second major factor in our community.

"The coming of the automobile brought the new use of bricks for pavements, and along with the demand for bricks in the building of the rapid growth of Chicago, Danville became one of the largest brick producing centers of the country.

"Five brickyards were in production in 1926 and 1,007 persons were employed; but even this substantial source of employment was to face its crisis.

"Concrete became the standard material for highway construction, and steel, concrete blocks, and reinforced concrete, supplanted many uses of brick.

"In addition, the introduction of mechanical processes in brick production further lessened the needed manpower.

"From a high employment of 1,007 persons in this field, brick production in two remaining plants in 1951 employed 220 persons; thus another set of uncontrollable economic factors wiped out another 800 opportunities for employment.

"What tragic consequences could have resulted:

	1926	*1951*
Mine employment	4,297	451
Brick employment	1,007	220
Total employment in these two major fields	5,304	671

"For our purposes, manufacturing industries are establishments that produce a product for distribution beyond our wholesale or retail area; and Danville in 1926 had 18 such industries, employing 1,938 persons.

"Yes, Danville today could have been only a ghost of its former self, but fortunately for us, it is not.

"Though its major source of employment disappeared, it had one asset that was to sustain it. Had this been lacking, as it had in so many other cities, we would not today live in a city more flourishing than its former self.

"Danville had a primary asset; and that was community leaders and a citizenry that would not admit economic defeat, who would not, as had citizens in so many other cities, give up in despair.

"It was in 1928 that the first of a series of meetings was held to discuss the growing problem. Visits were made to study other cities. Consultations were held with experts in the field of industrial development. No government was asked for aid or succor. This was our own task to solve.

"At the height of our crisis, Danville's leaders were pioneering in a new method of community development.

"After much discussion and days, yes, weeks and months, of effort devoted by loyal citizens to solving our critical situation, the solution was presented.

"At a meeting of the board of directors of the Danville Chamber of Commerce, held in October of 1929, a plan directed toward saving our community from economic chaos was adopted.

"At that chamber of commerce board meeting, the formation of the Danville plan, a new and unique method of securing new industries, was drafted.

"The action of that chamber board of directors meeting was to proceed with formation of the Danville Industrial Foundation, succeeded later by New Industries, Inc., and they set up the machinery to raise the necessary funds.

"Taking a lesson from our past history, the decision was made to secure a diversification of manufacturing establishments in order that a more healthy base for our community's future would be provided.

"In addition, it has as its premise that success, and particularly rapid success, could best be accomplished by a concentrated effort to induce small industrial establishments to locate in Danville, and our people would provide the funds to construct the buildings.

"Danville's citizens responded most heartily. Over $70,000 was subscribed to launch the new enterprise.

"The soundness of this action is given adequate testimony, not only with the revolutionary success we have had in rebuilding our tottering economy, but in the numerous visits by committees from other cities to our chamber of commerce office for advice, and in the hundreds of requests received from other communities for details of our plan, also the scores of articles written about our success that have appeared in magazines, newspapers, and national periodicals.

"What a remarkable story of transition has taken place before our very eyes.

"Our steady, consistent progress has been so constant that many of our citizens are unaware of what has transpired about them.

"From a community, largely sustained by the employment of over 5,000 persons in two basic industries that had been reduced to the employment of only 671 persons in 1951, we have risen into a modern industrial city with 48 manufacturing establishments employing close to 8,000 persons.

"And diversification we have. Jelly candy and dragline buckets, bobbypins and lift trucks, photographs, and automobile castings, dresses, jackets and fertilizers, electrical supplies, and buttermilk products, hoists and dog foods, a host of products flow to the four corners of the world.

"In 1929, at the start of our plan, Danville had 14 plants employing 1,444 persons.

"In the next 2 years, five new plants were added.

"By 1935, we had 23 plants employing 2,384 persons.

"As the years rolled on, its leaders and its citizens were to keep doggedly at their task of reconstruction, and the results exceeded their fondest expectations.

"Manufacturing industries and employment in Danville

"By 1940, 26 plants, 2,890 employees; 1945, 26 plants, 3,284 employees; 1950, 46 plants, 6,745 employees; 1951, 46 plants, 7,825 employees; 1953 (employment should find us close to the 9,000 employment figure in 48 plants).

"The source of the employment of the more than 12,000 employees of our stores, shops, and offices, and the livelihood and prosperity of the doctor, the lawyer, the wholesaler, and the retailer, in a larger measure than ever before stems from the payrolls of these plants.

"The basis of all human existence stems from farm income and manufacturing payrolls, and our growth in manufacturing payrolls is most startling.

"Payrolls, manufacturing industries

1940	$3,222,000
1945	5,837,000
1950	20,730,000
1951	25,788,000

"But it is difficult to perceive the tremendous strides we have made in industrial payrolls, due to our present inflated dollars.

"We have always taken pride in the richness of our surrounding agricultural area, and it is in comparing the increase in our total county farm income, with our industrial payrolls, that a more vivid picture is to be seen.

	Total farm income of Vermilion County	Manufacturing industry payrolls of Danville
1940	$7,849,000	$3,222,000
1945	17,983,000	5,837,000
1950	25,340,000	25,788,000

"An amazing picture. Our industrial payrolls have grown from less than 40 percent of our total county farm income until they now exceed that income.

"Success. Victory.

"Yes; a city has been saved.

"But what a debt of gratitude is due the men and women responsible for this unprecedented drama.

"And they gave not only of their time, but of their personal resources as well; for to them these funds of their fellow citizens became as a public trust.

"The moneys of the foundation stockholders were to be expended solely for the purpose to which they were dedicated, the construction of the buildings that would bring about our new economic era, and that alone.

"And other costs must and did come from their personal resources.

"Fools, some men might call them. But the results?

"Not one penny invested in buildings has been lost.

"Not one stockholder's investment has been squandered.

"By watchful guardianship of the trust, a dividend of 22 percent profit was paid to the original stockholders.

"A triumph most unusual in any joint community enterprise.

"What a glowing monument is ours to see and from which we prosper today. As a testimonial of the time, the effort, and the personal sacrifices of those men and women, we do not have the dust and rubble of a ghost city, but a virile, prosperous city, and this prosperity is our inheritance.

"Let us then pay tribute to them, in the present, and in the years to come.

"Let us not be laggard in our present, and in our future years, with our inherited prosperity, our fortunes, and our livelihoods.

"Let us, like them, by our continued community efforts and sacrifices, strive to make Danville a better city in which to work, a better city in which to play, and a better city in which to live.

"For then, we can take continued pride in our community, and contribute our share in assisting Danville on its march forward."

Yes, ofttimes the impossible is hard to do. But in this case it was done. This is a true story full of meaning and purpose. If more communities would make efforts similar to those expended by the good people of Danville there would be no need for this legislation. I certainly am opposed to this committee bill.

Mr. PATMAN. Mr. Chairman, I yield 3 minutes to the gentleman from Montana [Mr. OLSEN].

Mr. OLSEN. Mr. Chairman, as you all know, I am a newcomer to this body and do not have any of the advantages of being an authority here in this Congress, but I think that has some advantages for I have been walking with the people on the streets of my community in Montana daily over the past years and I have heard their sentiments, and I must say I share them with them.

I rise in support of the bill S. 1. I think that it could be a great deal more adequate if the figures in S. 1 compared more favorably with the figures that are in our foreign aid program. I speak the sentiments of my people in Montana when I say that they, while not being critical of foreign aid, wonder that good Americans cannot have assistance, too, assistance that would be repaid into the economy of the country, that would be repaid into the Treasury of the Government, not handouts, not a dole.

Everyone walking the streets, just ordinary, common people, can see that we pay for this depression. We pay for it whether through this bill, S. 1, or through public welfare, or the loss of public facilities by their wearing out, depreciating, or becoming obsolete. We pay for it whether it be in loss of human beings by idleness, by their depressing experience, or by their loss of will by the very lack of encouragement.

How much better, then, that we loan the money to our communities, that we assist them in reinvesting in their public facilities, that we assist them with seed capital at low interest for new job making industry and thus assist them in again enjoying the production of this free enterprise system and preserving it and making it of greater productivity and greater strength.

It is not very long ago, just last August, that I heard on the streets great complaint that the depressed areas bill of that time did not become law. At that time citizens noted a total of $300 million foreign aid had been spent on a country, Laos, which is smaller than the State of Montana, and at the same time in Montana we had some of the same kinds of troubles with depression that were encountered in the other parts of the world—depression in the way of no jobs—yet no domestic aid for Montana. Today there is the instance of a small Montana city of 30,000 people, last summer and the summer before, that right today has 4,000 people on public welfare or public assistance of some kind.

The need is most apparent to those of us who come from districts which experience cancerous pockets of continued, chronic unemployment and underemployment.

Montana's total civilian labor force on February 15, 1961, was estimated at 258,600. Of this number, 14.4 percent

were unemployed. The present state of the economy, held over from the effects of the 1957–58 downturn, is disturbing. Several thousand jobs have been eliminated, especially in mining and lumbering. Unemployment has continued to increase and Montana's job base has not grown sufficiently to absorb these experienced workers or the newcomers to the labor force.

My hometown of Butte, Mont., the center of the mining industry in my State, has been a distressed area by the definitions of S. 1 for a long, long time—more than 19 percent since middle 1957. Also in my district, and not too far distant from Butte, is the city of Kalispell, the center of the lumbering industry in my State, and it, too, has been a distressed area under the definitions of this bill for a long time—over 10 percent for more than 3 years.

I support S. 1—however, I do not think that there is sufficient aid in the bill to bring about all the desired results. Nevertheless, the program named in the bill is a step in the right direction, and the amounts of aid, the degree of aid, the number of dollars of aid in the way of loans and grants, can be improved upon after passage of S. 1.

Again, on the subject of need, my hometown of Butte has suffered depression since the copper price decline in late 1956 and early 1957. Employment of craftsmen—skilled hardrock miners of various qualifications, carpenters, blacksmith, boilermakers, and other similar tradesmen, have been suffering from unemployment and underemployment since early 1957. These are honest, honorable, hard-working people in their late forties and fifties. Their distress has gone from depression to despondency because of the lack of opportunity. These are old friends and neighbors and schoolmates of mine—I testify to the fact I have seen.

In the Kalispell area, unemployment in the lumber industry is a result of the cumulative effects of the 1957–58 economic downturn, and a general slowdown in homebuilding during the past 2 years. Here, too, honest, hard-working craftsmen are unemployed because employment opportunities have vanished.

As further support of S. 1, I have introduced a similar bill. It is urgent that we act now to stop these pockets of unemployment and underemployment before this condition worsens and spreads.

Montana, like the other States which contain these pockets of unemployment and underemployment has witnessed the danger of contagion and of infecting other areas with spread of unemployment.

Because of Montana's vast storehouse of mineral resources, we have a history of a great mining State. However, for one reason or another, foreign competition, low prices, or lack of markets, zinc, lead, gold, silver, manganese, chrome, and other mineral industries have had to close or drastically curtail their operations throughout the State.

Philipsburg, another mining town, is a depressed area like the bigger city of Butte because of depressed prices for manganese, lead, and zinc. Jobs have vanished. The coal mining of Red Lodge and Roundup industry has been especially hard hit by the advent of natural gas for domestic and industrial use and by the transition of the railroads to the diesel engine.

Deep-shaft mining in the copper industry has been replaced by the open pit and a mechanized means requiring very few miners and artisans. The power shovel and the enormous trucks and large conveyor belts have displaced men. Butte and other mining camps—Philipsburg, Red Lodge, and Roundup—could be helped very materially by the Area Redevelopment Act.

Anaconda, a metals smelting city, has experienced unemployment of more than 6 percent—metal prices and automation have eliminated jobs and put men on the street.

The lumber industry in Montana is faced with the same distressing problem as other areas—low prices, low demands, and seasonal operation because of severe winter and spring weather conditions. Here, as in the mining industry, communities suffer from their dependency on a single industry.

All of these single industry communities can have the very needed help of this bill; first, to plan a new economic life of diversified industry, and second, by assisting in the finance of new industry by the extension of low-interest credit.

Further, and probably foremost, we must have in mind that we are dealing with people—not just industry or not just an area. Thus occupational retraining is perhaps the most important because it will give these people new hope to be productive. Thereupon, we can make their dreams a reality by economic planning and by financing new industry to put the new training to work.

Montana has an additional problem in that it contains seven Indian reservations and each one has faced for many years the problems of underemployment of varying degrees. The reservation land areas, set aside for the tribes by Federal statute, are entirely inadequate to provide a livelihood for even a small portion of the Indian inhabitants. The land and resources are generally unproductive and the Indian families with strong tribal ties have had to depend on welfare and direct Federal assistance. We are convinced by the actual success of new industries which have moved on to Indian reservations in other States, that these people can prove their lot if they are given an opportunity. Here again, this bill will avail them of the technical assistance for planning, planned assistance in the actual financing of new job opportunity industries.

Montana is one of the States that is experiencing the decline of employment on the farm and the rush of these people to urban areas. We are in grave danger of a spread of these chronic unemployment and underemployment areas if there is delay in assistance to the already troubled spots.

Mr. KILBURN. Mr. Chairman, I yield 1 minute to the gentleman from Maryland [Mr. MATHIAS].

Mr. MATHIAS. Mr. Chairman, western Maryland is part of the Appalachian region of this country, that has suffered the experience of economic difficulties. In my district there are two cities, Hagerstown and Cumberland, that are listed as areas of substantial and persistent unemployment. Throughout this region we need the cooperation of every level of government and the participation of every segment of the community. I am hopeful that the administration of legislation that will be enacted today will provide leadership of the highest character, which will stimulate free enterprise throughout my district and all of the Appalachian region.

On the assumption that area redevelopment assistance will be so administered in areas demonstrated to need such assistance, and will be employed to reinforce, and not to subvert, this free enterprise system, I have decided to support the bill approved by the House Committee on Banking and Currency.

Without reviewing the whole bill, I note two significant provisions which are absent from alternative proposals. These are public facility grants and rural development funds.

As a former city attorney and State legislator, I have had personal experience in working to attract new industry to my home community. One of the major difficulties usually encountered in securing a new industrial plant is the inadequacy or absence of public facilities. It is at times possible to provide the bare necessities by makeshift arrangements, but these are not satisfactory to prospective industrial settlers nor to local authorities. I feel, therefore, that the inclusion of public facilities grants is a valuable feature of this bill, which receives my support.

The committee bill also comprehends rural redevelopment areas. The Sixth Congressional District of Maryland not only includes Cumberland and Hagerstown, which are designated as areas of substantial and persistent unemployment, but also areas which should qualify for rural development assistance. For example, farm families with net money income from all sources of under $1,000 or gross farm products sales under $5,000 are clearly low-income families.

In my opinion it would be heartless to provide assistance to urban communities without considering the plight of these rural people. Not only are they equally deserving, but in many cases need more help in confronting unique problems imposed upon them by economic conditions over which they have no control.

Finally, I believe that these areas of western Maryland are typical of many others throughout the Nation. While I agree with critics of this bill that it may not accomplish all the miracles that are promised by its advocates—yet I must ask myself, my colleagues in the Congress and the Nation: Can we deny to areas of economic distress and actual human suffering and hardship this opportunity to help themselves?

An opportunity is all that is provided by this bill. It is up to the people of America to use the tools that we can provide through this bill. If they will once again prove that the sources of our

prosperity are the cities, towns, and farms where they work, this bill will be a success; if they do not, it will prove to be a delusion.

Mr. KILBURN. Mr. Chairman, I yield 5 minutes to the gentleman from New York [Mr. PIRNIE].

Mr. PIRNIE. Mr. Chairman, the objective of the pending legislation is to emphasize the concern of the Nation for the plight of economically distressed areas. No one of us believes that we can legislate prosperity for these areas nor can we within the limit of any one proposal solve the basic problems involved. It is right for Congress to show its concern over these situations and to encourage these communities to take steps to restore their economy. Yet of far greater value is a determination on the part of Congress to attack when possible the causes of this distress. Some areas are victims of changing conditions either in demand for certain raw materials or through technological advances. Others have felt the impact of foreign imports. Industries, once thriving, have withered or moved. We have real problems to resolve in the adjustment of foreign trade if we are to preserve our economic strength and the American standard of living. The responsibility of our State Department to take corrective action is immediate and compelling.

The pressures of the cold war have imposed upon our Nation the great responsibility and heavy expense of providing for the security of the free world. To meet this challenge we have had to develop a whole arsenal of new weapons while at the same time maintaining adequate strength in conventional arms. This has required shifts in emphasis as new scientific developments have modified our concepts of defense. The backbone of this effort is found in our military installations scattered throughout our Nation. As they came into being, communities responded magnificently in providing public facilities, roads and schools amounting to many millions of dollars at the cost of the local taxpayers. Patterns of economy were fashioned to service these installations. Now many of these areas are faced with a liquidation of installations aggravating or precipitating disastrous levels of unemployment. It is recognized that the defense of our country should not be run as an employment bureau, but on the other hand a sound economy is the best foundation upon which our real defense can rest. If changing military needs make certain tasks unnecessary, appropriate adjustments should be expected. Yet it should be remembered by the military at all times that communities and faithful employees are more than pawns to be sacrificed at will. Every military decision should be carefully analyzed as to economic impact—every effort should be made to avoid unnecessary hardship. The President took note of this truth in his defense budget message of yesterday. Congress should respond with constructive action to indicate its awareness of the danger and its resolve that appropriate agencies of the Government comply. True, we are a vast nation but we must at all times have the right hand know what the left hand is doing.

I would like to join with my colleague, the gentleman from New York [Mr. STRATTON] in his determination that sound economic principles guide our defense decisions. It is true, I come from an area which during the coming months will be faced with a decision of this type. My people recognize the obligation of the Nation to defend itself as efficiently and as economically as it is possible to do. We do not think we should receive special favors, but we feel we are entitled to full consideration. We believe that since for the past 10 years Roama at Griffiss Air Force Base, N.Y., has been engaged in a very valuable mission for the Air Force in an activity, which is not to be phased out as being no longer necessary to our defense, but instead is growing and expanding, it should continue the job. Any dislocation of this trained corps of workers, which now approximates about 6,400, would have a terrific impact upon our area. It would destroy a going concern valuable to the Air Force. Our community has supported the Air Force mission in providing public facilities, roads, and schools. There is adequate housing. Continuation of this partnership with the military would seem to be in the national interest. Our country is seeking to eliminate distressed areas, not to create them.

Mr. KILBURN. Mr. Chairman, I yield 2 minutes to the gentleman from Michigan [Mr. HARVEY].

Mr. HARVEY of Michigan. Mr. Chairman, I set forth my views in full yesterday, but I just wanted to call attention at this time to a particular effect of this bill which nobody has talked very much about.

Section 7 provides for loans for public facilities to be constructed by municipalities. The administration bill provides for a subsidized rate of interest, 3½ percent, to go to these municipalities. I want to call to your attention that just last week our Federal Government in converting obligations from 3 to 5 years paid 3.98 percent interest and up to 4.09 percent interest. I think lending at a subsidized rate of interest is preposterous. It does not make sense to me to lend money to the others at less than it costs us to borrow it. I do not see how I can justify to the people of my State of Michigan our Federal Government lending money at a lesser rate than it has to pay when it borrows.

Mr. PATMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Missouri [Mr. ICHORD].

Mr. ICHORD of Missouri. Mr. Chairman, it is a happy occasion for me to have the opportunity to arise in support of Senate bill 1, the Area Redevelopment Act, with the committee amendment thereto.

In my district, the Flat River area, which is composed of five counties, has been classified by the Department of Labor as an area of substantial and persistent labor surplus since 1958 and would thus be automatically designated as an area entitled to assistance under section 5(a) of the bill. I also anticipate that several other counties in my district will be designated as rural development counties under section 5(b).

The Flat River area or "leadbelt area" is one of the major lead producing regions in the world. As a matter of fact, it produces approximately one-third of the lead mined in the United States. But, today with 60 percent of the United States lead market being supplied by imports of lead and with lead selling at the depressed price of eleven cents per pound, the Flat River area has seen employment in the lead mines decrease 50 percent since 1952.

It is little comfort to the miners that the U.S. Tariff Commission has twice found unanimously that the lead industry was being seriously injured by lead imports as the previous administration both times failed to effectively implement those recommendations under the escape clause of the Reciprocal Trade Act. Since our Government has seen fit to undertake to finance economic development of underdeveloped areas in foreign countries, which undertakings in many cases have contributed to conditions in these so-called depressed areas, it seems that we are asking little when we request a similar program for our own people.

The people in the Flat River area want to build a new and stronger economy. They want the means of helping themselves which this act provides. They do not want charity or relief, and the Area Redevelopment Act does not provide charity or relief. With the exception of the public facilities grants and technical and retraining provisions, it is a loan program. Loans that will be repaid and with interest. As a constituent of mine from the Flat River area said in a letter to me just the other day, "I don't want relief. I just want the opportunity to work." This bill will substantially assist the so-called depressed areas to make available for that man and thousands of others like him the opportunity to earn a living.

This is the third time the House has worked on similar legislation. The third time in this case should be charmed as the legislation does have the support of the President. I strongly urge the passage of Senate bill 1.

Mr. PATMAN. Mr. Chairman, I yield 2 minutes to the gentleman from Connecticut [Mr. MONAGAN].

Mr. MONAGAN. Mr. Chairman, I take this time merely to state my position and, I hope, to help somewhat in the matter of the legislative history of this bill.

I am very much gratified, coming from Connecticut, with the statements of the gentleman from Texas [Mr. PATMAN], the gentleman from Wisconsin [Mr. REUSS], and the gentleman from Ohio [Mr. VANIK], concerning the antipirating provisions of this legislation.

I appeared before the committee during the consideration of this bill and expressed my feeling that the people of my section would be in favor of any legislation that would help depressed areas providing it did not mean that these areas were being helped at the expense of our developed sections of the country which have existing industries, which have been established there for a long period of time.

I am in the unusual position of having in my district one area which would qualify for assistance under this bill, but my area is also one which has suffered much from domestic and foreign competition which has lured away much of our business and has reduced our industrial base.

Therefore I am pleased at the statements that have been made and at the changes that have been made in section 2 and section 6(a) of the bill in pursuance of the suggestions that were offered by me and by other Members, and also the explicit provisions in the report of the committee which, it seems to me, tie down very clearly the point that Congress is against the transfer of industry from one section to another, a procedure which would be pointless and foolish and not in the national interest.

There is one other point I am happy about. We have a grave problem in our section and in many other sections of the country in connection with the competition with our industries of the increasing volume of low-cost imports which is coming into the country. I am pleased that the committee has seen fit to take the provisions concerning the Tariff Act of 1930 and the Trade Agreements Extension Act of 1951 out of this bill. The problem of trade and tariffs is too important a problem to be met by an indirect solution such as the one which was contained in H.R. 4569. We are going to have to come to a decision on this problem in the near future, but because of its gravity, it deserves to be made directly on its merits and not indirectly in a bill directed primarily at other objectives.

Mr. Chairman, I shall support S. 1 as amended.

Now I do not regard this legislation as final. We must, of course, keep our attention on it in the future to see how it works, to see that it carries out the objectives outlined therein, and to make sure that it does not injure various other sections of the country. With this in mind, I am supporting the pending legislation.

Mr. PATMAN. Mr. Chairman, I yield such time as he may desire to the gentleman from New Mexico [Mr. MONTOYA].

Mr. MONTOYA. Mr. Chairman, I would like to take a few minutes to make some remarks which should be made part of the record and which I am sure a number of my colleagues will wholeheartedly support. I have given some serious consideration and detailed study to a number of depressed-area bills not only during this session of Congress but in previous sessions. I also fully realize the benefits from the legislation in terms of dollars will go largely to the States in the eastern half of the country, and the South. However, I do favor the legislation because it is necessary and I would support it even if it did not help my State, but in fact, I support it more closely because I see that it will benefit New Mexico.

If I may, I would like to take a few minutes to present a realistic picture of New Mexico's economic situation as it exists in a number of counties. Although the overall statistics show that our State is prosperous, ignored is the economic retrogression which is taking place in half of the State's 32 counties. Sixteen counties have even lost population with the northern and northeastern sector of the State being particularly hard hit. The latest figures available show that in counties such as Sandoval, the per capita yearly income is as low as $416. Of course, it should be noted that approximately 42 percent of this county's population is Indian.

Other counties in this depressed economic condition have a surplus labor force and are underdeveloped. Some of our counties are unfortunately in the low per capita income category without any hope of extricating themselves unless the provisions of this legislation can offer a helping hand. The mining areas of New Mexico are also hard hit with many miners refusing to leave these areas, thus posing a serious problem and load on our welfare agencies.

These depressed counties also have high proportions of their population receiving State welfare benefits with large numbers of children, a few adults in their productive years, and many older people. Their complex social, cultural, and economic problems pose a serious challenge to both Federal and State Governments.

State unemployment insurance payments doubled during 1960, according to Employment Security Commission reports. They increased from $4,601,002 in 1959 to $8,950,245 last year. The Commission also noted that more people were out of work for longer periods of time, with job openings falling 14 percent and the number of jobseekers increasing by 9 percent.

I am particularly pleased to note that one underprivileged group, the American Indian, under the provisions of the committee-reported bill will be able to participate in the loan program. This door will be opened not merely to Indians in my State, but to Indians everywhere. Due to the underdeveloped areas on which many of our reservations are located, the Indian tribes in the United States are almost without exception among the rural, low income groups. I would like to point out that in New Mexico a substantial portion of the entire Indian population of the State is included in the northwest third of the State, an area which has been classified as a rural area with serious low income. This means that the area meets three criteria: namely, first, less than $1,000 average residual income to the operator and to family labor on commercial farms; second, level of living index among the lowest fifth of the Nation; and, third, having 50 percent or more of the commercial farms producing annual sales of $2,500 or less.

Turning now to another facet of our population affected by this bill, it is regrettable indeed that the American Indian, because of the trust status of his meager resources, has been unable to seek out the kind of economic opportunity which requires monetary investment. Although the American Indian is very industrious, he prefers the environment of his forefathers and that is why the pueblo type of existence needs economic uplifting through the provisions of this legislation. I understand there is some question as to the justification for making redevelopment loans to Indian tribes or to areas including Indian reservations. It has also been said that this type of legislation is intended to serve a temporary purpose whereas the rehabilitation or development of Indian areas is a longtime task. I would like to point out, however, that under the provisions of the legislation now being considered, longterm loans may be made. Actually, these loan terms run for longer terms than has been the practice of the Bureau of Indian Affairs with funds under its control. Generally, loans made by the Bureau have been for short periods, 10 years, 5 years, and even shorter. I know of no loan from the revolving fund so called, for more than 20 years. It is obvious to me that this legislation, for certain long-range purposes, would offer greater opportunities to the tribes than are currently being offered from other sources.

Administrative officials, operating with limited funds, have frequently said to Indian applicants either that Indian tribes were not eligible because they are the responsibility of the Bureau of Indian Affairs, or that the granting agency had no more money available. It is, therefore, of the utmost importance that this segment of our population be given every opportunity to avail itself of a program which can and should improve its economic standard.

In connection with an amendment which I will offer to S. 1, I would like to make a few remarks relating to the need for training unemployed and underemployed rural people. One of the significant facts in the social and economic development of the United States is the shift from a rural agricultural society to an urban industrial and service society.

Farm population has been declining for many years. In 1910 about one-third of our people lived on farms; by 1950 only one-sixth, and by 1960 only one-tenth of our people lived on farms. There has been predicted that by 1975 farm population may be around 17 million or about 7.5 percent of the total population. The number of farms has likewise decreased. There were 6 million farms in 1940; 5.3 million in 1950; and 3.7 million farms in 1960. It has been estimated that from 50 percent to as high as 90 percent of our young people in rural areas will need to look elsewhere for placement in an occupation. The rapid changes that have been taking place for many years in the mechanization of agriculture are making it possible for many boys and girls to leave the farms to work in other fields of work. For many years there has been much underemployment in agriculture. The farmer has become such an efficient producer that it is possible for a smaller number of farmers to produce the food and fiber needed by our people. A century ago one farmer produced enough food and fiber for himself and three others. Today he produces enough for himself and 24 others. Experts predict

that the farmer will soon be expected to produce food and fiber for himself and 45 others. An increased percentage of farmers are working off farm part of the time during the year. As mechanization and the adoption of educational scientific practices increase, it is expected that a larger percentage of farmers will work part time in other occupations.

It is important to utilize fully the available manpower in rural areas. It is likewise necessary to make available opportunities for youth and adults from farms to prepare for new occupations where they may find opportunities for increased service to the Nation.

There are many depressed areas in rural America where there are limited opportunities for rural people to prepare for an occupation or to obtain placement in an occupation that will offer a satisfactory standard of living. Rural people should be given the same opportunity as offered by their neighbors in urban areas. Unfortunately, many rural people have limited educational opportunities because of the thousands of small high schools. Many of these schools are too small to offer the types of vocational education courses that are needed for their children. If the Nation is to utilize fully its manpower potential then it cannot overlook the millions of young people and adults who are finding it necessary to leave rural communities or who are living in rural communities but are underemployed. If rural areas are not permitted to share in the benefits of Federal funds for providing training for depressed areas, it will be a serious loss to the people who live in these areas and who need the training. It will likewise be a great loss to the Nation because the services of these people will not be utilized to the best advantage.

In order to serve efficiently rural areas, it will be necessary to make available occupational counseling to rural people. Many of these persons are not familiar with the opportunities that exist in other areas; neither are they familiar with the training required for many of the occupations. In addition, careful studies will need to be made to determine those individuals who should be permitted to receive training for an off-farm occupation.

Appropriate courses in vocational education should be made available on an area basis so that individuals who desire may prepare for an occupation. After the training is received, adequate assistance should be given in connection with the placement of these persons in an occupation. It would be unfortunate to prepare these persons for a new occupation and then not assist them in becoming placed in this new work.

Providing vocational training, counseling, and placement, will not help solve all the problems of persons who live in depressed rural areas but these services can be of genuine assistance.

Mr. PATMAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Illinois [Mr. GRAY].

Mr. GRAY. Mr. Chairman, I rise in support of the bill S. 1, as amended. I deeply appreciate the opportunity of speaking in behalf of this much needed legislation to aid economically distressed areas. I am proud to be one of those Members who has consistently introduced and supported area redevelopment legislation. I have been more than disappointed by the lack of interest the previous administration demonstrated for the welfare of our unemployed people in my district and those of other areas of high unemployment in the country.

Mr. Chairman, I have the honor of representing the 15 southernmost counties in the great State of Illinois and before settling down to the true facts concerning our economic conditions as they now exist, please let me preface my remarks by saying that due to coal and fluorspar mine closures and other factors, the economy of southern Illinois has been slipping for the past 12 years. The people of this region, through their chambers of commerce, Southern Illinois, Inc., Southern Illinois University, community development programs, and other groups have done an outstanding job in trying to promote private industry in our region to take up some of the unemployment slack. However, the decline has been greater than the progress. Southern Illinois is made up of fine people, good schools, churches, and bounded on both sides by two of the greatest navigable streams in the world, the Ohio and Mississippi Rivers, but is severely hurt economically; and if this bill is not passed, thousands of people will continue to suffer and be forced to receive public aid, or leave the area. In the past 10 years approximately 38,000 people have left the area to find employment elsewhere. Approximately 20,000 able-bodied men and women remain unemployed in my district. According to the last figures from the Illinois Public Aid Commission, there are approximately 35,000 persons receiving surplus food in the 17 lower counties of southern Illinois.

As I said in my opening remarks, we are doing everything we can to help ourselves and much progress has been made; however, if the situation is to be corrected, we must have outside help. I will give my hometown of West Frankfort, Ill., as an example of what has been happening to southern Illinois communities over the past several years. The official 1940 census listed my hometown population as 15,700. The official 1950 census showed 11,400 and a recent census gave us 9,000 people. Those wearing rose-colored glasses cannot dispute these cold facts. When a community loses almost 50 percent of its prewar population, something is drastically wrong and certainly no one can argue that this type of community is not in need of assistance. Speaking for my hometown, I can say that every effort has been made to help ourselves. Unemployed coal miners and others who could not afford it, have contributed to an industrial fund to induce private industry to locate; however, we need many things to attract industry that our local people are not able to provide. That is the real reason Congress must recognize its responsibility and aid these areas suffering from chronic unemployment. The last 12 to 15 years we have been successful in attracting and developing 12,000 to 15,000 manufacturing jobs. Coal mining jobs have declined at a much greater rate however, so many of our miners who lost jobs are 40 years of age or over. New manufacturing concerns are reluctant to employ men in that age bracket when there is a large labor surplus of younger men. When an ex-coal or fluorspar miner is unemployed and is 40 to 55 years of age, he faces a long uncertain wait until his social security benefits are available. Oftimes his skills acquired in the coal mines are not transferable to manufacturing operations. Generally, he started working in the mines at an early age and terminated his education before he developed any other special talents or skills. I have many close friends and neighbors in my district who are caught in exactly the predicament I described. I firmly believe the passage of an area redevelopment bill will in time provide badly needed facilities to attract and develop more industrial jobs.

In closing, Mr. Chairman, let me be a little political if I may. During the last campaign several Republican speakers including Vice President Nixon and a so-called Republican truth squad came into southern Illinois saying "Give us a Republican Congress, give us a Republican administration and we will give you a distressed areas bill much stronger than the Democratic bill vetoed by President Eisenhower." In fact Mr. Chairman, they named certain cities in my congressional district and told how much aid they would get under a Republican bill. Oh, what a difference between election promises and actual performance. We now find the Republican leadership in Congress either opposed to any bill or they are working for a watered down version that would be of no help to anyone at all. What a blessing it has been that the American people saw fit to elect another Democratic Congress and a Democratic President who keeps election promises. If anyone doubts the statement I am making, just wait until the rollcall is taken and you will find over 90 percent of the Republicans opposing S. 1, the committee bill.

Mr. Chairman, does this sound like the wild promises made before the election that Republicans are really for the unemployed. I will let the record speak for itself. I urge everyone who has a sincere desire to help the unfortunate to support this meritorious legislation. All you need do is to take a few minutes of your time and visit an area where young able-bodied Americans are suffering undue hardship because of no job; no means of livelihood for their families. This is an all-American bill. Please now do for Americans what you have been doing for foreign countries for years. Thank you.

Mr. PATMAN. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. DULSKI].

Mr. DULSKI. Mr. Chairman, I rise in support of the depressed areas bill before us, and urge its adoption.

There are approximately 100 communities in our Nation with more than 15 million people, where there are nearly 1 million unemployed who have little

or no hope of finding employment in their communities even when the economy recovers.

What causes these depressed areas? In analyzing the various factors, I find the principal ones to be: First, the item produced in the area has lost its demand; second, automation or a change in production has occurred; and third, the plant has shut down and moved to another locality for sundry reasons. We might describe these depressed areas as the "industrial slums" of our country.

The people who live in these areas are suffering great hardships. Their unemployment compensation benefits are exhausted. Their savings are exhausted. Many of them are existing on welfare aid or help they are receiving from relatives and friends.

The communities in these depressed areas are also suffering. They cannot provide the public service that attracts business to localities when unemployment is prolonged indefinitely. Local budgets have to be kept at a minimum, thus necessitating a curtailment of educational facilities, capital improvements, and public construction.

President Kennedy has said:

> It would be a mistake to consider the problems of chronic unemployment and underemployment solely in the context of the areas directly affected. The entire Nation suffers when there is prolonged hardship in any locality. This problem is especially critical today, for 1 out of every 10 persons in the United States lives in an area that now feels the impact of chronic unemployment or underemployment.

I believe that industrial development, in the rehabilitation of these distressed areas, should be through the expansion of existing plants and the establishment of new plants. A program that would bring industries into a depressed area from other regions would not result in any improvement in industrial activity, and only shift the problem of unemployment rather than solving it.

If the total demand for labor in our Nation as a whole could be increased more than the average growth of our labor force the industries moving into the depressed areas would then represent a net addition to the number of jobs normally provided by our economy. In this way an effective redevelopment program can be an invaluable instrument in expanding our economy and the future growth of our Nation. But we must make certain that this legislation will create new jobs rather than transfer jobs from one region to another. This is the aim of the bill before us which states as one of its purposes, "that under the provisions of this act new employment opportunities should be created by developing and expanding new and existing facilities and resources without substantially reducing employment in other areas of the United States."

In my city of Buffalo and, in fact, the entire Niagara Frontier area of New York State, has been extremely hard hit by unemployment. Factories have shut down and some of them have even moved out of the area for a number of reasons.

In February of this year it was estimated that the number of unemployed in our area was 12.1 percent of the labor force.

Under the legislation we are now considering, Buffalo could be made eligible for aid even though it just missed the eligibility criteria for redevelopment loans by three-tenths of 1 percent. The bill states that the administrator of the program "shall also designate as 'redevelopment areas' those areas in which there exists a condition of substantial and persistent unemployment or underemployment." I am certain that the administrator of this program would give Buffalo every consideration for such a designation.

Mr. PATMAN. Mr. Chairman, I yield such time as he may desire to the gentleman from Pennsylvania [Mr. DENT].

Mr. DENT. Mr. Chairman, I rise to support the committee bill to aid distressed areas.

The once great industrial State of Pennsylvania finds itself listed as No. 2 in the Nation in its economic distress.

We are second only to West Virginia in this regard.

Both States are victims of the same destructive forces that have destroyed their normal economic well-being.

One cause of their troubles has come from the adverse economic effect of the Reciprocal Trades Agreements Acts.

This was acknowledged by the Senate version of this act before being amended by the House committee.

Section 5 of Senate No. 1 made a community injured by reciprocal trade agreements and foreign imports a first priority under the distressed area bill.

The House removed this section simply because if every single community could be called a distressed area as a result of import injury, the established metropolitan area plan now used as a criteria in determining the areas that qualify for aid under the bill would almost automatically make every industrial and mining State a depressed area.

This was just as well because this bill should not be compared with the serious problems raised by the perversion of the trade agreements in the last 8 years.

Other causes, of course, have added to the troubles of our great State, not the least of which have been the automation of industrial production, and the impact of gas and oil as a source of fuel replacing the basic coal industry.

In passing it might be helpful to consider the injury to these industrial areas by the raiding forages from Southern States with their tax concessions, free industrial facilities, appeals for migration based upon cheaper labor markets and lower real and personal taxes.

The need for this legislation is brought about by the complete exhaustion of resources in the areas that suffer from chronic and/or long-enduring unemployment.

The money loaned to these communities will not put these distressed areas ahead of other more prosperous communities but will in fact only give them a chance to catch up and be able to fight for their existence on more equal terms.

The one serious drawback with the present bill is that it will prove woefully inadequate because too few of us really know the extent of the distress in so many of our States.

One can hardly call legislation involving approximately $400 million for the aid and relief of the 50 States of this Union inflationary while we spend billions and billions yearly doing exactly the same thing for states and nations foreign to our shores.

Without denying help to friends and allies, can we honestly deny it to ourselves?

The peoples living in a distressed area are in need of Federal assistance and this Congress will be remiss in its duties if it fails to pass this legislation this session.

We have every reason to believe that this bill will receive Presidential approval from the President rather than a Presidential veto—a veto incidentally that has caused untold and uncounted additional suffering in these distressed areas because of the unwarranted postponement of the help this legislation makes possible.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent that all Members may have permission to extend their remarks at this point in the RECORD on the bill now under consideration.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. MOORHEAD of Ohio. Mr. Chairman, as a member of the subcommittee of the Banking and Currency Committee which developed this bill, I rise in its support. I make this statement in the realization that it is not a perfect bill. There are portions of it which I would prefer to see deleted. Similarly, there are provisions which might be included to improve the bill. Nevertheless, I feel strongly that this legislation represents a compromise developed out of opposing philosophies by men who feel a bill of this kind is necessary. It is a far better bill, in my opinion, than the legislation passed recently by the Senate, and it is a great improvement over the measure which President Eisenhower vetoed for many valid reasons last year.

I represent here an area of southeastern Ohio that has suffered economic plight for many years. The coal and pottery and other industries that once flourished in my district have declined, leaving distress, unemployment, and attendant economic and social problems. Our population has remained stagnant, and over a period of four decades a number of the counties in the district have lost population. Young people have sought employment elsewhere because there were no opportunities or too few opportunities at home. These conditions have persisted in good times and bad if we compare our potential against the progress of other areas of the Nation.

Let me respond to those who argue that the Federal Government should not embark on legislation of this kind, that it destroys local initiative, or that it only serves those persons and groups who sit and wait for their fellow taxpayers to provide them a living. For years, in my district, the people have exercised imagination and initiative. They have worked and are working diligently to

attract new industry to utilize the resources we have to create productive jobs for a large and willing number of people seeking work. There have been some notable achievements. New plants have come in. There is a new developing diversity of industry and we have represented in our area plants of some of the largest and most respected American corporations. However, in my opinion, help is needed—not direction and dictation from Washington or a Federal handout. We need a sound program of assistance to help ourselves. That is what I hope this bill will provide, not only in southeastern Ohio but wherever difficulties of this kind persist.

The Federal Government is deeply involved in our local troubles already. The United States pursued, for more than a decade, a policy of bountiful aid to other nations. American dollars have made possible the spectacular recovery of Western Europe and Japan. Machines and technical advice have been furnished in abundance so that these nations could use their own natural skills and the advantage of low-paid labor to invade the American markets with their products. Our laws have consistently encouraged the competition of imported products with American-made goods in our domestic markets. There are many plants padlocked in southeastern Ohio and countless jobless persons who can trace their economic problems directly to the foreign trade policies enacted consistently by the Congress since World War II. Is it not fitting that the Federal Government should express some willingness to help these people help themselves?

Unemployment is, of course, an immediate and tragic problem for the person upon whom it is visited. It is also a serious problem for the community and the Nation. Congress has been quick to respond to this issue when it has arisen. Only recently we have enacted emergency unemployment compensation legislation. Several days later we provided Federal funds to assist the children of the unemployed. These emergency costs amount into the hundreds of millions of dollars. In some areas, the costs continue to mount year in and year out. I recognize that this bill is not intended to deal with the present business slump. Its purpose is to meet the problem of chronic distress in specific areas of the country which meet criteria it establishes. However, I mention them because the States and the Federal Government provide unemployment assistance and public relief to the jobless. These measures are necessary, but they are unproductive in the long run. They assist in a peripheral way, but they add little investment in the future.

It has been pointed out that in 16 areas of chronic unemployment in the State of Pennsylvania, unemployment compensation and public assistance benefits together totaled $130 million in 1960 alone. If unemployment in these 16 areas could have been brought down to 3 percent of the labor force, nearly $90 million might have been saved in 1 year in this one State. I am not inferring, as I believe some of the supporters of this bill may have done, that the legislation we are discussing today would have made this total saving possible. I do say that with this bill enacted into law there would be possibilities which are not available today. We are not discussing the simple issue of the costs of this bill alone. The question cannot be honestly isolated from other considerations. Most of the costs of this bill will be in the form of repayable loans. There is a tremendous cost attached to the failure to provide Federal assistance in this case and the costs can be totaled in savings in existing programs. The costs of losses in human energy, dignity, skills, and progress cannot be measured so easily, but they are deeply involved here, nonetheless.

In this measure, we want no pirating of industries by one community at the expense of another. Redistribution of distress is not to the Nation's advantage. Nor do we want back-door financing by the Federal Government so that we obscure further the fiscal policies of the country. This bill seeks strongly to avoid piracy and calls for necessary funds to be subject to annual review by the Appropriations Committees of the Congress. In this way, this bill would be far better than any on this subject previously submitted to the White House.

Someone has said that if this bill is passed it will result in mass frustration and disillusion, since it promises more than it would deliver. This is true only if it is not regarded in sensible perspective. The Federal Government is not in a position to create productive industrial jobs. It has great power, but jobs are created because individual producers are willing to translate ideas into salable merchandise. This involves insight, vigor, skill, and risk on the part of the producer. Let us have no illusions about how employment which genuinely adds to the Nation's productivity is created. Sleight of hand from Washington does not change this basic fact, and I hope no one in either party will be so naive or cynical as to hold out the promise of immediate benefits that solve all or even most of our economic problems. This bill will not produce miracles. It will, I believe, give needed encouragement and incentive to local people to work even harder with the proper tools to create a favorable climate for general industrial development. The big job still rests with the community.

Both political parties have long recognized the need for Federal area redevelopment legislation. It has been discussed in Washington for a decade or more. The Republican and Democratic Party platforms have both called for its enactment. How the details of the legislation should read has stalled final action. I can understand the differences of opinion which have been so ably expressed here today about this bill. They are founded on sincere interpretations of what is best for the public interest. But with equal sincerity and conviction, I urge the House to pass this bill and to insist that its provisions prevail over those embodied in the bill passed by the other body.

Mr. RYAN. Mr. Chairman, S. 1 is a sound program for Federal area redevelopment assistance designed to put an end to the pockets of chronic unemployment which have marred the American economy for some years. Many of these areas have demonstrated a crying need for assistance since 1955, and their number has been steadily increasing in the last 3 years. Twice the Democratic majorities in the Congress have passed distressed area legislation, only to have their work undone by Presidential veto. Now that we have a President in the White House who is demonstrating an immediate concern in the plight of the more than 6 million Americans living in the 108 presently designated depressed labor markets, we can at last enact a program which offers them the hope of economic recovery for their communities.

My own State of New York has 6 smaller labor surplus areas which will be eligible for Federal assistance under S. 1. These areas are Amsterdam, Auburn, Gloversville, Jamestown-Dunkirk, Ogdensburg-Messena-Malone and Plattsburgh. The latest figures show that in Amsterdam 14.1 percent of the labor force is unemployed; Auburn 9.7 percent of the labor force is unemployed; Gloversville 15.3 percent of the labor force is unemployed; Jamestown-Dunlone 14.2 percent of the labor force is unemployed; Ogdensburg-Messena-Malone 14.2 percent of the labor force is unemployed, and in Plattsburgh 8.4 percent of the labor force is unemployed.

New York State as a whole is in need of help. The State has 7.3 percent unemployment with 557,231 people out of work. Although New York City may not qualify for direct aid under this bill, the city would benefit from any reduction in unemployment in the upstate areas as industries in the city service the entire State. Needless to say, New York City with 353,100 people unemployed needs assistance.

Puerto Rico will also benefit from this bill. This important Commonwealth has been engaged in a program of self-help which should be praised by all of us. However, the recession has hit Puerto Rico, and this area deserves our support and encouragement. There are three areas of substantial and persistent labor surplus in the island: Mayaguez, Ponce, and San Juan. A brief look at the statistics will indicate the need for the type of assistance provided for in S. 1. In Mayaguez, Ponce, and San Juan, 12.3 percent, 14.4 percent, and 6.2 percent of the labor force, respectively, is unemployed. There are a total of 22,500 people out of work.

I am somewhat concerned about the adequacy of this proposal should the national economic situation not improve as rapidly as some predict it will. With only $394 million in potential loans and grants to be distributed among 108 industrial areas and an indeterminate number of rural areas, and a restriction on the amount to be made available for use before July 1, 1962—loans not to exceed $90 million before July 1, 1962—one might question whether any community will receive enough financial help to get back on its feet. I firmly support the proposals contained in S. 1, but if the state of the economy does not show a marked sign of an upturn soon,

I believe we must consider more drastic measures to alleviate the condition of chronic unemployment in the distressed areas.

Mr. CUNNINGHAM. Mr. Chairman, I am anxious to give my full support to those truly depressed areas of the country such as those in Pennsylvania and West Virginia. I am willing to support legislation for such areas even though my own State has a high degree of employment and needs no such assistance from Washington.

However, I cannot with clear conscience support the legislation now pending, as it is a scatter-gun approach. It extends hope to those who need help, but I am confident that such help will never materialize through enactment of the proposed legislation. Contrary to statements made, I am of the opinion that the bill will stimulate the pirating of industry from one city to another at the taxpayers' expense.

So far as my district is concerned, we have a healthy economy built by loyal Americans through our free enterprise system. We do not think it proper or fair that the Federal Government should discriminate against industry in my district as it would undoubtedly do if this legislation is approved in its present form.

Therefore, Mr. Chairman, I plan to support the Widnall substitute as it is a workable piece of legislation and gets to the root of the problem. It will bring about the results we all want. It will actually cure the problem and put people to work. It has a very strict provision against the pirating of business from one city to another.

I hope that the workable, effective substitute will prevail. I shall support it. If it does not prevail, then I shall vote against the committee bill because I am convinced that it is a "pie in the sky" proposal and will never do the job that needs to be done.

Mr. NIX. Mr. Chairman, I would like to speak briefly in support of S. 1, the area redevelopment bill. This bill was reported out by the Committee on Banking and Currency, after careful study and many long hours of hard work, and after taking thousands of pages of testimony on this and related measures. I hope my colleagues have paid particular attention to the excellent testimony given by Governor Lawrence of my own State of Pennsylvania. I feel that this leaves no room for doubt about the need for this legislation.

This bill provides for Federal loans to industrial firms to expand employment in areas which have long suffered from a high rate of jobless workers, and in depressed rural areas as well. It also provides loans and grants for necessary public facilities in these areas, and it provides important aids for occupational training of workers.

Mr. Chairman, I am convinced that this bill is justified because of our moral responsibility to relieve the suffering of the unemployed. The Congress clearly assumed the obligation to do whatever it can to maintain high levels of employment in the Full Employment Act of 1946. This purpose has repeatedly been reaffirmed in other acts to expand employment and to provide assistance to the unemployed.

I also support the committee bill because I am convinced that it will benefit the people of my own district and, in fact, Americans everywhere. Unemployment wherever it exists means idle resources and a waste of manpower. In the last campaign it was clearly established that one of the basic problems facing America is the recent slackening in its rate of growth. A growing economy will provide higher incomes and better standards of living for all of us. It will enable us to carry our defense burdens more easily and meet the fierce economic competition of the cold war. If this idle manpower can be put to work, the entire Nation will benefit.

By the same token, if we allow economic stagnation to go untended in the more than 100 urban areas and in the many unfortunate rural areas where it now exists, it will sap the strength of the whole economy. People who are out of work or who live in oppressive poverty cannot buy the automobiles, appliances, apparel, and the hundreds of other products of American industry and agriculture. Every unemployed worker and his family represents a lost market to the rest of the economy. It constitutes a drag on business activity which could eventually result in serious layoffs in other towns and cities seeking markets.

Moreover, such unemployment represents substantial costs through unemployment compensation and relief payments. Unfortunately no overall statistics are available, but I am confident that the fact is that depressed areas have cost hundreds of millions of dollars to the rest of the economy. In fact, in my own State it was testified that, in 1960 alone, outlays for unemployment compensation and public assistance benefits paid just in the 16 communities in the State of Pennsylvania totaled $131 million. If unemployment in these areas had been held to 3 percent of the labor force, there would have been a saving of nearly $90 million. And this is just for one State in a single year.

Mr. Chairman, we cannot afford to neglect the economic problems of these communities any longer. The cost to the rest of us runs far more than the dollar amount of this bill. More importantly, the people who live in these areas do not want charity—they want work. The provisions in this bill are very carefully calculated to create a net expansion in employment and production to provide work for these people. By raising their incomes it will also increase the markets for the output of other areas and help restore prosperity to the entire economy.

Mr. DERWINSKI. Mr. Chairman, I will briefly discuss the two major areas to which our studies should be directed in considering this so-called depressed areas bill.

First, the question of piracy. Both proponents and opponents of this bill have expressed fears concerning pirating of industry which could occur as use is made of the funds as authorized under this bill. Explanations have been offered that the strongest possible language is included to prevent this, yet obviously there are no safeguards within this bill to stop this feared situation.

In addition, may I point out that in most States and in many local communities throughout the country, industrial development has been effectively promoted, and this federally imposed program would have the effect of competing with activities of State and local governments in these same areas.

Furthermore, the vagueness which characterizes this bill, giving almost unlimited power to the administrative agencies, raises the obvious fear that complete disregard for local interests would result if this bill should be accepted.

I feel that the committee bill does not approach the real source of the problem. Merely aiding in the development of plant sites, buildings, and facilities does not guarantee the manufacturer a ready market for his products. Would we in future years be requested to stockpile production by firms in depressed areas if they are unable to operate with consistent volume of profit?

The formula and vague administrative practices set up in this proposal are such that all the funds allocated could be drawn into a few pockets of the country, leaving other areas whose hopes have been raised by the utopian nature of this program grievously disappointed. It is my frank opinion that this bill actually represents a completely false approach to areas of chronic unemployment, and the disappointment that would follow with the unworkable nature of this proposal would be greater than the economic ailments which States and local communities are themselves striving to overcome.

Despite all the statistics and vague promises we have heard, the plain fact is that the funds we are asked to appropriate will not solve the problem for which they are intended, will add further to the huge budget deficit the new administration seems determined to create. It will create new depressed areas by pirating industry from booming sections of the country and will result in developments which will be harmful to the employees, employers, and above all, the already overburdened taxpayer.

There is one other item that ought to be discussed, and that is the possible job protection that should be afforded employees whose firms are pirated from their present areas. If the committee is truly serious in its regard for the employee's rights, it will adopt provisions guaranteeing the seniority rights of employees affected by transfer of a portion of a firm's present manufacturing facility. To fail to provide this protection will cause personal suffering to employees now working in many areas of the country.

I realize that to a degree my words are falling on deaf ears since the administration is determined to jam this bill through the Congress. I point out, however, that in the coming decade, we face a serious task of gearing our industrial machine to employ a steadily expanding labor force. Complete disregard for human hardship is indefensible, and this bill will cause, in my opinion, a chaotic nationwide situation.

I wish to close by making one brief observation which I hope will not be attacked as a display of sectionalism. Illinois has communities which are tagged with the depressed area label which have helped themselves by effective local industrial development financing programs. The consensus of opinion in these Illinois areas is that the combination of State, regional and local programs is creating consistent economic gains, and with proper acknowledgment of problems, we are well on the way in Illinois to solving them. At the moment money is available for loans to prospective industries in the so-called depressed areas of Illinois, which points out the basic fact that this bill is not needed.

Mr. BARRETT. Mr. Chairman, I wholeheartedly support S. 1, the area redevelopment bill, because it is designed to meet the problems confronting all areas in the United States that are suffering from chronic unemployment. I am proud to be a member of the Banking and Currency Committee which considered this legislation. Basically, this bill represents the position of President Kennedy in this field. It is a much needed piece of legislation and one which is long overdue. Unfortunately, two similar bills which were passed in previous years by the Congress met with Presidential vetoes in the last administration. Now at last we will see this program put into action.

The area redevelopment bill will be of direct and immediate benefit to many communities throughout the country, including my own district in south Philadelphia. The Delaware Valley area has long been recognized as one of our greatest industrial areas. However, this does not mean that it does not have problems. Some industries have left the area or closed down. The result has been layoffs and unemployment.

Under the provisions of S. 1, south Philadelphia and the Delaware Valley can be rebuilt. Production and employment will be expanded and income raised.

This bill will directly benefit Philadelphians in a number of ways. It will provide for Government loans on very liberal terms. The interest rate on these loans currently would be 4¾ percent and they can be used to construct or improve industrial facilities that will put people back to work. In addition, liberal loans will be available to finance needed public works for the benefit of the entire community. The bill also provides Federal aid for our State vocational training system which will give workers an opportunity to obtain better and higher paying jobs. The bill would further provide subsistence payments to workers while they take this vocational training.

I am particularly pleased with one provision in the bill, which recognizes the hardships and the outright dollar cost imposed by cutbacks in existing defense facilities, such as the Philadelphia Naval Shipyard, the Philadelphia Quartermaster Center, the Marine Corps Quartermaster Depot, and others. If we are to do something to alleviate unemployment, we certainly cannot ignore the impact which defense cutbacks in existing activities are bound to have. Therefore, the bill requires a study and report to the Congress of this problem with a view to maintaining employment in existing Federal installations.

The dollar amounts involved in the area redevelopment bill are small indeed, but the benefits will be extremely important. Unemployment in our wealthy Nation is intolerable and I am pleased that the administration and the Congress recognizes the Federal responsibility to help our people.

Mrs. GRANAHAN. Mr. Chairman, we are a religious and moral people with generally high standards of conduct in our relationships with one another and yet, when it comes to economic issues, the American people seem to divide into two groups with one group seeming to hold to the opinion that helping one's neighbor is in some way un-American and undesirable.

If the neighbor's house were burning, to use President Roosevelt's World War II example, none of us would hesitate to use our garden hose—or any tool at hand—to help the neighbor in desperate need. And we would not say to him: "Convince me you have done everything you possibly could do to help yourself in this emergency before expecting me to give you any help."

However, in the case of our distressed areas—areas with which we in Pennsylvania are so grimly familiar and whose plight we fully recognize and understand—in the case of these distressed areas, some here today would apparently say that we dare not do anything really effective to help them until we are convinced beyond any possible doubt that they have done everything they can to help themselves.

Believe me, Mr. Chairman, this is the same as saying to the neighbor whose house is burning down: "Do not expect any help from me until I am sure you have tried everything you could do on your own, including calling all of your relatives to drive out here to help you." At what point do we finally intervene?

ENTIRE NATION'S ECONOMY AFFECTED

For the areas of substantial and persistent labor surplus—the chronically distressed and depressed areas—are in desperate difficulty. And we—all of us in this country—are involved in their distress, and suffering from it, too.

Philadelphia is currently among the areas of substantial labor surplus, along with most of the 149 other major production centers of the Nation, and along with 184 smaller labor market areas. But our depressed situation is not chronic, not persistent, as it has been for so long in 20 of the major areas now on the list and in 88 of the smaller areas on the list. We bounce back when business picks up, but the upswings have been taking longer and longer in recent years.

However, we fall into the surplus labor category periodically and stay in it longer these years, primarily because of the depressing effect upon us of employment conditions in other parts of Pennsylvania and other parts of the Nation—we are dragged down by the existence of recession and depression in other areas.

Eventually, if we do not cure this persistent problem, every part of this country which now feels that it is relatively prosperous is going to be suffering from the backwash of economic tides from the depressed areas. Even as it is, there is not a single major production center in this country which is at present experiencing any real prosperity—which does not have a labor surplus of at least moderate proportions.

PENNSYLVANIA'S GOVERNOR HAS SOUGHT EVERY POSSIBLE SOLUTION

To those Members of the House who feel it is none of their business how bad business may be in other parts of the country, or how much unemployment may persist in other parts of the country, I say, Mr. Chairman, the bell tolls for them, too—for their areas, too.

Pennsylvania has been alert to this problem and has, under Governor Lawrence and, before him, under Governor Leader, sought with all of its resources to meet our economic problems. Our Governor has not left a stone unturned. But these problems cannot be solved in Pennsylvania alone.

This spreading blight of labor surplus, of mass distress, of technological displacement and automation unemployment, of reduced output in the face of increasing population in the work force—this situation demands prompt correction and it requires national leadership and direction and funds and assistance.

We have gone through the last two Congresses arguing over this issue to no decision—because of vetoes and official disinterest in the executive department. We now have a President who deeply and urgently believes in the solution which would be possible under the bill now before us.

This measure deserves support because it can be effective. It deserves support because it is fair. It deserves support because it would demonstrate that in economic affairs, as in all other ways, this must be one Nation, one people, with common objectives for the benefit of all Americans.

This is not a jungle of 150 major production centers at war with one another. Our economy can prosper only when the 150 areas are all working, and working in harmony, and utilizing to the full the brains and energy and abilities of all of their people in the working force.

Mr. LINDSAY. Mr. Chairman, there is need for a depressed areas bill—one that will focus on areas of chronic need. In my judgment the Widnall substitute is a more effective approach than the committee bill, although I am pleased to note that the committee bill has been tightened in many respects over the legislation that was passed in the 86th Congress and vetoed by the President.

I have long maintained that the function of the Federal Government is to concentrate on areas of chronic need and not to attempt to spread Federal funds thinly over the United States to the detriment of areas in chronic need.

Second, I believe strongly in occupational training programs—programs un-

der which surplus labor is given skills and training in occupations where there is a demand.

The Widnall substitute makes the following improvements over the committee bill: First, instead of providing $100 million in loans for the construction of plants in truly depressed areas, it will provide $150 million, 50 percent more. This is a desirable addition for the hard-core industrial depressed areas. Second, the Widnall substitute will more than double the amount of funds provided for occupational training and retraining. Whereas, the committee bill provides $4,500,000 toward this end, the Widnall substitute provides $10 million.

The Widnall bill makes up most of the cost of the above by reducing the proposed grants in the committee bill to rural areas from $100 million to one-half million dollars, the latter amount to be used to study and develop a workable program for rural areas. The Widnall bill has tighter criteria for the designation of industrial redevelopment areas. Under the committee bill it is possible that a whole State could be a redevelopment area.

There are other differences between the two bills, Mr. Chairman, but the ones I have mentioned are the most important differences. For these reasons, therefore, I support the Widnall substitute, and I intend to vote for it, if necessary on a motion to recommit the committee bill with instructions to the committee to bring back the Widnall substitute.

In the event the Widnall substitute fails of passage, I intend to vote for the committee bill. As I have mentioned, it is a tighter bill than the legislation passed in the 86th Congress, which I voted against. In addition, we cannot overlook the fact that conditions of unemployment are more serious now than they were at the time the 86th Congress considered other depressed areas legislation. A Federal undertaking is necessary and although I prefer the Widnall substitute, I shall not hesitate to vote for the committee bill in the last analysis if I am faced with no other choice.

Mrs. HANSEN. Mr. Chairman, I would like to associate myself with Chairman PATMAN, of Texas, Congressman JAMES ROOSEVELT, of California, and others who have spoken on behalf of the distressed areas bill because my own district is so deeply affected by this legislation. Its passage is of great importance to western Washington.

Mr. PIRNIE. Mr. Chairman, I am glad to rise in support of the amendment proposed by my distinguished colleague, the gentleman from New York [Mr. STRATTON]. He and I have worked closely together in this matter and I want to commend him for his diligence and cooperation in pursuing this problem.

The enactment of this amendment will insure that the economic aspects of defense planning will not be overlooked. The President himself has taken notice of this factor only yesterday in his special defense budget message to the Congress. Without restricting the authority of the Secretary of Defense to make military decisions which he deems in the best interests of the United States, he will have the benefit of a careful study of the overall cost of any proposed elimination of permanent military installations or major parts thereof. This amendment seeks to create confidence in our Government, not shackle it.

Mr. Chairman, we owe this much consideration to those many communities having substantial unemployment, who face untold hardships by the removal of military functions. Millions of dollars have been invested by local taxpayers and private enterprise in providing needed facilities and services. The cities of Rome and Utica in my own area, with an unemployment index exceeding 10 percent, have been faced with the loss of over 6,200 civilian jobs, comprising the Rome Air Materiel Area. Many other congressional districts are now or will be confronted with similar problems.

Therefore, I urge approval of this amendment that will afford these communities ample opportunity to bring their economic situations to the attention of our highest defense planners.

Mr. DONOHUE. Mr. Chairman, in fulfillment of our common duty to promote the national interest, and in very particular concern for the distressed workers and industries of my congressional area, I rise to most earnestly advocate the prompt passage of S. 1, without crippling amendments or extended delay.

At this minute there are some 103 areas of chronic unemployment and economic depression in this country and unfortunately my own home city, together with several other communities in our Commonwealth, are numbered among them. The major number of more than 5½ million unemployed workers live in these areas around the country and over the past 10 years the problem has very obviously developed into one of national concern.

The fundamental question before us then, in connection with this legislative proposal, is whether we shall leave these distressed regions and their people to their further deterioration or shall the resources of the Federal Government be reasonably exercised to assist them?

I firmly believe our obligation to help them to help themselves is quite clear and we can answer the question and discharge our obligation by approving this measure now.

It is extremely difficult to understand those who apparently wish to extend and delay our action on this bill. The concept of this legislation and its overall provisions have twice been exhaustively discussed and debated in this House during the past 3 years. As a matter of fact, a bill of this type was passed in this House in 1958 and again in 1960. The majority of the Members here are thoroughly familiar with all aspects and the background of this current proposal.

It is not designed to, nor is it pretended that it will, cure all of the evils of unemployment and economic depression. It is simply and substantially an attempt to create new job opportunities in areas of high and chronic unemployment and, by such means, to stimulate production and restore purchasing power for the benefit of the national economy.

These jobs would be created through providing assistance for the development of new industrial facilities by constructing water and power projects, where possible, and by encouraging communities to initiate varied public works projects, such as sewage disposal and water pollution control which are so generally needed.

Of special interest to my area, where the textile manufacturing industry, the shoe industry and so many others are fast disappearing, is the provision of this bill to train these unemployed, but loyal and intelligent Americans, in new skills.

For those who may have sincere fears about Federal Government intrusion and control, let us realize the Government is but one factor in these proposed activities. The program embodied in this measure very wisely and practically requires the participation of private industry and of local and State governments. It is not a substitute for local action; it is intended only to inspire dormant local action into effective operation and to stimulate its creative activity.

On the human side, it is in accord with our established democratic traditions of government functioning to try to save people, to save families and to save communities who desperately need such saving assistance through no fault of their own. It is in the fullest accord with the spirit and the principle expressed by our great President, John F. Kennedy, when he stated in his inaugural address last January 20, in front of this building, and I quote:

> If a free society cannot help the many who are poor, it cannot save the few who are rich.

Mr. Chairman, the approach, outlined in this measure, to grant assistance to unemployed Americans and economically distressed areas in this country is basically the same as that contained in our foreign aid program, of long duration. On this score, it is puzzling for some of us to observe that those who appear to express the greatest fears about the worth and the wisdom of this bill are among the very ones who speak the loudest in favor of the continuation, and even the expansion, of the spending of the American taxpayers' money for foreign redevelopment. We do not question their sincerity, but to promote their consistency we must simply tell them that all we are trying to do today is to apply the same principles, in substance, within our foreign aid program to helping our own American people here at home. We say to them that we deeply believe it is time that we treated our people at home with the same concern we have demonstrated for the welfare and development of foreign countries and foreign peoples.

With the guidance of divine providence behind a determined Congress and a united people, let us, by passing this bill, show the doubtful Communist leaders that our vaunted boast of having the highest living standards and more equality of opportunity than anywhere else in the world is not an American capitalistic myth.

Mr. WALTER. Mr. Chairman, as in previous years, I rise today, to reiterate

the need of the House of Representatives to pass a workable area redevelopment bill; one that will give immediate substantial support to those residents in chronically depressed communities.

I have stressed this fact several times in the last year. Twice, Congress passed a depressed areas bill, only to have it vetoed by the previous administration.

Both national parties this past summer endorsed Federal aid for chronically depressed communities. Since those two conventions, the number of distressed communities has increased—many of them in my own State of Pennsylvania, and some of them in my own congressional district.

Today, the House of Representatives as a whole debates S. 1, a bill that I feel confident will establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment. It is substantially the identical bill that our distinguished colleague, the Honorable BRENT SPENCE introduced as chairman of the Committee on Banking and Currency.

I have never been more confident that this bill will provide new employment opportunities in distressed areas, such as we have in the once-thriving coal mining communities of Pennsylvania, West Virginia, and Kentucky.

Our entire economy will be improved as soon as the Federal Government gets substantial help into these communities. Everybody is going to benefit, not only those in the distressed areas but in every community is this great Republic.

This financial aid will supplement the efforts of States and communities, who already have been doing a tremendous job trying to alleviate chronic unemployment conditions.

These States and communities are not looking for handouts. Individually, these communities have invested large sums, including funds raised by popular subscription through community development organizations, for industrial site preparation, plant construction and other services in an effort to attract industry.

Many of these community development organizations can no longer provide help because their local financial resources have been exhausted.

These communities need help. The people in my district will be forever grateful if the House of Representatives will take prompt action today and pass this important piece of legislation—legislation that will start the machinery to get the great number of unemployed off the relief rolls and back to work as soon as possible.

Mr. MOELLER. Mr. Chairman, I join with my colleagues in support of S. 1, the administration bill passed by the Senate on March 16, as an effective Federal program of assistance to the economically depressed areas of our Nation. The national average unemployment has reached an unprecedented rate of 7.7 percent, higher than at any time since the depression of the 1930's.

This is a situation affecting every American. For instance, in my own district, the 10th of Ohio, seven of the eight counties are listed by the Department of Labor as areas of substantial and persistent unemployment. This means that these counties currently have a rate of unemployment in excess of 6 percent, and have had such a rate for the last 3 years. These seven counties and the latest unemployment statistics released by the Labor Department are as follows:

Hocking County, 10.2 percent; Athens County, 10.2 percent; Vinton County, 10.2 percent; Gallia County, 15.2 percent; Meigs County, 15.2 percent; Jackson County, 9 percent; and Lawrence County, 16 percent.

As is readily apparent, my district has a real need for Federal area redevelopment legislation. This is why I introduced an area redevelopment bill in this House last January, and it is why I have continued to support the administration's effort to secure enactment of a constructive program.

My district is predominantly rural in character and we stand to benefit greatly from the special provisions in the administration bill to assist economically depressed rural areas. I sincerely hope that the Widnall amendment to eliminate virtually all assistance to rural areas and to cut the overall redevelopment program by more than 30 percent is soundly defeated.

In sharp contrast to the Eisenhower area redevelopment veto of last year, Mr. Kennedy has recognized the critical need for effective legislation at this time and has drafted what I consider to be a well-balanced program to stimulate sustained economic growth, so that the people in these distressed areas may share in our Nation's expansion. I urge the House to pass S. 1 and provide these areas with the help they need to help themselves.

Mr. ROBISON. Mr. Chairman, I am keenly aware of the economic distress that currently exists across the Nation and in certain areas of the 37th Congressional District of New York. Humanitarian motives prompt us to do something, and while I do think the Federal Government has a positive duty to help, I cannot convince myself that the House version of S. 1 is the proper medicine.

It would not meet the test of "constructive" Federal-local action because it tries to do too much in too many areas and with far too little money—some of the bill's proponents have accurately referred to the presently authorized amounts as representing only "seed corn"—and it seeks to duplicate, in large measure, already available Federal programs, perhaps near to 50 in number, that now channel millions of dollars of Federal aid of one kind or another to areas of chronic unemployment or those areas that have been hard hit by the current recession. These other existing programs could be retailored and expanded as needed, it would seem, as a better and more logical alternative to having Congress now create what may be an administrative monstrosity that cannot help but become a source of false hope and eventual bitter disillusionment to the people of the truly depressed areas.

As for the industrial provision of S. 1 and their impact on the economic climate of our State of New York, our problem is not one of the lack of industrial capacity, nor is there really such a lack with respect to the country as a whole. We have sufficient factories and machines—obsolete though some of them may be. What we need are jobs to put our people back to work in those factories and at those machines. Such jobs have been lost for a variety of reasons—archaic depreciation laws that stifle the incentive to modernize, the difficulty of accumulating "risk" capital, and so forth, and, last but not least of course, foreign competition. S. 1 would do nothing in any of these areas unless it be to encourage the existing trend toward substituting area-redevelopment activities for the legitimate and historical methods of protecting domestic industry from import injury.

Moreover, S. 1 would serve to stimulate a wave of industrial relocation, in which the already highly industrial States like New York could only expect to experience a net loss of industry. I think the antipirating language of the House version of S. 1 is much better than that of any prior such measures, but it still leaves a great deal to be desired if we are, in fact, seeking truly to create new job opportunities and economic growth, and to discourage the raiding of already developed areas.

Incidentally, New York has just greatly expanded its own self-help program to improve our own economic climate by establishing a $100 million Job Development Authority loan fund to be used to attract new industry. In combination with the activities of our local development corporations this progressive step could be of great import, but the good that it could do will be severely curtailed by the increasing State-versus-State competition which will result from Federal subsidies, paid for, in large part, by the taxpayers of the industrial States.

Thus, under S. 1, the people that I represent will be called upon to subsidize, through taxes, the departure of some part of their own industrial base leaving them with new and difficult problems of unemployment to solve locally.

The problem of the truly depressed area has many ramifications. There is no single answer. There is no easy solution. One of the basic facets of that problem, as I see it, is to help the unemployed citizens of those areas to acquire the skills needed for gainful employment, including such other assistance as may be appropriate to enable them to relocate to other areas of prime economic activity. The vocational training and retraining features of S. 1 are good, as far as they go, but are only of secondary importance in the bill as written. I would be prepared to support a greatly expanded Federal-State program of this sort since I believe it offers the only really broad solution for providing both an immediate and a long-range cure for the unemployment problem in our depressed areas.

Mr. KILBURN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. MEADER].

Mr. MEADER. Mr. Chairman, unless this bill involves a completely new concept and a new Federal activity such as injecting government into business and

into the risk end of business, there is no need for this legislation.

There are existing Federal instrumentalities and programs to provide financial assistance to chronically depressed areas already in existence in every one of the fields covered by this legislation. We have the Small Business Administration with authorized business lending authority of $575 million, of which nearly $100 million is uncommitted, the same sum as provded in section 6 of S. 1.

We also have the Small Business Investment Act designed to encourage and support economic undertakings in the small business category.

The Small Business Administration has a total personnel of 2,350, of whom 563 are located in the central office in Washington and 1,787 are distributed among the 56 regional and branch offices throughout the country. It is wasteful, extravagant, and confusing to set up a parallel organization in the Department of Commerce to perform functions which already can be performed by an existing agency.

The Community Facilities Administration in the Housing and Home Finance Agency has a lending authority of $150 million, of which $100 million has been available to them since 1955 and $50 million was added at the end of the last session of Congress. There is adequate authority in this Agency to provide funds for the community facilities purposes set forth in sections 7 and 8 of S. 1. Of the $150 million as of March 15, 1961, $35 million was uncommitted.

So far as retraining of unemployed individuals is concerned, we already have a vocational education program through which any necessary retraining can be handled both in the chronically depressed areas and elsewhere.

Therefore, Mr. Chairman, I say if the only purpose of this bill is to provide loans for business enterprises and community facilities on a prudent basis and grants for retraining, there is no need to create a new bureaucracy.

Even if we conceded that criteria and standards of performance were too rigid and we desired to loosen them up and make them less business-like, it would be possible by simple amendments to existing programs related specifically to chronically depressed areas to liberalize authority with respect to such areas in existing agencies.

Even though uncommitted funds presently exist which would seem to indicate that the demand has not exhausted amounts Congress has provided, it would be a simple matter to grant additional authority and appropriate additional funds to existing agencies to meet the needs of chronically depressed areas.

Mr. Chairman, the amounts provided in this bill will not provide many jobs. There is a great deal of uncertainty about the amount of invested capital required to make one job. I suggest that the $100 million provided for industrial loans, if it were all used for business undertakings in the two chronically depressed areas in my congressional district—Monroe and Adrian, Mich.—would not provide sufficient employment to absorb the 4,000 unemployment compensation claimants in Adrian and Monroe, Mich.

Mr. Chairman, I believe some idea of the effect of capital investment on adding new jobs can be gained from the 1960 annual report of the Ford Motor Co. which shows that an increase of $53 million in capital expenditures for expansion, modernization, and replacement of facilities—excluding special tools—for 1960 over 1959, was accompanied by an increase in average employment between those 2 years of only 640 positions. I made a computation that this meant an investment of approximately $83,000 per worker.

Mr. Chairman, it is obvious that this legislation is nothing but a label unless it is a foot in the door to put the Government into the equity end of business enterprises in this country. It is bad legislation and ought to be rejected.

Mr. KILBURN. Mr. Chairman, I yield the balance of our time to the gentleman from New Jersey [Mr. WIDNALL].

Mr. WIDNALL. Mr. Chairman, I have long been concerned with the plight of the people of West Virginia and the people in eastern Pennsylvania and other truly and chronically depressed areas. I have been ready and willing to support depressed area legislation that would address itself to helping those critically affected areas. I know what it is to have unemployment in a district. I know what it is to have the impact of foreign imports, as the gentleman from West Virginia [Mr. BAILEY] so ably stated in his remarks about the foreign import impact on the people of West Virginia. We have 500 zinc miners out of work in my district because of the importation of foreign zinc, and they have been out of work for several years, and there is no prospect of putting them back to work unless something is done about the imports of low-cost zinc. But, this bill is not going to cure that. This bill is not going to help the unemployed miners in my district, because they could not qualify under my substitute bill and they could not qualify under the committee bill.

Mr. Chairman, some of the provisions in this bill are fantastic. I am now talking about the rural section of the committee bill. We say in our minority report at page 23, which I call your attention to:

> This provision of the bill is fantastic. Under it, in effect, you could have a Federal grant school bill, a Federal grant highway bill, a Federal grant hospital bill, a Federal grant airport bill, a Federal grant park bill, and a host of other Federal grant bills as long as the grants related to needed public facilities within a redevelopment area.

It would really be a foot in the door to establish the principal of the omnibus Federal grant bill.

And under the broad authority granted by the first sentence of section 5(a) there can be no question but that a whole State could be declared a depressed area or redevelopment area as it is termed in the bill.

If such a thing were done, just imagine how these funds would be dissipated so that no truly critically depressed area would receive any real benefit.

If I were from West Virginia or Pennsylvania I believe certainly there would be far more help to my district in the substitute bill proposed by me in the critical area of the retraining of workers. We propose to spend $10 million instead of $4.5 million as in the committee bill. It seems to me that that is one area where an unemployed person could find something that he himself would get out of the bill.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I believe the gentleman when he tells the House that he is seriously concerned about the problems of industrial areas like West Virginia and Pennsylvania. But I find it difficult to understand why the gentleman can close his mind to the problems present in the rural or country areas of the Nation. The testimony before the committee with regard to conditions in some of those counties was equally grave, equally serious, and certainly presented just as critical a problem in terms of the populations in those areas and the need for a redevelopment program in those areas. If the gentleman recognizes the need for aggressive redevelopment programs in the industrial areas, and I believe he does, will he tell us why should not this House recognize the needs in rural sections of the country and attempt to do something constructive about those problems?

Mr. WIDNALL. Because I believe that if there are such critically affected areas in the rural sections, there is $500,000 for a study, in this bill, with a report to be brought back by January 3, 1962, including projects and programs and areas to be assisted. There is nothing in this bill that pins down any area. There was not one word of testimony, by the way, by Secretary Goldberg, Secretary Freeman, and Secretary Hodges, as to how the money would be used and in what areas it would be used. To me right now it looks like a big $100 million bribe and boondoggle for the rural sections, because nobody knows where it is going to be used.

Mr. EDMONDSON. Mr. Chairman, the gentleman started his remarks by saying "if" there were such counties. Can the gentleman, after reviewing the record made by this committee, which shows some counties with per capita incomes of less than $750 a year, seriously stand there and say "if" there are counties where you do have a depressed condition? I am amazed that the gentleman would put an "if" before that statement because I think this committee, if it established nothing else, established very clearly the acute need for some kind of action by the Government in the rural sections of the country.

I want to commend the committee for including in this measure provisions which would also make it possible to do something about the depressed condition in the rural areas.

Mr. WIDNALL. Mr. Chairman, I call your attention to the definition in section 5(b) of the committee bill and I

would like to have explained to me what this means and who will be affected by it.

The Secretary shall also designate as "redevelopment areas" those areas (including Indian reservations) within the United States which do not meet the requirements set forth in subsection (a) but which he determines are among the highest in numbers and percentages of low-income families, and in which there exists a condition of substantial and persistent unemployment or underemployment. In making the designations under this subsection, the Secretary shall consider, among other relevant factors, the number of low-income farm families in the various rural areas of the United States, the proportion that such low-income families are of the total farm families of each of such areas, the relationship of the income levels of the families in each such area to the general levels of income in the United States."

There has never been any explanation as to where the money would be used and what areas would be helped.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. WIDNALL] has expired.

Mr. PATMAN. Mr. Chairman, I yield such time as I may consume, to conclude the debate.

Mr. Chairman, the gentleman from New Jersey [Mr. WIDNALL] I know is very sincere in his advocacy of his substitute bill. I assume it will be offered soon after we start reading the bill which will be not very long from now.

I do not believe that the substitute bill is sufficient at all to do the job that we contemplate will be done under the provisions of the committee bill.

No. 1, the Widnall amendment discriminates against rural areas. That means that in a State where you have industrial areas that are depressed and you have rural areas that are just as much depressed, the Administrator will not be privileged to authorize credit assistance for a plant in the rural area that is just as much depressed because under the Widnall amendment it is excluded. He will be limited to the depressed city areas in that State. Suppose there is a country area depressed nearby the city, and they come to the Administrator and make a good case. The Administrator would have to say, "I am sorry, but Congress said we can help only the cities. We cannot help the country at all."

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from California.

Mr. HIESTAND. I am very much interested in the gentleman's remarks. I wonder what if anything the Secretary or the Administrator can do for these distressed rural areas.

Mr. PATMAN. They can have plants of any type or character desired in that community that would be suitable and feasible. There are lots of plants that could be established in these rural areas. I would not get into a discussion of a particular type or commodity or name a product that could be produced. I would not get into that at all. But I know there could be plants established that would be helpful to the rural areas by giving them employment where they are underemployed or unemployed.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. I think the gentleman might mention to my good friend from California the possibility of frozen food processing plants, canneries, or feed mills, or various types of enterprises that would help these rural areas to make use of their manpower that is surplus at this time, to give them some supplementary income to enable them to continue to make a living on the farm. I think the gentleman would agree with me that it is a worthy and desirable thing to have prosperity in the rural areas as well as in the urban sections of our country.

Mr. HIESTAND. I am wondering where the personnel to run these plants must come from. It would have to come from outside. How then will they help the unemployment situation in the rural areas?

Mr. PATMAN. Just a few experts would come from the outside. They have workers available locally. They would need expert guidance. Only a few hundred would be needed.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from New Jersey.

Mr. WIDNALL. Given the criteria under section 5(a), these towns you have at the present time——

Mr. PATMAN. Which bill is the gentleman talking about?

Mr. WIDNALL. The gentleman's bill.

Mr. PATMAN. I thought the gentleman was going to answer me when I said that his amendment discriminates against the country areas.

Mr. WIDNALL. There is Batavia, Ohio, 1,729; Georgetown, Ohio, 2,674; and West Union, Ohio, 1,762. Are not those rural areas?

Mr. PATMAN. Those cities can be helped. The gentleman should not ask us to discriminate against rural areas. When you vote for the Widnall amendment you are voting to help only the cities. You are saying that by your vote for the Widnall amendment, that you do not want the country areas to be helped regardless of how worthy they are for help and regardless of the number of feasible projects that can be established in rural areas that would remove their unemployment problem and their underemployment problem. The Administrator could not do anything because he would say, "My hands are tied. Congress tied my hands. We have a city Congress. They want to help only the cities, they do not want to help the country." The Widnall amendment is to help the cities. Therefore, when you vote for the Widnall amendment you are voting against the country areas.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Iowa.

Mr. GROSS. I wonder where it is proposed to get those technical advisers? Will they be obtained from the United Nations or the ICA where they have had a lot of experience developing the undeveloped.

Mr. PATMAN. No; we will not have to give them that. We are furnishing them technical advisers.

Mr. GROSS. I say again, they have had a lot of experience.

Mr. PATMAN. I have had some experience so far as technical advisers are concerned. We established a steel mill in the district I have the privilege and honor to represent, and we only brought a handful of people from Pittsburgh and Birmingham and steel areas like that, and they trained just a few fellows—4,500 good steelworkers. You can do the same thing with any of these other projects.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from California.

Mr. HIESTAND. Just how many rural areas that the gentleman referred to have we in that category? How many would be affected under the present definition?

Mr. PATMAN. I am glad the gentleman mentioned that. You see the rural areas do not have the statistical information that the Labor Department has. The farmers do not have that type of service. But we know, and we have information in the hearings as to the number of counties and as to the number of people who have left the counties and of the distress in those counties. We have an abundance of information, but we do not have it in detail for a town or a city or a county like the Labor Department has for industrial areas. Therefore, the rural areas are under a disadvantage on that. But do not discriminate against them because they are weak on statistics. The actual facts speak for themselves.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. The gentleman recalls that when this was before the last Congress we had criteria which qualified approximately 660 counties across the country for participation in the rural development program. Now the criteria which are set up under this bill include the criteria which prevailed in the legislation which was last before this Congress, which this House voted and passed over to the other body in the last Congress.

Mr. HIESTAND. Will the gentleman assure us that the amount designated is sufficient to cover that?

Mr. EDMONDSON. For my own part, I would say to the gentleman, I have a question in my mind as to the sufficiency of the funds to meet the needs of this program both on the urban and the rural end. I am not prepared to say because I do not believe there is enough money in it that we are not even going to take a step forward toward meeting this problem. I am one who says—let us take a step forward and let us make some progress in this direction within the limits of our ability at this time both on the rural front and on the urban front.

Mr. PATMAN. I agree with what the gentleman from Oklahoma has just said. I know that this is not enough money. It is only about 10 percent of what we give to foreign countries for the same purpose. Are we going to deny to our own people 10 percent of what we are giving annually to foreign countries to do the same thing? That is worthy of consideration, too. But even if it is not enough money, we should not vote against the whole program and we should not discriminate against the rural areas.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield further?

Mr. PATMAN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. The chairman of our committee represents a State which has both urban areas and rural areas which qualify under this bill, and that clearly qualified under the bill last passed by the House. So does the gentleman from Oklahoma have in his district, counties which qualify both from an urban and from a rural standpoint. But, there are some States represented on this floor that do not have any counties that would qualify as urban areas for redevelopment at this time. The only way those States can participate in any way in this program is to have the rural sections of this program go through. If we adopt the Widnall amendment, we knock out any participation by those States in this program. I think, checking back on the criteria in the bill passed by the last Congress, the State of New Jersey has several areas which qualify as urban areas but in the bill passed in the last Congress, it had no rural sections. I do not think the gentleman from New Jersey would want to see a bill passed which benefited his State and excluded other States from participating in the benefits of a good program of this kind. He has indicated he favors the spirit and the principle behind this legislation. I wish he would join with us in seeing every State in the Union that has depressed areas, whether they are rural or urban in nature, participate and go forward under this program.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield.

Mr. WIDNALL. I would like to call the gentleman's attention to this fact that under industrial sections, the only areas that would qualify in our State at the present time are Atlantic City, a resort area, Long Branch, a resort area, and Bridgeton, with its vegetable production, and its migrant labor. This bill does not help my State at all.

Mr. PATMAN. Let me plead with the gentleman to not discriminate against his rural areas in New Jersey. I believe when he thinks this over a little more he will not want to discriminate against his country people and in favor of the city folks and place the Members who are from States that have depressed rural areas but no depressed city areas, in the untenable position of voting for a bill that helps only the cities.

That places us in a very untenable position.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from New York.

Mr. MULTER. I think the answer to the question raised by the gentleman from New Jersey lies in the testimony of the Secretary of Agriculture when he appeared before the committee. There are no rural areas in my district or my city, but I am for this bill and I am for the provisions that would help the rural areas on the basis of the testimony of the Secretary of Agriculture who says in part, and I quote from the hearings:

> If I might summarize, I think we ought to go forward something like this: First of all, we ought to complete the job of summarization, of factfinding, of research and survey. I would expect that the Secretary of Commerce, when this bill becomes law, would ask the Secretary of Agriculture where rural areas are concerned to conduct the surveys, to complete those underway and to certify to him the areas that call for rural redevelopment programs.
>
> When those areas are determined, we would then develop a program for those areas and have it down specifically and in some detail. In both identifying the areas and developing the program, the resources of the area are the key and the guide and they, I think, will lead to what should be done.

I think we should take the suggestion of the Secretary of Agriculture in regard to the need of these rural areas.

Mr. THOMPSON of New Jersey. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from New Jersey.

Mr. THOMPSON of New Jersey. I agree with the gentleman from New York. The fact of the matter is that this bill would bring aid to more than 9 percent of our total work population in New Jersey, of which at the present time 225,000 are unemployed.

We also have depressed rural areas, particularly in the poultry area where they have undergone almost intolerable suffering in recent years.

I think it would be entirely unfair if these rural areas were not in the bill. I think all of us would benefit from having them in, although some of our districts are entirely urban in district complexion.

Mr. PATMAN. I hope that the gentleman from New Jersey in presenting his amendment will change it so as not to discriminate against the country or the rural areas. They are entitled to relief the same as are the city folks.

Mr. LOSER. Mr. Chairman, will the gentleman yield?

Mr. PATMAN. I yield to the gentleman from Tennessee.

Mr. LOSER. A number of times during the debate on this bill reference has been made to the number of counties, several hundred, that would qualify under the provisions set forth in this measure for aid. I am wondering whether or not the word "qualify" is not being used rather loosely. As a matter of fact, I think the gentleman from Oklahoma [Mr. EDMONDSON] has said that in the State of Tennessee there are 70 counties that would qualify under the provisions of this legislation. My question is: Does not the gentleman mean, or is it not the purpose of the measure, that the Secretary of Commerce shall designate certain counties in the State as rural areas as contrasted with urban areas?

Mr. PATMAN. That is my interpretation, I will say to the gentleman.

Mr. LOSER. And that no county, even though designated as a rural redevelopment area, can obtain any benefits under the provisions of this bill unless they meet the criteria set forth in section 5?

Mr. PATMAN. The gentleman has brought out a good point. Ten times as many will qualify as will receive it, for the obvious reason that the money is insufficient. That is reason No. 1. The administration will be required to pick out the most deserving and the most needy and service them. Just because they are qualified does not mean they will get assistance because the money is not sufficient.

Mr. LOSER. Mr. Chairman, I do not believe the gentleman from Texas has answered my question.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield to me to answer the question?

Mr. PATMAN. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. The only remark I have made with regard to Tennessee was that under the bill which passed the Congress in the last session 70 counties in Tennessee were identified as qualified to participate in the rural section of that bill. I believe the criteria which are in the present bill include the criteria which were present in the last Congress, plus some additional criteria.

Mr. PATMAN. I will have to ask the gentleman to bear with me. My time has almost expired, and I must mention another point. That is about the interest rate.

Under the Widnall amendment the interest rate on public facility loans would be 4⅜ percent in most cases. Under the bill we have the interest rate will be 3¼, which is the average rate for all U.S. Government securities, plus one-fourth of 1 percent. Is that not enough?

Mr. LOSER. I do not think the gentleman has answered the question.

Mr. PATMAN. I cannot do both at the same time, and I prefer to do it this way. Three and a half percent is certainly a high enough rate for tax-exempt securities. Remember that Federal Government obligations are taxable, but State and local municipal bonds are not taxable. Therefore, this 3½ percent rate is high instead of low.

Under the Widnall amendment the interest rate would be the equivalent of 8.5 percent or more for an investor in the 50 percent tax bracket. So, considering the fact these are tax-exempt securities, 3.5 percent interest rate is a high interest rate. We should not think about raising it. Certainly the Widnall amendment should be voted down.

The CHAIRMAN. All time has expired.

Mr. KILBURN. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. The Chair will count.

One hundred and twenty-two Members are present, a quorum.

Pursuant to the rule, the Clerk will now read the substitute committee amendment as an original bill for the purpose of amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Area Redevelopment Act".

Mr. WIDNALL. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. WIDNALL: Strike out all after the enacting clause and insert in lieu thereof the following: "That this Act may be cited as the 'Area Redevelopment Act'."

"DECLARATION OF PURPOSE

"SEC. 2. The Congress declares that the maintenance of the national economy at a high level is vital to the best interests of the United States, but that some of our communities are suffering substantial and persistent unemployment and underemployment; that such unemployment and underemployment cause hardship to many individuals and their families and detract from the national welfare by wasting vital human resources; that to overcome this problem the Federal Government, in cooperation with the States, should help areas of substantial and persistent unemployment and underemployment to take effective steps in planning and financing their economic redevelopment; that Federal assistance to communities, industries, enterprises, and individuals in areas needing redevelopment should enable such areas to achieve lasting improvement and enhance the domestic prosperity by the establishment of stable and diversified local economies and improved local living conditions; and that under the provisions of this Act new employment opportunities should be created by developing and expanding new and existing facilities and resources.

"AREA REDEVELOPMENT ADMINISTRATOR

"SEC. 3. There shall be appointed by the President, by and with the advice and consent of the Senate, an Area Redevelopment Administrator in the Department of Commerce who shall receive compensation at a rate equal to that received by Assistant Secretaries of Commerce. The Administrator shall perform such duties in the execution of this Act as the Secretary of Commerce (hereinafter referred to as the 'Secretary') may assign.

"ADVISORY POLICY BOARD

"SEC. 4. (a) To advise the Secretary in the performance of functions authorized by this Act, there is created an Area Redevelopment Advisory Policy Board (hereinafter referred to as the 'Board'), which shall consist of the following members, all ex officio: the Secretary as Chairman; the Secretaries of Agriculture; Health, Eudcation, and Welfare; Interior; Labor; and Treasury; and the Administrators of the Housing and Home Finance Agency and the Small Business Administration. The Chairman may from time to time invite the participation of officials of other agencies of the executive branch interested in the functions herein authorized. Each member of the Board may designate an officer of his agency to act for him as a member of the Board with respect to any matter there considered.

"(b) The Secretary shall appoint a National Public Advisory Committee on Area Redevelopment which shall consist of twenty-five members and shall be composed of representatives of labor, management, agriculture, State and local governments, and the public in general. From the members appointed to such Committee the Secretary shall designate a Chairman. Such Committee, or any duly established subcommittee thereof, shall from time to time make recommendations to the Secretary relative to the carrying out of his duties under this Act. Such Committee shall hold not less than two meetings during each calendar year.

"(c) The Secretary is authorized from time to time to call together and confer with any persons, including representatives of labor, management, agriculture, and government, who can assist in meeting the problems of unemployment or underemployment in the several areas designated by the Secretary as redevelopment areas.

"REDEVELOPMENT AREAS

"SEC. 5. (a) The Secretary shall designate as a 'redevelopment area' any labor market area within the United States with respect to which the chief executive of the State in which such area is located has requested such designation and the Secretary of Labor has found and certified to the Secretary—

"(1) that the rate of unemployment in such area, excluding unemployment due primarily to temporary or seasonal factors, is currently 6 per centum or more and has averaged at least 6 per centum for the qualifying time periods specified in paragraph (2); and

"(2) that the annual average rate of unemployment in such area has been at least—

"(A) 50 per centum above the national average for three of the preceding four calendar years, or

"(B) 75 per centum above the national average for two of the preceding three calendar years, or

"(C) 100 per centum above the national average for one of the preceding two calendar years.

"(b) The Secretary of Agricultural shall conduct such studies as he may deem necessary to enable him to develop and submit to the Congress, not later than January 3, 1962, a proposed workable program to provide for the participation of rural areas, rural nonfarm areas, and Indian reservations, in which there has existed substantial and persistent unemployment or underemployment for an extended period of time, in the program of financial assistance under this Act. Upon the request of the Secretary of Agriculture, the Secretary of the Interior shall conduct such special studies and compile and furnish to the Secretary of Agriculture such information as the Secretary of Agriculture may deem necessary to enable him to carry out his duties under this subsection. The Secretary of Agriculture shall reimburse the Secretary of the Interior, out of funds appropriated under this subsection, for expenses incurred by the the Secretary of the Interior under this subsection. There are authorized to be appropriated such sums, not to exceed $500,000, as may be necessary to carry out the provisions of this subsection.

"(c) The Secretary shall reimburse when appropriate, out of any funds available to the Secretary under this Act, the heads of other departments or agencies for expenses incurred by them under this section in conducting studies or furnishing information requested by the Secretary.

"(d) As used in this Act, the term 'redevelopment area' refers to any area within the United States which has been designated by the Secretary as a redevelopment area.

"LOANS AND PARTICIPATIONS

"SEC. 6. (a) The Secretary is authorized to purchase evidences of indebtedness and to make loans (which for purposes of this section shall include participations in loans) to aid in financing any project within a redevelopment area for the purchase or development of land and facilities (including, in exceptional cases, machinery and equipment) for industrial or commercial usage, including the construction of new buildings, the rehabilitation of abandoned or unoccupied buildings, and the alteration, conversion, or enlargement of existing buildings. Such financial assistance shall not be extended for working capital, or to assist establishments relocating, totally or partially, from one area to another.

"(b) Financial assistance under this section shall be on such terms and conditions as the Secretary determines, subject, however, to the following restrictions and limitations:

"(1) The total amount of loans (including purchased evidences of indebtedness) outstanding at any one time under this section with respect to projects in redevelopment areas shall not exceed $150,000,000.

"(2) Such assistance shall be extended only to applicants, both private and public, approved for such assistance by the State (or any agency or instrumentality thereof concerned with problems of economic development) in which the project to be financed is or will be located.

"(3) The project for which financial assistance is sought must be reasonably calculated to provide more than a temporary alleviation of unemployment or underemployment within the redevelopment area wherein it is or will be located.

"(4) No such assistance shall be extended hereunder unless the financial assistance applied for is not otherwise available from private lenders or other Federal agencies on reasonable terms.

"(5) The Secretary shall not make any loan without a participation unless he determines that the loan cannot be made on a participation basis.

"(6) No evidences of indebtedness shall be purchased and no loans shall be made unless it is determined that there is a reasonable assurance of repayment.

"(7) Subject to section 11(5) of this Act, no loan, including renewals or extension thereof, may be made hereunder for a period exceeding twenty-five years and no evidences of indebtedness maturing more than twenty-five years from date of purchase may be purchased hereunder: *Provided,* That the foregoing restrictions on maturities shall not apply to securities or obligations received by the Secretary as a claimant in bankruptcy or equitable reorganization or as a creditor in other proceedings attendant upon insolvency of the obligor.

"(8) Loans made and evidences of indebtedness purchased under this section shall bear interest at a rate equal to the rate of interest paid by the Secretary on funds obtained from the Secretary of the Treasury as provided in section 8(d) of this Act plus one-half of 1 per centum per annum to cover administrative expenses and to provide for losses on loans made and evidences of indebtedness purchased under this section.

"(9) Such assistance shall not exceed 65 per centum of the aggregate cost to the applicant (excluding all other Federal aid in connection with the undertaking) of acquiring or developing land and facilities (including, in exceptional cases, machinery and equipment), and of constructing, altering, converting, rehabilitating, or enlarging the building or buildings of the particular project and shall, among others, be on the condition that—

"(A) other funds are available in an amount which, together with the assistance hereunder, shall be sufficient to pay such aggregate cost;

"(B) not less than 10 per centum of such aggregate cost be supplied by the State or any agency, instrumentality, or political subdivision thereof, or by a community or area organization which is nongovernmental in character, as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior

to the lien or liens securing such Federal financial assistance;

"(C) in extending financial assistance under this section with respect to a redevelopment area, the Secretary shall require that not less than 5 per centum of the aggregate cost of the project for which such assistance is extended shall be supplied by nongovernmental sources, in addition to any funds supplied from such sources under subparagraph (B), as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal financial assistance; and

"(D) to the extent the Secretary finds such action necessary to encourage financial participation in a particular project by other lenders and investors, and except as otherwise provided in subparagraphs (B) and (C), any Federal financial assistance extended under this section may be repayable only after other loans made in connection with such project have been repaid in full, and the security, if any, for such Federal financial assistance may be subordinate and inferior to the lien or liens securing other loans made in connection with the same project.

"(10) No such assistance shall be extended unless there shall be submitted to and approved by the Secretary an overall program for the economic development of the area and a finding by the State, or any agency, instrumentality, or local political subdivision thereof, that the project for which financial assistance is sought is consistent with such program: *Provided*, That nothing in this Act shall authorize financial assistance for any project prohibited by laws of the State or local political subdivision in which the project would be located.

"LOANS FOR PUBLIC FACILITIES

"SEC. 7. (a) In order to provide loans for public facilities in redevelopment areas, the first sentence of section 202(c) of title II of the Housing Amendments of 1955 is amended to read as follows:

"'(c) In the processing of applications for financial assistance under this section, the Administrator shall give equal priority to applications of—

"'(1) counties, cities, and other municipalities, and political subdivisions for financing needed public facilities in areas determined to be redevelopment areas under the Area Redevelopment Act, if the Secretary of Commerce certifies there is reasonable probability that with assistance made available under the Area Redevelopment Act and other undertakings such areas will be able to achieve lasting improvement in their economic development; and

"'(2) smaller municipalities for assistance in the construction of basic public works (including works for the storage, treatment, purification, or distribution of water; sewage, sewage treatment, and sewer facilities; and gas distribution systems) for which there is an urgent and vital public need.'

"(b) The first sentence of section 203(a) of title II of the Housing Amendments of 1955 is amended to read as follows:

"'(a) In order to finance activities under this title, the Administrator is authorized and empowered to issue to the Secretary of the Treasury, from time to time and to have outstanding at any one time in an amount not exceeding $150,000,000, notes and other obligations, which limit shall be increased by such amounts, not exceeding $100,000,000, as may be specified from time to time in appropriation Acts.'

"(c) No financial assistance shall be extended under the amendments made by this section with respect to—

"(1) any public facility situated in a redevelopment area which would compete with an existing privately owned public utility rendering a service to the public at rates or charges subject to regulation by a State regulatory body, unless the State regulatory body determines that in the area to be served by the public facility for which the financial assistance is to be extended there is a need for an increase in such service (taking into consideration reasonably foreseeable future needs) which the existing public utility is not able to meet through its existing facilities or through an expansion which it is prepared to undertake; or

"(2) any area if it will assist business establishments in relocating, totally or partially, from one area to another.

"AREA REDEVELOPMENT FUND

"SEC. 8. (a) There is hereby established in the Treasury of the United States an area redevelopment fund (hereinafter referred to as the 'fund'), which shall be available to the Secretary for the purpose of extending financial assistance under section 6 and for the payment of all obligations and expenditures arising therefrom.

"(b) When requested by the Secretary, advances shall be made to the fund from the appropriations made therefor. There is hereby authorized to be appropriated for the purpose of making advances to the fund, without fiscal year limitation, an amount not exceeding $150,000,000.

"(c) Receipts arising from the program of assistance under section 6 shall be credited to the fund. Any moneys in the fund determined by the Secretary to be in excess of current needs shall be credited to the appropriation from which advanced to be held for future advances to the fund.

"(d) There shall be paid into miscellaneous receipts of the Treasury at the close of each fiscal year interest, on advances made to the fund for use in extending financial assistance under section 6, at rates which shall be determined by the Secretary of the Treasury at the time the advances or commitments for advances are made after taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to loans made by the Secretary under section 6.

"(e) The fund shall contribute to the civil service retirement and disability fund a sum as provided by section 4(a) of the Civil Service Retirement Act (5 U.S.C. 2254(a)), except that such sum shall be determined by applying to the total basic salaries (as defined in that Act) paid to employees performing activities authorized under section 6 of this Act and covered by that Act the per centum rate determined annually by the Civil Service Commission to be the excess of the total normal cost per centum rate of the civil service retirement system over the employee deduction rate specified in such section 4(a). The fund shall also pay into the Treasury as miscellaneous receipts that portion of the cost of administration of the civil service retirement and disability fund attributable to employees performing activities authorized under section 6 of this Act, as determined by the Civil Service Commission.

"(f) In the performance of and with respect to the functions, powers, and duties vested in him by section 6 of this Act, the Secretary shall—

"(1) prepare annually and submit a budget program in accordance with the provisions of sections 102, 103, and 104 of the Government Corporation Control Act, as amended; and

"(2) determine the character of and the necessity for obligations and expenditures and the manner in which they shall be incurred, allowed, and paid, subject to provisions of law specifically applicable to Government corporations.

"INFORMATION

"SEC. 9. The Secretary shall aid redevelopment areas and other areas by furnishing to interested individuals, communities, industries, and enterprises within such areas any assistance, technical information, market research, or other forms of assistance, information, or advice which are obtainable from the various departments, agencies, and instrumentalities of the Federal Government and which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment within such areas. The Secretary shall furnish the procurement divisions of the various departments, agencies, and other instrumentalities of the Federal Government with a list containing the names and addresses of business firms which are located in redevelopment areas and which are desirous of obtaining Government contracts for the furnishing of supplies or services, and designating the supplies and services such firms are engaged in providing.

"TECHNICAL ASSISTANCE

"SEC. 10. In carrying out his duties under this Act the Secretary is authorized to provide technical assistance which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment (1) to areas which he has designated as redevelopment areas under this Act, and (2) to other areas which he finds have substantial need for such assistance. Such assistance shall include studies evaluating the needs of, and developing potentialities for, economic growth of such areas. Such assistance may be provided by the Secretary through members of his staff or through the employment of private individuals, partnerships, firms, corporations, or suitable institutions, under contracts entered into for such purposes. Appropriations are hereby authorized for the purposes of this section in an amount not to exceed $4,500,000 annually.

"POWERS OF SECRETARY

"SEC. 11. In performing his duties under this Act, the Secretary is authorized to—

"(1) adopt, alter, and use a seal, which shall be judicially noticed;

"(2) hold such hearings, sit and act at such times and places, and take such testimony, as he may deem advisable;

"(3) request directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality information, suggestions, estimates, and statistics needed to carry out the purposes of this Act; and each department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary;

"(4) under regulations prescribed by him, assign or sell at public or private sale, or otherwise dispose of for cash or credit, in his discretion and upon such terms and conditions and for such consideration as he shall determine to be reasonable, any evidence of debt, contract, claim, personal property, or security assigned to or held by him in connection with loans made or evidences of indebtedness purchased under this Act, and collect or compromise all obligations assigned to or held by him in connection with such loans or evidences of indebtedness until such time as such obligations may be referred to the Attorney General for suit or collection;

"(5) further extend the maturity of or renew any loan made or evidence of indebtedness purchased under this Act, beyond the periods stated in such loan or evidence of indebtedness or in this Act, for additional periods not to exceed ten years, if such extension or renewal will aid in the orderly liquidation of such loan or evidence of indebtedness;

"(6) deal with, complete, renovate, improve, modernize, insure, rent, or sell for cash or credit, upon such terms and conditions and for such consideration as he shall determine to be reasonable, any real or personal property conveyed to, or otherwise acquired by, him in connection with loans made or evidences of indebtedness purchased under this Act;

"(7) pursue to final collection, by way of compromise or other administrative action, prior to reference to the Attorney General, all claims against third parties assigned to him in connection with loans made or evidences of indebtedness purchased under this Act. This shall include authority to obtain deficiency judgments or otherwise in the case of mortgages assigned to the Secretary. Section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), shall not apply to any contract of hazard insurance or to any purchase or contract for services or supplies on account of property obtained by the Secretary as a result of loans made or evidences of indebtedness purchased under this Act if the premium therefor or the amount thereof does not exceed $1,000. The power to convey and to execute, in the name of the Secretary, deeds of conveyance, deeds of release, assignments and satisfactions of mortgages, and any other written instrument relating to real or personal property or any interest therein acquired by the Secretary pursuant to the provisions of this Act may be exercised by the Secretary or by any officer or agent appointed by him for that purpose without the execution of any express delegation of power or power of attorney;

"(8) acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized in section 6 of this Act;

"(9) in addition to any powers, functions, privileges, and immunities otherwise vested in him, take any and all actions, including the procurement of the services of attorneys by contract, determined by him to be necessary or desirable in making, purchasing, servicing, compromising, modifying, liquidating, or otherwise administratively dealing with or realizing on loans made or evidences of indebtedness purchased under this Act;

"(10) to such an extent as he finds necessary to carry out the provisions of this Act, procure the temporary (not in excess of six months) service of experts or consultants or organizations thereof, including stenographic reporting services, by contract or appointment, and in such cases such service shall be without regard to the civil service and classification laws, and, except in the case of stenographic reporting services by organizations, without regard to section 3709 of the Revised Statutes (41 U.S.C. 5); any individual so employed may be compensated at a rate not in excess of $75 per diem, and, while such individual is away from his home or regular place of business, he may be allowed transportation and not to exceed $15 per diem in lieu of subsistence and other expenses;

"(11) sue and be sued in any court of record of a State having general jurisdiction or in any United States district court, and jurisdiction is conferred upon such district court to determine such controversies without regard to the amount in controversy; but no attachments, injunction, garnishment, or other similar process, mesne or final, shall be issued against the Secretary or his property. Nothing herein shall be construed to except the activities under this Act from the application of sections 507(b) and 2679 of title 28, United States Code, and of section 367 of the Revised Statutes (5 U.S.C. 316); and

"(12) establish such rules, regulations, and procedures as he may deem appropriate in carrying out the provisions of this Act.

"TERMINATION OF ELIGIBILITY FOR FURTHER ASSISTANCE

"SEC. 12. Whenever the Secretary shall determine that employment conditions within any area previously designated by him as a redevelopment area have changed to such an extent that such area is no longer eligible for such designation under section 5 of this Act, no further assistance shall be granted under this Act with respect to such area and, for the purposes of this Act, such areas shall not be considered a redevelopment area: *Provided*, That nothing contained herein shall (1) prevent any such area from again being designated a redevelopment area under section 5 of this Act if the Secretary determines it to be eligible under such section, or (2) affect the validity of any contracts or undertakings with respect to such area which were entered into pursuant to this Act prior to a determination by the Secretary that such area no longer qualifies as a redevelopment area. The Secretary shall keep the departments and agencies of the Federal Government, and interested State or local agencies, advised at all times of any changes made hereunder with respect to the designation of any area.

"URBAN RENEWAL

"SEC. 13. Title I of the Housing Act of 1949, as amended, is amended by adding at the end thereof the following new section:

"'REDEVELOPMENT AREAS UNDER THE AREA REDEVELOPMENT ACT

"'SEC. 113. (a) Whenever the Secretary of Commerce certifies to the Administrator (1) that any county, city, or other municipality (in this section referred to as a "municipality") is situated in an area designated under section 5 of the Area Redevelopment Act as a redevelopment area, and (2) that there is a reasonable probability that with assistance provided under such Act and other undertakings the area will be able to achieve more than temporary improvement in its economy, the Administrator is authorized to provide financial assistance to a local public agency in any such municipality under this title and the provisions of this section.

"'(b) Subject to the provisions of subsection (e) of this section, the Administrator may provide such financial assistance under this section without regard to the requirement or limitations of section 110(c) that the project area be predominantly residential in character or be redeveloped for predominantly residential uses under the urban renewal plan, and without regard to any of the limitations of that section on the undertaking of projects for predominantly nonresidential uses; but no such assistance shall be provided in any area if the Administrator determines that it will assist business establishments in relocating, totally or partially, from one area to another.

"'(c) Notwithstanding any other provision of this title, a contract for financial assistance under this section may include provisions permitting the disposition of any land in the project area designated under the urban renewal plan for industrial or commercial uses to any public agency or nonprofit organization for subsequent disposition as promptly as practicable by such public agency or corporation for the redevelopment of the land in accordance with the urban renewal plan: *Provided*, That any disposition of such land to such public agency or corporation under this section shall be made at its fair value for uses in accordance with the urban renewal plan: *And provided further*, That only the purchaser from or lessees of such public agency or corporation, and their assignees, shall be required to assume the obligations relating to the commencement of improvements imposed under section 105(b) hereof.

"'(d) Following the execution of any contract for financial assistance under this section with respect to any project, the Administrator may exercise the authority vested in him under this section for the completion of such projects, notwithstanding any determination made after the execution of such contract that the area in which the project is located is no longer a redevelopment area under the Area Redevelopment Act.

"'(e) Not more than 10 per centum of the funds authorized for capital grants under section 103 after the date of the enactment of the Area Redevelopment Act shall be used for the purpose of providing financial assistance under this section. Amounts used for such purpose shall not be taken into account for the purpose of the limitation contained in the second proviso of the fifth sentence of section 110(c).'

"URBAN PLANNING GRANTS

"SEC. 14. Paragraph (3) of section 701(a) of the Housing Act of 1954 is amended by inserting after "counties which" the following: '(A) are situated in areas designated by the Secretary of Commerce under section 5(a) of the Area Redevelopment Act as redevelopment areas or (B)'.

"OCCUPATIONAL TRAINING

"SEC. 15. (a) The Secretary of Labor is authorized, upon request and whenever he determines such studies are needed, to undertake, or to provide assistance to others for, studies of the size, characteristics, skills, adaptability, occupational potentialities, and related aspects of the labor force of any redevelopment area.

"(b) When a redevelopment area has an approved economic development program as provided in section 6(b)(10), the Secretary of Labor, in consultation with the Secretary, shall determine the occupational training or retraining needs of unemployed individuals residing in the redevelopment area. The Secretary of Labor shall notify the Secretary of Health, Education, and Welfare of the occupational training or retraining requirements of the area, and shall provide for the orderly selection and referral of those unemployed or underemployed individuals residing in the area who can reasonably be expected to obtain employment as a result of the skill they will acquire in the training which is to be made available. The Secretary of Labor shall cooperate with the Secretary of Health, Education, and Welfare and with existing State and local agencies and officials in charge of existing programs relating to vocational training and retraining for the purpose of assuring that the facilities and services of such agencies are made fully available to such individuals.

"(c) Whenever the Secretary of Labor finds that additional facilities or services are needed in the area to meet the occupational training or retraining needs of such individuals, he shall so advise the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare shall provide assistance, including financial assistance when necessary, to the appropriate State vocational educational agency in the provision of such additional facilities or services. If the Secretary of Health, Education, and Welfare finds that the State vocational educational agency is unable to provide the facilities and services needed, he may, after consultation with such agency, provide for the same by agreement or contract with public or private educational institutions.

"(d) The Secretary of Labor shall arrange to provide any necessary assistance for setting up apprenticeships, and to promote journeyman and other on-the-job training.

"(e) There are hereby authorized to be appropriated for the fiscal year beginning July 1, 1961, such sums, not in excess of $10,000,000, as may be necessary to carry out the provisions of this section.

"RETRAINING SUBSISTENCE PAYMENTS

"SEC. 16. (a) The Secretary of Labor in consultation with the Secretary may, on behalf of the United States, enter into agreements with States in which redevelopment areas are located, under which the Secretary of Labor shall make payments to such States either in advance or by way of reimbursement for the purpose of enabling such States, as agents of the United States, to make weekly retraining payments to unemployed individuals residing within such redevelopment areas who are certified by the Secretary of Labor to be undergoing occupational training or retraining under section 15 of this Act. Such payments shall be made for a period not exceeding sixteen weeks, and the amount of any such payment for any week shall not exceed the amount of the average weekly unemployment compensation payment (including allowances for dependents) payable for a week of total unemployment in the State making such payments.

"(b) No weekly retraining payment shall be made to any person otherwise eligible who, with respect to the week for which such payment would be made, has received or is seeking unemployment compensation under title XV of the Social Security Act or any other Federal or any State unemployment compensation law, but if the appropriate State or Federal agency finally determines that a person denied benefits for any week because of this subsection was not entitled to unemployment compensation under title XV of the Social Security Act or such Federal or State law with respect to such week, this subsection shall not apply with respect to such week.

"(c) Any agreement under this section may contain provisions (including, so far as may be appropriate, provisions authorized or made applicable with respect to agreements concluded by the Secretary of Labor pursuant to title XV of the Social Security Act) as will promote effective administration, protect the United States against loss, and insure the proper application of payments made to the State under such agreement. Except as may be provided in such agreements, or in the rules and regulations prescribed pursuant to subsection (d) of this section, determinations by any duly designated officer or agency as to the eligibility of individuals for weekly retraining payments under this section shall be final and conclusive for any purposes and not subject to review by any court or any other officer.

"(d) The Secretary of Labor and the Secretary shall jointly prescribe such rules and regulations as they may deem necessary to carry out the provisions of this section.

"(e) There are hereby authorized to be appropriated for the fiscal year beginning July 1, 1961, such sums, not in excess of $10,000,000, as may be necessary to carry out the provisions of this section.

"PENALTIES

"SEC. 17. (a) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any financial assistance under section 6, or any extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Secretary, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

"(b) Whoever, being connected in any capacity with the Secretary, in the administration of this Act (1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to him or pledged or otherwise entrusted to him, or (2) with intent to defraud the Secretary or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner, makes any false entry in any book, report, or statement of or to the Secretary, or without being duly authorized draws any order or issues, puts forth, or assigns any note, debenture, bonds, or other obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof, or (3) with intent to defraud participates or shares in or receives directly or indirectly any money, profit, property, or benefit through any transaction, loan, grant, commission, contract, or any other act of the Secretary, or (4) gives any unauthorized information concerning any future action or plan of the Secretary which might affect the value of securities, or having such knowledge invests or speculates, directly or indirectly, in the securities or property of any company or corporation receiving loans or other assistance from the Secretary, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

"EMPLOYMENT OF EXPEDITERS AND ADMINISTRATIVE EMPLOYEES

"SEC. 18. No financial assistance shall be extended by the Secretary under section 6 to any business enterprise unless the owners, partners, or officers of such business enterprise (1) certify to the Secretary the names of any attorneys, agents, and other persons engaged by or on behalf of such business enterprise for the purpose of expediting applications made to the Secretary for assistance of any sort, under this Act, and the fees paid or to be paid to any such person; and (2) execute an agreement binding such business enterprise, for a period of two years after such assistance is rendered by the Secretary to such business enterprise, to refrain from employing, tendering any office or employment to, or retaining for professional services, any person who, on the date such assistance or any part thereof was rendered, or within one year prior thereto, shall have served as an officer, attorney, agent, or employee, occupying a position or engaging in activities which the Secretary shall have determined involve discretion with respect to the granting of assistance under this Act.

"RECORD OF APPLICATIONS

"SEC. 19. The Secretary shall maintain as a permanent part of the records of the Department of Commerce a list of applications approved for financial assistance under section 6, which shall be kept available for public inspection during the regular business hours of the Department of Commerce. The following information shall be posted in such list as soon as each application is approved: (1) the name of the applicant and, in the case of corporate applications, the names of the officers and directors thereof, (2) the amount and duration of the loan for which application is made, (3) the purposes for which the proceeds of the loan are to be used, and (4) a general description of the security offered.

"PREVAILING RATE OF WAGE AND FORTY-HOUR WEEK

"SEC. 20. All laborers and mechanics employed by contractors or subcontractors on projects assisted by the Secretary under this Act and undertaken by public applicants shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5), and every such employee shall receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in any workweek in excess of eight hours in any workday or forty hours in the workweek, as the case may be. The Secretary shall not extend any financial assistance under section 6 for such a project without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this provision, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z-15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948, as amended; 40 U.S.C. 276c).

"ANNUAL REPORT

"SEC. 21. The Secretary shall make a comprehensive and detailed annual report to the Congress of his operations under this Act for each fiscal year beginning with the fiscal year ending June 30, 1962. Such report shall be printed and shall be transmitted to the Congress not later than January 3 of the year following the fiscal year with respect to which such report is made. Such report shall show, among other things, (1) the number and size of Government contracts for the furnishing of supplies and services placed with business enterprises located in redevelopment areas, and (2) the amount and duration of employment resulting from such contracts. Upon the request of the Secretary, the various departments and agencies of the Government engaged in the procurement of supplies and services shall furnish to the Secretary such information as may be necessary for the purposes of this section.

"APPROPRIATION

"SEC. 22. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

"USE OF OTHER FACILITIES

"SEC. 23. (a) To the fullest extent practicable in carrying out the provisions of this Act the Secretary shall use the available services and facilities of other agencies and instrumentalities of the Federal Government, but only with their consent and on a reimbursable basis. The foregoing requirement shall be implemented by the Secretary in such a manner as to avoid the duplication of existing staffs and facilities in any agency or instrumentality of the Federal Government. The Secretary is authorized to delegate to the heads of other departments and agencies of the Federal Government any of the Secretary's functions, powers, and duties under this Act as he may deem appropriate, and to authorize the redelegation of such functions, powers, and duties by the heads of such departments and agencies.

"(b) Departments and agencies of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carrying out the objectives of this Act. This Act shall be supplemental to any existing authority, and nothing herein shall be deemed to be restrictive of any existing powers, duties, and functions of any other department or agency of the Federal Government.

"(c) Funds authorized to be appropriated under this Act may be transferred, with the approval of the Director of the Bureau of the Budget, between departments and agencies of the Government, if such funds are used for the purposes for which they are specifically authorized and appropriated.

"(d) Subject to the standards and procedures prescribed by section 505 of the Classification Act of 1949, as amended, the head of any agency, for the performance of functions under this Act, including functions delegated pursuant to subsection (a), may place positions in grades 16, 17, and 18 of the General Schedule established by such Act, and such positions shall be in addition to the

number of such positions authorized by section 505 of the Classification Act of 1949, as amended, to be placed in such grades: *Provided*, That not to exceed a total of fifteen such positions may be placed in such grades under this subsection, to be apportioned among the agencies by the Secretary, with the approval of the Director of the Bureau of the Budget.

"RECORDS AND AUDIT

"SEC. 24. (a) Each recipient of assistance under section 6 of this Act shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 6 of this Act.

"LOANS TO STATE AND LOCAL DEVELOPMENT COMPANIES

"SEC. 25. Section 502 of the Small Business Investment Act of 1958 is amended by striking out paragraph (6).

"STUDY BY SECRETARY

"SEC. 26. The Secretary shall make a study of the feasibility of establishing procedures to provide for increased use of military bases, and Government-owned plants and facilities for the manufacture or production of munitions and other supplies for the Government, which are located in areas designated under section 5 of this Act as redevelopment areas and which are not fully utilized, whenever such use is consistent with the national defense, economy in Government operation, and other Government procurement objectives. Upon the completion of such study the Secretary shall submit to the Congress a report of his findings together with such recommendations for legislative and other action as he may deem appropriate.

"APPLICATION OF ACT

"SEC. 27. As used in this Act, the terms 'State', 'States', and 'United States' include the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

Mr. WIDNALL (interrupting the reading of the amendment). Mr. Chairman, I ask unanimous consent that further reading of the amendment be dispensed with and that it be printed in the RECORD at this point.

The CHAIRMAN. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. WIDNALL. I yield to the gentleman from Texas.

Mr. PATMAN. This is the bill, I assume, that was offered as a substitute.

Mr. WIDNALL. H.R. 5943.

Mr. PATMAN. H.R. 5943?

Mr. WIDNALL. That is correct.

Mr. Chairman, I have asked to dispense with the further reading of the amendment because this amendment is the committee bill as reported with 15 changes. I would like to underline those changes to the members of the committee so that they will fully understand what is proposed.

These changes, in my opinion, are desirable and necessary if this bill is to provide assistance for the hard-core depressed areas suffering from chronic and persistent unemployment because of loss of their industrial base.

My bill will provide 50 percent more loan assistance for the construction of plants in the truly depressed areas, it will provide more than double the amount of funds allocated for occupational training and retraining, and it will do all of this with a reduction of 30 percent in the overall cost. The cost of my bill to the taxpayer is $275 million, contrasted with the $394 million cost of the committee bill. Under my bill, the loan assistance provided would be on a nonsubsidy basis.

Rather than attempt the whole series of 15 amendments to the committee bill, I am of the opinion that it would be preferable procedure to have these changes incorporated in one new bill which I intend to offer as a substitute to the committee bill when it is before the House.

Following is a brief summary of the differences between the bill I have introduced and the bill that was reported by the House Banking and Currency Committee:

First. Designation of industrial redevelopment areas—section 5(a):

(a) The broad authority to designate redevelopment areas contained in the first sentence of section 5(a) is eliminated. Under it, in the bill as reported, a whole State could be declared a redevelopment area. The truly depressed areas should not have to share benefits intended for them on any such broad basis as that. This is a basic policy decision.

(b) The term "labor market area" is used in place of "area." Department of Labor statistics on unemployment are tabulated on the basis of "labor market areas." Thus there will be correlation between the areas designated and the areas for which unemployment information is available.

(c) Areas within a State can only be designated as redevelopment areas after the chief executive of the State has requested that the designation be made. This preserves States rights in the making of such designations.

(d) The criteria under which it is mandatory that areas be designated as redevelopment areas—upon proper request—are made the minimum conditions that must exist for any labor market area to be declared a redevelopment area. This will tend to assure that the assistance provided in the bill will be available for the hard core depressed areas which are the ones in greatest need.

Second. Rural areas—section 5(b):

(a) The loose and meaningless criteria for designation of rural development areas are eliminated. Under the committee bill, only two counties or as many as half of the counties in the United States could be declared to be redevelopment areas. In addition, the hearing makes abundantly clear no one has the faintest idea of how this program would work.

But we would like to know the nature of the assistance, where it is to go, what the areas are. And nobody has given any intelligent explanation of that up to now, including all the committee witnesses.

(b) The sensible way to proceed with this part of the program is to require the Secretary of Agriculture to come up with a study that makes sense as to what could be done in rural areas, and Indian reservations. Accordingly, provision is made for such a study with a report to Congress not later than January 3, 1962. Appropriations of up to $500,000 are authorized for such study. The Secretary of Agriculture is specifically authorized to receive assistance from the Secretary of Interior in making the study.

Third. Plant loan funds for industrial redevelopment areas—section 6(b):

(a) In my bill, a 50-percent increase is provided in the loan funds available for the hard core industrial depressed areas since that program can proceed on a sensible basis.

(b) Since it is the apparent intention of the committee bill that there be at least 15 percent State and local equity participation in plant loans, section 6(b)(9)(C) is amended to close a loophole under which, in certain cases, only a 10 percent participation would be required.

Fourth. Loans for public facilities—section 7:

(a) In place of establishing a new, duplicating public facility loan program on a subsidized basis, provision in my bill is made for expanding by $100 million the existing public facility loan program in the Housing Agency with provision for a priority for counties, cities, and other municipalities and political subdivisions in redevelopment areas. Such a program is on a nonsubsidized lending basis.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. WIDNALL] has expired.

Mr. HIESTAND. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

Mr. PATMAN. Mr. Chairman, reserving the right to object—and I shall not object—I should like to get some understanding about time on this amendment, if we can. We have only one Member who is going to answer the gentleman from New Jersey [Mr. WIDNALL]. If the gentleman wants to dispose of this in a reasonable length of time, I am willing that he be granted as much time as he desires now, with the understanding that the Member on our side will have the same amount of time, and then debate will be closed.

The CHAIRMAN. Is the gentleman proposing a time limitation?

Mr. PATMAN. I would like to know if there would be any objection to such an arrangement. If there is any objection, I shall not press it. I do not

object to the unanimous consent request that the gentleman proceed for an additional 5 minutes at this time.

The CHAIRMAN. Is there objection to the request of the gentleman from California [Mr. HIESTAND]?

There was no objection.

Mr. WIDNALL. Mr. Chairman, (b) protection is afforded against such loan funds being utilized in a manner to induce pirating of industry from other areas to redevelopment areas.

Fifth. Grants for public facilities:

(a) This PWA type program—section 8 of the reported bill—is completely eliminated from my bill on basic policy considerations as follows: First, it is a foot-in-the-door start of omnibus Federal grant-in-aid legislation; second, the eligibility criteria are virtually unlimited; and, third, it could be used to foster unsound projects in that it would apply to a project for which there would be "little probability that such project can be undertaken without the assistance of a grant under this section."

Sixth. Termination of eligibility for further assistance—section 12:

(a) Although no change is made in this section, nevertheless for the first time it would acquire real meaning because of the deletion of the broad area designation authority contained in the first sentence of section 5(a) of the bill as reported. Eligibility of an area is terminated when it no longer meets requirements for designation as a redevelopment area.

Seventh. Urban renewal—section 13:

(a) A provision is added in my bill protecting against plant-pirating in the use of this program in redevelopment areas. Somewhat similar protection was included in the bill S. 722 which was sent to the President by the last Congress.

Eighth. Occupational training—section 15:

(a) Since this is the only help some of the unemployed in depressed areas will get out of this bill, the amount provided for occupational training in my bill has been more than doubled—increased from $4.5 million to $10 million.

(b) The authorized appropriation is placed on a 1-year basis to force the coordination within that time of this new program with the existing vocational training programs of the Department of Health, Education, and Welfare.

Ninth. Retraining subsistence payments—section 16:

(a) The amount is the same as the reported bill.

(b) The authorized appropriation is placed on a 1-year basis to afford the Ways and Means Committee an opportunity to coordinate and possibly consolidate this program with the basic unemployment compensation program.

So the essential differences are these:

In plant loans there is $50 million more in my bill.

As against $100 million in the rural development section in the committee bill, there is $500,000 in my bill for a study.

The public facility loans of $100 million on a subsidized-loan basis in a new agency have been eliminated, but the same $100 million is now authorized in the existing community facility program, with priority to the redevelopment areas.

Public facility grants of $75 million in the committee bill have been eliminated.

Technical assistance and subsistence payments remain the same, at $4,500,000.

Occupational training has been increased in my bill from $4.5 million, to $10 million.

May I call to the attention of the Members that there are many, many small areas that qualify today under both bills for the industrial loan assistance.

Page 18 of the committee report lists 83 smaller areas of substantial and persistent labor surplus which qualify for assistance under this bill. These areas each contain a work force of 15,000 or more and take their names from the principal community or communities in the area. The following tabulation shows the 1960 population of the "name-communities" of several of these smaller areas:

STATE AND AREA, 1960 POPULATION, U.S. CENSUS

Alabama: Jasper, 10,799.

Kentucky: Morehead, 4,170; Grayson, 1,692; Paintsville, 4,025; Prestonburg, 3,103.

Missouri: Washington, 7,961.

New Jersey: Ocean City, 7,618; Wildwood, 4,690; Cape May, 4,477.

Ohio: Batavia, 1,729; Georgetown, 2,674; West Union, 1,762.

Pennsylvania: Kittanning, 6,793; Ford City, 5,440; St. Marys, 8,085; Sayre, 7,917; Athens, 4,515; Towanda, 4,293.

Tennessee: La Follette, 6,204; Jellico, 2,210; Tazewell, 1,264.

Virginia: Big Stone Gap, 4,688; Appalachia, 2,456.

Washington: Anacortis, 8,414.

West Virginia: Logan, 4,185; New Martinsville, 5,607; Oak Hill, 4,711; Montgomery, 3,000; Point Pleasant, 5,785; Gallipolis (under 1,000); Ronceverte, 1,882; White Sulphur Springs, 2,676; Welch, 5,313.

It is very apparent from these population figures that the Department of Labor tabulations on employment conditions already cover even very small communities. The argument that flexible area designation authority is needed so that small communities will not be excluded as depressed areas, just does not square with the facts. What should concern this Congress is that under the broad area designation authority contained in the first sentence of section 5(a), whole States could be declared depressed areas. In that first sentence the word "area" means only what the administrator might decide it means. Obviously, the pockets of chronic unemployment—the truly depressed areas—just would not have a chance as whole States moved in to take most of the assistance intended for the local areas of chronic and persistent unemployment. This is a basic policy issue which in my opinion should be resolved in favor of the truly depressed areas. To do otherwise would make this bill a fraud on the local areas of greatest need.

Mr. RAINS. Mr. Chairman, I rise in opposition to the Widnall amendment.

(By unanimous consent (at the request of Mr. PATMAN), Mr. RAINS was given permission to proceed for 5 additional minutes.)

Mr. RAINS. Mr. Chairman, I assume this is the meat of the coconut on this bill. Since it covers about every category in it, with the 15 changes in the committee bill which the gentleman from New Jersey [Mr. WIDNALL] proposes, I would assume that the main vote would come on this particular substitute.

I was pleased to hear even stout opponents of this legislation say yesterday in the debate on the rule that this was a better bill than we have had before the Congress heretofore. That is a true statement. This bill is better than any other bill that has come out of the Committee on Banking and Currency on this particular subject. It is not a perfect bill. I have been here long enough, as you have, to know that no committee can write a perfect bill. It is not a bill on which you cannot find some criticism, because you can. You can do that on any bill. But from a legislative standpoint, this is a good approach to a tough and difficult problem.

Mr. Chairman, I shall confine my remarks strictly to the Widnall amendment.

The Widnall amendment seeks to butcher the bill completely, as the committee brought it out. It seems to take away from the bill its reasons for support from all elements, or call it what you will, so that the bill will get beat. That is how plain and simple the Widnall amendment is and that is how plain and simple the principle of the Widnall amendment is. When you say you want to take away from all the counties and the small cities and towns in America represented by all these Members here and confine it only to 50 urban areas, anybody here knows that that would beat this bill, if you adopted the amendment. That is clear and that is the intent and purpose. The purpose is not to make the bill better, because it does not make it better. It takes away from it the very thing that will help us to make a step forward in rural and urban development. I want to say this before I move into some specifics. I am the last one here who believes that this will solve the problem. I know that this small amount of money is not going to solve the problem. I also know though that it will be a step forward and a step in the direction which we ought to go, based on what I think is a fair formula and on what I believe the majority of the committee felt was a fair formula. There are two divisions to the bill. The first, refers to the mandatory section. The mandatory section of the bill refers to cities which have had long unemployment. There is a list of them in the committee report. To these areas under this bill, the Secretary of Commerce must give aid and assistance. He has no difficulty in arriving at that because the Secretary of Labor keeps statistics on employment in all cities and towns in America above 15,000 in population. But for those cities and towns of 15,000 and under, we found there were no statistics in the Bureau of Labor Statistics and, therefore, we had to write criteria into the bill, if we were to include the unemployed and the underemployed in those areas in the sections of this country where we do not

have cities above 15,000 with an established record in the Bureau of Labor Statistics in the Department of Labor. People have asked me what this bill will do.

I yield to my good friend, the gentleman from Florida [Mr. SIKES].

Mr. SIKES. The distinguished gentleman is giving a very important statement, and many of us here who recognize there is definitely a need for a bill designed as the bill is designed want to be certain that this bill reaches into every area and is not confined just to the major cities. We want to be certain that it will reach the small rural areas where there is just as much depression percentagewise as there is in any major city. Now will my distinguished friend tell us definitely, so that we may know exactly what this bill does for the rural areas how a small county or a rural county may qualify under this bill?

Mr. RAINS. I will say to the gentleman, he never made a truer statement than the one he just made when he said that there is just as much depression on the farms of America as there is in anybody's city. I hope my colleagues will listen to these figures and then I will get to the details.

In 1959, 35 percent of the farm families in America made less than $2,000 a year; 35 percent of the farm families had less than that income in this country.

As the farmers have increased their production they have lost their own jobs. They are the only people in America who have done such a job that they have run themselves out of business. The result is they are unemployed or underemployed, really, by the hundreds of thousands on farms in the rural areas of America.

This is how it will help: First, the committee bill will provide Government loans on very liberal terms to create new job opportunities in areas now predominantly rural. These loans for industrial building will provide the seed capital and the enabling leadership in these areas to intensify their industrial redevelopment programs of their own local organizations. I predict that chambers of commerce which now generally oppose this bill will be the agencies through which a great many of these small industries will be located in these small towns, or else a development organization of some type will do the job.

Second, there are loans and grants for public facilities. I do not want to say to you, Mr. Chairman, that I think this is a public facilities bill, because a little later on in this session I expect to bring before this Congress a bill that I hope will carry a substantial amount for community facilities. But that is not for the towns that we are talking about now. We are talking here about towns in the rural areas that might need another $15,000 that cannot float bonds at a reasonable rate of interest to build a little water system or a little water plant or some type of community facility which they need just as much as some big city might need a $100 million community facility. To base it on any unsound or inadequate financing would be about like throwing money down a rathole. The criteria have been broadened so that the Secretary of Commerce—and, of course, he will work with the Secretary of Agriculture—can identify any rural area that has a substantial amount of unemployment or underemployment and can establish that area as eligible to receive the aid and assistance under this section of the bill.

Mr. JONES of Missouri. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from Missouri.

Mr. JONES of Missouri. What type of community would be eligible for community facilities which are not now already eligible and receiving loans for these specific purposes the gentleman has mentioned?

Mr. RAINS. I will be glad to answer the gentleman. First of all, there is not enough money in the present community facilities program to do what should be done. I can think of one program in my district, a place that needs a water system, that cannot float any kind of bonds and cannot qualify under the community facilities program at present and could not meet the payments possibly under that, but which would be helped by the provision in the pending bill which would spread the payments over a longer time and at a lower rate of interest than in the regular community facilities program.

Mr. JONES of Missouri. But is not the community facilities program working very well? I know there are cases in my own district where they have not been able to be served.

Mr. RAINS. The program has barely scratched the surface. The community facilities program should be extended, but the towns we are talking about here need special help.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. SIKES. Mr. Chairman, I ask unanimous consent that the gentleman from Alabama [Mr. RAINS] may proceed for 5 additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield.

Mr. SIKES. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from Florida.

Mr. SIKES. The gentleman has given us some very helpful information. Would the gentleman take another minute or two and tell us how a small rural county or community, a specific county or community, can qualify under this bill?

Mr. RAINS. That is difficult because I have to imagine myself in the place of the Secretary. No legislation can spell out the exact details but the qualification is that the Administrator must find a substantial amount of unemployment or underemployment, and that it has existed for a considerable length of time. He must find it in those areas that do not have reports from the Labor Department, and those are areas under 15,000. It places in the Administrator a great deal of leeway, and necessarily so, because of lack of records as to how he can establish and find an area that would be eligible.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from Texas.

Mr. PATMAN. On page 19 of the report there are listed the seven criteria that are suggested as to designation of the most critical areas. The question is answered on page 19.

Mr. SEELY-BROWN. Mr. Chairman, will the gentleman yield?

Mr RAINS. I yield to the gentleman from Connecticut.

Mr. SEELY-BROWN. How is the determination to be made? Will someone give us a specific example of what is actually anticipated to be done? That is the question I have. Once you determine that a rural area is eligible, are you going to make it a better farm area, or change it from a farm area to an industrial area? That is the question I would like to have answered.

Mr. RAINS. In a great many farm areas there are not farm jobs to be had. The people are moving to the cities. Under this bill they would retain a number of the farm workers under the vocational education program for other jobs instead of sending them to the big cities of America and let them take poor jobs or stand in the breadline because they lack any job training at all. I think that is one of the important things. What they would do is try to find other jobs and retrain them for other jobs if there were not farm jobs available.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. In connection with this communities facilities program, that has been in existence for some time, there is an authorization of $100,000 in my substitute bill for that purpose. The gentleman states he expects to raise some more funds in the housing bill, but that will not be considered before July or August. This would provide aid in an area where assistance is needed.

Mr. RAINS. Before the day is over I expect to introduce the administration housing bill, and I hope to be able to say we will not have to wait until July or August before we get one passed. I do not think the amount of money in the administration housing bill is sufficient for community facilities. But we are talking about a depressed area here that needs public facility loans. We expect in connection with the housing bill to take up the regular community facilities program.

Mr. FORRESTER. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from Georgia.

Mr. FORRESTER. I would like to ask the gentleman this question: Suppose there is some little town or locality that wishes to obtain a loan, they could create a bonded indebtedness and get the money they needed for the project. Would they be eligible to obtain a loan under this legislation or would they be

forced to issue bonds and obtain the money in that way?

Mr. RAINS. I do not quite understand the gentleman's question, but I can assure him there is nothing in this bill that would force a city that qualifies under this criteria to vote its own bonds in order to get a community facilities loan.

Mr. FORRESTER. Here is what I mean: Suppose there is one of these depressed communities, but they can under their constitution vote bonds for an amount which will be sufficient to obtain their facilities. Since they are able to obtain money by that avenue, would they be prohibited from borrowing money from the Government under this legislation?

Mr. RAINS. Only if they can raise the money on more reasonable terms elsewhere.

Mr. KITCHIN. Mr. Chairman, will the gentleman yield?

Mr. RAINS. I yield to the gentleman from North Carolina.

Mr. KITCHIN. Under the public facilities portion of the bill, will the gentleman tell me, is there any delineation as to what constitutes a public facility? Can they build sidewalks, or even schools?

Mr. RAINS. The bill indicates the criteria which must be met to qualify. Schoolhouses are left out.

The CHAIRMAN. The time of the gentleman from Alabama has expired.

Mr. HIESTAND. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, just as the very eloquent gentleman from Alabama has discussed the proposed substitute, I shall take a few minutes to discuss the alternative, the bill that was originally introduced.

Mr. Chairman, I suggest that the committee bill itself is one of potentially the greatest boondoggles this House has had a chance to pass upon. Here we have only 3 hours of debate. True, there have been a lot of hearings on it, but in a limited 3 hours we are going to pass, if we do, a measure that can remain on the books anywhere from 50 to 500 years and create a public works program that can be far above anything that any of us have considered up to this time.

I suggest, Mr. Chairman, secondarily, that this bill has the weakness of a whole lot of other pieces of legislation that we have considered. It would endeavor to doctor the symptoms of the disease rather than to attack the causes and correct them. In the committee report there was a slight touch of discussion on causes but nothing toward correcting them. In the hearings I can find only a brief listing but nothing to correct them. Among these basic fundamental causes completely ignored by the committee are first, exhaustion of natural resources; second, changing markets; third, changing demand for goods; fourth, changes in transportation; fifth, labor problems; sixth, taxation problems; seventh, financing problems in particular communities; eighth, competition with imports (a major cause); ninth, automation; and, tenth, closing military bases.

Generally speaking, Mr. Chairman, chambers of commerce are noted for promoting business for their communities. Therefore, a wire from the California Chamber of Commerce might be of interest at this point. They object to this bill because, first, consumer demand, which is down, and available plant space, which is excessive in many industries, is what creates new job opportunities; second, measure treats symptoms rather than causes of unemployment; and third, it is not proper for the Federal Government, through the use of tax funds, to compel the citizens who are giving substantial private financial support to their own local community industrial development programs, to also underwrite the industrial development of competing communities in other parts of the country.

Mr. Chairman, my third point is that this bill, if enacted, simply would not work. We set in the bill some $394 million, and it is variously estimated to take $10 to $15 billion to do the job that is outlined in the bill, and the proponents freely admit the authorized funds are vastly insufficient. Now, we all know that starting a new business is a tough job; it will take several years to put it on its feet, and then it will be on the dole and it will have to be kept there. The mere establishing of a new industry in a depressed area does not of itself guarantee success to that industry or to that community. Matters of demand, supply, management, additional financing are requisites for success. Furthermore, the moving of an existing industry into a new community obviously requires it moving out of other areas, despite the antipiracy clause. Thousands of communities have literally lifted themselves out of local depressions by their own initiative. That is the American way. Bonds for community development and community facilities have always sold well and are still selling well.

Mr. Chairman, I direct the attention of the House to secton 5(b) again, which would establish a rural section in this relief bill, without definition. It is entirely in the hands of the Secretary. This could be a gigantic political boondoggle. The hearings indicated that it would be very difficult to determine who is eligible and who is not, and to apportion the money.

May I suggest, Mr. Chairman, that this is a vote-getting gadget only. Many Members in the House may have felt that they had to vote for this bill because there was some unemployment in their own territory. May I suggest that this bill does not guarantee that it will go into any one area. There are 10 times as many areas as there is money to take care of them in this bill.

This is a bad bill. It would be ineffectual except to promote a colossal political bureaucracy, further build big government. It should be defeated.

The CHAIRMAN. The time of the gentleman from California [Mr. HIESTAND] has expired.

Mr. PERKINS. Mr. Chairman, I move to strike out the requisite number of words.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, I wonder if we can come to an agreement on limiting debate on this amendment and all amendments thereto. I ask unanimous consent that all debate on this amendment and all amendments thereto close in 25 minutes, after the gentleman from Kentucky [Mr. PERKINS] has used his time.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

Mr. HOFFMAN of Michigan. Mr. Chairman, reserving the right to object, before we finish, I wonder if the gentleman could help me get 5 minutes; that is all I want.

Mr. PATMAN. The gentleman will have plenty of opportunity, I am sure. I am not in a position to answer that question just now.

Mr. HOFFMAN of Michigan. I just asked for the gentleman's help; I did not ask for a guarantee.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas that all debate on the pending amendment and all amendments thereto close in 25 minutes, after the gentleman from Kentucky [Mr. PERKINS] has concluded?

There was no objection.

Mr. PERKINS. Mr. Chairman, I rise in support of the committee amendment and against the amendment offered by the gentleman from New Jersey [Mr. WIDNALL], because I believe the amendment offered by the gentleman from New Jersey will discriminate against the areas that have had chronic unemployment for many years. I believe that areas like eastern Pennsylvania, West Virginia, eastern Kentucky, and hundreds of mining communities that need assistance the worst will be completely eliminated under the amendment offered by the gentleman from New Jersey. And I will tell you why I make that observation.

Down in the district that I am privileged to represent in eastern Kentucky we have about 120,000 nonagricultural workers, and out of this number we have about 45,000 unemployed. This means that for every three men working in the region, more than one person is unemployed. Now I have in mind one of the small coal-producing counties where we have every rail mine in the county closed down. The communities are very small. The income of three out of every four families in this county is less than $2,000. There are 2,000 families in this particular county with an income of $700. But for the welfare programs, veterans' pensions, and liberalization of our social security law, many of these communities would have less purchasing power than they had during the depression in the thirties. The amendment of the gentleman from New Jersey would delete the $100 million figure in the committee bill for rural areas. This particular county that I have reference to, in my judgment, under the Widnall substitute, would be classified as a rural

community and therefore be excluded from consideration. It would only provide assistance in the larger cities. I personally believe that his amendment is discriminatory against some of the most needy areas in the whole country.

The same would hold true for dozens of communities, mining communities in eastern Kentucky that would be classified as rural. They would be classified as rural and you would delete from the committee bill the $100 million put in there for rural purposes and the $75 million in grants. The grant provision is badly needed in these communities where we have a dilapidated tax base.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield.

Mr. WIDNALL. What assurance has the gentleman that these communities he is describing would receive assistance under the committee bill? We were unable to obtain any information as to who would be helped, the type of projects, how anybody would receive one job. This is the purpose of the $500,000 for the study I have in my bill.

Mr. PERKINS. Yes; the gentleman provides for another study, but he deletes all the funds for the rural counties. The committee bill defines in no uncertain terms, which the gentleman's amendment does not, the rural counties that can qualify, and it sets out the criteria. There are 40 counties in Kentucky alone that would receive no assistance and would be excluded under this amendment.

Mr. WIDNALL. The gentleman has not answered my question. What assurance does the gentleman have that these counties would qualify?

Mr. PERKINS. I have no assurance other than studying the gentleman's amendment and the committee bill, and the criteria on which the committee bill qualifies these counties.

Mr. EDMONDSON. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from Oklahoma.

Mr. EDMONDSON. The gentleman certainly has two assurances about this bill. In the first place, he knows that the Secretary of Commerce has testified he is willing to do all in his power to make it work for the rural areas as well as the urban areas. In the second place, he knows with absolute assurance that there is nothing for the rural areas in the Widnall substitute. The only chance for the rural areas is under the committee bill. The gentleman from Kentucky who has been one of the most effective champions of area redevelopment in the Congress is to be commended on his fine statement today.

Mr. PERKINS. I thank the gentleman from Oklahoma.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. PERKINS. I yield to the gentleman from New York.

Mr. MULTER. There is the further assurance of the Secretary of Agriculture in the testimony that they will have the help of his administration to work this out.

Mr. PERKINS. I am interested in the grant provision of the committee bill which has been knocked out of the gentleman's substitute. In eastern Kentucky and West Virginia there are dozens of mining communities that cannot even maintain their city governments today. The rail mines have collapsed, more unemployment in the coal fields than ever. We must have assistance and we must have it at the Federal level in the way of grants when they do not have the means to borrow money.

The proposal of the administration in the committee bill provides $75 million in grants to help these communities build plants and public facilities needed to service them such as water and sewer systems and roads. Where the community does not have the credit to borrow ample funds for these improvements, the Government certainly should provide grants.

I am hopeful that the committee bill will prevail and the Widnall amendment will be voted down.

The CHAIRMAN. The Chair recognizes the gentleman from Oklahoma [Mr. EDMONDSON].

Mr. EDMONDSON. Mr. Chairman, if there is anyone here who has any doubt at all in his mind about the need of the farming communities for this program and about the support of the organizations that speak for the farmers of America, I would appreciate your attention for just a minute.

In the committee hearings you will find at page 148 a strong statement by the head of the Rural Electric Cooperative Association for the country expressing the strong support of the rural electric cooperatives for this committee measure with the rural areas in it.

At page 177 you will find a strong statement by a spokesman for the National Farmers Union in which he expresses the strong support of the Farmers Union for this legislation with the rural areas in it.

At page 603 you will find another strong statement, one of the best made before the committee, by the assistant legislative counsel for the Grange, in which the Grange points out that there are approximately a million farm families in America with an annual income of less than $1,000 to subsist the entire family. The Grange is strongly in favor of this legislation with the farm areas in it.

Finally, at page 1 of the hearings you will find a letter from our Chief Executive, the President of the United States, in which he points out the need for this program and says that we need it both for rural and urban areas. He then tells the Congress of the United States:

> I believe it is essential that we enact this legislation at the earliest possible date. It will constitute a major effort to revive and redevelop communities which have too long been handicapped.

Let us adopt the committee bill.

Let us give the President the tools to do the job.

The CHAIRMAN. The Chair recognizes the gentleman from Iowa [Mr. GROSS].

Mr. GROSS. Mr. Chairman, perhaps, I can help out on the rural part of this program about which there has been so much question. If I may have the attention of the gentleman from Texas [Mr. PATMAN], I understand from reading the hearings, it is entirely possible under this bill, with respect to the rural provision, to spend money for the establishment of shooting preserves, fishing ponds, recreational facilities, and so on and so forth; am I correct?

Mr. PATMAN. You are incorrect.

Mr. GROSS. Well, now, just a minute. This is my time you are laughing on. On page 63 of the hearings, Mr. REUSS, of Wisconsin says:

> And am I on the right track in suggesting that the possibilities under the proposed act include game farms, places where city people, for a fee, could go to hunt; fishing facilities such as trout or bass ponds where city people could get some sport fishing for a fee; campsites and resorts?

And so on.

And Secretary Freeman said:

> All of that, I think, would be potentially possible.

Mr. PATMAN. Mr. Chairman, will the gentleman from Iowa yield to the gentleman from Wisconsin [Mr. REUSS] to answer the question.

Mr. GROSS. I am happy to yield to the gentleman.

Mr. REUSS. That question was asked and the answer was as you described it. However, all of these things are possibilities——

Mr. GROSS. Just a minute. You have answered the question.

Mr. REUSS. Will the gentleman let me finish?

Mr GROSS. I have only 2 minutes and I have not had a minute up to now on this bill.

Mr. REUSS. If you do not want to hear the answer, you do not have to.

Mr. GROSS. You gave the answer—it is here in the record. I wanted to be sure the authority is still in the bill. Now, I suppose, it is entirely possible to build dance pavilions for square dancing and bowling alleys for farmers or city people who want to go out and bowl in the country and other things of that nature; is that correct?

The CHAIRMAN. The Chair recognizes the gentleman from New York [Mr. MULTER].

Mr. MULTER. Mr. Chairman, I repeat what was said a few moments ago by the distinguished gentleman from Alabama [Mr. RAINS]. The adoption of this amendment, the Widnall substitute, guts the bill. Those who want to meet the issue as to whether we do or do not do anything for these depressed areas ought to meet that issue forthrightly and not by gutting the bill by means of this substitute amendment. The substitute amendment will not do the job that needs to be done and which needs to be done badly. Time is running out and it is running out fast. The thing for us to do is to vote down the Widnall amendment and to adopt the bill, as it was brought to us by the committee, and then go to work and get this job done that needs doing so badly both for the depressed areas in the urban communities as well as in the rural communities. We have not put into this bill a provision for rural com-

munities in order to get the farm vote. It was put in because the Secretary of Agriculture and our colleagues, representatives from the farm areas, have come in and told us they need this kind of bill as much as the cities need it. We want this bill, Mr. Chairman, for the United States of America and not for any particular section of the country. I urge my colleagues to vote down the Widnall substitute and then approve the committee amendment.

The CHAIRMAN. The Chair recognizes the gentleman from Illinois [Mr. DERWINSKI].

Mr. DERWINSKI. Mr. Chairman, we are debating the amendment offered by the gentleman from New Jersey. It is quite obvious, however, and I am sure the gentlemen on the majority side will agree that the skids are greased. You are convincingly going to defeat this amendment and in accordance with the dictates of the administration, you are going to jam this bill through the House. However, let me point out a few things for the benefit of those of you who are going to make this mistake. Incidentally, I sympathize with you, realizing that intense pressure from the executive branch of Government forces many to vote against their own personal convictions.

First of all, honesty dictates that you withdraw your phony charges that the Widnall amendment is gutting the bill. Please look at the facts and figures for once. Here is what the facts are. Under the Widnall amendment, we are providing an extra $50 million to industrial plant loans. Furthermore, we are adding more than 100 percent to the occupational training fund, which is really the program you need in the depressed areas.

Furthermore, I would like to make a prediction for the benefit of those of you who are sitting there whipped into line.

I would like to predict that within a year you will admit your error in having voted for this bill for this basic reason, that it is an administrative monstrosity. Your own Secretary of Agriculture, your own Secretary of Commerce, or whoever else is saddled with the responsibility of administration will find that he cannot possibly administer this program.

But what is even more important, you are destroying any confidence that the people in the depressed areas may have in this type of legislation. You are going to have so many people hanging onto the coattails of this $394 million that you will not be able to do a thing for them. It is an absolute impossibility, and your own solution a year from now will be to request billions of dollars to perpetuate this completely inconsistent bill. Mr. Chairman, Members, please accept the Widnall amendment. It has some merit. Your administration bill is a fraud perpetuated at the expense of the American taxpayers, and, as I have indicated, citizens in depressed areas who are deluded by your false statements. I would like to say one last word in conclusion. Referring specifically to the rural area section of this bill you will probably wind up by training Mexican migrant workers for use in industrial operations. There is nothing in the bill to prevent this development. The language is so vague as to make it a blank check for the executive branch of Government to run wild with this appropriation.

The CHAIRMAN. The Chair recognizes the gentleman from West Virginia [Mr. BAILEY].

Mr. BAILEY. Mr. Chairman, in the minute or two allotted to me I would like to call attention to the growing tendency to impose upon this House this legislative farce that we are witnessing here on most of the major bills that have been presented. If we continue to practice "legislative piracy" you might just as well abolish the standing committees. A committee hears witnesses, takes maybe months or weeks considering legislation, then writes a bill and brings it to the floor. Overnight there is a combination set up and we have this legislative farce that destroys the work of the standing committees. You might just as well abolish them. The Widnall substitute would kill this legislation, not improve it.

I expect it to be the business of this House to carry out the recommendations of the committee.

The CHAIRMAN. The Chair recognizes the genteman from Texas [Mr. ALGER].

Mr. ALGER. Mr. Chairman, this bill, the substitute bill, and the committee bill, are not workable for the simple reason that they are unconstitutional. But it seems we are getting used to doing things unconstitutionally. It seems to me many times what we are doing is violating not just the language of the Constitution but the wisdom of those who believed in the private enterprise system.

Read the language on page 44 of the committee and the substitute bill, if you will. There is the same specified intent starting in line 18. This spells out complete Federal planning, regimentation, and control of industry. No bill will work that seeks to do these things, not the substitute bill, and least of all the committee bill.

Furthermore, on top of page 45 we find:

> And that under the provisions of this act new development opportunities should be created by developing and expanding new and existing facilities and resources.

Here we are spending the tax dollars and providing less employment. Money must be provided to run this program. You are taking it away from taxpayers under the guise of relieving unemployment. Actually you are adding to the cost burdens of industry that will result in more unemployment. I think we should be against both bills for the harm they do to the private enterprise system. Instead of taxing the people more we should tax them less.

The CHAIRMAN. The Chair recognizes the gentleman from California [Mr. ROOSEVELT].

Mr. ROOSEVELT. Mr. Chairman, I am strongly in favor of this bill. The program recognizes the need of attacking unemployment in all sections of our country. It perhaps for the first time, attacks the need for retraining many workers due to economic changes, including automation, on the farm and in the city. It should be noted that the bill is only a first step. The responsibility for good administration is large. If successful it should serve as a guidepost for revival of many hard-hit areas and provide a way to prevent such steep valleys of depression sometimes even in a period of general prosperity, as now dot our national map. The success of this program can, and we must hope will be, an example of a successful remedy of the ills of a free country within the legitimate powers of freedom, and with due regard to the immense value of each citizen.

The CHAIRMAN. The Chair recognizes the gentleman from Pennsylvania [Mr. VAN ZANDT].

Mr. VAN ZANDT. Mr. Chairman, I rise in opposition to the substitute. First, I think the House should understand that even though we have had no support for the committee bill from this side of the aisle there are a lot of us over here who are going to vote against the substitute and for the committee bill on final passage. Secondly, since 1954 we have been considering area redevelopment legislation, and many of us have listened over and over again to compromise and substitute bills. In my opinion these compromises and substitutes have been offered not only to delay consideration but to likewise kill area redevelopment legislation.

I recall the pocket veto of a bill some few years ago and the veto of last year, and frankly I apologized to the many unemployed residents of my district for the vetoes, and especially the one of last year.

Mr. Chairman, I am in the well of this House today asking support for the committee bill, because I feel the bill is a step in the right direction toward solving the nasty economic problem of these areas of chronic unemployment.

Mr. SAYLOR. Mr. Chairman, will the gentleman yield?

Mr. VAN ZANDT. I yield to the gentleman from Pennsylvania.

Mr. SAYLOR. I would like to join the gentleman in his statement. I am getting sick and tired of compromises. Let us stand for the committee bill and see what it will do.

Mr. VAN ZANDT. May I say in conclusion that the Congress since beginning has taken good care of the problems of certain segments of our population. This is proven by the billions of dollars spent on the farmer's problem, for relief from disasters, airport needs, flood control, and so forth. Today we have areas of depressions in our midst with thousands of good Americans unemployed. And through the committee bill Congress has an opportunity to extend a helping hand in our efforts to alleviate these distressing conditions.

Mr. Chairman, as my colleague the gentleman from Pennsylvania [Mr. SAYLOR] stated a moment ago, "let us stand for the committee bill and see what it will do."

The CHAIRMAN. The Chair recognizes the gentleman from North Carolina [Mr. COOLEY].

(By unanimous consent, the time of Mr. MONTOYA was given to Mr. COOLEY.)

Mr. COOLEY. Mr. Chairman, I speak to you not as chairman of the House Committee on Agriculture. I speak to you only as a humble Member of this House, trying as best I can to represent a great congressional district.

I am intensely interested in the welfare of our farmers and I am likewise intensely interested in the welfare of all of the people of my district, State, and Nation. The pending substitute is an insult to those who live in the rural areas of our great Nation. The author of the substitute offers only a token to those who live and labor on the farms of the Nation. Under the substitute, all of the relief, aid, and assistance will go to those who live in the great cities of our country. The substitute provides only a meager half million dollars for the purpose of conducting a study in the rural areas of the Nation.

Can we be unmindful of the fact that hundreds of thousands, even millions of persons who have lived and labored on the farms of the Nation have been driven off the land and into the cities to look for jobs which are not there available to them. A lot of the unemployment in these distressed areas has resulted from the great exodus from the farms of those who could no longer survive even by laboring in the flourishing fields of our country.

The substitute provides no hope for the people who remain on the farms and who are underemployed. It is difficult for me to understand how anyone interested in the welfare and future of our citizens who live in rural America could possibly vote for the substitute now under consideration.

In the committee bill there is at least some hope for those who have faithfully tilled our soil and have produced the great abundance which has blessed our Nation. The money provided by the proposals now under consideration is only "a drop in the bucket." We are told that we are "sowing seed." I am willing to accept this suggestion and to believe that we are sowing seed from which we may hereafter reap a rich harvest. If this is true, our efforts here today will not be in vain.

I am against the substitute and I urge all of my colleagues to vote against the substitute. I shall vote for the committee bill and I urge all of my colleagues to vote for the committee bill.

This is the first opportunity I have had to publicly congratulate and to commend the great President of our great Nation for having appointed a distinguished citizen of my grand State of North Carolina to high office. The manhood, the courage, and the patriotism of this whole Nation stood ready to serve our beloved President and to cooperate with him in his efforts to bring prosperity to our Nation and peace to the world. After considering the qualifications of a multitude of men, our President exercised great wisdom and selected a very distinguished North Carolinian to serve in his Cabinet as Secretary of Commerce. Naturally, all loyal North Carolinians were delighted because the former distinguished Governor of our State was selected by the President to serve as his Secretary of Commerce. Governor Luther H. Hodges served the people of our State well and faithfully for 6 long years. His magnificent record is written on the hearts and minds of our people and he has already proven himself to be a worthy member of the President's Cabinet. He is my personal friend. I respect and trust him, and I am perfectly willing to entrust into his hands the administration of the great program contemplated by the legislation under consideration. I know that with dignity and impartiality, and with fairness to all areas concerned, he will administer the law we are about to enact. I again appeal to my colleagues to vote down the pending substitute and to vote for the committee bill.

I am very glad that the distinguished gentleman from Oklahoma [Mr. EDMONDSON], made the very splendid and brief speech we have just heard. He emphasized very effectively and very eloquently many of the reasons we should vote against this pending substitute.

I am in complete accord with the views expressed by our distinguished and beloved colleague from West Virginia [Mr. BAILEY].

The committee bill might not be perfect, my record in Congress might not be perfect, and I doubt very much if the record of any of you could in all respects be considered perfect, but this committee bill is at least a short step in the right direction. We must do something to improve the plight of our distressed citizens in the many distressed areas of America. We have provided many billions of dollars to relieve the distress of the suffering people of many of the disturbed and unhappy areas of the world, and now we are just about to provide a little relief for American citizens who are devoted to the institutions of freedom, and who will for all times to come despise all of the concepts of communism. I appeal to all of you, and especially to those of you who are interested in the welfare of rural America, to vote down the pending substitute and to vote for the committee bill on final passage.

The CHAIRMAN. The Chair recognizes the gentleman from Montana [Mr. BATTIN].

Mr. BATTIN. Mr. Chairman, I ask unanimous consent to yield my time to the gentleman from Michigan [Mr. HARVEY].

The CHAIRMAN. Is there objection to the request of the gentleman from Montana?

There was no objection.

The CHAIRMAN. The Chair recognizes the gentleman from Michigan [Mr. HARVEY].

Mr. HARVEY of Michigan. Mr. Chairman, I speak in favor of the Widnall amendment. I would like to also answer the gentleman from Alabama and the gentleman from North Carolina. The gentleman from Alabama had this to say: He inferred that we were trying to take away the vote-getting power of this bill. I say to you if section 5(b) providing for rural development areas was the vote-getting power in this bill, maybe it illustrates why we feel it was put in this bill, for vote-getting purposes.

Now, in regard to these rural areas, we have heard a lot said about underemployment. But, I thought when we started out that this bill was to help the unemployed and that it was those in the distressed areas that we were trying to help. Now, that is what the Widnall bill would do.

Now, as to the gentleman from North Carolina, I would just like to quote Secretary Freeman when he says himself that he would like to come back in a year. On page 72 of the hearings, when he was asked by Mr. SCRANTON:

> Have you any suggestion as to what could be done to make it more pinpointed since it already apparently includes almost every low-level income area in the United States?

Mr. Freeman said:

> No, I think after a year's experience with this we would be better able to do it; we could try. At this point, really, I wouldn't feel prepared to make any public recommendations languagewise.

Now, are we going to hand over that $300 million and let him do with it just what he wants to do? That is just exactly what you are doing in the administration bill. I challenge anybody on the committee to point out where these rural development areas will be located, how many there will be, how large they will be. No one knows. Not even Mr. Freeman. Then I would like to answer the charge that there is no duplication in section 7 of this bill in regard to lending facilities. I say to you that just this morning I had my administrative assistant call the Communities Facilities Administration, and he was advised that there is now between $45 and $50 million uncommitted on hand.

I have in my hand a Thermo-Fax copy of a Housing and Home Finance Agency letter dated February 23, in which that Agency is just begging communities to borrow money. They state that it is now wide open for borrowing and will allow them to build any kind of public works program that they want:

> Other policies which in the past restricted public facility loans to water, sewer, and gas projects have also been changed to provide financing for all types of public works, except schools, which the community is interested in placing under immediate construction.

So, I submit that we already have an existing agency to lend money for public facilities. The Widnall amendment is a far superior bill and will do more both in industrial loans and retraining, the two important features, than S. 1, the administration bill.

The CHAIRMAN. The Chair recognizes the gentleman from Missouri [Mr. JONES].

Mr. JONES of Missouri. Mr. Chairman, I am opposed to the substitute. However, I am not committed to this bill. My apprehension about this legislation is the fact that we have not considered what has caused these depressed areas and the necessity for redevelopment.

As many of you perhaps did, I saw a television program some time ago de-

picting the depressed area in Cairo, Ill. It was supposed to be an example of what this bill could correct. Being a neighbor of that part of the country, I can say that the film did not present in any way the cause of the depression there, where they lost some 3,000 population in the last 10 years; where they had lost 4 large industries; where people had moved out of the community. I will say that in many communities like that the people have not lived up to their responsibilities in law enforcement to keep out the gangs, goons, and the hoodlums and people like that who create an unsavory atmosphere unpleasant for the operation of any kind of legitimate industry. And, until the various communities which are losing some of these industries act accordingly—I am not referring to the coal sections or places like that where the demand is going down, but I am referring to communities where the facilities exist, where the factory buildings are now ample, where they already have the community facilities—those communities will never make a comeback until we have a change on the part of the people in those communities which will make them accept their responsibilities.

I also want to say that the reason I am reluctant to support the committee bill and am opposed to the substitute is that we have other agencies available, the Community Facilities Agency, the Housing and Home Finance Administration, the Small Business Administration, and others, all of which have demonstrated their ability to do most of the things which are proposed to be done by this legislation, but which in my opinion will result only in the waste of millions of dollars.

The CHAIRMAN. The Chair recognizes the gentleman from Texas [Mr. PATMAN] to close debate.

Mr. PATMAN. Mr. Chairman, we have heard criticism about other agencies being permitted to do much of this work under the present law. The committee was very careful in writing this bill, and I just want to read you the language in section 24:

Whenever possible in carrying out the provisions of this act the Secretary shall use the available services and facilities of other agencies and instrumentalities of the Federal Government, but only with their consent and on a reimbursable basis. The foregoing requirement shall be implemented by the Secretary in such a manner as to avoid the duplication of existing staffs and facilities in any agency or instrumentality of the Federal Government.

This bill has been carefully written. We believe it safeguards the taxpayers. We believe it is in the interest of the country.

Mr. Chairman, I ask for a vote.

The CHAIRMAN. The time of the gentleman from Texas [Mr. PATMAN] has expired. All time has expired.

The question is on the amendment offered by the gentleman from New Jersey [Mr. WIDNALL].

The question was taken; and the Chair announced that the "noes" appeared to have it.

Mr. WIDNALL. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chairman appointed as tellers Mr. WIDNALL and Mr. PATMAN.

The Committee divided and the tellers reported that there were—ayes 139, noes 242.

So the substitute amendment was rejected.

Mr. HOFFMAN of Michigan. Mr. Chairman, I move to strike out the last word.

Mr. HOFFMAN of Michigan. Earlier the gentleman from Pennsylvania [Mr. VAN ZANDT], and there is no more able or patriotic Representative in the House—and we recall when he left this Chamber to go to the combat zone in the South Pacific and serve where there was fighting but, perhaps, he was a little excited when he suggested that the motive of those of us who sometimes voted for a substitute or to recommit was an unworthy one. (He may strike his statements from the RECORD.)

This bill does not carry a new purpose. We had a somewhat similar purpose in 1937 and again in 1945, and the purpose seems to be, as stated by this professor from Yale who said:

If we go through and establish that as a national policy, that at any time the worker who is willing and anxious to work and cannot find private employment immediately, should be given immediately the opportunity to work on some kind of public works at virtually full normal wages, then this country is unquestionably headed for a complete totalitarian economic economy with a dictator running it.

Then he added:

That is not a matter of opinion. That is a matter of history. From way back in ancient Chinese history up to the present time this idea that the government should be responsible at all times for providing normal employment for every citizen has come out. It has been tried again and again and always ends up in the same result, namely, that the government gradually takes over more and more of the economic life of the country, and finally becomes a complete totalitarian economic state with a dictator at the head of it. (From testimony of Hudson G. Hastings, professor of economics, Yale University, October 24, 1945, before House Committee on Expenditures in the Executive Departments, on Full Employment Act of 1945, 79th Cong., 1st sess., p. 670.)

To keep the record absolutely clear, permit me to state that at least in my judgment, there is not a Member of this House who is not sympathetic toward those who are unemployed provided they want to work and most of them do. No one here wants anyone to suffer, to be hungry, without proper clothing or shelter. Unfortunately, all unemployment cannot be avoided.

Nations have been trying to solve the unemployment situation. To date have not succeeded.

Later in 1945, our then Secretary of Agriculture was up before the committee.

The Secretary gave us his estimate of the then unemployment situation, which was as follows:

	Alexander Hamilton Institute	Robert R. Nathan (President's Committee on Employment Security)	National Industrial Conference Board, New York City	American Federation of Labor	Congress of Industrial Organizations
1934	13,528,000	11,469,000	11,544,000	13,382,000	12,669,000
1935	12,659,000	10,485,000	11,234,000	11,695,000	11,741,000
1936	11,454,000	9,688,000	9,434,000	10,952,000	11,620,000
1937	9,250,000	8,076,000	7,574,000	9,241,000	9,751,000
1938	11,809,000	10,265,000	10,328,000	10,926,000	11,714,000
1939	11,552,000	11,029,000	10,012,000	11,369,000	12,323,000

The Nation and the States spent billions in the effort to give everyone a job, and, from the record, are these figures:

Public expenditures for assistance and work-program earnings, 1934–39—Federal, State, and local[1]

[In thousands of dollars]

Year	Amount and source of funds			
	Total	Federal funds	State funds	Local funds
1934	1,779,313	1,348,572	176,433	254,308
1935	1,871,315	1,372,389	242,974	255,952
1936	2,505,303	1,938,550	336,239	230,514
1937	2,173,580	1,543,895	396,073	233,612
1938	2,827,300	2,060,300	495,582	271,418
1939	2,638,869	1,831,466	531,430	275,973

[1] Excludes expenditures for the Civilian Conservation Corps, the National Youth Administration, the Public Works Administration, and regular Federal construction projects.

Source: "Trends in Financing Public Aid, 1930–41," p. 251, Social Security Yearbook, 1941.

Secretary of Labor Schwellenbach, who participated in that program, said this:

Furthermore, it must be recognized that we are making efforts toward full employment. We have been for a long, long time through various pieces of legislation creating such things as the NRA, the CWA, the PWA, the WPA.

We tried it and we failed. Now, we all want to do something for the unemployed areas, but there is no use in trying to keep people like the miners in West Virginia, at artificial levels or rather in an area where there can be no economically sound industry. You remember how some tried to keep wages up by levying a tax of 40 cents a ton over a number of years on all the coal mined?

Distressed areas exist sometimes because natural resources have been exhausted. Sometimes because the cost of production has grown higher than purchasing power. Sometimes because of overproduction. Sometimes because of progress—automation. And it is far better, experience has shown, to trust readjustment to the law of supply and demand than it is to attempt artificially to create jobs.

Perhaps if we give private industry a chance by reducing the tax load and in other ways by letting them operate their

own business when and where they would as long as they do not harm all of us, instead of trying as we are today to install the Federal Government as boss and dictator or permit labor union officials to determine when and where a plant may be built and how large it shall be. If we are going to turn that over to organizations interested in just one thing, increasing wages and better working conditions, we are not going to get anywhere.

I cannot vote for this bill. It will neither lessen unemployment nor stabilize industry. It is a form of "share the wealth program." An interference with natural orderly development in our country.

Mr. PATMAN. Mr. Chairman, I ask unanimous consent that the further reading of the bill be dispensed with, that it be printed in the RECORD at this point and that it be subject to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

(The remainder of the bill reads as follows:)

DECLARATION OF PURPOSE

SEC. 2. The Congress declares that the maintenance of the national economy at a high level is vital to the best interests of the United States, but that some of our communities are suffering substantial and persistent unemployment and underemployment; that such unemployment and underemployment cause hardship to many individuals and their families and detract from the national welfare by wasting vital human resources; that to overcome this problem the Federal Government, in cooperation with the States, should help areas of substantial and persistent unemployment and underemployment to take effective steps in planning and financing their economic redevelopment; that Federal assistance to communities, industries, enterprises, and individuals in areas needing redevelopment should enable such areas to achieve lasting improvement and enhance the domestic prosperity by the establishment of stable and diversified local economies and improved local living conditions; and that under the provisions of this Act new employment opportunities should be created by developing and expanding new and existing facilities and resources.

AREA REDEVELOPMENT ADMINISTRATOR

SEC. 3. There shall be appointed by the President, by and with the advice and consent of the Senate, an Area Redevelopment Administrator in the Department of Commerce who shall receive compensation at a rate equal to that received by Assistant Secretaries of Commerce. The Administrator shall perform such duties in the execution of this Act as the Secretary of Commerce (hereinafter referred to as the "Secretary") may assign.

ADVISORY POLICY BOARD

SEC. 4. (a) To advise the Secretary in the performance of functions authorized by this Act, there is created an Area Redevelopment Advisory Policy Board (hereinafter referred to as the "Board"), which shall consist of the following members, all ex officio: the Secretary as Chairman; the Secretaries of Agriculture; Health, Education, and Welfare; Interior; Labor; and Treasury; and the Administrators of the Housing and Home Finance Agency and the Small Business Administration. The Chairman may from time to time invite the participation of officials of other agencies of the executive branch interested in the functions herein authorized. Each member of the Board may designate an officer of his agency to act for him as a member of the Board with respect to any matter there considered.

(b) The Secretary shall appoint a National Public Advisory Committee on Area Redevelopment which shall consist of twenty-five members and shall be composed of representatives of labor, management, agriculture, State and local governments, and the public in general. From the members appointed to such Committee the Secretary shall designate a Chairman. Such Committee, or any duly established subcommittee thereof, shall from time to time make recommendations to the Secretary relative to the carrying out of his duties under this Act. Such Committee shall hold not less than two meetings during each calendar year.

(c) The Secretary is authorized from time to time to call together and confer with any persons, including representatives of labor, management, agriculture, and government, who can assist in meeting the problems of unemployment or underemployment in the several areas designated by the Secretary as redevelopment areas.

REDEVELOPMENT AREAS

SEC. 5. (a) The Secretary shall designate as "redevelopment areas" those areas within the United States in which he determines, upon the basis of standards generally comparable with those set forth in paragraphs (1) and (2), that there has existed substantial and persistent unemployment for an extended period of time. There shall be included among the areas so designated any area—

(1) where the Secretary of Labor finds that the rate of unemployment, excluding unemployment due primarily to temporary or seasonal factors, is currently 6 per centum or more and has averaged at least 6 per centum for the qualifying time periods specified in paragraph (2); and

(2) where the Secretary of Labor finds that the annual average rate of unemployment has been at least—

(A) 50 per centum above the national average for three of the preceding four calendar years, or

(B) 75 per centum above the national average for two of the preceding three calendar years, or

(C) 100 per centum above the national average for one of the preceding two calendar years.

The Secretary of Labor shall find the facts and provide the data to be used by the Secretary in making the determinations required by this subsection.

(b) The Secretary shall also designate as "redevelopment areas" those areas (including Indian reservations) within the United States which do not meet the requirements set forth in subsection (a) but which he determines are among the highest in numbers and percentages of low-income families, and in which there exists a condition of substantial and persistent unemployment or underdevelopment. In making the designations under this subsection, the Secretary shall consider, among other relevant factors, the number of low-income farm families in the various rural areas of the United States, the proportion that such low-income families are of the total farm families of each of such areas, the relationship of the income levels of the families in each such area to the general levels of income in the United States, the current and prospective employment opportunities in each such area, the availability of manpower in each such area for supplemental employment, the extent of migration out of the area, and the proportion of the population of each such area which has been receiving public assistance from the Federal Government or from the State or States in which such area is located or from any municipality therein. In making these determinations the Secretary shall be guided, but not conclusively governed, by pertinent studies made, and information and data collected or compiled, by (1) departments, agencies, and instrumentalities of the Federal Government, (2) State and local governments, (3) universities and land-grant colleges, and (4) private organizations.

(c) Upon the request of the Secretary, the Secretary of Labor, the Secretary of Agriculture, the Secretary of the Interior, and such other heads of agencies as may be appropriate are authorized to conduct such special studies, obtain such information, and compile and furnish to the Secretary such data as the Secretary may deem necessary or proper to enable him to make the determinations provided for in subsection (b) of this section. The Secretary shall reimburse when appropriate, out of any funds appropriated to carry out the purposes of this Act, the foregoing officers for any expenditures incurred by them under this section.

(d) As used in this Act, the term "redevelopment area" refers to any area within the United States which has been designated by the Secretary as a redevelopment area.

LOANS AND PARTICIPATIONS

SEC. 6. (a) The Secretary is authorized to purchase evidences of indebtedness and to make loans (which for purposes of this section shall include participations in loans) to aid in financing any project within a redevelopment area for the purchase or development of land and facilities (including, in exceptional cases, machinery and equipment) for industrial or commercial usage, including the construction of new buildings, the rehabilitation of abandoned or unoccupied buildings, and the alteration, conversion, or enlargement of existing buildings. Such financial assistance shall not be extended for working capital, or to assist establishments relocating, totally or partially, from one area to another.

(b) Financial assistance under this section shall be on such terms and conditions as the Secretary determines, subject, however, to the following restrictions and limitations:

(1) The total amount of loans (including purchased evidences of indebtedness) outstanding at any one time under this section (A) with respect to projects in redevelopment areas designated under section 5(a) shall not exceed $100,000,000 and (B) with respect to projects in redevelopment areas designated under section 5(b) shall not exceed $100,000,000.

(2) Such assistance shall be extended only to applicants, both private and public (including Indian tribes), approved for such assistance by the State (or any agency or instrumentality thereof concerned with problems of economic development) in which the project to be financed is or will be located.

(3) The project for which financial assistance is sought must be reasonably calculated to provide more than a temporary alleviation of unemployment or underemployment within the redevelopment area wherein it is, or will be, located.

(4) No such assistance shall be extended hereunder unless the financial assistance applied for is not otherwise available from private lenders or other Federal agencies on reasonable terms.

(5) The Secretary shall not make any loan without a participation unless he determines that the loan cannot be made on a participation basis.

(6) No evidences of indebtedness shall be purchased and no loans shall be made unless it is determined that there is a reasonable assurance of repayment.

(7) Subject to section 12(5) of this Act, no loan, including renewals or extension thereof, may be made hereunder for a period exceeding twenty-five years and no evidences

of indebtedness maturing more than twenty-five years from date of purchase may be purchased hereunder: *Provided*, That the foregoing restrictions on maturities shall not apply to securities or obligations received by the Secretary as a claimant in bankruptcy or equitable reorganization or as a creditor in other proceedings attendant upon insolvency of the obligor.

(8) Loans made and evidences of indebtedness purchased under this section shall bear interest at a rate equal to the rate of interest paid by the Secretary on funds obtained from the Secretary of the Treasury as provided in section 9(d)(1) of this Act, plus one-half of 1 per centum per annum to cover administrative expenses and to provide for losses on loans made and evidences of indebtedness purchased under this section.

(9) Such assistance shall not exceed 65 per centum of the aggregate cost to the applicant (excluding all other Federal aid in connection with the undertaking) of acquiring or developing land and facilities (including, in exceptional cases, machinery, and equipment), and of constructing, altering, converting, rehabilitating, or enlarging the building or buildings of the particular project, and shall, among others, be on the condition that—

(A) other funds are available in an amount which, together with the assistance provided hereunder, shall be sufficient to pay such aggregate cost;

(B) not less than 10 per centum of such aggregate cost be supplied by the State or any agency, instrumentality, or political subdivision thereof, or by a community or area organization which is nongovernmental in character, as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal financial assistance;

(C) in extending financial assistance under this section with respect to a redevelopment area, the Secretary shall require that not less than 5 per centum of the aggregate cost of the project for which such assistance is extended shall be supplied by nongovernmental sources as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal financial assistance; and

(D) to the extent the Secretary finds such action necessary to encourage financial participation in a particular project by other lenders and investors, and except as otherwise provided in subparagraphs (B) and (C), any Federal financial assistance extended under this section may be repayable only after other loans made in connection with such project have been repaid in full, and the security, if any, for such Federal financial assistance may be subordinate and inferior to the lien or liens securing other loans made in connection with the same project.

(10) No such assistance shall be extended unless there shall be submitted to and approved by the Secretary an overall program for the economic development of the area and a finding by the State, or any agency, instrumentality, or local political subdivision thereof, that the project for which financial assistance is sought is consistent with such program: *Provided*, That nothing in this Act shall authorize financial assistance for any project prohibited by laws of the State or local political subdivision in which the project would be located.

LOANS FOR PUBLIC FACILITIES

SEC. 7. (a) Upon the application of any State, or political subdivision thereof, Indian tribe, or private or public nonprofit organization or association representing any redevelopment area or part thereof, the Secretary is authorized to make loans to assist in financing the purchase or development of land for public facility usage, and the construction, rehabilitation, alteration, expansion, or improvement of public facilities, within a redevelopment area, if he finds that—

(1) the project for which financial assistance is sought will tend to improve the opportunities, in the redevelopment area where such project is or will be located, for the successful establishment or expansion of industrial or commercial plants or facilities which will provide more than a temporary alleviation of unemployment or underemployment in such area;

(2) the funds requested for such project are not otherwise available on reasonable terms;

(3) the amount of the loan plus the amount of other available funds for such project are adequate to insure the completion thereof;

(4) there is a reasonable expectation of repayment; and

(5) such area has an approved economic development program as provided in section 6(b)(10) and the project for which financial assistance is sought is consistent with such program.

(b) Subject to section 12(5), the maturity date of any such loan shall be not later than forty years after the date such loan is made. Any such loan shall bear interest at a rate equal to the rate of interest paid by the Secretary on funds obtained from the Secretary of the Treasury as provided in section 9(d)(2) of this Act, plus one-quarter of 1 per centum per annum.

(c) The total amount of loans outstanding at any one time under this section shall not exceed $100,000,000.

(d) No financial assistance shall be extended under this section with respect to any public facility which would compete with an existing privately owned public utility rendering a service to the public at rates or charges subject to regulation by a State regulatory body, unless the State regulatory body determines that in the area to be served by the public facility for which the financial assistance is to be extended there is a need for an increase in such service (taking into consideration reasonably foreseeable future needs) which the existing public utility is not able to meet through its existing facilities or through an expansion which it is prepared to undertake.

GRANTS FOR PUBLIC FACILITIES

SEC. 8. (a) Upon the application of any State, or political subdivision thereof, Indian tribe, or private or public nonprofit organization or association representing any redevelopment area or part thereof, the Secretary is authorized to make grants for land acquisition or development for public facility usage, and the construction, rehabilitation, alteration, expansion, or improvement of public facilities, within a redevelopment area, if he finds that—

(1) the project for which financial assistance is sought will tend to improve the opportunities, in the redevelopment area where such project is or will be located, for the successful establishment or expansion of industrial or commercial plants or facilities which will provide more than a temporary alleviation of unemployment or underemployment in such area;

(2) the entity requesting the grant proposes to contribute to the cost of the project for which such grant is requested in proportion to its ability so to contribute;

(3) the project for which a grant is requested will fulfill a pressing need of the area, or part thereof, in which it is, or will be, located, and there is little probability that such project can be undertaken without the asistance of a grant under this section; and

(4) the area for which a project is to be undertaken has an approved economic development program as provided in section 6(b)(10), and such project is consistent with such program.

The amount of any grant under this section for any such project shall not exceed 65 per centum of the difference between the funds which can be practicably obtained from loans (including a loan under section 7 of this Act) and from other Federal sources for such project, and the amount which is necessary to insure the completion thereof.

(b) The Secretary shall by regulation provide for the supervision of projects with respect to which grants are made under this section so as to insure that Federal funds are not wasted or dissipated.

(c) No financial assistance shall be extended under this section with respect to any public facility which would compete with an existing privately owned public utility rendering a service to the public at rates or charges subject to regulation by a State regulatory body, unless the State regulatory body determines that in the area to be served by the public facility for which the financial assistance is to be extended there is a need for an increase in such service (taking into consideration reasonably foreseeable future needs) which the existing public utility is not able to meet through its existing facilities or through an expansion which it is prepared to undertake.

(d) There is hereby authorized to be appropriated not to exceed $75,000,000 for the purpose of making grants under this section.

AREA REDEVELOPMENT FUND

SEC. 9. (a) There is hereby established in the Treasury of the United States an area redevelopment fund (hereinafter referred to as the "fund"), which shall be available to the Secretary for the purpose of extending financial assistance under sections 6 and 7 and for the payment of all obligations and expenditures arising therefrom.

(b) When requested by the Secretary, advances shall be made to the fund from the appropriations made therefor. There is hereby authorized to be appropriated for the purpose of making advances to the fund, without fiscal year limitation, an amount not exceeding $300,000,000.

(c) Receipts arising from the programs of assistance under sections 6 and 7 shall be credited to the fund. Any moneys in the fund determined by the Secretary to be in excess of current needs shall be credited to the appropriation from which advanced to be held for future advances to the fund.

(d) There shall be paid into miscellaneous receipts of the Treasury at the close of each fiscal year—

(1) interest, on advances made to the fund for use in extending financial assistance under section 6, at rates which shall be determined by the Secretary of the Treasury at the time the advances or commitments for advances are made after taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to loans made by the Secretary under section 6; and

(2) interest, on advances made to the fund for use in extending financial assistance under section 7, at rates which shall be determined by the Secretary of the Treasury at the time the advances or commitments for advances are made but which shall not be more than the higher of (A) 2½ per centum per annum or (B) the average annual interest rate on all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year next preceding the making of such advances or commitments and adjusted to the nearest one-eighth of 1 per centum.

(e) The fund shall contribute to the civil service retirement and disability fund a sum as provided by section 4(a) of the Civil Service Retirement Act (5 U.S.C. 2254(a)), except that such sum shall be determined by applying to the total basic salaries (as defined in that Act) paid to employees performing activities authorized under sections 6 and 7 of this Act and covered by that Act the per centum rate determined annually by the Civil Service Commission to be the excess of the total normal cost per centum rate of the civil service retirement system over the employee deduction rate specified in such section 4(a). The funds shall also pay into the Treasury as miscellaneous receipts that portion of the cost of administration of the civil service retirement and disability fund attributable to employees performing activities authorized under sections 6 and 7 of this Act, as determined by the Civil Service Commission.

(f) In the performance of and with respect to the functions, powers, and duties vested in him by sections 6 and 7 of this Act, the Secretary shall—

(1) prepare annually and submit a budget program in accordance with the provisions of sections 102, 103, and 104 of the Government Corporation Control Act, as amended; and

(2) determine the character of and the necessity for obligations and expenditures and the manner in which they shall be incurred, allowed, and paid, subject to provisions of law specifically applicable to Government corporations.

INFORMATION

SEC. 10. The Secretary shall aid redevelopment areas and other areas by furnishing to interested individuals, communities, industries, and enterprises within such areas any assistance, technical information, market research, or other forms of assistance, information, or advice which are obtainable from the various departments, agencies, and instrumentalities of the Federal Government and which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment within such areas. The Secretary shall furnish the procurement divisions of the various departments, agencies, and other instrumentalities of the Federal Government with a list containing the names and addresses of business firms which are located in redevelopment areas and which are desirous of obtaining Government contracts for the furnishing of supplies or services, and designating the supplies and services such firms are engaged in providing.

TECHNICAL ASSISTANCE

SEC. 11. In carrying out his duties under this Act the Secretary is authorized to provide technical assistance which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment (1) to areas which he has designated as redevelopment areas under this Act, and (2) to other areas which he finds have substantial need for such assistance. Such assistance shall include studies evaluating the needs of, and developing potentialities for, economic growth of such areas. Such assistance may be provided by the Secretary through members of his staff or through the employment of private individuals, partnerships, firms, corporations, or suitable institutions, under contracts entered into for such purposes. Appropriations are hereby authorized for the purposes of this section in an amount not to exceed $4,500,000 annually.

POWERS OF SECRETARY

SEC. 12. In performing his duties under this Act, the Secretary is authorized to—

(1) adopt, alter, and use a seal, which shall be judicially noticed;

(2) hold such hearings, sit and act at such times and places, and take such testimony, as he may deem advisable;

(3) request directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality information, suggestions, estimates, and statistics needed to carry out the purposes of this Act; and each department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary;

(4) under regulations prescribed by him, assign or sell at public or private sale, or otherwise dispose of for cash or credit, in his discretion and upon such terms and conditions and for such consideration as he shall determine to be reasonable, any evidence of debt, contract, claim, personal property, or security assigned to or held by him in connection with loans made or evidences of indebtedness purchased under this Act, and collect or compromise all obligations assigned to or held by him in connection with such loans or evidences of indebtedness until such time as such obligations may be referred to the Attorney General for suit or collection;

(5) further extend the maturity of or renew any loan made or evidence of indebtedness purchased under this Act, beyond the periods stated in such loan or evidence of indebtedness or in this Act, for additional periods not to exceed ten years, if such extension or renewal will aid in the orderly liquidation of such loan or evidence of indebtedness;

(6) deal with, complete, renovate, improve, modernize, insure, rent, or sell for cash or credit, upon such terms and conditions and for such consideration as he shall determine to be reasonable, any real or personal property conveyed to, or otherwise acquired by, him in connection with loans made or evidences of indebtedness purchased under this Act;

(7) pursue to final collection, by way of compromise or other administrative action, prior to reference to the Attorney General, all claims against third parties assigned to him in connection with loans made or evidences of indebtedness purchased under this Act. This shall include authority to obtain deficiency judgments or otherwise in the case of mortgages assigned to the Secretary. Section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), shall not apply to any contract of hazard insurance or to any purchase or contract for services or supplies on account of property obtained by the Secretary as a result of loans made or evidences of indebtedness purchased under this Act if the premium therefor or the amount thereof does not exceed $1,000. The power to convey and to execute, in the name of the Secretary deeds of conveyance, deeds of release, assignments and satisfactions of mortgages, and any other written instrument relating to real or personal property or any interest therein acquired by the Secretary pursuant to the provisions of this Act may be exercised by the Secretary or by any officer or agent appointed by him for that purpose without the execution of any express delegation of power or power of attorney;

(8) acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized in sections 6 and 7 of this Act;

(9) in addition to any powers, functions, privileges, and immunities otherwise vested in him, take any and all actions, including the procurement of the services of attorneys by contract, determined by him to be necessary or desirable in making, purchasing, servicing, compromising, modifying, liquidating, or otherwise administratively dealing with or realizing on loans made or evidences of indebtedness purchased under this Act;

(10) to such an extent as he finds necessary to carry out the provisions of this Act, procure the temporary (not in excess of six months) service of experts or consultants or organizations thereof, including stenographic reporting services, by contract or appointment, and in such cases such service shall be without regard to the civil service and classification laws, and, except in the case of stenographic reporting services by organizations, without regard to section 3709 of the Revised Statutes (41 U.S.C. 5); any individual so employed may be compensated at a rate not in excess of $75 per diem, and, while such individual is away from his home or regular place of business, he may be allowed transportation and not to exceed $15 per diem in lieu of subsistence and other expenses;

(11) sue and be sued in any court of record of a State having general jurisdiction or in any United States district court, and jurisdiction is conferred upon such district court to determine such controversies without regard to the amount in controversy; but no attachment, injunction, garnishment, or other similar process, mesne or final, shall be issued against the Secretary or his property. Nothing herein shall be construed to except the activities under this Act from the application of sections 507(b) and 2679 of title 28, United States Code, and of section 367 of the Revised Statutes (5 U.S.C. 316); and

(12) establish such rules, regulations, and procedures as he may deem appropriate in carrying out the provisions of this Act.

TERMINATION OF ELIGIBILITY FOR FURTHER ASSISTANCE

SEC. 13. Whenever the Secretary shall determine that employment conditions within any area previously designated by him as a redevelopment area have changed to such an extent that such area is no longer eligible for such designation under section 5 of this Act, no further assistance shall be granted under this Act with respect to such area and, for the purposes of this Act, such area shall not be considered a redevelopment area: *Provided*, That nothing contained herein shall (1) prevent any such area from again being designated a redevelopment area under section 5 of this Act if the Secretary determines it to be eligible under such section, or (2) affect the validity of any contracts or undertakings with respect to such area which were entered into pursuant to this Act prior to a determination by the Secretary that such area no longer qualifies as a redevelopment area. The Secretary shall keep the departments and agencies of the Federal Government, and interested State or local agencies, advised at all times of any changes made hereunder with respect to the designation of any area.

URBAN RENEWAL

SEC. 14. Title I of the Housing Act of 1949, as amended, is amended by adding at the end thereof the following new section:

"REDEVELOPMENT AREAS UNDER THE AREA REDEVELOPMENT ACT

"SEC. 113. (a) Whenever the Secretary of Commerce certifies to the Administrator (1) that any county, city, or other municipality (in this section referred to as a 'municipality') is situated in an area designated under section 5 of the Area Redevelopment Act as a redevelopment area, and (2) that there is a reasonable probability that with assistance provided under such Act and other undertakings the area will be able to achieve more than temporary improvement in its economy, the Administrator is authorized to provide financial assistance to a local public agency in any such municipality under this title and the provisions of this section.

"(b) Subject to the provisions of subsection (e) of this section, the Administrator may provide such financial assistance under this section without regard to the requirement or limitations of section 110(c) that the project area be predominantly residential

in character or be redeveloped for predominantly residential uses under the urban renewal plan, and without regard to any of the limitations of that section on the undertaking of projects for predominantly nonresidential uses.

"(c) Notwithstanding any other provision of this title, a contract for financial assistance under this section may include provisions permitting the disposition of any land in the project area designated under the urban renewal plan for industrial or commercial uses to any public agency or nonprofit corporation for subsequent disposition as promptly as practicable by such public agency or corporation for the redevelopment of the land in accordance with the urban renewal plan: *Provided*, That any disposition of such land to such public agency or corporation under this section shall be made at its fair value for uses in accordance with the urban renewal plan: *And provided further*, That only the purchaser from or lessees of such public agency or corporation, and their assignees, shall be required to assume the obligations relating to the commencement of improvements imposed under section 105(b) hereof.

"(d) Following the execution of any contract for financial assistance under this section with respect to any project, the Administrator may exercise the authority vested in him under this section for the completion of such projects, notwithstanding any determination made after the execution of such contract that the area in which the project is located is no longer a redevelopment area under the Area Redevelopment Act.

"(e) Not more than 10 per centum of the funds authorized for capital grants under section 103 after the date of the enactment of the Area Redevelopment Act shall be used for the purpose of providing financial assistance under this section. Amounts used for such purpose shall not be taken into account for the purpose of the limitation contained in the second proviso of the fifth sentence of section 110(c)."

URBAN PLANNING GRANTS

SEC. 15. Paragraph (3) of section 701(a) of the Housing Act of 1954 is amended by inserting after "counties which" the following: "(A) are situated in areas designated by the Secretary of Commerce under section 5(a) of the Area Redevelopment Act as redevelopment areas or (B)".

OCCUPATIONAL TRAINING

SEC. 16. (a) The Secretary of Labor is authorized, upon request and whenever he determines such studies are needed, to undertake, or to provide assistance to others for, studies of the size, characteristics, skills, adaptability, occupational potentialities, and related aspects of the labor force of any redevelopment area.

(b) When a redevelopment area has an approved economic development program as provided in section 6(b)(10), the Secretary of Labor, in consultation with the Secretary and the Secretary of Agriculture, shall determine the occupational training or retraining needs of unemployed and underemployed individuals residing in the redevelopment area. The Secretary of Labor shall notify the Secretary of Health, Education, and Welfare of the occupational training or retraining requirements of the area, and shall provide for the orderly selection and referral of those unemployed or underemployed individuals residing in the area who can reasonably be expected to obtain employment as a result of the skill they will acquire in the training which is to be made available. The Secretary of Labor shall cooperate with the Secretary of Health, Education, and Welfare and with existing State and local agencies and officials in charge of existing programs relating to vocational training and retraining for the purpose of assuring that the facilities and services of such agencies are made fully available to such individuals.

(c) Whenever the Secretary of Labor finds that additional facilities or services are needed in the area to meet the occupational training or retraining needs of such individuals, he shall so advise the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare shall provide assistance, including financial assistance when necessary, to the appropriate State vocational educational agency in the provision of such additional facilities or services. If the Secretary of Health, Education, and Welfare finds that the State vocational educational agency is unable to provide the facilities and services needed, he may, after consultation with such agency, provide for the same by agreement or contract with public or private educational institutions.

(d) The Secretary of Labor shall arrange to provide any necessary assistance for setting up apprenticeships, and to promote journeyman and other on-the-job training.

(e) There are hereby authorized to be appropriated such sums, not in excess of $4,500,000 annually, as may be necessary to carry out the provisions of this section.

RETRAINING SUBSISTENCE PAYMENTS

SEC. 17. (a) The Secretary of Labor in consultation with the Secretary and the Secretary of Agriculture may, on behalf of the United States, enter into agreements with States in which redevelopment areas are located, under which the Secretary of Labor shall make payments to such States either in advance or by way of reimbursement for the purpose of enabling such States, as agents of the United States, to make weekly retraining payments to unemployed or underemployed individuals residing within such redevelopment areas who are certified by the Secretary of Labor to be undergoing occupational training or retraining under section 16 of this Act. Such payments shall be made for a period not exceeding sixteen weeks, and the amount of any such payment for any week shall not exceed the amount of the average weekly unemployment compensation payment (including allowances for dependents) payable for a week of total unemployment in the State making such payments.

(b) No weekly retraining payment shall be made to any person otherwise eligible who, with respect to the week for which such payment would be made, has received or is seeking unemployment compensation under title XV of the Social Security Act or any other Federal or any State unemployment compensation law, but if the appropriate State or Federal agency finally determines that a person denied benefits for any week because of this subsection was not entitled to unemployment compensation under title XV of the Social Security Act or such Federal or State law with respect to such week, this subsection shall not apply with respect to such week.

(c) Any agreement under this section may contain provisions (including, so far as may be appropriate, provisions authorized or made applicable with respect to agreements concluded by the Secretary of Labor pursuant to title XV of the Social Security Act) as will promote effective administration, protect the United States against loss, and insure the proper application of payments made to the State under such agreement. Except as may be provided in such agreements, or in the rules and regulations prescribed pursuant to subsection (d) of this section, determinations by any duly designated officer or agency as to the eligibility of individuals for weekly retraining payments under this section shall be final and conclusive for any purposes and not subject to review by any court or any other officer.

(d) The Secretary of Labor and the Secretary shall jointly prescribe such rules and regulations as they may deem necessary to carry out the provisions of this section.

(e) There are hereby authorized to be appropriated such sums, not in excess of $10,000,000 annually, as may be necessary to carry out the provisions of this section.

PENALTIES

SEC. 18. (a) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any financial assistance under section 6, 7, or 8, or any extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Secretary, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

(b) Whoever, being connected in any capacity with the Secretary, in the administration of this Act (1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to him or pledged or otherwise entrusted to him, or (2) with intent to defraud the Secretary or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner, makes any false entry in any book, report, or statement of or to the Secretary, or without being duly authorized draws any order or issues, puts forth, or assigns any note, debenture, bond, or other obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof, or (3) with intent to defraud participates or shares in or receives directly or indirectly any money, profit, property, or benefit through any transaction, loan, grant, commission, contract, or any other act of the Secretary, or (4) gives any unauthorized information concerning any future action or plan of the Secretary which might affect the value of securities, or having such knowledge invests or speculates, directly or indirectly, in the securities or property of any company or corporation receiving loans, grants, or other assistance from the Secretary, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

EMPLOYMENT OF EXPEDITERS AND ADMINISTRATIVE EMPLOYEES

SEC. 19. No financial assistance shall be extended by the Secretary under section 6, 7, or 8 to any business enterprise unless the owners, partners, or officers of such business enterprise (1) certify to the Secretary the names of any attorneys, agents, and other persons engaged by or on behalf of such business enterprise for the purpose of expediting applications made to the Secretary for assistance of any sort, under this Act, and the fees paid or to be paid to any such person; and (2) execute an agreement binding such business enterprise, for a period of two years after such assistance is rendered by the Secretary to such business enterprise, to refrain from employing, tendering any office or employment to, or retaining for professional services, any person who, on the date such assistance or any part thereof was rendered, or within one year prior thereto, shall have served as an officer, attorney, agent, or employee, occupying a position or engaging in activities which the Secretary shall have determined involve discretion with respect to the granting of assistance under this Act.

RECORD OF APPLICATIONS

SEC. 20. The Secretary shall maintain as a permanent part of the records of the Department of Commerce a list of applications

approved for financial assistance under section 6, 7, or 8, which shall be kept available for public inspection during the regular business hours of the Department of Commerce. The following information shall be posted in such list as soon as each application is approved: (1) the name of the applicant and, in the case of corporate applications, the names of the officers and directors thereof, (2) the amount and duration of the loan or grant for which application is made, (3) the purposes for which the proceeds of the loan or grant are to be used, and (4) a general description of the security offered in the case of a loan.

PREVAILING RATE OF WAGE AND FORTY-HOUR WEEK

SEC. 21. All laborers and mechanics employed by contractors or subcontractors on projects assisted by the Secretary under this Act and undertaken by public applicants shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a–5), and every such employee shall receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in any workweek in excess of eight hours in any workday or forty hours in the workweek, as the case may be. The Secretary shall not extend any financial assistance under section 6, 7, or 8 for such a project without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this provision, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z–15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948, as amended; 40 U.S.C. 276c).

ANNUAL REPORT

SEC. 22. The Secretary shall make a comprehensive and detailed annual report to the Congress of his operations under this Act for each fiscal year beginning with the fiscal year ending June 30, 1962. Such report shall be printed and shall be transmitted to the Congress not later than January 3 of the year following the fiscal year with respect to which such report is made. Such report shall show, among other things, (1) the number and size of Government contracts for the furnishing of supplies and services placed with business enterprises located in redevelopment areas, and (2) the amount and duration of employment resulting from such contracts. Upon the request of the Secretary, the various departments and agencies of the Government engaged in the procurement of supplies and services shall furnish to the Secretary such information as may be necessary for the purposes of this section.

APPROPRIATIONS

SEC. 23. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

USE OF OTHER FACILITIES

SEC. 24. (a) Whenever possible in carrying out the provisions of this Act the Secretary shall use the available services and facilities of other agencies and instrumentalities of the Federal Government, but only with their consent and on a reimbursable basis. The foregoing requirement shall be implemented by the Secretary in such a manner as to avoid the duplication of existing staffs and facilities in any agency or instrumentality of the Federal Government. The Secretary is authorized to delegate to the heads of other departments and agencies of the Federal Government any of the Secretary's functions, powers, and duties under this Act as he may deem appropriate, and to authorize the redelegation of such functions, powers, and duties by the heads of such departments and agencies.

(b) Departments and agencies of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carrying out the objectives of this Act. This Act shall be supplemental to any existing authority, and nothing herein shall be deemed to be restrictive of any existing powers, duties, and functions of any other department or agency of the Federal Government.

(c) Funds authorized to be appropriated under this Act may be transferred, with the approval of the Director of the Bureau of the Budget, between departments and agencies of the Government, if such funds are used for the purposes for which they are specifically authorized and appropriated.

(d) Subject to the standards and procedures prescribed by section 505 of the Classification Act of 1949, as amended, the head of any agency, for the performance of functions under this Act, including functions delegated pursuant to subsection (a), may place positions in grades 16, 17, and 18 of the General Schedule established by such Act, and such positions shall be in addition to the number of such positions authorized by section 505 of the Classification Act of 1949, as amended, to be placed in such grades: *Provided*, That not to exceed a total of fifteen such positions may be placed in such grades under this subsection, to be apportioned among the agencies by the Secretary, with the approval of the Director of the Bureau of the Budget.

RECORDS AND AUDIT

SEC. 25. (a) Each recipient of assistance under section 6, 7, or 8 of this Act shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 6, 7, or 8 of this Act.

LOANS TO STATE AND LOCAL DEVELOPMENT COMPANIES

SEC. 26. Section 502 of the Small Business Investment Act of 1958 is amended by striking out paragraph (6).

STUDY BY SECRETARY

SEC. 27. The Secretary shall make a study of the feasibility of establishing procedures to provide for increased use of military bases, and Government-owned plants and facilities for the manufacture or production of munitions and other supplies for the Government, which are located in areas designated under section 5 of this Act as redevelopment areas and which are not fully utilized, whenever such use is consistent with the national defense, economy in Government operation, and other Government procurement objectives. Upon the completion of such study the Secretary shall submit to the Congress a report of his findings together with such recommendations for legislative and other action as he may deem appropriate.

APPLICATION OF ACT

SEC. 28. As used in this Act, the terms "State", "States", and "United States" include the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

Mr. GROSS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, one of the prime reasons for this legislation, if there is a reason for it, is the flood of imports from foreign countries. Yet it is strange that in this House today and yesterday we have heard very few Members point to that fact as one of the reasons for the bill.

This bill is in the nature of providing compensatory payments to those injured by imports. The free traders and leaders of the New Frontier also call it "administrative adjustment." That is what this bill is about. In large measure it is to take up the slack caused by foreign imports and their impact upon American industry, agriculture, and labor.

I wish every Member of Congress could have seen the display in the Congressional Hotel of shoes imported into this country, made by 16-cent-an-hour labor in Hong Kong and 26-cent-an-hour labor in Japan flooding the markets of this country. The cheap labor of Italy and several other countries also makes its contribution to our troubles.

One of the Members spoke of Gloversville, N.Y. What is wrong with Gloversville, N.Y.? The markets of this country are flooded with knit gloves and mittens from Italy, Japan, and Hong Kong.

Mr. STRATTON. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield.

Mr. STRATTON. I certainly agree with the gentleman with respect to the problem of foreign imports, and this bill we have here today is the first piece of legislation which we have had presented to us in an effort to meet the problem of areas hurt by imports.

Mr. GROSS. Yes, it is a New Frontier administrative adjustment bill, compensatory payments from the Federal Treasury to relieve a situation brought about by foreign imports.

I do not like to ride the buses in the District of Columbia and be confronted with advertisements urging people to "buy Polish hams." We in Iowa have hams to sell to American working men and women.

Mr. STRATTON. Mr. Chairman, will the gentleman yield again?

Mr. GROSS. I yield to the gentleman from New York.

Mr. STRATTON. I may say to the gentleman in respect to the legislation to which he refers, that no one has supported such legislation more vigorously than I have; but I do feel that if national policies are going to hurt certain areas because of imports, then the National Government has a distinct obligation to help those areas, as this bill does.

Mr. GROSS. The gentleman from West Virginia supports this bill but says nothing or practically nothing today about the oil coming in from Venezuela, the residual oil that is displacing coal and the jobs of miners. The New Frontier Secretary of the Interior hardly got his chair warm before he increased the

residual oil coming into this country. So you come in here today loading on all the taxpayers another $400 million to take up the slack for foreign imports.

Mr. MULTER. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I wish the gentleman one day would vote against some of these imports.

Mr. MULTER. I was going to ask the gentleman if he has any alternative to the present bill.

Mr. GROSS. You bet your life I have an alternative for it.

Mr. MULTER. What is it?

Mr. GROSS. A tariff representing the differential in costs of production as between the workingmen of this country and the workingmen of foreign countries. That is your answer.

Mr. MULTER. Is that the only alternative to a bill of this kind to help Americans who need help?

Mr. GROSS. Does the gentleman know of any more effective way to help the workingmen of this Nation, industry, and the farmers than to preserve the American market for their products?

Mr. MULTER. That is what we are trying to do with this bill.

Mr. GROSS. You are not doing anything of the sort. You are raiding the taxpayers under this piece of hodge-podge legislation. Nobody knows what it will do. Question after question has been asked this afternoon and no answers given. Sure, go out and build fishponds and duck-shooting preserves. I suppose that next you will want Congress to furnish the unemployed miners of West Virginia and Pennsylvania with ammunition and shotguns so they can go out and shoot ducks.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. GROSS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. GROSS moves that the Committee do now rise and report the bill back to the House with the recommendation that the enacting clause be stricken out.

Mr. GROSS. Mr. Chairman, may I say that I did not support the substitute that was offered a moment ago. I opposed the substitute and I am opposed to this bill. The substitute was just a little less worse than the committee bill; that is all.

Mr. HIESTAND. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from California.

Mr. HIESTAND. I congratulate the gentleman from Iowa for taking the position he has toward examining the causes of this alleged unemployment in a great many places. There are eight other major causes. I have looked in vain to find what the committee has done to correct any one of those causes. They have simply adopted the symptoms of the disease rather than the causes.

Mr. GROSS. All we are dealing with today is effects, and not causes. It is the same story all over again.

Mr. WIDNALL. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from New Jersey.

Mr. WIDNALL. Did not the gentleman refer incorrectly to this bill as a hodge-podge bill? Should it not be called the Hodges-podge bill?

Mr. GROSS. Call it what you want. Let us be fair to the taxpayers, and let us be fair to ourselves. Let us deal with causes and not with effects.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. What is the gentleman talking about, a share-the-wealth program?

Mr. GROSS. A sharing of the taxpayer bill.

Mr. PELLY. Mr. Chairman, will the gentleman yield?

Mr. GROSS. I yield to the gentleman from Washington.

Mr. PELLY. I hope that the gentleman is serious in offering this preferential motion because I shall be glad to vote for it.

The CHAIRMAN. The question is on the motion offered by the gentleman from Iowa [Mr. GROSS].

The motion was rejected.

Mr. HALPERN. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HALPERN, of New York: Page 45 before the period in line 4, insert the following: "rather than by merely transferring employment opportunities from one area of the United States to another."

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. HALPERN. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, I have discussed the amendment with the Members on our side, and we are willing to accept the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. HALPERN].

The amendment was agreed to.

Mr. HALPERN. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HALPERN. Mr. Chairman, this antipirating amendment leaves no question as to the intent of this legislation to prevent the raiding of industry from one area of the United States to another. By this amendment the intent is clearly spelled out in the bill's declaration of purpose.

As commendable as the principles of this bill may be, I feel it is necessary to further clarify it in order to safeguard the pirating of industry. I expressed my concern about this problem in my additional views in House Report No. 186 on the bill.

I am concerned that S. 1 as reported does not contain in its declaration of purpose language to effectively prevent the raiding of industries in some areas which could conceivably cause an economic setback in current thriving communities. I am not convinced that the language of the bill as reported is sufficient to protect against the migration or pirating of industries from established areas into distressed ones. I recognize that it would be exceedingly difficult to write an ironclad provision into the bill preventing such shifts in the location of industries. I feel, however, that the relevant provisions in S. 1 can be tightened, and more definite standards prescribed for its administration. This can be established once and for all by setting forth the antipirating principle in the declaration of purpose.

Nowhere in the declaration of purpose of this bill is mention made of the intent of Congress to guard against the pirating of industry or the runaway shop. That is why I offered this amendment. Under the bill as it now reads, the declaration of purpose in section 2, on page 45, lines 2 to 4, states that "and that under the provisions of this act new employment opportunities should be created by developing and expanding new and existing facilities and resources."

I believe that the words "expanding new and existing facilities and resources" do not sufficiently stress the legislative intent that this bill is not designed merely to transfer employment opportunities from one area of the United States to another.

My amendment to the preamble would add the words: "rather than by merely transferring employment opportunities from one area of the United States to another." This addition would stress in clear and forceful terms the intent of Congress.

Such clarification would provide clear and specific guidelines to the administrators of the bill; it would emphasize the creation of new opportunities and economic growth; and it would discourage the raiding of developed areas.

It is obvious that heavily productive communities could be affected under such standards and particularly large cities such as my own city of New York. Mr. Chairman, the purpose of this amendment is to make clear that this process shall not occur and that funds shall not be used under the act to lure industries from developed communities with a consequent creation of unemployment there.

Mr. MULTER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MULTER: On page 79, line 10, strike out "Whenever possible" and insert "To the fullest extent practicable".

Mr. MULTER. Mr. Chairman, this amendment is suggested by the Secretary of Commerce. I have discussed it with the chairman of the committee and the ranking minority member, and I understand it is acceptable to the committee.

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. MULTER. I yield to the gentleman from Texas.

Mr. PATMAN. We are willing to accept it on this side.

Mr. WIDNALL. That was in my substitute bill, and we accept it.

Mr. MULTER. In support of the amendment, permit me to read the letter dated March 24, 1961, to the distinguished chairman of the House Banking and Currency Committee from the Honorable Robert E. Giles, General Counsel for the Department of Commerce, as follows:

THE GENERAL COUNSEL OF COMMERCE,
Washington, D.C., March 24, 1961.

HON. BRENT SPENCE,
Chairman, Committee on Banking and Currency, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: In reporting out S. 1 to provide a Federal program to assist areas of substantial and persistent unemployment, the Committee on Banking and Currency changed the first sentence of section 24 relating to use by the Secretary of Commerce of existing facilities of other Federal agencies to read as follows:

"Whenever possible in carrying out the provisions of this act the Secretary shall use the available services and facilities of other agencies and instrumentalities of the Federal Government, but only with their consent and on a reimbursable basis. The foregoing requirement shall be implemented by the Secretary in such a manner as to avoid the duplication of existing staffs and facilities in any agency or instrumentality of the Federal Government."

This change caused us concern because the phrase "whenever possible," when read comparatively with the phrase "to the extent practicable" in the sentence which was replaced, created a legislative history which might be interpreted as compelling a delegation when in fact such an action would be impracticable or unwise.

In discussing with Representative A. J. MULTER of the committee this change in S. 1 as reported, he suggested substitution of the phrase "to the fullest extent practicable" for the phrase "whenever possible" as not having the undesirable compelling implication which might be found in the committee provision. The Department of Commerce concurs in this suggestion of Representative MULTER, and urges that the phrase "to the fullest extent practicable" be inserted in lieu of the phrase "whenever possible."

As the record shows, Secretary Hodges testified before the committees of both Houses as to his purpose of using existing organizations engaged in activities closely related to the proposed program and thus avoid duplication and unwarranted expense entailed in setting up new staffs when they are not needed.

Sincerely yours,

ROBERT E. GILES,
General Counsel.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. MULTER].

The amendment was agreed to.

Mr. STRATTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. STRATTON: On pages 81 and 82 strike out section 27 and insert in lieu thereof the following:

"STUDY BY SECRETARY

"SEC. 27. Whenever the Department of Defense announces plans to deactivate or is in the process of deactivating any permanent military installation or mjor unit thereof and such installation is situated in an area in which the rate of unemployment is 6 per centum or more, the Secretary shall, upon the request of the Governor or Governors of the State or States in which the area is located, institute a study to determine the economic effects of the action which has been or is to be taken. In determining the economic effects of such action, the Secretary shall, among other relevant matters, consider and make findings with respect to the approximate amount of money which has been, or may reasonably be expected to be, saved by any department or agency of the Government as a result of such action, compared with—

"'(1) the approximate costs or losses which have been, or may reasonably be expected to be, incurred by other departments or agencies of the Government, or by State and local governmental units, as a result of such action;

"'(2) the approximate losses which have been, or may reasonably be expected to be, incurred by private interests as a result of such action in connection with any facilities which they have provided to serve the needs of any such installation and which would otherwise have to be provided in whole or in part by the Government;

"'(3) the approximate cost to the Government of relocating any such installation in the event that such installation has been or will be relocated; and

"'(4) the approximate cost to the Government of reactivating, in a national emergency or other contingency, any such installation with respect to which any such action is proposed to be taken.

Any such study shall be conducted as expeditiously as practicable, and the findings resulting therefrom shall be transmitted by the Secretary to the Secretary of Defense and to the Congress.'"

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. STRATTON. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, the committee bill has a similar provision. I have discussed this question with the chairman of the Committee on Armed Services, the gentleman from Georgia [Mr. VINSON], and after these discussions I am prepared to accept the gentleman's amendment in lieu of the similar provision in the committee bill.

Mr. STRATTON. Mr. Chairman, I am grateful for the support which the distinguished gentleman from Texas [Mr. PATMAN], chairman of the subcommittee, has given to my amendment and also for the support of the distinguished chairman of my own Committee on Armed Services, the distinguished gentleman from Georgia [Mr. VINSON].

This is the amendment to which I referred in general debate a moment ago. It is an amendment designed to insure that on the basic issue of unemployment the right hand of our Government will know what the left hand is doing, and attempt to coordinate with it.

S. 1 is legislation designed to deal with the problem of unemployment. I am sure that the overwhelming majority of the Members of this House feel that there is an urgent need for us to do something to alleviate the suffering being caused around the Nation by unemployment, particularly in areas which are critically and chronically affected. In fact, action to relieve unemployment has been one of the central objectives of this administration, and it has also been one of the central objectives of this Congress, as is amply demonstrated by the No. 1 given to this legislation in the other body.

But Mr. Chairman, as was made abundantly clear only yesterday in the President's special message on the Defense Department budget, action has been taken or will soon be taken in many areas of our country by one important agency of this Government which will seriously aggravate the whole problem of unemployment we are trying to alleviate in this bill. Whether we like it or not, the Department of Defense is one of the major employers in the Nation, employing not only men and women in uniform but also vast numbers of civilian men and women as well. Any major reduction in defense operations is bound to have important consequences on local and national unemployment, particularly where these installations represent a major part of the overall employment in the area. Any serious reduction or disestablishment of a major defense installation in an area of serious unemployment, in other words, can turn this area into an unemployment disaster area or into a redevelopment area as defined by this bill virtually overnight. We ought to try not to let this happen.

On yesterday the President's message announced the fact that in the near future, perhaps within the next 24 hours, would come an announcement of the deactivation of some 73 military installations here and abroad. I have no way of knowing which installations are included on this list, of course, but I am sure that every Member of this House who represents a district in which some military installation is located recognizes what the drastic reduction or the complete closedown of the installation of his district could mean in terms of added unemployment in his area.

Does it make sense for us to pass a bill today authorizing the appropriation of hundreds of millions of dollars to aid unemployment, and at the same time say or do nothing about actions being taken by some other agency of Government which could seriously aggravate the unemployment problem?

There has been talk in the Air Force, for example, in my home State of New York, of closing down the Air Materiel Area at the Griffiss Air Force Base in Rome, commonly referred to as Roama, with a consequent loss of 6,200 jobs. Fortunately, in response to pleas of members of the New York State congressional delegation on both sides of the aisle, the Air Force has now agreed to defer any final decision on this projected closedown, as my distinguished colleague and friend, the gentleman from New York [Mr. PIRNIE], has already mentioned in the general debate, for at least 6 months. But it is already clear what the devastating economic impact of this decision, if it should eventually be taken by the Air Force, would be. The Utica-Rome area is already an area of major unemployment. The loss of 6,200 jobs, a very substantial percentage of the total employment of the whole area, would turn this community, which has been struggling for years to combat unemployment, overnight into a major disaster area.

Surely there is something which can and should be done to try to prevent this sort of a development. Surely the

decisions of the Defense Department cannot be considered completely in a vacuum, without any regard for their impact on the civilian economy of the Nation we are addressing ourselves to here. Surely it is not asking too much to ask that the actions of one agency of Government should be considered in the light of policies and programs being followed by other agencies. Surely there must be some overall coordination even in a Government as huge and as unwieldy as our own.

Of course, Mr. Chairman, it would not be in order under the rules, in the case of a bill which deals with unemployment areas and places certain obligations and responsibilities upon the Secretary of Commerce, to offer an amendment which would direct certain actions on the part of the Department of Defense or the Secretary of Defense. Such an amendment would not be germane to the bill, although perhaps the most direct way to deal with this serious problem would be with legislation of that kind. But the amendment which I am offering is directed only to the Secretary of Commerce and to the subject with which this legislation specifically deals. It is, as a matter of fact, very similar to an amendment offered in the other body the other day by the distinguished junior Senator from Louisiana, Mr. LONG, and which failed of adoption there, according to my information, by only a very narrow margin, and after it had been perfected and improved in its form as a result of rather general discussion in the other body over a period of 2 days.

Mr. Chairman, the present wording of section 27 of S. 1 is in my judgment not really adequate to meet the situation to which I have been referring. In particular, it deals to facilities or bases which have already been phased out or which are not now being fully utilized, whereas the big problem which will be facing most of our districts is the problem of preventing the increased impact on unemployment that will be caused by the closing of the 73 bases to which the President has referred, as well as other closings which may well be coming along in the future. For this reason, I am offering my amendment as a substitute to section 27.

Briefly, my amendment would call on the Secretary of Commerce, whenever the Defense Department announces plans to deactivate a military installation or whenever it is in the process of deactivating a military installation in an area which is suffering from serious unemployment, defined as 6-percent unemployment or more, to look into the overall economic consequences of this action. Under my amendment this study would not be made frivolously or even automatically, but only upon application by the Governor or Governors of the State or States directly affected by the closedown. The Secretary of Commerce would be authorized to look specifically into all of the costs to the Government involved in these deactivations, whether a full base or a major part of a base, as in the case of the Air Materiel Area at Rome, N.Y. The Secretary would examine, for example, what additional costs might be incurred by other branches of the Federal Government and by local governments, costs such as the relocation of families, defaulting on FHA mortgages, increased outflow of unemployment compensation, costs of moving equipment and families, and costs of retraining new workers. This study, with all of these economic facts set forth and with a full description of the impact on the local economy, and with appropriate recommendations, would then be made available to the Congress and also to the Secretary of Defense.

My amendment cannot properly go beyond that in this legislation, because in this bill we cannot of course direct the Secretary of Defense to do anything. But the economic information developed by the Secretary of Commerce under my amendment would, I am sure, have tremendous impact on the final decision reached in the Defense Department. Surely it would be difficult for the Department to proceed if the facts of a closedown motivated by economy proved to involve greater overall expenses, or if the impact on unemployment was tremendously severe. The spotlight of publicity in this case, in other words, would serve as a great moral if not a legal persuader.

Mr. Chairman, I believe my amendment represents the very least that we in this House can do to insure that whatever actions may be taken by the Defense Department in the next few months will, insofar as humanly possible, not be taken in such a way as to aggravate the total unemployment problem to which this very important legislation is addressed. Unless the jobs which we are attempting to create in this legislation through the front door are effectively prevented from slipping rapidly away out the back door, we will not have accomplished what we hope to accomplish in passing the committee bill.

Mr Chairman, I urge the adoption of my amendment.

Mr. RYAN. Mr. Chairman, I urge the Members of this House to support this amendment to S. 1.

This amendment is a sound approach to a very serious problem. When the armed services builds a military installation in an area, many people from the area and from outside the area depend upon the continuance of the installation for their livelihood. Private industry invests large sums of money in business which services the installation. Therefore, the decision to deactivate a military installation is one which has far-reaching consequences to the community where the installation is established.

A case in point is the Air Force base in Rome, N.Y. This base employs over 6,500 civilians. In addition, there are at least an additional 3,500 people who work for private concerns which directly service the base. Private business has invested substantial sums in the area. If this base is deactivated at least 10,000 persons may be out of work. This does not include the businesses and services in the community which are dependent upon the consumer spending of the base's personnel.

The effect of this additional unemployment in the area can be readily seen by looking at recent statistics.

The latest figures show that 9.5 percent of the labor force in the Rome-Utica labor market area are unemployed. This figure represents 12,500 people out of work. The Rome-Utica area just misses being one of the substantial and persistant labor surplus areas under S. 1.

In 1958 this area had 9.7 percent unemployment. Fifty percent above the national average was 10.2. In 1959 there was 8.2 percent of the labor force out of work. Fifty percent above the national average for that year was 8.3. In 1960 this area had 8.2 percent of the labor force out of work, with 50 percent above the national average being 8.4. It is apparent that, if 10,000 more people are unemployed, this area will probably be listed as a substantial and persistent labor surplus area under the formula in S. 1.

This amendment calls for a study of the economic consequences to the area and of the overall economic impact to the country which will result when a military installation is closed.

A report by the Secretary of Commerce to the Secretary of Defense will insure that the Government takes a broader view of the consequences.

The amendment deserves our support.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York [Mr. STRATTON].

The amendment was agreed to.

Mr. JAMES C. DAVIS. Mr. Chairman, I offer an amendment.

The clerk read as follows:

Amendment offered by Mr. JAMES C. DAVIS: On page 80, line 21, strike out the word "fifteen" and insert in lieu thereof the word "five".

Mr. PATMAN. Mr. Chairman, will the gentleman yield?

Mr. JAMES C. DAVIS. I yield to the gentleman from Texas.

Mr. PATMAN. Mr. Chairman, we have been negotiating on this question and we have decided we are willing to accept the amendment offered by the gentleman from Georgia [Mr. JAMES C. DAVIS].

Mr. WIDNALL. Mr. Chairman, will the gentleman explain the amendment?

Mr. PATMAN. Mr. Chairman, it reduces the number of supergrades to be used in the administration of the act from 15 to 5.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Georgia [Mr. JAMES C. DAVIS].

The amendment was agreed to.

Mr. MONTOYA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MONTOYA: On page 72, after line 14, insert the following new subsection:

"(f) In providing assistance under this section with respect to unemployed and underemployed individuals residing in redevelopment areas, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall give consideration to the special needs of individuals who are agricultural workers or are engaged in other seasonal occupations and who require occupational training in order to qualify them to engage

in supplementary employment during the off season and during other periods of reduced activity in the field of their regular or primary occupations."

Mr. PATMAN. Mr. Chairman, the Committee on our side is willing to accept the amendment.

Mr. WIDNALL. Mr. Chairman, will the gentleman give us a word of explanation?

Mr. MONTOYA. Mr. Chairman, the purpose of the amendment is to place clearly within the provisions of the act a provision which will enable the Secretary to initiate vocational training programs wherever they are feasible for agricultural workers who out of season find themselves unemployed.

Mr. Chairman, I propose an amendment which in my opinion will greatly benefit a segment of our population which I am sure we all agree needs help. I am speaking of the agricultural worker and the individuals engaged in seasonal occupations. In this connection, I offer the following amendment to S. 1:

On page 72, after line 14, insert the following new subsection:

"(f) In providing assistance under this section with respect to unemployed and underemployed individuals residing in redevelopment areas, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall give consideration to the special needs of individuals who are agricultural workers or are engaged in other seasonal occupations and who require occupational training in order to qualify them to engage in supplementary employment during the off season and during other periods of reduced activity in the field of their regular or primary occupations."

Permit me now to make a number of observations which I believe substantiate the need for an adequate program of vocational retraining to help agricultural and seasonal workers. A massive retraining program for these two groups will enable them to acquire new skills which are needed to enter new fields of endeavor.

I do not have to remind any of my colleagues that agricultural employees are in dire need of help. In most of our discussions of how to solve the problem of high unemployment in distressed areas, too much emphasis has been placed on long-range solutions and ignoring the agricultural unemployment. Secretary Freeman in his testimony before the House Banking and Currency Committee on February 27, 1961, indicated that over 1,400,000 are unemployed and underemployed out of a total agricultural labor force of 4,700,000. It is difficult to comprehend an expanding economy with such a large segment of our population in a basic industry underemployed. He said:

There is enough underemployment each year among workers 20 to 64 years of age who live on farms to equal a full year of unemployment for 1,400,000 workers. That is to say—if we did not have so many people underemployed in agriculture, the Nation would have roughly 1,400,000 more unemployed workers than are currently reported.

It is clear that unemployment and underemployment are basically the same condition.

Since World War II, the Nation's economy has not grown enough to put to work and keep fully employed all of our people who want to work.

Already farm families get a third of their net income from nonfarm sources. Of every 100 farm operators, 45 did some work off their farms in 1959, and nearly a third of the operators worked off their farms 100 days or more.

However, representatives of 95 percent of the rural electric systems of the Nation report that there is need for additional work off the farms in the areas they serve. With the labor supply increasing and with technology making an hour of work more productive, we have permitted a situation to develop where demand has been outrun.

President Kennedy in his state of the Union message indicated that farm income in the past 10 years has decreased over 25 percent. The restoration of the purchasing power of the farmer could solve many of our problems in the other industrial areas. It seems to me that there are urgent human problems on the farm which need immediate attention. We cannot solve these problems through expanding surplus commodity distribution or extending legislation. We must seek a speedier solution which will give jobs to the agricultural unemployed. Underemployment in agriculture has become an increasingly serious problem since the end of the war. An increasing number and an increasing percentage of farm families are found in the lowest income group of the Nation—the lowest one-fifth. In the 1944–47 period, 40 percent of the farm operator families were in that group, but in the 1955–57 period more than 50 percent were in it. Another way to see this problem is to look at actual income figures. In 1959, only about 13 percent of the families in the Nation had incomes less than $2,000, but about 36 percent of the farm families had incomes under $2,000. The people want to work. Underemployment in agricultural is due to the national shortage of jobs rather than to inherent characteristics of regions or people. Department of Agriculture and State college research people studying the problems of specific areas find differences, it is true. The history of an area and the origins and history of a group of people are reflected to some extent in the opportunities available and the way the people react to them; but the differences among areas pale into insignificance when you consider this unifying similarity.

The American people wherever they are, whatever their origins and history, want to work. They aspire to better things for themselves and their children. They take jobs when and where they find jobs for which they are qualified. They are ingenious in putting their resources to work to make and sell useful goods and in selling needed services. This is true of the people in the areas that are short of resources and buying power, as it is in other areas, contrary to what some of us have assumed too easily in the past.

I am firmly convinced that the answer lies in a massive program of vocational retraining, fully utilizing the existing facilities of our high schools and other State institutions and creating additional regional vocational schools in areas affected. There is no single panacea to the distressed agricultural areas and unfortunately, most of the solutions offered by factfinding committees and legislators are of a pump-priming nature. Conditions are so critical in some areas that it is time for a new type of program to be effected. These agricultural unemployed must be made vocationally mobile so that they can properly seek employment in areas where job opportunities are available.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico [Mr. MONTOYA].

The amendment was agreed to.

Mr. MONTOYA. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. MONTOYA of New Mexico: On page 82, after line 9, insert the following new section:

"RESEARCH

"SEC. 28. To assist in the long-range accomplishment of the purposes of this Act, the Secretary shall establish and conduct a continuing program of study and research designed to assist in determining the causes of unemployment, underemployment, underdevelopment, and chronic depression in the various areas of the Nation and in the Nation as a whole and in the formulation and implementation of National, State, and local programs which will raise income levels and otherwise produce solutions of the problems resulting from these conditions. The Secretary shall include in his annual report under section 22 a detailed statement concerning the study and research conducted under this section together with his findings resulting therefrom and his recommendations for legislative and other action."

And renumber the succeeding section accordingly.

Mr. MONTOYA. Mr. Chairman, I offer this amendment as I firmly believe that this legislation needs a long-term program of research to determine causes of underdevelopment and of chronic depression. I feel that the provisions of this bill will help correct the immediate problem facing the Nation in the depressed areas. However, I strongly urge that a long-range program be instituted. This could be accomplished after sufficient study and research has been made to determine the basic causes and alternative solutions that may be available to these areas.

Mr. PATMAN. Mr. Chairman, we are familiar with the gentleman's amendment and we are willing to accept it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New Mexico [Mr. MONTOYA].

The amendment was agreed to.

Mr. KEITH. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, under the provisions of this bill many communities can qualify for assistance. Some of these cities are obviously more deserving of our attention than others. The question is, Is there in this bill any directive or instruction to the administrator of the program to give priority to those communities which have had substantial unemployment for extended periods of time?

Mr. PATMAN. Mr. Chairman, if the gentleman will yield, the bill provides

that areas such as the gentleman describes will be designated for assistance, and New Bedford is given a priority in the sense that it is one of 20 major areas which meet the test in the bill for mandatory designation. New Bedford will certainly be high on the priority list.

Mr. KEITH. I thank the gentleman very much for those words of reassurance.

In this city we have a flood control project which has been authorized by this or by an earlier Congress. The city is hard pressed to meet its financial commitments. Is it the intent of the provision pertaining to the grants for public facilities to take care of problems like that facing New Bedford in this instance?

Mr. PATMAN. It is intended to take care of cities like New Bedford provided there is no other way of financing the project on reasonable terms and it needs public facilities to solve its problems.

Mr. KEITH. I thank the gentleman very much.

Mr. HARRIS. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to ask a question of my distinguished colleague, whose district adjoins mine in the Arkansas-Texas area.

On page 4 of the committee report it is stated:

> Such planning should take into account all the potentials of the area. They may be in recreation or tourism, not heavy industry; they may lie in the promotion of parks and the restoration of forests, with the construction of necessary access roads.

First, may I ask in just what way under the provisions of this bill an area could qualify for assistance in promoting parks?

Mr. PATMAN. This is a rural area?

Mr. HARRIS. Yes, I assume it is; I do not know.

Mr. PATMAN. It would be within the discretion of the Administrator, if it conforms with the overall economic development program presented by the local community. I would not know unless I could see the plan. I would not know what to say, and then I would not have the power because it is entirely up to the Administrator.

Mr. HARRIS. In other words, any feasible plan that would be acceptable to the Administrator would be possible under this bill?

Mr. PATMAN. It would be possible under this act.

Mr. HARRIS. Now may I ask this further question with reference to access roads. The gentleman may or may not be familiar with Rich Mountain, in the northern part of my district and over in Oklahoma. It is substantially in the national forest. On top of this mountain is a State park. An effort has been made for some time to obtain funds locally, State or otherwise, for the development of a road across the top of this mountain into Oklahoma, and so forth. The question is, would a plan, if it were to be developed and acceptable to the Secretary, be eligible under this program?

Mr. PATMAN. It would not be ruled out. I see no reason why it should not be eligible.

Mr. HARRIS. In other words, if the criteria otherwise stated in the report earlier could be met, then such a program could possibly be worked out for a project of this nature?

Mr. PATMAN. It would be possible under this act.

Mr. HARRIS. I thank the gentleman.

Mr. MULTER. Mr. Chairman, I ask unanimous consent that each of the Members who offered amendments that have been adopted be permitted to revise and extend his remarks at the point in the RECORD immediately prior to the vote on the amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HEMPHILL. Mr. Chairman, I move to strike out the requisite number of words.

Mr. Chairman, I take this time to ask certain questions, the first of which is, Is the effect of this legislation directed toward putting up plants with Government money in competition with plants already in existence?

Mr. PATMAN. No.

Mr. HEMPHILL. The committee is right here in saying that that is not proper and that the administration should be directed not in that direction but in other directions?

Mr. PATMAN. That is not the purpose.

Mr. HEMPHILL. Is the legislation directed toward stopping development in any one section of the country?

Mr. PATMAN. The answer is no.

Mr. HEMPHILL. I have in mind the language on page 9 of the report which seems to single out certain parts of the country, I thought unfairly. Would this stop the movement of industry from one part of the country to another where the industry had not previously been established?

Mr. PATMAN. It would not affect it unless there were an effort made to move a plant from one section to another. In that event public funds could not be used for that purpose. Under this act, they are prohibited.

Mr. HEMPHILL. Would you prohibit a plant relocating that wanted to relocate? Would you give the community assistance or not?

Mr. PATMAN. The Administrator would not have anything to do with that unless they asked for assistance. In that event, public money would be involved and could not be used for that purpose.

Mr. HEMPHILL. I thank the gentleman.

Mr. WIDNALL. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I take this time to ask one question of the gentleman from Texas [Mr. PATMAN]. Is there anything in the rural section of this bill that gives priority to the unemployed of a chronically distressed area over the underemployed?

Mr. PATMAN. I do not think that distinction is drawn. I think the underemployed and the unemployed are treated in a very similar way. The object is to help them whether they are underemployed or unemployed.

Mr. WIDNALL. Actually, it is not going to be a bill primarily to help those in the chronically distressed areas who are unemployed?

Mr. PATMAN. There is no distinction between underemployed and unemployed.

Mr. HOFFMAN of Michigan. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, permit a question to the gentleman from New Mexico who offered the amendment to assist the migrant or seasonal workers.

Mr. PATMAN. There is nothing in the bill that affects migrant workers.

Mr. HOFFMAN of Michigan. Is the gentleman from New Mexico over there?

Mr. PATMAN. There is nothing in this bill that affects migrant workers.

Mr. HOFFMAN of Michigan. Did we not have an amendment a little while ago about migrant or seasonal workers?

Mr. PATMAN. No, there was something about Indian reservations.

Mr. HOFFMAN of Michigan. Was there not an amendment offered by the gentleman from New Mexico?

Mr. PATMAN. That was about Indian reservations.

Mr. HOFFMAN of Michigan. About seasonal workers.

Mr. PATMAN. Oh, seasonal workers.

Mr. HOFFMAN of Michigan. Yes, what is the difference between seasonal and migrant workers except perhaps that seasonal workers are through with a job earlier? Now I am not asking the gentleman from Texas but—my question is this. Under that amendment, a seasonal worker who might be a migrant worker comes to Michigan to help harvest crops which are produced by stoop labor, as we call it. Under that amendment, do they receive help after the crops are harvested, if they are unemployed?

Mr. PATMAN. That would be unemployment benefits, I think. I do not know of anything in this act that would permit the payment of unemployment benefits.

Mr. HOFFMAN of Michigan. If the gentleman will just wait, quit stalling, some of these people come up and harvest crops and then go back, and they do not work any more except down in Mexico. Can they receive a benefit under this bill as amended?

Mr. PATMAN. They go back to their own country under the treaty that is in force.

Mr. HOFFMAN of Michigan. Yes, and what I am asking you, under that amendment, are they to receive aid?

Mr. PATMAN. Not after they have finished their jobs, I am sure. But, in training—in training'——

Mr. HOFFMAN of Michigan. If they stay here—for instance, at Benton Harbor, Mich., as some do, the rest of the year, are they to receive aid for the rest of the year, or a benefit under this bill?

Mr. PATMAN. Not under this act, and I do not see where they could receive aid under this act.

Mr. HOFFMAN of Michigan. Under the amendment.

Mr. PATMAN. Not under the act.

Mr. HOFFMAN of Michigan. Under the amendment.

Mr. PATMAN. Under the employment act of your State, I do not know.

Mr. HOFFMAN of Michigan. I did not ask you about unemployment. Under the amendment in this act, I am asking you: Can they receive a benefit?

Mr. PATMAN. No, sir; my construction is no.

Mr. HOFFMAN of Michigan. With that answer I cannot agree.

The CHAIRMAN. The question is on the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. BOGGS, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee having had under consideration the bill (S. 1) to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas, pursuant to House Resolution 237, he reported the bill back to the House with an amendment adopted in Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on agreeing to the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the third reading of the Senate bill.

The bill was ordered to be read a third time, and was read the third time.

Mr. WIDNALL. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. WIDNALL. I am opposed to the bill.

The SPEAKER. The gentleman qualifies.

The Clerk will report the motion to recommit.

The Clerk read as follows:

Mr. WIDNALL moves to recommit the bill to the Committee with instructions to report the same back to the House with the following amendment: Strike out all after the enacting clause and insert in lieu thereof the following: "That this Act may be cited as the 'Area Redevelopment Act'.

"DECLARATION OF PURPOSE

"SEC. 2. The Congress declares that the maintenance of the national economy at a high level is vital to the best interests of the United States, but that some of our communities are suffering substantial and persistent unemployment and underemployment; that such unemployment and underemployment cause hardship to many individuals and their families and detract from the national welfare by wasting vital human resources; that to overcome this problem the Federal Government, in cooperation with the States, should help areas of substantial and persistent unemployment and underemployment to take effective steps in planning and financing their economic redevelopment; that Federal assistance to communities, industries, enterprises, and individuals in areas needing redevelopment should enable such areas to achieve lasting improvement and enhance the domestic prosperity by the establishment of stable and diversified local economies and improved local living conditions; and that under the provisions of this Act new employment opportunities should be created by developing and expanding new and existing facilities and resources.

"AREA REDEVELOPMENT ADMINISTRATOR

"SEC. 3. There shall be appointed by the President, by and with the advice and consent of the Senate, an Area Redevelopment Administrator in the Department of Commerce who shall receive compensation at a rate equal to that received by Assistant Secretaries of Commerce. The Administrator shall perform such duties in the execution of this Act as the Secretary of Commerce (hereinafter referred to as the 'Secretary') may assign.

"ADVISORY POLICY BOARD

"SEC. 4. (a) To advise the Secretary in the performance of functions authorized by this Act, there is created an Area Redevelopment Advisory Policy Board (hereinafter referred to as the 'Board'), which shall consist of the following members, all ex officio: the Secretary as Chairman; the Secretaries of Agriculture; Health, Education, and Welfare; Interior; Labor; and Treasury; and the Administrators of the Housing and Home Finance Agency and the Small Business Administration. The Chairman may from time to time invite the participation of officials of other agencies of the executive branch interested in the functions herein authorized. Each member of the Board may designate an officer of his agency to act for him as a member of the Board with respect to any matter there considered.

"(b) The Secretary shall appoint a National Public Advisory Committee on Area Redevelopment which shall consist of twenty-five members and shall be composed of representatives of labor, management, agriculture, State and local governments, and the public in general. From the members appointed to such Committee the Secretary shall designate a Chairman. Such Committee, or any duly established subcommittee thereof, shall from time to time make recommendations to the Secretary relative to the carrying out of his duties under this Act. Such Committee shall hold not less than two meetings during each calendar year.

"(c) The Secretary is authorized from time to time to call together and confer with any persons, including representatives of labor, management, agriculture, and government, who can assist in meeting the problems of unemployment or underemployment in the several areas designated by the Secretary as redevelopment areas.

"REDEVELOPMENT AREAS

"SEC. 5. (a) The Secretary shall designate as a 'redevelopment area' any labor market area within the United States with respect to which the chief executive of the State in which such area is located has requested such designation and the Secretary of Labor has found and certified to the Secretary—

"(1) that the rate of unemployment in such area, excluding unemployment due primarily to temporary or seasonal factors, is currently 6 per centum or more and has averaged at least 6 per centum for the qualifying time periods specified in paragraph (2); and

"(2) that the annual average rate of unemployment in such area has been at least—

"(A) 50 per centum above the national average for three of the preceding four calendar years, or

"(B) 75 per centum above the national average for two of the preceding three calendar years, or

"(C) 100 per centum above the national average for one of the preceding two calendar years.

"(b) The Secretary of Agriculture shall conduct such studies as he may deem necessary to enable him to develop and submit to the Congress, not later than January 3, 1962, a proposed workable program to provide for the participation of rural areas, rural nonfarm areas, and Indian reservations, in which there has existed substantial and persistent unemployment or underemployment for an extended period of time, in the program of financial assistance under this Act. Upon the request of the Secretary of Agriculture, the Secretary of the Interior shall conduct such special studies and compile and furnish to the Secretary of Agriculture such information as the Secretary of Agriculture may deem necessary to enable him to carry out his duties under this subsection. The Secretary of Agriculture shall reimburse the Secretary of the Interior, out of funds appropriated under this subsection, for expenses incurred by the Secretary of the Interior under this subsection. There are authorized to be appropriated such sums, not to exceed $500,000, as may be necessary to carry out the provisions of this subsection.

"(c) The Secretary shall reimburse when appropriate, out of any funds available to the Secretary under this Act, the heads of other departments or agencies for expenses incurred by them under this section in conducting studies or furnishing information requested by the Secretary.

"(d) As used in this Act, the term 'redevelopment area' refers to any area within the United States which has been designated by the Secretary as a redevelopment area.

"LOANS AND PARTICIPATIONS

"SEC. 6. (a) The Secretary is authorized to purchase evidences of indebtedness and to make loans (which for purposes of this section shall include participations in loans) to aid in financing any project within a redevelopment area for the purchase or development of land and facilities (including, in exceptional cases, machinery and equipment) for industrial or commercial usage, including the construction of new buildings, the rehabilitation of abandoned or unoccupied buildings, and the alteration, conversion, or enlargement of existing buildings. Such financial assistance shall not be extended for working capital, or to assist establishments relocating, totally or partially, from one area to another.

"(b) Financial assistance under this section shall be on such terms and conditions as the Secretary determines, subject, however, to the following restrictions and limitations:

"(1) The total amount of loans (including purchased evidences of indebtedness) outstanding at any one time under this section with respect to projects in redevelopment areas shall not exceed $150,000,000.

"(2) Such assistance shall be extended only to applicants, both private and public, approved for such assistance by the State (or any agency or instrumentality thereof concerned with problems of economic development) in which the project to be financed is or will be located.

"(3) The project for which financial assistance is sought must be reasonably calculated to provide more than a temporary alleviation of unemployment or underemployment within the redevelopment area wherein it is, or will be, located.

"(4) No such assistance shall be extended hereunder unless the financial assistance applied for is not otherwise available from private lenders or other Federal agencies on reasonable terms.

"(5) The Secretary shall not make any loan without a participation unless he determines that the loan cannot be made on a participation basis.

"(6) No evidences of indebtedness shall be purchased and no loans shall be made unless it is determined that there is a reasonable assurance of repayment.

"(7) Subject to section 11(5) of this Act, no loan, including renewals or extension

thereof, may be made hereunder for a period exceeding twenty-five years and no evidences of indebtedness maturing more than twenty-five years from date of purchase may be purchased hereunder: *Provided*, That the foregoing restrictions on maturities shall not apply to securities or obligations received by the Secretary as a claimant in bankruptcy or equitable reorganization or as a creditor in other proceedings attendant upon insolvency of the obligor.

"(8) Loans made and evidences of indebtedness purchased under this section shall bear interest at a rate equal to the rate of interest paid by the Secretary on funds obtained from the Secretary of the Treasury as provided in section 8(d) of this Act plus one-half of 1 per centum per annum to cover administrative expenses and to provide for losses on loans made and evidences of indebtedness purchased under this section.

"(9) Such assistance shall not exceed 65 per centum of the aggregate cost to the applicant (excluding all other Federal aid in connection with the undertaking) of acquiring or developing land and facilities (including, in exceptional cases, machinery and equipment), and of constructing, altering, converting, rehabilitating, or enlarging the building or buildings of the particular project, and shall, among others, be on the condition that—

"(A) other funds are available in an amount which, together with the assistance provided hereunder, shall be sufficient to pay such aggregate cost;

"(B) not less than 10 per centum of such aggregate cost be supplied by the State or any agency, instrumentality, or political subdivision thereof, or by a community or area organization which is nongovernmental in character, as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal financial assistance;

"(C) in extending financial assistance under this section with respect to a redevelopment area, the Secretary shall require that not less than 5 per centum of the aggregate cost of the project for which such assistance is extended shall be supplied by nongovernmental sources, in addition to any funds supplied from such sources under subparagraph (B), as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal finanical assistance; and

"(D) to the extent the Secretary finds such action necessary to encourage financial participation in a particular project by other lenders and investors, and except as otherwise provided in subparagraphs (B) and (C), any Federal financial assistance extended under this section may be repayable only after other loans made in connection with such project have been repaid in full, and the security, if any, for such Federal financial assistance may be subordinate and inferior to the lien or liens securing other loans made in connection with the same project.

"(10) No such assistance shall be extended unless there shall be submitted to and approved by the Secretary an overall program for the economic development of the area and a finding by the State, or any agency, instrumentality, or local political subdivision thereof, that the project for which financial assistance is sought is consistent with such program: *Provided*, That nothing in this Act shall authorize financial assistance for any project prohibited by laws of the State or local political subdivision in which the project would be located.

"LOANS FOR PUBLIC FACILITIES

"SEC. 7. (a) In order to provide loans for public facilities in redevelopment areas, the first sentence of section 202(c) of title II of the Housing Amendments of 1955 is amended to read as follows:

"'(c) In the processing of applications for financial assistance under this section, the Administrator shall give equal priority to applications of—

"'(1) counties, cities, and other municipalities and political subdivisions for financing needed public facilities in areas determined to be redevelopment areas under the Area Redevelopment Act, if the Secretary of Commerce certifies there is reasonable probability that with assistance made available under the Area Redevelopment Act and other undertakings such areas will be able to achieve lasting improvement in their economic development; and

"'(2) smaller municipalities for assistance in the construction of basic public works (including works for the storage, treatment, purification, or distribution of water; sewage, sewage treatment, and sewer facilities; and gas distribution systems) for which there is an urgent and vital public need.'

"(b) The first sentence of section 203(a) of title II of the Housing Amendments of 1955 is amended to read as follows:

"'(a) In order to finance activities under this title, the Administrator is authorized and empowered to issue to the Secretary of the Treasury, from time to time and to have outstanding at any one time in an amount not exceeding $150,000,000, notes and other obligations, which limit shall be increased by such amounts, not exceeding $100,000,000, as may be specified from time to time in appropriation Acts.'

"(c) No financial assistance shall be extended under the amendments made by this section with respect to—

"(1) any public facility situated in a redevelopment area which would compete with an existing privately owned public utility rendering a service to the public at rates or charges subject to regulation by a State regulatory body, unless the State regulatory body determines that in the area to be served by the public facility for which the financial assistance is to be extended there is a need for an increase in such service (taking into consideration reasonably foreseeable future needs) which the existing public utility is not able to meet through its existing facilities or through an expansion which it is prepared to undertake; or

"(2) any area if it will assist business establishments in relocating, totally or partially, from one area to another.

"AREA REDEVELOPMENT FUND

"SEC. 8. (a) There is hereby established in the Treasury of the United States an area redevelopment fund (hereinafter referred to as the 'fund'), which shall be available to the Secretary for the purpose of extending financial assistance under section 6 and for the payment of all obligations and expenditures arising therefrom.

"(b) When requested by the Secretary, advances shall be made to the fund from the appropriations made therefor. There is hereby authorized to be appropriated for the purpose of making advances to the fund without fiscal year limitation, an amount not exceeding $150,000,000.

"(c) Receipts arising from the program of assistance under section 6 shall be credited to the fund. Any moneys in the fund determined by the Secretary to be in excess of current needs shall be credited to the appropriation from which advanced to be held for future advances to the fund.

"(d) There shall be paid into miscellaneous receipts of the Treasury at the close of each fiscal year interest, on advances made to the fund for use in extending financial assistance under section 6, at rates which shall be determined by the Secretary of the Treasury at the time the advances or commitments for advances are made after taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to loans made by the Secretary under section 6.

"(e) The fund shall contribute to the civil service retirement and disability fund a sum as provided by section 4(a) of the Civil Service Retirement Act (5 U.S.C. 2254(a)), except that such sum shall be determined by applying to the total basic salaries (as defined in that Act) paid to employees performing activities authorized under section 6 of this Act and covered by that Act the per centum rate determined annually by the Civil Service Commission to be the excess of the total normal cost per centum rate of the civil service retirement system over the employee deduction rate specified in such section 4(a). The fund shall also pay into the Treasury as miscellaneous receipts that portion of the cost of administration of the civil service retirement and disability fund attributable to employees performing activities authorized under section 6 of this Act, as determined by the Civil Service Commission.

"(f) In the performance of and with respect to the functions, powers, and duties vested in him by section 6 of this Act, the Secretary shall—

"(1) prepare annualy and submit a budget program in accordance with the provisions of sections 102, 103, and 104 of the Government Corporation Control Act, as amended; and

"(2) determine the character of and the necessity for obligations and expenditures and the manner in which they shall be incurred, allowed, and paid, subject to provisions of law specifically applicable to Government corporations.

"INFORMATION

"SEC. 9. The Secretary shall aid redevelopment areas and other areas by furnishing to interested individuals, communities, industries, and enterprises within such areas any assistance, technical information, market research, or other forms of assistance, information, or advice which are obtainable from the various departments, agencies, and instrumentalities of the Federal Government and which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment within such areas. The Secretary shall furnish the procurement divisions of the various departments, agencies, and other instrumentalities of the Federal Government with a list containing the names and addresses of business firms which are located in redevelopment areas and which are desirous of obtaining Government contracts for the furnishing of supplies or services, and designating the supplies and services such firms are engaged in providing.

"TECHNICAL ASSISTANCE

"SEC. 10. In carrying out his duties under this Act the Secretary is authorized to provide technical assistance which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment (1) to areas which he has designated as redevelopment areas under this Act, and (2) to other areas which he finds have substantial need for such assistance. Such assistance shall include studies evaluating the needs of, and developing potentialities for, economic growth of such areas. Such assistance may be provided by the Secretary through members of his staff or through the employment of private individuals, partnerships, firms, corporations, or suitable institutions, under contracts entered into for such purposes. Appropriations are hereby authorized for the purposes of this section in an amount not to exceed $4,500,000 annually.

"POWERS OF SECRETARY

"SEC. 11. In performing his duties under this Act, the Secretary is authorized to—

"(1) adopt, alter, and use a seal, which shall be judicially noticed;

"(2) hold such hearings, sit and act at such times and places, and take such testimony, as he may deem advisable;

"(3) request directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality information, suggestions, estimates, and statistics needed to carry out the purposes of this Act; and each department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary;

"(4) under regulations prescribed by him, assign or sell at public or private sale, or otherwise dispose of for cash or credit, in his discretion and upon such terms and conditions and for such consideration as he shall determine to be reasonable, any evidence of debt, contract, claim, personal property, or security assigned to or held by him in connection with loans made or evidences of indebtedness purchased under this Act, and collect or compromise all obligations assigned to or held by him in connection with such loans or evidences of indebtedness until such time as such obligations may be referred to the Attorney General for suit or collection;

"(5) further extend the maturity of or renew any loan made or evidence of indebtedness purchased under this Act, beyond the periods stated in such loan or evidence of indebtedness or in this Act, for additional periods not to exceed ten years, if such extension or renewal will aid in the orderly liquidation of such loan or evidence of indebtedness;

"(6) deal with, complete, renovate, improve, modernize, insure, rent, or sell for cash or credit, upon such terms and conditions and for such consideration as he shall determine to be reasonable, any real or personal property conveyed to, or otherwise acquired by, him in connection with loans made or evidence of indebtedness purchased under this Act;

"(7) pursue to final collection, by way of compromise or other administrative action, prior to reference to the Attorney General, all claims against third parties assigned to him in connection with loans made or evidences of indebtedness purchased under this Act. This shall include authority to obtain deficiency judgments or otherwise in the case of mortgages assigned to the Secretary. Section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), shall not apply to any contract of hazard insurance or to any purchase or contract for services or supplies on account of property obtained by the Secretary as a result of loans made or evidences of indebtedness purchased under this Act if the premium therefor or the amount thereof does not exceed $1,000. The power to convey and to execute, in the name of the Secretary, deeds of conveyance, deeds of release, assignments and satisfactions of mortgages, and any other written instrument relating to real or personal property or any interest therein acquired by the Secretary pursuant to the provisions of this Act may be exercised by the Secretary or by any officer or agent appointed by him for that purpose without the execution of any express delegation of power or power of attorney;

"(8) acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized in section 6 of this Act;

"(9) in addition to any powers, functions, privileges, and immunities otherwise vested in him, take any and all actions, including the procurement of the services of attorneys by contract, determined by him to be necessary or desirable in making, purchasing, servicing, compromising, modifying, liquidating, or otherwise administratively dealing with or realizing on loans made or evidences of indebtedness purchased under this Act;

"(10) to such an extent as he find necessary to carry out the provisions of this Act, procure the temporary (not in excess of six months) service of experts or consultants or organizations thereof, including stenographic reporting services, by contract or appointment, and in such cases such service shall be without regard to the civil service and classification laws, and, except in the case of stenographic reporting services by organizations, without regard to section 3709 of the Revised Statutes (41 U.S.C. 5); any individual so employed may be compensated at a rate not in excess of $75 per diem, and, while such individual is away from his home or regular place of business, he may be allowed transportation and not to exceed $15 per diem in lieu of subsistence and other expenses;

"(11) sue and be sued in any court of record of a State having general jurisdiction or in any United States district court, and jurisdiction is conferred upon such district court to determine such controversies without regard to the amount in controversy; but no attachment, injunction, garnishment, or other similar process, mesne or final, shall be issued against the Secretary or his property. Nothing herein shall be construed to except the activities under this Act from the application of sections 507(b) and 2679 of title 28, United States Code, and of section 367 of the Revised Statutes (5 U.S.C. 316); and

"(12) establish such rules, regulations, and procedures as he may deem appropriate in carrying out the provisions of this Act.

"TERMINATION OF ELIGIBILITY FOR FURTHER ASSISTANCE

"SEC. 12. Whenever the Secretary shall determine that employment conditions within any area previously designated by him as a redevelopment area have changed to such an extent that such area is no longer eligible for such designation under section 5 of this Act, no further assistance shall be granted under this Act with respect to such area and, for the purposes of this Act, such area shall not be considered a redevelopment area: *Provided*, That nothing contained herein shall (1) prevent any such area from again being designated a redevelopment area under section 5 of this Act if the Secretary determines it to be eligible under such section, or (2) affect the validity of any contracts or undertakings with respect to such area which were entered into pursuant to this Act prior to a determination by the Secretary that such area no longer qualifies as a redevelopment area. The Secretary shall keep the departments and agencies of the Federal Government, and interested State or local agencies, advised at all times of any changes made hereunder with respect to the designation of any area.

"URBAN RENEWAL

"SEC. 13. Title I of the Housing Act of 1949, as amended, is amended by adding at the end thereof the following new section:

"'REDEVELOPMENT AREAS UNDER THE AREA REDEVELOPMENT ACT

"'SEC. 113. (a) Whenever the Secretary of Commerce certifies to the Administrator (1) that any county, city, or other municipality (in this section referred to as a "municipality") is situated in an area designated under section 5 of the Area Redevelopment Act as a redevelopment area, and (2) that there is a reasonable probability that with assistance provided under such Act and other undertakings the area will be able to achieve more than temporary improvement in its economy, the Administrator is authorized to provide financial assistance to a local public agency in any such municipality under this title and the provisions of this section.

"'(b) Subject to the provisions of subsection (e) of this section, the Administrator may provide such financial assistance under this section without regard to the requirement or limitations of section 110(c) that the project area be predominantly residential in character or be redeveloped for predominantly residential uses under the urban renewal plan, and without regard to any of the limitations of that section on the undertaking of projects for predominantly nonresidential uses; but no such assistance shall be provided in any area if the Administrator determines that it will assist business establishments in relocating, totally or partially, from one area to another.

"'(c) Notwithstanding any other provision of this title, a contract for financial assistance under this section may include provisions permitting the disposition of any land in the project area designated under the urban renewal plan for industrial or commercial uses to any public agency or nonprofit corporation for subsequent disposition as promptly as practicable by such public agency or corporation for the redevelopment of the land in accordance with the urban renewal plan: *Provided*, That any disposition of such land to such public agency or corporation under this section shall be made at its fair value for uses in accordance with the urban renewal plan: *And provided further*, That only the purchaser from or lessees of such public agency or corporation, and their assignees, shall be required to assume the obligations relating to the commencement of improvements imposed under section 105(b) hereof.

"'(d) Following the execution of any contract for financial assistance under this section with respect to any project, the Administrator may exercise the authority vested in him under this section for the completion of such projects, notwithstanding any determination made after the execution of such contract that the area in which the project is located is no longer a redevelopment area under the Area Redevelopment Act.

"'(e) Not more than 10 per centum of the funds authorized for capital grants under section 103 after the date of the enactment of the Area Redevelopment Act shall be used for the purpose of providing financial assistance under this section. Amounts used for such purpose shall not be taken into account for the purpose of the limitation contained in the second proviso of the fifth sentence of section 110(c).'

"URBAN PLANNING GRANTS

"SEC. 14. Paragraph (3) of section 701(a) of the Housing Act of 1954 is amended by inserting after 'counties which' the following: '(A) are situated in areas designated by the Secretary of Commerce under section 5 (a) of the Area Redevelopment Act as redevelopment areas or (B)'.

"OCCUPATIONAL TRAINING

"SEC. 15. (a) The Secretary of Labor is authorized, upon request and whenever he determines such studies are needed, to undertake, or to provide assistance to others for, studies of the size, characteristics, skills, adaptability, occupational potentialities, and related aspects of the labor force of any redevelopment area.

"(b) When a redevelopment area has an approved economic development program as provided in section 6(b)(10), the Secretary of Labor, in consultation with the Secretary, shall determine the occupational training or retraining needs of unemployed individuals residing in the redevelopment area. The Secretary of Labor shall notify the Secretary of Health, Education, and Welfare of the

occupational training or retraining requirements of the area, and shall provide for the orderly selection and referral of those unemployed or underemployed individuals residing in the area who can reasonably be expected to obtain employment as a result of the skill they will acquire in the training which is to be made available. The Secretary of Labor shall cooperate with the Secretary of Health, Education, and Welfare and with existing State and local agencies and officials in charge of existing programs relating to vocational training and retraining for the purpose of assuring that the facilities and services of such agencies are made fully available to such individuals.

"(c) Whenever the Secretary of Labor finds that additional facilities or services are needed in the area to meet the occupational training or retraining needs of such individuals, he shall so advise the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare shall provide assistance, including financial assistance when necessary, to the appropriate State vocational educational agency in the provision of such additional facilities or services. If the Secretary of Health, Education, and Welfare finds that the State vocational educational agency is unable to provide the facilities and services needed, he may, after consultation with such agency, provide for the same by agreement or contract with public or private educational institutions.

"(d) The Secretary of Labor shall arrange to provide any necessary assistance for setting up apprenticeships, and to promote journeyman and other on-the-job training.

"(e) There are hereby authorized to be appropriated for the fiscal year beginning July 1, 1961, such sums, not in excess of $10,000,000, as may be necessary to carry out the provisions of this section.

"RETRAINING SUBSISTENCE PAYMENTS

"SEC. 16. (a) The Secretary of Labor in consultation with the Secretary may, on behalf of the United States, enter into agreements with States in which redevelopment areas are located, under which the Secretary of Labor shall make payments to such States either in advance or by way of reimbursement for the purpose of enabling such States, as agents of the United States, to make weekly retraining payments to unemployed individuals residing within such redevelopment areas who are certified by the Secretary of Labor to be undergoing occupational training or retraining under section 15 of this Act. Such payments shall be made for a period not exceeding sixteen weeks, and the amount of any such payment for any week shall not exceed the amount of the average weekly unemployment compensation payment (including allowances for dependents) payable for a week of total unemployment in the State making such payments.

"(b) No weekly retraining payment shall be made to any person otherwise eligible who, with respect to the week for which such payment would be made, has received or is seeking unemployment compensation under title XV of the Social Security Act or any other Federal or any State unemployment compensation law, but if the appropriate State or Federal agency finally determines that a person denied benefits for any week because of this subsection was not entitled to unemployment compensation under title XV of the Social Security Act or such Federal or State law with respect to such week, this subsection shall not apply with respect to such week.

"(c) Any agreement under this section may contain provisions (including, so far as may be appropriate, provisions authorized or made applicable with respect to agreements concluded by the Secretary of Labor pursuant to title XV of the Social Security Act) as will promote effective administration, protect the United States against loss, and insure the proper application of payments made to the State under such agreement. Except as may be provided in such agreements, or in the rules and regulations prescribed pursuant to subsection (d) of this section, determinations by any duly designated officer or agency as to the eligibility of individuals for weekly retraining payments under this section shall be final and conclusive for any purposes and not subject to review by any court or any other officer.

"(d) The Secretary of Labor and the Secretary shall jointly prescribe such rules and regulations as they may deem necessary to carry out the provisions of this section.

"(e) There are hereby authorized to be appropriated for the fiscal year beginning July 1, 1961, such sums, not in excess of $10,000,000, as may be necessary to carry out the provisions of this section.

"PENALTIES

"SEC. 17. (a) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any financial assistance under section 6, or any extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Secretary, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

"(b) Whoever, being connected in any capacity with the Secretary, in the administration of this Act (1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to him or pledged or otherwise entrusted to him, or (2) with intent to defraud the Secretary or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner, makes any false entry in any book, report, or statement of or to the Secretary, or without being duly authorized draws any order or issues, puts forth, or assigns any note, debenture, bonds, or other obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof, or (3) with intent to defraud participates or shares in or receives directly or indirectly any money, profit, property, or benefit through any transaction, loan, grant, commission, contract, or any other act of the Secretary, or (4) gives any unathorized information concerning any future action or plan of the Secretary which might affect the value of securities, or having such knowledge invests or speculates, directly or indirectly, in the securities or property of any company or corporation receiving loans or other assistance from the Secretary, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

"EMPLOYMENT OF EXPEDITERS AND ADMINISTRATIVE EMPLOYEES

"SEC. 18. No financial assistance shall be extended by the Secretary under section 6 to any business enterprise unless the owners, partners, or officers of such business enterprise (1) certify to the Secretary the names of any attorneys, agents, and other persons engaged by or on behalf of such business enterprise for the purpose of expediting applications made to the Secretary for assistance of any sort, under this Act, and the fees paid or to be paid to any such person; and (2) execute an agreement binding such business enterprise, for a period of two years after such assistance is rendered by the Secretary to such business enterprise, to refrain from employing, tendering any office or employment to, or retaining for professional services, any person who, on the date such assistance or any part thereof was rendered, or within one year prior thereto, shall have served as an officer, attorney, agent, or employee, occupying a position or engaging in activities which the Secretary shall have determined involve discretion with respect to the granting of assistance under this Act.

"RECORD OF APPLICATIONS

"SEC. 19. The Secretary shall maintain as a permanent part of the records of the Department of Commerce a list of applications approved for financial assistance under section 6, which shall be kept available for public inspection during the regular business hours of the Department of Commerce. The following information shall be posted in such list as soon as each application is approved: (1) the name of the applicant and, in the case of corporate applications, the names of the officers and directors thereof, (2) the amount and duration of the loan for which application is made, (3) the purposes for which the proceeds of the loan are to be used, and (4) a general description of the security offered.

"PREVAILING RATE OF WAGE AND FORTY-HOUR WEEK

"SEC. 20. All laborers and mechanics employed by contractors or subcontractors on projects assisted by the Secretary under this Act and undertaken by public applicants shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a–5), and every such employee shall receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in any workweek in excess of eight hours in any workday or forty hours in the workweek, as the case may be. The Secretary shall not extend any financial assistance under section 6 for such a project without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this provision, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z–15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948, as amended; 40 U.S.C. 276c).

"ANNUAL REPORT

"SEC. 21. The Secretary shall make a comprehensive and detailed annual report to the Congress of his operations under this Act for each fiscal year beginning with the fiscal year ending June 30, 1962. Such report shall be printed and shall be transmitted to the Congress not later than January 3 of the year following the fiscal year with respect to which such report is made. Such report shall show, among other things, (1) the number and size of Government contracts for the furnishing of supplies and services placed with business enterprises located in redevelopment areas, and (2) the amount and duration of employment resulting from such contracts. Upon the request of the Secretary, the various departments and agencies of the Government engaged in the procurement of supplies and services shall furnish to the Secretary such information as may be necessary for the purposes of this section.

"APPROPRIATION

"SEC. 22. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

"USE OF OTHER FACILITIES

"SEC. 23. (a) To the fullest extent practicable in carrying out the provisions of this Act the Secretary shall use the available services and facilities of other agencies and

instrumentalities of the Federal Government, but only with their consent and on a reimbursable basis. The foregoing requirement shall be implemented by the Secretary in such a manner as to avoid the duplication of existing staffs and facilities in any agency or instrumentality of the Federal Government. The Secretary is authorized to delegate to the heads of other departments and agencies of the Federal Government any of the Secretary's functions, powers, and duties under this Act as he may deem appropriate, and to authorize the redelegation of such functions, powers, and duties by the heads of such departments and agencies.

"(b) Departments and agencies of the Federal Government shall exercise their powers, duties, and functions in such manner as will assist in carrying out the objectives of this Act. This Act shall be supplemental to any existing authority, and nothing herein shall be deemed to be restrictive of any existing powers, duties, and functions of any other department or agency of the Federal Government.

"(c) Funds authorized to be appropriated under this Act may be transferred, with the approval of the Director of the Bureau of the Budget, between departments and agencies of the Government, if such funds are used for the purposes for which they are specifically authorized and appropriated.

"(d) Subject to the standards and procedures prescribed by section 505 of the Classification Act of 1949, as amended, the head of any agency, for the performance of functions under this Act, including functions delegated pursuant to subsection (a), may place positions in grades 16, 17, and 18 of the General Schedule established by such Act, and such positions shall be in addition to the number of such positions authorized by section 505 of the Classification Act of 1949, as amended, to be placed in such grades: *Provided*, That not to exceed a total of fifteen such positions may be placed in such grades under this subsection, to be apportioned among the agencies by the Secretary, with the approval of the Director of the Bureau of the Budget.

"RECORDS AND AUDIT

"SEC. 24. (a) Each recipient of assistance under section 6 of this Act shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

"(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 6 of this Act.

"LOANS TO STATE AND LOCAL DEVELOPMENT COMPANIES

"SEC. 25. Section 502 of the Small Business Investment Act of 1958 is amended by striking out paragraph (6).

"STUDY BY SECRETARY

"SEC. 26. The Secretary shall make a study of the feasibility of establishing procedures to provide for increased use of military bases, and Government-owned plants and facilities for the manufacture or production of munitions and other supplies for the Government, which are located in areas designated under section 5 of this Act as redevelopment areas and which are not fully utilized, whenever such use is consistent with the national defense, economy in Government operation, and other Government procurement objectives. Upon the completion of such study the Secretary shall submit to the Congress a report of his findings together with such recommendations for legislative and other action as he may deem appropriate.

"APPLICATION OF ACT

"SEC. 27. As used in this Act, the terms 'State', 'States', and 'United States' include the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa."

Mr. WIDNALL (interrupting the reading). Mr. Speaker, I ask unanimous consent that further reading of the bill be dispensed with.

Mr. PATMAN. Mr. Speaker, reserving the right to object, is this the same as the substitute that was offered in the committee?

Mr. WIDNALL. It is the same as the substitute bill.

Mr. PATMAN. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentlemen from New Jersey?

There was no objection.

The SPEAKER. The question is on the motion to recommit.

Mr. WIDNALL. Mr. Speaker, on this vote I ask for the yeas and nays.

The yeas and nays were ordered.

The question was taken and there were—yeas 127, nays 291, not voting 13, as follows:

[Roll No. 32]

NOT VOTING—13

Buckley	McDonough	Weaver
Cannon	McSween	Willis
Durno	Moulder	Wright
Fino	Scott	
Harrison, Va.	Spence	

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Buckley for, with Mr. McDonough against.
Mr. Fino for, with Mr. Weaver against.
Mr. Willis for, with Mr. Durno against.
Mr. Spence for, with Mr. Scott against.
Mr. Moulder for, with Mr. Harrison against.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. PATMAN. Mr. Speaker, I ask unanimous consent that all Members may be privileged to revise and extend their remarks and to include extraneous matter at the points of the consideration of the various amendments.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

FIFTH SEMIANNUAL REPORT OF THE SECRETARY OF THE INTERIOR—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER laid before the House the following message from the President of the United States; which was read and, together with the accompanying papers, referred to the Committee on Interior and Insular Affairs:

To the Congress of the United States:

I transmit herewith the Fifth Semiannual Report of the Secretary of the Interior prescribed by section 5 of the act of August 21, 1958, entitled "To provide a program for the discovery of the mineral reserves of the United States, its territories and possessions by encouraging exploration for minerals, and for other purposes."

JOHN F. KENNEDY.

THE WHITE HOUSE, *March 29, 1961.*

AMENDING THE REORGANIZATION ACT OF 1949

Mr. BOLLING. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 238 and ask for its immediate consideration.

The Clerk read as follows:

Resolved, That upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 153) to further amend the Reorganization Act of 1949, as amended, so that such Act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963, and all points of order against said bill are hereby waived. After general debate, which shall be confined to the bill and continue not to exceed one hour, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations, the bill shall be read for amendment under the five-minute rule. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such amendments as may have been adopted and the previous question shall be considered as order on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. BOLLING. Mr. Speaker, I yield 30 minutes to the gentleman from Ohio [Mr. BROWN]; and pending that I yield myself such time as I may consume.

Mr. Speaker, the resolution just read makes clear its purpose. It is to make in order, under an open rule and with 1 hour of general debate, consideration of S. 153 which would reinstate the so-called Reorganization Act. I know of no opposition to the rule and only very limited opposition to the bill itself.

Mr. Speaker, I therefore reserve the balance of my time.

Mr. BROWN. Mr. Speaker, as the gentleman from Missouri [Mr. BOLLING] has well said, this resolution was adopted by the Committee on Rules by a unanimous vote making in order the consideration of the bill S. 153, a bill to continue or reestablish the Reorganization Act. The bill as passed by the other body is exactly identical with the

bill H.R. 5742, which was approved by the House Committee on Government Operations with but one dissenting vote, if I remember correctly.

The bill itself would extend the right of the President to set up reorganization plans between now, or the time of the adoption of this bill, and June 1, 1963, which could be rejected at any time by adoption of a resolution of rejection either by the House or by the Senate within 60 days by a simple majority vote. It is very similar to the law which was in effect during the Eisenhower administration.

Mr. Speaker, I have no requests for time and I yield back the balance of my time.

Mr. BOLLING. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

Mr. FASCELL. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (S. 153) to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963.

The motion was agreed to.

Accordingly, the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill S. 153, with Mr. IKARD of Texas in the chair.

The Clerk read the title of the bill.

By unanimous consent the first reading of the bill was dispensed with.

Mr. FASCELL. Mr. Chairman, I yield myself such time as I may consume.

Mr. Chairman, the pending legislation simply revised the Reorganization Act until June 1, 1963. The act has not been in effect. Although this body voted on it last year, it was not acted upon by the Senate.

As you know, under this bill the President has the authority to submit reorganization plans for the executive branch of the Government to the Congress. Those plans would become effective unless a resolution of disapproval were passed by either House within 60 days from the date of transmittal of the plan. Under the existing law this requires a simple majority.

This matter has been before the Committee on Government Operations many times and has been approved by them, and in this last case was approved with but one dissenting vote. We have extended this legislation for many years and it has proved to be effective and useful to the Chief Executive in carrying out the mandates of the Congress in the law for the purpose of reorganization, transferring of functions, consolidations, and the elimination of duplications and overlapping. This legislation comes about as the result of the report of the Hoover Commission, on which the distinguished gentleman from Ohio on the minority side [Mr. BROWN] served.

Technically speaking, the bill before us, adopted by the other body, simply strikes out the date of June 1, 1959, and inserts in lieu thereof June 1, 1963. In all other aspects the law remains the same for the purposes of the act.

Similar authority is not new. It has been with us going back over many years. It has been used, as was said in the discussion on the rule, by both Democratic and Republican administrations. Some 58 reorganization plans have been sent down to Congress, and 44 have been acted on favorably. The others were turned down by the Congress of the United States. The President, through the Bureau of the Budget, has indicated the necessity and the desirability of continuing this authority so that he may undertake in this administration such reorganization plans as he may deem advisable within his judgment.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Iowa.

Mr. GROSS. Do I correctly understand that this authority expired on June 1, 1959?

Mr. FASCELL. As I explained in my remarks, the House acted on this in the last session of the Congress but it was not acted upon by the other body, so the law lapsed. This will extend it for 2 years.

Mr. GROSS. There has been no difficulty in connection with the working of the law?

Mr. FASCELL. No difficulty, and no reorganization plans, either.

The purpose of the legislation is to give the President the same power as other Chief Executives to send down a reorganization plan. I would point out, too, while I am answering the question, that of course any reorganization plan would have the close scrutiny of the Committee on Government Operations. We have not always gone along with the Executive. As I have said, we turned down quite a few of them. So while there may be a difference of opinion from a legal or a political standpoint in some cases, we believe there is justification and sound reason for the passage of this legislation.

Mr. BROWN. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Ohio.

Mr. BROWN. Any Member can introduce a resolution rejecting the plan?

Mr. FASCELL. The gentleman is absolutely correct. If any Member decides that the reorganization plan does not suit him or that it is inimical to any principles he might hold, he is at liberty under the law to introduce a resolution of disapproval within the required time. There is the further protection in the bill, as I recall it, that the committee must act within 10 days or the committee is discharged from the consideration of the resolution.

Mr. BROWN. The 60 days does not count until after the plan has been transmitted?

Mr. FASCELL. That is a further protection.

Mrs. CHURCH. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentlewoman from Illinois.

Mrs. CHURCH. May I ask the gentleman if it is correct that there is no change in the original bill except the date?

Mr. FASCELL. That is correct. It requires a simple majority of either House. The pending bill simply extends the date.

Mrs. CHURCH. I thank the gentleman.

Mr. MEADER. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Michigan.

Mr. MEADER. I commend the gentleman from Florida, a member of the subcommittee which handled this legislation, for his efforts in maintaining the ordinary method of acting on resolutions by the House of Representatives and the other body rather than reverting to the original constitutional majority. I think the legislation is far better when we can work our will in the ordinary way in passing upon legislation.

Mr. FASCELL. I thank the gentleman from Michigan. That points out the fact that in the request from the Bureau of the Budget a request was made for an indeterminate time—no fixed period of time—for the legislation to expire and they also requested a constitutional majority. In the first study by the subcommittee, we went along with the idea of a 4-year extension and a constitutional majority. On further reflection and consideration, we went back and decided we would go along simply with a 2-year extension and maintain the simple majority that is in the bill for the very reason that the gentleman from Michigan points out.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. FASCELL. I yield to the gentleman from Iowa.

Mr. GROSS. With the gentleman's explanation, I want to commend the gentleman too, for the bill that has been brought here.

Mr. FASCELL. I thank the gentleman from Iowa.

Mr. BROWN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. HOFFMAN], the ranking member of the Committee on Government Operations.

Mr. HOFFMAN of Michigan. Mr. Chairman, the first 15 words in the Constitution state that the legislative power is vested in the Congress of the United States. Then when we came here at the beginning of this session, each raised his right hand and swore that he would support the Constitution. Under this bill, we are delegating the constitutional power to legislate to the President and whatever he sends down here becomes the law of the land unless we, within 60 days, veto his proposal. We filed a report which will be read and, as in other years, it will express opposition to this method. If any Member chooses to let the President legislate for us reserving only to ourselves the veto—if anyone wants to transfer that legislative power to the President, subject to our disapproval, that is his business not mine. That is all I have to say about this bill.

Mr. GROSS. Mr. Chairman, will the gentleman yield?

Mr. HOFFMAN of Michigan. I yield to the gentleman from Iowa.

Mr. GROSS. This reorganization plan does not go to the committee?

Mr. HOFFMAN of Michigan. All plans go to the committee, but the plan becomes law if the committee bottles it up or the House fails to act.

Mr. GROSS. The committee is free to amend the plan that is sent down to the White House; is it not?

Mr. HOFFMAN of Michigan. They used to say it was not, but the committee or the House can amend a plan. Somebody said a long time ago that you had to keep your eye on things because unless you did the first thing you knew everything you cherished might be lost.

Mr. GROSS. That is right.

Mr. HOFFMAN of Michigan. Does the gentleman from Iowa think he can shuck off his duty under the Constitution to pass on legislation?

Mr. GROSS. Not at all.

Mr. HOFFMAN of Michigan. Can the Congress shirk its duty to legislate by attempting to give itself a veto power? We know very well that a President always has sent down bills containing the administration's views—bills which went to the regular legislative committees and then to the Rules Committee, and then to the House.

My view on this bill as expressed in the report reads:

Ever since the Congress, in the Economy Act of 1932,[1] gave President Hoover power to submit reorganization plans, the delegation of authority to submit reorganization plans has, in each instance, been a partial surrender of the legislative power of Congress to the President.

The Constitution plainly states: [2]

"All legislative powers herein granted shall be vested in a Congress of the United States, which shall consist of a Senate and House of Representatives," and makes clear that [3] "every bill which shall have passed the House of Representatives and the Senate, shall, before it becomes a law, be presented to the President of the United States."

The same section gives the President the veto power. It does not, nor does any other section of the Constitution, authorize the reverse of this procedure which would have the President, through the executive agencies which he controls, propose legislation to the Congress for its approval or rejection.

This bill, if it becomes law, authorizes the President to enact legislation without action of either House—a clear violation of the Constitution.

The Constitution directs the President to [4] "from time to time give to the Congress information of the state of the Union, and recommend to their consideration such measures as he shall judge necessary and expedient."

The President also may have, and frequently has actually had, drafts of legislation introduced by request. No more authority is required for him in order to initiate legislation. To go further is to violate the very section of the Constitution which vests the legislative power in the Congress. There is no reason to authorize the President to legislate—give him legislative power—unless we want and need a dictator.

[1] 47 Stat. 413.
[2] Art. I, sec. 1.
[3] Art. I, sec. 7.
[4] Art. II, sec. 3.

All the reorganization acts that Congress has passed have carried an unconstitutional delegation to the President of the legislative authority granted Congress.

Because the President and the executive department have always been free to send to Congress legislative proposals, my position has always been to oppose this unconstitutional delegation of congressional power. Nor has the Congress authority to surrender the power granted by the Constitution, transfer it to a President.

My opposition to what is considered an unconstitutional delegation of congressional authority has been repeatedly stated on the floor [5] and in reports.[6]

In passing, it might further be observed that, as the years have gone by, the opposition to this delegation of authority has steadily increased, as from time to time additional Members, including the present chairman or our committee which reported out this bill, have expressed their opposition.

This change of viewpoint has also been indicated by the lessening of the opposition required to veto plans suggested.[7]

This changing view has also been reflected through the years in debate on the House floor, in hearings and reports of the Committee on Government Operations. (See app. A, compiled by the sole minority (Republican) counsel, J. Philip Carlson.)

The reason for my opposition to the present bill could not be more clearly and cogently expressed than by the statement, and I quote:

"I desire to register my recognition of the fundamental objects to and defects in the Reorganization Act. In principle it is a part of the creeping encroachment on a power vested by the Constitution in the Congress; in practice it is a part of the arrogance associated with the claim of Executive privilege.

* * * * *

"From time to time as extensions of the act have come before the House, the proponents of the bills have shown a tendency to avoid the quicksands of an untenable constitutional argument and to seek a firmer ground for extension in the amenities which they say should be accorded the President to whatever party he may belong.

"After 6 years such courtesy, like that accorded a guest who overstays his welcome, becomes tenuous and unsubstantial. For me it no longer is a ground for extending the operation of the act.

"It remains constitutionally indefensible. I would let it die."

Because the foregoing statement is but a quotation from the views expressed by the very competent, aggressive, entertaining, instructive, and ever-on-the-job gentleman from California, Mr. Moss, chairman of the subcommittee on which with advantage I have served for some years, permit me most humbly to suggest that Members of Congress interested in constitutional government read again his statement (Additional Views, H. Rept. 367, May 18, 1959, on H.R. 5140, 86th Cong., 1st sess., pp. 10, 11).

The desire which he so eloquently and persuasively expressed came to pass June 1, 1959. The country has survived.

With a young and vigorous President, so frequently sending messages to Congress, calling for the creation of a utopia, and a humble, obedient party majority accepting his and his advisers' views so quickly and without what some might consider adequate discussion, there would seem to be no reason why we should publicly acknowledge that we are but rubberstamps.

Mr. BROWN. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, I regret very much that I am unable to say I am a graduate of either the University of Michigan or Northwestern Law School. I went to a little country school in Virginia called Washington and Lee where I studied law.

I want to say two or three things, if I may, quickly, to correct, if you have the wrong impression, what this legislation will do.

In the first place, this legislation would in no way interfere with the right of Congress to legislate on any matter. The Congress can legislate as the Constitution provides, to create departments, put agencies of Government together, or whatever it might want to do, regardless of whether this legislation is in effect or not.

All this does is to confer upon the President of the United States, as has been conferred upon a number of former Presidents, the power, for a limited time, to submit to Congress, plans for the consolidation or the reorganization of agencies within the executive branch of Government. He can go even further than that; he can recommend to the Congress that certain new agencies be combined; that is, as now constituted they can be given another name, and perhaps even a Cabinet rank. Then, when that particular reorganization plan is submitted to Congress, it is referred to the House Committee on Government Operations, and to the Senate Committee on Government Operations.

Those committees, either one or both of them, hold hearings. Within 60 days any Member of Congress can file a resolution of rejection or a resolution to the effect that he disagrees with this suggested program of reorganization or the reorganization plan itself. A vote is taken in the branch, whichever it may be, House or Senate, and if by a simple majority either branch of the Congress rejects or adopts a resolution rejecting the plan, it is dead. If the Congress does not see fit, or any branch of the Congress does not see fit to do this, it becomes effective within 60 days.

The only controversy we have had over these bills for reorganization plans to be submitted over a number of years has been the type of vote and/or the number of votes that would be required in the Congress to reject the plan.

Originally it required a constitutional majority of both branches of Congress. That was pretty difficult to get. Then

[5] CONGRESSIONAL RECORD, vol. 95, pt. 1, pp. 524–525, 891–892; vol. 99, pt. 1, pp. 777–781; vol. 101, pt. 1, pp. 780–786; vol. 103, pt. 8, p. 11269.

[6] Additional Views, H. Res. 534 (H. Rept. 2585), 84th Cong., 2d sess., filed July 3, 1956; H.R. 541 (H. Rept. 2599), 84th Cong., 2d sess., filed July 3, 1956; H.R. 8364 (H. Rept. 657), 85th Cong., 1st sess., filed June 27, 1957; H.R. 5140 (H. Rept. 367), 86th Cong., 1st sess., filed May 18, 1959.

[7] Reorganization Act of 1939 (53 Stat. 561) required concurrent resolution.

Reorganization Act of 1945 (59 Stat. 613) required concurrent resolution.

Reorganization Act of 1949 (63 Stat. 203) required a majority of the authorized membership of either House as did amendments of 1953 (67 Stat. 4) and 1955 (69 Stat. 14).

Act of Sept. 4, 1957 (71 Stat. 611), amending the Reorganization Act of 1949, required simple majority of those present and voting in either House.

later it was a constitutional majority required in one branch. We fought that out. I opposed it. I said that you are going to do this in reverse of the usual procedure of enacting a bill. If the bill fails to get a majority of those present in the House to vote in favor of it, it fails of passage. Therefore, we should have the same right to reject. We had a battle over that on a number of bills in the past.

When the bill S. 153 was messaged over to our committee and taken up, providing for a simple majority, the committee or some members of the committee suggested that the bill be amended so as to require a constitutional majority, which would mean that if there are only 220 Members voting in the House you would have to get 219 of them to vote to reject that particular plan instead of 111. There is a lot of difference there. As the ranking member of that subcommittee I stated I would fight that kind of an arrangement, that I would oppose it. Other members of the committee took the same position. As a result an agreement was reached in the subcommittee first, then in the full committee, with the exception of my friend and my leader here, the gentleman from Michigan [Mr. HOFFMAN] who is the ranking member of the full committee, that we would accept this sort of an arrangement.

Out of fairness to the gentleman from Michigan [Mr. HOFFMAN] and to you, I think we should give him credit. Throughout the years he has stood against and has opposed with all the vigor at his command, and he has that vigor, any reorganization act of this kind or any other kind. He just does not believe in that system, and I recognize his right to feel that way, and I respect him for his views. He has expressed them very ably today.

Mr. HOFFMAN of Michigan. Mr. Chairman, will the gentleman yield?

Mr. BROWN. I yield to the gentleman from Michigan.

Mr. HOFFMAN of Michigan. I want to ask the gentleman one question. Is it not true if the President sends down a reorganization plan it becomes the law of the land unless the Senate or the House takes affirmative action?

Mr. BROWN. That is right. It is equally untrue, as was stated a while ago, that this takes away from the Congress the right to legislate, because it does not.

Mr. HOFFMAN of Michigan. Nobody said it did, but you transfer the right to initiate a bill and it becomes law unless we do something about it. Why should we have to veto it?

Mr. BROWN. We delegate to the President the right to consolidate or to reorganize the agencies in his own department. Unless we find some reason why such reorganization or such a realinement of agencies should be rejected by the Congress, it is approved. That is the right that is given any executive in any corporation in America.

Mr. FASCELL. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas [Mr. HARRIS].

Mr. HARRIS. Mr. Chairman, I want to thank the gentleman from Florida and the gentleman from Ohio for their explanation of the bill and the position that has been stated with reference to this bill extending the Reorganization Act of 1949 as amended. I want to, however, raise some questions with both gentlemen with reference to the independent regulatory agencies of the Government.

Mr. BROWN. I think I know what your questions will be.

Mr. HARRIS. Well, I have two or three I want to raise for the RECORD.

First I want to compliment the committee for having reported this bill which requires a simple majority, as the gentleman from Ohio just explained, as well as the gentleman from Florida, and the understanding which the Members are giving to the committee and to the Congress at this time. I think most of you know that I have been, in our committee, concerned with the problems of the independent regulatory agencies now for some time. We have given a great deal of time and a great deal of thought and a great deal of study in an effort to improve administrative procedures, to find out if there were inadequacies in the law, and to see that those agencies remained independent agencies of the Government, as was intended when they were created by this Congress.

First let me say that I am sure most of you are somewhat familiar with the so-called Landis report to the President of the United States late in December. If you have not read that report, I would like to suggest to you, because of the importance of it and the importance of this subject, that you become familiar with it.

Very frankly, I was quite concerned about several of the recommendations. I am still concerned about several of them, because I think that some of the recommendations have tended toward interfering with the independence of the agencies and toward making them more subservient to the executive, that is, the executive branch of the Government and the White House. That I do not believe would be in the best interest of the administrative agencies of this Government and the American people. I suggest you read the statement which I put in the RECORD on March 14 explaining my position as to the responsibility of the Congress and the responsibility of the Executive in connection with these agencies. These agencies are an arm of the Congress. They are set up as instruments of the Congress, to legislate primarily on behalf of the Congress, because the Congress is not so constituted to do a lot of the things that must be done. The Congress itself has delegated the powers to these agencies.

So, consequently, I am watching and I am going to watch and our committee is going to watch very carefully and keep a constant check. I say to the distinguished members of the Committee on Government Operations, to the distinguished chairman of the committee and other members, that we are going to be watching very carefully and we are going to be closely scrutinizing any reorganization plans that come up here that intend to carry out some of the provisions at least of the so-called Dean Landis report.

Now, with that statement I would like to ask the gentleman this question: When a reorganization plan is submitted, under the rule it automatically goes to the Committee on Government Operations; is that not true?

Mr. FASCELL. I do not know whether it is under the rule or not, but it goes to the committee.

Mr. BROWN. Mr. Chairman, will the gentleman yield? I think I can answer that question.

Mr. HARRIS. Yes, I yield to the gentleman from Ohio.

Mr. BROWN. In the first place, if the gentleman will study the Reorganization Act of 1949, the basic act which we are amending here, he will see this.

The CHAIRMAN. The time of the gentleman from Arkansas [Mr. HARRIS] has expired.

Mr. FASCELL. Mr. Chairman, I yield the gentleman 5 additional minutes.

Mr. BROWN. Mr. Chairman, if the gentleman will study the Reorganization Act carefully—I do not have it in front of me, so I cannot read it—the original act, in 1949, which we are amending by this bill, he will see that the authority of the President to submit reorganization plans deals only with those agencies within the control of the executive branch of the Government that are a part of the executive branch. The regulatory agencies are not. As the gentleman so well explained, these are independent agencies established as arms of the Congress.

Mr. HARRIS. Does the gentleman contend that the President does not have authority to submit reorganization proposals affecting these major regulatory agencies of the Government?

Mr. BROWN. I contend that he does not have the power to submit a reorganization plan affecting those agencies under the Reorganization Act.

Mr. HARRIS. That affect the regulatory agencies?

Mr. BROWN. That affect any agency primarily responsible to Congress, which includes the regulatory agencies.

The President has the power only, with respect to the regulatory agencies, to name members. He cannot even, as was suggested the other day by a statement from the White House—under the law and the Constitution, if it means anything—he cannot issue a directive ordering a regulatory agency to make a report to him. Those reports come to the Congress of the United States.

Mr. HARRIS. We have discussed that and the record is replete with it. But I believe there is some misunderstanding here. Certainly since authority has been given to the Executive to submit reorganization plans, plan after plan has been submitted to the Congress and acted upon, agreed to or not, by the Congress, affecting these regulatory agencies. In 1940, I believe it was, under the authority of the President to submit reorganization plans, there was a reorganization plan submitted by President Roosevelt amending the Federal Power

Act which gives the President authority to designate the Chairman. Under present law that was not drawn correctly, and we have an ambiguity in the act which has prevailed until this day. I introduced a bill the other day to clear up that ambiguity, because a situation has arisen which needs clarification.

As much as I respect the views of the gentleman from Ohio I believe he is incorrect when he says that the President does not have authority to submit reorganization plans affecting these regulatory agencies.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman.

Mr. HOLIFIELD. Mr. Chairman, I think my friend, the gentleman from Ohio [Mr. BROWN], is wrong in his interpretation of the act. Section 7 of the Reorganization Act, which you will find on page 8, gives the right to the President to send up reorganization plans on any agency—and it goes through a whole list of departments of the Government, but does not include the Comptroller General of the United States, the General Accounting Office.

Mr. HARRIS. I believe the gentleman is correct on that. I want to pursue this matter further, Mr. Chairman.

When a reorganization plan is submitted, under the rule, it goes to the Committee on Government Operations for its consideration. Now I ask the gentleman, is there any opportunity for public hearings after one of these plans goes to the committee?

Mr. FASCELL. Always, I will answer the gentleman, and furthermore, there is nothing to prevent any Member of of the House from filing a disapproving resolution.

Mr. HARRIS. I have heard that, but 10 days pass mighty fast, and 60 days pass awfully fast when it comes to holding hearings and taking action on a bill that is referred to a committee.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman.

Mr. HOLIFIELD. The House has control of that, because any Member may file a disapproving resolution.

Mr. HARRIS. I know that; I am familiar with that.

Mr. HOLIFIELD. And then the committee is required to hold hearings on it and has always held hearings any time a disapproving resolution was offered.

Mr. HARRIS. It may be that the gentleman considers that adequate hearings have been held in the past, but from my information and observation I think some of them have been inadequate.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. HARRIS. Will the gentleman from Florida yield me 3 additional minutes?

Mr. FASCELL. I yield the gentleman 3 additional minutes, but why does he not lay off our committee?

Mr. HARRIS. I am talking about the gentleman's committee, but I want an understanding. I want to say to the gentleman and his committee that if some of these far-reaching plans affecting these agencies come up here I am putting you on notice that our committee intends to hold some hearings on them with a view of trying to be in a position to make recommendations to you.

Mr. FASCELL. I respect the considerations of the distinguished chairman of that committee. Certainly we on the Committee on Government Operations could not begin to tell you what to do. I am not chairman of the full committee, but I can assure the gentleman that our committee will hold proper hearings on any matter that is before us.

Mr. HARRIS. I thank the gentleman for that assurance.

Mr. BROWN. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from Ohio.

Mr. BROWN. I have checked the records about the reorganization plans that have been sent up here, and the only one that might possibly be designated as relating to a regulatory agency had to do with the Civil Aviation Board.

Mr. HARRIS. The old Civil Aeronautics Authority was changed because of a reorganization by the President. There are a number of these agencies where the status of the chairman has been changed because of reorganization plans of the President. In the so-called Landis report there was a recommendation as to submitting reorganization plans that apparently would grant extensive power and authority to the chairmen of these agencies with reference to the administration of those laws within the agencies themselves.

Mr. FASCELL. I could make the very simple suggestion that there are two avenues open, it appears to me. One is the disapproval resolution on the existing plan sent down, and the other is to submit affirmative legislation within the jurisdiction of the gentleman's committee so that committee could hold whatever hearings it wanted.

Mr. HARRIS. I understand the gentleman's recommendation, but a reorganization plan comes up here, and the gentleman says within 10 days we have to act.

Mr. DAWSON. Sixty days.

Mr. HARRIS. The gentleman advised me that if within 10 days the committee did not act it was subject to be discharged from further consideration.

Mr. FASCELL. That is only on a disapproval resolution. That is not on the plan itself.

Mr. HARRIS. I am talking about the action of the gentleman's committee.

Mr. FASCELL. Our committee can only act on the disapproval resolution. The law provides that if we do not act within 10 days a motion to discharge is in order.

Mr. HARRIS. That is the point.

Mr. FASCELL. That is on the disapproval resolution, not on the plan.

Mr. HARRIS. The gentleman knows how legislation works here, that you do not have much time to announce and get ready for hearings and have adequate hearings in 10 days.

Mr. BROWN. Mr. Chairman, will the gentleman yield further?

Mr. HARRIS. I yield to the gentleman from Ohio.

Mr. BROWN. The gentleman from Michigan [Mr. MEADER] and I have been checking the record, and I do find that in the past there have been reorganization plans submitted respecting some of the regulatory agencies. I was incorrect in that assumption, but I still believe I am right constitutionally as far as that is concerned as a matter of law. But inasmuch as the President does not have any direct authority over regulatory agencies, the plan itself would be subject to a point of order if someone wanted to bring it up, as a matter of fact. But we have had reorganization plans a number of years ago dealing with regulatory agencies; several of them, in fact.

Mr. HARRIS. I do not want the gentleman to think I am taking this time to express opposition to this bill. I am not at all. There is no reflection on the committee whatsoever. However, it is important to me that these independent agencies are so important as an arm of the Congress that I think all of the Members of Congress should be put on notice as to what might come up with reference to a reorganization plan. I think adequate consideration should be given to these plans.

Mr. HOLIFIELD. Mr. Chairman, will the gentleman yield?

Mr. HARRIS. I yield to the gentleman from California.

Mr. HOLIFIELD. I just want to point out that when the reorganization plan comes up, it is referred to our committee and it lies before our committee for 60 days unless a disapproving resolution is dropped in the box. If the disapproving resolution is dropped in the box on the first day, when it is first sent up, or on the second day, our committee must then, within 10 days, hold hearings. That is the mandatory part—the 10 days. If there is no disapproving resolution—if there is no Member of the body who has enough interest in the subject matter to put in a disapproving resolution, then the law automatically becomes effective unless some member of our committee—and we have in many instances put in disapproving resolutions on plans which have come up and held hearings in our committee and brought disapproving resolutions to the floor and disapproved reorganization plans on the floor.

Mr. HARRIS. I know that is true.

Mr. HOLIFIELD. So the gentleman has adequate coverage because there is public notice—the reorganization plan is assigned to our committee. It appears in the CONGRESSIONAL RECORD and the gentleman to insure immediate attention can have his own committee hold hearings on a regular bill containing the contents of the reorganization plan. He could immediately call hearings of his own committee. This is not a matter of conflict of jurisdiction, in my opinion.

Mr. HARRIS. I recognize that.

Mr. HOLIFIELD. The jurisdictional area is completely protected.

Mr. HARRIS. I would not agree wholeheartedly with that because you

do not develop legislation in these committees on legislative bills ordinarily within 60 days and report it.

Mr. HOLIFIELD. I would say that the President's powers to send up a reorganization plan is sharply limited and those limitations are set forth in the act itself. He can only transfer from area to area. He can change the name, but he cannot extend the function—he cannot put in new functions. It is a matter of reorganization within existing statutes.

Mr. HARRIS. He cannot offer resolutions that would change the basic law or the substance.

Mr. HOLIFIELD. Or abolish an agency or any function of the agency.

Mr. HARRIS. The Civil Aeronautics Authority was practically abolished and it went into a new agency. We know what the experience has been on some of these things. But, the point is, I do want the committee to know, and I think all of us should be interested in these problems and in case some of them come up, which is very likely, and if these recommendations are carried out, they should be given very, very close scrutiny and careful consideration.

Mr. BROWN. Mr. Chairman, I yield 5 minutes to the gentleman from Michigan [Mr. MEADER].

Mr. MEADER. Mr. Chairman, I am glad the gentleman from Arkansas [Mr. HARRIS] raised this question because it points up one of the important aspects of this very unusual method of legislation.

I am inclined to agree with my friend, the gentleman from Michigan [Mr. HOFFMAN], that this bill vests legislative authority in the Executive and that probably it is not a good way to determine policy for our Government.

But, I am willing to go along with granting this 2-year authority to President Kennedy on the ground that that issue, whether constitutional, or a matter of legislative policy, is a matter that was determined long ago. President Hoover had such authority. President Roosevelt had such authority. President Truman had such authority. And President Eisenhower had such authority.

President Kennedy in bringing in a new organization with new ideas and a new program ought at least to have the right in the initial years of his administration to organize the executive branch of the Government according to his view of what he needs to carry out his responsibilities.

The point of the discussion with the gentleman from Arkansas is that under rule XI 8(b) of the House, as to the jurisdiction of the Committee on Government Operations, all reorganizations in the executive branch of the Government are referred to the Committee on Government Operations.

But these reorganizations may affect agencies concerning which the legislative jurisdiction is in other committees. Just as the gentleman from Arkansas, chairman of the great Committee on Interstate and Foreign Commerce, has pointed out, the Interstate Commerce Committee has jurisdiction over many of the regulatory bodies.

There have been at least a half dozen, if not a dozen, plans sent up reorganizing the independent regulatory bodies.

One of them recently has been the subject of bitter complaint before our Antitrust Subcommittee of the Committee on the Judiciary.

Reorganization Plan No. 21 of 1950 reorganized the Federal Maritime Commission. The name was changed to the Federal Maritime Board and the officials of the regulatory board both administered the ship subsidy program and also regulated the shipping industry. It resulted in a great many complaints. That was a bad reorganization plan.

I believe the gentleman is correct that we have very limited time to scrutinize these plans. They are usually well worked out, but sometimes they involve the transfer of great authority, and 10 days within which the committee may consider a resolution of disapproval is altogether too short a time.

But I think this is a case where committees having concurrent jurisdiction have to get along with each other. There should be cooperation between the Government Operations Committee, for example, and the legislative committee having jurisdiction of the subject matter of the reorganization so that the legislative committee can call the attention of the Committee on Government Operations to any dangers that might exist, or suggest whatever they think should be done about it.

There is another aspect of reorganization plans that is unusual as a practical matter. Since it is a Presidential law with a congressional right of veto it is very likely that such a reorganization plan is more permanent than the ordinary law which is originated and passed by Congress and approved by the President. It would take a two-thirds vote of the House to override the veto of an Executive who thought his plan was good and ought not to be changed by a new law. It is likely he would continue to think his plan was good or he would not have sent it up in the first place.

That proposition, it seems to me, is often overlooked when we consider and approve reorganization plans.

I think we have to go along with this 2-year extension of Presidential reorganization power and intend to vote for the bill.

Mr. JUDD. Mr. Chairman, will the gentleman yield?

Mr. MEADER. I yield to the gentleman from Minnesota.

Mr. JUDD. Mr. Chairman, as one who served on this great committee in the years when this was being adopted, I would like to add just a word. It has been said that this is creeping encroachment on the legislative authority of the Congress; as a matter of fact, the creeping has been in the other direction.

The original reorganization or Executive Reorganization Act authorized the President to send down these plans and they went into effect after 60 days unless disapproved by both Houses with a constitutional majority in each House. The gentleman from Michigan was here when we had the fight to strike out the constitutional majority, to make it possible to disapprove the Executive plan by a simple majority in both Houses. Some of us contended that was wrong, because a law does not go into effect unless both Houses approve and the President approves. This would allow one House, if it did not pass a disapproving resolution and the President to put something into effect. This was modified in 1957 so a plan can be disapproved now by a simple majority vote in one House. Little by little the encroachment has been back toward greater authority in the Congress instead of the other way.

Mr. MEADER. Let me say to the gentleman we gave away too much authority and now we are trying to take something back.

Mr. JUDD. We gave too much in the beginning, but now we are talking it back.

Mr. BROWN. Mr. Chairman, I must yield myself 3 minutes, because I had my attention called to the fact that we had had some reorganization plans before us dealing with regulatory agencies. I still feel that my original position was correct, and is correct, as far as the law is concerned, and I would like to direct attention, if I may, to section 3 of the Reorganization Act of 1949.

It reads as follows:

> When used in this act, the term "agency" means any executive department, commission, council, independent establishment, Government corporation, board, bureau, division, service, office, officer, authority, administration, or other establishment—

I want to emphasize this language—

> in the executive branch of the Government.

I contend that inasmuch as these regulatory agencies are not in the executive branch of the Government we had no business in the first place considering any of these reorganization plans that were sent up here to reorganize the regulatory agencies of the Government. If there is any law left and any courts left in this land, I believe that interpretation should be placed on it and I hope the gentleman from Arkansas will agree with me. He is a pretty good lawyer.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. BROWN. I yield to the gentleman from Arkansas.

Mr. HARRIS. I do respect the gentleman's views. Having served on the Committee on Interstate and Foreign Commerce with him for several years I know something about his ability to interpret language and to deal with legislation. I am of the opinion, however, in view of the fact that Congress has given the President appointive powers and in some instances removal power and under the law authority with reference to budgetary control, that for this purpose I am fearful those agencies would come within this provision of the law—that is, the meaning of it.

Mr. BROWN. I hope my distinguished friend will not place himself in a position where he will be saying that his belief and conviction is that the regulatory agencies come under the domination, dictation, and control of the Chief Executive. I hope he will always stand

and fight for the thought, the idea, and the proposition that these regulatory agencies are arms of the Congress and come under the jurisdiction of the Congress rather than the jurisdiction of the President.

Mr. FASCELL. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. SMITH].

Mr. SMITH of Iowa. Mr. Chairman, in closing the debate, may I say that this matter has been thoroughly discussed. As one who certainly believes in reorganization and at the same time believes there is merit in some of the arguments, this bill should be adopted. I did have the experience 2 years ago of introducing a resolution of disapproval. I found that there are quite a lot of safeguards that do not appear at first blush. Another thing we should keep in mind is that each new administration has a certain fresh desire to reorganize and to make the executive department more efficient. We should give this administration a chance to forward reorganization plans up here for our consideration.

Mr. ANDERSON of Illinois. Mr. Chairman, I support the adoption of S. 153 to further amend the Reorganization Act of 1949 as amended. This law, when adopted, will continue the same reorganization powers that were enjoyed by former President Eisenhower. As a member of the Committee on Government Operations and further as a member of the Subcommittee on Executive and Legislative Reorganization, I have made some study of the history of this legislation since its original adoption. The power to submit reorganization plans has been vested in every President since former President Hoover was given this authority in 1932. I am happy that S. 153 retains the provision that a simple majority of either House may disapprove a Presidential reorganizational plan. I think that any step beyond that point would represent an undesirable accretion of legislative authority in the President. Indeed there are those who would say that we have gone too far in even permitting the President to submit reorganization plans subject only to legislative disapproval by a simple majority of either House within 60 days. However, it seems to me that in view of the swollen and sprawling Federal bureaucracy that we have today that steps are urgently needed to streamline, simplify, and reduce the many overlapping agencies, departments, and bureaus of the Federal Government. I was pleased to note the other day in the press that the President had by Executive order abolished a number of moribund interdepartmental and interagency committees. I sincerely hope that this is a harbinger of the type of action that the Chief Executive will take under the powers given him by this extension of the Reorganization Act. However, there has been likewise some talk in the press that the President may exercise his authority under this act to superimpose new agencies or new departments, even some of Cabinet level upon the unwieldy structure that we already have.

As a member of the subcommittee of the Government Operations Committee that will have an opportunity to examine the reorganization plans submitted by the President I want to take this opportunity to express the hope that the President will concentrate his efforts on the elimination of agencies within the executive branch and not use this power to create new and unnecessary Federal bureaucracies. I would also hope, particularly in view of the comment that has been made on the floor of this House during the last few days, that the President would not attempt to use his authority under this act to in any way interfere with the independent operation of the various regulatory agencies. I agree that the wording of the act is quite clear; that Presidential authority is limited to those agencies which are located within the executive branch of the Federal Government. This clearly does not encompass the independent regulatory agencies which have traditionally been regarded as an arm of the Congress.

In conclusion, as one who is a new Member of this body and new to the Washington scene, I have been particularly appalled at the constant proliferation of new Government agencies and bodies of all kinds. We had an example of that today in the House when yet another new position, that of Area Redevelopment Administrator was created. Unless this trend is halted the day will soon come when there will be more chiefs than Indians in this country. The powers granted the President under S. 153 present him with an opportunity to reduce the size and cost of the Federal Government in order that we can give some much needed tax relief to the already overburdened taxpayers of this country. I sincerely hope that he will use this act for the purposes that I have indicated.

The CHAIRMAN. If there are no further requests for time, the Clerk will read the bill for amendment.

The Clerk read as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (b) of section 5 of the Reorganization Act of 1949 (63 Stat. 205; 5 U.S.C. 133z–3), as last amended by the Act of September 4, 1957 (71 Stat. 611), is hereby further amended by striking out "June 1, 1959" and inserting in lieu thereof "June 1, 1963".

Mr. HOFFMAN of Michigan. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HOFFMAN of Michigan: After line 7 insert the following:

"SEC. 2. (a) Section 6(a) of the Reorganization Act of 1949 is amended by striking 'there has not been passed by either of the two Houses a resolution stating in substance that that House does not favor the Reorganization plan', and inserting in lieu thereof the following: 'there has been passed by both of the two Houses a resolution stating in substance that that House favors the reorganization plan'.

"(b) Section 202 of such Act is amended by striking out 'does not favor' and inserting in lieu thereof 'favors'."

Mr. HOFFMAN of Michigan. Mr. Chairman, all that amendment seeks to do is to retain in the Congress the constitutional power to legislate. This bill as written lets the President write legislation unless either the Senate or House interposes a veto. The reverse of the constitutional procedure.

Mr. FASCELL. Mr. Chairman, I rise in opposition to the amendment.

Of course, all the amendment does is to kill the Reorganization Act. To do what the gentleman desires to do is to introduce legislation in the affirmative on the subject he is interested in.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Michigan [Mr. HOFFMAN].

The amendment was rejected.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. IKARD of Texas, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (S. 153) to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963, pursuant to House Resolution 238, he reported the bill back to the House.

The SPEAKER. Under the rule, the previous question is ordered. The question is on the third reading of the bill.

The bill was read a third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

A similar House bill (H.R. 5742) was laid on the table.

GENERAL LEAVE TO EXTEND

Mr. FASCELL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to extend their remarks on the bill just passed.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

SUPPLEMENTAL APPROPRIATION BILL FOR THE FISCAL YEAR ENDING JUNE 30, 1961

Mr. THOMAS submitted the following conference report and statement on the bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes:

CONFERENCE REPORT (REPT. NO. 211)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendments numbered 1, 2, 3, 4, 16, 42, 43, 44, 48, 55, 57, 69, 71, 72, 73, and 74.

That the House recede from its disagreement to the amendments of the Senate numbered 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 17, 18, 19, 20, 21, 22, 41, 45, 46, 47, 51, 52, 59, 62, 63, 64, 65, 68, 70, 75, 76, 77, 78, 79, 80, 81, 82, 83, 84, 85, 86, 87, 88, 89, and agree to the same.

Amendment numbered 24: That the House recede from its disagreement to the amendment of the Senate numbered 24, and agree to the same with an amendment as follows: In lieu of the matter proposed by said amendment insert:

"MUTUAL SECURITY

"Development Loan Fund

"For an additional amount for advances to the Development Loan Fund, as authorized by section 203 of the Mutual Security Act of 1954, as amended, $50,000,000 to remain available until expended."

And the Senate agree to the same.

Amendment numbered 26: That the House recede from its disagreement to the amendment of the Senate numbered 26, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$94,000,000"; and the Senate agree to the same.

Amendment numbered 28: That the House recede from its disagreement to the amendment of the Senate numbered 28, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$378,500"; and the Senate agree to the same.

Amendment numbered 29: That the House recede from its disagreement to the amendment of the Senate numbered 29, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$220,000"; and the Senate agree to the same.

Amendment numbered 30: That the House recede from its disagreement to the amendment of the Senate numbered 30, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$50,000"; and the Senate agree to the same.

Amendment numbered 31: That the House recede from its disagreement to the amendment of the Senate numbered 31, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$65,000"; and the Senate agree to the same.

Amendment numbered 32: That the House recede from its disagreement to the amendment of the Senate numbered 32, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$17,500,000"; and the Senate agree to the same.

Amendment numbered 33: That the House recede from its disagreement to the amendment of the Senate numbered 33, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$62,000"; and the Senate agree to the same.

Amendment numbered 34: That the House recede from its disagreement to the amendment of the Senate numbered 34, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$1,625,000"; and the Senate agree to the same.

Amendment numbered 35: That the House recede from its disagreement to the amendment of the Senate numbered 35, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$20,000,000"; and the Senate agree to the same.

Amendment numbered 37: That the House recede from its disagreement to the amendment of the Senate numbered 37, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$250,000"; and the Senate agree to the same.

Amendment numbered 39: That the House recede from its disagreement to the amendment of the Senate numbered 39, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$10,850,000"; and the Senate agree to the same.

Amendment numbered 40: That the House recede from its disagreement to the amendment of the Senate numbered 40, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$42,000,000"; and the Senate agree to the same.

Amendment numbered 49: That the House recede from its disagreement to the amendment of the Senate numbered 49, and agree to the same with an amendment, as follows: In lieu of the sum named in said amendment insert: "$90,000"; and the Senate agree to the same.

Amendment numbered 54: That the House recede from its disagreement to the amendment of the Senate numbered 54, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$360,000,000"; and the Senate agree to the same.

Amendment numbered 56: That the House recede from its disagreement to the amendment of the Senate numbered 56, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$9,000,000"; and the Senate agree to the same.

Amendment numbered 58: That the House recede from its disagreement to the amendment of the Senate numbered 58, and agree to the same with an amendment, as follows: In lieu of the sum proposed by said amendment insert "$333,500"; and the Senate agree to the same.

Amendment numbered 90: That the House recede from its disagreement to the amendment of the Senate numbered 90, and agree to the same with an amendment, as follows: In lieu of the matter proposed by said amendment insert: "'Joint Committee on Reduction of Nonessential Federal Expenditures', $1,880"; and the Senate agree to the same.

The committee of conference report in disagreement amendments numbered 23, 25, 27, 36, 38, 50, 53, 60, 61, 66, 67 and 91.

ALBERT THOMAS,
MICHAEL J. KIRWAN,
CLARENCE CANNON,
BEN F. JENSEN,
JOHN TABER,
Managers on the Part of the House.

CARL HAYDEN,
RICHARD B. RUSSELL
(though unable to attend the conference, I approve this report except as to Senate action in receding on amendments 1, 2, 3, and 4. I think Senate conferees should have insisted on these four),
DENNIS CHAVEZ,
LISTER HILL,
JOHN L. MCCLELLAN,
WARREN G. MAGNUSON,
STYLES BRIDGES,
LEVERETT SALTONSTALL,
MILTON R. YOUNG
(except I do not agree with position of conferees on amendments 1, 2, 3, and 4),
KARL E. MUNDT,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5168) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes, submit the following statement in explanation of the effect of the action agreed upon and recommended in the accompanying conference report as to each of such amendments, namely:

TITLE I

Department of Agriculture

Amendments Nos. 1 through 4—Commodity Credit Corporation: Delete items proposed by the Senate for reimbursements to the Corporation.

Department of Defense—Military

Amendment No. 5—General provisions: Deletes language proposed by the House for $263,900,000 transfer authority as proposed by the Senate.

Amendment No. 6: Inserts center heading.

Amendment No. 7—Military personnel, Army: Appropriates $7,000,000 as proposed by the Senate.

Amendment No. 8—Military personnel, Navy: Appropriates $15,000,000 as proposed by the Senate.

Amendment No. 9: Inserts center heading.

Amendment No. 10—Operation and maintenance, Army: Appropriates $88,500,000 as proposed by the Senate.

Amendment No. 11—Operation and maintenance, Navy: Appropriates $79,400,000 as proposed by the Senate.

Amendment No. 12—Operation and maintenance, Air Force: Appropriates $72,000,000 as proposed by the Senate.

Amendment No. 13—Claims, Department of Defense: Appropriates $3,000,000 as proposed by the Senate.

Amendment No. 14: Inserts center heading.

Department of Defense—Civil functions

Amendment No. 15—Department of the Army, rivers and harbors and flood control: Appropriates $350,000 for construction, general, to resume planning on the Libby Dam in Montana as proposed by the Senate.

District of Columbia

Amendment No. 16—Federal loan to the District of Columbia: Deletes Senate proposal to make a loan of $5,700,000.

Amendment No. 17—Regulatory agencies: Appropriates $118,000 as proposed by the Senate instead of $89,000 as proposed by the House.

Amendment No. 18—Department of Occupations and Professions: Appropriates $29,000 as proposed by the Senate instead of $14,000 as proposed by the House.

Amendment No. 19—Metropolitan Police: Appropriates $100,000 as proposed by the Senate.

Amendment No. 20—Department of Public Health: Appropriates $1,849,500 as proposed by the Senate instead of $1,652,050 as proposed by the House.

Amendment No. 21—Department of Public Welfare: Appropriates $575,000 as proposed by the Senate.

Amendment No. 22—Department of Sanitary Engineering: Appropriates $1,268,000 as proposed by the Senate.

Executive Office of the President

Amendment No. 23—President's Advisory Committee on Labor-Management Policy: Reported in disagreement.

Funds appropriated to the President

Amendment No. 24—Mutual Security, Development Loan Fund: Appropriates $50,000,000 instead of $150,000,000 as proposed by the Senate, and such funds are earmarked specifically for loans in the Western Hemisphere.

Department of Health, Education, and Welfare

Amendment No. 25—Public Health Service: Reported in disagreement.

Amendment No. 26—Social Security Administration, grants to States for public assistance: Appropriates $94,000,000 instead of $74,000,000 as proposed by the House and $104,000,000 as proposed by the Senate.

Amendment No. 27—Social Security Administration, grants to States for public assistance: Reported in disagreement.

Amendment No. 28—Social Security Administration, Bureau of Public Assistance: Appropriates $378,500 instead of $300,000 as proposed by the House and $457,000 as proposed by the Senate.

Amendment No. 29—Office of the Secretary, salaries and expenses, Office of Field Administration: Appropriates $220,000 instead of $60,000 as proposed by the House and $225,000 as proposed by the Senate.

Amendments Nos. 30 and 31—Salaries and expenses, Office of the General Counsel: Appropriates $50,000 instead of $42,000 as proposed by the House and $58,000 as proposed by the Senate together with $65,000 to be derived by transfer instead of $38,000 as proposed by the House and $71,000 as proposed by the Senate.

Independent offices

Amendment No. 32—Civil Aeronautics Board, payments to air carriers: Appropriates $17,500,000 instead of $15,000,000 as proposed by the House and $20,000,000 as proposed by the Senate.

Amendment No. 33—Civil Service Commission, investigation of United States citizens for employment by international organizations: Appropriates $62,000 instead of $57,000 as proposed by the House and $67,000 as proposed by the Senate.

Amendment No. 34—Civil Service Commission, Government contribution, Retired Employees Health Benefits Fund: Appropriates $1,625,000 instead of $1,500,000 as proposed by the House and $1,750,000 as proposed by the Senate.

Amendment No. 35—General Services Administration, General Supply Fund: Appropriates $20,000,000 instead of $15,000,000 as proposed by the House and $25,000,000 as proposed by the Senate.

Amendment No. 36—General Services Administration, expenses, supply distribution: Reported in disagreement.

Amendment No. 37—Housing and Home Finance Agency, limitation on administrative expenses, Office of the Administrator, college housing loans: Provides limitation of $250,000 instead of $180,000 as proposed by the House and $270,000 as proposed by the Senate.

Amendment No. 38—Railroad Retirement Board: Reported in disagreement.

Amendment No. 39—Veterans' Administration, general operating expenses: Appropriates $10,850,000 instead of $10,600,000 as proposed by the House and $11,063,000 as proposed by the Senate.

Amendment No. 40—Veterans' Administration, inpatient care: Appropriates $42,000,000 instead of $41,000,000 as proposed by the House and $43,000,000 as proposed by the Senate.

Department of the Interior

Amendment No. 41—Bureau of Indian Affairs, resources management: Appropriates $1,777,000 as proposed by the Senate instead of $1,730,000 as proposed by the House.

Amendment No. 42—National Park Service, management and protection: Appropriates $1,934,000 as proposed by the House instead of $1,984,000 as proposed by the Senate. The conferees have approved $13,000 for archeological investigations in the Walter F. George Reservoir area as proposed by the Senate within the total provided.

Amendment No. 43—National Park Service, maintenance and rehabilitation of physical facilities: Appropriates $800,000 as proposed by the House instead of $850,000 as proposed by the Senate.

Amendment No. 44—National Park Service, construction: Appropriates $300,000 as proposed by the House instead of $467,000 as proposed by the Senate.

Amendment No. 45—Fish and Wildlife Service, Bureau of Sport Fisheries and Wildlife: Appropriates $350,000 for construction as proposed by the Senate instead of $200,000 as proposed by the House.

Amendment No. 46—Fish and Wildlife Service, Bureau of Commercial Fisheries: Appropriates $1,000,000 as proposed by the Senate.

Amendment No. 47—Office of Territories, administration of territories: Appropriates $465,000 as proposed by the Senate.

Amendment No. 48—Office of Territories, Trust Territory of the Pacific Islands: Appropriates $300,000 as proposed by the House instead of $127,333 as proposed by the Senate.

Bureau of Reclamation, construction and rehabilitation: The conferees have approved the use of $100,000 of available funds for advanced planning on the Cheney division of the Wichita project and $100,000 of available funds for advanced planning on the Red Bluff unit of the Central Valley project. None of these funds shall be used for construction.

Department of Justice

Amendment No. 49—Legal activities and general administration: Appropriates $90,000 instead of $100,000 as proposed by the Senate.

Amendment No. 50—Office of Alien Property: Reported in disagreement.

Department of Labor

Amendments Nos. 51 and 52—Bureau of Employment Security, advances to Employment Security Administration account, Unemployment Trust Fund: Appropriate $268,000,000 as a repayable advance of which $250,000,000 shall be derived by transfer as proposed by the Senate instead of an appropriation of $250,000,000 derived by transfer as proposed by the House.

Amendment No. 53—Bureau of Employment Security, payment to the Federal extended compensation account: Reported in disagreement.

Amendments Nos. 54 and 55—Bureau of Employment Security, limitation on grants to States for unemployment compensation and employment service administration (trust fund): Provides $360,000,000 instead of $340,000,000 as proposed by the House and $375,995,000 as proposed by the Senate, and deletes provision of Senate extending availability of funds.

Amendments Nos. 56 and 57—Bureau of Employment Security, limitation on salaries and expenses (trust fund): Provides $9,000,000 instead of $7,900,000 as proposed by the House and $9,370,000 as proposed by the Senate, and deletes provision of the Senate extending availability of funds.

Amendment No. 58—Bureau of Employees' Compensation: Appropriates $333,500 instead of $310,000 as proposed by the House and $357,000 as proposed by the Senate.

Legislative branch

Amendment No. 59: Inserts title as proposed by the Senate.

Amendments Nos. 60 and 61: Reported in disagreement.

Amendment No. 62: Inserts title as proposed by the Senate.

Amendment No. 63: Joint Economic Committee: Appropriates $35,000 as proposed by the Senate.

Amendment No. 64: Furniture: Appropriates $26,000 as proposed by the Senate.

Amendment No. 65: Inquiries and investigations: Appropriates $105,000 as proposed by the Senate.

Amendment No. 66: Administrative provision: Reported in disagreement.

Amendment No. 67: House of Representatives: Reported in disagreement.

Amendment No. 68: Members' clerk hire: Appropriates $600,000 as proposed by the Senate.

Amendment No. 69: General provision: Deletes provision inserted by the Senate.

Department of State

Amendment No. 70: Administration of foreign affairs: Appropriates $10,140,000 as proposed by the Senate instead of $10,340,000 as proposed by the House.

TITLE II—INCREASED PAY COSTS

Department of the Interior

Amendment No. 71: Bureau of Reclamation, general investigations: Deletes proposal of the Senate that $236,364 shall be derived from the reclamation fund.

Amendment No. 72: Bureau of Reclamation, operation and maintenance: Deletes proposal of the Senate that $483,721 shall be derived from the reclamation fund and $32,000 shall be derived from the Colorado River Dam fund.

Amendment No. 73: Bureau of Reclamation, general administrative expenses: Deletes proposal of the Senate that the appropriation be derived from the reclamation fund.

Amendment No. 74—Bureau of Commercial Fisheries: Deletes Senate language proposing to transfer funds.

Legislative branch

Amendments Nos. 75–90—Senate: Appropriate for miscellaneous activities of the Senate as proposed by the Senate.

TITLE III

Amendment No. 91—Claims and judgments: Reported in disagreement.

ALBERT THOMAS,
MICHAEL J. KIRWAN,
CLARENCE CANNON,
BEN F. JENSEN,
JOHN TABER,
Managers on the Part of the House.

Mr. THOMAS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

Mr. GROSS. Mr. Speaker, reserving the right to object, I, as much as anyone else, want to dispose of this legislation tonight, but this is an unusual procedure. Here we have a greatly increased conference report in terms of money, and the report has never been printed.

Mr. THOMAS. The gentleman's remarks are certainly appropriate, and I believe if you will let me explain it, you will withhold your objection.

Mr. GROSS. If I have the assurance of the gentleman that he will take ample time before the vote on the adoption of the conference report to thoroughly explain the report, I will not object.

Mr. THOMAS. You will be satisfied.

Mr. GROSS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. THOMAS. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

The Clerk read the statement.

Mr. THOMAS (interrupting the reading of the conference report). Mr. Speaker, I ask unanimous consent that further reading of the conference report be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. THOMAS. Mr. Speaker, the membership will recall that when this bill left the House it carried, in round figures, about $800 million. There were 91 amendments in disagreement. We bring back 12 that are technically in disagreement, but not one of those 12 is, in truth and in fact, in disagreement.

Dollarwise, the other body added $3.8 billion to this bill which, together with the House figure of $803 million in round figures, meant that when we went into conference the bill carried about $4.6 billion.

In conference this amount was reduced by $2.9 billion, in round figures. So what we are bringing back to the House now—and bear in mind there was a reduction from the other body's figures of about $2.9 billion—we are bringing back to the House now these items which total about $1.7 billion or, to put it another way, just about double the figure when it left the House.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Iowa.

Mr. GROSS. Where did the increases occur?

Mr. THOMAS. Let me state roughly what the items are. There were four or five items in here for the Commodity Credit Corporation which in truth and in fact the committee did not quarrel with so far as the items were concerned—the amount of them, or anything else. The other body was nice enough to back away from their position. Those total $2.9 billion. That is out, because in truth and in fact, they were not deficiency items.

Here is another item they added. The other body added, and this is one of the big items, an item of $150 million under the Development Loan Fund. We finally worked out an agreement to reduce the amount by $100 million and specifically earmarked the $50 million that is in there now for our hemisphere, namely Central and South America. Those are the items, the bulk of them. There were some 12 or 15 or 20 items where the increases ran from $5 to $15,000. We disposed of those pretty quickly. But those are the two big items.

There is another item that involved $263 million. When you cover that, you have covered 95 percent of it.

Mr. Speaker, you recall that there were defense items, Army, Navy, and Air Force items in here, some 15 of them, involving $263 million. They were truly defense items. When the bill left the House we worked out some language, and the language was good, giving them authority to spend that $263 million, but they had to recoup it from prior year appropriations, unobligated funds. The other body insisted on supplying the cash rather than using funds of last year or the year before. It put the House in a very untenable position, in view of the fact that the Commander in Chief sent his budget message up here the other day asking for, in round figures, $1.9 billion additional.

So, if they are going to have to use $1.9 billion additional funds there was no point in the House insisting on using prior year's funds because it would complicate the bookkeeping. Those are 96 percent of the items.

Mr. GROSS. Mr. Speaker, will the gentleman yield further?

Mr. THOMAS. I yield.

Mr. GROSS. Only a few minutes ago the House voted a so-called depressed areas bill providing $394 million. Of course, that is the foot in the door. Yet we find in this bill $50 million for the Development Loan Fund which simply means soft and uncollectible loans to South American countries to build more industries to ship more products to this country to cause more distressed areas. I do not like that, I will tell the gentleman.

Mr. THOMAS. I do not, either, but that is what it is going to be. But it is our understanding that the emphasis in these bills is going to be placed on health and education and general improvement of living conditions. We are not advised that it is going to be for factories, and so forth. I am not saying that some of it is not going to be, but it is generally on health, education, and matters of that nature.

Mr. GROSS. The gentleman certainly would not stake his tenure in Congress on the fact that there would not be plenty of this money spent for the building of plants to increase production, and so forth?

Mr. THOMAS. The gentleman is right.

Mr. GROSS. To build up their productive capacity?

Mr. THOMAS. I think that is much that will be the result, yes.

Mr. GROSS. I just do not like it, and I cannot support the conference report with this $50 million in it.

Mr. THOMAS. May I say to my friend, and I do not want to be in a position of arguing with him because he is too valuable a Member and we all respect him, that this in my humble judgment, and I think I speak the sentiments of the committee, is a vast improvement over what we have been going through in the last 15 years. To say the least, this is going to be in the hands of what I call a bankers group. It is a loan, it is not a gift, and certainly we will get something back even in the form of their own soft currencies, or maybe 10, 15, or 20 percent in our own money. But any improvement is better than a gift; the gentleman will admit that.

Mr. GROSS. We will get something back, all right, no question about that, and it will not be good.

Mr. MARSHALL. Mr Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Minnesota.

Mr. MARSHALL. Is it not true that the $2 billion the gentleman referred to in connection with restoring the money for the Commodity Credit Corporation is money that has already been spent by the previous administration?

Mr. THOMAS. There is some information to that effect. It has been money spent, yes.

Mr. MARSHALL. That is the way we handle those appropriations, is it not? We authorize the borrowing of money from the Commodity Credit Corporation and then we restore the capital stock or money already spent, so that actually as far as that sum is concerned the money has been spent by the previous administration in their attempt to support farm prices.

Mr. BOW. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Ohio.

Mr. BOW. Do I correctly understand from my distinguished chairman that when the bill passed the House the item for the military was allowed by the House as a transfer for that amount?

Mr. THOMAS. That is correct.

Mr. BOW. I understand that as you bring that back from conference it is new, hard money?

Mr. THOMAS. That is correct, $263 million.

Mr. BOW. In other words, there is an increase here of $263 million over and above the amount as it left the House?

Mr. THOMAS. Yes.

Mr. OLSEN. Mr. Speaker, will the gentleman yield?

Mr. THOMAS. I yield to the gentleman from Montana.

Mr. OLSEN. Mr. Speaker, I rise in support of the conference report and I commend the conference committee on an exceedingly fine job. They and the House Appropriations Committee have worked diligently and have come up with a splendid supplemental appropriations bill. I am particularly delighted that the appropriation for Libby Dam in Montana is included in the bill, and that we shall now go forward with this very important project of multipurpose development for water storage, flood control, recreation, cheap public power and irrigation.

I want to make it part of the record of that portion of this bill, the understanding that when Libby Dam is built every effort will be made to see to it that, as in the case of the Hungry Horse project, Montana will receive a proportionate share of power from Libby Dam for the use and benefit of the citizens within the State of Montana.

I wish to call attention to the provisions of the Hungry Horse authorizing legislation, Public Law 329, 78th Congress, which provided:

> That for the purposes of irrigation and reclamation of arid lands, for controlling floods, improving navigation, regulating the flow of the South Fork of the Flathead River, for the generation of electric energy, and for other beneficial uses primarily in the State of Montana, but also in the downstream areas, the Hungry Horse Dam was authorized.

It is my understanding that what I have said would be the general power preference for Libby Dam for Montanans, under the same conditions and precedents as at Hungry Horse.

Mr. THOMAS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

The SPEAKER. The Clerk will report the first amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 23: Page 9, line 5, insert the following:

"EXECUTIVE OFFICE OF THE PRESIDENT

"President's Advisory Committee on Labor-Management Policy

"For necessary expenses of the President's Advisory Committee on Labor-Management Policy, established by Executive Order 10918 of February 16, 1961, including rent in the District of Columbia either for the Committee or for Federal agencies displaced in the interests of the Committee, services as authorized by section 15 of the Act of August 2, 1946 (5 U.S.C. 55(a)), but at rates for individuals not to exceed $100 per diem, and $25 per diem in lieu of subsistence for members of the Committee while away from their homes or regular places of business, $80,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 25: Page 11, line 4, insert the following:

"PUBLIC HEALTH SERVICE

"Communicable disease activities

"For an additional amount for 'Communicable disease activities', $1,000,000 which shall be available only for the purchase, demonstration, and distribution of oral poliomyelitis vaccine and shall remain available until June 30, 1962."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 25 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate Amendment No. 27: Page 12, line 7, insert the following: "of which $30,000,000 shall be available only upon enactment of H.R. 4884, Eighty-seventh Congress, or similar legislation."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 27 and concur therein with an amendment, as follows: "In lieu of the sum named in said amendment, insert: '$20,000,000'."

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate Amendment No. 36: Page 14, line 21, insert:

"EXPENSES, SUPPLY DISTRIBUTION

"For an additional amount for 'Expenses, supply distribution', $700,000, to be derived by transfer from the appropriation for "Strategic and critical materials', fiscal year 1961."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 36 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$600,000".

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 38: On page 15, line 19, insert:

"RAILROAD RETIREMENT BOARD

"Payment to railroad unemployment insurance account

"For payment to the railroad unemployment insurance account, as a repayable advance, as authorized by section 4 of the Temporary Extended Railroad Unemployment Insurance Benefits Act of 1961, $24,000,000, to remain available until September 30, 1962: *Provided*, That this amount shall be repaid to the general fund of the Treasury from the railroad unemployment insurance account, whether or not the total derived from the temporary increase in the contribution rate under section 5 of such Act is sufficient for this purpose."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 38 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$20,000,000".

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 50: Page 20, line 1, insert:

"OFFICE OF ALIEN PROPERTY

"Limitation on salaries and expenses, Office of Alien Property

"The limitation under this head in the Department of Justice Appropriation Act, 1961, on the amount available for general administrative expenses of the Office of Alien Property is increased by $75,000."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 50 and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$65,000".

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 53: Page 21, line 1, insert:

"PAYMENT TO THE FEDERAL EXTENDED COMPENSATION ACCOUNT

"For payment into the Federal extended compensation account of the unemployment trust fund, as repayable advances, as authorized by section 13 of the Temporary Extended Unemployment Compensation Act of 1961, $500,000,000, to remain available only until September 30, 1962."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 60: Page 23, line 15, insert:

"For payment to Elizabeth S. Hennings, widow of Thomas C. Hennings, Junior, late a Senator from the State of Missouri, $22,500."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 60 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate Amendment No. 61: Page 23, line 18, insert:

"SALARIES, OFFICERS AND EMPLOYEES

"Offices of the Majority and Minority Whips

"For an additional amount for 'Offices of the Majority and Minority Whips', $1,160: *Provided*, That effective April 1, 1961, the basic compensation of the clerical assistants to the majority and minority whips may be fixed at not to exceed $6,900 each."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 61 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate Amendment No. 66: Page 24, line 12, insert:

"ADMINISTRATIVE PROVISION

"The ninth paragraph under the heading 'Administrative Provisions' in the appropriations for the Senate in the Legislative Branch Appropriation Act, 1957 (2 U.S.C. 127), is amended to read as follows:

" 'The contingent fund of the Senate is hereafter made available for the payment of mileage, to be computed at 10 cents per mile by the nearest usual route, between Washington, District of Columbia, and the residence city of the Senator involved, for not to exceed four round trips originating and terminating in Washington, District of Columbia, made by employees in each Senator's office in any fiscal year, such payment to be made only upon vouchers approved by the Senator containing a certification, by such Senator, that such travel was performed in line of official duty.' "

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 66 and concur therein with an amendment, as follows: In addition to the matter proposed by said amendment, add, at the end thereof, the following:

"HOUSE OF REPRESENTATIVES

"Contingent Fund

"The contingent fund of the House is hereafter made available for the payment of mileage, to be computed at ten cents per mile by the nearest usual route, between Washington, D.C. and the residence city of each Member of the House and the Resident Commissioner from Puerto Rico, for not to exceed two round trips for each such Member and Resident Commissioner originating and terminating in Washington, D.C., each session, in addition to mileage otherwise provided by law."

Mr. GROSS. Mr. Speaker, I make a point of order against the amendment on the ground that the amendment is in violation of rule XVI, clause 7, of the rules of the House. The amendment is not germane because it deals with an entirely different class of people.

Mr. Speaker, I call attention to page 202 of Cannon's Procedures in the House of Representatives as follows:

One individual proposition may not be amended by another individual proposition even though the two may belong to the same class.

Mr. Speaker, I quote further from page 202 of Cannon's Procedures the following examples of the nongermaneness of this amendment.

With regard to the text of the bill for relief of one individual, an amendment which provides for similar relief to another is held not to be germane.

With regard to the text of a bill providing a clerk for a committee, an amendment providing a clerk for another committee is not germane.

Mr. Speaker, I call attention to another instance wherein the text of a bill providing for an additional judge in one territory, an amendment providing additional judges in other territories is not germane.

Mr. Speaker, I submit that this amendment is not germane.

Mr. THOMAS. Mr. Speaker, may I be heard on the point of order?

The SPEAKER. The Chair will hear the gentleman.

Mr. THOMAS. Mr. Speaker, with due regard to our distinguished friend, we submit that it is germane. This deals with travel by Members of the two bodies and is directly affected by the same general subject matter.

The SPEAKER. Senate amendment No. 66 deals entirely with employees of the Senate. The amendment offered by the gentleman from Texas brings in Members of the House. Therefore the Chair must hold that the point of order is well taken.

The Chair sustains the point of order.

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 66, and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 67: Page 25, line 13, insert:

"For payment to Louise G. Reece, widow of B. Carroll Reece, late a Representative from the State of Tennessee, $22,500."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 67 and concur therein.

The motion was agreed to.

The SPEAKER. The Clerk will report the next amendment in disagreement.

The Clerk read as follows:

Senate amendment No. 91: Page 51, line 17 insert:

"TITLE III

"Claims and judgments

"For payment of claims as settled and determined by departments and agencies in accord with law and judgments rendered against the United States by the United States Court of Claims and United States district courts, as set forth in Senate Document Numbered 25, Eighty-seventh Congress, $3,248,533, together with such amounts as may be necessary to pay interest (as and when specified in such judgments or provided by law) and such additional sums due to increases in rates of exchange as may be necessary to pay claims in foreign currency: *Provided*, That no judgment herein appropriated for shall be paid until it shall have become final and conclusive against the United States by failure of the parties to appeal or otherwise: *Provided further*, That, unless otherwise specifically required by law or by the judgment, payment of interest wherever appropriated for herein shall not continue for more than thirty days after the date of approval of this Act."

Mr. THOMAS. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. THOMAS moves that the House recede from its disagreement to the amendment of the Senate numbered 91 and concur therein.

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

SMALL BUSINESS AND GOVERNMENT PROCUREMENT

The SPEAKER. Under the previous order of the House the gentleman from New York [Mr. MULTER] is recognized for 15 minutes.

Mr. MULTER. Mr. Speaker, I would like to take this opportunity to familiarize our colleagues of the House with some of the recent work and findings of Subcommittee No. 2, Small Business and Government Procurement, of the House Select Committee on Small Business, of which subcommittee I have the honor to be the chairman. Its members, beside myself, include the Honorable SIDNEY R. YATES, the Honorable TOM STEED, the Honorable H. ALLEN SMITH, and the Honorable HOWARD W. ROBISON.

ACTIVITIES OF THE SUBCOMMITTEE ON SMALL BUSINESS AND GOVERNMENT PROCUREMENT

Congress has on numerous occasions indicated that small business should receive an equitable opportunity to compete for Government procurement. The subcommittee, therefore, determined that it would direct its studies and inquiries to learn whether congressional intent was being followed by the executive agencies charged with the administration of Government procurement.

The subcommittee undertook a comprehensive study to appraise the numerous programs in Government procurement to determine first, whether small business had an equal opportunity to participate in Government procurement, and second, whether the small-business potential was being fully utilized in Government procurement.

In the study of Government procurement by the subcommittee both prime and subcontracting areas were examined. The difficulties of small business to compete in the prime contract field because of the complexity of the items purchased by the Government, required inquiry into the vast subcontracting field.

DECLINE OF AWARDS TO SMALL BUSINESS

In the subcommittee's study it was revealed that the percentage of prime contracts from the Department of Defense to small business, is continuing to decline and during the last 8 years, no constructive effort by the executive agencies, including the Department of Defense had been made to stop this decline. An analysis of the Department of Defense statistics for fiscal year 1960 on military prime contract awards to small business confirmed this decline. The percentage of contracts going to small business in fiscal year 1960 was only 16.1 percent. This pathetically small percentage of awards to small business is emphasized in a study of the available statistics from fiscal year 1954 to date. It declined from a high of 25.3 percent in 1954, to a dangerous low of 16.1 percent in 1960. No activity on the part of the Department of Defense established a fitting dike to prevent the flood of Government procurement from going to big business.

I want to make it clear that my remarks are directed against the conduct of those who were in charge of the executive departments and independent agencies of our Government during the 8 years prior to January 20, 1961. I fervently hope and pray for better from their successors, appointed by President Kennedy.

During the last Congress the subcommittee continued to receive numerous complaints from small-business concerns regarding all phases of Government procurements. Many areas of difficulties were explored by the subcommittee staff with officials of the Department of Defense and the civilian agencies handling Government procurement. In some individual cases the staff of the subcommittee, under the direction of its chairman was able to rectify some of the inequities. However, despite the contention of the Department of Defense that everything possible was being done to guarantee an equitable opportunity to small business to compete in Government procurement, and despite concen-

trated efforts of the committee and Members of Congress, the opportunity for small business to compete in Government procurement continued to decline. It became apparent to this committee that the Department of Defense and too many of the other executive agencies of the Government in this field were not following the wishes of Congress. Despite the lofty, high-sounding directives issued by the Department of Defense, despite the glowing statements made to the subcommittee at public hearings, the programs were not being implemented by either the contracting or procurement officers in the field. The subcommittee is firmly convinced that unless we have a dynamic change in the approach by the procurement agencies in this area, small business will never receive an equal or even a fair opportunity to compete.

In order to improve the situation, there must be a more concerted effort for joint determination and set-asides for small business. More small-business concerns must be placed on the qualified bidders list. More small-business concerns must be considered in the planned procurements. More small-business concerns must be utilized in the mobilization type of procurements.

Despite the insistence by this committee and Members of Congress to utilize the advertised competitive method of procurement, we find that the greatest portion of procurement is done by negotiation. An analysis of available statistics establishes that under the negotiated method of purchase, so widely used by the Department of Defense, small business has had less opportunity to compete and has received a smaller percentage of Government contracts.

Over the years the Congress of the United States has declared as its basic procurement policy that, as a general rule, all purchases and contracts for supplies and services should be made by advertised competitive bids. It should be the exception rather than the rule that purchases be made by negotiation. The opposite prevailed too often.

A study conducted by the staff of the subcommittee indicated that the qualified bidders list, planned procurements, and mobilization type of procurement used by the Department of Defense appear to exclude small business. This in effect has denied small business an equitable opportunity to compete for Government business. The system of qualifying bidders prior to bid invitations has circumvented congressional intent to aid and assist small business.

We are convinced that one of the principal reasons for this is that the small business specialists in the various departments must "knuckle under" to their superiors who are not in sympathy with small business. Those specialists should be transferred to and made a part of the Small Business Administration.

The efforts of the subcommittee to alert the Congress and the public to the plight of small business in procurement is not a new one. In our final report during the 86th Congress we predicted as follows concerning the ultimate effects of the subcontracting program as then practiced:

> Under such system of procurement, the small business segment of our industry will become the unwanted stepchild of big business and become completely subservient to major companies.

CERTIFICATES OF COMPETENCY

Under the Small Business Act, the Small Business Administration was granted the authority to issue certificates of competency which, upon issuance, are conclusive upon the Government procurement agencies as the competency and financial responsibility of a small-business concern. However, if obstacles are placed in the path of small-business concerns to participate in bidding on Government procurement, the usefulness of the certificates of competency is destroyed. Unless a small-business concern has an opportunity to bid, it cannot petition for a review by the Small Business Administration for a certificate of competency. It is only when it is the low bidder that a small-business concern can petition for a certificate of competency in order to avoid rejection by the procurement agency on the grounds of lack of capacity or credit.

Through the years this subcommittee has aided small business in obtaining awards to which they were legally entitled. A typical case brought to our attention involved a small business which had been the low bidder and the recipient of a certificate of competency issued by the Small Business Administration. Despite these facts, the particular agency concerned, in response to an inquiry of the subcommittee, advised that the final determination as to the award would be made by its own contracting officer to a big business, higher bidder, notwithstanding the issuance of the certificate of competency. After the subcommittee interceded in this matter, the Comptroller General rendered an opinion which confirmed the views of the subcommittee that certificates of competency issued by the SBA respecting the capacity and ability of a small-business firm to perform a specific contract are conclusive and binding on the agencies. The contracting officer's decision was reversed and the small business low bidder received the award and since has fulfilled the contract completely, satisfactorily and on time, with a substantial saving to the Government.

In its 1959 final report the subcommittee pointed out that one of the shortcomings of the procurement program was the shortage of persons assigned to assist small business in receiving its equitable share of Government purchases. It was noted that the Department of Defense had approximately 380 small-business specialists assigned to its small-business programs, although in many cases these employees had other assigned duties. The Small Business Administration, on the other hand, which is assigned the primary responsibility of assisting small business obtain its fair share of Government purchases, had only 88 positions in its entire Procurement and Technical Assistance Division. As we have indicated heretofore, it is in the field offices that most procurement takes place and where the small businessmen must receive proper recognition.

Obviously, sympathetic administration of the program with a view to implementing instead of frustrating the congressional intent will go far toward improving the situation.

The difference in approach is best exemplified by the fact that during January and February 1961, the U.S. Government saved more than $2.6 million by the issuance of certificates of competency to 33 low-bidding small firms on contracts valued at more than $23.6 million.

NEGOTIATED VERSUS ADVERTISED PROCUREMENT

The procurement agencies have continued to prefer the negotiated method of procurement rather than the advertised competitive approach. Through the efforts of the subcommittee, bidding procedures were improved to guarantee that small business would receive full bid sets, including specifications and drawings in ample time to permit them to compile and submit responsible bids. Through the efforts of the subcommittee, the Department of the Navy saved $750,000 in a single purchase of a radar system. Also, through the intercession of the subcommittee, a new policy was established by the Department of the Navy which guarantees all small-business concerns who desire to bid equal opportunity to receive invitations and bids. This activity by the subcommittee has shown the procurement agencies how to increase the efficiency of their procurement system at great financial savings to the Government.

Another example of a savings effected by the subcommittee was in the procurement of radiac sets—electronic detection device for radiation—by the U.S. Navy. At the request of the subcommittee's chairman, the Comptroller General reviewed a specific procurement in this area. This review was requested because the subcommittee staff's study indicated that good contract administration was not being followed by the Department of the Navy in a negotiated procurement from a sole source of this item. The investigation by the Comptroller General established that despite the requirement of a small critical component, the Department of the Navy did not have sufficient quantity of this item in stock and refused under general policy to furnish this small component part to competitive bidders who were unable to purchase the component part needed to manufacture the radiac set. This failure by the Department of the Navy to protect the Government's interest necessitated a purchase of this radiac set at a higher price. It was established that the availability of this small component part would have saved the Government approximately $158,000 on a single purchase of the sets.

The committee has had a continuing interest in the problem of negotiated versus advertised procurement.

In 1957 the subcommittee held hearings to determine the merit of complaints it had received that procurement by the Quartermaster Corps of the Department of the Army in the field of fresh fruits and vegetables in the New

York area had been discriminatory against small business.

The Quartermaster Corps in its testimony reported that they were making purchases under negotiated bidding pursuant to section 2(c) (9) of the Armed Services Procurement Act of 1947, as amended. This section provides that "all purchases and contracts for supplies and services shall be made by advertising, except that such purchases and contracts may be negotiated by the agency head without advertising" if they were for "perishable subsistence supplies."

It should be noted that this section is only an exception to the general rule which Congress laid down in this act.

The preponderance of evidence received by the committee from recognized, reputable leaders in the market clearly and unequivocally established that the advertised, sealed-bid method of procurement is both feasible and practicable and that the Government could and would receive the best merchandise at the lowest possible prices by that method.

Subsequent to the hearings, the committee was notified that the Quartermaster Corps had in some instances begun to purchase fresh fruits and vegetables in the area under a program characterised as "notice of intention to purchase." Analysis of this method indicated that it is a mere sham and a screen to cover up negotiated purchases which were proven by the hearings to be unfair to the Government and to the small businessman.

The committee urged then, and continues to urge today, that the exception set forth in section 2(c) (9) of the Armed Services Procurement Act of 1947, as amended, be utilized only under exceptional circumstances.

In the 85th Congress the subcommittee issued a special report entitled "A Case Study of an Atomic Energy Commission Procurement"—House Report No. 1277. The subcommittee had received numerous complaints from small businesses advising that they had not received equitable opportunity for Government procurement. These were directed against all the procurement agencies.

A particular case involving an Atomic Energy Commission procurement was selected as a pilot case for investigation and study. The basic problems involved in this case were those continually confronting small business in its effort to share equitably in Government procurement: First, advertising versus negotiation; second, set-asides for small business; and third, the method of handling negotiations between prospective bidders.

The committee, upon the conclusion of its evaluation of all available material, concluded that—

1. The item could have been handled satisfactorily by advertised, sealed bid;

2. The method and procedure developed by the agency failed to take the proper precautions and safeguards necessary to assure the Government of quality and service and a minimum price; and

3. The item was of such a nature that it could have been set aside for small business.

Prior to the issuance of the report by the committee—House Report No. 1277, 85th Congress, 1st session—all of the evidence adduced by the investigation was submitted to the agency for comment and for review and audit by the Comptroller General. When the report was subsequently published as a House report, it contained therein the report and recommendations of the subcommittee, the comments of the agency, and the review and audit by the General Accounting Office.

The committee decided that the complaints of the small-business concern were well founded. The General Accounting Office, in its report, which confirmed the position taken by the committee, stated that the same degree of flexibility inherent in formally advertised award procedures would have guaranteed the contracting agency the right to determine the performance capabilities prior to awarding the contract and that the contracting agency also had the right to review all bids and to readvertise if necessary if, in their opinion, the bid prices submitted were unreasonable.

The action taken by the committee respecting this case brought good results. Subsequent procurements of the item were set aside for small business and were purchased by the advertised, sealed-bid method of procurement.

SET-ASIDE PROGRAM

The subcommittee carefully examined the activities of the Government procurement agencies under the joint determination and set-aside program to determine if sufficient emphasis had been placed upon this program to guarantee maximum effort to utilize the full small business potential under this program.

During the 1959 fiscal year the military services and the Small Business Administration, under the joint set-aside program, allocated $1,057,284,000 for exclusive awards to small business. However, we find that this figure had dropped in fiscal year 1960 to $974,428,000, a decline of 7.8 percent of set-asides to small business. It is apparent that unless greater effort, greater emphasis, and more activity is exerted by the responsible agencies in the executive branch of the Government, small business will not receive its due share of Government procurement.

Here, too, sympathetic administration by personnel committed to furthering, rather than impeding, congressional intent can accomplish much.

During February 1961, the Small Business Administration increased its set-asides to small firms tremendously; 22.2 contracts valued at $80,264,000 were so awarded for an increase of 72 percent in value and 41 percent in number of contracts over February 1960.

PROPRIETARY RIGHTS AND DATA

The protection of proprietary rights and data of the small business concerns who developed items at their own expense was studied by this subcommittee and hearings held during the 86th Congress. The committee received numerous complaints that small business was being discriminated against in this area. During public hearings held March 29, 30, and 31, 1960, in Washington, D.C., witnesses from small and large business and Government testified. There had been recurring complaints to the subcommittee which indicated that small business concerns under subcontract to a prime contractor, or under direct procurement with the Department of Defense, were required to submit, either to the prime contractor or to the Department of Defense, complete proprietary data on products or techniques which they had designed and developed with their own know-how and resources. Representative small business concerns testified at the hearings that without compensation they are required, either directly or through prime contractors, to supply information to the Government which subsequently discloses invaluable privately-owned technical data as well as trade secrets. They also testified that the military services periodically required the delivery of many types of technical data, particularly manufacturing drawings, under Government contracts without compensation, and that subsequently this data was made available to other bidders and contractors.

This is an extremely complicated and technical matter. The subcommittee prepared a separate report—"Proprietary Rights and Data," House Report No. 2230, December 20, 1960—which discusses this whole problem in detail. This report and its recommendations were approved unanimously by members of the subcommittee and by the full committee.

CONTRACT RENEGOTIATION

In the 84th Congress—1955–56—through recommendations of members of this committee, the Renegotiation Act of 1951 was amended, which resulted in the increase of the minimum amount subject to renegotiation. The amount was increased from $500,000 to $1 million. Actually, the amendments of the Renegotiation Act in the 84th Congress were of small benefit to the smaller manufacturer.

It is the opinion of the committee that one of the reasons why small business concerns engaged in defense work find it increasingly difficult to continue profitable operations is because of handicaps which have become embedded in our procurement system. Among some of the handicaps encountered by small business are the free plants and equipment available to large prime contractors. This is encountered in military cancellations or stretchout programs were the large prime contractors have a habit of not only cancelling every possible subcontract but engage directly in competition with their former subcontractors. Apparently this is done by the prime contractors on the theory that for every dollar's worth of work that can be done in their own plant, they are afforded an opportunity for more favorable profits in the renegotiation allowances. This practice has happened in many instances in the past and is not restricted to periods of stretchouts or cancellations but has occurred when the large prime contractors are lacking in defense work. This shortsighted policy of the large prime contractors aided by the

opportunities under the Renegotiation Act are responsible for hundreds of small manufacturing concerns either curtailing operations or going out of business entirely.

Because opportunities of small business in our defense effort are increasingly being narrowed down to subcontracting, it becomes even more important that the impediments of the Renegotiation Act be eliminated or so modified as to encourage subcontracting. The failure to do this will cause more and more independent business firms to disappear from the defense production picture.

It has been stated that an examination of the records of the Renegotiation Board would reflect that only the most meager portion of dollars recaptured come from other than the top hundred defense contracting firms. It is for this reason that we are of the opinion that the Renegotiation Act and the regulations applicable thereto should be amended or modified so as to encourage small business to compete for its share of Government contracts.

MOVEMENT OF HOUSEHOLD GOODS OF MILITARY PERSONNEL

During the summer of 1959 a situation demonstrating the lack of equitable opportunity for small business to compete for Government procurement was brought to the attention of the subcommittee by the Honorable WRIGHT PATMAN, chairman of the full committee. The situation in question related to a new directive about to be issued by the Department of Defense abolishing equitable distribution of the movement of household goods of military and civilian personnel. This proposed new directive, it appeared, was aimed squarely at the hundreds of small independent moving van companies for it seemed to be clear that the directive, if implemented, would reduce substantially the volume of such business that the smaller companies could expect thereafter to obtain.

Upon learning about this situation, the subcommittee moved promptly and vigorously to forestall any action by the Department of Defense that might jeopardize the ability of small business to participate in these procurements. In spite of these efforts, the discriminatory directive was not suspended. However, through the subcommittee's efforts, the effective date of the directive was postponed until July 1, 1960. At that time a new directive was issued, which was to become effective December 1, 1960. Based on the opinion of the Comptroller General that this directive might cause hardship to small business, I requested the Secretary of Defense to postpone the directive.

Despite this request, I was notified by the Department of Defense that it did not feel it of sufficient importance to postpone the implementation of the directive. Accordingly, directive 4500.27 became effective as of December 1, 1960.

We urge the new administration to immediately suspend that directive. We feel certain that a restudy of this problem by minds attuned to helping not hurting small business will require a new directive.

RESEARCH AND DEVELOPMENT AWARDS TO SMALL BUSINESS

Basic research is the quest for new knowledge. It involves slow and laborious methods of observation, hypothesis, deduction, and experimental verification. New truths obtained from such investigation will be the basis of any major technological advance. While it is admitted that there are certain research projects which only particular firms with special equipment can handle, it is nevertheless an acknowledged fact that over the years small business firms have made invaluable contributions in the research and development field and their ingenuity has many times broken bottlenecks and solved critical problems on vital occasions. In fact, in World War II small firms accounted for a very large part of the total war-winning production.

Due to the great and startling progress of Soviet Russia in the fields of astronautics, rocketry, and missiles, the majority in the Congress fully realize the tremendous importance of research and development in connection with national defense. Increasing emphasis, therefore, is being constantly placed on accelerating the tempo and the amounts to be spent on this aspect of total military outlays.

In addition, the Congress is mindful of the fact that expenditures for research and development are major factors in the growth and progress of industry and the national economy. Awards for experimental, developmental, test, and research work—EDTR—by the Department of Defense with U.S. business firms totaled $5,234 million in fiscal year 1960. This was 26.6 percent of the total value of all prime contracts placed by the Department of Defense with U.S. business firms, compared to 21.5 percent in fiscal year 1959, and 17.1 percent in fiscal year 1958.

It is generally agreed that the survival of this country will depend to a considerable extent upon the effectiveness and speed with which its defense research and development program is carried out. This means that all available capabilities must be utilized as fully as possible, and that the best brains and technical facilities must be brought into the program.

In recognition of the invaluable contribution of small business to science and technology and in order to better utilize its potential, Congress in enacting the Defense Production Act of 1950, clearly stated:

> It is the sense of the Congress that small business enterprises be encouraged to make the greatest possible contribution toward advancing the objectives of this act (50 U.S.C. App. 2151(a)).

Although it is the declared policy of the Congress that the Government should assist and protect, insofar as possible, the interests of small business in order to preserve free competitive enterprise and to insure that a fair proportion of contracts for property and services for the Government be placed with small business concerns, the percentage of contracts, especially in the research and development field, going to small business continues to drop alarmingly. The official Department of Defense figures clearly reflect the fact that as expenditures for research and development increased, the percentage going to small business decreased.

On July 18, 1958, Public Law 85–536 became effective making the Small Business Administration a permanent agency of the Federal Government. This legislation gives recognition by the Congress that small business is a distinct and vital element of the Nation's economy. One of the salient features of this law is contained in section 9, which emphasizes that it shall be the duty of the Small Business Administration—

> (1) to assist small business to obtain Government contracts for research and development.

Statistics furnished by the Department of Defense respecting the net value of its procurement activities with business firms for experimental, developmental, and research work, show the Department spends more than 85 percent of all Federal funds which are expended for research. The figures also indicate an attempt to thwart the declared policy of the Congress of the United States and the statutory mandate of the Small Business Act.

The largest amount spent in any one month by the Department of Defense for research and development during the period from October 1957 through June 1960 was $1,041,875,000, which was in June 1959. Of this sum small business firms received only 3.5 percent or $36,726,000.

During the same period the high point for small firms receiving contracts for research and development was in April 1958, when it reached 8.5 percent. In this connection it should be noted that the amendments to the Small Business Act became effective July 18, 1958, and at that time the direct mandate of the Congress was that the Small Business Administration should assist small business concerns to obtain more Government contracts for research and development. One would naturally expect that the percentage of contracts going to small business then would increase. The record, however, shows that the exact opposite result was achieved.

This development speaks ill for the future of small business. If the trend of the last 4 years continues, the future of small business in the major areas of complex procurements is bleak indeed. This is a situation that has been ignored by too many for too long. But ignoring this problem will not make it go away. It requires the thoughtful attention of everyone who believes that small business can and should continue to make a valuable contribution to the future growth of our economy.

ASSISTANCE TO MEMBERS OF CONGRESS

Over the past several years many Members of Congress have been in communication with the subcommittee seeking information and advice concerning problems confronting small business with respect to the Government procurement program. We are happy that we have been able to help our colleagues

and their constituents. We will continue to attempt to be of assistance to them in the future.

PRESIDENT KENNEDY'S DIRECTIVE TO MILITARY DEPARTMENTS

The top 100 defense contractors received, in 1960, 73.4 percent of the total awards that year. In 1959 it was 73.8 percent and in 1958 it was 74.2 percent. This is based on an aggregate of $15,410.4 million of awards made to the 100 top military prime contractors and their 118 subsidiaries excluding contracts of less than $10,000 each. If those were included, the figures would make a much worse showing.

President Kennedy stated at his March 15, 1961, press conference that he had directed the Secretaries of the military departments to take steps to procure an increased percentage of their requirements from small business. Noting that in 1960 only 16 percent of the Defense Department's awards went to small business, President Kennedy said:

> We are going to try to increase that by at least 10 percent.

In its final report in 1960, the subcommittee concluded by saying:

> The subcommittee is convinced that unless there is a change in both the attitude and approach of the Government procurement agencies in dealing with small business, small business will not receive its fair share of Government procurement.

President Kennedy's directive indicates that the new administration is taking positive action to bring about the long overdue needed changes in attitude and approach.

More along this same line could be accomplished if the small business specialists now employed in the Defense Department were transferred, with their budgetary appropriation, to the Small Business Administration.

We urge that such transfer be accomplished at the earliest practicable date.

PEACE CORPS

The SPEAKER. Under the previous order of the House the gentleman from Illinois [Mr. LIBONATI] is recognized for 1 hour.

Mr. LIBONATI. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. LIBONATI. Mr. Speaker, as soon as President Kennedy's new Peace Corps program was launched the new Peace Corps headquarters in Washington was swamped with mail. There were 6,000 letters received before he gave his official sanction and some 10,000 letters arrived immediately after his pronouncement. Our college youths on every campus responded for information, volunteer forms, and pertinent literature. The pioneer spirit of American youth seeks new frontiers to live with and work with others for the development of the backward nations of the world.

They are prepared to lend their talents to the advancement of the poor economies of these poverty-stricken peoples, and by so doing are making a real contribution to the peace of the world. The Peace Corps pioneers will in promoting this economic growth also succeed in teaching and inculcating a sense of understanding as to our American ideologies.

It is important that the selective processing of candidates for the Peace Corps be accurate in determining the qualifications as well as the social aptitudes of each candidate. The success of this new venture in international relations will depend largely upon those having the essential high qualities of basic sincerity, emotional stability, social affability, and intellectual knowledge of the history, culture, habits, and language of the people to be served.

The people of the many countries will be inquisitive for the reason for their being there and in many situations they will be suspect as to their presence.

The majority will be assigned to rural areas among primitive people. Human characteristics that favor the fostering of good will and natural ways of making friends are very important. The individual must be able to adapt himself or herself to the ways of the people even as to personal habits of diet, dress, and recreational activities. The individual must have a high sense of spiritual and religious values.

The type of leadership, in control of the Corps itself, must be perfect in supervisory acumen. The most intelligent worker must be stimulated, cajoled, and guided to insure a good job done.

The Peace Corps member must be able to direct others so that the natives will feel that they are accomplishing the results. Experience in this field has taught that caution and slow deliberate action reaps the best results.

It is the experience in other fields that mistakes ever so small appear glaringly to reflect upon any program's ultimate failure.

There will be of necessity recalls in the personnel, but nevertheless, great success was experienced in the international youth farm exchange program of the National 4–H Foundation and the American Friends Service Committee activities in a scope of work projects similar to those to be undertaken eventually by the Peace Corps.

The International Voluntary Service, on which the new Peace Corps is modeled, operates in nine countries—Egypt, Jordan, Nepal, Iraq, Laos, Cambodia, Vietnam, Ghana, and Liberia. It was organized as a people-to-people program as contrasted to a government-to-government approach of the International Cooperation Administration.

All three of these organizations have found it advisable to rule out the teenager. The minimum age is 20 in 4–H projects, 21 for American Friends, and 22 for International Voluntary Service. All agree that the term of service be a 2-year minimum.

The Peace Corps is in good hands with Sargent Shriver, the former president of the Board of Education, City of Chicago, as its Director. The following men, representing various segments of society, labor, industry, the Government, and education, have agreed to serve as the original members of this committee: Ralph Lazarus, the president of the Federated Department Stores in Cincinnati, Ohio, a nationwide chain; Joseph Beirne, the vice president of the AFL–CIO, and head of the community services and president of Communications Workers of America; Roger Jones, Under Secretary of State for Administration and former Chairman of the Civil Service Commission; and Dr. Benjamin C. Willis, general superintendent of schools in Chicago and president of the American Association of School Administrators. These outstanding Americans can certainly be relied upon to establish the Peace Corps as an honest, functioning agency of Government.

The Peace Corps task force is also a compliment to any active program. Among its members are Ed Bayley, formerly with the Milwaukee Journal as a political reporter there and most recently administrative aid to Gov. Gaylord Nelson of Wisconsin.

Also Warren Wiggins, a career civil service employee with the ICA, one of their top men, Deputy Chief of the Far Eastern Division of the ICA.

Gordon Boyce, President of the Experiment in International Living. The Experiment in International Living has existed for about 30 years and on an annual basis sends to the European countries, and, I should add, to South America and even Asiatic countries, in the neighborhood of 3,500 young Americans per annum, and we receive back approximately that same number from other countries. It is one of the largest organizations in the country for transferring students back and forth across national boundaries.

Louis Martin, the editor of the Chicago Defender, a newspaperman-journalist. Louis spent the last year in Nigeria and Africa and has brought a lot of political know-how and knowledge of the Continent of Africa to the Peace Corps.

Morris Abram, an attorney from Atlanta, Ga., a very distinguished citizen of that community, a member of the board of trustees of the Field Foundation, the board of trustees of the 20th Century Fund, who was a Rhodes scholar, summa cum laude, and all those other fine things.

Dr. Arthur Adams, the very distinguished president of the American Council on Education who has served here in Washington for a number of years. Dr. Adams, during World War II, organized the training program for the Navy. At one time he had a million men in training in various universities and colleges in the United States. I think there were 117 such locations. Dr. Adams has graciously undertaken to supervise the training of all the people who enlist in the Peace Corps.

Working with Dr. Adams will be Dr. Larry Dennis, vice president of academic

affairs at Penn State College, who arrived in Washington to give full time to the job of planning the training program for Peace Corps volunteers.

Another is Al Sims, vice president of the Institute of International Education in charge of their entire operations which involves over 300 colleges and universities in this country and abroad. The institute brings hundreds, if not thousands, of students to this country each year, and the experience he has developed has been put to work to use in developing our proposals, our training programs for universities in this country.

Also Tom Quimby, from Michigan. Tom has had a great deal of experience in educational work in training programs for the Navy and for the Defense Department. More recently he has been a leader of the Democratic Party as an outstanding national committeeman from Michigan.

In addition to these there have been a number of governmental bureaus which were very generous to the Peace Corps in the planning stages. The Development Loan Fund loaned the services of Les Gordon. The National Aeronautics and Space Administration gave the services of one of their chief administrative officers, Jack Young. And other departments of the Government have been most helpful and generous in the time and help they have given to this embryo agency.

The tentative program for Peace Corps training of appointees is to be initiated at a dozen American colleges this summer from June to September. The core curriculum will be as follows: Basic courses which will be the same in every location: Courses, for example, in American institutions and philosophy and democratic government, that type of thing; economics, the culture and customs of the country to which these people are being sent, and languages.

The close identification of several universities with foreign powers, as for example, University of Nebraska, experienced in matters concerning Turkey with direct contacts maintained through the years, is a valuable asset to Peace Corps activities, if the Corps were invited to participate there.

The scholars in foreign countries would be invited to study with the volunteers and thus give valuable advice to them before they ever go abroad.

The contemplated period of enlistment in the Corps would be from 1 to 3 years of actual service.

The living allowance to each Corps member would be determined by the cost of living in that country, for example, a schoolteacher would be given the same allowance of a resident teacher.

The Peace Corps in size should meet the needs of its activities. The volunteers in a limited sense can select the country of their choice.

The Peace Corps is being considered by the President as a functioning domestic unit in the United States, for instance, in depressed and metropolitan areas.

The limitation for volunteers is tentatively set at 18—no maximum age limit has been set. The skilled resources of the individuals enlisted, together with living conditions, will determine the employability of the older group.

The Peace Corps seeks to serve Asia, Africa, and Latin America, if invited.

QUESTIONS ASKED OF MR. SHRIVER AND ANSWERS GIVEN BY MR. SHRIVER

Question. How tough are you going to be on your language requirements in some areas of the so-called exotic languages?

Answer. Well, we are going to be as tough as we can on the language requirements.

Question. When President Kennedy first proposed the Peace Corps, he tied it in as a substitute for the draft. Has this notion been abandoned altogether?

Answer. Well, I don't think we ever abandon the notions of the President, and certainly not that one. However, I have discussed the draft question with General Hershey and he has authorized me to say that it is his opinion and considered judgment that, short of a general mobilization, a young man who serves 2 years in the Peace Corps will be eligible for further deferment from military service upon his return to this country.

Question. This method of payment of these Peace Corps volunteers overseas is not entirely clear. Do you mean to say that when these expenses are going to be paid that the volunteers would be entirely subsidized then?

Answer. Practically speaking, yes, at the level of the country where they live.

Question. Well, don't you necessarily run the risk, then, if you are not able to pay them wages—aren't you necessarily running the risk of limiting the volunteers in the Peace Corps to those who feel that they could live without a certain wage, those people are accustomed to a certain standard of living, before they ever get into the Peace Corps?

Answer. No, I don't think so, because the people who go in the Peace Corps as volunteers will be living according to the standard of living of the country where they are. So that doesn't require any wealth on anybody's part to do that, because we will be covering that standard of living.

Now, in addition to that, we are going to accumulate a bonus payment for a member of the Peace Corps, so when he or she returns to this country, a nest egg, if you will, will have been built up for that person. This doesn't restrict it at all, so far as I can see, to people who have private sources of income. As a matter of fact, there is going to be one modest, minor problem, probably, namely to try to keep the Peace Corps people overseas from receiving extra stipends from solicitous parents. But we will have to work, probably on the honor system, as far as that is concerned.

Question. Are you planning anything to protect these people who join the Peace Corps, for instance, something along the lines of national life insurance?

Answer. That is under study. We do not have any definite decision on that yet.

Question. Mr. Shriver, do you have any indication of the size of the bonus? I mean, what would you——

Answer. Well, that is under study too. But it will be a modest one. It will depend on the number of months a person serves, and probably will be in the neighborhood of $50 to $75 a month. The actual size has not yet been resolved.

Question. I didn't understand what you were saying about further deferment. It sounds as though it might amount to an exemption from military service.

Answer. No. It does not amount to any exemption. General Hershey said that it was his considered opinion and his judgment that such a person returning from 2 years of Peace Corps volunteer work overseas would not, at that time, be called upon for military service, period.

Question. Could you reenlist in the Peace Corps?

Answer. Well, that is a problem we haven't really come to grips with hard yet. Because it is further away than some of the things that are pressing us now. But I wouldn't eliminate its possibility.

Question. Can you give any sort of a hoped-for timetable on getting started?

Answer. Right now we are working very hard in getting up the application form, or the volunteer form, which we will distribute to people who wish to volunteer. That is a task in itself. That is coming under the direction of Tom Quimby, for example. Second, Al Sims is working with various universities, which have already, even before the Peace Corps was officially announced, proposed various ways in which they could become part of the Peace Corps operation.

Question. Mr. Shriver, you have mentioned, and it has been mentioned that teaching English particularly abroad would be of great value to the Peace Corps. Won't this further drain the domestic pool of teachers?

Answer. It is not our intention to drain the domestic supply of teachers in this country. A graduate of an accredited American institution of higher education would have no difficulty in teaching English as a second language.

Question. Can they be married and enter the program?

Answer. Well, there are a large number of jobs, we believe, where married couples could probably serve as well or better. Both the husband and the wife would have to qualify for Peace Corps work.

Question. Can you tell us your estimate currently on a per head basis?

Answer. Well, on a per head basis, it's very difficult at this stage to make any definite guesses. But what we are estimating on is somewhere around $10,000 or $12,000 a person.

Question. Mr. Shriver, without prejudging the program, there has been some criticism. Is this going to be a program without discipline?

Answer. No. Everybody who is here working in our task force is of the opinion that this will probably be as difficult and as hard work as it is possible for anybody to volunteer for.

First, we hope to work through private volunteer agencies or any international agencies.

Second, we hope to work with universities and colleges.

Third, we hope to work with other Government agencies, such as the ICA.

Fourth, we hope to offer the services of Peace Corps people to the United Nations specialized agencies abroad, and to other international organizations.

And, fifth, we hope to work with direct government-to-government relationships, and in direct government-to-government programs. So we are trying to work in those five different ways to start with. Each way will be an experiment, and within each way there will be experiments.

Question. Mr. Shriver, what about the obligation of these people to continue to serve? Will they be simply under an employment contract? Will they be able to resign after 6 months if they don't like it? Or would it be more like a military operation, to stay the full time?

Answer. This is voluntary all the way through. And if somebody wants to quit, they can quit. There are going to be some

cases of failure. Where it doesn't work out, people will have to be separated from the service.

Question. Doesn't this opinion of Hershey's raise the draft-dodging criticism again?

Answer. Nobody can dodge military service.

Question. They come back. Do they have to go into some useful or essential occupation to get this draft deferment?

Answer. That is what we have a Career Planning Board established to do, to consult with them, and advise them about their career employment opportunities.

Question. What sort of physical training program are you going to have?

Answer. Well, that is what we are going to turn over to Forrest Evashevski.

Now, Forrest Evashevski has become the athletic director of Iowa. He has volunteered to help us as much as we wish in the training program, both here and in giving us ideas about training programs overseas.

I might mention that Forrest has worked with the U.S. Army and Air Force in establishing training programs, not only in this country, but overseas, in Japan and Korea.

Rafer Johnson has also indicated interest in participating in this program on a voluntary basis, and he will probably be assisting in that area, as well as in others.

Question. What is the earliest date you expect to get the first people overseas?

Answer. Well, it will probably be sometime in October or November.

Question. Will you use Public Health for screening?

Answer. The Public Health Service has graciously consented to accept responsibility for the health and for the care of Peace Corps volunteers in this country and while they are overseas. The Surgeon General has indicated that to Mr. Boisfeuillet Jones, the Assistant Secretary of HEW for Health Affairs.

Question. Will you be able to send this pilot group if you do not get an appropriation by Congress this year?

Answer. Yes. One of the reasons that the President established this working group by Executive order was to make it possible for us to have some pilot programs or experimental programs in this calendar year. The whole idea of the Peace Corps was faced in a sense by a deadline; namely, the time when the students are graduating from colleges and graduate schools in the spring and early summer.

Moreover, the President was acting in keeping, we all believe, with the expressed intention of the Congress, as indicated by the congressional appropriation of money for research, study on the idea of a Peace Corps, which was carried forward by Colorado State University.

Question. Are you going around to the colleges to recruit volunteers?

Answer. I have had in my own office over 2 dozen requests already, in the last 2 days, to give speeches at various colleges.

Question. Where would you get the funds if the appropriation were held up? Would it come from agencies?

Answer. Well, the funds that have already been established for the Peace Corps have been given to it by Executive order, out of special assistance funds. Yes?

Question. Are you going to ask American business to contribute financially to the program?

Answer. It has been suggested that the Peace Corps be established in such a way that it could receive contributions from individuals and corporations and foundations. But that has not been resolved. That question has not been resolved.

Mr. Speaker, there are today many claimants to the origin of the idea, but no one can deny that some credit should go to Mr. Louis P. Farina, former president of the Young Democrats of the State of Illinois, who wrote to President Eisenhower, as early as December 4, 1959, regarding a possible exchange of young political leaders with South American countries as a forerunner to the Peace Corps for cementing understanding and friendliness between other nations and the United States. The growth of the relationship would have established a common ground of understanding in all facets of government, including fundamental ideas and new programs to contribute to the strength of the economy for the building of a strong nation.

Mr. Farina is a very active individual in civic affairs in Chicago and as a leader has alerted himself to the problems of our time. He is sincere and able and truly represents the new generation, both in thought and action. The Democratic Congressmen from Illinois are very proud of his many accomplishments and are happy to call to the attention of the Nation and the President his great and persistent effort to promote the peace program of the United States throughout the world.

MARCH 6, 1961.

HON. ROLAND V. LIBONATI,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN: Pursuant to my telephone conversation with your secretary, I am writing this letter to bring you up to date on my 10-point program, "Operation Friendship," which was submitted to President Eisenhower and the State Department in November of 1959.

I have given a total of 108 talks throughout the State of Illinois on the necessity of inaugurating such a program. I arrived at this conclusion immediately after my return from Europe as part of a team of 10 Young Democrats and 10 Young Republicans which visited the NATO countries. I was told by the State Department that this plan had considerable merit and they would make future studies of it. Congressman PUCINSKI and Adlai Stevenson joined with you in commending this 10-point program.

As you know, President Kennedy has now inaugurated the Peace Corps plan which, in essence, is very similar to my plan. Inasmuch as I have had experience and first-hand knowledge of establishing such a plan, I would deem it an honor to serve in an administrative capacity to put the President's plan into successful operation. I certainly do not wish to infringe on the President in taking full credit for this plan, and I certainly do not wish to state that I am the only one who has thought of putting this plan into effect, but I will state that I am the first one to present this to the President of the United States (then President Eisenhower) and the State Department whose correspondence dates back to 1959.

I have recently corresponded with President Kennedy and Sargent Shriver but, as of yet, have not received an answer. If there is anything you can do to bring this to the attention of the respective interested parties, I would appreciate your intervention.

Enclosed, herewith, are copies of letters which I received in connection with my plan, previous to President Kennedy's announcement of the Peace Corps plan.

Thanking you in advance and may God bless you in your future endeavors.

Sincerely yours,

LOUIS P. FARINA,
Past President, Young Democrats of Illinois.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., June 15, 1960.

MR. LOUIS P. FARINA,
President, Young Democrats, State of Illinois, Chicago, Ill.

DEAR LOU: Enclosed you will find a carbon copy of a letter which I received from the State Department regarding your recent suggestion for an exchange of young political leaders with Latin American countries.

As you can gather from this letter yourself, apparently the State Department believes there is considerable merit to your suggestion. You may be assured that I will continue prodding the State Department to formally adopt the idea.

I, myself, think it is an excellent suggestion and think it would go a long way in trying to bring about a better understanding with our South American neighbors.

May I take this opportunity to congratulate you on this outstanding proposal.

Sincerely yours,

ROMAN C. PUCINSKI,
Member of Congress.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C.

JAMES A. DONOVAN, JR.,
Assistant Chief, Leaders and Specialists Division, International Educational Exchange Service, Department of State, Washington, D.C.

DEAR MR. DONOVAN: My attention has been called to the proposal made to your agency by Mr. Louis P. Farina, of Chicago, for the exchange of young political leaders with Latin American countries. I believe Mr. Farina's suggestion has a great deal of merit and I am most pleased to learn that you are now seeking further information about this project from American Embassies in the South American Republics.

I do hope that this program can be given serious consideration by the Department of State, particularly at this time when we are experiencing ever-increasing tensions with many of our South American neighbors.

I will be most grateful to you if you will keep me advised on any further developments regarding this proposal.

Sincerely yours,

ROMAN C. PUCINSKI,
Member of Congress.

DEPARTMENT OF STATE,
Washington, April 12, 1960.

MR. LOUIS P. FARINA,
President, Young Democrats of Illinois, Chicago, Ill.

DEAR MR. FARINA: I regret the delay in providing a further answer to your letter of December 4, 1959, to President Eisenhower regarding the possible exchange of young political leaders. Your suggestions have been carefully considered and appear to have considerable merit. Realizing, however, that the phenomenon of "young political leaders" in the sense that it occurs in the NATO countries and the United States is not present to the same degree in all the nations of Latin America, the Department of State is asking its missions in all the American Republics to comment upon your suggestion in the light of the situation in their particular areas.

I believe their replies will be helpful in assessing the applicability of such a program to that area, and will write you again when this survey is complete.

Sincerely yours,

JAMES A. DONOVAN, JR.,
Assistant Chief, Leaders and Specialist Division, International Educational Exchange Service

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 14, 1960.

LOUIS P. FARINA,
President, Young Democrats, State of Illinois, Chicago, Ill.

DEAR LOU: Enclosed you will find a carbon copy of a letter I sent to the State Department today regarding your suggestion for an exchange of young political leaders from South American countries. I think your suggestion is excellent, and hope the State Department will treat it seriously.

Needless to say, I am sure we can implement this suggestion much more successfully if we have our own President in the White House after November 8.

Congratulations on a very excellent suggestion.

Sincerely yours,

ROMAN C. PUCINSKI,
Member of Congress.

DEPARTMENT OF STATE,
Washington, D.C.

Hon. ROMAN C. PUCINSKI,
House of Representatives.

DEAR MR. PUCINSKI: Thank you for your letter of May 14, 1960, to Mr. James A. Donovan, Jr., referring to Mr. Louis P. Farina's suggestion for the exchange of young political leaders with Latin American countries.

As you have been informed, we have asked the views of our missions in all the American Republics as to the feasibility of such a project. From the preliminary replies received to date, it appears that the suggestion may be more appropriate in the larger nations, since smaller countries vary so much in the degree of development of young political leadership.

When the replies are complete and have been analyzed, I shall be pleased to let you know the results. Meanwhile, I wish to express our appreciation for your interest in the Department of State's cultural exchange program.

Sincerely yours,

WILLIAM B. MACOMBER, Jr.,
Assistant Secretary.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 17, 1961.

Mr. LOUIS P. FARINA,
President, Young Democrats, State of Illinois, Chicago, Ill.

DEAR LOU: Thank you very much for the copy of the letter that you received from the Department of State relative to the exchange of young political leaders between our country and the Latin American countries.

It is evident that your suggestions received close attention and I am sure that they will be given every serious consideration. May I compliment you on your fine idea and it has to be a good one to have the Republican administration consider a suggestion by the president of the Young Democrats of Illinois.

I feel confident that you will gain some positive results from this action. Would you please keep me informed on the progress that is made in this matter?

With kind regards.

Sincerely yours,

DAN ROSTENKOWSKI,
Member of Congress.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., May 9, 1960.

Mr. LOUIS P. FARINA,
President, Young Democrats, State of Illinois, Chicago, Ill.

DEAR LOUIS: I have received your note, relative to the exchange of young political leaders between our country and the Latin American countries. It is certainly not only a novel idea, but will, no doubt, establish a media for the friendly exchange and honest debate, and perhaps the solution to fundamental problems that, in the past, created fissures in our relationship with Latin America.

Your idea, put into operation, will certainly help the developing of a complete analysis of the workings of government and the principles and philosophy affecting governmental institutions. Only good can come out of this, because the tomorrow of each nation lies in the hands of the young leaders of today. You will note that, in every country where oppression rules, it is the student leaders in the colleges who create the movement to again hand back to the people their freedom.

If you will be so kind as to send me a copy of your letter to the State Department, I will be proud to present it, with comments, to the Congress, on this valuable contribution made by you and your group, to bring about a common basis of understanding between the young, active leadership of all countries in the Western Hemisphere.

I am certain that the State Department welcomes, and will approve, this valuable suggestion that you have presented to them.

Sincerely,

ROLAND V. LIBONATI,
Member of Congress.

COMMEMORATION OF THE 100TH ANNIVERSARY OF THE UNIFICATION OF ITALY

The SPEAKER. Under the previous order of the House the gentleman from Illinois [Mr. LIBONATI] is recognized for 15 minutes.

Mr. LIBONATI. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. LIBONATI. Mr. Speaker, the celebration of the 100th anniversary of the unification of Italy focuses attention upon Italy's international role among nations and the steady internal progress of the Italian economy.

In the former, a great transition has taken place since the thirties, wherein Italy, stirred by turbulent leadership for world domination, contributed much to the unrest and disturbance at the international level, yet, after World War II, has been one of the most stabilizing factors in international affairs.

Although Italy still faces tremendous problems and has suffered from serious mistakes, yet she has voluntarily made trade concessions, which have contributed much to the relaxation of the monetary pressures on the U.S. dollar crisis. In this critical situation, Italy canceled import restrictions against competitive American goods. As a result, the American trade balance changed from 20 million in 1959, in a 9-month period, to 181 million in 1960, for the same period.

The recent visit to Rome by our Ambassador, W. Averill Harriman, accentuated the question of greater Italian aid to the depressed areas in Italy and elsewhere, thus relieving America of certain financial pressures. It was pointed out that Italy has expended $320 million for that purpose, a tremendous sum compared to Italy's financial stature among nations. Italy itself as an underdeveloped nation, with 40 percent of its popular vote cast by Communist and Socialist groups of the electorate, could ill afford to finance depressed areas in other parts of the world, thus courting an increase in communism at home by abandoning needed reforms in Italy itself.

It is difficult for the Italians, or any nation, to consider the United States as really in financially embarrassed circumstances, when their needs are compared to the problems and needs of their own economy.

Yet, Italy is one of the few nations that has shown anxiety for the United States and, with understanding, has acknowledged the terrific financial burden that we have shouldered for the past decade and one-half, in financing the rest of the world. She has shown a deep gratitude for our contributions to the peace and strength of our Western Allies. She has not indulged in criticizing our lack of diplomatic acumen in the past, nor indulged in ungraciously pointing out our shortcomings in the international field of finance, as have others.

Italy emerged from World War II with a wholesome attitude of desiring to rebuild the nation. The gratitude during the war was best displayed to our troops in the Italian field of operations during hostilities and occupation. Italians, as a civilized society, never abandoned the basic truths of the dignity of man. The hundreds of thousands of troops of different creeds, races, and color, with whom they came in contact, were treated with friendliness and kindness. During Il Duce's most popular days—oppressed people in Italy were protected and sheltered by peasants and royalty alike. It was this type of decent thinking that contributed so much to the underground movement in Italy. Their invaluable service to the Allies' cause is now a historical reality. The great majority of Italians proved that they preferred to live like civilized human beings, even though subject to a long Facist indoctrination.

The distinguished Italian Ambassador to the United States, Manlio Brosio, whom everyone in Washington loves, is a true example of the courageous and heroic men who served as leaders in the underground movement.

Thus, Italy needed no prodding nor propagandized program to immediately join the cause of America in its beneficent program, the Marshall plan, to start to reconstruct, immediately, an impoverished and bankrupt nation.

So that the Italian celebration of its first centennial is indeed a glorious occasion. It is recording itself at a time when the Italian nation stands out among leading nations on many fronts, on the international scene. Its economy is one of the strongest in Europe. In a competitive sense, she occupies a high place in commerce, industry, and trade among nations.

Her postwar advancement and achievements, in spite of the Communist burden of 40 percent of the electorate, has been stupendous. Her natural resources nil, overpopulation and extreme poverty, a bankrupt economy,

tremendous loss of the flower of her manhood, devastation of war, were a few of the factors that she faced, yet her progress toward financial stability and internal readjustment of all facilities in every phase of Italian life is a reality. The return to democracy proved to result in the instantaneous release of Italian talents. The development of the movie and fashion industries soon captured the eyes of the world. The bold adventure in these fields was rewarded. The Italian mind developed an analytical sense of artistic beauty; its contributions received worldly acceptance.

The cinematic contributions were realistic, true to life—a clear and veritable study of human conditions.

The acute minds of the industrialists prepared Italy for a reawakening in industry. Raw recruits were trained in schools maintained by industry to prepare the employee for skilled employments.

Thousands of men and women throughout Italy entered these schools—at bare living expense salaries during the periods of training—thus the Italian industrial empire was launched and trained to enter the competitive markets of the world. The industrial production figures showed terrific increases; from 1953 to 1960 the output was almost doubled. Italy was first among the nations of the world in increased output of production. It took hard work and back-bending patience and effort to accomplish this.

In 1960 the gross national product rose by 8 percent, while Italy's gross industrial production increased by 14 percent.

Italian farming is far from recovery, as compared to other divisible factors in the economy. The poverty-riddled agricultural provinces of southern Italy must be subject to many readjustments and modernized methods in farming, before an appreciable advance can be made. When compared to the industrial growth, it naturally falls far behind, totaling one-fifth of the national income. Italy, through its industrial geniuses, has edified the world.

Italy is one of the foremost nations in its desire to solidify and unify the nations of Western Europe into an economic and diplomatic unit of operation.

Italy takes a generous view of the operations of a common market among nations, and uses her good offices to bring about closer ties with other groups of nations in the same venture.

Italy, on the international scene, fully cooperated with the Allies in releasing her colonial empire and, as trustee for 10 years over Somaliland, expended large sums of money to aid the natives and prepare them for the eventuality of the subsequent release.

The Austrian question over South Tyrol, which Italy claims as Italian and desires the administration and control—Italy seeks to submit the question to the International Court of Justice. Yet Austria has not agreed. The fairness of this proposal discloses the Italian sense of fairness.

Italy has been unwavering in her adherence to the democratic way of life, despite many unfortunate difficulties. She is one of America's closest friends in Europe. Every tourist feels and knows of this complete acceptance of the American and the gratitude of a grateful people.

Some Italians complain of the methods used in carrying out the various programs to aid the Italian economy, but the people of Italy have done much to advance the cause of the Western Powers.

Italy has its share of malcontents, crying and pitying their lot—but the majority of Italians went right to work repairing their roads, rebuilding factories, restoring farmlands, and rundown dilapidated farm structures. The aroused populace began to see the effects of the resurgence of ambition in the blood of the national life. More goods appeared in the stores, and beggars and urchins, products of the poverty brought on by the war, began to disappear from the cities. Work, work, work, was the cry of the day. Also all over Western European nations came the tense desire of activity that brought remarkable regeneration of their war-ridden economies.

Mr. Speaker, on Thursday, March 16, 1961, the centennial celebration of the unification of Italy was celebrated, at a ceremony held under the patronage of the President of the United States of America and the President of the Republic of Italy.

This centennial was commemorated through a proclamation issued by the President of the United States and the Secretary of State, as follows:

Whereas the centennial of the unification of Italy, which occurs in 1961, commemorates a great event in the history of nations; and

Whereas, in the observance of the centennial, there will be many celebrations in Italy, in the United States, and in many other countries as events of a century ago are relived; and

Whereas we in America are confident that the people of Italy, in the celebrations reenacting the events and experiences of a century ago, will find renewed strength to further their vital contributions to the cause of freedom; and

Whereas it is the sense of the Congress, expressed by House Concurrent Resolution 225, agreed to July 2, 1960, that the President extend official greetings from the United States to the people of Italy on the occasion of the centennial of unification of Italy: Now, therefore

I, John F. Kennedy, President of the United States of America, do hereby extend greetings and felicitations from the people of the United States to the people of Italy on the occasion of the centennial of the unification of Italy, in recognition of the progress and achievements of the Italian people during the past century and the bonds of friendship between our two nations.

In witness whereof, I have hereunto set my hand and caused the seal of the United Statets of America to be affixed.

Done at the city of Washington this 8th day of March in the year of our Lord 1961, and of the independence of the United States of America the 158th.

By the President:

JOHN F. KENNEDY.
DEAN RUSK,
Secretary of State.

The resolution was duly passed by the Congress and signed by the President, John F. Kennedy, and the Secretary of State, Dean Rusk.

A message by the Honorable Giovanni Gronchi, President of the Republic of Italy, was received and read by the distinguished Congressman from New York, the Honorable VICTOR ANFUSO, general chairman of the American Honorary Committee for the Italian Centennial, as follows:

Mr. Chairman: I am happy to address, through your courtesy, the good wishes and greetings of the Italian people, as well as my own, to the American Committee for the Italian Centennial and to all those—Americans and Italians—who have participated with such spontaneous enthusiasm in the celebration on American soil of this day which has such lofty significance for the history of my country.

I address my gratitude particularly to the President of the United States, who has consented to attend these ceremonies, as well as to the Members of Congress, the Governors, the mayors, the educational and cultural institutions, the public and private officials, to the numerous committees from all over America who joined in commemorating our anniversary.

The great American Nation, which has such a high sense of liberty, recognized in the events that 100 years ago led to the unity of the Italian people the selfsame yearning for independence which led to the birth of the United States.

Thus, the tribute being paid in America to our Risorgimento, whose anniversary is being celebrated throughout Italy with great solemnity, is a new expression of the spirit which increasingly binds the peoples of our two countries in their determination to enhance, both now and in the future, the values of a free civilization. At the same time, these observances which unite Americans and Italians underscore those sentiments of confident friendship which opened the doors many years ago to the constructive contributions of Italians to life in the United States.

Please accept, Mr. Chairman, the gratitude of the Italian people and of myself and kindly convey it to all those who in response to the committee's appeal are today celebrating this joyful anniversary of our national unity.

GRONCHI.

A further message was received from the Honorable Amintore Fanfani, President of the Council of Ministers of the Republic of Italy, the distinguished Italian Patriot, whose every idea conforms to the American philosophy that every man should have an opportunity to own land and property and further his financial stability to provide for his children new advantages and new opportunities for their betterment and welfare. His message follows:

Mr. Chairman, we, in Italy, are deeply moved by the thought that on March 16 the centennial of the unification of Italy will be observed in the city of Washington for the first time in a foreign country.

It is highly significant that the United States, whose own history is based upon the respect of freedom and a sense of independence, so promptly realized the import of that long and hard struggle which led to Italian unity 100 years ago, through strife and suffering, through the deep beliefs of our people, the sacrifice and martyrdom of the brave, the able and patient efforts of our leaders.

I believe the reason for this understanding lies in the similarity of historic events, in

the common struggle for the same goals and in the active participation of Americans and Italians in the development of both countries. All this stirred in the hearts of the people of the United States the memory of the years when the new Italy was born and a friendship was started, which never died.

The warm American participation in the observance of our centennial adds to the many ties already existing between our two countries a new bond which strengthens their determination to persist in the defense of the common ideals of the two nations.

I am therefore extremely happy to convey the greetings and the appreciation of the Italian Government, as well as my personal thanks, to you, Mr. Chairman, to the American Committee for the Italian Centennial and to all those—Americans and Italians—who joined in the observance of this solemn anniversary in your country.

I wish particularly to extend my grateful respects to the President of the United States, who graciously consented to honor the ceremony with his presence, to the diplomatic corps, the Members of the Congress, the Governors, the mayors, the various institutions, committees and personalities that in Washington and all over America are celebrating our centennial.

I am happy to express my heartfelt thanks and those of the Italian Government to them all."

A. FANFANI.

The program of the ceremony was conducted with dignity and finesse. The arrival of the President of the United States was impressive and he was enthusiastically received. The U.S. Marine Band orchestra, directed by Lt. Col. Albert T. Schoepper, U.S. Marine Corps, played several musical selections appropriate to the occasion. The invocation was given by His Excellency the Most Reverend Patrick O'Boyle, archbishop of Washington. The opening remarks by the Honorable VICTOR ANFUSO, Member of Congress, were as follows:

It is a great honor for me to have been singled out by my colleagues on the American Honorary Committee to be the chairman of this historic event. It is my pleasure to welcome you.

It is of particular significance for me, since I came to this country as an immigrant from Italy at the tender age of 9. Little did I dream then that some day this immigrant boy would preside at a celebration of this sort in Washingon, where the President and other great leaders of this Nation would gather to pay tribute to my ancestral homeland on the centennial anniversary of its unification as a single strong nation.

I am deeply grateful this morning, as never before, to this wonderful country of ours for the unlimited opportunities which I and millions of other Americans of Italian extraction have received. This is a feeling which only immigrants and the children of immigrants can fully appreciate.

The President of the United States has played a significant role in these celebrations. I have had the honor and the privilege to know the President ever since I first came to Congress in January 1951, when I served with him in the House of Representatives. I remember the kindly guidance he gave me then—and I shall never forget his encouraging assistance on several projects which I proposed to the Congress in those days.

This association continued also after he had moved over to the U.S. Senate, and it is best exemplified by the fact that after I had introduced the resolution on the centennial observance of Italian unification and brought it to the attention of Mr. Kennedy, he immediately introduced it in the Senate. May I quote just a brief remark by Mr. Kennedy at the time he introduced the resolution on July 13, 1959, when he said:

"The concurrent resolution expresses our pleasure in receiving the invitation (to participate in the observance) and testifies to our admiration for the contributions this great nation has made to our common ideals of freedom and independence. It is fitting and proper that we recognize in this fashion the progress and achievements of the people of Italy during the past century."

During this entire decade that I have been privileged to know Mr. Kennedy, I have always found him to be an admirer of Italy and of its achievements in the annals of culture and civilization. Likewise, he has a keen appreciation of the contributions of Americans of Italian descent toward the upbuilding of America and its way of life.

It is to a certain extent an irony of history that, as Italy was reborn as a united nation, the United States was on the threshold of facing its greatest test for survival. As the guns were stilled in Italy, and Garibaldi was going back to his beloved island of Caprera with a bag of bean seeds on his shoulder, the guns of Fort Sumter on this side of the Atlantic were rumbling Italy's Risorgimento, which means rebirth as a nation, was being accomplished.

And speaking of Garibaldi, I take particular pleasure in greeting here this morning the grandson of that great patriot, Gen. Ezio Garibaldi, and also his granddaughter, Mrs. Giuseppina Ziluca. May I ask them to take a bow.

Today there exist strong bonds of friendship between the United States and Italy. The bonds joining our two nations are in my estimation, stronger and deeper than those resulting from a military pact or an economic program. They are the bonds of faith and confidence in one another, of mutual respect and understanding between two great peoples, of genuine friendship and reciprocal contributions.

The bridge of understanding between the people of the United States and the people of Italy was not constructed overnight. It is a process which is at least as old as the United States, and in fact goes back to our earliest days when small but significant numbers of Italians joined the waves of early explorers and settlers who came to these shores. They and succeeding generations of Italian immigrants, who settled in this land, have made lasting contributions to our American heritage over the long centuries. The imprint of their contributions on American life and civilization is visible all around us.

We live in a crucial time in the annals of human affairs which requires utmost unity in the ranks of the free nations. The future survival of democratic America and of the whole free world depends, in large measure, on reinforcing our bonds of cooperation with nations like Italy, and on the creation of working partnerships with such nations in every endeavor which could serve the best interests of mankind.

It is not for me to spell out in detail how this partnership between our two nations is to be created, nor is this the time and the place to do so. Suffice it merely to indicate that we have the beginnings of it in several ways: the fact that Italy has been willing to give as much as she receives; the fact that Italy has made available to us areas for the establishment of military bases; Italy's significant role in NATO; Italy's strategic position in the Mediterranean in relation to Europe, Africa, and the Middle East; and Italy's ancestral ties in Latin America.

Our partnership can be extended and deepened in other ways through many new ideas and bold action. Instead of working alone in certain areas, where our help has been misunderstood, let us invite the participation of partnership—nations like Italy—if such participation will bring about better understanding and more fruitful results. The possibilities are unlimited. This, too, may in time prove to be a New Frontier in our international relations.

It is, therefore, only fitting and proper that we choose this occasion to rededicate ourselves to the same ideals which triumphed over a hundred years ago. In this era of the New Frontier, let us, in the words of our beloved President, pray that the future years will prove to be the years when the tide came in—when America, together with a strong and united Italy and a free world, moved forward again.

Representative ANFUSO's remarks were followed by a special message delivered by H. E. Manlio Brosio, Ambassador of Italy to the United States, and a superb address was given by the Honorable Professor Gaetano Martino, Member of the Italian Parliament and head of the Italian delegation to the U.N. General Assembly.

The address by President Kennedy covered several interesting and important points, such as:

President Kennedy called for a "new reawakening of man's aspirations for freedom and progress" in the manner exemplified by the American and Italian struggles for unity and independence.

The President hailed Italy's age-old contributions to world history and said that country's achievements since 1945 had been "surely the most inspiring experience of the postwar era."

He spoke at a ceremony marking the 100th anniversary of the unification of Italy. The centennial ceremony, sponsored by a committee of leading Italian-Americans, was held at the State Department auditorium here.

Mr. Kennedy told about 1,000 invited guests at the centennial ceremony that many of those present were not Italian by blood or birth but "all of us in a large sense are beneficiaries of the Italian experience."

"So much of what we are and so much of what we believe had its origin in this rather small spear of land stretching into the Mediterranean," Mr. Kennedy said, "that it is an honor as President of the United States to participate in this important occasion in the life of a friendly country, Italy."

The President paid tribute to the millions of citizens of Italian descent who have added to the strengthening of life in this country.

"The ancient ties between Italy and the United States have never been stronger," he said, "than they are at the present."

Among the distinguished guests in attendance at the ceremonies were Mrs. Kennedy, Vice President Lyndon B. Johnson, Justice Felix Frankfurter, the members of the President's Cabinet, and many Members of the House and Senate, including our revered Speaker, Mr. Rayburn, as well as Senators Kefauver and Cooper.

The American Honorary Committee for the Italian Centennial were: Honorary chairman, Senator JOHN O. PASTORE, Rhode Island; general chairman, Representative VICTOR L. ANFUSO, New York; secretary, Representative PAUL A. FINO, New York.

Members: Gov. John A. Volpe, Massachusetts; Gov. John A. Notte, Rhode Island; Gov. Michael V. DiSalle, Ohio; Gov. Albert D. Rosellini, Washington; Representative Peter W. Rodino, New Jersey; Representative George P. Miller,

California; Representative Hugh J. Addonizio, New Jersey; Representative Dante B. Fascell, Florida; Representative John H. Dent, Pennsylvania; Representative Roland V. Libonati, Illinois; Representative Alfred E. Santangelo, New York; Representative Silvio O. Conte, Massachusetts; Representative Emilio Q. Daddario, Connecticut; Representative Dominick V. Daniels, New Jersey; Representative Robert N. Giaimo, Connecticut; Representative Joseph P. Addabbo, New York.

The executive committee: Mr. William Amoroso, chairman of the Washington Chapter of the Order Sons of Italy; Mr. Joseph Lapiana, chairman of the Lido Club, Washington, D.C.; Mr. Luigi Iacono, chairman of the Italian Society of Washington, D.C.

RECESS

The SPEAKER. The House will stand in recess subject to the call of the Chair, 15 minutes' notice to be given.

Accordingly (at 5 o'clock and 22 minutes p.m.) the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 6 o'clock and 8 minutes p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 5463. An act to amend and extend the Sugar Act of 1948, as amended.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. BYRD of Virginia, Mr. KERR, Mr. LONG of Louisiana, Mr. SMATHERS, Mr. CARLSON, and Mr. BENNETT to be the conferees on the part of the Senate.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, a bill of the House of the following title:

H.R. 1163. An act to ament section 510 of the Interstate Commerce Act so as to extend for fifteen months the loan guaranty authority of the Interstate Commerce Commission.

The message also announced that the Senate insists on its amendments to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. SMATHERS, Mr. LAUSCHE, Mr. MONRONEY, Mr. SCHOEPPEL, and Mr. BUTLER to be the conferees on the part of the Senate.

EXTEND AND AMEND THE SUGAR ACT

Mr. COOLEY. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill—H.R. 5463—to amend and extend the Sugar Act of 1948, as amended, with Senate amendments thereto, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

Mrs. MAY. Mr. Speaker, reserving the right to object, may I propound a parliamentary inquiry?

The SPEAKER. The gentlewoman will state it.

Mrs. MAY. Mr. Speaker, may I offer a preferential motion?

The SPEAKER. There is nothing before the House except the unanimous-consent request of the gentleman from North Carolina [Mr. COOLEY].

Is there objection to the request of the gentleman from North Carolina?

Mr. ROGERS of Texas. Mr. Speaker, reserving the right to object, I should like to make a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. ROGERS of Texas. If an objection is made, does the bill go back to the committee having jurisdiction?

The SPEAKER. It does not; and the Committee on Rules, I am sure, would be called together immediately and asked to report a rule to send the bill to conference.

Mr. ROGERS of Texas. Mr. Speaker, a further parliamentary inquiry: If that were done, then would the preferential motion of the gentlewoman from Washington be in order?

The SPEAKER. Probably not.

Mr. HALLECK. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HALLECK. When the conference report comes back, would a motion to recommit be in order at that time?

The SPEAKER. If the House acts first.

Mr. HALLECK. In other words, if the House acts first, when the conference report comes back, then a motion to recommit would be in order?

The SPEAKER. If the House acts first, a motion to recommit a conference report would be in order.

Is there objection to the request of the gentleman from North Carolina? The Chair hears none, and appoints the following conferees: Messrs. COOLEY, THOMPSON of Texas, JONES of Missouri, HOEVEN, and DAGUE.

The SPEAKER. The House will stand in recess subject to the call of the Chair.

Accordingly (at 6 o'clock and 10 minutes p.m.), the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 8 o'clock and 4 minutes p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 32. Joint resolution to designate the first day of May of each year as "Law Day, U.S.A."

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5463) entitled "An act to amend and extend the Sugar Act of 1948, as amended."

EXTEND AND AMEND THE SUGAR ACT

Mr. COOLEY submitted the following conference report and statement on the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended:

CONFERENCE REPORT (REPT. NO. 212)

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended, having met after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the Senate recede from its amendment numbered 8.

That the House recede from its disagreement to the amendments of the Senate numbered 1, 2, 3, 4, 5, and 6, and agree to the same.

Amendment numbered 7: That the House recede from its disagreement to the amendment of the Senate numbered 7, and agree to the same with an amendment, as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "special consideration" and the Senate agree to the same.

HAROLD D. COOLEY,
CLARK W. THOMPSON,
PAUL C. JONES,
CHARLES B. HOEVEN,
PAUL B. DAGUE,
Managers on the Part of the House.
HARRY F. BYRD,
ROBT. S. KERR,
RUSSELL B. LONG,
GEO. A. SMATHERS,
FRANK CARLSON,
WALLACE F. BENNETT,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill H.R. 5463 to amend and extend the Sugar Act of 1948, as amended, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report.

As agreed to by the conferees, the bill reported back herewith is different from the bill as adopted by the House in only two respects: (1) The termination date and (2) the provision giving special consideration to countries of the Western Hemisphere and countries purchasing United States agricultural commodities in the allotment of ex-quota purchases of sugar.

Termination date: The House conferees have agreed to an extension of 15 months (to June 30, 1962) instead of the 21 months (to December 31, 1962) provided in the House bill.

Ex-quota purchases: The House bill provided that consideration should be given in ex-quota purchases to countries of the Western Hemisphere and to those countries

purchasing United States agricultural commodities. The Senate adopted an amendment changing the word "consideration" to "preference." The conferees have agreed on the words "special consideration" in lieu of the Senate amendment.

Provision for new growers: The Senate adopted an amendment giving domestic areas absolute priority on any quota withdrawn from Cuba and giving new and potential producers of sugarbeets and sugarcane certain consideration in the event restrictive proportionate shares are reimposed on domestic beet or cane production.

The Senate receded from this amendment with the understanding that hearings on a long-range sugar bill will be started by the House Committee on Agriculture early in May and that every effort will be made to report a bill and pass it through the House at this session of Congress. The House conferees also expressed the hope that the Senate Committee on Finance would undertake hearings contemporaneously with those of the House so that long-range sugar legislation might be enacted at the earliest practicable date.

HAROLD D. COOLEY,
CLARK W. THOMPSON,
PAUL C. JONES,
CHARLES B. HOEVEN,
PAUL B. DAGUE,
Managers on the Part of the House.

Mr. COOLEY. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

Mr. COOLEY. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from North Carolina?

There was no objection.

The Clerk read the statement.

Mr. COOLEY. Mr. Speaker, I yield to my colleague the gentlewoman from Washington [Mrs. MAY].

Mrs. MAY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentlewoman from Washington?

There was no objection.

Mrs. MAY. Mr. Speaker, I should like to clarify for the record the intent of my effort to offer a preferential motion at the time the conferees were appointed on H.R. 5463, extending the Sugar Act of 1948. I offered this motion in an attempt to make the motion that the House agree to concur with H.R. 5463 as amended by the Senate. When this motion was ruled out of order, the minority leader at my request made parliamentary inquiry if a motion to recommit the bill would be in order. It was stated by the Speaker that the motion to recommit would be in order if the House acted first upon the conference report. It was my intention to offer this motion to recommit if the conference report was presented first to the House for action. I wanted to do this in an attempt to keep the Senate amendment providing special consideration to new growers in domestic sugar areas for allocation of quota because of my oft-stated request that these new areas must get this action from Congress if we are to attract processing mills into their regions. Since the conference committee refused to accept the Senate amendment on this new grower provision, then my motion to recommit would have been for the purpose of having the amendment restored to the bill. However, the House did not have the opportunity to act first, and the Senate accepted the conference report, consequently it was impossible for me to offer my recommittal motion.

Mr. COOLEY. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

ADJOURNMENT FROM THURSDAY, MARCH 30, 1961, TO MONDAY, APRIL 10, 1961

Mr. McCORMACK. Mr. Speaker, I offer a concurrent resolution and ask for its immediate consideration.

The Clerk read as follows:

H. CON. RES. 211

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Thursday, March 30, 1961, it stand adjourned until 12 o'clock meridian on Monday, April 10, 1961.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZATION TO RECEIVE MESSAGES AND SIGN BILLS DURING ADJOURNMENT OF THE HOUSE

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the House until April 10, 1961, the Clerk be authorized to receive messages from the Senate and that the Speaker be authorized to sign any enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

AUTHORIZATION FOR THE SPEAKER TO ENTERTAIN MOTIONS TO SUSPEND THE RULES, ETC.

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that on Tuesday, April 11, 1961, it shall be in order for the speaker to entertain motions to suspend the rules notwithstanding the provisions of clause 1, rule XXVII, that it shall be in order to consider business under clause 4, rule XIII, the Consent Calendar rule, and that on the same date the Private Calendar may be called.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. HALLECK. Mr. Speaker, reserving the right to object—and I shall not object, on the condition that since this is not a regular day for suspensions, no bills will be called for suspension unless they have been cleared with the minority leadership.

Mr. McCORMACK. That is absolutely correct. I might say that any committees or members of committees handling bills who desire to submit them to the Speaker for suspension on April 11 should also send a letter to the minority leader so that he can be advised. I can assure the gentleman that as far as the Speaker and I are concerned, the gentleman will be consulted in accordance with the agreement that has just been made by me.

Mr. HALLECK. If I may add further, as I understand it, probably at the moment there could be no definite statement as to what bills might be called, but this provision is made simply to meet some emergency that might arise.

Mr. McCORMACK. I rather agree with the first part of the gentleman's statement that we have no knowledge as to what bills might be called, but no bill will be put on the suspension calendar without consultation with the minority leader. I might also say for the information of the House that I have no knowledge of any business for Monday, April 10.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Iowa.

Mr. GROSS. May I ask the gentleman from Massachusetts if there is any business scheduled for tomorrow?

Mr. McCORMACK. No.

Mr. GROSS. I thank the gentleman.

Mr. HARRIS. Mr. Speaker, will the gentleman yield?

Mr. HALLECK. I yield to the gentleman from Arkansas.

Mr. HARRIS. I am sorry I have not had an opportunity to discuss this with the gentleman from Massachusetts, but I have just been advised, only a very few minutes ago, that the other body passed the bill to extend the guarantee loan provision for the railroad industry with an amendment or two. I am endeavoring to stress the importance of the fact that the bill expires on the 31st of the month, and that I wish to ask for a conference and get an agreement by noon tomorrow to take up the conference report, because there is relatively unanimous agreement. I should like to reserve this right as best I could. I have not had an opportunity to discuss it with anyone because I was called about it from the other side within the last 10 minutes.

Mr. McCORMACK. I can understand that fact.

Mr. HARRIS. The expiration date of the act is March 31. We do think it is quite important, if we can, to get it through. I would think it would certainly be noncontroversial, as far as I know.

Mr. HALLECK. Might that matter not be brought up right now?

Mr. HARRIS. No, I cannot do it because I have to agree to a conference. The other body has asked for a conference. That makes it necessary for the House to agree to the conference. Naturally it will take a little time to get the conference report back.

Mr. HALLECK. May I say that as far as I can find out on this side there will be no controversy about it. It can be disposed of tomorrow. As I understand it, we are to be in session tomorrow. I understood the majority leader's solicitude for the Members, but as far as I am concerned I would hope that we could dispose of the matter tomorrow.

Mr. McCORMACK. Of course, we are faced with a situation where we have to act. With the permission of the minority leader and the Members of the House, I should like to correct the statement I made to the gentleman from Iowa and say that in view of the information given to the leadership of the House by the distinguished gentleman from Arkansas that conference report will be brought up tomorrow. I never break an agreement, so I ask the Members of the House to permit me to correct this statement I made heretofore.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

EXTENDING LOAN GUARANTEE AUTHORITY OF INTERSTATE COMMERCE COMMISSION

Mr. HARRIS. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guarantee authority of the Interstate Commerce Commission, with amendments of the Senate thereto, disagree to the amendments of the Senate and agree to the conference asked by the Senate.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas? (After a pause.) The Chair hears none, and appoints the following conferees: Messrs. HARRIS, WILLIAMS, and SPRINGER.

BILL TO ENCOURAGE PRACTICAL NURSE TRAINING

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York.

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I take great pleasure in joining other Members of this House in introducing legislation to encourage the training of practical nurses by continued Federal participation in the financial support of these vocational training programs. The question of health care in our society and the cost of this care must always be a matter of concern to the Congress and I believe that this is truly a constructive step toward improving health care for our people and providing it at a lower cost by action of the Federal Government.

The practical nurse occupies an important position in the health care team—the doctor, the registered nurse, therapists, hospital administrators, and others round it out. Hospitals, nursing homes, and other health facilities have need for the skills which a practical nurse can offer. In many cases, the practical nurse can replace a registered nurse in certain functions, leaving the registered nurse free for the accomplishment of higher skilled jobs. The concept of our health care team, the combined skills of many individuals using the techniques and facilities available which have given America the best health care of any society at any time, is one which has an important place for the practical nurse.

And this has an effect on the cost of medical care. Those services which the practical nurse performs, rather than having them left to the registered nurse, can be performed more cheaply. Thus, the freeing of the registered nurse to cover more patients gives better care for our people and the utilization of practical nurses wherever possible lowers the cost of care.

The extension and improvement of the training of practical nurses, with the resultant benefits of it, form one part of a program for the improvement of health care services and the lowering of their costs. In the last Congress, I sponsored an amendment to the National Housing Act which made FHA loans available for the construction of nursing homes. The response to this new feature of the FHA program has been heartening and hundreds of those who need nursing home care will be accommodated in homes built under this program. And, because the financing costs of the home will be lower, the cost to the patient will likewise be less.

There are further areas into which the Federal Government might go to make truly constructive advances in our program of health care. One of these areas is that of home care and the visiting nurse program. Just as nursing homes can care for many of the patients who might otherwise be sent to hospitals, many persons can be treated at home, and often best treated in the surroundings of their family. Costs of this care is less than that of the nursing home or the hospital. Adequate care, based upon the work of the visiting nurses and the training which she can give to the family in caring for the patient, given in the home is a part of the health care services of our society and should be encouraged and supported by the Government.

It is my hope that the Congress will extend the Federal participation in the practical nurse training program and will look into the other forms of health care which can be used to improve this country's system of health services.

AMENDMENT TO EQUALIZE TAXATION FOR THE REDEMPTION OF PREFERRED STOCK

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I have today introduced an amendment to section 302(b) of the Internal Revenue Code of 1954 dealing with the income tax treatment of funds received in redemption of paid-for preferred stock.

Preferred stock is, in reality, a cross between common stock with its characteristics of ownership and bonds. Under the law, in certain cases redemption of preferred stock is treated for tax purposes as the return of capital, in others this redemption of the same stock is treated as dividends and taxed accordingly. Those preferred stockholders who either own no common stock or whose common and preferred stock are held in widely varying proportions fall into the first category. On the other hand, those stockholders who own the common and preferred stock of a corporation in what is called "substantially" proportionate ratios fall into the second category. This denies the idea that one man may have two distinct relationships with a corporate entity. For example, this same reasoning is not applied to an individual who holds both the common stock and the bonds of a corporation and whose bonds are paid off, so long as the bonds represent true indebtedness and the equity capital is sufficient for the needs of the corporation.

My amendment to the Internal Revenue Code would end this capricious distinction between the treatment of the proceeds of the redemption of preferred stock in the differing situations cited and would permit this stock, insofar as it represents capital invested in money or goods, to be treated as a return of capital.

The present taxation of the income derived from the redemption of preferred stock as dividend income turns some corporations, especially closely held family corporations, to debt financing rather than equity financing when further investment is needed. A change in the system of taxation of the redemption proceeds of paid-for preferred stock would have the beneficial effect of making equity financing more attractive to the corporation and would, in the long run, produce greater tax revenues.

The taxation of capital return, as distinguished from interest or dividends paid on that capital, is contrary to our Constitution. This amendment would assure proper tax treatment for the redemption of all preferred stock.

PROPOSAL FOR THE DEVELOPMENT OF THE CURRENT AND ELEVEN POINT RIVER AREA OF MISSOURI

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Missouri [Mr. CURTIS] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I have today introduced a bill which would establish the Ozark Scenic Riverways, an area of natural beauty and recreation in the Ozark River area of

Missouri. This Scenic Riverway would be administered by the U.S. Forest Service as a part of the Clark National Forest in southern Missouri. I believe that action should be taken to preserve the natural beauty of this region and to develop it for the recreational use of all Americans.

In the last Congress, I introduced legislation for this area similar in purpose but with the National Park Service rather than the Forest Service playing the guiding role. In this Congress my colleague from Missouri [Mr. ICHORD] has introduced this proposal as H.R. 5712. It would establish an Ozark Rivers National Monument as part of the national park system and is designed to accomplish the same ends as the Scenic Riverways proposal.

I believe that it is only proper that the Interior and Insular Affairs Committee of this House have the opportunity to look into the alternative proposals for the development and preservation of this region and, for this reason, I wish to bring this second approach to its attention. I offer this bill in the belief that it is only by weighing the different approaches that the best final solution can be achieved. The important thing is that the Congress find a workable program by which the purposes outlined in both approaches can be achieved. I will be happy to support any workable program that the committee can draft, for it is the result and not which of the alternative methods of achieving it is used that is the important thing.

Along with a plea that the Congress give sympathetic hearing to this general proposal, I would like to highlight one of its features which opens a new approach to the very important job of administering recreational areas for the people of this country who are looking for healthy, enjoyable activity to round out their ever increasing leisure hours. This feature deals with the acquisition and management of strip property—such as riverfront property—as part of a coordinated recreational area program.

My bill would provide for the acquisition of easements, rather than fee title, on land bordering streams and rivers that are part of the Ozark Scenic Riverways. These easements would establish cooperative development areas, areas in which the purposes of the individual owner and the recreational management would be jointly developed. Use of the land not inconsistent with the purposes of the recreational area would be left open to the owners of it; they would be paid for the limitation on the full free use of the land but in the long run it would be less costly than acquisition of the land by the Government. This would be similar to the setback laws which are common features in municipal ordinances. The property owner must abide by the regulation that his house cannot be built closer to the street than, say, 20 feet. A man's front yard is still his own, and he can use it as his own except that he cannot build his house closer to the street than a set distance. The setback idea leaves ownership in the individual and provides only minimal restrictions on his land usage.

Together with this feature, my bill, and also the bill embodying the Park Service approach, provide for an advisory commission made up of interested individuals on the local, State and National level to advise the managing authority on matters pertaining to the area. Both also make provision for multiple use, including hunting and fishing. Payment in lieu of taxes for the land taken is also covered by the two bills.

The Ozark Rivers area of Missouri can be a wonderful recreation area as well as a region of great natural beauty. To make these two elements of the Ozark Rivers available to everyone and to protect and develop them, some program must be put into effect. I urge the Congress to study this matter thoroughly and present a program behind which those interested can join in this most worthy purpose.

DEPRESSED AREA BILL

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Pennsylvania [Mr. WHALLEY] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. WHALLEY. Mr. Speaker, I intend to support the Depressed Area bill, S. 1, which certainly is necessary to the State of Pennsylvania, due to the fact that Pennsylvania has more depressed areas than any other State.

Unemployment in Pennsylvania has increased from 300,000 in 1954 to more than 500,000 at the present time. Moreover, Pennsylvania paid almost $300 million for unemployment benefits in 1960, and approximately $200 million for public assistance.

Pennsylvania has already tried to help itself with its unemployment problem. As a member of the Pennsylvania State Senate, I cosponsored the Pennsylvania Industrial Development Act—PIDA—in 1955. Since that time, Pennsylvania has made 145 loans—total $17½ million—to local communities for new factory buildings; 26,000 new jobs have been created with a $100 million annual payroll. Now it is time for Federal aid.

The Federal Depressed Area bill will supply facilities and factory shell buildings. It will also contain a very strong antipirating section, which will prevent industries from being moved from one part of the country to another.

My principal concern is: Where will we get the industries and the jobs to put our unemployed back to work, even though S. 1 makes facilities and factory buildings possible?

The administration has just announced a $2 billion increase in defense spending, primarily for missiles. The administration has said that the Nation's depressed areas are one of its major problems.

Here is an opportunity for the administration to kill two birds with one stone by placing a major part of the $2 billion additional defense spending in the depressed areas. Industry and jobs will be supplied to put most of the unemployed back to work. The results will be phenomenal.

DEPRESSED AREA BILL

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Indiana [Mr. HARVEY] may extend his remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. HARVEY of Indiana. Mr. Speaker, in recent months there has been increased attention focused on our unemployment situation. While I am not unaware of the unemployment figures, I am prompted to question the administration's approach to the solution of this problem. Federal aid to depressed areas, if adopted, would only be a forerunner of a tremendous expansion in Federal expenditures for future generations of taxpayers. Enactment of this proposal would create a "pie in the sky" atmosphere for the people of many of our communities now suffering from underdevelopment or adverse unemployment. The false security promised by passage of this proposal would only add to the feelings of frustration which exist among the 5 million unemployed. We must not destroy their faith in what the future holds for them, no matter how much emphasis the politicians have placed on passage of this proposal. Legislation of this type is destined to place the Federal Government in a position of discriminating between certain areas, by using tax resources from one area to promote economic growth in another. Legislation of this type cannot solve a community's unfavorable labor climate, which is one of the determining factors in redevelopment. Federal aid to depressed areas will not be able to determine the nearness of a market for a certain product nor will building a factory necessarily create a market. It is my feeling that the Federal Government should be more concerned with removing itself from the problems of business rather than interceding in an already complex dilemma.

CALLING FOR REPEAL OF DISCLAIMER AFFIDAVIT REQUIREMENT IN NATIONAL DEFENSE EDUCATION ACT

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. LINDSAY. Mr. Speaker, I have reintroduced in the House of Representatives a bill calling for the repeal of the disclaimer affidavit requirement in the National Defense Education Act. I pressed for this amendment in the 86th Congress and I regret it did not pass. The disclaimer affidavit is offensive. I rebel against this kind of requirement. It is a form of test oath which does

violence to the principles for which our forefathers fought. This so-called safeguard alienates the good will of our loyal citizens without gaining any corresponding advantage in protecting the public against the actions or intentions of the disloyal. In short, it is not only offensive—it does not work.

Under existing law a student applying for a Federal education loan is required to submit with his application a sworn affidavit attesting that he does not believe in violent overturn of the Government. An oath of allegiance to the United States is also required. The controversy is not so much with respect to the oath of allegiance, but with the negative disclaimer affidavit. The affidavit can hardly be understood by young people who are asked to sign it and it represents a lack of confidence in our youth as well as in the educational process itself.

Mr. Speaker, at the end of last year over 70 universities had either refused to participate in the defense education program or had registered protests because of the disclaimer provision. Their protests are justified. The act should be amended to repeal the requirement.

PROPOSED NATIONAL BOXING COMMISSIONER WITHIN DEPARTMENT OF JUSTICE

Mr. RYAN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. RYAN. Mr. Speaker, I have introduced a companion bill to one introduced today in the Senate by Senator KEFAUVER, chairman of the Senate Antitrust and Monopoly Subcommittee. This bill would establish within the Department of Justice a National Boxing Commissioner empowered to license professional boxers, managers, promoters, and matchmakers engaged in interstate commerce.

Evidence adduced before the Senate subcommittee established that this once glorious sport has been infiltrated by racketeers and underworld elements. If professional boxing is to be salvaged—and I believe it can be—and, if young athletes are going to be protected from corrupting influences—and they must be—then the Federal Government should regulate the interstate aspects of the sport. Undercover managers and behind-the-scenes promoters must be eliminated.

The bill sponsored by Senator KEFAUVER and myself provides criminal penalties for violations and for thorough supervision of professional boxing. This will assist the States in their frustrated efforts to control the situation.

Governor Brown, of California, has pointed out the inability of his State to control the situation and has expressed his hope that Congress will enact this legislation.

I commend this legislation to my colleagues and hope that they will support this effort to root out underworld influence.

CRISIS IN LAOS

The SPEAKER. Under previous order of the House, the gentleman from Massachusetts [Mr. CONTE] is recognized for 15 minutes.

Mr. CONTE. Mr. Speaker, I rise today to address my thoughts to the crisis in Laos and President Kennedy's reaction to this latest Russian threat to the security of the entire peace-loving world. The Russians have designated tiny Laos, a nation in which they have everything to gain and practically nothing to lose, as the testing ground for the character of the new administration's foreign policy, hoping to reveal American determination to their tyrannical ambitions less determined than it was under President Eisenhower. It is reassuring to me that the President has repulsed this latest brazen Communist effort to disrupt the balance of international relations and to insult the integrity of the free world. He has done so with the same conviction and effectiveness which characterized the Eisenhower foreign policy.

President Kennedy's statement last week unequivocally informed Russia and the Communist world of the position which we, as spokesmen for the free peoples of the world, intend to maintain in Laos and southeast Asia, and all Americans, regardless of party, should endorse this commitment to freedom.

The prolonged series of Russian-inspired Communist encroachments in southeast Asia and these latest acts of intervention in the Lao crisis have forced our hand in the situation and have dictated our action. I know that our action in Laos and assistance to the Royal Lao Government has always been designed, and Russia willing, it will remain designed entirely and exclusively at achieving and insuring a genuine Lao neutrality.

Our foreign policy throughout the entire world is premised upon the principle of self-determination for all the free and independent nations. Any military support or action in any of these nations will only be undertaken if the internal security or governmental integrity of these nations is imperiled by exterior forces inspired or supported by Communist factions.

Unlike Africa or Cuba, but like Formosa, in Laos, the United States has a clear unquestionable commitment to assist in time of trial. The Southeast Asian Defense Agreement of 1954 establishing the SEATO clearly enunciates our legalistic position in support based on our support of any SEATO nations whose territory or integrity is threatened or affected by any situation which might endanger the peace of the area. There is no question that natural geography and realistic diplomacy have acted hand-in-hand to involve the United States in the defense of this tiny and seemingly insignificant country.

We have acted, firmly and without equivocation, to halt the Communist advance in Laos. We have, after repeatedly ignored attempts to talk softly with conviction, brandished the "big stick" which we have carried throughout southeast Asia these past 6 years. Bluff has given way to bargain, and the language of bargain necessarily must be accented with force. Perhaps, and I pray it must, negotiation will secure an equitable and expeditious cessation of the Lao hostilities considerably short of the dreaded open conflict between East and West which so prominently thwarts and threatens world hopes for tranquility. There is no doubt that the Soviets are guilty of unwarranted and unprincipled intervention in Laos, their guilt for which is attested to by their willingness to consider negotiation, thereby acknowledging their guilt as interlopers. Using North Vietnam as a staging base and North Vietnamese technical advisers supplied with airlifted Russian goods and ammunition, the Pathet Lao have consolidated the northern provinces and, as we all know, are daily driving to divide the country in two.

However, in our haste to prevent all-out conflict, let us not think that mere negotiation is a panacea. We should be certain not to lose sight of our true objective in Laos—neutrality and the guarantee that Lao and not outsiders will govern the kingdom as Lao themselves so determine. We must remember that Russia has little to lose from a negotiated truce in Laos and everything to gain. If we must negotiate for neutrality, and Russian actions leave us little choice in the matter, we should be ever wary that our desire to secure tranquility may betray our determination and mislead us to accept acquiescence to another Russian land grab, and a mere recognition of Communist acquisition of all northern Laos in return for an immediate and transitory agreement to cease fire. We must strive mightily for our ultimate goal in Laos—self-determination—while shunning political-diplomatic pragmatism and the acceptance of a settlement based on neutrality which is, in fact, confirmation of Communist control of northern Laos and an invitation to further encroachment in southeast Asia.

Mr. Speaker, I am sure that all the Members of this great body share my concern for the cause of freedom and democracy in Asia generally and in Laos specifically. During my trip to that area in 1959 with the Appropriations Committee, I detected a strong and ominous undercurrent of potential turmoil destined to continually erupt into conflict whenever the ideologies of East and West were to meet on diplomatic battlefields. My concern for the maintenance of the principles of self-determination and democracy is accentuated by these latest acts of Communist sociological and political aggression in an area desirous yet not fully capable of repelling such overt subversion of the Lao autonomy. Mr. Speaker, scholars acknowledge that in southeast Asia, there is, in recent years, a gradual and more open acceptance of authoritarian practices with fewer misgivings as to their benevolence. This is obviously a pragmatic and seem-

ingly unavoidable response to the recent and multiple crises which have exacted extreme courage on the part of the freedom loving peoples of the southeastern hinterlands.

Mr. Speaker, my travels and experiences in Laos and the southeastern Asiatic countries leads me to prudent and pessimistic observation about these forms of government. Based as they are on the western concept of political parties, it appears to me that they are not likely to be established or reestablished with any great degree of security without outside assistance, unless the present authoritarian regimes succeed in consolidating and stabilizing their respective countries. Without our continued assistance and conviction to our commitments, these nations, in the wake of the inevitable chaos and despair, will fall easy prey to Communist mastery and subjugation.

These nations need time and assistance to prepare themselves for contemporary democracy and even unencumbered by intervention from without have a herculean task set before them in their efforts to take their places amongst the mighty nations of the 20th century. It is our task to assist them in this goal, being ready at all times to take issue with those who would foist their own society upon these struggling nations always being certain to make known our own intent that the primary purpose of all assistance to Laos and the nations of southeast Asia is designed to afford these young nations ample time to find their way in this complex and unfamiliar world where even nations of maturity find it difficult to preserve the balance of democracy and to live harmoniously in a shrinking world side by side. We are in a unique position among the great powers in that we are associated in the minds of southeast Asia with the dual achievement of a position toward which they so dearly aspire, but do not know how to secure, a society with freedom.

THE FEED GRAIN PROGRAM

The SPEAKER. Under the previous order of the House the gentleman from Iowa [Mr. SCHWENGEL] is recognized for 10 minutes.

Mr. SCHWENGEL. Mr. Speaker, when the feed grains bill was before this body, I voted against it, principally because I felt that it is unwise to put the power to control prices in the hands of the Secretary of Agriculture. This program has been signed into law and the Department of Agriculture is rushing pell mell to get it into operation.

There are many of us who feel that this is no voluntary program, or if it is voluntary, it is so in name only. When the Secretary of Agriculture holds a club over the farmer's head on the prices he can get, there is compulsion of the direst sort. I say the program is compulsory.

My reservations about this bill and what it can do to the farm economy are borne out by an item I noted in the Wall Street Journal for today, Wednesday, March 29.

The article comments on the weakness of cash corn on the Chicago market. This is due, the article says, to the stepped-up selling of corn from Federal bins and the threat of further Government selling.

This article goes on to say that Willard W. Cochrane, economic adviser to Secretary Freeman, intimates that the Government plans to sell corn most of this year to keep the price of corn about $1 per bushel on the farm.

Anyone with any commonsense can see what this will do. One dollar corn will bring about an increase in the feeding of livestock and poultry and these prices will go down, too.

They tell us that this program was designed to give the farmer better prices and raise his income. It will never do it this way. We may have compliance with the program because the Secretary can force farmers into it, but the cheap grain will put more emphasis upon the feeding of livestock and poultry so those prices will go down as the market is flooded.

And how about the farmer who has some 1960 corn on his farm which he wants to sell? Until the Government started dumping CCC stocks on the market, he could expect a reasonable price for it. These prices are being driven down and these farmers will now be forced to put this corn under loan in order to protect themselves. This does not give them much volition about the course they should take, does it? They take another beating on farm prices. They are given another squeeze.

The district I represent is one of the most productive hog raising sections in the world. For the past 18 months, we have had relatively stable hog prices. The market has been pretty good. But what will happen 12 months from now?

The Department is going to try to keep the market price of corn around $1. More hogs will be raised; more poultry will be raised, and what will happen to livestock and poultry prices? There's only one way they can go under a situation of this kind. They will be lower and the income of the farmers in the Midwest will suffer some more.

It was the will of Congress to put this club in Secretary Freeman's hands. Present indications are that he will delight in using it to make his program look good and to try to pin the blame for any failure on past programs. What happens to farm income appears to be secondary.

It is my hope that the Secretary and his advisers will take a hard look at this feed grains program and operate in the interest of the farmer whose income they are pledged to raise. The way it looks now, we will spend a lot more of the taxpayer's money and the farmer will not be any better off.

ELECTIONS DETERMINED BY FRAUDULENT VOTING

The SPEAKER. Under the previous order of the House the gentleman from Michigan [Mr. HOFFMAN] is recognized for 15 minutes.

Mr. HOFFMAN of Michigan. Mr. Speaker, I ask unanimous consent to revise and extend my remarks, and include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HOFFMAN of Michigan. Mr. Speaker, in the CONGRESSIONAL RECORD—March 21, pages 4439–4440—attention was called to fraudulent voting in our national elections to which the Chicago Tribune—ever on the alert—has given consideration.

There you will find a story by Chesly Manly which gives some of the facts. Other facts—and Manly is a painstaking, accurate reporter—are disclosed in the Tribune of March 20 and 21, and they read as follows:

Because of the recount suit of Benjamin S. Adamowski, former State's attorney, contesting the election to that office last November 8 of Daniel P. Ward, the chief justice of criminal court appointed a special investigator to investigate complaints of vote frauds in Cook County.

Informed sources say this investigation is proceeding quietly but diligently and may produce surprises for the Democrats.

The chief justice admonished the special investigator, Attorney Morris Wexler, that merely because there is a body found, of necessity a murder has not been committed. Logically, of course, the judge is right, but during the Capone gang era when hundreds of bullet-riddled bodies were found in Chicago there was a strong presumption that death was not caused by suicide or heart disease.

THOUSANDS OF MISTAKES

Similarly when many thousands of mistakes are made in counting paper ballots and false totals are reported from voting machine precincts, invariably to the advantage of the Democrats, there is a strong presumption of intent to accomplish that result.

The only way to determine whether totals recorded on voting machines are accurate is to compare them with the number of applications for permission to vote. Poll watchers were not permitted to count ballot applications and boxes containing some of them were later reported lost.

There is an impression in some quarters that voting machines prevent fraud. Three University of Chicago professors, in their manifesto of February 8, declared that "a recheck of the voting machines in Chicago resulted in a net gain of 312 votes for Nixon out of a total of 1,780,000 votes cast—an amazingly accurate reporting of the vote."

CHECKED BY DEMOCRATS

In the first place the recheck was made by Democratic election officials and further investigations of the voting machine totals are in progress. More significant is the fact that voting machine totals can be inflated with the greatest of ease, as was proved in a first ward election fraud case arising from the December 31, 1957, special congressional election in which ROLAND V. LIBONATI defeated his Republican opponent by 32,105 to 4,341 votes.

In a contempt case before County Judge (now Governor) Otto Kerner, Mrs. Mary Evans, 1827 Roosevelt Road, one of the judges in the 1st ward's 44th precinct polling place, testified that Morris (Red) Glickman, the Democratic precinct captain, came in with four strangers from the election board. She said Glickman repeatedly opened the voting machine booth and permitted the four strangers to vote.

Albert Epstein, the Republican precinct captain, was present during the fraudulent voting and said nothing. Applications for ballots were torn from the pad by Glickman, carried away, and returned later, with names

written on them. Mrs. Evans said she believed there were enough applications to correspond with the voting machine totals—455 for LIBONATI and 13 for the Republican candidate—but learned later that only 32 were found when the sealed file was opened by election board officials.

TELL OF FORGERIES

Handwriting experts testified that signatures on 17 of the 32 applications were found to be forged, 9 of them by Mrs. Nellie M. Wheat, 1912 Washburne Avenue, one of the judges. Asked how many persons actually voted, Mrs. Evans testified: "Very few. Maybe between 25 and 30."

Mrs. Evans pleaded guilty and Judge Kerner convicted four precinct officials. Judge Kerner charged that Glickman, a vote fraud artist with a previous conviction, "engineered the entire fraud" in the 44th precinct. Glickman was arrested in February 1958, convicted [with three others] in April 1959, sentenced to a year in jail and fined $2,000, but in November 1960, the Illinois appellate court granted a new trial.

In 1952, when it was discovered that Glickman had city and State jobs simultaneously, he lost both of them. Later he was fired as personal bailiff to Municipal Judge Joseph H. McGarry when the Tribune disclosed his first election fraud conviction.

TWO ARE INDICTED

On December 29 the Federal grand jury indicted two park district employees on charges of bribery and conspiracy in the November 8 election. Bernard J. Crown, Jr., 3741 Sunnyside Avenue, Democratic captain of the 18th precinct of the 29th ward, and Leonard Gibbs, Jr., 716 South Indianapolis Avenue, a Democratic Party worker in the same precinct, are accused of paying $2 each to three persons, and $1 each to two persons, and promising money or other bribes to others for their votes.

U.S. Attorney Robert Tieken said these were the first Federal indictments, but would not be the last, though further action will depend upon the attitude of Tieken's successor and the Justice Department, now headed by President Kennedy's brother, Robert.

The three University of Chicago professors noted with satisfaction that not a single indictment was returned by the January Federal grand jury, but Albert F. Manion, first assistant U.S. attorney, denied that the Federal investigation had been dropped. It was suspended, he said, to prevent interference with Adamowski's recount suit.

Federal law on election frauds is much more restrictive than State law. Except in cases of bribery, it is necessary to prove that voters have been deprived of their civil rights through fraudulent practices. In the last 10 years only two Federal cases have been successfully prosecuted in Chicago.

Five persons were convicted in 1955. One pleaded guilty and 3 were acquitted of charges that they permitted 71 fraudulent votes to be cast in the 7th precinct of the 1st ward in the 1954 election.

DEMOCRAT GETS 5 YEARS

Lewis W. Nathan, Democratic captain of the precinct and proprietor of the notorious 606 Club at 606 S. Wabash Avenue, was sentenced to 5 years in prison and fined $4,000. Gaetano Alviti, manager of the dive and one of the polling place officials, was sentenced to 4 years in prison and fined $2,500.

On September 12, 1958, 6 persons pleaded nolo contendere [no defense] in Federal court and were fined or put on probation for fraud in the 23d precinct of the 11th ward in the 1954 election.

This is Mayor Daley's ward and the polling place of the 23d precinct is at 3718 Wallace Street, 2 blocks from the mayor's house. The Government prosecutor declared that about 75 forged ballot applications and some forged registration cards were found.

DEMOCRAT CAPTAIN FREED

Joseph C. Kennefick Jr., 3817 Lowe Avenue, the Democratic precinct captain, was indicted in the 11th ward case, but the charges against him were dismissed. John E. O'Hara, 4151 Halsted Street, a Democratic precinct worker; Mrs. Mary A. Johnston, 3751 Lowe Avenue, a Democratic election judge; Mrs. Anna Macis, 3841 Lowe Avenue, a Republican election judge; Charles F. Kelly, 3707 Lowe Avenue, a Democratic clerk; Mrs. Anne V. Miller, 3812 Lowe Avenue, a Republican clerk, and Mrs. Anna Runavich, 3833 Lowe Avenue, a Republican judge, all were found guilty on pleas of nolo contendere.

O'Hara and Mrs. Johnston got suspended sentences of a year and a day each, put on probation for 5 years, and fined $600 and $500, respectively, by Federal Judge Joseph Sam Perry. The others got probation.

The 11th ward case was a typical example of Republican collusion in Democratic fraud.

"The fact is," remarked U.S. Attorney Robert Tieken, "that hundreds of election officials who voted Democratic in a previous election have turned up as Republican judges in the next election."

MANY COMPLAINTS MADE

Complaints to Federal and State officials, submitted after the November 8 election by the Committee for Honest Elections, the Joint Civic Committee, the Minute Men, and the Midwest Volunteers for Nixon and Lodge, involve all the practices disclosed in court cases growing out of previous elections and others, too.

Ghost voting, in the name of registrants who no longer live in a precinct or never did live there, is the most common practice and the theft of 25,000 to 50,000 votes by this method is not unusual in a Chicago election.

Besides padding the registration lists with the names of ghosts, vote thieves also eliminate the names of qualified voters, who receive no challenge notice and are surprised when told on election day that they cannot vote.

"TEN THOUSAND VOTES LOST"

Mrs. Marie L. Suthers, lone Republican member of Chicago's board of election commissioners, estimated that 10,000 qualified voters were disfranchised without challenge notices before the November 8 election.

Chain voting is another common abuse. When floaters and bums are given a dollar or a pint of wine for their vote, precinct workers take no chance on their voting right. Before going in to vote they are given a marked ballot, which they drop in the box and then come out with an unmarked ballot to be prepared for the next bum. William H. Fetridge, chairman of the Nixon-Lodge Volunteers, estimated that "25,000 persons in the skid row area voted that way in exchange for whisky and money."

Still another variety of theft is ballot box stuffing or alteration of the ballots after the polls are closed. The law provides that ballot boxes in paper ballot precincts must be sealed with wax and tied with rope. On more than 60 percent of the 863 boxes from Chicago's paper ballot precincts there was no rope or the seal was broken when they were brought in for the recount.

"WORST IN 25 YEARS"

Frank Durham, chairman of the Committee for Honest Elections, asserted that fraud in the November 8 election was the worst he had seen in 25 years of poll watching.

Immediately after the election, the Republicans demanded a recount and presented evidence of fraud in 92 precincts. The election board, controlled by the Daley machine, agreed to a hearing, but summoned all 460 judges from the 92 precincts to appear in the same room at the same time.

In spite of this planned chaos, Mrs. Suthers found that 84 votes were cast [78 for Kennedy, 3 for Nixon] in the 50th precinct of the 2d ward, where only 22 voters lived on election day.

LAW IS EXPLICIT

Though most of the voters had been displaced by a slum clearance project, the law is explicit that voters must live in the precinct where they vote.

When the Republicans paid for a "discovery" canvass of the paper ballots in 863 precincts—a necessary prerequisite to a recount suit—the election board ruled that only its members could count ballots, not its employees or others under its supervision. Under this procedure it would have required 2 years to complete the recount, but public indignation, aroused by the press, was so great that Thaddeus Adesko, the new county judge, overruled the election board and the recheck was expedited.

When Benjamin S. Adamowski, narrowly defeated for reelection as State's attorney, filed his suit asking a recount in all 906 paper ballot precincts in the county, a recheck of returns from about 1,000 voting machine precincts, and the elimination of all votes cast by unqualified voters, the Democrats prepared an excuse. Sidney Holzman, chairman of the election board, conceded in a Lions Club talk on February 14 that "many errors" were made.

"I don't say that we were without sin," Holzman declared, "No doubt there were some violations of the law. No doubt there were errors and evil. But if there were, they were condoned by representatives of both parties."

POLIO VACCINES

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. FARBSTEIN] is recognized for 15 minutes.

Mr. FARBSTEIN. Mr. Speaker, there is a great deal of discussion these days on the question of polio vaccines. A subcommittee headed by the gentleman from Alabama, Representative KENNETH A. ROBERTS, is looking into the question of why the oral vaccine developed by Dr. Albert S. Sabin will not be available to fight polio this year.

In connection with this, I would like to bring to your attention an article in the April issue of Redbook magazine entitled "What's Delaying the New Polio Vaccine." It has a subtitle of "And What Should You Do To Protect Your Family This Year."

I believe the authors, Ruth and Edward Brecher, two distinguished reporters, have done a commendable factfinding job.

In essence, this Redbook article found that the Division of Biologics Standards of the U.S. Public Health Service deliberately imposed strict licensing requirements.

If the DBS erred, the article said, "It erred in the direction of greater safety for the millions of people who will take the new vaccine." The agency did not want to risk a recurrence of what happened in 1955 when it licensed the Salk vaccine in a hurry and several bad batches managed to slip through, resulting in 61 children coming down with paralytic polio, including several deaths.

Redbook said that under the "strict" regulations for manufacturing the Sabin vaccine, it probably will not become available for general use until late 1961

or 1962—too late for fighting polio this year. But as a result, "We can be confident that when the first oral vaccine is finally licensed, it will be as safe as scientific precautions can possibly make it."

"Meanwhile, polio will be with us again this summer and fall. The best way for you and your family to get protection this year is by completing your series of four Salk shots now."

[From Redbook, April 1961]

WHAT'S DELAYING THE NEW POLIO VACCINE?—AND WHAT SHOULD YOU DO TO PROTECT YOUR FAMILY THIS YEAR?

(By Ruth and Edward Brecher)

In Cincinnati last spring 180,000 children swallowed a few drops apiece of the new Sabin "oral" polio vaccine. Throughout the rest of the year only one case of paralytic polio was reported in the city. That one case occurred in an unvaccinated man who had recently returned to Cincinnati from New York City and was probably infected before his return. In Hungary, too, according to Dr. Albert S. Sabin, of the University of Cincinnati College of Medicine, who developed the Sabin vaccine, not a single case of paralytic polio was reported throughout that country during the July-August-September 1960 polio season following a nationwide oral-vaccine campaign. Similar dramatic results have been reported with two other new oral polio vaccines—one developed by Dr. Hilary Koprowski, of the Wistar Institute in Philadelphia, and the other by Dr. Herald Cox, of Lederle Laboratories. Yet none of these vaccines is available now for general use in the United States—nor will they be available in time to prevent paralysis during the coming polio season. Why the delay? Equally important, what should young adults do right now, while waiting for an oral vaccine, to protect themselves and their children from paralytic polio this year? When Redbook sent us to find out we encountered several ugly accusations. The Russian newspaper Izvestia, for example, alleges that American vaccine manufacturers are delaying the new oral vaccines because they are making so much money on the Salk polio vaccine. Dr. Koprowski charges that his vaccine is being discriminated against. Dr. Sabin insists that polio could have been wiped out in the United States altogether this year if the U.S. Government, the National Foundation (March of Dimes), and vaccine manufacturers had pushed ahead at top speed with his vaccine last winter. In contrast to such accusations, here are the blunt facts as we have rounded them up from both official and well-informed unofficial sources. Here too is a sober, scientific evaluation of how the new oral polio vaccines are likely to affect you and your family. The familiar Salk vaccine is composed of polio viruses which have been killed by formaldehyde. It is one of the safest and most effective vaccines ever produced against any disease. It erects a barrier of antibodies in your bloodstream so that even though polio viruses subsequently enter your intestinal tract and multiply there, they cannot get past the antibody barrier to reach your nervous system and cause paralysis.

The new oral vaccines contain living viruses which have been weakened or tamed. These tamed viruses infect your intestinal tract after you swallow them and multiply there, creating an immunity not only to paralytic polio but also to further intestinal infections caused by polio viruses. If enough people achieve this intestinal type of immunity, it is expected polio viruses will no longer be passed back and forth from person to person within a vaccinated community. The disease may thus be eradicated altogether.

Who is responsible for holding back the new live vaccines?

First, strike off the National Foundation from the list of suspected culprits. It has been continuously supporting Dr. Sabin's oral vaccine research since 1953 with more than $1 million in March of Dimes grants; and it has been financing research on the Sabin vaccine in other laboratories as well. This support is continuing.

Next, don't blame the vaccine manufacturers. At least four companies are planning to manufacture the Sabin vaccine, and because of the competitive advantage of being first on the market, all of them have an incentive to move quickly. Two of the four are currently manufacturing the Salk vaccine, and may therefore have some slight incentive to go slow. But the other two companies have no Salk vaccine to sell. The company likely to be first with the Sabin vaccine (Lederle Laboratories) reports that it has already spent $11 million on oral vaccine research and an additional $2 million for a new oral vaccine plant and equipment. Since this investment will not begin to pay off until the Sabin vaccine is actually marketed, Lederle obviously will lose rather than profit by delay.

This leaves the U.S. Government at the head of the suspect list.

The Government agency responsible for deciding whether or not to license any new vaccine is the Division of Biologics Standards (DBS) of the National Institutes of Health, a unit of the U.S. Public Health Service. If a vaccine proves unsafe after licensing, the DBS gets the blame—and rightly so. It is your sentinel, posted by law to safeguard you and your children from unsafe vaccines and from overinflated vaccine claims.

The DBS has learned the hard way how important it is to be extra cautious. Back in 1955 it licensed the Salk vaccine in a hurry, at the urging of the National Foundation and others; polio was then on the rampage and no other preventive was available. The results were in general excellent, with many thousands of men, women and children saved from crippling or death. But a price was paid for haste; several bad batches of vaccine managed to slip through an unnoticed loophole in the DBS regulations governing safety. As a result, 61 children who received vaccine from those batches came down with paralytic polio; others caught polio from them; several died.

The DBS regulations were immediately tightened up, and the Salk vaccine has been completely safe ever since. But DBS officials resolved to avoid a similar situation with oral polio vaccine if it was humanly possible.

Live-virus vaccines by their very nature require special safety precautions. If the Salk killed-virus vaccine were to be accidentally contaminated by some other viruses during manufacture, the formaldehyde which kills the tough polio viruses would no doubt kill the other viruses as well. A live-virus vaccine has no such built-in safeguard. Contaminating viruses may travel with the tame polio viruses into your body and produce disease. Such an incident actually occurred during World War II; serum hepatitis viruses got into a yellow fever vaccine and thousands of cases of serious, sometimes fatal, hepatitis followed among American soldiers and others all over the world.

Against this background of possible hazards, and knowing that an effective polio vaccine (the Salk vaccine) was already available throughout the United States, DBS officials and scientific advisers decided to proceed with what Dr. Roderick Murray, head of DBS, describes as "all deliberate speed." This policy turned out to be warranted. During field trials of the Cox and Sabin oral polio vaccines in 1960, something happened which emphasized again the need for caution—and which, in fact, resulted in putting the Cox vaccine out of the running.

In Dade County (Miami), Fla., 412,000 men, women, and children swallowed the Cox oral vaccine last spring. The vaccine proved effective, on the whole, but three young men, a young woman, and a 2-year-old child came down with paralytic polio within 9 to 14 days after swallowing it; this is the length of time it takes polio viruses to produce illness. In West Berlin also a number of cases of paralysis were reported among 300,000 residents who took the Cox vaccine.

There is no proof that these cases were caused by the Cox vaccine. Some of them, or conceivably all of them, may have been due to polio viruses already present. But enough doubt was raised to eliminate the Cox vaccine as a candidate for immediate licensing.

No such doubts have been raised about the Sabin vaccine. Large-scale field trials have now been run in Cincinnati, Ohio, and Rochester, N.Y., and smaller trials in New York City, New Haven, Cleveland, Nashville, Houston, and New Orleans. The results have been excellent. The Polio Surveillance Unit of the U.S. Public Health Service reports not a single case of paralytic polio traceable to the vaccine. In other countries too the Sabin vaccine has been used on a large scale with success; Dr. Sabin estimates that by the end of 1960, 77 million people had taken his vaccine in the U.S.S.R. and an additional 23 million elsewhere.

Convinced by this vast and rapidly accumulating body of evidence, the DBS has now announced regulations under which companies planning to manufacture the Sabin vaccine will be licensed. These licensing requirements are very strict. Each batch of vaccine, for example, must be tested separately in living rabbits, guinea pigs, adult mice, baby mice and human kidney cells grown in test tubes. Samples of each batch must also be injected directly into the muscles, spinal cords and brains of a number of monkeys. No manufacturer will be permitted to sell his first batch until he has proved by tests on five successive batches that he is able to turn out a safe vaccine consistently.

Since meeting all these requirements will take time, the Sabin vaccine probably will not become available for general use until late 1961 or early 1962. As a result, we can be confident that when the first oral vaccine is finally licensed, it will be as safe as scientific precautions can possibly make it.

Dr. Sabin is not happy with the time schedule. He believes that the safety of his vaccine was proved more than a year ago and that it should have been licensed for general use last winter.

Dr. Koprowski is not happy either. He believes that his vaccine is as safe and effective as Dr. Sabin's and should be eligible for licensing along with it. He challenges the evidence which caused the DBS to conclude that the Sabin vaccine is safer than his.

Perhaps the DBS did err in one or both of these respects. If so, it erred in the direction of greater safety for the millions of people who will take the new vaccine.

How much good will the Sabin vaccine accomplish for you and your family when it does become available? Here are the answers given Redbook by Public Health officials who have no personal stake in either the Salk or the oral vaccines:

CERTAINTY OF PROTECTION

When Dr. Salk manufactured his own vaccine in his own laboratory, it successfully immunized an overwhelming majority of the people who received it. Later, when placed in large-scale commercial production, it was somewhat less effective. Dr. Sabin's vaccine is at present almost 100 percent effective in his own hands, and the

experience to date suggests that it will prove to be highly effective protection when it is being commercially produced and distributed.

DURABILITY OF PROTECTION

A few years ago, widespread publicity claims were made that an oral vaccine would provide lifelong protection without a booster, instead of the merely temporary protection which the Salk vaccine was supposed to provide. As a matter of fact, the protection provided by the Salk vaccine—to the surprise of almost everybody except Dr. Jonas Salk himself—is proving remarkably durable. Children vaccinated during the 1954 National Foundation field trials, for example, still show a very low polio rate after 6 years. But no one can foretell whether this protection will continue through the years or will begin to taper off. Nor is there any way of telling now for how many years the Sabin vaccine's protection will last.

SPREAD OF PROTECTION

It used to be claimed that the "tamed" viruses in the oral vaccines would spread rapidly from vaccinated individuals to others. Thus by vaccinating part of a community you might immunize the rest willy-nilly. This claim has proved to be exaggerated. The tamed viruses often spread from a child to his brothers and sisters; they may even spread to his parents, friends, and neighbors. But you can't rely on this spread, and there is no practical way of knowing whether or not one child or adult has caught immunity from another. Even limited spread, however, is a point in favor of the Sabin vaccine.

ONE-DOSE PROTECTION

It used to be said that you would be able to swallow just one dose of an oral vaccine and forget all about polio forever. This claim is still occasionally made. But the Sabin vaccine is generally given in three separate doses spaced 4 to 6 weeks apart, and a fourth dose may prove advisable. One-dose protection is a possibility but not yet a reality.

Will an oral vaccine replace the Salk vaccine, or merely take its place as an alternative polio preventive? It is too early to tell. Some experts point out that the Salk vaccine can be combined with diphtheria, tetanus, and whooping cough vaccines in a single series of shots; when this is done, recent research indicates, both the Salk vaccine and the diphtheria vaccine produce a higher level of immunity than either does when given alone. It is quite possible, accordingly, that many physicians will continue to use the polio-diphtheria-tetanus-whooping cough combination shots for infants and young children even after the Sabin vaccine is on the market.

Despite the availability and high effectiveness of Salk vaccine, millions of people have failed to get their shots—because of the discomfort or the bother or simply because they do not fully appreciate the importance of protecting themselves and their children. For this reason severe polio epidemics continue to occur among the unvaccinated, as they did during 1960 in Providence, in Baltimore, and in perhaps a dozen other American communities.

Public Health officials hope that even before the Sabin oral vaccine is available, many of the unvaccinated will respond to the anti-polio campaign and get their Salk injections. But because oral vaccine is so painless to take and easy to administer to large groups of people, they expect it to reach many millions who have not had their Salk shots. The Sabin vaccine provides protection more promptly than the Salk vaccine—fast enough so that it can be given to an entire community whenever one case occurs. By preventing intestinal polio infections, it will slow the spread of the polio virus from person to person and may thus stamp out polio altogether—as smallpox has been stamped out—within a reasonable period of time.

Meanwhile, polio will be with us again this summer and fall. The best way for you and your family to get protection this year is by completing your series of four Salk shots now.

What about next year? The two vaccines are completely compatible. After completing your Salk shots this year you can take the Sabin vaccine by mouth next year. The Salk shots will protect you from paralytic polio; the Sabin oral vaccine may raise the level of that protection and will, in addition, prevent you from being a polio "carrier" capable of infecting others.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted as follows to Mr. VINSON for March 29 and 30 on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. CONTE (at the request of Mr. LINDSAY), for 15 minutes today.

Mr. SCHWENGEL (at the request of Mr. LINDSAY), for 10 minutes today.

Mr. HOFFMAN of Michigan for 15 minutes today and to revise and extend his remarks and include newspaper articles.

Mr. HARDING (at the request of Mr. HAGEN of California) for 10 minutes on tomorrow, March 30, 1961.

Mr. FARBSTEIN (at the request of Mr. HAGEN of California) for 15 minutes today, to revise and extend his remarks and include therein extraneous matter.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. MULTER (at the request of Mr. HAGEN of California) to revise and extend the remarks he made in his special order today and include extraneous matter.

Mr. MCCORMACK (at the request of Mr. HAGEN of California) and to include extraneous matter and tables.

Mr. DOYLE.

(The following Members (at the request of Mr. LINDSAY) and to include extraneous matter:)

Mr. AVERY.

Mr. PELLY in two instances.

Mr. BECKER.

Mr. BOW.

Mr. PILLION.

(The following Members (at the request of Mr. HAGAN of Georgia) and to include extraneous matter:)

Mr. HÉBERT.

Mr. JOELSON in two instances.

Mr. DENT.

Mr. ANFUSO.

Mr. RIVERS of Alaska in three instances.

Mr. RYAN in three instances.

Mr. DULSKI.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 107. An act to authorize the Secretary of the Interior to construct, operate, and maintain the Navajo Indian irrigation project and the initial stage of the San Juan-Chama project as participating projects of the Colorado River storage project, and for other purposes; to the Committee on Interior and Insular Affairs.

S. 1358. An act to repeal section 12 of the act of June 26, 1884, prohibiting a charge or collection of fees by consular officers for official services to American vessels and seamen, and to repeal the provisions of the act of June 4, 1920, authorizing the free issuance of passports to seamen; to the Committee on Foreign Affairs.

ADJOURNMENT

Mr. HAGAN of Georgia. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 8 o'clock and 26 minutes p.m.), the House adjourned until tomorrow, Thursday, March 30, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

731. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1962 involving an increase in the amount of $23,492,000 for the Department of Commerce (H. Doc. No. 128); to the Committee on Appropriations and ordered to be printed.

732. A communication from the President of the United States, transmitting amendments to the budget for the fiscal year 1962 involving a net increase in the amount of $71,046,000 for various agencies in the executive branch (H. Doc. No. 129); to the Committee on Appropriations and ordered to be printed.

733. A communication from the President of the United States, transmitting a draft of a proposed bill entitled "A bill to assist in the provision of housing for moderate and low income families, to promote orderly urban development, to extend and amend laws relating to housing, urban renewal, and community facilities, and for other purposes"; to the Committee on Banking and Currency.

734. A communication from the President of the United States, relative to the development of the oceanography and resources of the seas; to the Committee on Merchant Marine and Fisheries.

735. A letter from the President of the Board of Commissioners of the District of Columbia, transmitting a draft of a proposed bill entitled "A bill to amend the act entitled 'An act to regulate the height of buildings in the District of Columbia,' approved June 1, 1910, as amended"; to the Committee on the District of Columbia.

736. A letter from the Comptroller General of the United States, transmitting a report on the audit of the unemployment and sickness insurance program of the Railroad Retirement Board for fiscal years 1959–60; to the Committee on Government Operations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. THOMAS: Committee of conference. H.R. 5188. A bill making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes (Rept. No. 211). Ordered to be printed.

Mr. COOLEY: Committee of conference. H.R. 5463. A bill to amend and extend the Sugar Act of 1948, as amended (Rept. No. 212). Ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. MILLS:

H.R. 6027. A bill to improve benefits under the old-age, survivors, and disability insurance program by increasing the minimum benefits and aged widow's benefits and by making additional persons eligible for benefits under the program, and for other purposes; to the Committee on Ways and Means.

By Mr. RAINS:

H.R. 6028. A bill to assist in the provision of housing for moderate and low income families, to promote orderly urban development, to extend and amend laws relating to housing, urban renewal, and community facilities, and for other purposes; to the Committee on Banking and Currency.

By Mr. BROOKS of Louisiana:

H.R. 6029. A bill to authorize appropriations to the National Aeronautics and Space Administration for salaries and expenses, research and development, construction of facilities, and for other purposes; to the Committee on Science and Astronautics.

H.R. 6030. A bill to amend the National Aeronautics and Space Act of 1958, and for other purposes; to the Committee on Science and Astronautics.

By Mr. BROOMFIELD:

H.R. 6031. A bill to amend the Internal Revenue Code of 1954 to provide that a taxpayer may continue taking a personal exemption for a child over the age of 18 if such child is unemployable by reason of disability; to the Committee on Ways and Means.

By Mr. COAD:

H.R. 6032. A bill to amend title V of the Agricultural Act of 1949, as amended, to provide, in connection with the employment of workers from Mexico, protection for the employment opportunities of agricultural workers in the United States, and for other purposes; to the Committee on Agriculture.

By Mr. CUNNINGHAM:

H.R. 6033. A bill to provide that civilian officers and employees of the United States shall not be required to occupy Government quarters unless the head of the agency concerned makes certain determinations; to the Committee on Post Office and Civil Service.

By Mr. CURTIS of Missouri:

H.R. 6034. A bill to establish the Ozark Scenic Riverways in the Clark National Forest in the State of Missouri, and for other purposes; to the Committee on Agriculture.

H.R. 6035. A bill to amend title II of the Vocational Education Act of 1946, relating to practical nurse training, and for other purposes; to the Committee on Education and Labor.

H.R. 6036. A bill relating to the treatment for income tax purposes of certain redemptions of paid-for preferred stocks; to the Committee on Ways and Means.

By Mr. JAMES C. DAVIS:

H.R. 6037. A bill to amend the act of March 3, 1901, relating to divorce, legal separation, and annulment of marriage in the District of Columbia; to the Committee on the District of Columbia.

By Mr. DIGGS:

H.R. 6038. A bill to promote the foreign policy of the United States and help to build essential world conditions of peace, by the more effective use of U.S. agricultural commodities for the relief of human hunger, and for promoting economic and social development in less developed countries; to the Committee on Agriculture.

H.R. 6039. A bill to authorize the establishment of a Youth Conservation Corps to provide healthful outdoor training and employment for young men and to advance the conservation, development, and management of national resources of timber, soil, and range, and for recreational areas; to the Committee on Education and Labor.

H.R. 6040. A bill to authorize a 3-year program of Federal financial assistance for public elementary and secondary schools, to amend Public Law 815 and Public Law 874, 81st Congress, and for other purposes; to the Committee on Education and Labor.

H.R. 6041. A bill to prohibit discrimination in employment because of race, religion, color, national origin, or ancestry; to the Committee on Education and Labor.

H.R. 6042. A bill to authorize a contribution to the government of the Ryukyu Islands for the purpose of providing compensation for use of private property and damage to persons and property arising from acts of the U.S. forces before the entry into force of the Japanese Treaty; to the Committee on Foreign Affairs.

H.R. 6043. A bill to create a National Peace Agency and to prescribe its functions; to the Committee on Foreign Affairs.

H.R. 6044. A bill outlawing the poll tax as a condition for voting in any primary or other election for national officers; to the Committee on House Administration.

H.R. 6045. A bill to declare certain rights of all persons within the jurisdiction of the United States, and for the protection of such persons from lynching, and for other purposes; to the Committee on the Judiciary.

H.R. 6046. A bill to prevent discrimination in any public or semipublic place or by any public or semipublic transportation against members of the Armed Forces because of race, color, or creed; to the Committee on the Judiciary.

H.R. 6047. A bill to effectuate and enforce the constitutional right to the equal protection of the laws, and for other purposes; to the Committee on the Judiciary.

H.R. 6048. A bill to amend and revise the laws relating to immigration, naturalization, nationality, and citizenship, and for other purposes; to the Committee on the Judiciary.

By Mr. FARBSTEIN:

H.R. 6049. A bill to amend title II of the Social Security Act so as to remove the limitation upon the amount of outside income which an individual may earn while receiving benefits under such title; to the Committee on Ways and Means.

By Mr. FINDLEY:

H.R. 6050. A bill to amend Public Law 480, 83d Congress, as amended, to authorize the sale of foreign currencies to American tourists; to the Committee on Agriculture.

By Mr. FOGARTY:

H.R. 6051. A bill to amend the Federal Property and Administrative Services Act of 1949 to permit donations of surplus property to volunteer firefighting organizations, and for other purposes; to the Committee on Government Operations.

By Mr. HALPERN:

H.R. 6052. A bill to amend section 8(b)(4) of the National Labor Relations Act, as amended; to the Committee on Education and Labor.

H.R. 6053. A bill to amend title 38, United States Code, so as to revise the rates of disability and death pension authorized by the Veterans' Pension Act of 1959, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 6054. A bill to amend chapter 15 of title 38, United States Code, to liberalize the basis on which pension is payable by providing that public or private retirement payments shall not be counted as income and that the income of the spouse shall be disregarded in the determination of annual income of a veteran; to eliminate the "net worth" eligibility test; and to repeal the requirement of reduction of pension during hospitalization for veterans with dependents; to the Committee on Veterans' Affairs.

H.R. 6055. A bill to amend the Internal Revenue Code of 1954 to provide that the cost of all medicine and drugs for the taxpayer and his spouse, rather than only the excess over 1 percent of adjusted gross income as otherwise provided, may be included in computing the medical expense deduction where such taxpayer or spouse is 65 or over; to the Committee on Ways and Means.

By Mr. HERLONG:

H.R. 6056. A bill to amend section 4216 of the Internal Revenue Code with respect to the exclusion of certain local advertising charges from sales price for the purpose of computing manufacturers' excise tax; to the Committee on Ways and Means.

H.R. 6057. A bill to eliminate claims of immunity from State and local taxes based on contracts with the United States or its agencies or instrumentalities; to the Committee on Ways and Means.

By Mr. KING of Utah:

H.R. 6058. A bill to amend the Clayton Act, as amended, by requiring prior notification of corporate mergers and acquisitions, and for other purposes; to the Committee on the Judiciary.

H.R. 6059. A bill to amend the Sherman Act to provide additional public relief from repetitive criminal violations of the antitrust laws, and for other purposes; to the Committee on the Judiciary.

By Mr. MATHIAS:

H.R. 6060. A bill to amend the District of Columbia Teachers' Salary Act of 1955, as amended; to the Committee on the District of Columbia.

By Mr. MERROW:

H.R. 6061. A bill to amend the Internal Revenue Code of 1954 to permit a taxpayer to deduct tuition expenses paid by him for the education of himself or any of his dependents at an institution of higher learning; to the Committee on Ways and Means.

By Mr. GEORGE P. MILLER:

H.R. 6062. A bill to amend section 202(c) of the Interstate Commerce Act to provide for partial exemption from the provisions of part II of such act of terminal area motor carrier operations performed by or for common carriers by water in interstate commerce subject to the Shipping Act, 1916, and the Intercoastal Shipping Act, 1933; to the Committee on Interstate and Foreign Commerce.

By Mrs. PFOST:

H.R. 6063. A bill to extend the provisions of the National Wool Act of 1954, as amended, until March 31, 1965; to the Committee on Agriculture.

By Mr. RILEY:

H.R. 6064. A bill to amend the act entitled "An act to recognize the high public service rendered by Maj. Walter Reed and those associated with him in the discovery of the cause and means of transmission of yellow fever," approved February 26, 1929, by providing for payment of the widows of the individuals entitled to benefits thereunder; to the Committee on Armed Services.

By Mr. RYAN:

H.R. 6065. A bill to establish a Department of Urban Affairs and prescribe its functions; to the Committee on Government Operations.

By Mr. STAFFORD:

H.R. 6066. A bill granting the consent and approval of Congress to the northeastern water and related land resources compact; to the Committee on Public Works.

By Mr. TAYLOR:

H.R. 6067. A bill to provide for an appropriation of a sum not to exceed $35,000 with which to make a survey of a proposed national parkway from the Blue Ridge Parkway at Tennessee Ball or Beech Gap Southwest and running into the State of Georgia; to the Committee on Interior and Insular Affairs.

By Mr. TEAGUE of Texas (by request):

H.R. 6068. A bill to provide that the Secretary of Defense shall furnish assistance in connection with the 1962 world aviation championships of the Federation Aeronautique Internationale, and for other purposes; to the Committee on Armed Services.

By Mr. LANGEN:

H.R. 6069. A bill to repeal the excise tax on amounts paid for communication services or facilities; to the Committee on Ways and Means.

By Mr. RYAN:

H.R. 6070. A bill to establish within the Department of Justice the Office of the National Boxing Commissioner for the purpose of curbing monopolistic control of professional boxing; to the Committee on the Judiciary.

By Mr. VAN PELT:

H.R. 6071. A bill to amend section 202(c) of the Interstate Commerce Act to provide for partial exemption from the provisions of part II of such act of terminal area motor carrier operations performed by or for common carriers by water in interstate commerce subject to the Shipping Act, 1916, and the Intercoastal Shipping Act, 1933; to the Committee on Interstate and Foreign Commerce.

By Mr. BOW:

H.R. 6072. A bill to amend chapter 55 of title 10, United States Code, to provide that the charges for continued necessary hospital care for dependents of members of the uniformed services in receipt of such care when the member is discharged shall not increase for the first 60 days of such care; to the Committee on Armed Services.

By Mr. MILLS:

H.R. 6073. A bill to provide certain survivor annuities from the civil service retirement and disability fund; to the Committee on Post Office and Civil Service.

By Mr. PELLY:

H.R. 6074. A bill to provide direct aid to the States for educational purposes only; to the Committee on Education and Labor.

By Mr. DIGGS:

H.J. Res. 350. Joint resolution proposing an amendment to the Constitution of the United States relating to the right of citizens of the United States 18 years of age or older to vote; to the Committee on the Judiciary.

H.J. Res. 351. Joint resolution to amend the pledge of allegiance to the flag of the United States of America; to the Committee on the Judiciary.

By Mr. FRELINGHUYSEN:

H.J. Res. 352. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. MERROW:

H.J. Res. 353. Joint resolution proposing an amendment to the Constitution of the United States relative to equal rights for men and women; to the Committee on the Judiciary.

By Mr. DULSKI:

H.J. Res. 354. Joint resolution designating the first Sunday of October in every year as National Choir Recognition Day; to the Committee on the Judiciary.

By Mr. FASCELL:

H. Con. Res. 209. Concurrent resolution requesting the President to exercise his authority to operate a program, to be known as "University Free Cuba," to provide assistance to certain Cuban refugee students, and for other purposes; to the Committee on Foreign Affairs.

By Mr. RYAN:

H. Con. Res. 210. Concurrent resolution authorizing the printing as a House document of a Spanish edition of "Infant Care"; to the Committee on House Administration.

By Mr. CHELF:

H. Res. 248. Resolution providing for the consideration of H.R. 3725, a bill to provide that the House of Representatives shall be composed of 469 Members, and for other purposes; to the Committee on Rules.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By Mr. KOWALSKI: Memorial of the House of Representatives of the State of Connecticut, memorializing the President and the Congress of the United States relative to flasher memorial, dedicated to the heroes of the U.S. Submarine Force during World War II; to the Committee on Armed Services.

By the SPEAKER: Memorial of the Legislature of the State of Michigan, memorializing the President and the Congress of the United States relative to the repeal of the Federal excise tax on automobiles; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALGER:

H.R. 6075. A bill for the relief of Capt. H. A. Rowe; to the Committee on the Judiciary.

By Mr. FRELINGHUYSEN:

H.R. 6076. A bill for the relief of Anna Maria Geyer; to the Committee on the Judiciary.

By Mr. GUBSER:

H.R. 6077. A bill for the relief of Ed Muegge, Jr.; to the Committee on the Judiciary.

H.R. 6078. A bill for the relief of Tze Vee Huang; to the Committee on the Judiciary.

By Mr. HALPERN:

H.R. 6079. A bill for the relief of Estera Hochman; to the Committee on the Judiciary.

By Mr. KILDAY:

H.R. 6080. A bill for the relief of Eileen L. Broe; to the Committee on the Judiciary.

By Mr. MOORE:

H.R. 6081. A bill for the relief of Carl Gilbert Long; to the Committee on the Judiciary.

By Mr. O'BRIEN of New York:

H.R. 6082. A bill for the relief of Mrs. Vartanus Uzar; to the Committee on the Judiciary.

By Mr. ROSTENKOWSKI:

H.R. 6083. A bill for the relief of Aldo Giuntini; to the Committee on the Judiciary.

By Mr. SIBAL:

H.R. 6084. A bill for the relief of Mrs. Basiliki Koletsos; to the Committee on the Judiciary.

By Mr. WRIGHT:

H.R. 6085. A bill for the relief of Capt. Lorenzo P. Johnson; to the Committee on the Judiciary.

By Mr. BATES:

H. Res. 249. Resolution providing for sending the bill H.R. 6012 and accompanying papers to the Court of Claims; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII,

111. Mr. McCULLOCH presented a petition of Verne O. Woolf, secretary, and others of Local 105, UAW, Wapakoneta, Ohio, for the inclusion of the State of Ohio in the experimental food stamp plan, and for the permanent substitution of the food stamp plan for the present plan of distribution of surplus commodities for poor relief, which was referred to the Committee on Agriculture.

EXTENSIONS OF REMARKS

Byelorussian Independence Day

EXTENSION OF REMARKS

OF

HON. WILLIAM FITTS RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. RYAN. Mr. Speaker, March 25, 1961, marked the 43d anniversary of the proclamation of independence of the Byelorussian Democratic Republic.

The Byelorussians form one of the many Slavic peoples who have lived under Russian domination for centuries. However, they have tenaciously clung to their distinct national traits and have kept their national traditions alive. These sturdy and stouthearted people, numbering close to 10 million today, have lived in their historic homeland in the frigid north country between eastern Poland and Moscow throughout their recorded history, long before the rise of modern Russia. Early in modern times the country was conquered by Russian czars. Since then, except for a brief period after the First World War, these people have suffered under Russia's czarist autocracy, and today they are suffering under Soviet totalitarian tyranny.

Toward the end of the First World War when Russian autocracy was overthrown, peoples oppressed under that decrepit regime were freed, and they all proclaimed their independence. The Byelorussians were among the first to do this. On March 25, 1918, they proclaimed their national independence and founded the Byelorussian Democratic Republic. That historic event ushered in a new era. It was the rebirth of a free and independent Byelorussia, the most important landmark in Byelorussian history.

During the next 3 difficult years the new and weak state fought valiantly for its very existence, but in the end it was overwhelmed. Early in 1921 the country was overrun, and then made part of the Soviet Union. Thus ended independent and free Byelorussia. For 40 years these people have been living under the unrelenting tyranny of communism. Hard pressed, miserable, and constantly harassed, they still breathe the spirit of freedom and independence, and long for their deliverance from the Kremlin's tyranny.

Mr. Speaker, we commend them for their courage.

SS "Hope"

EXTENSION OF REMARKS
OF
HON. FRANK T. BOW
OF OHIO
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. BOW. Mr. Speaker, the SS *Hope* is proving to be one of the most successful humanitarian ventures ever undertaken by the people of the United States. Reports of achievements come to us from the *Hope*'s every port of call.

I think it is proper to call attention to the fact that one of the principal contributors to the *Hope* project has been the American President Lines which not only assisted in the acquisition and conversion of the ship, a period of nearly a year before it sailed, but also agreed to operate the vessel on a nonprofit nonremunerative basis.

When Mr. George Killion, president of American President Lines, was first apprized of this project, he immediately offered his company's services. He was convinced that the SS *Hope* would offer tangible evidence that the people of the United States do care about the condition of less fortunate people throughout the world, and are eager to extend firsthand personal aid as proof of their concern.

To speed the project on its way, Mr. Killion directed that various departments of his company begin work immediately to determine the overall requirements for operating the ship. After a comprehensive study of the ship's design, the company participated in the arrangements required for the conversion of the ship to conform with U.S. Coast Guard standards of merchant marine operation, and to provide adequate medical facilities. Subsequently, the Navy awarded a conversion contract to the Puget Sound Drydock & Shipbuilding Co.

The effort by American President Lines had only started. Two men were assigned from its engineering department to represent the company in Seattle, and a former ship's captain was named project officer to prepare the ship for its mission of mercy.

Almost every department in American President Lines assisted. The steward's department spent weeks compiling commissary lists for the first voyage. The legal department reviewed the many complex contractual arrangements required to establish the program. The finance department set up a cost-accounting system and developed financial data to permit People-to-People Health Foundation to plan the financing of the project. The industrial relations department worked out the involved bargaining contracts with the seamen. The insurance department developed an insurance program for the project. The service and supply department handled the inventory, the purchasing, and the organization of the storing program. The operating department had the responsibility of consolidating all data pertinent to getting this "city" of 200 officers, crew, and medical staff ready for a voyage to foreign ports thousands of miles distant. And the public relations department assisted in planning the publicity needed to gain support for the project, and in the raising of funds to finance it.

Not least in the contributions made by American President Lines was the assignment of Capt. J. M. Windas as master of the SS *Hope*. A 43-year-old graduate of the Merchant Marine Academy, with 22 years' experience with American President Lines, Captain Windas had been serving on American President Lines' SS *President Polk* when he undertook his new assignment.

In the words of Mr. Killion:

> American President Lines is proud to have been a part in organizing and carrying forth this humanitarian project, and to be linked with the many others whose contributions have made its success possible.

Byelorussian Independence Day

EXTENSION OF REMARKS
OF
HON. CHARLES S. JOELSON
OF NEW JERSEY
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. JOELSON. Mr. Speaker, Byelorussia is the country extending from the western borders of Poland to the approaches of Moscow. It is a cold but fertile land, and its inhabitants are—for the most part—rugged peasants. These people numbering some 10 million have been living in that country from time immemorial. There they led a simple life and were content with their lot until they were brought under Russian czars early in modern times. Then began the unhappy period of their history. The Russians proved very oppressive, and they tried to absorb the Byelorussians by attempting to suppress all Byelorussian national traits. But the Byelorussians clung to these and struggled against the czarist regime to maintain their national identity, and to regain their freedom. In 1918 when that regime was no more they asserted their freedom and independence.

Byelorussian leaders seized upon this chance, proclaimed their independence on March 25 and established the Byelorussian National Republic. Then it seemed all joy and gaiety for these oppressed people. They were enjoying their freedom and working hard to guard their well-earned freedom. But they were faced with numerous powerful foes, and among these Communist Russia proved formidable. Early in 1921 the Red Army attacked Byelorussia, overran it and soon the country became part of the Soviet Union. Since that fateful year, the Byelorussians have been suffering under Communist totalitarian tyranny in their historic homeland. But they still cling to their ideals, and still pray for their deliverance from Communist tyranny. On the 43d anniversary of their independence day we echo their genuine patriotic sentiments and wish them more power in their struggle for freedom.

A New School Aid Bill With No Strings

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. PELLY. Mr. Speaker, I wish to announce to the House that I have introduced a new school bill. It is H.R. 6074 and would provide direct aid to the States for educational purposes only.

In previous Congresses, I was the sponsor of the so-called Pelly bill which would have returned 2 percent of all Federal income taxes collected in the various States to them to be expended by each State in accordance with its own budget. Based on Federal income tax collections, this bill would have refunded $1.1 billion without any Federal controls. No cost of Federal administration would have been involved. The only procedure would have been 50 checks from the Treasurer to 50 State treasurers.

There was one flaw in this proposal; namely, the fact that corporation taxes are paid in one State but the profits which are taxed are often earned in several States. States such as Alaska or my own State of Washington would have suffered because many big corporations have their headquarters in cities like New York, Chicago, Boston, or San Francisco. As a result, income tax returns paid in some States reflect profits earned in other States.

To make a long story short, I admitted that weakness in the bill and since the 86th Congress have sought to come up with a new and more equitable basis of tax refund.

My new bill, H.R. 6074, removes the inequity. It would limit the refund to a percent of personal or individual taxes. In other words, my new proposal is to turn back 5 percent of the taxes on income paid by individuals. It excludes refunding of payroll taxes under social security and likewise does not include any part of the income taxes on corporation profits.

Based on a breakdown of such taxes furnished me by the Library of Congress, I have estimated the annual return of taxes for education under my bill as follows:

	Amount
Alabama	$13,705,000
Alaska	2,080,000
Arizona	8,615,000
Arkansas	5,890,000
California	207,285,000
Colorado	35,255,000
Connecticut	38,095,000
Delaware	12,735,000
District of Columbia	14,588,000
Florida	34,400,000
Georgia	22,265,000
Hawaii	5,695,000
Idaho	4,070,000
Illinois	160,855,000
Indiana	47,475,000
Iowa	17,635,000
Kansas	15,220,000
Kentucky	14,385,000
Louisiana	17,915,000
Maine	5,305,000
Maryland	43,215,000
Massachusetts	64,700,000
Michigan	106,765,000
Minnesota	32,420,000
Mississippi	5,350,000
Missouri	48,015,000
Montana	4,065,000
Nebraska	13,270,000
Nevada	3,910,000
New Hampshire	4,755,000
New Jersey	63,980,000
New Mexico	5,865,000
New York	335,435,000
North Carolina	20,990,000
North Dakota	2,775,000
Ohio	131,885,000
Oklahoma	16,775,000
Oregon	16,770,000
Pennsylvania	138,960,000
Rhode Island	9,255,000
South Carolina	7,590,000
South Dakota	2,985,000
Tennessee	18,375,000
Texas	72,695,000
Utah	6,325,000
Vermont	2,165,000
Virginia	23,685,000
Washington	27,755,000
West Virginia	8,095,000
Wisconsin	36,100,000
Wyoming	2,420,000
Total	1,961,180,000

Postal Note

EXTENSION OF REMARKS

OF

HON. WILLIAM H. AVERY

OF KANSAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. AVERY. Mr. Speaker, I am in complete accord with the philosophy that party workers should be rewarded for their effort if their candidate is successful in his campaign for any public office. The civil service system has removed many Government jobs from the conventional patronage role, but generally speaking the policy-making positions are subject to political appointment, as they should be. Under unanimous consent, I include an excerpt from a recent column in the Washington Evening Star that is an example of an appropriate recognition for campaign services rendered:

POSTAL NOTE

Tyler Abell, 28, has been appointed assistant to the executive assistant to Postmaster General Day. Mr. Abell, who is the stepson of Columnist Drew Pearson, will get a salary of $13,730 a year.

Hospitalization for Alaskan and Hawaiian Veterans

EXTENSION OF REMARKS

OF

HON. RALPH J. RIVERS

OF ALASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. RIVERS of Alaska. Mr. Speaker, it is my privilege to speak of much needed veterans' legislation now pending in this body, which is couched in general terms, but which would have specific application to America's veterans living in Alaska and Hawaii. Since these veterans have come from all our States and fought for all of us, I seek the consideration and support of my colleagues for my bill, H.R. 2923.

This legislation, with regard to which I have already testified before the Subcommittee on Hospitals of the House Committee on Veterans' Affairs, would allow the Veterans' Administrator to make contracts with private hospitals for the treatment of veterans with non-service-connected disabilities, if said veterans reside in States not having a Veterans' Administration hospital or in States not having such facilities within 500 miles of their borders. In practical effect, this bill, if enacted, would apply only to the States of Alaska and Hawaii.

It is the purpose of this legislation to effectuate a simple and inexpensive solution to a defect in the Veterans' Administration program, having to do with Veterans' Administration facilities in Alaska and Hawaii.

Let us start with the fact that there is no Veterans' Administration hospital in Alaska and none in Hawaii, and there never has been. During the years when Alaska and Hawaii were territories, this situation was no problem because existing law—section 601(4) of title 38, United States Code—then authorized and still authorizes the Veterans' Administrator, among his other functions, to contract with private hospitals for the care of veterans with non-service-connected disabilities or ailments in a territory, commonwealth, or possession. Now that Alaska and Hawaii are States of the Union, however, the Veterans' Administration has lost its general authority to provide contract hospital care in Alaska and Hawaii in such cases.

Admittedly this authority so exercised by the Veterans' Administrator in a territory, commonwealth, or possession, and which he previously exercised in Alaska and Hawaii, is an exception to the general rule allowing hospital care for non-service-connected disorders only in Veterans' Administration or other Federal hospitals on a beds-available basis. The reason for the exception is stated in the Administrator's report on the legislation now before you, as follows:

Historically, the exception to permit hospital care in private facilities for war veterans with non-service-connected conditions in a territory or possession was based upon special considerations. These apparently included the factors of great distances from the mainland, difficulty in transferring patients to the States, and the relatively small volume of patient demand in the territories and possessions.

These words are well spoken and they apply to Alaska and Hawaii today as much as they did during the days of territoriality. Alaska and Hawaii are just as far away from the other States as they were then, transportation difficulties still persist, and the patient demand is too small to justify the great expense of constructing and operating a VA hospital in Alaska and one in Hawaii. Since neither Alaska nor Hawaii have sought VA hospitals, and are not about to become that kind of a burden on the General Treasury, I am offering and urging the simple, equitable, and comparatively inexpensive solution contained in my bill, H.R. 2923. I also point out that the savings in transportation which would be effected by my bill would constitute a substantial offset to the cost of hospital care in private local hospitals.

May I now speak of that portion of the Administrator's report which says:

We have beds allocated for VA beneficiaries in hospitals of the Department of Defense and the Department of Health, Education, and Welfare. In Hawaii beds are allocated for our use by the Defense Department in Tripler General Hospital. We believe that the needs in both Alaska and Hawaii are being met to a reasonable and proper extent by the use of these Government facilities.

This statement sounds good on its face, but does not work out in practice in Alaska. To be sure, there is a military hospital at Elmendorf Air Force Base near Anchorage and one at Fort Wainwright near Fairbanks, which meet the needs of the veterans in the rail belt.

The Health, Education, and Welfare Hospital at Anchorage plays little part in this picture because it duplicates the care available at the Elmendorf Air Force Base Hospital in the cases with which we are presently concerned. Since the rail belt is about midway between Ketchikan near the southeastern extremity of Alaska and the most westerly part, the problem still remains as to the greater part of the great area of Alaska. Veterans in Ketchikan and Juneau and other communities in southeastern Alaska are an average of about 1,000 miles from Anchorage at the southerly end of the rail belt and a like distance from Fairbanks at the northerly end. In other words, they are as far away from the hospitals on the rail belt as they are from the VA hospital at Portland, Oreg. Veterans at Nome are 500 miles from the rail belt and those of Bethel, Dillingham, and other places farther west a comparable distance, but with less frequent plane service. Right at hand in the communities I have named are good local hospitals where the lives of our veterans can

be safeguarded instead of jeopardized by waiting for the next airplane departure, and then suffering the rigors of getting to the plane, aboard the plane, and disembarking therefrom in all kinds of weather.

Some of the private hospitals with which the Veterans' Administration made contract arrangements during the days when Alaska was a territory are at such widely scattered locations as Ketchikan, Juneau, Sitka, Wrangell, Petersburg, Cordova, Glenallen, Anchorage, Seward, Kodiak, Palmer, Nome, and Fairbanks.

Because of the vastness of Alaska and its great distance from the nearest State, it is apparent to me that for the welfare of the veterans involved these cases arising in communities distant from the rail belt should be cared for locally in private local facilities. I also suggest that because of these great distances and transportation difficulties, Alaska can readily be distinguished as a State apart from the usual situation in the southerly 48 States, and that the Administrator may forget the fear he has expressed that this legislation, if enacted, might become a precedent for extending the idea to all the States. I sincerely urge that this legislation be considered on its merits.

To strengthen the statement which I made to the subcommittee, I submitted for the record of the hearings supporting documents which I recommend to your attention. These documents consist of a strong statement of Alaska's Governor, William A. Egan, an urgent joint resolution of the Alaska Legislature, detailed facts and figures provided by Ernest E. Lincoln, manager of the VA regional office at Juneau, and statements and telegrams from veterans' organizations throughout Alaska.

I trust, Mr. Speaker, that Alaska's veterans, numbering approximately 15,000, who are so far away from VA hospital facilities but who did so much for America in times of national peril, will be granted the benefits which would be authorized by my bill.

Donations of Surplus Personal Property for Purposes of Education, Health, and Civil Defense

EXTENSION OF REMARKS

OF

HON. JOHN W. McCORMACK

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. McCORMACK. Mr. Speaker, under leave to revise and extend my remarks, I insert in the CONGRESSIONAL RECORD herewith a report from the Department of Health, Education, and Welfare which shows that eligible educational, health, and civil defense units received surplus personal property with acquisition cost of $25,310,206 in the month of February 1961. This brings the total for the fiscal year to $206,304,524.

The report follows:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

OFFICE OF FIELD ADMINISTRATION

Surplus personal property report for the month of February 1961

Kennedy Housing Bill To Cost in Excess of $7 Billion

EXTENSION OF REMARKS
OF
HON. THOMAS M. PELLY
OF WASHINGTON
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. PELLY. Mr. Speaker, on March 13, I presented to the House an itemized cost of President Kennedy's housing program based on his message submitted to the Congress on March 9.

At that time I noted that the total financial impact of the President's housing message involved an ultimate expenditure of $6.813 billion.

However, without touching on the merits of the specific proposals in the President's message I noted that only $50 million, or less than 1 percent of the $6.8 billion, would be subject to the Appropriations Committee.

I would like to submit for the attention of the Members a revised statement of the administration's housing program based upon the legislation introduced in the House on March 29 as H.R. 6028.

The itemized cost is as follows:

Financial impact of S. 1478 (H.R. 6028), the Housing Act of 1961

[In millions]

Program	Grants	Loans
Urban renewal capital grants	[1] $2,500	
Planning grants	[2] 80	
Permanent open land acquisition	[1] [2] 100	
Open land for future development		[3] [4] $100
FNMA special assistance		[4] 750
Direct loans for elderly housing		[2] 50
Public housing	[1] [5] 1,943	
Additional subsidies for elderly tenants	[1] [6] 240	
Demonstration grants for public housing	[3] 10	
Community facilities		[4] 50
College housing		[4] [7] 1,350
Total	4,873	2,300
Total loans and grants	7,173	

[1] Authorizes contracts pledging faith of U.S. Government. Congress is legally bound to appropriate money in future years.
[2] Appropriation by Congress necessary before contractual obligation effective.
[3] Included in Kennedy housing message, but not in housing bill because of pendency of Williams bill, S. 858. HHFA will endorse Williams bill on this subject as part of housing bill.
[4] Not appropriated; Treasury withdrawals are noted as "public debt transactions."
[5] Based on HHFA estimates of subsidies to be actually disbursed with credit given for reducing contract subsidies through excess receipts at fiscal 1958 rate of 17½ percent ($3.16 billion would be maximum permissible authorization available under present statutory contract authority—$79 million per year for 40 years).
[6] Based on ⅓ of new public housing authorizations for elderly persons (Kennedy message).
[7] College housing loans have always been part of omnibus housing bills. It was requested in a separate message, although HHFA will still administer program.

I note that we may now refer to the administration's housing program as a $7.17 billion program. This represents the total loans and grants, or the total moneys withdrawn from the Treasury should the bill be enacted. I note that of this $7.17 billion only $140 million, or less than 2 percent, would be subject to the Appropriations Committee. The other 98 percent would either involve loans from the Treasury or contractual obligations which will make it necessary in future years to appropriate the money, with no room for discretion or judgment by the Appropriations Committee.

Mr. Speaker, I was most disappointed to read in the press that this bill has a price tag of approximately $3 billion. The reason is that the press accepts the Agency handout at face value. Yet, an inquisitive reporter, and I like to think that all reporters are inquisitive, would note that the administration was asking for an additional 100,000 units of public housing. Yet, the cost breakdown supplied by the administration contained no estimated dollar figure for the cost to the taxpayers of these 100,000 public housing units.

If any Member of the House believes that public housing costs nothing, let him look on page 323 of the Budget of the United States for the fiscal year ending June 30, 1962, and he will note a request for an appropriation of $169,300,000. This money will be paid during the fiscal year 1962 to service the debt on existing public housing. This is an outright subsidy because the rental income from public housing units pays only the operating costs. Now, when the Independent Offices Appropriations Subcommittee goes into session to ponder this request for $169,300,000, it will find that it has absolutely no discretion in eliminating the item or even reducing it. The United States is legally bound to appropriate and disburse this money on the basis of contracts which the Congress authorized in 1949 to be executed in the name of the United States.

This is a glaring example of the lack of control of the public purse, control which the Congress has relinquished to agencies of the executive branch.

It is therefore utterly fantastic for anyone to label this bill as a $3 billion or $4 billion measure by not including an estimate of cost for public housing.

It is to correct this glaring defect in pinning down the actual cost, current and ultimate, to the taxpayers of these programs that I introduced House Resolution 115 which would require that all legislation involving the expenditure of public money be subject to the Appropriations Committee. I regret that the House Rules Committee has refused to let the House work its will on House Resolution 115.

Soon the House will have an opportunity to work its will on this $7.173 billion measure. I hope that at that time we can raise a standard for fiscal responsibility to which all men might repair.

Byelorussian Independence Day

EXTENSION OF REMARKS
OF
HON. FRANK J. BECKER
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. BECKER. Mr. Speaker, Byelorussians are one of the score of larger racial groups who have been suffering under the Soviet regime. As a matter of fact throughout their modern history they have been enslaved under Russian regimes, both czarist and Communist. Except for the very brief period of 3 years their history is one of subjection to Russian autocracy and tyranny.

In 1918, however, when the czarist regime in Russia was no more, they asserted their freedom and proclaimed their independence on March 25. That was 43 years ago, and the event constituted a veritable landmark in Byelorussian modern history. Then the Byelorussian National Republic was set up and the people of Byelorussia, some 10 million of them in their historic homeland, worked hard to strengthen their country against its foes. Unfortunately they were faced with powerful and deadly enemies, who could be fatal to their independence. Early in 1921 the Red army attacked and overran the country, thus putting an end to independent Byelorussia. Then the country was incorporated into the Soviet Union and its people became submerged in the vast Soviet empire. Fortunately, however, in this submerged and enslaved state Byelorussians are not lost. They still retain their love for freedom and cherish their national independence. On March 25, their independence day, our good wishes go to her and let us hope they will once attain their goal of freedom.

Petition by Anti-Communist Action Committee of Western New York

EXTENSION OF REMARKS
OF
HON. JOHN R. PILLION
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. PILLION. Mr. Speaker, it was a distinct honor today to present a petition signed by 10,000 residents of western New York State to Representative FRANCIS E. WALTER, chairman, and Representative GORDON H. SCHERER, of the House Un-American Activities Committee. It is also being presented to the Senate Internal Security Subcommittee.

The petition praises and supports the patriotic efforts of the House and Senate subcommittees. The language of the petition is:

We, the undersigned, recognize the serious nature of the Communist conspiracy, which aims to overthrow our constitutional government and establish Communist dictatorship. We praise the House Committee on Un-American Activities and the Senate Internal Security Subcommittee for their diligent and patriotic efforts to expose, analyze, and publicize the true nature of the Communist conspiracy, and to recommend legislation to protect us against communism. We reaffirm our support of these committees in their valuable and necessary work of exposing Communist treason and subversion, and proposing remedial legislation.

The petition submitted today is being compiled by the United Anti-Communist Action Committee of Western New York. It is only a portion of the number of

citizens who are expressing their support of these congressional committees.

The committee's executives are: Francis M. Kindel, chairman; Albert J. Weinert, the committee's speakers' bureau director; Walter V. Chopyk, secretary of the Erie County Planning Board; Almond E. Fisher, contact officer of the Veterans' Administration in Buffalo; Joseph P. McNamara, an attorney, and formerly the Americanism chairman of the Erie County American Legion; and Andrew Diakun, an attorney. This committee and its executives are performing a distinct public service in alerting our citizens to the menace of communism.

The petitions are being compiled in coordination with the showing of the film "Operation Abolition." This film is being presented to audiences consisting of school pupils and citizens in all walks of life.

The American people must be kept realistically aware of the continuing dangers of communism. We must never forget for a moment the evils of the communistic antigod philosophy, it is criminal tactics, it is socialist economy, it is totalitarian government, it is immorality, and it is contempt for the individual citizen.

The United Anti-Communist Committee of Western New York and the individual citizens who signed this petition are to be commended for their patriotism and their sincere interest in the welfare and safety of this Nation and the free world.

Federal Aid to Education

EXTENSION OF REMARKS
OF
HON. RALPH J. RIVERS
OF ALASKA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. RIVERS of Alaska. Mr. Speaker, in my testimony today before the Subcommittee on General Education of the House Committee on Education and Labor, I pointed out that Alaska, among other impacted districts, would lose instead of gain under provisions of H.R. 4970 as presently written, which is the administration bill for Federal aid to education. Since my testimony also referred to the other States, I am prompted to make known to all my colleagues the substance thereof. In general, I speak in support of this legislation, which represents an effort on the part of the Federal Government to improve and equalize minimum standards of education throughout our country, and I find from discussing this subject with many of my fellow Alaskans that my State may be recorded as strongly in support of the principle of Federal aid to education. This enthusiasm, however, has been postulated upon the understanding that appropriate legislation designed to carry out this urgent national purpose would increase financial implementation of Alaska's school program as well as the school programs in the other States. Imagine then my consternation, and like feelings on the part of my fellow Alaskans, when analysis of H.R. 4970 disclosed that Alaska, which is a recipient of Federal school impact funds, would get $68,800 less per year under said bill than if it had never been introduced. This figure is based upon an estimate for 1962 shown by the following figures from tables prepared by the Department of Health, Education, and Welfare.

STATE OF ALASKA ASSISTANCE TO IMPACTED SCHOOL DISTRICTS

Under Public Law 874:	
If retained as is	$8,090,300
If amended by title II of H.R. 4970	7,577,800
Loss, this phase	512,500
Under Public Law 815:	
If retained as is	2,447,300
If amended by title III of H.R. 4970	2,336,000
Loss, this phase	111,300
Total loss under titles II and III	623,800
Offset by $15 per pupil payment	555,000
Net loss under H.R. 4970 if enacted with titles II and III retained	68,800

As you may know, several of our colleagues have advised that similar losses would result to their impacted districts if H.R. 4970 is enacted as written. I expect that H.R. 4970 was drafted in haste, and that HEW knew this committee might in the course of its studies discover inequities and take appropriate amendatory action to remedy the miscarriage of this program as it would apply to Alaska and a few other districts.

From developments thus far I am able to pinpoint several alternative remedies.

May I first mention the idea of extending Public Law 815 and Public Law 874 in full force and effect. In H.R. 3677, the gentleman from Michigan [Mr. O'HARA] proposes a 2-year extension, the gentleman from New York [Mr. PIKE] through the medium of H.R. 3566, proposes a 4-year extension, and Senator ENGLE has introduced in the Senate S. 1078 to make permanent the existing provisions of Public Law 815 and Public Law 874. The purpose of any of these proposals can, of course, be accomplished by striking all of the titles II and III from H.R. 4970 and substituting simple extension provisions. This I recommend and would fully support.

Passage of H.R. 4970 after being so amended would produce for Alaska the estimated sum of $555,000 the first year, $645,000 the second year, and $750,000 the third year over and above entitlements under Public Law 815 and Public Law 874. Because of the many financial demands upon Alaska incident to these first years of statehood, there is an acute need for such aid to help meet the educational demands of Alaska's rapidly increasing school population and for improving its already excellent public school system, with regard to which high standards are maintained in spite of handicaps. Because of the high cost of construction and high operating costs, Alaska disburses approximately 50 percent of its total tax revenues, both State and local, in behalf of education, including support of the University of Alaska.

A related factor to consider is that Federal aid to education in Alaska looks more impressive dollarwise than in practical results. According to statistics prepared by the Office of Education of the U.S. Department of Health, Education, and Welfare, the per pupil cost in Alaska of a minimum school facility under Public Law 815 came to $2,300 in 1958 and $2,630 in 1959. In New York, for the same period, the 1958 cost of $1,810 shrank to $1,750 in 1959. Ranking the States in this regard from highest to lowest, the median is found in Maine with a 1959 per pupil construction cost of $1,150 which is less than half of such cost in Alaska. This, I believe, graphically demonstrates one of the handicaps with which Alaskans are confronted in maintaining their school system.

Reverting now to another idea, I would like to have you consider a defect in title I discovered by Dr. George Rogers, in analyzing the administrative procedure involved. Dr. Rogers, a highly competent economist presently on the faculty of the University of Alaska, has pointed out that in computing the total earnings of individuals within each State and in the Nation as a whole, the statisticians at the Department of Health, Education, and Welfare have included the pay of military personnel within each State and the Nation as a whole. As you know, the total of individual earnings within each State is divided by the number of pupils therein to determine the income per public school pupil for each State. We also know that the pay of military personnel is exempt from State taxation and would not, therefore, reflect upon the ability of a State to maintain its public school system. Accordingly, the pay of military personnel should not be included. Although this factor increases total individual earnings within all the States on an average of only 3½ percent, it hits Alaska very hard. Tax-free military payrolls constitute 26 percent of total individual earnings within Alaska. Accordingly, an entirely false impression is created as to total earnings of individuals in Alaska subject to State taxation, with the consequence that Alaska is erroneously rated in this regard as one of the richest States and placed in the category of States slated to get only $15 per pupil as contrasted with more than twice that much for certain other States. This military pay factor, unless corrected, will also adversely affect other States within which are located substantial military establishments. Thus, individual earnings throughout the program should be computed without including the pay of military personnel. This point, which was brought to light by Dr. Rogers, has already been submitted to the Senate Subcommittee on Education by Senator GRUENING of Alaska as part of an amendment which he has proposed to S. 1021, the Senate counterpart of H.R. 4970. Senator GRUENING's amendment would also take

into account comparative costs of construction in the several States. The remaining feature of his amendment, which is postulated upon retention of titles II and III, would add $84 million to the $666 million already specified for fiscal year 1962 to accomplish the purpose of offsetting losses to the impacted school districts which would result from the cutbacks under Public Law 815 and Public Law 874.

Another alternative which would resolve the problem as to Alaska has been suggested to the Senate Subcommittee on Education by Senator BARTLETT of Alaska. Senator BARTLETT suggests, if titles II and III are to be retained, that there be created a discretionary fund to be administered by the Secretary of Health, Education, and Welfare for supplemental grants to remotely located school systems suffering unusual transportation and climatic problems and where estimated construction costs exceed the national median by a factor of two or more.

Mr. Speaker, I feel that all of us recognize the desirability of preventing the inequities which would flow from H.R. 4970 if it were enacted in its present form. Therefore, I wish to be counted among those who strongly support appropriate amendatory action. My choice of the proposals which I have mentioned would be an extension of Public Law 815 and Public Law 874 in full force and effect, together with a provision requiring exclusion of the pay of military personnel in computing total individual earnings.

Greek Independence Day

EXTENSION OF REMARKS
OF
HON. WILLIAM FITTS RYAN
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. RYAN. Mr. Speaker, the Greek war of independence, which began 140 years ago and culminated in the birth of modern Greece, was one of the major political events in 19th century Europe. That successful revolt also proved that regardless of the physical weakness of an oppressed people, and also regardless of the number of centuries they are held down by their overlords, stouthearted and gallant people will always try to free themselves from oppressive tyranny.

Greeks had enjoyed freedom and practiced it in their homeland centuries before any other people. In this as in many other social and political experiments they were pioneers, the real creators of our Western civilization. But even before the beginning of our era, the glory of Greece was gone, and the Greeks had lost their freedom. Thus for nearly 2,000 years they lived under alien regimes, first under the Romans, then under Frankish kings, and finally, from mid-15th century down to the time of their independence under the Ottoman Turks. During their long suffering they revolted more than once, but each time their attempt ended in failure because physically they could not cope with the powerful Ottoman forces. Their daring revolt in 1821 was successful because the awakened consciences of Europe and America were in wholehearted sympathy with their righteous cause, and the governments of Europe could help the Greeks in time to save them from almost total extermination. That is what certain European governments did in the fall of 1827. When gallant Greeks were almost down and out, public opinion in Europe practically forced Britain and France to action. In October of 1827 the navies of these two countries and that of Russia took part in the Greek war of independence and annihilated the Ottoman fleet, thus assuring the victory of the Greek cause.

March 25 was the 140th anniversary of Greek independence. We salute the gallant Greek people for their loyalty to our common ideals, freedom, and independence.

"City Council of Maywood, Los Angeles County, in the Great 23d Congressional District, California, Unanimously Adopts Resolution Supporting House Un-American Activities Committee"

EXTENSION OF REMARKS
OF
HON. CLYDE DOYLE
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. DOYLE. Mr. Speaker, by reason of unanimous consent heretofore granted me so to do, I present to the attention of this great legislative body the text of a resolution adopted by the city council of the city of Maywood, Calif., which is in my great 23d Congressional District, in support of the work of the Un-American Activities Committee of which I am a member. I also call your attention to the letter accompanying same and my reply thereto.

CITY OF MAYWOOD, CALIF.,
March 13, 1961.

Congressman CLYDE DOYLE,
New House Office Building,
Washington, D.C.

DEAR CONGRESSMAN CLYDE DOYLE: At the last regular meeting of the Maywood City Council February 28, 1961, the enclosed resolution was adopted.

The city council instructed that you be mailed a copy which is self explanatory.

Yours very truly,
ISABEL L. DEDMORE,
City Clerk.

RESOLUTION 1784

(A resolution of the City Council of the City of Maywood urging that the House Un-American Activities Committee be preserved by Congress as an effective deterrent against the enemies of internal security and the American way of life as developed under the Constitution of the United States)

Whereas it is fundamental that self-preservation is the first law of nature; and

Whereas it is the inherent right of the Government of the United States to preserve itself from destruction by enemies from within as well as from without; and

Whereas it is generally well established that Communist subversives working secretly within the United States have delivered important military and atomic secrets to foreign powers to the detriment of the United States; and

Whereas the Communist conspiracy is, among other things, the overthrowing of the American system of government by force and violence; and

Whereas constant vigilance is required to observe and expose the enemies of the United States; and

Whereas the House Un-American Activities Committee has in the past been most successful in exposing to public light the enemies of the internal security of the United States and this committee should be preserved for the self-defense of this Nation so that those persons intent upon destroying the Smith Act, the Internal Security Act, and the Communist Control Act can be revealed for what they represent: Now, therefore, be it

Resolved, That the House Un-American Activities Committee be preserved by Congress as an effective deterrent against the enemies of internal security and the American way of life as developed under the Constitution of the United States.

Passed, approved, and adopted this 28th day of February 1961.

GEORGE G. GLENN,
Mayor.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 27, 1961.

Hon. MAYOR AND CITY COUNCIL,
City Hall, Maywood, Calif.

MY DEAR FRIENDS: I acknowledge receipt of your letter of recent date with your very worthy resolution 1784 enclosed, said resolution being entitled as follows: "A resolution of the city council of the city of Maywood urging that the House Un-American Activities Committee be preserved by Congress as an effective deterrent against the enemies of internal security and the American way of life as developed under the Constitution of the United States."

I thank you for sending me this after having taken the time and trouble to adopt the same by unanimous vote.

Because of the very important city of Maywood which you gentlemen have the privilege of representing by due election of the citizens thereof being in the great 23d Congressional District which I represent in this, my 15th year in the U.S. Congress, and, furthermore, because I have already been a member of the House Un-American Activities Committee for about 14 years and am now a member thereof; and also, Mr. Mayor and councilmen, because this resolution is unusually timely and pertinent in view of the unfounded and unwarranted attacks upon the committee, I—with great appreciation to you—say that I shall promptly ask unanimous consent to insert same, and your letter to me conveying same, into the next issue of the daily CONGRESSIONAL RECORD. I am sure that no Member of the great Congress of the National House of Representatives will make any objection to the inclusion thereof.

If you have not already learned the fact which I now relate, I wish to say that when the effort was made by Congressman ROOSEVELT, of California, to have the budget of the House Un-American Activities Committee reduced a short time ago on a rollcall vote, the House membership voted for and in support of the committee's budget as asked for by an aye vote of 412 and a nay vote of 6. I, of course, voted "aye." I herewith enclose a copy of my short speech in the House of Representatives on the 1st day of March 1961, in support of the House Un-

American Activities Committee and against the Roosevelt resolution.

Our beloved Nation deserves the best of whatever we are.

Cordially, your Congressman,

CLYDE DOYLE.

Just Whose Tax Money?

EXTENSION OF REMARKS

OF

HON. F. EDWARD HÉBERT

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. HÉBERT. Mr. Speaker, I do not think it necessary to make any comment on this exchange of correspondence. It speaks for itself.

How ridiculous can some people get? The correspondence follows:

MARCH 13, 1961.

Mr. JOHN E. HORNE,
Administrator, Small Business Administration, Washington, D.C.

DEAR MR. HORNE: I would like to know the reasoning, if indeed there be any, for the ruling of the Small Business Administration that precludes loans to small businessmen who derive half or more of their receipts from the sale of alcoholic beverages.

I consider this regulation arbitrary and highly discriminatory.

Worse, it is aimed at the hand that feeds, for one of the largest contributors of taxes to the public coffers at all levels—municipal, State and Federal—is the alcoholic beverages industry.

I am informed, for example, that in the year 1959 public revenues from alcoholic beverages totaled $4,298,465,834. Of this figure, the Federal Government received a slice coming to $3,154,556,000. Yet the small businessman dealing in alcoholic beverages is not permitted by administrative ruling to receive an SBA loan, even though his taxes are used in the broad sense for SBA loans and for the administration of the SBA itself.

As to the importance of the alcoholic beverage industry to the tax structure of the United States, it may interest the Small Business Administration to know that these particular tax receipts would almost support the entire Veterans' Administration; the same applies to the labor and welfare program; these tax receipts would support commerce, housing, and space and still have nearly $1 billion left over. Further, these taxes could support the entire operation of the General Government—including the Small Business Administration—and still have nearly $2 billion left over.

I protest most emphatically the discriminatory regulation of the SBA, and invite your comments.

Sincerely yours,

F. EDW. HÉBERT.

SMALL BUSINESS ADMINISTRATION,
OFFICE OF THE ADMINISTRATOR,
Washington, D.C., March 24, 1961.

Hon. F. EDWARD HÉBERT,
House of Representatives,
Washington, D.C.

DEAR CONGRESSMAN HÉBERT: Thank you for your letter of March 13, 1961, concerning our policy which prohibits the granting of financial assistance if a substantial portion of the gross income of the applicant is derived from the sale of alcoholic beverages.

The policy in question has been in effect since the beginning of the agency's lending functions in 1953. It is part of the loan policy statement promulgated by the Loan Policy Board and most recently published at page 8325 of the Federal Register dated October 14, 1959 (24 F.R. 8325).

The loan policy statement is the implementation of section 4(d) of the Small Business Act, as amended, which provides for a Loan Policy Board to establish general policies, particularly with reference to the public interest involved in the granting and denial of applications for financial assistance by the Small Business Administration. While it is true that it is the purpose of the Small Business Act, as expressed in the law itself by the Congress, that the Government should aid, counsel, assist, and protect insofar as possible the interests of small business concerns, it is also clear that Congress intended there should be some limitation. Otherwise, the provision establishing the Board would have little meaning.

In the discharge of its responsibility under the Small Business Act, the Board has repeatedly given consideration to the question of whether or not it is in the public interest to use taxpayers' funds to promote the sale of alcoholic beverages, and although many arguments have been presented, the Board has been unable to reach a conclusion favorable to the industry. I should like to make it clear that the Board has never taken the position that the alcoholic beverage business is not in the public interest. The Board's position relates only to the use of Government funds. The Board is of the opinion that the subject of alcoholic beverages presents a controversial issue with very strong differences of opinion, and even in those States where the sale of alcoholic beverages has been legalized there remains opposition thereto on the part of many taxpayers. This is evidenced by the fact that the industry is extensively regulated by Government, both State and Federal.

Since neither the Small Business Act, nor its legislative history, defines what is meant by "public interest," its determination must be the result of the judgment of the Board. However, it is significant to note that a similar Board, created for the same purpose in previous legislation, reached the same conclusion.

In addition, the policy in question was certainly not intended to cast any stigma on the alcoholic beverage industry, and there is no inference in the Board's decision that this industry has been singled out for discrimination. You will find that the loan policy statement includes other businesses which are not eligible for loans, for example, newspapers, magazines, radio and television broadcasting companies, and similar enterprises. Also prohibited are loans to enterprises primarily engaged in the business of lending or investments and this would include banks, insurance companies, finance companies, and similar businesses.

The Board has on several occasions, reconsidered this policy which concerns business loans to applicants engaged in the sale of alcoholic beverages, and decided to make no change in that policy.

Sincerely yours,

JOHN E. HORNE,
Administrator.

CONGRESS OF THE UNITED STATES,
HOUSE OF REPRESENTATIVES,
Washington, D.C., March 29, 1961.

Mr. JOHN E. HORNE,
Administrator, Small Business Administration, Washington, D.C.

DEAR MR. HORNE: I want to thank you for your remarkable reply of March 24 concerning the policy of the Small Business Administration in refusing to make loans to those small businesses dealing in alcoholic beverages.

I say your reply is remarkable for these patent reasons:

You state, for example, that the Loan Policy Board "has repeatedly given consideration to the question of whether or not it is in the public interest to use taxpayers' funds to promote the sale of alcoholic beverages, and although many arguments have been presented, the Board has been unable to reach a conclusion favorable to the industry."

I am reassured to learn that I am not the first to request reconsideration of this policy. And I am further reassured to learn that many arguments have been advanced. I detect the possibility of understatement here.

If the Board applies the yardstick of whether such loans are in the public interest, and then decides not to make such loans, the logical deduction is that the Board decided it was not in the public interest. I trust the Board, though unable to reach a favorable conclusion, is able to follow the above reasoning.

I am touched by the Board's concern for the use of Government funds. As I pointed out in my initial letter, a good portion of these sacrosanct funds is provided by the alcoholic beverages industry. If the Government considers these funds to be sullied, then don't take them.

I acknowledge that the sale of alcohol was once controversial. I thought that had been ironed out in 1933, that the people had spoken when the 18th amendment was repealed. I thought the people themselves decided then what was in the public interest. Of course what your Board has done here is to elevate its opinion over that of the American electorate.

Inasmuch as you understandably elect to ignore the contributions made by the alcoholic beverages industry to the Federal Government, it might interest you to know that in 1959 my State alone contributed $28,332,000, a figure more than five times what was appropriated for the salaries and expenses of the Small Business Administration, and well better than half what was appropriated for your revolving fund. And that from just one State.

I wonder whether your Board is aware of that. Doubtlessly not because it appears the Board is under the impression we are still attempting to function under the Volstead Act. Please tell them it was repealed nearly 28 years ago.

Sincerely yours,

F. EDW. HÉBERT.

Professional Engineering-Scientific Classification Act

EXTENSION OF REMARKS

OF

HON. VICTOR L. ANFUSO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. ANFUSO. Mr. Speaker, on March 14, 1961, I introduced a bill, H.R. 5563, to establish a classification and compensation system for professional engineering, physical science, and related positions in the Federal Government. This bill has aroused a good deal of interest among engineers and scientists.

I have had many requests for information about the bill. Consequently, I have prepared a section-by-section

analysis which explains the measure. It is as follows:

SECTION-BY-SECTION ANALYSIS OF H.R. 5563

To establish a system for the classification and compensation of professional engineering, physical science, and related positions in the Federal Government, and for other purposes.

It is a generally recognized fact, based on numerous studies and reports prepared under the direction of both the executive and legislative branches of the Government, as well as by nongovernmental organizations concerned with the problem, that the Federal Government has been experiencing considerable difficulty within recent years in attracting and retaining high-quality engineering and scientific personnel in sufficient number for the continued implementation of necessary programs requiring such talent and capabilities. Federal agencies and departments have not only been unable to recruit the number and quality of engineering and physical science graduates due to the generally unfavorable position of the Government with respect to starting salaries, but perhaps more importantly, the increasing rate of attrition due to resignations among higher level engineers and scientists is a matter which has caused considerable concern.

Basically, the Government's problem is twofold: (1) A salary system which, in general, does not compare competitively with current rates for similar personnel in private areas of employment; and (2) the present lack of an effective program which will recognize and encourage the professional status and development of engineers and scientists.

As for the first, this problem area was succinctly pinpointed when the Eisenhower administration arrived late last year at a number of conclusions resulting from the Bureau of Labor Statistics "National Survey of Professional, Administrative, Technical, and Clerical Pay: Winter 1959–60." One of these conclusions was that, "Unless future salary action is in the direction indicated by the survey; namely, less emphasis on lower level pay and more competitive salaries at the higher levels—the Federal Government will be forced to rely at best on mediocre management and professional talent, particularly in the scientific and engineering fields."

The second is a more complex problem which involves several aspects and which requires a number of approaches toward a proper solution. One approach which is strongly supported by the engineering and scientific community is to establish a separate classification system for these key personnel. Such a system would serve to acknowledge their professional status and would provide that degree of identification which is necessary for their continued professional growth. Further, it would show that the Federal Government appreciates the unique contributions of these people and, by so doing, serve to improve the desirability of Federal employment.

This bill seeks a positive solution to these two problem areas through the establishment of competitive salary rates and by affording engineering and physical science personnel the professional status and recognition that is so imperative in these critical times.

SECTION 1—PURPOSE

This section explains the purpose of the bill which is primarily to improve the Government's competitive position in the recruitment and retention of engineering and scientific personnel through a system which assures adequate salaries and professional prestige.

SECTION 2—PROFESSIONAL ENGINEERING-SCIENTIFIC SCHEDULE; CONVERSION

This section establishes a compensation and classification system for professional engineering, physical science, and mathematics positions. The professional engineering-scientific schedule is divided into 10 grades which are designed PES–1 through PES–10. The salary levels assigned to each of the grades are comparable to current rates for similar classes of employees in non-Government employment. The Bureau of Labor Statistics survey, referred to above, served as the basic guide for the salary levels for each grade. There are seven ingrade salary steps in each of the first nine grades generally following the present arrangement under the Classification Act of 1949, as amended. For purposes of uniformity, each step increment amounts to $200. For grades PES–1 through PES–5, there is a $400 increase between the top step of the grade and the minimum rate of the next higher grade. For grades PES–6 through PES–9, there is a $200 increase between the top step of the grade and the minimum rate of the next higher grade.

The professional engineering-scientific schedule does not provide for longevity pay.

Initial conversion from the present general schedule for those positions placed in the new professional engineering-scientific schedule would be as shown in the bill. Engineers, physical scientists, and mathematicians currently at the GS–5 grade level, as well as those at the GS–7 level, would be converted to PES–1 on the new schedule. This reflects the professional nature of these positions and would permit individuals in these fields, who are recent college graduates, to be hired at salary rate which is competitive with what they could expect in nongovernmental employment.

During initial conversion, the salary of each employee on the general schedule who is transferred to the new schedule would be adjusted to a comparable rate on the new schedule which does not result in a decrease.

SECTION 3—COVERAGE

This section authorizes and directs the Civil Service Commisison to place in the new schedule all positions in the engineering, physical sciences, and mathematics occupational groups which require professional qualifications. This would include all such positions for which rates of compensation are fixed by the Classification Act of 1949, as well as the so-called Public Law 313 positions.

In order to guide the Commission in making the necessary detreminations, the bill contains definitions of "engineering," "physical sciences," and "mathematics" groups in terms of the type of work performed and the qualifications required.

Provision is made for the Commission to periodically review all positions placed in the professional engineering-scientific schedule and to make any studies which may be necessary to determine whether and to what extent additional positions should be placed in the new schedule. Additionally, the head of each department or agency may recommend to the Commission the addition or removal of positions under his jurisdiction.

SECTION 4—STEP INCREASES

The professional engineering-scientific schedule provides for a uniform within-grade increment of $200. These increments may be earned by employees performing satisfactory service after each 52 weeks of service if in grades PES–1 through 4; after each 78 weeks if in grades PES–5 through 8; and after each 104 weeks if in grade PES–9. The term "satisfactory" as used in this bill has the same meaning as when used in existing efficiency rating systems.

SECTION 5—PROMOTIONS, APPOINTMENTS, TRANSFERS

Unless otherwise authorized by law, new appointees to the professional engineering, scientific schedule will, after initial conversion has been completed, start at the minimum rate of the appropriate grade. The Civil Service Commission is authorized to issue appropriate regulations governing the rate of basic compensation for persons transferred to the new schedule from a position to which the bill does not apply, when there is a transfer from one position to another position in the new schedule, when a person is demoted to a lower grade in the schedule, when his type of appointment is changed, when his employment status is changed, or when the position in which he is employed is changed from one grade to another grade in the schedule.

This section further provides that no person can be promoted or transferred to a position in a higher grade in the new schedule unless he has completed at least 12 months in the next lower grade if the position from which promoted or transferred is in grades PES–1 through 3; 18 months if promoted or transferred from grades PES–4 through 6; and 24 months if promoted or transferred from grades PES–7 through 9.

SECTION 6—OVERTIME

Under this section, employees in grades PES–1 through 5 can earn either overtime pay or compensatory time off for authorized work in excess of 40 hours in any administrative workweek. Overtime pay is computed at 1½ times the actual hourly rate for employees whose basic compensation does not exceed the minimum scheduled rate for grade PES–2, and 1½ times the hourly rate of the minimum of PES–2 if the employee's basic compensation exceeds the minimum rate of PES–2. This conforms to current procedures under the Classification Act of 1949, as amended.

However, the bill authorized the head of any department or agency to grant employees in grades PES–1 through 5 compensatory time off in lieu of overtime payment, for an equal amount of time spent in overtime work or holiday work.

Employees in grades PES–6 through 10 will not be entitled to either overtime pay for compensatory time off for any work performed in excess of 40 hours in any administrative workweek. This reflects the philosophy that employees in these grades exercise considerable independent judgment and discretion in performing their duties and that a certain degree of flexibility may be required in the time spent to complete assignments or projects. Such an arrangement is in accord with accepted practices involving engineering and scientific personnel in higher level positions in private areas of employment.

SECTION 7—GENERAL PROVISIONS

This section explains the general coverage of the bill among Federal departments and agencies and lists three specific exemptions.

This section also provides that after 2 years from the effective date of the act, no person may be appointed, promoted, or transferred to the new schedule unless he is a holder of a bachelor's degree signifying graduation from an accredited engineering, physical science, or mathematics curriculum, or is licensed or certified as an engineer-in-training or professional engineer under the engineering registration law of any State, territory, or the District of Columbia. This will serve to raise the standards for the new schedule and assure continued professional qualifications among individual engineers, physical scientists, and mathematicians placed in the professional engineering-scientific schedule.

SECTION 8—APPEALS

This section grants appeal rights to any employee for Civil Service Commission review of any action placing or refusing to place him in the new schedule, or the assignment of his position to a grade or per annum salary rate, in order to determine whether

such action has been taken in accordance with the act.

SECTION 9—SAVINGS CLAUSE

This section provides that all statutes, regulations, orders, standards, and procedures applicable generally to Federal employees will apply in like manner to employees placed in the professional engineering-scientific schedule unless they are either expressly, or by necessary implication, made inapplicable to such positions.

SECTION 10—EFFECTIVE DATE

This section provides for an effective date as of the first day of the first month after the month in which the act is approved.

National Choir Recognition Day

EXTENSION OF REMARKS
OF
HON. THADDEUS J. DULSKI
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. DULSKI. Mr. Speaker, I am today introducing a resolution which would designate the first Sunday of October in every year as National Choir Recognition Day.

Singing in the choir always has been in our country a recognized and highly approved form of musical self-expression. Until recent times, it has been almost the only one. Mass instrumental musical culture has begun to approach the ubiquity of choral music only within the past few decades. It is impossible to estimate the number of choirs with which this country is blessed—certainly one would guess that there is at least one in each village large enough to have a church or a synagogue, and the urban centers have hundreds, ranging in size and skill from the most meager to the most awesome. Schools such as the Westminster Choir College in Princeton, N.J., and many others, are completely devoted to the training of choir leaders. There must be tens of thousands of choirs in the United States—perhaps they might be numbered in six figures.

At first in church and synagogue, everybody sang. Except for the chanting of the cantor, music was congregational. Then, as a means of supporting and leading the congregation, instruments were introduced for accompaniment—as the Old Testament tells us—and some of the better singers of those particularly interested in music began to have extra practice sessions and to sit together in the place of meeting. Thus choirs came into existence and this, in essence, is the early history of the development of choirs in our country.

When the Pilgrim Fathers arrived on our shores in 1620, many of them were skilled in singing music, and when the Puritans landed in Massachusetts Bay some years later, the singing of psalms was one of the ordinances of their faith. Indeed, the first book printed on the soil of what is now the United States was one intended as a singing book, the so-called "Bay Psalm Book"—from the Massachusetts Bay Colony where it was intended to be used—of 1640. Although it contained no musical notation, there were included specific directions to the colonists who used it as to tunes they were to sing to the psalms, tunes which must have been familiar and beloved of the founders.

But as life was hard in the wilderness, there was little time for singing, and the skills of the fathers were lost by the songs. By the end of the 17th century, the ability to read music from the printed page had virtually disappeared, and the remembrance of the old tunes, passed down from generation to generation, had become dim. In fact, congregational singing had become so poor that the clergy, who had to listen to it weekly were impelled to do something about it. By the second decade of the 18th century, a reform based on teaching people to read music so that they could sing together in an orderly fashion was well underway.

The instrument in this reform was the singing school, a social institution which flourished in this country for considerably more than a century. From the singing schools, the first choirs—that is, organized groups of skilled singers sitting in a specified place—developed some decades before the Declaration of Independence. Although there was a certain amount of opposition to the development of choirs on the part of those who felt that the prerogatives of the congregation in praising the name of the Lord in song were being usurped, by the end of the 18th century choir singing was firmly established as a normal American musical pursuit, and choirs and singing schools began to proliferate rapidly.

The choir is and always has been peculiarly the musical home of the amateur, and because American singing schools—one of the earliest manifestations of the democratic philosophy in action on this side of the Atlantic—imparted vocal and choral skills to vast numbers of ordinary citizens, the early American musical tradition is basically a choral tradition. In our country it is a great tradition. Beginning with the establishment at Boston in 1815 of the Handel and Haydn Society, large choral organizations fully equivalent in quality to those developing in Europe began to appear, among them such representative groups as the New York Sacred Music Society, established in 1824; the Apollo Club of Chicago, established in 1872; the Oratorio Society of New York, established in 1873; the Bethlehem Bach Choir, established in 1900. There were countless others.

These groups represented the flower of the art of performance of choral music in America—they could not have been possible had there not been in existence a countless number of humble church choirs scattered throughout the length and breadth of our land. These we take too much for granted—they inculcated in our people a deep love for and understanding of choral music, and they provided the basic knowledge, skill, and enthusiasm without which the performances of the towering masterpieces by the great choral societies would have been impossible.

The choir and its singing members, in education for peace, in energizing for work, in liberating man's spirit from the immediate into the infinite, and in uniting worshipers into a spiritual brotherhood, has an endless mission. Petty triviality has no more place in music sung by the choir than does ostentatious virtuosity. Sincerity and directness are its essentials.

All these benefits and many more have accrued to us through the instrumentality of the choir, an institution with a long and honorable history in this country. Surely it is fitting that we as a Nation formally recognize the progressive role it has played in the development of our musical heritage.

To that end, I urge my colleagues to support this resolution which designates a National Choir Recognition Day and authorizes the President to issue annually a proclamation inviting the people of the United States to observe such day in churches and other suitable places with appropriate ceremonies and activities.

Liberalism's Responsibility

EXTENSION OF REMARKS
OF
HON. JOHN O. PASTORE
OF RHODE ISLAND
IN THE SENATE OF THE UNITED STATES
Wednesday, March 29, 1961

Mr. PASTORE. Mr. President, on Thursday, March 23, 1961, my colleague from Rhode Island addressed the National Civil Liberties Clearing House in Washington, D.C. The subject of his remarks was "Liberalism's Responsibility" and I ask unanimous consent that my colleague's remarks be printed in the CONGRESSIONAL RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

LIBERALISM'S RESPONSIBILITY

(Speech by Hon. CLAIBORNE PELL, of Rhode Island, before the National Civil Liberties Clearing House, March 23, 1961, Washington, D.C.)

Ladies and gentlemen and those interested in civil liberties—and I don't believe that these are mutually exclusive terms—I am indeed glad and honored to be here with you this evening. First, as a brandnew Senator, ranking 100th out of 100, I would like to briefly assure you of being a bona fide liberal. I have been arrested three times by Communist officials and three times by Fascist officials; a nice liberal balance.

The theme I would like to go over with you today is to show how illiberal we liberals can sometimes become. The maxim I want to underline this evening is a very old-fashioned one indeed: "What is sauce for the goose is sauce for the gander."

By this I mean we must be dedicated to our liberal traditions, even when such dedication would appear to go against our short-term interests, or, at first glance, produce results that go against our liberal grain.

At this point, we should examine the definition of a liberal. To my way of thinking, the best definition of a liberal is a person with an open mind—that is why there can be liberal Republicans as well as liberal Democrats. The success of the open mind,

which permits constitutional change without revolution was best shown in the past century by the triumph of the liberal tradition in Britain, which produced the great reform bills in that country.

The liberal tradition means that we must protect the rights of those who urge causes which we may abominate. The statement attributed to Voltaire, "I disapprove of what you say, but will defend to the death your right to say it," might well be our guide.

The long experience of mankind indicates that the restless groping thinker is as necessary to the growth of ideas, as is the honeybee to the pollination of flowers. Of course, every democratic society has its crackpots, its lunatic fringe, its subversives, most of whom make no impact whatsoever upon a civilization. The reason is that just as a better version of the truth will supersede the previously accepted, so the nonsensical will be discarded.

Truth crushed to earth will rise again; a lie or a false theory, though raised to the skies, will fall, in the end, of its own lack of susbtance.

Mr. Justice Holmes called the exchange of men's thoughts "the free market of ideas." It is the consecrated purpose of the first 10 amendments to preserve and protect the rules of fair trading in that market of fairplay. And in that course, not delude ourselves into believing that we are self-righteously dispensing the boon of a society so strong that can dispense small favors. A new world is upon us, with new frontiers which expand at the speed of electricity and spaceships. We shall have to stretch our minds, our senses, our spirits, and our hearts to encompass the new world forming. Our old concepts will need considerable review, and we will not further our effectiveness by precluding full consideration of every thesis, no matter how novel or painful. The absolute necessity for entertaining painful criticism has been recognized by even the most stable of institutions. St. Benedict, in discussing the methods of conducting a monastery, once declared, "If a pilgrim monk come and should reasonably, modestly, and charitably censure or remark upon any defect, let the abbot consider the matter precedently, lest perchance the Lord have sent him for this very end."

But, just as you can get upset with those you love—your parents, your spouse, or your children—so, too, I find myself disturbed when I find friends, calling themselves liberals, who show as closed a mind as those they criticize.

I believe that the very essence of the liberal way is to provide for its own continuous self-criticism. The liberal way reaches its peak, not as a recital of the status quo, but as a means of making conditions better. It means that we cannot benefit by our mistakes, unless they are identified and frankly discussed. Let us look at the truth, however painful it may be.

For instance, we liberals must and do oppose a man being denied any position of honor or trust on account of race, color, or creed. Neither, however, should a man be given preference for a particular office because of race, color, or creed. Public office of any kind should not be assigned on a de facto proportional representation based on race, color, or creed. I am not blind to the fact that such de facto political arrangements exist, but I believe that liberals, given their strong desire to see minority groups afforded equal opportunities, should not fall into the trap of urging that a person be given preference for a position because of his creed, color, or country of ancestral origin. We politicians are sometimes guilty in this respect when we put together, or even seek office on the theory of the "ethnic balanced ticket."

We have pointed, and justly, to the shocking abuses of segregation by law in Southern States. But can anyone doubt that economic segregation in effect at least as cruel exists in the Northern States? And how many liberals sign restrictive covenants when they buy a house?

The United States to a Negro, or even to a Jew, does not yet have the fullness of opportunity that it should. Just the other day, I noticed that our new Secretary of State, Dean Rusk, bought a house in Washington, and, in buying it, he refused to sign a covenant committing him when he sold it not to sell it to any non-Caucasian, i.e. a Jew, a Negro, or an oriental. Because our Secretary of State refused to sign this covenant, and was merely putting into his personal life our supposed beliefs, it made headline news around the country. What is even more significant is that the Supreme Court has ruled that these covenants are illegal and unconstitutional.

Actually, when Dean Rusk and I were working together in the Department of State some 15 years ago, I can recall that the only place where we could eat with our colleague, Dr. Ralph Bunche, was in the Union Station cafeteria. Even the official State Department cafeteria was segregated at that time.

So, while the United States seems full of opportunity to many of us, and to our children, it really does not seem to offer the same full open doors to all our citizens.

The very word "liberal" has become a bit tarnished. I know in my own campaign I sometimes found myself even leery of the word "liberal." In fact, I characterized myself as a forward-thinking Democrat. The reason for the lack of popularity of the term "liberal," an adjective that 20 or 30 years ago carried with it the highest connotation of fine, good thinking, is partly the acquisition of rigidity and the performance of illiberal acts by many of us liberals.

Some of the finest words in the English language are to be found in the definition of the word "liberal"—"large and noble way, generous, bounteous, openhanded, ample, free from restraint, not narrow or contracted in mind, broadminded."

In a discussion on philosophy, by its very nature, it must be personal. One's own experiences and environment mold and frame the individual. Therefore, I ask your indulgence tonight in talking from a very personal point of view.

I mentioned a moment ago my belief that no man should be given preference for public office by virtue of race, creed, or ancestral origin. Actually, I have vested interest against proportional representation on any such basis. I was a member of a minority in my State primary campaign, and many people thought because of this my chances of election were not too good. Yet this factor was scarcely mentioned, and the people of Rhode Island were kind enough to make me the first unendorsed candidate for a statewide office to win a primary in the history of our State. And, in the November general elections, they gave me the largest plurality in the history of our State. Why? It seems even stranger when you realize that earlier in the primary, my party leadership voted against me 30 to 1, the labor unions twice supported my opponent, and even highly respected polls portrayed me as being defeated in the primary by a margin of 4 to 1.

The answer, to my mind, lies in a bit of history and in our liberal tradition. The first settlement in my State of Rhode Island—Providence—was founded by Roger Williams in 1636 in the spirit of real religious tolerance. One of the first actions of the settlers of Providence was to provide for religious liberty and complete separation of church and state. In his most celebrated work, "The Bloody Tenent of Persecution," published in 1644, Roger Williams asserted that "God requirith not an uniformity of religion," and held that pagans, Catholics, and Jews had a natural right to religious liberty. During Roger Williams' presidency of the colony, Jews and Quakers were welcomed to Rhode Island. Rhode Islanders are proud to have the oldest Jewish synagogue in America located in my own home city of Newport.

But even the tolerance established in early Rhode Island on occasion was found lacking. Even then there was room for improvement, as it was not until February of 1783 that Roman Catholics were given political privileges, and Ann Hutchinson, having fled from Boston, was unable to stay on in Rhode Island and departed for Connecticut. Then, she continued to live and practice her tolerance until scalped by a local Siwanoy Indian sachem, called Wampage. And here, parenthetically, I must add that my own eldest daughter is called Wampage, for this very Wampage was my own direct forbear. And so, I guess I, too, am guilty and should hang my head in shame since this forbear of mine literally scalped the liberal tradition.

In any event, as I worked and fought in my political campaign, I came to realize how deeply ingrained was the liberal tradition in my State, real liberalism, not skindeep liberalism. All our children had been taught and had absorbed this liberalism in their schools, public or parochial. If my State had not been liberal-minded, or open-minded, I, as a member of a minority, as an inhabitant of that portion of the State which has not been represented on the ticket for many years, who was regarded by many political leaders as being as impossible, improbable, and implausible a candidate as came down the pike in many a year, would never have been elected. So, I guess, my own appreciation of and gratitude to the liberal tradition is more ingrained than that of most people. In this connection, during my own few months in the Senate, I find myself constantly examining my own liberal conscience.

There is the question of limiting debate in the United States Senate. At the moment, because of the urgent necessity of strong civil rights legislation, liberals are pushing for a majority cloture rule, whereby a bare majority of those present and voting can cut off debate.

From the long-term viewpoint, let us not lose sight of the fact that we liberals have used the filibuster a number of times to prevent hasty consideration of what they consider to be damaging legislation.

There was the case of the Vreeland-Aldrich currency law, 1908: It was hoped by the framers of this legislation that it would provide a more elastic currency and stabilize the values of many securities. Conservatives had been alarmed by the number of bankruptcies and other financial difficulties which had been experienced in 1907 and felt that measures must be taken to preserve business. The opponents of the plan considered it just another device by which the privileged few could tighten their control upon the country's capital and credit.

That towering liberal, Senator Robert M. La Follette, Sr., of Wisconsin, led a filibuster against the bill during which, on one occasion, he spoke continuously for more than 18 hours.

There was the resolution to admit New Mexico into the Union in 1911. Proposals had been made to admit both Arizona and New Mexico, but Arizona had been eliminated because of provisions in her proposed Constitution for popular initiative, referendum and recall; provisions which were opposed by many conservative Senators. Senator Robert L. Owen, of Oklahoma, who favored admission of both New Mexico and Arizona, filibustered against the New Mexico resolution for the purpose of persuading the majority to agree to include Arizona. His filibuster resulted in only partial victory.

It succeeded in killing all statehood legislation for the session.

There was the tidelands oil debate in 1953. After the Supreme Court had decided that certain submerged lands lying offshore belonged to the United States rather than the abutting States, proposals were made to confirm title to these lands in the States. Senator WAYNE MORSE, of Oregon, was one of the most tireless opponents of such proposals. Between April 1 and May 5, while the Senate debated the tidelands measures, Senator MORSE spoke often and long for a good cause, with one of his speeches setting a new record of 22 hours and 26 minutes. The measures were defeated.

I do not believe that any minority should have the right to indefinitely prevent the Senate from reaching a vote. However, it seems to me that there is danger also in terms of making sure that the minority has a right to be heard, if we permit a simple majority in the Senate to cut off debate, unless ample provision is made to not only permit full debate, but allow ample time for the alerting and marshaling of public opinion. Actually, I believe that the three-fifths compromise that will probably emerge is a pretty fair one.

The essence of fairplay is that the rules must work both ways. For that reason, I believe the time has come when we liberals and progressives must take counsel with ourselves. Frankly, to the extent we do not practice what we preach, we shall be deemed hypocrites; and to the extent that we seek laws to enforce upon others what we do not observe ourselves, we shall be deemed seekers, not of the rights for all, but of special privileges for ourselves.

For example, it is our position that financial institutions, as custodians of the Nation's savings, are to be held as fiduciaries of highest trust, and subject to regular report, inspection, and regulation by the Government. Can we possibly argue that such duty is lessened if the depository happens to be the funds of a labor union?

We have often deplored the voicelessness of the stockholder in the large corporations and the vested interest of management in its own perpetuation. But is it not true that in some unions the individual worker is nigh as voiceless as the stockholder in a large corporation?

Liberals, as persons dedicated to man's inalienable right to seek the truth, find political requirements abhorrent in the field of the performing arts. We condemned, and rightly so, attempts to prevent Paul Robeson from giving concerts.

However, liberals would do well not to forget the furor caused over the award of the Bollingen prize for poetry in 1948 to Ezra Pound. At that time, the liberals called for a congressional investigation of the Fellows of the Library of Congress in American Letters, who made the award. The "Fellows" included such people as Conrad Aiken, Archibald MacLeish, Robert Penn Warren, and William Carlos Williams. The award was also bitterly attacked by one of our leading liberal magazines, which, on the other hand, has consistently opposed the House Un-American Activities Committee.

Let us also not forget that in early 1949, representatives of the Nation's leading liberal veterans' organization, the American Veterans' Committee of which I am proud to be a member, picketed Carnegie Hall in New York against the proposed appearance of the brilliant German pianist Walter Gieseking.

I know all too well, my fellow liberals, that we are human. We are bound to make mistakes.

I am also aware that in my talk tonight I have only pointed out where liberals have failed. I cite these instances because I believe that liberals, as peoples who strive for open minds, must set the most rigorous standards for their conduct. What I am saying is that what is sauce for the goose is sauce for the gander.

Jesus Christ gave us something to think about when he said "Be ye doers of the word and not hearers only. For if any be a hearer of the word, and not a doer, he is like unto a man beholding his natural face in a glass. For he beholdeth himself, and goeth his way, and straightway forget what manner of man he was."

Plight of the Truckers—Alaska

EXTENSION OF REMARKS
OF
HON. RALPH J. RIVERS
OF ALASKA
IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. RIVERS of Alaska. Mr. Speaker, I believe my colleagues will be interested in the anomoly which exists with regard to Alaska in relation to the Federal Interstate Highway System. Although Alaska participates in the regular A–B–C system of primary, secondary and rural roads, it is not yet ready to build any extensive amount of four-lane highways so is not included in the Federal interstate highway construction program. Nevertheless, the people of Alaska are subjected to the tax on motor fuel and tires from which the revenue is derived to carry out said program. Thus, on its face, this situation indicates that Alaska should be exempted from that portion of the Federal tax on motor fuel and tires which is applied to the interstate highway construction program. A second look, however, makes clear that since all the proceeds of such tax flow into the highway trust fund from which both the regular A–B–C Federal aid program and the Interstate System are funded, there is no exact portion of the tax collected specifically for the Interstate System which can be translated into an ascertainable exemption for Alaskans. Furthermore, the trust fund first meets the needs of the A–B–C program and the Interstate System gets only what is left. Thus it appears that the constitutional requirement of uniformity in tax laws binds Alaskans to pay the full Federal tax on motor fuel and tires even though Alaska is not included in the interstate highway construction program. It is on this basis that I contend Alaska is building up an equity in a future equalization road program to enhance the equity it already possesses by virtue of its non-inclusion under the Federal aid highway program during all its years as an incorporated Territory up to 1956, which fact has resulted in many of its towns not being interconnected by means of roads.

May I now speak in behalf of the trucking industry in Alaska in regard to the President's proposal which calls for retaining the present Federal gas tax of 4 cents a gallon and greatly increasing the tax on diesel fuel, trucks over 26,000 pounds, and highway tires, inner tubes, and tread rubber.

Notwithstanding the fact that the Alaska Carriers Association, Inc., is made up of member firms operating in a State without interstate expressways and without prospects of getting same, this association, in an official release which I received recently, expresses a broad national view in the following language:

> This association, representing those trucking firms and associate members (shown on its membership list) is completely in favor of the earliest possible completion of the Interstate Highway System and thinks that it should be accomplished with all practical speed.

However, complete opposition is expressed by the association to the proposed increase on diesel fuel, large trucks and tires, in the following language:

> Every member of this association is utterly and completely opposed to any further increases in taxes leveled solely at the trucking industry. The industry is not financially able to bear such a burden at this time and feels strongly that it would definitely not be in the best interest of the Nation to impose such a staggering burden on an industry that operates on such a marginal profit level but which nevertheless provides direct employment to millions of people. To impose this burden, at least at this time, would have disastrous results on the economy of the individual trucking companies and would very seriously endanger their ability to continue operations.
>
> To cease their operations to any extent would decrease employment in direct ratio. To decrease employment would eliminate or decrease the trucking industry's ability to provide the transportation service that is an absolute necessity to our way of life, our national defense, and which is the one thing that ties our Nation together and makes it strong. The trucking industry must prosper and grow stronger if the best interests of the Nation are best served. This cannot be done if the Federal Government takes from it more than a reasonable amount of its lifeblood.
>
> The industry has never been lacking in its support of our Government and the functions and performance of necessary services to our Government. It does hold with the common feeling, however, that equitable treatment should be accorded all of the people—including the trucking industry. Therefore, it is our feeling that any further increases in taxes that are necessary to support the interstate highway construction program should be equitably spread across the broadest base possible. Let every user of the highways pay the small amount, according to amount of usage, necessary to obtain the needed funds.
>
> The President has indicated that an additional one-half cent per gallon, assessed against all users, would provide the increased amount needed. It is suggested that this or some other equitable and fair method be used.
>
> The trucking industry in Alaska is even more hard pressed because of the Federal Government-owned Alaska Railroad competition. It operates on a so-called out-of-revenues basis, but its expenses do not include the payment of taxes on the items discussed herein, or on its properties or revenues to either the Federal Government or State government. This is wrong. It is not even regulated as to ratemaking by the Federal Government or State. This is wrong also, and lessens the ability of the Alaska trucking industry to pay even the present heavy taxes.
>
> All, to whom this letter is addressed, are respectfully urged to exert their every effort to insure that the proposed new taxes not be enacted and, instead, find a more fair and

just method of obtaining and/or allocating the funds necessary to move ahead with the interstate highway program properly.

Mr. Speaker, in addition to the handicap entailed in competing with the Alaska Railroad, which, under operation of the Department of the Interior, is not, as are the truckers, under the ratemaking and regulatory power of the ICC, the truckers must traverse rugged terrain on narrow roads in weather which in the winter is severe and very hard on equipment, entailing high costs in regard to maintenance and replacement of equipment. Thus, the need for a small margin of profit and indeed survival is a constant struggle. Accordingly, I believe that the proposed high tax on truck fuel, large trucks and tires would hit the members of the Alaska Carriers Association, Inc., in Alaska with greater impact than anywhere under the American flag, and I plead their cause, as most effectively stated in their own words.

Galindez Will Be Vindicated

EXTENSION OF REMARKS

OF

HON. WILLIAM FITTS RYAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. RYAN. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following address which I delivered on Saturday evening, March 18, at the Columbia University Club in New York City at a dinner commemorating the fifth anniversary of the disappearance of Columbia University Scholar Jesus de Galindez. The dinner was sponsored by the Inter-American Association for Democracy and Freedom.

My address follows:

GALINDEZ WILL BE VINDICATED

Five years ago last Sunday Jesus de Galindez vanished from the heart of New York City. Some of you knew him, perhaps as a young man in Vasconia, or later here in the New World where he continued to fight for the principles of freedom and human dignity.

I did not have the pleasure of knowing Dr. Galindez. But as a graduate of Columbia Law School and as Democratic leader of the seventh assembly district, which encompasses Columbia University where Dr. Galindez studied and taught, I have had a deep interest in the matter since the first chapters of this horrid international crime began to unfold.

THE TRAIL LED TO TRUJILLO

I profoundly regret that I was not a Member of Congress 5 years ago. Galindez deserved the most ardent pursuit of his murderers by all legitimate means. A mountain of evidence indicated Dominican complicity in the disappearance of Galindez. The Department of Justice followed the trail straight to Trujillo's door.

Trujillo frustrated U.S. legal procedures by refusing to drop the mantle of diplomatic immunity from General Espaillat, the Dominican consul-general in New York, who was seen at the airport when the abduction plane was rented. But alternate procedures were available. Congress, through its investigative powers, should have brought to public attention the evil nature of the Caribbean dictatorship that dared to carry out its terroristic activities within the United States. Furthermore, the U.S. Government could have carried its charges against Trujillo to the Organization of American States.

I am aware that the Inter-American Association for Democracy and Freedom has done much to combat Trujillo's sinister machinations in the hemisphere. Your constant efforts to throw the spotlight of truth on the Caribbean situation have helped considerably to neutralize Trujillo's venal propaganda. You can take much satisfaction in the fact that the millions of dollars Trujillo spent for whitewash have been largely ineffective.

GALINDEZ IS NOT FORGOTTEN

This gathering tonight is proof that Galindez is not forgotten, and that there are those who will not rest until the perpetrators of his dastardly kidnaping and murder are brought to the bar of public condemnation.

This year, the fifth anniversary of Galindez's disappearance, there are hopeful signs that his unwavering courage and devotion to justice were not in vain. As Dr. Galindez repeatedly urged, the United States has abandoned its disastrous and farcical policy of regarding Trujillo as a reliable and honorable ally in the defense of Western civilization. Gone, too, is the old excuse that denouncing Trujillo's outrages would constitute "intervention." The United States has realized at last that sweeping Trujillo's brutal behavior under the rug weakens the moral foundations of hemispheric unity and emboldens the dictator to commit more repugnant crimes.

How pleased Dr. Galindez would have been to hear Douglas Dillon, when Under Secretary of State, tell the House Agriculture Committee that the generalissimo is "a tyrant, a torturer, and a murderer."

FLAGRANT VIOLATIONS

The change in policy is clearly reflected in the inter-American community. In May 1960 the Inter-American Peace Committee—headed by the U.S. Ambassador to the Organization of American States—made an unprecedented investigation of the violation of human rights in the Dominican Republic. The Peace Committee delivered a severe condemnation of the Dominican Government for its "flagrant violation of human rights." The verdict came as no surprise to those familiar with brutal conditions in Trujillo's fiefdom. But, coming as it did from an unimpeachable international organization, Trujillo's powerful apologists were dealt a heavy blow.

The Peace Committee went further. Just as Galindez had argued previously, the committee declared that Dominican violations of human rights aggravated tensions in the Caribbean area.

A PLOT THAT BACKFIRED

Trujillo fought back with his usual terroristic methods. Holding President Betancourt responsible for the stiffening inter-American attitude toward his regime, Trujillo plotted with and aided enemies of the democratically-elected Venezuelan Government. He personally supervised a mission sent to Caracas to assassinate President Betancourt. The plot, as diabolic as the Galindez kidnaping backfired. As you know, Betancourt miraculously lived through the explosion that turned his car into an inferno.

Again the Organization of American States moved. For the first time in history, the inter-American organization invoked collective sanctions against a member state. The Foreign Minister, meeting at San José last August, agreed to break relations with the Dominican Republic, embargo all armaments shipments to the country, and to consider the suspension of trade in other articles. Subsequently, the OAS extended the embargo to include petroleum, petroleum products, trucks, and truck parts.

Trujillo's mask of respectability finally had been ripped off. No longer can he masquerade as a stanch Catholic, an ardent anti-Communist, a great humanitarian. He stands naked in the public eye: "a tyrant, a torturer, and a murderer."

THE "BENEFACTOR"

Take, for instance, Trujillo's pose as a good Catholic. The pages of the CONGRESSIONAL RECORD are full of praise for Trujillo, the Catholic benefactor. As a religious man, observers could be expected to ask, how could Trujillo be guilty of the savage excesses of which he is accused? Trujillo apologists are going to have a hard time peddling that line in the future.

Ever since the roundup and sadistic treatment of scores of Dominicans from good families suspected of plotting against the generalissimo, the church has spoken out. The first step was a pastoral letter of January 1960, in which all six Dominican bishops called clearly for "freedom of conscience, press and assembly," for a climate of liberty, and for an end to "anonymous denunciations." Since then, Trujillo has made war on the church.

INSULTS BY RADIO

Trujillo's Radio Caribe launches a daily, virulent assault, calling priests "psychotics, perverts, parasites." The Papal Nuncio, Archbishop Lino Zanini, has had his life threatened, and the Minister of Justice and Worship called him "an international provocateur."

One month ago Bishop Reilly of San Juan de la Maguana was cut off the air during a sermon when he said that reports in the government-controlled press and radio of the country are untrustworthy. Trujillo's agents constantly intimidate Boston-born Bishop Reilly.

The Bureau of Investigation of the National Catholic Welfare Conference reports that Trujillo's stepped-up antichurch activities include the expulsion of 150 Sisters in charge of government hospitals and charitable institutions, and about 50 priests; the closing of 3 Catholic schools which have had government subsidies; the promulgation of a law to eliminate all religious instruction for Catholic children in primary and secondary schools.

Meanwhile, Trujillo, the supreme cynic, presses his long campaign to have the church accord him the title of "Benefactor of the Church."

A SUDDEN SWITCH

Trujillo's pose as a firm friend of the United States in the cold war also has crumbled. In the time it takes to snap a light switch, Trujillo reversed his position a full 180 degrees.

First, he put through his docile Congress a constitutional amendment legalizing the Communist Party. Then his news media began to take a new tack. Radio Caribe, the dictator's powerful Caribbean mouthpiece, blasts a constant diatribe against the United States.

Some samples: "Sowing disunity is the policy being pursued by the North American imperialists against the countries of Latin America"; "General Eisenhower is waging a war against Latin America on behalf of the monopolistic interests"; "the most inveterate enemies of Dominicanism—the priests, those traitors and vagabonds, and the Yankee imperialists."

PRAISE FOR CASTRO

We know, too, that last August the Generalissimo sent emissaries to Europe for a series of secret meetings with Iron Curtain country leaders. Trujillo also switched gears on his opposition to Castro. It is reported that Johnny Abbes, a former secret police chief who is violently anti-American, and

General Espaillat, who figures so prominently in arranging the kidnaping of Galindez—attended a secret meeting in Cuba. There they concocted a nonaggression pact between the two Caribbean dictators. Since then, Trujillo's news media have only praise for Castro.

While the figurehead President of the Dominican Republic occasionally makes sounds along Trujillo's old line of strong ties with the Western democracies, the real power rests with the gang of hotbloods, including Abbes, Espaillat and Ramfis Trujillo, who passionately hate the United States. And let no one doubt, it is the generalissimo himself who has given them the go-ahead.

TRUJILLO EXPOSED

Under these circumstances, anyone who continues to extol Trujillo as "our great and good friend and ally" and as "a bulwark against communism" is ludicrous.

Trujillo at last has been publicly exposed as the menace Galindez knew him to be. Like a leper, he is quarantined in the hemisphere. But like the calculating caudillo he has been for over three decades, he still sits at the seat of power.

The OAS boycott has been largely ineffectual in bringing Trujillo to his knees. He can buy oil from the Near East, trucks and spare parts from branch plants in Europe.

The embargo has intensified a recession already underway because of falling commodity prices and large expenditures for arms. The economy is at a standstill. The Treasury is out of foreign exchange. Public works expenditures have been cut to the bone, throwing thousands out of work. Fearful of political upheaval, private investment has ground to a halt.

TRUJILLO TAKES THE MONEY

Trujillo, however, simply cinches in his people's belt while looting the Treasury to make deposits to his personal accounts in Canada and Europe.

Meanwhile, Trujillo's principal income earners, sugar and coffee, are unaffected by the sanctions. Some people contend that cutting off purchases of sugar from the Dominican Republic will hasten the demise of the dictatorship. Perhaps. But it is doubtful that even this slap at Trujillo, who owns 65 percent of Dominican sugar production, can push him from his throne. He can still sell on the world market.

I do believe, however, that the United States should not make it any easier for Trujillo by cutting him in on the extra quotas which results from the cutoff of Cuban sugar from the U.S. market.

Last year Secretary of State Herter pleaded in vain with Congress for authority to bypass the Dominican Republic in purchasing the extra sugar needed to fulfill Cubas share of the U.S. market. The Eisenhower administration wisely canceled a special, 2-cents a pound premium—the only authority the administration had to reduce some of the windfall benefit showered upon the Dominican Republic, since Congress had not acted.

TIME FOR CONGRESS TO ACT

Last month President Kennedy likewise asked Congress for discretionary power to purchase the amount of the Dominican Republics windfall sugar from other suppliers. I am hopeful that Congress will act this time, and I suggest that all of you express your views on this matter to your Congressmen.

Meanwhile, mere punitive action is not enough. Revulsion against Trujillo's criminal despotism must not blind us to the problem of what comes after his fall. Will Ramfis and his henchmen, schooled in the generalissimo's savage and totalitarian methods, seize control? Will Communists move in to steal power from sincere patriots whose inexperience in representative government makes them easy prey for trained agents?

Trujillo, Jr., or any of his ilk, spell a continuation of the brutality and oppression which have infected the area during the generalissimo's reign. A Communist takeover would exchange a home-grown tyrant for one manipulated by Moscow and Peking.

ENEMIES ON THE LEFT AND RIGHT

The problem extends beyond the borders of the Dominican Republic. The dedicated men throughout the hemisphere who are struggling to make representative democracy a reality in their countries have much to fear from either of these possibilities. We have seen how Trujillo's interventionist tactics can threaten the security of a neighboring country. We are learning, now, to what extent Communist agents will go in the hemisphere to impede or wreck reforms initiated by democratic regimes.

The best defense of freedom in the Western Hemisphere, in my view, is the uniting of the democratic forces against their common enemies of the right and of the left. As Professor Galindez himself wrote in his "Era of Trujillo":

"The only truly effective way to confront communism is through a positive policy which can solve social problems with justice and freedom, with that freedom which both the Communist regimes and the Latin American dictatorships lack equally."

Jesus de Galindez did not sacrifice his life in vain. His voice and his pen were brutally silenced, but today his ideas permeate our hemisphere. Earlier this week, 5 years almost to the day since Galindez disappeared, the President of the United States delivered a stirring speech which mirrors Galindez' credo.

Said President Kennedy last Monday: "Our unfilled task is to demonstrate to the entire world that man's unsatisfied aspiration for economic progress and social justice can best be achieved by freemen working within a framework of democratic institutions. Our alliance for progress is an alliance of free governments—and it must work to eliminate tyranny from a hemisphere in which it has no rightful place. Therefore let us express our special friendship to the people of Cuba and the Dominican Republic—and hope that they will soon rejoin the society of freemen, uniting with us in our common effort."

President Kennedy goes on to pledge U.S. help in the battle against poverty, ignorance, hunger, and disease. His message is a masterful blueprint for inter-American cooperation. It now remains for the American republics to take concrete action along the path outlined by the President.

The United States alone can accomplish little in Latin America. It is the Latin Americans themselves who must remove the obstacles in their social and economic systems which hinder development.

UNITE THE REFORM LEADERS

There is one major thing the United States can do. We can act as a catalyst. We can unite those liberal reform leaders in the hemisphere who have demonstrated a willingness to proceed in orderly fashion with the difficult task of reconstructing obsolete societies. We should build a democratic fraternity, united in its determination to resist tyranny and united in its resolve to raise the living conditions of the mass of people.

Those leaders clearly devoted to freedom and reform should be shamelessly favored. They should have easy access to our highest officials and speedy action on their requests for assistance.

AN END TO DICTATORSHIP

The social ferment in Latin America today cannot be stifled. Its energies can, indeed must, be channeled into constructive purposes. The fraternity of builders will be able to inspire the spark of hope for a better future around which the restless youth of the continent can rally.

This meeting tonight is a reminder that there are many who yearn for an end to totalitarianism. Multiply our numbers by those in cities, towns and villages throughout the hemisphere and you will find a considerable force. We must each, in our own way, continue to struggle against the forces of tyranny. In paying our respects to Dr. Jesus Galindez, a gallant fighter for the rights of man, let us renew our own determination to work for the realization of Galindez' goal: a free and prosperous America.

An Address by Hon. Elmer J. Holland, of Pennsylvania, Before the Graduating Class of the McKees Rocks High School on June 7, 1955

EXTENSION OF REMARKS
OF
HON. JOHN H. DENT
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES
Wednesday, March 29, 1961

Mr. DENT. Mr. Speaker, as a member of the Labor and Education Committee, I have been privileged to hear our colleague, the Honorable ELMER J. HOLLAND, of Pennsylvania, as the presiding chairman on a subcommittee studying automation.

Back in June 1955, when the Congressman was still serving in the State senate of our great State he addressed a graduating class in McKees Rocks, Pa.

His prophetic words and grasp of our present problems of education, automation, unemployment, and economic decline shows that even at that early date he sensed the coming crisis in our body politic.

All too often we place too little attention to what is said and too much on the person saying it.

I served many years with our colleague, Congressman HOLLAND, in both the House and the Senate of Pennsylvania. I am privileged to serve with him here in Congress.

Congressman HOLLAND's many years of experience as a legislator, industrial leader, business executive, and a union representative qualifies him to head the serious and timely study of automation and its impact upon unemployment.

The American Nation today is in the same position as a tourist driving on a strange road without a map right after a tornado.

He is on his way, he can drive a car, he knows where he wants to go, but needs a guide.

In this day of our history we need a guide to direct our great and limitless production facilities, our fruitful farms and our abundant manpower on a route that will lead to ever-increasing human benefits and a safe arrival to our eventual destination, a better way of life.

Men like ELMER HOLLAND, who devote their time and talents to charter a safe and sane course, pointing out the rocks and shoals, give all of us added incentive and encouragement as we pilot and crew the ship of state.

Mr. Speaker, I believe the following address given years ago by Congressman HOLLAND is as timely and apropos today as it was then:

ADDRESS GIVEN BY HON. ELMER J. HOLLAND, 38TH DISTRICT, PENNSYLVANIA, BEFORE THE GRADUATING CLASS OF THE McKEES ROCKS HIGH SCHOOL, JUNE 7, 1955

I remember the speaker at my high school graduation saying these words: "You are no longer girls and boys, but ladies and gentlemen. You have responsibilities. How you assume these responsibilities will decide—not only your future—but the future of the world."

This is truer today than then, as the world has grown smaller in judging distances due to advanced aircraft.

Do you realize that in your short 4 years of high school you have seen distance fade away? The jetplane has brought far distant parts of the world, that took weeks to reach, only hours to reach. And, with the coming of the atomic planes, who knows what speed of travel will be attained? Today we can eat breakfast in London or Paris and lunch in New York City.

Your generation shall write a chapter of history never equaled by any other chapter of history since the beginning of the world.

This chapter can be known as the great advancement of man in social and economic progress, or it can be known as the enslavement of man. Two hundred years ago our Western World experienced the beginnings of a movement that changed the lives of all mankind. It took men off the fields and out of small shops, it put them—for the first time—into factory life. It gave us mass production, and, through mass production, it gave us the first civilization in the history of the world in which luxury was not confined to just a few; it gave us, as well, a sense of hurry, of time, which is still unknown in countries that are "preindustrial"; it changed agricultural societies into mighty industrial nations; it altered the face of our own country, and it produced wealth, the like of which the world had never seen before.

We were taught in school, as you probably were, to call this movement the "industrial revolution." But today we find that name being changed. Today, we call it the first industrial revolution. For, suddenly, we find that our whole Nation is aware of a new movement—a new force—which holds promise of great social changes and increased economic benefits for all of us.

We are told that a new industrial revolution is in the making; in fact, it has already begun.

This second industrial revolution is called by the name "automation." This new word has cropped up in a changing America. It has been developed so recently that even the word is in few dictionaries. It is unfamiliar to many opinion makers. It is a mystery to the man in the street, unless it has cost him his job. I think that there is a good deal more confusion surrounding the word than some of us would like to admit. Perhaps the confusion begins in another word—in the much overused word—"revolution."

There seems to be a political revolution somewhere in the world at least once a year. And—every time a manufacturer puts a new girdle on the market, he calls it revolutionary. I even saw a sign in a New York bakery recently that read "Revolutionary New Old-Fashioned Doughnuts." But when we use the word "revolution" to describe the new movement of automation—we, of course, do not mean it in the sense of a political upheaval or of something that is merely new, gadgety or startling.

We mean it in the broadest sense of the word—in the sense in which we speak of the industrial revolution.

When we look back on that great upheaval 220 years ago—what was it that gave to it the name industrial revolution? Was it just the wonderful machines that lightened man's toil?

No; I think it was much more than this. I do not think it was used because of the riots that accompanied the introduction of some of the machines used at that time. Nor do I think it was used to describe the speed with which these changes took place. I believe it was used because the industrial revolution was revolutionary in the broadest sense of the word. It created a whole new environment for mankind.

The industrial revolution gave history more than just the steam engine, the cotton gin, the railway, and the power loom. It gave society—civilization—a whole new tempo; a whole new way of life.

As for the word "automation" I find it very difficult to define. Just what is "automation"? To some automation means nothing more than mechanization. It is a label that is applied to anything automatic—or even semiautomatic. To others it conveys a sense of robots, of machines that think and will eventually take over all of man's functions, to still others it means the answer for all our troubles by securing the 7-day weekend.

The Wall Street Journal has defined automation as: "Doing a job by machine with the minimum of human assistance. It implies also the use of electronic controls to automatically schedule and guide the production process".

It is, in simple terms, the highest stage of development in a completely automatic factory—where machines, untouched by human hands, can turn out a product untouched by human hands. This, then, is the beginning of an era when machines—not men—run other machines. This is the beginning of the second industrial revolution. The first one replaced man's muscles with machines. The second one is replacing man's judgment with machines.

Specifically, we are entering an age when a machine can dig a hole, measure it, decide the hole is wrong and correct its own mistake.

Output during the machine age increased productivity.

This came about as the machine took over jobs that man was doing or helped to do them faster—the conveyor belt, or a fork lift truck moved merchandise that a man used to push or carry—a pneumatic drill replaced the pick.

Through the years we have lost track of the men who were displaced by machines. They were absorbed by the expanding economy and shared heavily in the increased purchasing power as well as with shorter working hours.

This does not mean that all displaced workers shared well as there were many cases of bitter hardships when the conversions took place.

Today, we are entering a new era. One that dwarfs the past rate of increased productivity.

In the long run we will be bound to enjoy shorter hours and higher living standards, but in this changing period of automation, there will be many displacements which we hope will be temporary but which will cause much suffering.

Just to give you some examples of automation as it now operates—as of today: In a radio plant in Chicago, 2 men assemble 1,000 radios a day. It took 200 men to do this before automation. In an electrical equipment company, 90,000 light bulbs per hour are produced with 230 employees. Before automation they used 75,000 workers.

Utility and insurance company officials have stated that electronic brains, now available, will replace over 200 clerks with just 1 clerk on their bookkeeping staffs.

The Admiral Corp., with equipment it calls robot 1, can now assemble half a TV receiver chassis in a matter of seconds.

It is estimated that over 900,000 men in coal and steel have been displaced by automation. This is the dark side of automation. The benefits from the changes will be enormous eventually.

We can look forward to a day of astonishing living standards achieved by nominal working hours. But the penalties in the short run threaten to be mass displacement, as man gives way to automation.

What are these robots that can do the work of a man's mind? Basically, they are electronic brains that run on the principle of "feedback" or self-regulation. After they are set, or taped, they can regulate a producing machine.

The familiar household thermostat gives some idea of how they work. Once it is set to a certain temperature, it measures the temperature in the surrounding room and regulates the furnace so that the desired degree of heat can be achieved.

Today's machines are the peacetime results of the basic research and development that came about during the war as part of the atomic and guided missiles program.

We must remember that revolutions, such as we are now going through, never go backward.

Progress, and man's inventive genius, must be encouraged, but in this great process of automation man's dignity must not be lowered to that of a robot.

If all these improvements can be made for the betterment of man—and I believe they can—they will be a blessing. But if greed of money is to be made a standard, then they can be a curse.

It would, of course, be foolish to contend that automation is not without growing pains.

For any of us to minimize the widespread social and economic effects, that automation is sure to bring, would be to close our eyes to a fact that is already part of everyday life.

But I would like to emphasize that no one, today, is in a position to do more than speculate on the nature and extent of these social and economic effects—for no one has yet made the detailed analysis that is necessary for their true understanding.

While it is obvious that, in the long run, automation will be of tremendous benefit to all of us—it is the short run that worries most of us.

We should begin our planning and preparation immediately.

All parties—unions, management and Government—recognize they have a common interest in the successful integration of automation into our society. No one wants to see increased unemployment. All stand to gain by automation as long as we stand together.

Education is our primary need. We must learn that automation is something good and we must learn to use it—not fear it. Men, whose jobs may someday be replaced by machines, should be encouraged to begin their training in the newer skills which automation creates.

You younger people—with all of this before you—should further your education along the lines that will prepare you to take your rightful places in the development of this new discovery. You can be on the ground floor—so to speak—and grow with the industry.

Automatic factories will not be workless factories. There will be the need for more and more technicians and highly skilled maintenance men. We are already woefully short of personnel in this regard. The statisticians say that we need some 25,000 more engineers and 70,000 more technicians each year than we are now training.

Automation holds no threat to our economy. By giving us increased productivity—it promises to invigorate our economy.

I think it fair to say that automation offers as great a challenge—and reward—as any which we have ever known.

For the first time in history, technological progress—unleashed by the dynamic incentive system—is beginning to give people what they want.

All over the world, people are restlessly, grimly searching for a way of life that will give them what they want—and more and more of what they want.

Even we favored and fortunate Americans want more—more security, more independence, more leisure, more freedom from drudgery, more and better homes and schools and communities. There's just no limit to our appetite for more.

By a happy combination of circumstances, we Americans have in our hands a magic key of priceless value. We Americans—the keepers of the key—must learn to know and appreciate the value of the thing we have. We must use it to help open up—for all mankind—ever greater areas of progress and hope.

You who are starting out have a great responsibility as well as a great opportunity. You are in a social dynamic changing world. You must find out what makes the world tick.

The great productivity, achieved by automation, must be balanced by a great consumers' buying power.

Keeping a "status quo" in a country—and not sharing the gains with the workers of the country—will cause injustices, poverty and hunger. We all know that the road to communism is traveled through the wrinkles of an empty stomach.

Are these machines good or bad? Are they to be geared to unlimited production for the unlimited needs—of all the people? Or, are they to be geared for the benefits of a few selfish people, whose greed of profit shall dig our economic grave?

You are the ones who must answer these questions because it is your world, and you shall be running that world. Your generation shall decide whether or not we shall have peace, freedom, and social security or poverty, hunger, and desperation.

You are well prepared—coming from the community in which you live—where you are acquainted with the social and economic ills that your fathers lived through in the years gone by.

You now have your chance to build a better America.

Communism can be answered in only one way: that answer is that America can solve the problem of proving that—without taking away freedom, without taking away our liberty, and permitting the worker to share in the profits of his company—America can prosper and can prove to the world that we can produce for the joy of living.

I know that everyone of you are prepared and determined that your generation can accomplish this as a fact.

May God give you the wisdom and the courage to carry on.

The Choice We Face

EXTENSION OF REMARKS
OF

HON. CHARLES S. JOELSON

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, March 29, 1961

Mr. JOELSON. Mr. Speaker, a storm of controversy is fiercely raging in Washington and throughout our land between those who hurl the label "liberal" or "conservative" as an epithet against their ideological opponents. It would be well, therefore, for us to reexamine these terms to learn what, if anything, they mean and to determine whether the so-called liberal or conservative course will best serve our national interest.

The question is not merely which path will lead us to prosperity. The stakes are greater than prosperity. The stakes are survival itself. The collegiate debate as to whether we can best be prosperous via Franklin D. Roosevelt or Calvin Coolidge is so limited as to be outmoded within the frame of reference of the 1960's. The question is which path will enable us to win the battle of democracy against communism for the minds of men. For unless we win that conflict, our survival as a free Nation is impossible.

Traditionally, the liberal has been regarded as the person who would, by experimentation and innovation, change basic patterns and structures. The conservative, on the other hand, has been looked upon as the one who would preserve and maintain these patterns and structures. It may well be, however, that if the conservative were to be successful in 1961, our way of life would become radically changed by 1970. Conversely, it may be the liberal who will ultimately be responsible for the conservation and continuation of much of our fabric of Government as we now know it.

In the struggle for the minds and the loyalties of mankind both at home and throughout the world, only that doctrine which can reasonably bring the hope and expectation of improvement in the economic and social status of the vast number of the have-nots can prevail. Improvement, of course, means change. Thus, the conservative may unwittingly be the radical because by his desire to change little, he may forfeit much by a loss of the competition for the fealty and commitment of the uncommitted peoples of the world. The liberal may truly be the one who "conserves" because by his desire to change much, he may forfeit less.

Let us first consider whether the liberal or conservative approach to our domestic problems will best serve to stave off the onslaught of the Communists, not only at home where they are presently weak, but also abroad where they strongly stalk. In the field of domestic civil rights, it is not an exaggeration to state that no single factor is greater in turning the people of Africa and Asia against us than our unfortunate refusal to act to insure social justice for our Negro citizens in the United States.

I happen to regard the guarantee of civil rights to all Americans to be a moral obligation of all Americans. However, even if we are to disregard the moral issue involved, do we dare to overlook the political impact of the civil rights issue on the world stage? Can we expect to gain the friendship of the millions of nonwhites who make up the majority of the world's population so long as the opponents of civil rights for all Americans refuse to relinquish their prejudice in the national interest?

We sparked a revolution on our shores in 1776 by the electric declaration that taxation without representation is tyranny. Yet two centuries later, a sizable segment of American political thought would tax our Negro citizens while at the same time denying them the right to vote. Indeed these "conservators" would even ask, and have asked, American Negroes to fight our country's wars and shed their blood to protect a political system in which they are refused a voice. We delude ourselves if we believe that the rest of the world is blind to this cruel inconsistency, and that the Communists are not making political hay out of it.

In the field of social legislation generally, the liberal approach is and has proven to be the best answer to and protection against communism. The Communist movement was never stronger in the United States than in the early 1930's when we were floundering in a heartless depression during which the unemployed, the homeless, the ill, and the aged felt that their Government simply did not care. It was not until Franklin D. Roosevelt began to remember "the forgotten man" with broad social programs such as the WPA, unemployment compensation, social security, fair labor standards, and housing that the rising tide of homegrown communism in America was stemmed.

Yet in spite of this lesson of recent history, a strong body of conservative opinion in our country continues to revile Franklin D. Roosevelt, and to oppose the initiation of new social programs and the expansion of existing social programs championed by John F. Kennedy as the path for the 1960's. Although it is almost axiomatic that the Communist virus thrives on despair and want, the conservative spokesmen oppose programs designed to alleviate these twin menaces. These political physicians to the body politic eschew the preventive medicine which would eliminate the germ of communism by positive programs, preferring to snipe only at the symptoms.

We hear it argued, however, that if we adopt and expand these broad social programs, the result is not to conserve our basic way of life, but to install a system alien to our fundamental concept of America. Such an argument cannot sustain analysis. The thing that is really fundamental about democracy is freedom. Freedom is essentially what democracy is all about. It is guaranteed by the Bill of Rights of our Constitution.

Who would argue that the vast social programs enacted since 1932 have deprived us of the really basic freedoms safeguarded by the Bill of Rights? Freedom of religion in America is unabridged. Freedom of speech, freedom of the press, and freedom of assemblage are all happily a part of our daily existence. They are not threatened. They would indeed be threatened and snuffed out under the very communistic movement which has been rendered weak and impotent in the United States by the

social legislation opposed by the conservatives. Furthermore, if the rest of the world can be made to see that the people in our country are decently housed, are decently treated socially, and are generally "cared about" by their Government, we shall have made a giant step in the contest for the minds of the uncommitted millions on our planet.

There are those Americans who say that these great social programs are too costly financially. However, if it is true that these programs have rendered communism weak at home, and may through propaganda combat the appeal of communism abroad, they are worth their cost a thousandfold. One never hears the argument that we should abandon the search for more explosive bombs or more far-probing missiles because we cannot "afford" them. There are some things we must afford. First among them is our democratic free system of government.

Turning to the problem as to the approach to follow on the international level, we have only to consider communistic propaganda techniques in order to arrive at our best course. The Communists have not changed their propaganda tune since Karl Marx wrote his Manifesto in 1848. Exhorting the workers of the world to arise, he told them they had nothing to lose but their chains. To the starving and tattered of Asia and Africa today, this exhortation can be as effective as it was to the Russian masses in 1917 unless the free nations of the world come up with something more positive of their own.

The bewildered and hungry peasant of Asia and Africa can be wooed and perhaps won by the blandishments of the siren songs from Moscow and Peiping promising him his acre of land. Without possessions and bereft of human dignity itself, he has, in fact, nothing to lose. And what have we offered him for the future? Which of his local leaders have we supported to lead him toward tomorrow?

Although sending him aid for the present, we have recommended to him the status quo of conservatism for the future. While the Communists hold out to him the hope of the acre of land, we tell him of the blessings of democracy, forgetting that a man must first be fed and clothed and housed before the aspiration for freedom can be strong within him.

We have also by our essentially conservative approach given over by default to the Communists those surging movements of protest and revolt which will not be denied, and which have caught the imagination and support of many of the people of the world. Unmindful that the United States itself burst forth through revolution in the 18th century, we have tended to assume that revolution is always the product of the Communists in the 20th century.

Our Nation, which still remembers with gratitude the help given the struggling American Revolution by Kosciusko and Pulaski from Poland and by Lafayette from France, has discouraged any such aid or comfort to foreign vehicles of protest by Americans in our modern day. Yet there is real doubt whether all these movements of protest and rebellion which have shaken the last several decades were Communist-inspired in their origins. There is no doubt, however, that through the indifference and with the hostility of the free world to these eruptions, these movements have turned out to be Communist-dominated in their conclusions.

The conservative approach of the status quo has led us to a total lack of communication with those voices of protest which now lead, or which ultimately will lead, to their people. Into this vacuum moved the Communists who, like nature, abhor a vacuum.

It is not unusual for Congressmen to receive mail from constituents protesting against liberal programs as not being faithful to the America we grew up in. The question we face, however, does not require us to decide whether the unwitting twenties were wise, or whether the gay nineties were really gay. Those eras have passed from the American scene forever. There may be those among us who grow nostalgic for them, but the fact is that they simply will not come back again.

Times have changed, and changed times present changed problems which require changed solutions. The first question which destiny poses is whether now, in the 1960's, we can refuse to follow the course of social progress at home and to support it abroad. The ultimate question is whether, if we fail to follow such a course, we can remain free.

This is the choice we face.

SENATE

THURSDAY, MARCH 30, 1961

The Senate met at 12 o'clock meridian and was called to order by the President pro tempore.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

O Thou God and Father of us all, amid all the global concerns which drain our strength and devour our hours, somehow, sometime, somewhere, this week of the passion, may we take time for commerce and communion with the unseen and eternal, where, in an oasis of quietness, there may be restored the inner resources of our pressured lives.

So, may the obtrusive secularism which blocks the door of our hearts be pushed back, and let the way be cleared, that the highest and best may enter and meet no obstacle.

Thus may we celebrate the singing Easter of the soul.

We ask it in the name of the Holy One who despised the shame and endured the cross for the joy that was set before Him. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, March 29, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that on March 29, 1961, the President had approved and signed the following acts:

S. 307. An act to authorize certain beach erosion control of the shore in San Diego County, Calif.;

S. 449. An act to extend the time in which the Outdoor Recreation Resources Review Commission shall submit its final report;

S. 1028. An act to amend the transitional provisions of the act approved August 7, 1959, entitled "Nematocide, Plant Regulator, Defoliant, and Desiccant Amendment of 1959"; and

S. 1116. An act to authorize the sale, without regard to the 6-month waiting period prescribed, of certain calcines and matte proposed to be disposed of pursuant to the Strategic and Critical Materials Stock Piling Act.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had passed the bill (S. 1) to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas, with an amendment, in which it requested the concurrence of the Senate.

The message also announced that the House had disagreed to the amendments of the Senate to the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guarantee authority of the Interstate Commerce Commission; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. HARRIS, Mr. WILLIAMS of Mississippi, and Mr. SPRINGER were appointed managers on the part of the House at the conference.

The message further announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5463) to amend and extend the Sugar Act of 1948, as amended.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 211) that when the House adjourns on Thursday, March 30, 1961, it stand adjourned until 12 o'clock

meridian on Monday, April 10, 1961, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the President pro tempore:

S. 153. An act to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963; and

H.R. 5463. An act to amend and extend the Sugar Act of 1948, as amended.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

SUBCOMMITTEE MEETING DURING SENATE SESSION

On request of Mr. KUCHEL, and by unanimous consent, the Subcommittee on Freedom of Communications of the Committee on Interstate and Foreign Commerce was authorized to meet during the session of the Senate today.

PERSONAL STATEMENT BY SENATOR MANSFIELD AND LEGISLATIVE PROGRAM

Mr. MANSFIELD. Mr. President, President Kennedy has been in office for somewhat more than 2 months, and the 87th Congress has been organized for a few days longer. It has been a difficult period, for the President and for the Congress. Transitions from the old to the new, from one administration to another, from one Congress to the next, are never easy. The present transition is no exception. New people, new policies, new approaches have to be integrated into new working relationships. While this shakedown is in process, the essential and pressing business of the Nation must, nevertheless, go forward.

It is for that reason, Mr. President, that I desire to take a few moments now, on the threshold of Easter, to express my gratitude to my colleagues for their wonderful cooperation during the past few weeks. These have not been easy times for me. Without this cooperation, it might well have been impossible for me to make the personal transition involved in adding to my responsibilities as a Senator from Montana, with a deep interest in the Nation's foreign relations, those of majority leader. I wish to thank, particularly, President Kennedy for his patience and understanding. I wish to thank the distinguished Vice President, whose wise counsel has always been generously available on request, despite his great new responsibilities.

I wish to thank the distinguished minority leader, the Senator from Illinois [Mr. DIRKSEN], and his able assistant, the minority whip, the Senator from California [Mr. KUCHEL], for their gracious understanding and cooperation in carrying on the work of the Senate. They have always been men to place the national interest above party factionalism; and at this time I wish to give renewed expression to my great respect and affection for both of them.

I desire to thank, too, the majority whip, the Senator from Minnesota [Mr. HUMPHREY], and the majority secretary, the Senator from Florida [Mr. SMATHERS], for their indispensable assistance and support in carrying on the functions of the leadership.

I express, finally, my gratitude to all the Members of the Senate, on both sides of the aisle. We have differed on many issues, to be sure, as Senators always have, and probably always will. But we have differed without obstruction and without personal bitterness. That is a basic source of vitality of this body, as it is of the Nation; and so long as it is preserved, the Nation, and the Senate as a part of it, will never lose its essential strength.

Because the Senate has functioned in accord with this principle, during the past two difficult months of transition, we have been able to dispose of a respectable amount of the work of this session. At the outset of the session, I noted that the yardstick of performance, as I see it, is quality, not quantity, of legislation. For that reason, I shall not set forth a numerical count of our activities. I trust that the Senate will also understand that, as majority leader, I tend to equate quality of performance largely with the Senate's actions on the President's program. In this connection, I note that we have disposed of Federal unemployment insurance extension; the feed grains program; the O.E.C.D. treaty; the Reorganization Act extension; the Federal judgeship bill; the bill to establish an International Travel Service; and the depressed areas bill. To these measures, I add, Mr. President, the ratification of the Columbia River Basin Treaty, which is of particular significance to my part of the country; and the Sugar Quota Act, which was extended last night by action of the Congress.

In addition, Mr. President, I announce that it is the hope of the leadership that the minimum wage bill will be considered on the floor of the Senate on April 12 or 13. I am grateful for the assurances, which I have received from the distinguished minority leader, that he will cooperate with me to that end. I hope further, Mr. President, that during the latter part of April we shall be able to proceed to the legislation on aid to education; and that during the first week of May we shall be able to proceed to the President's housing legislation, which has just been delivered to the Senate.

It is the further intention of the leadership to have the Senate adjourn from the close of business today until Monday of next week; and, on that day, to have the Senate take a recess until the following Thursday. It is not anticipated that there will be votes—certainly no controversial votes—on either Monday or Thursday.

In closing, I would suggest to the Senate that the most difficult period of this session lies ahead of us. It is my hope and expectation that in the next few days, during which there will be little activity on the floor, the committees will intensify their efforts to clear accumulating legislation and move it to the calendar, for disposal by the Senate. If the committees will so act and if the Senate will continue to proceed, as I am sure it will, on the basis of differences without obstructionism and without personal rancor, I have every confidence that we shall be able to give full consideration in a most responsible and adequate fashion to the President's program and other necessary matters. Moreover, I have every expectation that we shall do so while getting our work done most nights at a rational hour, as has so far been the case, and within a session whose length, in accord with the spirit of the Reorganization Act, will not run too long into the long, long Washington summer.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORTS OF GENERAL SALES MANAGER, COMMODITY CREDIT CORPORATION

A letter from the Secretary of Agriculture, transmitting, pursuant to law, reports of the General Sales Manager concerning the policies, activities, and developments, including all sales and disposals, with regard to each commodity which the Commodity Credit Corporation owns or which it is directed to support, for the months of November and December 1960 (with accompanying reports); to the Committee on Agriculture and Forestry.

REPORT ON REVIEW OF PROGRAM FOR ECONOMIC ASSISTANCE TO KOREA, PAKISTAN, AND VIETNAM

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of mutual security program presentation to the Congress for fiscal year 1961, for economic assistance to Korea, Pakistan, and Vietnam, Department of State, dated March 1961 (with an accompanying report); to the Committee on Government Operations.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

Two joint resolutions of the Legislature of the State of New Mexico; to the Committee on Interior and Insular Affairs:

"HOUSE JOINT MEMORIAL 41

"Joint memorial memorializing the Congress of the United States to enact legislation to increase the revolving fund for economic development of Indian reservations

"Whereas the revolving loan fund available for Indian tribes has been restricted and additional funds are needed and necessary in

order that economic development on Indian reservations may be encouraged: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully requested and urged to pass legislation to increase the revolving loan fund by a sufficient amount to enable the Indian tribes to carry out economic development on their reservations; and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, to each member of the New Mexico delegation to the National Congress, to the Secretary of Interior, and to the Commissioner of Indian Affairs.

"JACK M. CAMPBELL,
"Speaker of the House of Representatives.
"ALBERT ROMERO,
"Chief Clerk of the House of Representatives.
"TOM BOLACK,
"President of the Senate.
"M. E. MORGAN,
"Chief Clerk of the Senate."

"HOUSE JOINT MEMORIAL 42

"Joint memorial memorializing Congress to assist Indians in solving their economic problems

"Whereas the 25th Legislature of the State of New Mexico, now in session, recognizes the importance of assisting the Indian people in solving their economic problems and the necessity of bringing about a higher standard of living through greater utilization of their human and natural resources for industry, through directing the attention of the traveling public to their rich culture and way of life, and through developing recreational facilities in reservation areas: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be memorialized to provide such assistance through new legislation to bring about a realization of these goals so that by aiding the improvement of the Indian people, the entire population of this State will benefit; and be it further

"Resolved, That a copy of this memorial shall be sent to the President and the Vice President of the United States, each member of the New Mexico delegation in the National Congress, the Secretary of Commerce, the Secretary of the Interior, and the Commissioner of Indian Affairs.

"JACK M. CAMPBELL,
"Speaker of the House of Representatives.
"ALBERT ROMERO,
"Chief Clerk of the House of Representatives.
"TOM BOLACK,
"President of the Senate.
"M. E. MORGAN,
"Chief Clerk of the Senate."

A joint resolution of the Legislature of the State of New Mexico; to the Committee on the Judiciary:

"HOUSE JOINT MEMORIAL 43

"Joint memorial memorializing the Congress of the United States to enact enabling legislation to set aside a day to be known as American Indian Day

"Whereas the American Indian is the original American and has resided on this continent since time immemorial; and

"Whereas the American Indian has made outstanding contributions to our American way of life and has given us many products which have today become multibillion-dollar American industries; and

"Whereas the State of New Mexico has recognized this contribution by establishing a State Indian Day during the annual New Mexico State Fair in tribute to the role that the New Mexico Indian has played in our State and National life: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully petitioned to enact enabling legislation to set aside a day to be designated as American Indian Day; and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, to the Speaker of the House of Representatives of the Congress of the United States, and to each member of the New Mexico delegation to the National Congress.

"JACK M. CAMPBELL,
"Speaker of the House of Representatives.
"ALBERT ROMERO,
"Chief Clerk of the House of Representatives.
"TOM BOLACK,
"President of the Senate.
"M. E. MORGAN,
"Chief Clerk of the Senate."

Two joint resolutions of the Legislature of the State of New Mexico; to the Committee on Labor and Public Welfare:

"HOUSE JOINT MEMORIAL 44

"Joint memorial memorializing the Congress of the United States to provide a minimum program activities budget for the Division of Indian Health 1962 fiscal year operations

"Whereas the New Mexico State Legislature is cognizant of the great progress in Indian health programs since the transfer of Indian health responsibility from the Bureau of Indian Affairs to the U.S. Public Health Service; and

"Whereas, the Indians of New Mexico, as well as other Indians, are aware of the dire need which exists for safe and adequate domestic water supplies and sewerage facilities in the Indian communities so that sickness and death may be prevented on Indian reservations utilizing modern sanitation and health practices; and

"Whereas the Indians are desirous of obtaining such sanitation facilities in order that they may improve their health standards and personal hygiene: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That it hereby declares its support of the program being pursued under the act of July 3, 1959 (Public Law 86-121, 73 Stat. 267), to provide improved sanitation and water facilities for Indian lands and communities, and that the Congress of the United States is respectfully urged to provide a minimum program activities budget for the Division of Indian Health 1962 fiscal year operations for Indian homes, communities and lands as authorized under the Sanitation Facilities Act (Public Law 86-121); and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, to each member of the New Mexico delegation, to the National Congress, to the Secretary of the Department of Health, Education, and Welfare, to the Surgeon General of the Public Health Service, and to the Commissioner of Indian Affairs.

"JACK M. CAMPBELL,
"Speaker of the House of Representatives.
"ALBERT ROMERO,
"Chief Clerk of the House of Representatives.
"TOM BOLACK,
"President of the Senate.
"M. E. MORGAN,
"Chief Clerk of the Senate."

"HOUSE JOINT MEMORIAL 45

"Joint memorial memoralizing the Congress of the United States to expand and improve the vocational training program for Indians and to increase the appropriations accordingly

"Whereas Congress has appropriated funds for vocational training for Indians; and

"Whereas there exists a large potential number of applicants for such training which cannot be provided for because of limited funds; and

"Whereas the need for such training exists for Indians notwithstanding their residency; and

"Whereas the results of this program has significantly brought about a realistic approach to the problems of the young adult Indians: Now, therefore, be it

"Resolved by the Legislature of the State of New Mexico, That the Congress of the United States be respectfully urged to expand and improve the vocational training program for Indians and that appropriations be increased accordingly. It is also urged that there shall not be permitted to exist any condition or priority to the receiving of such benefits which are based upon the residency of any otherwise eligible Indians; and be it further

"Resolved, That a copy of this memorial be transmitted to the President and Vice President of the United States, the Secretary of the Interior, the Commissioner of Indian Affairs and to each member of the delegation representing New Mexico in the National Congress.

"JACK M. CAMPBELL,
"Speaker of the House of Representatives.
"ALBERT ROMERO,
"Chief Clerk of the House of Representatives.
"TOM BOLACK,
"President of the Senate.
"M. E. MORGAN,
"Chief Clerk of the Senate."

A resolution adopted by the Dallas, Tex., chapter of the American Association of Retired Persons, favoring the enactment of legislation to prohibit discrimination in employment because of age, and the arbitrary retirement of any employee before the age of 72 except for mental or physical disability; to the Committee on Labor and Public Welfare.

PRESIDENT KENNEDY SUPPORTS FRYINGPAN PROJECT — JOINT RESOLUTION OF COLORADO LEGISLATURE

Mr. CARROLL. Mr. President, several days ago I was privileged to confer with the President of the United States. In the course of our conference President Kennedy reaffirmed to me his support of the Fryingpan-Arkansas water diversion project in the State of Colorado.

As we discussed the urgent need for the project by the farmers and municipalities of southeastern Colorado the President indicated his warm and deep concern right then and there by telephoning the Director of the Bureau of the Budget, Mr. David Bell, and asking for prompt notification as soon as the Interior Department legislative report reached the Bureau of the Budget.

As of this moment all department comments on Fryingpan have been assembled. The Secretary of Interior is in the process of preparing the report for the Bureau of the Budget. I am hopeful that preparation will be completed and the report forwarded shortly after the Easter holidays.

In the budget messages for both fiscal 1961 and 1962, President Eisenhower called for authorization of the Fryingpan project and I am happy to tell the farmers and other water users of the Arkansas Valley in Colorado that Presi-

dent Kennedy is equally enthusiastic for this project and supports its enactment.

Mr. President, the official position of the State of Colorado on the Fryingpan project is stated tersely and eloquently in a joint memorial passed by both houses of the Colorado Legislature. This memorial expresses the will of the people of Colorado. They want the Fryingpan constructed. I ask unanimous consent that the Colorado Legislature's memorial be printed, along with my remarks, in the RECORD, and appropriately referred.

There being no objection, the joint resolution was referred to the Committee on Appropriations, and, under the rule, ordered to be printed in the RECORD, as follows:

HOUSE JOINT MEMORIAL 2

Joint resolution memorializing the Congress of the United States to approve the Fryingpan-Arkansas project in Colorado and to appropriate funds for initiation of the construction of the project at the earliest possible time

Whereas the Fryingpan-Arkansas project is a multiple-purpose development designed as a major step in the maximum utilization of water and resources in the Arkansas and Colorado River Basins in Colorado; and

Whereas the completion of this project will mean a substantially increased domestic and irrigation water supply, reservoirs of power for industrial development, flood and sediment control, antipollution, fish and wildlife conservation, and recreation in both the Arkansas and Colorado River Basins; and

Whereas the people of Colorado have already spent more than $500,000 in preparing the necessary plans and agreements to make this project become a reality, and the Federal Government has spent more than $1 million for the same purposes; and

Whereas, the project is designed as an independent, self-sustaining unit; and

Whereas the construction of the Fryingpan-Arkansas project is of vital benefit to the entire economy of the State: Now, therefore, be it

Resolved by the House of Representatives of the 43d General Assembly of the State of Colorado (the Senate concurring herein), That this general assembly, as a matter of official policy, urges and recommends the approval of the Fryingpan-Arkansas project, and memorializes the Congress of the United States to appropriate funds for the initiation of construction thereon at the earliest possible time; and be it further

Resolved, That copies of this memorial be transmitted to the President and Vice President of the United States, the Speaker of the House of Representatives of the United States, Members of Congress from the State of Colorado, and the Secretary of Interior of the United States.

ALBERT J. TOMSIC,
Speaker of the House of Representatives.
ROBERT L. KNOUS,
President of the Senate.
GENE MANZANARES,
Chief Clerk of the House of Representatives.
LUCILLE L. SHUSTER,
Secretary of the Senate.

RESOLUTION OF MINNESOTA LEGISLATURE

Mr. HUMPHREY. Mr. President, I have the honor to submit Resolution 21 of the 1961 Legislature of the State of Minnesota, memorializing the President and the Congress of the United States to provide for safe standards of automobile vehicle design and safety devices and the enforcement of such standards in the automotive industry. I request unanimous consent that the resolution be referred to the appropriate committee and that it be printed at this point in the RECORD.

There being no objection, the resolution was referred to the Committee on Interstate and Foreign Commerce, and, under the rule, ordered to be printed in the RECORD, as follows:

RESOLUTION 21

Resolution memorializing the President and the Congress of the United States to provide for safe standards of automobile vehicle design and safety devices and the enforcement of such standards in the automotive industry

Whereas 1½ million Americans are killed or injured in motor vehicle crashes annually; and

Whereas various research projects have proven that a major part of these deaths and injuries could have been prevented by proper vehicle design standards and safety devices for automobiles; and

Whereas the motor vehicle is the subject of and the instrument of interstate commerce and therefore the proper subject of Federal regulation: Now, therefore, be it

Resolved by the Legislature of the State of Minnesota, That the President of the United States and the Congress of the United States be requested to enact such legislation as may be necessary to provide for safety standards for automotive vehicle design and safety devices and for the enforcement of such standards in the automotive industry; be it further

Resolved, That the secretary of state of the State of Minnesota be instructed to transmit copies of this resolution to the President of the United States and to each Member of Congress from the State of Minnesota.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations, with an amendment:

S. Con. Res. 8. Concurrent resolution expressing sense of Congress on Project Hope; (Rept. No. 138).

By Mr. CHURCH, from the Committee on Interior and Insular Affairs, without amendment:

S. 54. A bill to grant 81 acres of public domain to the Cocopah Indians in Arizona (Rept. No. 139);

S. 1297. A bill to authorize the payment of per diem to members of the Indian Arts and Crafts Board at the same rate that is authorized for other persons serving the Federal Government without compensation (Rept. No. 140); and

S. 1298. A bill to permit the Secretary of the Interior to revoke in whole or in part the school and agency farm reserve on the Lac du Flambeau Reservation (Rept. No. 141).

REPORT ENTITLED "COORDINATION OF FEDERAL AGENCIES' PROGRAMS IN BIOCHEMICAL RESEARCH AND IN OTHER SCIENTIFIC AREAS" (S. REPT. 142)

Mr. HUMPHREY. Mr. President, on behalf of the Committee on Government Operations, I submit a report on studies which have been conducted by the Subcommittee on Reorganization and International Organizations.

The studies were made pursuant to Senate Resolution 347, 85th Congress, as extended by Senate Resolution 42, 86th Congress, and Senate Resolution 255, sections 1–4, 86th Congress. The subject of the studies has been interagency coordination in medical and other scientific programs.

Part I of the report is a 316-page publication which commences with a statement of committee policy on the need for improved Federal budgeting and for strengthening interagency coordination in health and other programs. It is followed by a series of staff findings on budgeting and accounting in the health area.

I point out that these findings are staff findings, and are not binding on the members of the subcommittee.

The body of the volume consists of a detailed fiscal and personnel analysis, prepared, under my direction, by the staff of the Subcommittee on Reorganization.

The analysis shows agency-by-agency expenditures, totaling $4.1 billion for medical and health-related activities.

It includes, as well, an analysis with regard to the estimated $649 million in Federal expenditures devoted to biomedical research.

By means of this comprehensive information, Congress will now have available a "big picture" of total Federal investment in health activities—in my mind, a sound investment.

The report will therefore be, I believe, an invaluable reference work for many years to come. It brings together certain information which has never before been available to the Congress. In other instances, it assembles facts which have heretofore been scattered in many executive branch volumes, and have not even been identified as being of a "health" nature within the 1,000-page annual Federal Budget volume.

As my colleagues know, other committees of the Congress are responsible for review of the work of individual departments and agencies such as the Department of Health, Education, and Welfare, and for review of substantive legislation in health and other scientific fields. Therefore, our own committee has sought to provide a background compendium of staff analysis on the health work of the Federal Government as a whole.

It is to be noted that this is a considerable amount of activity and one that has produced very constructive and desirable results for the American people and, indeed, for the health of humanity throughout the world.

I send to the desk the report as compiled and ask that it be printed.

The PRESIDING OFFICER (Mr. HICKEY in the chair). The report will be received and printed, as requested by the Senator from Minnesota.

REPORT ON DISPOSITION OF EXECUTIVE PAPERS

Mr. JOHNSTON, from the Joint Select Committee on the Disposition of Papers in the Executive Departments, to which

was referred for examination and recommendation a list of records transmitted to the Senate by the Administrator of General Services, dated March 24, 1961, that appeared to have no permanent value or historical interest, submitted a report thereon, pursuant to law.

EXECUTIVE REPORTS OF COMMITTEES

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. HILL, from the Committee on Labor and Public Welfare:

Dr. Hugh Hudson Hussey, Jr., of the District of Columbia, Dr. Robert Morgan Stecher, of Ohio, and Dr. William Lowell Valk, of Kansas, to be members of the Board of Regents of the National Library of Medicine, Public Health Service.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. DWORSHAK:

S. 1485. A bill to authorize the Secretary of the Interior to sell certain public lands in Idaho; to the Committee on Interior and Insular Affairs.

By Mr. YARBOROUGH:

S. 1486. A bill to authorize the Comptroller of the Currency to establish reasonable maximum service charges which may be levied on dormant accounts by national banks; to the Committee on Banking and Currency.

(See the remarks of Mr. YARBOROUGH when he introduced the above bill, which appear under a separate heading.)

By Mr. YARBOROUGH (by request):

S. 1487. A bill to extend the classified (competitive) civil service to certain employees of the Department of Defense, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. EASTLAND:

S. 1488. A bill to amend section 508 of title 28, United States Code, relating to attorneys' salaries; to the Committee on the Judiciary.

By Mr. BIBLE (by request):

S. 1489. A bill to revise the boundaries of the Fort Raleigh National Historic Site in North Carolina, and for other purposes;

S. 1490. A bill to authorize the purchase and exchange of land and interests therein on the Blue Ridge and Natchez Trace Parkways;

S. 1491. A bill to transfer a section of Blue Ridge Parkway to the Shenandoah National Park, in the State of Virginia, and for other purposes;

S. 1492. A bill to amend the act of March 24, 1948, which establishes special requirements governing the selection of superintendents of national cemeteries; and

S. 1493. A bill to provide for the restriction of certain areas in the Outer Continental Shelf for defense purposes, and for other purposes (Matagorda Water Range); to the Committee on Interior and Insular Affairs.

By Mr. LONG of Missouri:

S. 1494. A bill for the relief of Philomene Farhout; to the Committee on the Judiciary.

By Mr. DODD:

S. 1495. A bill to prohibit wiretapping by persons other than duly authorized law enforcement officers engaged in the investigation or prevention of specified categories of criminal offenses, and for other purposes; to the Committee on the Judiciary.

(See the remarks of Mr. DODD when he introduced the above bill, which appear under a separate heading.)

By Mr. CARLSON:

S. 1496. A bill for the relief of John C. Cadwell; to the Committee on the Judiciary.

By Mr. KUCHEL:

S. 1497. A bill to authorize the reconveyance to the former owner thereof of certain property at Cheli Air Force Depot, Los Angeles County, Calif., when such property is declared surplus to the needs of the United States, and for other purposes; to the Committee on Government Operations.

(See the remarks of Mr. KUCHEL when he introduced the above bill, which appear under a separate heading.)

By Mr. HART:

S. 1498. A bill for the relief of Dr. Constantine Cerkez; and

S. 1499. A bill for the relief of William John Campbell McCaughey; to the Committee on the Judiciary.

S. 1500. A bill to authorize a reduction of postage rates on parcels containing only food, clothing, medicines, or drugs sent by mail for relief purposes; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. HART when he introduced the last above-mentioned bill, which appear under a separate hearing.)

SERVICE CHARGES ON DORMANT ACCOUNTS

Mr. YARBOROUGH. Mr. President, I introduce, for appropriate reference, a bill authorizing national banks to levy a service charge on dormant accounts under regulations to be prescribed by the Comptroller of the Currency in the Treasury Department. The Comptroller of the Currency presently charters and inspects the national banks of the country but has no authority to regulate in any way the service charges normally charged by national banks on the accounts of depositors.

A subcommittee of the revenue and taxation committee of the Texas House of Representatives has recently reported:

> Some of these national bank service charges run from 50 to 100 percent of the entire dormant accounts each year. Through this method these banks are escheating this type of property to their own institutions and showing complete disregard for both the depositors and the State.

In Texas, banks chartered by the State are now prohibited from making such service charges that eat up dormant accounts by the regulations of the Texas State banking commissioner. This is an enlightened policy which it would be well for the Federal Government to emulate in the regulation of the national banks under its jurisdiction.

But today the Comptroller of the Currency has absolutely no power or jurisdiction to limit the service charge of banks on these dormant accounts, and some banks put the charges high enough to eat up the account. If the bank finds a dormant account, they take the account; whereas, if there were no heirs, the amount of money in the account would properly escheat to the State.

The bill I introduce today would give authority to the Comptroller of the Currency, in his knowledge of all of the facts, to derive an adequate definition for dormant accounts and to determine what would be a reasonable service charge to that account by the national bank.

I point out that if there is a dormant account of $100 in a bank, the bank uses the money in that account, and might earn 6 percent a year. Some banks make a service charge of $6 a year. Figures have been compiled of accounts which show that in the course of approximately 6 years, such service charges can reduce such an account to $64. The bank has earned about $50 in having the account. They have taken $36 in service charges, and so they have made over $70 in the space of 6 years and have eaten up a third of the account.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

The bill (S. 1486) to authorize the Comptroller of the Currency to establish reasonable maximum service charges which may be levied on dormant accounts by national banks, introduced by Mr. YARBOROUGH, was received, read twice by its title, and referred to the Committee on Banking and Currency.

RECONVEYANCE TO FORMER OWNER OF CERTAIN LAND IN STATE OF CALIFORNIA

Mr. KUCHEL. Mr. President, I introduce for appropriate reference a bill to authorize the reconveyance to the former owner thereof of certain property of Cheli Airport Depot, Los Angeles County, Calif., when such property is declared surplus to the needs of the United States, and for other purposes.

In connection with the introduction of the bill, I ask unanimous consent to have printed at this point in the RECORD a letter dated March 28, 1961, signed by me, and addressed to the Honorable John L. Moore, Administrator of the General Services Administration; a statement about the bill I am introducing, together with sundry correspondence relative to the bill; also the text of the resolution of the City Council of the City of Bell; a resolution of the Chamber of Commerce of the City of Bell; a resolution of the City Council of the City of Maywood; a resolution of the Maywood Chamber of Commerce of the City of Maywood; a resolution of the Industrial Council of the City of Commerce; a resolution of the City Council of the City of Huntington Park; a resolution of the Huntington Park Chamber of Commerce.

In addition, I desire the RECORD to show that I understand that the City Council of Montebello also has adopted unanimously a resolution approving the proposed legislation, provided a priority be written into the bill with respect to the needs of Montebello Unified School District, which, I am glad to say, represents one of the sections of my bill.

Mr. President, I ask unanimous consent also that the text of the bill be set forth at this point in the RECORD; and I further ask unanimous consent that the bill lie at the desk for cosponsors until Monday, April 10, 1961.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and other matters referred to will be printed in the RECORD, and the bill will

lie on the desk, as requested by the Senator from California.

The bill (S. 1497) to authorize the reconveyance to the former owner thereof of certain property at Cheli Air Force Depot, Los Angeles County, Calif., when such property is declared surplus to the needs of the United States, and for other purposes, introduced by Mr. KUCHEL, was received, read twice by its title, referred to the Committee on Government Operations, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) in order to provide for a revestment in the Chanslor-Western Oil and Development Company (successor of Chanslor-Canfield Midway Oil Company) of the land situated in Los Angeles County, California, which was donated by the Chanslor-Canfield Midway Oil Company to the United States, and which is now occupied by the Cheli Air Force Depot, the Administrator of General Services is authorized and directed, notwithstanding any other provision of law, to reconvey by quitclaim deed to the Chanslor-Western Oil and Development Company all right, title, and interest of the United States in and to such land, together with all buildings or other improvements thereon, whenever (1) the Administrator shall determine, in accordance with the provisions of the Federal Property and Administrative Services Act of 1949, that such land is surplus to the needs of the United States; and (2) he has received application for such reconveyance, subject to the provisions of section 2 of this Act.

SEC. 2. (a) Upon his determination that such land is surplus to the needs of the United States, the Administrator shall give notice of such determination to the Chanslor-Western Oil and Development Company. Within a period of sixty days after receipt of such notice, such company may file with the Administrator an application for such reconveyance in a form to be prescribed by the Administrator.

(b) Any reconveyance of land made pursuant to this Act shall be conditioned upon the payment by such company to the Administrator as consideration for such reconveyance of an amount determined by the Administrator to be equal to the current fair market value of any buildings and other improvements situated on such land with respect to which an application for reconveyance is filed as provided in subsection (a) of this section.

(c) If, after a determination by the Administrator that the land referred to in the first section of this Act is surplus to the needs of the United States—

(1) no application is made for reconveyance thereof within the period prescribed by subsection (a); or

(2) no arrangements satisfactory to the Administrator have been made by such company, within ninety days after receipt by it of notice as to the availability of such land for reconveyance, for the payment of the amount determined by the Administrator as the consideration for such reconveyance as prescribed in subsection (b),

the Administrator may dispose of such land in accordance with the applicable provisions of the Federal Property and Administrative Services Act of 1949.

(d) Any sum received by the Administrator as consideration for any reconveyance made pursuant to this Act shall be deposited in the Treasury as miscellaneous receipts.

SEC. 3. (a) Notwithstanding the foregoing provisions of this Act, the Administrator shall withhold from the land authorized to be conveyed by the first section of this Act an area of land (designated by him) not to exceed 10 acres for use by the city of Commerce, California, for library, recreation, or other public purposes, and (2) an area of land (designated by him) not to exceed 78 acres for use by the Montebello Unified School District for the establishment of a junior college or for other educational purposes. The Administrator is authorized and directed to convey such areas of land to the city of Commerce, California, and to Montebello Unified School District, respectively, if applications for the conveyance of such areas are filed with the Administrator within 45 days after the date of enactment of this Act. The conveyance of such areas of land shall be subject to the payment to the United States on such terms and conditions as the Administrator shall deem appropriate.

(b) In the event the city of Commerce, California, or the Montebello Unified School District fails to make timely application for the conveyance of the areas of land authorized to be conveyed to it by subsection (a) of this section, the Administrator is authorized and directed to convey such area to the Chanslor-Western Oil and Development Company in accordance with the provisions of section 2 of this Act.

The matters presented by Mr. KUCHEL are as follows:

MARCH 28, 1961.

Hon. JOHN L. MOORE,
Administrator, General Services Administration, Washington, D.C.

DEAR MR. MOORE: During the Second World War, in November 1942, the commanding general of the Army Air Corps determined that the construction of a major supply depot in the vicinity of Los Angeles, Calif., was essential to the prosecution of our war effort. While preliminary surveys were being made the Santa Fe Railway, through its subsidiary, Chanslor-Canfield Midway Oil Co., offered to donate to the Government lands which it owned within 7 miles of downtown Los Angeles. Early in 1943, the Santa Fe offer was accepted and 211 acres were conveyed to the U.S. Government for the consideration of $1. An additional 177 acres of adjoining land were deeded to the Government on July 10, 1944, in order to meet the urgent need to expand the depot. Again the consideration was $1.

These lands, known as Cheli Air Force Depot, total approximately 388 acres. A year ago, in April 1960, they were declared excess to the needs of the Department of Defense and they have now been turned over to the General Services Administration for disposal.

At the time of the original conveyance, the company expressed its interest in regaining the property when the Government was through with it. A specific provision providing for reconveyance was deleted from the original transaction at the request of the War Department because at that time there was no statutory authority by which the Government could relinquish title to the land acquired by such a donation. Statutory authority was also lacking for the disposal of any improvements which the Government might make on the property. Congress, in passing the Surplus Property Act of 1944, recognized the equity of permitting the donor to reacquire property when it was no longer needed by the Government.

Unfortunately, this law expired on December 31, 1949. Until that time there were no indications that the Government would declare the depot as surplus and unneeded for defense purposes.

I have received numerous resolutions from public and civic bodies in the surrounding area endorsing the right of the Santa Fe Railway, through its subsidiary, now known as the Chanslor-Western Oil & Development Co., to reacquire this property. The Montebello Unified School District asked that a portion of these lands in the amount of 77.385 acres be set aside to provide for a junior college. The city of Commerce has now requested an additional parcel of approximately 10 acres to establish library and other civic facilities, which would serve the junior college which the Montebello School District plans to establish on the property as well as the business and industries in the general area. Both of these requests by two public bodies are not opposed by the Santa Fe Railway or its subsidiary.

I believe that this reconveyance of the land to the Chanslor-Western Oil & Development Co. is in the public interest since it would be used as a site for additional industrial development and, thus, provide needed employment opportunities estimated at between 7,500 and 10,000 new jobs for the residents of the surrounding area. In addition, there would be great added tax benefits to the local taxing districts in whose jurisdiction the property lies as well as the city of Bell. Above all, I believe that it is completely equitable, once the educational and civic needs have been taken care of, to permit the original donor to reacquire the property, which as a patriotic gesture was granted to the Government for a total sum of $2, at the current fair market value of any buildings and other improvements situated on such land as determined by the Administrator of the General Services Administration.

I desire to introduce legislation which would provide for the reconveyance to the donor, excluding those parcels needed by the school district and the city of Commerce. Meanwhile, I understand that your agency contemplates undertaking to dispose of these properties by public auction. Because of the facts set forth herein, and because of the legislation I propose, I desire respectfully to request that such undertakings be deferred pending congressional consideration of my legislation.

With kind regards,

Sincerely yours,

THOMAS H. KUCHEL,
U.S. Senator.

HISTORY AND STATEMENT IN SUPPORT OF BILL AUTHORIZING THE RECONVEYANCE OF SURPLUS PROPERTY AT CHELI AIR FORCE DEPOT, LOS ANGELES, CALIF., TO ITS FORMER OWNER

The bill would authorize the Administrator of General Services to reconvey to Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railway Co., certain lands at Cheli Air Force Depot, Los Angeles County, Calif., which were donated to the Government by the company.

I. BACKGROUND

In November 1942, the commanding general of the Army Air Corps determined that military requirements necessitated construction of a major Air Corps supply depot in the vicinity of Los Angeles, Calif. Preliminary surveys and appraisals were made of several sites in an effort to determine which could most economically and effectively be developed for the depot. In the midst of these preliminary surveys, the Santa Fe Railway, through its subsidiary, offered to donate to the Government certain lands it owned 7 miles from downtown Los Angeles in a location where all utilities were available, including service by the Los Angeles Junction Railway (which had direct connections, at through rates, with all trunkline carriers serving southern California). The Santa Fe offer was accepted and 211 acres were conveyed to the Government early in 1943. The total consideration paid by the Government for the property was $1. On July 10, 1944, an additional 177 acres of adjoining land were deeded to the Government also for $1 to meet the urgent need for expansion of the depot.

These lands, totaling approximately 388 acres, known as the Cheli Air Force Depot, lying in the heart of the central manufacturing district complex, were only recently declared excess to the needs of the Department of Defense in April 1960, and have now

been turned over to the General Services Administration for disposal.

The Santa Fe was persuaded by the War Department to delete from its original conveyances any provision which would have given the company a right to reacquire the land when it was no longer needed by the Government. This deletion was agreed to by the company because at that time there was no statutory authority by which the Government could relinquish title to land acquired by such a donation, nor was there any authority for the disposal of the improvements which the Government planned to construct on the property. In addition, there was every indication when the land was donated that the depot would be a permanent installation.

However, the company did make clear at the time its interest in regaining the property when the Government was through with it. In the following letters transmitting the deeds to the Government, the company formally expressed the view that it would seem only equitable and fair for it to reacquire the property whenever the Government relinquished it.

The equity of permitting the donor to reacquire property when it was no longer needed by the Government was recognized by the Congress in the Surplus Property Act of 1944. The Act gave preferential rights to former owners who desired to regain surplus real property acquired by the Government after December 31, 1939. At no time prior to the expiration of the law giving former owners preference on December 31, 1949, were there any indications that the Government would not retain the depot property as an active, permanent installation. In fact, the company was assured of this as late as September 15, 1949, when it asked if it would have a chance to reacquire the Cheli property under the terms of the 1944 law. Even in 1952 the Government refused to release even a very small segment of land at one edge of the Depot without the conveyance to it in exchange an equivalent acreage.

Since the decision of the Department of the Air Force to abandon the depot was not reached until late in 1957, the Santa Fe had no opportunity to exercise the right to reacquire the property it had donated to the Government.

II. THE PROPOSED BILL

The legislation proposed would permit the Santa Fe to reacquire the property on terms similar to those which were in effect from 1944 to 1949, and which terms were applicable to all property acquired by the Government after December 31, 1939, including the specific property herein involved. The bill would require the company to pay the current fair market value, as determined by the Administrator of General Services, for all buildings and other improvements on the property. The bill was drafted in the light of GSA recommendations on other similar legislation so as to be consistent with existing laws, policies and procedures.

III. PRECEDENTS FOR THE BILL

1. The Surplus Property Act of 1944 gave all former owners preferential rights in reacquiring surplus real property. It is inequitable to now deny persons that right solely because the property was retained by the Government for a longer period of time.

The 1944 act applied to all former owners, irrespective of whether they donated the property or sold it to the Government at fair market value. When the Cheli Air Force Depot property was donated to the Government, an appraisal made by the Government at the time put a value of $778,420 on the land (see H. Rept. 865, 79th Cong.).

2. In recent years a number of bills to allow former owners to reacquire their properties have become law: H.R. 10045 became Public Law 85-825; H.R. 13209 became Public Law 85-646. In other cases involving properties located at Point Lookout, Mich.; High Point, N.C.; Corpus Christi, Tex.; Sherman, Tex.; Houma, La.; Hitchcock, Tex.; Port Lavaca, Tex.; and Fishers Island, N.Y.; former owners were allowed through legislation to reacquire land they formerly owned.

IV. RECONVEYANCE TO THE SANTA FE IS IN THE PUBLIC INTEREST

The Cheli Air Force Depot is located within a larger tract, the Central Manufacturing District of Los Angeles, acquired and successfully developed by the Santa Fe for industrial sites.

The development of the Cheli Air Force Depot property by Santa Fe will produce substantial benefits to the surrounding residential communities by reason of the many jobs, estimated at from 7,500 to 10,000, which the industries located in this area would employ and the added tax benefits which it would bring to the local taxing districts, such as school, water, sanitation, flood control, and to the city of Bell.

The kind of development which Santa Fe has demonstrated its ability to create and the dynamic character of such development is well illustrated by viewing its development of the adjoining property, formerly known as Vail Field, during the period between 1951 and 1960. In the following pages are pictures showing the Vail Field area at the inception of Santa Fe's development program and the results of that development 9 years later. Also depicted in graph form, are the dramatic results of this development translated into number of jobs, estimated payroll, and assessed valuation during the same period.

It is respectfully submitted that the return to Chanslor-Western Oil & Development Co. of the property which it donated to the Government in 1943 and 1944 in connection with the war effort is not only dictated by elementary considerations of fairness and equity but finds added support and justification in the broad public benefits which are certain to result from the action.

CHANSLOR-CANFIELD MIDWAY OIL CO.,
March 17, 1943.

800-94.
WAR DEPARTMENT,
Office of Division Engineer,
Los Angeles, Calif.
(Attention of Mr. A. V. Montin).

DEAR SIRS: Regarding Air Service Command Depot project, Atlantic Avenue site, and the documents pertaining to the property location, which were left at this office by Mr. Montin on March 6, 1943.

I am pleased to present herewith the following documents executed as requested, which place the property in fee title in the United States of America and its assigns.

1. Seven copies fully executed of CR Form No. 6, Option for Purchase of Land, dated February 25, 1943.

2. Original fully executed Form 1034, Public Voucher for Purchases and Services other than Personal, dated February 25, 1943.

3. Grant deed, dated February 27, 1943, fully executed, covering the transfer of fee of the property covered by option form CR-6.

4. Signed certification, dated 16th day of March 1943, by C. W. Jones, assistant secretary of Chanslor-Canfield Midway Oil Co., covering resolutions of approval for the execution of the above-named documents.

Option for purchase of land CR Form No. 6, dated February 25, 1943, paragraphs Nos. 1 and 4, refer to "general warranty deed." Standard California grant deed form has been substituted by your office in lieu of general warranty deed and has been executed as the aforementioned grant deed dated February 27, 1943.

Referring to paragraph (4) Option for Purchase of Land:

(a) For your information, payment is being tendered today to the Los Angeles County collector, covering the second half of taxes levied on the property for the fiscal year ending June 30, 1943.

(b) Please note, however, that while the grant deed is dated February 27, 1943, due to unavoidable delays it will not be recorded until after the first Monday in March 1943 (permit given for occupation by the Government, February 5, 1943). Therefore, we believe notification should be given the county by your office of the ownership change as Chanslor-Canfield Midway Oil Co. is no longer in possession, and therefore will not assume nor pay any tax levy for the fiscal year beginning July 1, 1943.

After the above grant deed, dated February 27, 1943, has been recorded we will greatly appreciate having the recording reference, at which time we will arrange for the preparation of a certificate by the Laguna-Maywood Mutual Water Co. No. 1 covering the shares of stock of the latter named company properly allocable and appurtenant to the acreage covered by grant deed dated February 27, 1943.

While the Chanslor-Canfield Midway Oil Co. is wholeheartedly desirous of cooperating with the Government in the location of these facilities, it would be unbusinesslike on our part if title to the land should at a later date part from the Government to outside and possibly competitive hands. Therefore, if the Government should decide at any future date to relinquish title to other than a Government-owned corporation, it would seem only equitable and fair that the Government should deed the property back to the Chanslor-Canfield Midway Oil Co. at the same consideration of $1, as the total value of the land only. In no event, however, shall this paragraph be considered as a condition subsequent to the taking by the Government of the land at this time.

Your acknowledgment on the duplicate hereof of the receipt of this letter and papers transmitted herewith will be appreciated.

Yours truly,

C. J. DOHERTY,
Vice President.

CHANSLOR-CANFIELD MIDWAY OIL CO.,
Los Angeles, Calif., July 14, 1944.

800-94.
WAR DEPARTMENT,
Office of Division Engineer,
Pacific Division,
Real Estate Division,
Los Angeles, Calif.
(Attention of Mr. A. V. Montin).

DEAR SIRS: Regarding Los Angeles ACS Depot, intertransit depot 15, tract 3, extension involving acquisition by the Government of 177.1389 acres of land.

In view of Mr. Montin's advice during the afternoon of July 13, 1944, this letter is written to countermand and supersede the provision contained in my letter of July 10, 1944, that your department will institute procedure for the enactment of appropriate legislation by Congress for the prompt reconveyance to Chanslor-Canfield Midway Oil Co. of the minerals underlying the 211.36-acre parcel of land deeded to the Government under date of February 27, 1943. If such procedure is necessary it is understood that the burden of instituting appropriate legislation will be placed on Chanslor-Canfield Midway Oil Co.

The grant deed, dated May 8, 1944, conveying 177.1389 acres of land may, therefore, be placed of public record immediately to avoid further delay in the establishment of Government acquisition and the imposition of local county taxes, etc.

After the above grant deed, dated May 8, 1944, has been recorded we will greatly appreciate having the recording reference, at

which time we will arrange for the preparation of a certificate to be issued by the Laguna-Maywood Mutual Water Co., No. 1, covering the shares of stock of the latter company properly allocable and appurtenant to the acreage covered by the deed.

In providing a location for facilities to serve the depot now established, we are restating our position (see letter of transmission of March 17, 1943, with reference to the deed dated February 27, 1943, transferring ownership to the Government of 211.36 acres of land) that it would be unbusinesslike on our part if title to the additional 177.1389 acres of land should at a later date part from the Government to outside and possibly competitive hands. Therefore, if the Government should decide at any future date to relinquish title to other than a government-owned corporation, it would seem only equitable and fair that the Government should deed the property back to the Chanslor-Canfield Midway Oil Co. at the same consideration of $1 as the total value of the land only. In no event, however, shall this paragraph be considered as a condition subsequent to the taking by the Government of the land at this time.

Your acknowledgment on the duplicate hereof of the receipt of this letter will be appreciated.

Yours truly,

C. J. DOHERTY,
Vice President.

RESOLUTION 1741

The City Council of the City of Bell, Calif., does hereby resolve as follows:

Whereas the City Council of the City of Bell favors the development of the Cheli Air Force Depot by private enterprise in keeping with the neighboring industries and businesses, and believes that said objective and the earliest development will be facilitated by a single developer; and

Whereas the Planning Commission of the City of Bell has recommended that the Cheli Air Force Base Depot area be zoned for industrial use; and

Whereas it appears that Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railway Co. donated said property to the United States at the commencement of World War II and is seeking the enactment of legislation making possible the return of said property to it on the principles set forth in the Surplus Property Act of 1944 which expired in 1949; and

Whereas the members of the city council are familiar with the character of the industrial development by the Santa Fe in the area of the central manufacturing district, principally the area formerly known as Vail Field, adjacent to the Cheli Air Force Depot; and believe that a similar development of the Cheli Air Force Depot property would be of great benefit to the people residing in the southeast area of Los Angeles County, including the community of the city of Bell, because this would provide many additional jobs for the people in this area as well as additional assessed valuation for local tax purposes: Now, therefore, be it

Resolved by the City Council of the City of Bell, That it favors the enactment by the Congress of legislation making it possible to return the Cheli Air Force Depot property to Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railway Co., on such fair and equitable terms as are consistent with the principles of the Surplus Property Act of 1944; be it further

Resolved, That the city clerk is hereby directed to transmit a copy of this resolution to Senator THOMAS H. KUCHEL, Senator CLAIR ENGLE, and to Congressmen for the southeast area of Los Angeles County and to the appropriate congressional committee or committees to which such legislation may be referred for consideration.

A RESOLUTION OF THE CHAMBER OF COMMERCE OF THE CITY OF BELL

The chamber of commerce does hereby resolve the following:

Whereas it is the program of the Chamber of Commerce of the City of Bell to actively promote the best interests of the city of Bell; and

Whereas it is for the best interests of the people of the city of Bell to provide an attractive business atmosphere through favorable tax rates and maximum job opportunities for the people of the community; and

Whereas the Chamber of Commerce of the City of Bell favors the development of the Cheli Airbase to provide the maximum number of jobs for the people of the city of Bell as well as the southeast area of Los Angeles; and

Whereas the Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railroad Co., donated the property now comprising said Cheli Airbase to the U.S. Government as part of the war effort in 1943–44 and is now seeking legislation to make possible the return of said property to it on the principles of the Surplus Property Act of 1944, which expired in 1949; and

Whereas the Chamber of Commerce of the City of Bell feels that the Santa Fe Railroad has proven its ability in the development of industrial lands for the best interests of both industry and the community by its development of the surrounding area; and

Whereas a similar development of the Cheli Airbase would be of the optimum benefit to the people by providing thousands of additional jobs as well as increased assessed valuation to the city of Bell: Now, therefore, be it

Resolved by the Chamber of Commerce of the City of Bell, That it favors the enactment by the Congress of the United States of appropriate legislation to return the property presently comprising the Cheli Airbase to the Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Sante Fe Railroad Co., on fair and equitable terms within the principles of the Surplus Property Act of 1944; be it further

Resolved, That the secretary of the Chamber of Commerce of the City of Bell shall transmit copies of this resolution to the U.S. Senators representing California and to the Members of Congress representing the southeast area of Los Angeles County.

RESOLUTION 1788

The City Council of the City of Maywood, Calif., does hereby resolve as follows:

Whereas the City Council of the City of Maywood favors the development of the Cheli Airbase, formerly known as the Maywood Air Force Depot, for industrial purposes as a means of creating additional employment and related benefits to the surrounding communities; and

Whereas it appears that Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railway Co., donated said property to the United States at the commencement of World War II and is seeking the enactment of legislation making possible the return of said property to it on the principles set forth in the Surplus Property Act of 1944, which expired in 1949; and

Whereas following the expiration of the war, the Council of the City of Maywood urged the Government to retain said airbase on account of the employment it afforded to residents of the adjacent communities, but now favors the return of said airbase to private ownership; and

Whereas the members of the city council are acquainted with the industrial development by Santa Fe of the Vail Field area and believe a similar development of the Cheli Air Depot property would be of great benefit to the people residing in the southeast area of Los Angeles County, including those living in the city of Maywood, because of the many additional jobs which that would provide for the people in this area and the related benefits to the existing small business enterprises in the city of Maywood: Now, therefore, be it

Resolved by the City Council of the City of Maywood, That it favors the enactment by the Congress of legislation to return the Cheli Airbase property to Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railway Co., on fair and equitable terms consistent with the principles of the Surplus Property Act of 1944; be it further

Resolved, That the city clerk shall transmit this resolution to Senator THOMAS N. KUCHEL, Senator CLAIR ENGEL, and Congressmen for the southeast area of Los Angeles County.

A RESOLUTION OF THE MAYWOOD CHAMBER OF COMMERCE OF THE CITY OF MAYWOOD RELATIVE TO THE CHELI AIRBASE

The Chamber of Commerce of the City of Maywood, Calif., does hereby resolve as follows:

Whereas the Maywood Chamber of Commerce of the City of Maywood favors the development of the Cheli Air Force Depot by private enterprise in keeping with the neighboring industries and businesses and believes that said objective and the earliest development will be facilitated by a single developer; and

Whereas the Planning Commission of the City of Bell has recommended that the Cheli Air Force Depot area be zoned for industrial use; and

Whereas it appears that Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railway Co., donated said property to the United States at the commencement of World War II and is seeking the enactment of legislation making possible the return of said property to it on the principles set forth in the Surplus Property Act of 1944 which expired in 1949; and

Whereas the board of directors of the Maywood Chamber of Commerce are familiar with the character of the industrial development by the Santa Fe Railway Co. in the area of the central manufacturing district, principally the area formerly known as Vail Field adjacent to the Cheli Air Force Depot property would be of great benefit to the people residing in the southeast area of Los Angeles County, because this would provide many additional jobs for the people in this area as well as additional assessed valuation for local tax purposes: Now, therefore, be it

Resolved by the Maywood Chamber of Commerce of the City of Maywood, That it favors the enactment by the Congress of legislation making it possible to return the Cheli Air Force Depot property to Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railway Co., on such fair and equitable terms as are consistent with the principles of the Surplus Property Act of 1944; be it further

Resolved, That the secretary of the Maywood Chamber of Commerce is hereby directed to transmit a copy of this resolution to Senator THOMAS H. KUCHEL, Senator CLAIR ENGLE, and Congressman CLYDE DOYLE, and to the appropriate congressional committee or committees to which such legislation may be referred for consideration.

A RESOLUTION OF THE INDUSTRIAL COUNCIL OF THE CITY OF COMMERCE RELATIVE TO THE CHELI AIRBASE, ADOPTED FEBRUARY 28, 1961

Whereas the Industrial Council of the City of Commerce favors the Cheli Airbase development for industrial purposes because of the additional employment and related benefits it would bring to the surrounding communities; and

Whereas it appears that Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railway Co., donated said property to the Government at the commencement of World War II and is now seeking legislation to return said property to it on the principles set forth in the Surplus Property Act of 1944, which expired in 1949; and

Whereas the members of the industrial council believe that a development of the Cheli Airbase property by Santa Fe would be of benefit to the residents of the southeast area of Los Angeles County, including those living in the city of Commerce, because of the many additional jobs which that would provide as well as the additional assessed valuation it would bring to the Montebello Unified School District: Now, therefore, be it

Resolved by the Industrial Council of the City of Commerce, That it supports legislation by Congress to return to Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railway Co., the Cheli Airbase property on fair and equitable terms consistent with the principles of the Surplus Property Act of 1944; be it further

Resolved, That the secretary shall transmit this resolution to Senator THOMAS N. KUCHEL, Senator CLAIR ENGLE, and Congressmen for the southeast area of Los Angeles County.

RESOLUTION 4543

The City Council of the City of Huntington Park, Calif., does resolve as follows:

Whereas the City Council of the City of Huntington Park favors the development of the Cheli Air Force Depot by private enterprise in keeping with the neighboring industries and businesses, and believes that said objective and the earliest development will be facilitated by a single developer; and

Whereas the Planning Commission of the City of Bell has recommended that the Cheli Air Force Base Depot area be zoned for industrial use; and

Whereas it appears that Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railway Co. donated said property to the United States at the commencement of World War II and is seeking the enactment of legislation making possible the return of said property to it on the principles set forth in the Surplus Property Act of 1944 which expired in 1949; and

Whereas the members of the city council are familiar with the character of the industrial development by the Santa Fe in the area of the central manufacturing district, principally the area formerly known as Vail Field, adjacent to the Cheli Air Force Depot, and believes that a similar development of the Cheli Air Force Depot property would be of great benefit to the people residing in the southeast area of Los Angeles County, including the community of the city of Huntington Park, because this would provide many additional jobs for the people in this area as well as additional assessed valuation for local tax purposes: Now, therefore, be it

Resolved by the City Council of the City of Huntington Park, That it favors the enactment by the Congress of legislation making it possible to return the Cheli Air Force Depot property to Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railway Co., on such fair and equitable terms as are consistent with the principles of the Surplus Property Act of 1944; be it further

Resolved, that the city clerk is hereby directed to transmit a copy of this resolution to Senator THOMAS H. KUCHEL, Senator CLAIR ENGLE, and to Congressmen for the southeast area of Los Angeles County and to the appropriate congressional committee or committees to which such legislation may be referred for consideration.

A RESOLUTION OF THE HUNTINGTON PARK CHAMBER OF COMMERCE, HUNTINGTON PARK, CALIF.

Whereas the program of the Chamber of Commerce of the City of Huntington Park is interested in development and welfare of the general area; and

Whereas it is for the best interest of the area to provide a favorable business climate through a tax structure and increased job opportunities for the people of the area; and

Whereas the Chamber of Commerce of the City of Huntington Park encourages the development of Cheli Airbase to maintain and increase job opportunities in the southesat area; and

Whereas the Chanslor-Western Oil & Development Co., an affiliate of the Atchison, Topeka & Santa Fe Railroad Co., donated the property now comprising said Cheli Airbase as part of the war effort in 1943–44 to the U.S. Government and is now seeking legislation for the return of said property on the principles of the Surplus Property Act of 1944, which expired in 1949; and

Whereas the Huntington Park Chamber of Commerce feels that the Santa Fe Railroad has proven its ability in industral land development; and

Whereas the industrial development of Cheli Airbase would provide additional employment and broaden the tax base by increasing the assessed valuation: Now, therefore, be it

Resolved by the Huntington Park Chamber of Commerce of the City of Huntington Park, That it favors the enactment of legislation by the Congress of the United States to return the property presently comprising the Cheli Airbase to the Chanslor-Western Oil & Development Co., a subsidiary of the Atchison, Topeka & Santa Fe Railroad Co., on fair and equitable terms under the principles of the Surplus Property Act of 1944; be it further

Resolved, That the manager of the Huntington Park Chamber of Commerce transmit copies of this resolution to the U.S. Senators representing California and to the Members of Congress representing the southeast area of Los Angeles County.

REDUCTION OF POSTAGE RATES ON CERTAIN PARCELS FOR RELIEF PURPOSES

Mr. HART. Mr. President, from time to time I have received inquiries from private groups interested in sending relief supplies to individuals and organizations overseas. Almost without exception the individuals and groups that have contacted me have indicated that the postal rates make it extremely difficult to send relief packages to deserving individuals and groups overseas. Today I am introducing a bill proposing that whenever the President determines that a disaster has occurred in the United States or overseas, he may authorize a reduction in postage rates of relief packages being mailed to organizations or individuals in the disaster area. It is my belief that areas affected by military acts or natural disasters, such as the earthquakes which recently occurred in Chile or the severe winter of 1956 in Italy, would be examples of the kind of natural disaster where standby authority such as authorized in this bill would be the most humanitarian method of enlisting the fullest assistance of the people of the United States in alleviating the suffering of those affected.

I ask unanimous consent that the text of this bill be printed in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

The bill (S. 1500) to authorize a reduction of postage rates on parcels containing only food, clothing, medicines, or drugs sent by mail for relief purposes, introduced by Mr. HART, was received, read twice by its title, referred to the Committee on Post Office and Civil Service, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Chapter 67 of title 39 of the United States Code is amended by adding at the end thereof a new section as follows:

"§ 4556. Postage rates on relief packages

"(a) Whenever the President determines that a disaster has occurred in any area in the United States, including the territories and possessions thereof, or in any foreign country the effects of which may be alleviated by relief packages from organizations and individuals in the United States, he is authorized to reduce the rates of postage on relief packages mailed in the United States for delivery to organizations or individuals in such area or foreign country. Such reduced rates shall remain in effect for such period of time as the President may specify.

"(b) The Postmaster General shall, at the close of each fiscal year, notify the President of the loss in postal receipts to the Post Office Department caused by transmitting during such year relief packages at reduced rates provided for by subsection (a). The President shall reimburse the Post Office Department for such loss in postal receipts out of funds appropriated therefor pursuant to the authorization contained in subsection (d).

"(c) As used in this section, the term 'relief packages' means any packages containing only food, clothing, medicines, or drugs, intended as a gift for relief purposes, and not for resale.

"(d) There are hereby authorized to be appropriated to the President such sums as may be necessary to carry out the purposes of this section."

TO PRINT AS A SENATE DOCUMENT THE REPORT OF THE MEETING OF THE CANADA-UNITED STATES INTERPARLIAMENTARY GROUP—(S. DOC. NO. 27)

Mr. AIKEN. Mr. President, I submit to the Senate a report on the meeting of the Canada-United States Interparliamentary Group, held from February 22 to 26, 1961. I ask unanimous consent that the report be printed as a Senate document.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Vermont. The Chair hears none, and it is so ordered.

BENEFITS FOR TEACHERS IN PRIVATE NONPROFIT SCHOOLS UNDER NATIONAL DEFENSE EDUCATION ACT—ADDITIONAL COSPONSOR OF BILL

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the name of the junior Senator from Wyoming [Mr. HICKEY] be added as a cosponsor of the bill (S. 1271) to authorize certain benefits under the provisions of titles II, V, and VI of the National Defense Education Act of 1958 for teachers in private nonprofit schools, which I introduced on March 9, 1961.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE CONCERNING CERTAIN NOMINATIONS BEFORE COMMITTEE ON THE JUDICIARY

Mr. EASTLAND. Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary:

Floyd M. Buford, of Georgia, to be U.S. attorney for the middle district of Georgia, for a term of 4 years, vice Frank O. Evans;

Edward F. Boardman, of Florida, to be U.S. attorney for the southern district of Florida, for a term of 4 years, vice James L. Guilmartin, resigned;

Charles A. Muecke, of Arizona, to be U.S. attorney for the district of Arizona, for a term of 4 years, vice Jack D. H. Hays, resigned;

Joseph P. Hoey, of New York, to be U.S. attorney for the eastern district of New York, for a term of 4 years, vice Cornelius W. Wickersham, Jr.;

Joseph N. Tierney, of Illinois, to be U.S. marshal for the northern district of Illinois, for a term of 4 years, vice William W. Kipp, Sr.; and

John Terrill, of Wyoming, to be U.S. marshal for the district of Wyoming, for a term of 4 years, vice Noah W. Riley.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee, in writing, on or before Thursday, April 6, 1961, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

NOTICE OF CHANGE OF DATE OF HEARING ON NOMINATION OF REYNALDO G. GARZA TO BE U.S. DISTRICT JUDGE FOR SOUTHERN DISTRICT OF TEXAS

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that the hearing on the nomination of Reynaldo G. Garza, of Texas, to be U.S. district judge for the southern district of Texas, vice James V. Allred, deceased, originally scheduled for Thursday, April 6, 1961, has been rescheduled for Friday, April 7, 1961, at 10:30 a.m., in room 2228 New Senate Office Building.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

NOTICE OF HEARING ON NOMINATION OF LA VERNE R. DILWEG, OF WISCONSIN, TO BE A MEMBER OF THE FOREIGN CLAIMS SETTLEMENT COMMISSION

Mr. EASTLAND. Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Thursday, April 6, 1961, at 10:30 a.m., in room 2228 New Senate Office Building, on the nomination of La Verne R. Dilweg, of Wisconsin, to be a member of the Foreign Claims Settlement Commission.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

The subcommittee consists of the Senator from South Carolina [Mr. JOHNSTON], the Senator from Nebraska [Mr. HRUSKA], and myself, as chairman.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. RANDOLPH:

Excerpts from address by Secretary of the Interior Stewart L. Udall at National Coal Policy Conference dinner meeting, Washington, D.C., March 29, 1961.

AREA REDEVELOPMENT ACT

Mr. ROBERTSON. Mr. President, if the distinguished majority leader will yield to me, I wish to state that the Senate has just now received a message that the House has passed the area redevelopment bill, S. 1. I ask that the President pro tempore lay that message before the Senate.

The PRESIDING OFFICER laid before the Senate the amendment of the House of Representatives to the bill (S. 1) to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas, which was, to strike out all after the enacting clause and insert:

That this Act may be cited as the "Area Redevelopment Act".

DECLARATION OF PURPOSE

SEC. 2. The Congress declares that the maintenance of the national economy at a high level is vital to the best interests of the United States, but that some of our communities are suffering substantial and persistent unemployment and underemployment; that such unemployment and underemployment cause hardship to many individuals and their families and detract from the national welfare by wasting vital human resources; that to overcome this problem the Federal Government, in cooperation with the States, should help areas of substantial and persistent unemployment and underemployment to take effective steps in planning and financing their economic redevelopment; that Federal assistance to communities, industries, enterprises, and individuals in areas needing redevelopment should enable such areas to achieve lasting improvement and enhance the domestic prosperity by the establishment of stable and diversified local economies and improved local living conditions; and that under the provisions of this Act new employment opportunities should be created by developing and expanding new and existing facilities and resources rather than by merely transferring employment opportunities from one area of the United States to another.

AREA REDEVELOPMENT ADMINISTRATOR

SEC. 3. There shall be appointed by the President, by and with the advice and consent of the Senate, an Area Redevelopment Administrator in the Department of Commerce who shall receive compensation at a rate equal to that received by Assistant Secretaries of Commerce. The Administrator shall perform such duties in the execution of this Act as the Secretary of Commerce (hereinafter referred to as the "Secretary") may assign.

ADVISORY POLICY BOARD

SEC. 4. (a) To advise the Secretary in the performance of functions authorized by this Act, there is created an Area Redevelopment Advisory Policy Board (hereinafter referred to as the "Board"), which shall consist of the following members, all ex officio: the Secretary as Chairman; the Secretaries of Agriculture; Health, Education, and Welfare; Interior; Labor; and Treasury; and the Administrators of the Housing and Home Finance Agency and the Small Business Administration. The Chairman may from time to time invite the participation of officials of other agencies of the executive branch interested in the functions herein authorized. Each member of the Board may designate an officer of his agency to act for him as a member of the Board with respect to any matter there considered.

(b) The Secretary shall appoint a National Public Advisory Committee on Area Redevelopment which shall consist of twenty-five members and shall be composed of representatives of labor, management, agriculture, State and local governments, and the public in general. From the members appointed to such Committee the Secretary shall designate a Chairman. Such Committee, or any duly established subcommittee thereof, shall from time to time make recommendations to the Secretary relative to the carrying out of his duties under this Act. Such Committee shall hold not less than two meetings during each calendar year.

(c) The Secretary is authorized from time to time to call together and confer with any persons, including representatives of labor, management, agriculture, and government, who can assist in meeting the problems of unemployment or underemployment in the several areas designated by the Secretary as redevelopment areas.

REDEVELOPMENT AREAS

SEC. 5. (a) The Secretary shall designate as "redevelopment areas" those areas within the United States in which he determines, upon the basis of standards generally comparable with those set forth in paragraphs (1) and (2), that there has existed substantial and persistent unemployment for an extended period of time. There shall be included among the areas so designated any area—

(1) where the Secretary of Labor finds that the rate of unemployment, excluding unemployment due primarily to temporary or

seasonal factors, is currently 6 per centum or more and has averaged at least 6 per centum for the qualifying time periods specified in paragraph (2); and

(2) where the Secretary of Labor finds that the annual average rate of unemployment has been at least—

(A) 50 per centum above the national average for three of the preceding four calendar years, or

(B) 75 per centum above the national average for two of the preceding three calendar years, or

(C) 100 per centum above the national average for one of the preceding two calendar years.

The Secretary of Labor shall find the facts and provide the data to be used by the Secretary in making the determinations required by this subsection.

(b) The Secretary shall also designate as "redevelopment areas" those areas (including Indian reservations) within the United States which do not meet the requirements set forth in subsection (a) but which he determines are among the highest in numbers and percentages of low-income families, and in which there exists a condition of substantial and persistent unemployment or underemployment. In making the designations under this subsection, the Secretary shall consider, among other relevant factors, the number of low-income farm families in the various rural areas of the United States, the proportion that such low-income families are of the total farm families of each of such areas, the relationship of the income levels of the families in each such area to the general levels of income in the United States, the current and prospective employment opportunities in each such area, the availability of manpower in each such area for supplemental employment, the extent of migration out of the area, and the proportion of the population of each such area which has been receiving public assistance from the Federal Government or from the State or States in which such area is located or from any municipality therein. In making these determinations the Secretary shall be guided, but not conclusively governed, by pertinent studies made, and information and data collected or compiled, by (1) departments, agencies, and instrumentalities of the Federal Government, (2) State and local governments, (3) universities and land-grant colleges, and (4) private organizations.

(c) Upon the request of the Secretary, the Secretary of Labor, the Secretary of Agriculture, the Secretary of the Interior, and such other heads of agencies as may be appropriate are authorized to conduct such special studies, obtain such information, and compile and furnish to the Secretary such data as the Secretary may deem necessary or proper to enable him to make the determinations provided for in subsection (b) of this section. The Secretary shall reimburse when appropriate, out of any funds appropriated to carry out the purposes of this Act, the foregoing officers for any expenditures incurred by them under this section.

(d) As used in this Act, the term "redevelopment area" refers to any area within the United States which has been designated by the Secretary as a redevelopment area.

LOANS AND PARTICIPATIONS

SEC. 6. (a) The Secretary is authorized to purchase evidences of indebtedness and to make loans (which for purposes of this section shall include participations in loans) to aid in financing any project within a redevelopment area for the purchase or development of land and facilities (including, in exceptional cases, machinery and equipment) for industrial or commercial usage, including the construction of new buildings, the rehabilitation of abandoned or unoccupied buildings, and the alteration, conversion, or enlargement of existing buildings. Such financial assistance shall not be extended for working capital, or to assist establishments relocating, totally or partially, from one area to another.

(b) Financial assistance under this section shall be on such terms and conditions as the Secretary determines, subject, however, to the following restrictions and limitations:

(1) The total amount of loans (including purchased evidences of indebtedness) outstanding at any one time under this section (A) with respect to projects in redevelopment areas designated under section 5(a) shall not exceed $100,000,000 and (B) with respect to projects in redevelopment areas designated under section 5(b) shall not exceed $100,000,000.

(2) Such assistance shall be extended only to applicants, both private and public (including Indian tribes), approved for such assistance by the State (or any agency or instrumentality thereof concerned with problems of economic development) in which the project to be financed is or will be located.

(3) The project for which financial assistance is sought must be reasonably calculated to provide more than a temporary alleviation of unemployment or underemployment within the redevelopment area wherein it is, or will be, located.

(4) No such assistance shall be extended hereunder unless the financial assistance applied for is not otherwise available from private lenders or other Federal agencies on reasonable terms.

(5) The Secretary shall not make any loan without a participation unless he determines that the loan cannot be made on a participation basis.

(6) No evidences of indebtedness shall be purchased and no loans shall be made unless it is determined that there is a reasonable assurance of repayment.

(7) Subject of section 12(5) of this Act, no loan, including renewals or extension thereof, may be made hereunder for a period exceeding twenty-five years and no evidences of indebtedness maturing more than twenty-five years from date of purchase may be purchased hereunder: *Provided*, That the foregoing restrictions on maturities shall not apply to securities or obligations received by the Secretary as a claimant in bankruptcy or equitable reorganization or as a creditor in other proceedings attendant upon insolvency of the obligor.

(8) Loans made and evidences of indebtedness purchased under this section shall bear interest at a rate equal to the rate of interest paid by the Secretary on funds obtained from the Secretary of the Treasury as provided in section 9(d)(1) of this Act, plus one-half of 1 per centum per annum to cover administrative expenses and to provide for losses on loans made and evidences of indebtedness purchased under this section.

(9) Such assistance shall not exceed 65 per centum of the aggregate cost to the applicant (excluding all other Federal aid in connection with the undertaking) of acquiring or developing land and facilities (including, in exceptional cases, machinery and equipment), and of constructing, altering, converting, rehabilitating, or enlarging the building or buildings of the particular project, and shall, among others, be on the condition that—

(A) other funds are available in an amount which, together with the assistance provided hereunder, shall be sufficient to pay such aggregate cost;

(B) not less than 10 per centum of such aggregate cost be supplied by the State or any agency, instrumentality, or political subdivision thereof, or by a community or area organization which is nongovernmental in character, as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal financial assistance;

(C) in extending financial assistance under this section with respect to a redevelopment area, the Secretary shall require that not less than 5 per centum of the aggregate cost of the project for which such assistance is extended shall be supplied by nongovernmental sources as equity capital or as a loan repayable only after the Federal financial assistance extended under this section has been repaid in full according to the terms thereof and, if such a loan is secured, its security shall be subordinate and inferior to the lien or liens securing such Federal financial assistance; and

(D) to the extent the Secretary finds such action necessary to encourage financial participation in a particular project by other lenders and investors, and except as otherwise provided in subparagraphs (B) and (C), any Federal financial assistance extended under this section may be repayable only after other loans made in connection with such project have been repaid in full, and the security, if any, for such Federal financial assistance may be subordinate and inferior to the lien or liens securing other loans made in connection with the same project.

(10) No such assistance shall be extended unless there shall be submitted to and approved by the Secretary an overall program for the economic development of the area and a finding by the State, or any agency, instrumentality, or local political subdivision thereof, that the project for which financial assistance is sought is consistent with such program: *Provided*, That nothing in this Act shall authorize financial assistance for any project prohibited by laws of the State or local political subdivision in which the project would be located.

LOANS FOR PUBLIC FACILITIES

SEC. 7. (a) Upon the application of any State, or political subdivision thereof, Indian tribe, or private or public nonprofit organization or association representing any redevelopment area or part thereof, the Secretary is authorized to make loans to assist in financing the purchase or development of land for public facility usage, and the construction, rehabilitation, alteration, expansion, or improvement of public facilities, within a redevelopment area, if he finds that—

(1) the project for which financial assistance is sought will tend to improve the opportunities, in the redevelopment area where such project is or will be located, for the successful establishment or expansion of industrial or commercial plants or facilities which will provide more than a temporary alleviation of unemployment or underemployment in such area;

(2) the funds requested for such project are not otherwise available on reasonable terms;

(3) the amount of the loan plus the amount of other available funds for such project are adequate to insure the completion thereof;

(4) there is a reasonable expectation of repayment; and

(5) such area has an approved economic development program as provided in section 6(b)(10) and the project for which financial assistance is sought is consistent with such program.

(b) Subject to section 12(5), the maturity date of any such loan shall be not later than forty years after the date such loan is

made. Any such loan shall bear interest at a rate equal to the rate of interest paid by the Secretary on funds obtained from the Secretary of the Treasury as provided in section 9(d)(2) of this Act, plus one-quarter of 1 per centum per annum.

(c) The total amount of loans outstanding at any one time under this section shall not exceed $100,000,000.

(d) No financial assistance shall be extended under this section with respect to any public facility which would compete with an existing privately owned public utility rendering a service to the public at rates or charges subject to regulation by a State regulatory body, unless the State regulatory body determines that in the area to be served by the public facility for which the financial assistance is to be extended there is a need for an increase in such service (taking into consideration reasonably foreseeable future needs) which the existing public utility is not able to meet through its existing facilities or through an expansion which it is prepared to undertake.

GRANTS FOR PUBLIC FACILITIES

SEC. 8. (a) Upon the application of any State, or political subdivision thereof, Indian tribe, or private or public nonprofit organization or association representing any redevelopment area or part thereof, the Secretary is authorized to make grants for land acquisition or development for public facility usage, and the construction, rehabilitation, alteration, expansion, or improvement of public facilities, within a redevelopment area, if he finds that—

(1) the project for which financial assistance is sought will tend to improve the opportunities, in the redevelopment area where such project is or will be located, for the successful establishment or expansion of industrial or commercial plants or facilities which will provide more than a temporary alleviation of unemployment or underemployment in such area;

(2) the entity requesting the grant proposes to contribute to the cost of the project for which such grant is requested in proportion to its ability so to contribute;

(3) the project for which a grant is requested will fulfill a pressing need of the area, or part thereof, in which it is, or will be, located, and there is little probability that such project can be undertaken without the assistance of a grant under this section; and

(4) the area for which a project is to be undertaken has an approved economic development program as provided in section 6(b)(10), and such project is consistent with such program.

The amount of any grant under this section for any such project shall not exceed 65 per centum of the difference between the funds which can be practicably obtained from loans (including a loan under section 7 of this Act) and from other Federal sources for such project, and the amount which is necessary to insure the completion thereof.

(b) The Secretary shall by regulation provide for the supervision of projects with respect to which grants are made under this section so as to insure that Federal funds are not wasted or dissipated.

(c) No financial assistance shall be extended under this section with respect to any public facility which would compete with an existing privately owned public utility rendering a service to the public at rates or charges subject to regulation by a State regulatory body, unless the State regulatory body determines that in the area to be served by the public facility for which the financial assistance is to be extended there is a need for an increase in such service (taking into consideration reasonably forseeable future needs) which the existing public utility is not able to meet through its existing facilities or through an expansion which it is prepared to undertake.

(d) There is hereby authorized to be appropriated not to exceed $75,000,000 for the purpose of making grants under this section.

AREA REDEVELOPMENT FUND

SEC. 9. (a) There is hereby established in the Treasury of the United States an area redevelopment fund (hereinafter referred to as the "fund"), which shall be available to the Secretary for the purpose of extending financial assistance under sections 6 and 7 and for the payment of all obligations and expenditures arising therefrom.

(b) When requested by the Secretary, advances shall be made to the fund from the appropriations made therefor. There is hereby authorized to be appropriated for the purpose of making advances to the fund, without fiscal year limitation, an amount not exceeding $300,000,000.

(c) Receipts arising from the programs of assistance under sections 6 and 7 shall be credited to the fund. Any moneys in the fund determined by the Secretary to be in excess of current needs shall be credited to the appropriation from which advanced to be held for future advances to the fund.

(d) There shall be paid into miscellaneous receipts of the Treasury at the close of each fiscal year—

(1) interest, on advances made to the fund for use in extending financial assistance under section 6, at rates which shall be determined by the Secretary of the Treasury at the time the advances or commitments for advances are made after taking into consideration the current average market yields of outstanding marketable obligations of the United States having maturities comparable to loans made by the Secretary under section 6; and

(2) interest, on advances made to the fund for use in extending financial assistance under section 7, at rates which shall be determined by the Secretary of the Treasury at the time the advances or commitments for advances are made but which shall not be more than the higher of (A) 2½ per centum per annum or (B) the average annual interest rate on all interest-bearing obligations of the United States then forming a part of the public debt as computed at the end of the fiscal year next preceding the making of such advances or commitments and adjusted to the nearest one-eighth of 1 per centum.

(e) The fund shall contribute to the civil service retirement and disability fund a sum as provided by section 4(a) of the Civil Service Retirement Act (5 U.S.C. 2254(a)), except that such sum shall be determined by applying to the total basic salaries (as defined in that Act) paid to employees performing activities authorized under sections 6 and 7 of this Act and covered by that Act the per centum rate determined annually by the Civil Service Commission to be the excess of the total normal cost per centum rate of the civil service retirement system over the employee deduction rate specified in such section 4(a). The fund shall also pay into the Treasury as miscellaneous receipts that portion of the cost of administration of the civil service retirement and disability fund attributable to employees performing activities authorized under sections 6 and 7 of this Act, as determined by the Civil Service Commission.

(f) In the performance of and with respect to the functions, powers, and duties vested in him by sections 6 and 7 of this Act, the Secretary shall—

(1) prepare annually and submit a budget program in accordance with the provisions of sections 102, 103, and 104 of the Government Corporation Control Act, as amended; and

(2) determine the character of and the necessity for obligations and expenditures and the manner in which they shall be incurred, allowed, and paid, subject to provisions of law specifically applicable to Government corporations.

INFORMATION

SEC. 10. The Secretary shall aid redevelopment areas and other areas by furnishing to interested individuals, communities, industries, and enterprises within such areas any assistance, technical information, market research, or other forms of assistance, information, or advice which are obtainable from the various departments, agencies, and instrumentalities of the Federal Government and which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment within such areas. The Secretary shall furnish the procurement divisions of the various departments, agencies, and other instrumentalities of the Federal Government with a list containing the names and addresses of business firms which are located in redevelopment areas and which are desirous of obtaining Government contracts for the furnishing of supplies or services, and designating the supplies and services such firms are engaged in providing.

TECHNICAL ASSISTANCE

SEC. 11. In carrying out his duties under this act the Secretary is authorized to provide technical assistance which would be useful in alleviating or preventing conditions of excessive unemployment or underemployment (1) to areas which he has designated as redevelopment areas under this Act, and (2) to other areas which he finds have substantial need for such assistance. Such assistance shall include studies evaluating the needs of, and developing potentialities for, economic growth of such areas. Such assistance may be provided by the Secretary through members of his staff or through the employment of private individuals, partnerships, firms, corporations, or suitable institutions, under contracts entered into for such purposes. Appropriations are hereby authorized for the purposes of this section in an amount not to exceed $4,500,000 annually.

POWERS OF SECRETARY

SEC. 12. In performing his duties under this Act, the Secretary is authorized to—

(1) adopt, alter, and use a seal, which shall be judicially noticed;

(2) hold such hearings, sit and act at such times and places, and take such testimony, as he may deem advisable;

(3) request directly from any executive department, bureau, agency, board, commission, office, independent establishment, or instrumentality information, suggestions, estimates, and statistics needed to carry out the purposes of this Act; and each department, bureau, agency, board, commission, office, establishment, or instrumentality is authorized to furnish such information, suggestions, estimates, and statistics directly to the Secretary;

(4) under regulations prescribed by him, assign or sell at public or private sale, or otherwise dispose of for cash or credit, in his discretion and upon such terms and conditions and for such consideration as he shall determine to be reasonable, any evidence of debt, contract, claim, personal property, or security assigned to or held by him in connection with loans made or evidences of indebtedness purchased under this Act, and collect or compromise all obligations assigned to or held by him in connection with such loans or evidences of indebtedness until such time as such obligations may be referred to the Attorney General for suit or collection;

(5) further extend the maturity of or renew any loan made or evidence of indebtedness purchased under this Act, beyond the periods stated in such loan or evidence of indebtedness or in this Act, for additional periods not to exceed ten years, if such extension or renewal will aid in the orderly liquidation of such loan or evidence of indebtedness;

(6) deal with, complete, renovate, improve, modernize, insure, rent, or sell for cash or credit, upon such terms and conditions and for such consideration as he shall determine to be reasonable, any real or personal property conveyed to, or otherwise acquired by, him in connection with loans made or evidences of indebtedness purchased under this Act;

(7) pursue to final collection, by way of compromise or other administrative action, prior to reference to the Attorney General, all claims against third parties assigned to him in connection with loans made or evidences of indebtedness purchased under this Act. This shall include authority to obtain deficiency judgments or otherwise in the case of mortgages assigned to the Secretary. Section 3709 of the Revised Statutes, as amended (41 U.S.C. 5), shall not apply to any contract of hazard insurance or to any purchase or contract for services or supplies on account of property obtained by the Secretary as a result of loans made or evidences of indebtedness purchased under this Act if the premium therefor or the amount thereof does not exceed $1,000. The power to convey and to execute in the name of the Secretary, deeds of conveyance, deeds of release, assignments and satisfactions of mortgages, and any other written instrument relating to real or personal property or any interest therein acquired by the Secretary pursuant to the provisions of this Act may be exercised by the Secretary or by any officer or agent appointed by him for that purpose without the execution of any express delegation of power or power of attorney;

(8) acquire, in any lawful manner, any property (real, personal, or mixed, tangible or intangible), whenever deemed necessary or appropriate to the conduct of the activities authorized in sections 6 and 7 of this Act;

(9) in addition to any powers, functions, privileges, and immunities otherwise vested in him, take any and all actions, including the procurement of the services of attorneys by contract, determined by him to be necessary or desirable in making, purchasing, servicing, compromising, modifying, liquidating, or otherwise administratively dealing with or realizing on loans made or evidences of indebtedness purchased under this Act;

(10) to such an extent as he finds necessary to carry out the provisions of this Act, procure the temporary (not in excess of six months) service of experts or consultants or organizations thereof, including stenographic reporting services, by contract or appointment, and in such cases such service shall be without regard to the civil service and classification laws, and, except in the case of stenographic reporting services by organizations, without regard to section 3709 of the Revised Statutes (41 U.S.C. 5); any individual so employed may be compensated at a rate not in excess of $75 per diem, and, while such individual is away from his home or regular place of business, he may be allowed transportation and not to exceed $15 per diem in lieu of subsistence and other expenses;

(11) sue and be sued in any court of record of a State having general jurisdiction or in any United States district court, and jurisdiction is conferred upon such district court to determine such controversies without regard to the amount in controversy; but no attachment, injunction, garnishment, or other similar process, mesne or final, shall be issued against the Secretary or his property. Nothing herein shall be construed to except the activities under this Act from the application of sections 507(b) and 2679 of title 28, United States Code, and of section 367 of the Revised Statutes (5 U.S.C. 316); and

(12) establish such rules, regulations, and procedures as he may deem appropriate in carrying out the provisions of this Act.

TERMINATION OF ELIGIBILITY FOR FURTHER ASSISTANCE

SEC. 13. Whenever the Secretary shall determine that employment conditions within any area previously designated by him as a redevelopment area have changed to such an extent that such area is no longer eligible for such designation under section 5 of this Act, no further assistance shall be granted under this Act with respect to such area and, for the purposes of this Act, such area shall not be considered a redevelopment area: *Provided*, That nothing contained herein shall (1) prevent any such area from again being designated a redevelopment area under section 5 of this Act if the Secretary determines it to be eligible under such section, or (2) affect the validity of any contracts or undertakings with respect to such area which were entered into pursuant to this Act prior to a determination by the Secretary that such area no longer qualifies as a redevelopment area. The Secretary shall keep the departments and agencies of the Federal Government, and interested State or local agencies, advised at all times of any changes made hereunder with respect to the designation of any area.

URBAN RENEWAL

SEC. 14. Title I of the Housing Act of 1949, as amended, is amended by adding at the end thereof the following new section:

"REDEVELOPMENT AREAS UNDER THE AREA REDEVELOPMENT ACT

"SEC. 113. (a) Whenever the Secretary of Commerce certifies to the Administrator (1) that any county, city, or other municipality (in this section referred to as a 'municipality') is situated in an area designated under section 5 of the Area Redevelopment Act as a redevelopment area, and (2) that there is a reasonable probability that with assistance provided under such Act and other undertakings the area will be able to achieve more than temporary improvement in its economy, the Administrator is authorized to provide financial assistance to a local public agency in any such municipality under this title and the provisions of this section.

"(b) Subject to the provisions of subsection (e) of this section, the Administrator may provide such financial assistance under this section without regard to the requirement or limitations of section 110(c) that the project area be predominantly residential in character or be redeveloped for predominantly residential uses under the urban renewal plan, and without regard to any of the limitations of that section on the undertaking of projects for predominantly nonresidential uses.

"(c) Notwithstanding any other provision of this title, a contract for financial assistance under this section may include provisions permitting the disposition of any land in the project area designated under the urban renewal plan for industrial or commercial uses to any public agency or nonprofit corporation for subsequent disposition as promptly as practicable by such public agency or corporation for the redevelopment of the land in accordance with the urban renewal plan: *Provided*, That any disposition of such land to such public agency or corporation under this section shall be made at its fair value for uses in accordance with the urban renewal plan: *And provided further*, That only the purchaser from or lessees of such public agency or corporation, and their assignees, shall be required to assume the obligations relating to the commencement of improvements imposed under section 105(b) hereof.

"(d) Following the execution of any contract for financial assistance under this section with respect to any project, the Administrator may exercise the authority vested in him under this section for the completion of such projects, notwithstanding any determination made after the execution of such contract that the area in which the project is located is no longer a redevelopment area under the Area Redevelopment Act.

"(e) Not more than 10 per centum of the funds authorized for capital grants under section 103 after the date of the enactment of the Area Redevelopment Act shall be used for the purpose of providing financial assistance under this section. Amounts used for such purpose shall not be taken into account for the purpose of the limitation contained in the second proviso of the fifth sentence of section 110(c)."

URBAN PLANNING GRANTS

SEC. 15. Paragraph (3) of section 701(a) of the Housing Act of 1954 is amended by inserting after "counties which" the following: "(A) are situated in areas designated by the Secretary of Commerce under section 5(a) of the Area Redevelopment Act as redevelopment areas or (B)".

OCCUPATIONAL TRAINING

SEC. 16. (a) The Secretary of Labor is authorized, upon request and whenever he determines such studies are needed, to undertake, or to provide assistance to others for, studies of the size, characteristics, skills, adaptability, occupational potentialities, and related aspects of the labor force of any redevelopment area.

(b) When a redevelopment area has an approved economic development program as provided in section 6(b)(10), the Secretary of Labor, in consultation with the Secretary and the Secretary of Agriculture, shall determine the occupational training or retraining needs of unemployed and underemployed individuals residing in the redevelopment area. The Secretary of Labor shall notify the Secretary of Health, Education, and Welfare of the occupational training or retraining requirements of the area, and shall provide for the orderly selection and referral of those unemployed or underemployed individuals residing in the area who can reasonably be expected to obtain employment as a result of the skill they will acquire in the training which is to be made available. The Secretary of Labor shall cooperate with the Secretary of Health, Education, and Welfare and with existing State and local agencies and officials in charge of existing programs relating to vocational training and retraining for the purpose of assuring that the facilities and services of such agencies are made fully available to such individuals.

(c) Whenever the Secretary of Labor finds that additional facilities or services are needed in the area to meet the occupational training or retraining needs of such individuals, he shall so advise the Secretary of Health, Education, and Welfare. The Secretary of Health, Education, and Welfare shall provide assistance, including financial assistance when necessary, to the appropriate State vocational educational agency in the provision of such additional facilities or services. If the Secretary of Health, Education, and Welfare finds that the State vocational educational agency is unable to provide the facilities and services needed, he may, after consultation with such agency, provide for the same by agreement or contract with public or private educational institutions.

(d) The Secretary of Labor shall arrange to provide any necessary assistance for setting up apprenticeships, and to promote journeyman and other on-the-job training.

(e) There are hereby authorized to be appropriated such sums, not in excess of $4,500,000 annually, as may be necessary to carry out the provisions of this section.

(f) In providing assistance under this section with respect to unemployed and underemployed individuals residing in redevelopment areas, the Secretary of Labor and the Secretary of Health, Education, and Welfare shall give consideration to the special needs of individuals who are agricultural workers or are engaged in other seasonal occupations and who require occupational training in order to qualify them to engage in supplementary employment during the off season and during other periods of reduced activity in the field of their regular or primary occupations.

RETRAINING SUBSISTENCE PAYMENTS

SEC. 17. (a) The Secretary of Labor in consultation with the Secretary and the Secretary of Agriculture may, on behalf of the United States, enter into agreements with States in which redevelopment areas are located, under which the Secretary of Labor shall make payments to such States either in advance or by way of reimbursement for the purpose of enabling such States, as agents of the United States, to make weekly retraining payments to unemployed or underemployed individuals residing within such redevelopment areas who are certified by the Secretary of Labor to be undergoing occupational training or retraining under section 16 of this Act. Such payments shall be made for a period not exceeding sixteen weeks, and the amount of any such payment for any week shall not exceed the amount of the average weekly unemployment compensation payment (including allowances for dependents) payable for a week of total unemployment in the State making such payments.

(b) No weekly retraining payment shall be made to any person otherwise eligible who, with respect to the week for which such payment would be made, has received or is seeking unemployment compensation under title XV of the Social Security Act or any other Federal or any State unemployment compensation law, but if the appropriate State or Federal agency finally determines that a person denied benefits for any week because of this subsection was not entitled to unemployment compensation under title XV of the Social Security Act or such Federal or State law with respect to such week, this subsection shall not apply with respect to such week.

(c) Any agreement under this section may contain provisions (including, so far as may be appropriate, provisions authorized or made applicable with respect to agreements concluded by the Secretary of Labor pursuant to title XV of the Social Security Act) as will promote effective administration, protect the United States against loss, and insure the proper application of payments made to the State under such agreement. Except as may be provided in such agreements, or in the rules and regulations prescribed pursuant to subsection (d) of this section, determinations by any duly designated officer or agency as to the eligibility of individuals for weekly retraining payments under this section shall be final and conclusive for any purposes and not subject to review by any court or any other officer.

(d) The Secretary of Labor and the Secretary shall jointly prescribe such rules and regulations as they may deem necessary to carry out the provisions of this section.

(e) There are hereby authorized to be appropriated such sums, not in excess of $10,000,000 annually, as may be necessary to carry out the provisions of this section.

PENALTIES

SEC. 18. (a) Whoever makes any statement knowing it to be false, or whoever willfully overvalues any security, for the purpose of obtaining for himself or for any applicant any financial assistance under section 6, 7, or 8, or any extension thereof by renewal, deferment of action, or otherwise, or the acceptance, release, or substitution of security therefor, or for the purpose of influencing in any way the action of the Secretary, or for the purpose of obtaining money, property, or anything of value, under this Act, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

(b) Whoever, being connected in any capacity with the Secretary, in the administration of this Act (1) embezzles, abstracts, purloins, or willfully misapplies any moneys, funds, securities, or other things of value, whether belonging to him or pledged or otherwise entrusted to him, or (2) with intent to defraud the Secretary or any other body politic or corporate, or any individual, or to deceive any officer, auditor, or examiner, makes any false entry in any book, report, or statement of or to the Secretary, or without being duly authorized draws any order or issues, puts forth, or assigns any note, debenture, bond, or other obligation, or draft, bill of exchange, mortgage, judgment, or decree thereof, or (3) with intent to defraud participates or shares in or receives directly or indirectly any money, profit, property, or benefit through any transaction, loan, grant, commission, contract, or any other act of the Secretary, or (4) gives any unauthorized information concerning any future action or plan of the Secretary which might affect the value of securities, or having such knowledge invests or speculates, directly or indirectly, in the securities or property of any company or corporation receiving loans, grants, or other assistance from the Secretary, shall be punished by a fine of not more than $10,000 or by imprisonment for not more than five years, or both.

EMPLOYMENT OF EXPEDITERS AND ADMINISTRATIVE EMPLOYEES

SEC. 19. No financial assistance shall be extended by the Secretary under sections 6, 7, or 8 to any business enterprise unless the owners, partners, or officers of such business enterprise (1) certify to the Secretary the names of any attorneys, agents, and other persons engaged by or on behalf of such business enterprise for the purpose of expediting applications made to the Secretary for assistance of any sort, under this Act, and the fees paid or to be paid to any such person; and (2) execute an agreement binding such business enterprise, for a period of two years after such assistance is rendered by the Secretary to such business enterprise, to refrain from employing, tendering any office or employment to, or retaining for professional services, any person who, on the date such assistance or any part thereof was rendered, or within one year prior thereto shall have served as an officer, attorney, agent, or employee, occupying a position or engaging in activities which the Secretary shall have determined involve discretion with respect to the granting of assistance under this Act.

RECORD OF APPLICATIONS

SEC. 20. The Secretary shall maintain as a permanent part of the records of the Department of Commerce a list of applications approved for financial assistance under section 6, 7, or 8, which shall be kept available for public inspection during the regular business hours of the Department of Commerce. The following information shall be posted in such list as soon as each application is approved: (1) the name of the applicant and, in the case of corporate applications, the names of the officers and directors thereof (2) the amount and duration of the loan or grant for which application is made, (3) the purposes for which the proceeds of the loan or grant are to be used, and (4) a general description of the security offered in the case of a loan.

PREVAILING RATE OF WAGE AND FORTY-HOUR WEEK

SEC. 21. All laborers and mechanics employed by contractors or subcontractors on projects assisted by the Secretary under this Act and undertaken by public applicants shall be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act, as amended (40 U.S.C. 276a—276a-5), and every such employee shall receive compensation at a rate not less than one and one-half times his basic rate of pay for all hours worked in any workweek in excess of eight hours in any workday or forty hours in the workweek, as the case may be. The Secretary shall not extend any financial assistance under section 6, 7, or 8 for such a project without first obtaining adequate assurance that these labor standards will be maintained upon the construction work. The Secretary of Labor shall have, with respect to the labor standards specified in this provision, the authority and functions set forth in Reorganization Plan Numbered 14 of 1950 (15 F.R. 3176; 64 Stat. 1267; 5 U.S.C. 133z-15), and section 2 of the Act of June 13, 1934, as amended (48 Stat. 948, as amended; 40 U.S.C. 276c).

ANNUAL REPORT

SEC. 22. The Secretary shall make a comprehensive and detailed annual report to the Congress of his operations under this Act for each fiscal year beginning with the fiscal year ending June 30, 1962. Such report shall be printed and shall be transmitted to the Congress not later than January 3 of the year following the fiscal year with respect to which such report is made. Such report shall show, among other things, (1) the number and size of Government contracts for the furnishing of supplies and services placed with business enterprises located in redevelopment areas, and (2) the amount and duration of employment resulting from such contracts. Upon the request of the Secretary, the various departments and agencies of the Government engaged in the procurement of supplies and services shall furnish to the Secretary such information as may be necessary for the purposes of this section.

APPROPRIATION

SEC. 23. There are hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act.

USE OF OTHER FACILITIES

SEC. 24. (a) To the fullest extent practicable in carrying out the provisions of this Act the Secretary shall use the available services and facilities of other agencies and instrumentalities of the Federal Government, but only with their consent and on a reimbursable basis. The foregoing requirement shall be implemented by the Secretary in such a manner as to avoid the duplication of existing staffs and facilities in any agency or instrumentality of the Federal Government. The Secretary is authorized to delegate to the heads of other departments and agencies of the Federal Government any of the Secretary's functions, powers, and duties under this Act as he may deem appropriate, and to authorize the redelegation of such functions, powers, and duties by the heads of such departments and agencies.

(b) Departments and agencies of the Federal Government shall exercise their powers,

duties, and functions in such manner as will assist in carrying out the objectives of this Act. This Act shall be supplemental to any existing authority, and nothing herein shall be deemed to be restrictive of any existing powers, duties, and functions of any other department or agency of the Federal Government.

(c) Funds authorized to be appropriated under this Act may be transferred, with the approval of the Director of the Bureau of the Budget, between departments and agencies of the Government, if such funds are used for the purposes for which they are specifically authorized and appropriated.

(d) Subject to the standards and procedures prescribed by section 505 of the Classification Act of 1949, as amended, the head of any agency, for the performance of functions under this Act, including functions delegated pursuant to subsection (a), may place positions in grades 16, 17, and 18 of the General Schedule established by such Act, and such positions shall be in addition to the number of such positions authorized by section 505 of the Classification Act of 1949, as amended, to be placed in such grades: *Provided*, That not to exceed a total of five such positions may be placed in such grades under this subsection, to be apportioned among the agencies by the Secretary, with the approval of the Director of the Bureau of the Budget.

RECORDS AND AUDIT

SEC. 25. (a) Each recipient of assistance under section 6, 7, or 8 of this Act shall keep such records as the Secretary shall prescribe, including records which fully disclose the amount and the disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance is given or used, and the amount and nature of that portion of the cost of the project or undertaking supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Secretary and the Comptroller General of the United States, or any of their duly authorized representatives, shall have access for the purpose of audit and examination to any books, documents, papers, and records of the recipient that are pertinent to assistance received under section 6, 7, or 8 of this Act.

LOANS TO STATE AND LOCAL DEVELOPMENT COMPANIES

SEC. 26. Section 502 of the Small Business Investment Act of 1958 is amended by striking out paragraph (6).

STUDY BY SECRETARY

SEC. 27. Whenever the Department of Defense announces plans to deactivate or is in the process of deactivating any permanent military installation or major unit thereof and such installation is situated in an area in which the rate of unemployment is 6 per centum or more, the Secretary shall, upon the request of the Governor or Governors of the state or states in which the area is located, institute a study to determine the economic effects of the action which has been or is to be taken. In determining the economic effects of such action, the Secretary shall, among other relevant matters, consider and make findings with respect to the approximate amount of money which has been, or may reasonably be expected to be, saved by any department or agency of the Government as a result of such action, compared with—

(1) the approximate costs or losses which have been, or may reasonably be expected to be, incurred by other departments or agencies of the Government, or by State and local governmental units, as a result of such action;

(2) the approximate losses which have been, or may reasonably be expected to be, incurred by private interests as a result of such action in connection with any facilities which they have provided to serve the needs of any such installation and which would otherwise have to be provided in whole or in part by the Government;

(3) the approximate cost to the Government of relocating any such installation in the event that such installation has been, or will be, relocated; and

(4) the approximate cost to the Government of reactivating, in a national emergency or other contingency, any such installation with respect to which any such action is proposed to be taken.

Any such study shall be conducted as expeditiously as practicable, and the findings resulting therefrom shall be transmitted by the Secretary to the Secretary of Defense and to the Congress.

RESEARCH

SEC. 28. To assist in the long-range accomplishment of the purposes of this Act, the Secretary shall establish and conduct a continuing program of study and research designed to assist in determining the causes of unemployment, underemployment, underdevelopment, and chronic depression in the various areas of the Nation and in the Nation as a whole and in the formulation and implementation of national, State, and local programs which will raise income levels and otherwise produce solutions of the problems resulting from these conditions. The Secretary shall include in his annual report under section 22 a detailed statement concerning the study and research conducted under this section together with his findings resulting therefrom and his recommendations for legislative and other action.

APPLICATION OF ACT

SEC. 29. As used in this Act, the terms "State", "States", and "United States" include the several States, the District of Columbia, the Commonwealth of Puerto Rico, the Virgin Islands, Guam, and American Samoa.

Mr. ROBERTSON. Mr. President, I move that the Senate disagree to the amendment of the House, request a conference thereon with the House, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. DOUGLAS, Mr. CLARK, Mr. PROXMIRE, Mr. WILLIAMS of New Jersey, Mr. MUSKIE, Mr. CAPEHART, Mr. BENNETT, and Mr. BUSH the conferees on the part of the Senate.

CLOSING OF THE SNARK MISSILE BASE AT PRESQUE ISLE, MAINE

Mrs. SMITH of Maine. Mr. President, this morning, at 9 o'clock, I received from the Department of the Air Force notification that it had been decided to close the Snark missile base at Presque Isle, Maine.

Upon receiving that notification, I made a public statement on the matter; and at this time I wish to repeat the statement, here in the Senate.

I regret that in the rapidly changing character of the security and defense of our country—and specifically in the development of the missile program—the long anticipated inactivation and termination of the now outmoded Snark program and the resulting scheduled closing of the Presque Isle Air Force Base have now become realities, as a result of the decision by President Kennedy.

The far easier course for me to pursue politically would be to vigorously protest this action and, as a Republican Senator, to point out that the decision was one made by a Democratic President, and to make a political attack on the decision of President Kennedy.

The far easier course for me to pursue politically would be to demand that the now outmoded Snark program be continued, so that the Presque Isle Air Force Base be kept operating, to aid the economy of the area and to avoid the impact and dislocation that its closing is bound to have on the economy of this area.

But in all good conscience I cannot do this, for this would simply be playing politics with our national security, our national defense, and our taxpayer's dollar. It would be submitting to the economic philosophy that our National Defense Establishment and our national security program must be operated primarily for the local economy.

I shall do what I can to help the Presque Isle area absorb the economic impact of this unpleasant decision made by President Kennedy; and while I can understand and appreciate the concern of the people of the area, I am confident that the great majority of the people of the area are not only fair-minded about this long anticipated development, but also are of such admirable self-reliance that they will meet the impact well and successfully.

Mr. MANSFIELD. Mr. President, will the Senator yield?

Mrs. SMITH of Maine. I am glad to yield.

Mr. MANSFIELD. I commend the distinguished senior Senator from Maine for the statement she has just made. To the best of my knowledge, she has never, in her many years in the Congress—and we have served together in the House as well as in the Senate—played politics with national defense or any other matter. I think her statement today is just another indication of the great work the distinguished Senator from Maine has done, and exemplifies the philosophy which has marked her through her entire political career.

Mrs. SMITH of Maine. I thank the distinguished majority leader for his usual thoughtfulness and his fair and understanding statement. I much appreciate his generous expressions.

Mr. MORSE. Mr. President, I wish to join in the remarks of the majority leader with regard to the services of the distinguished Senator from Maine [Mrs. SMITH]. I have always considered it a matter of great pride that I have been able to associate myself on so many occasions with the Senator from Maine on so many issues during our service in the Senate of the United States.

Mr. KUCHEL. Mr. President, I am happy to aline myself with the comments which the distinguished majority leader has made with respect to our colleague, the distinguished and very able senior Senator from Maine [Mrs. SMITH]. Once again, with courage, she speaks with high statesmanship. This is not the first time I have had the opportunity, on this floor, to salute our colleague.

Senator SMITH is a great American, not only in the efficient and productive labors which she has performed in the Senate Armed Services Committee, in which, it is conceded, she is an acknowledged expert, but in every one of the many productive labors which she performs as a Member of the Senate she has added luster not only to her own great reputation, but also to the reputation of the Senate of the United States.

It was not too many months ago that Senators on both sides of the aisle were happy to congratulate her on the longest continuous record of answering roll calls in the entire history of this parliamentary body. I am glad again, on this occasion, as the distinguished majority leader speaks as an American, to stand up and speak also as an American and to express my pride in being one of her colleagues.

I am sure neither the distinguished majority leader nor the distinguished Senator from Maine will take any umbrage whatsoever if I also say I am proud, as a Republican, to acknowledge her as a leader on this side of the aisle for progressive government in the United States.

MESSAGE OF ROMULO BETANCOURT, PRESIDENT OF REPUBLIC OF VENEZUELA, TO PRESIDENT KENNEDY

Mr. MORSE. Mr. President, I speak now as chairman of the Subcommittee on Latin American Affairs of the Senate Committee on Foreign Relations. In my judgment, Congress has a very important moral obligation, and also I think a legal obligation, to pass at a very early date the appropriation of $500 million to which I think the Congress committed itself last year when we authorized $500 million for an aid program, in the field of social progress, to Latin America.

A United States delegation went to the Bogotá Conference last fall based primarily, may I say, so far as its commitments at the Bogotá Conference are concerned, on that authorization. The record of that conference shows that the then Under Secretary Douglas Dillon and two congressional delegates from this body, the Senator from Iowa [Mr. HICKENLOOPER] and the senior Senator from Oregon, made clear this authorization of $500 million had been passed by the Congress and that it undoubtedly would be followed in this session of Congress with an appropriation.

The Congress should know that there are arising in Latin America some serious doubts and some pertinent questions as to whether or not Congress is going to fulfill its obligations.

My plea today is for early consideration, in both branches of Congress of passage of the appropriation of $500 million, on the basis of which the Bogotá Act was adopted at the conference in Bogotá, Colombia, last September.

In many countries in Latin America there are very serious situations developing, and some persons have said Venezuela is one of the key Latin American countries in the great contest between freedom and totalitarianism in Latin America.

There has been sent to me, in my capacity as chairman of the Subcommittee on Latin American Affairs, a message which the President of Venezuela, President Betancourt, has sent to the President of the United States. This is not a confidential memorandum, but is a memorandum of full public knowledge in Venezuela, and also of knowledge in various parts of the United States. In it, the President of Venezuela, very frankly and objectively, has called to the attention of the President and of the American people, some of the problems that confront Venezuela. I ask unanimous consent that the memorandum be printed in the RECORD at this point as a part of my remarks.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

TEXT OF THE MESSAGE OF RÓMULO BETANCOURT, PRESIDENT OF THE REPUBLIC OF VENEZUELA, TO HIS EXCELLENCY JOHN F. KENNEDY, PRESIDENT OF THE UNITED STATES OF AMERICA, TRANSMITTED BY CABLE TO THE EMBASSY OF VENEZUELA IN THE UNITED STATES OF AMERICA

MIRAFLORES, CARACAS,
March 23, 1961.

His Excellency JOHN F. KENNEDY,
President of the United States of America,
The White House,
Washington, D.C.

DEAR MR. PRESIDENT AND FRIEND: I have had an opportunity to read your address of March 13, 1961, delivered at the White House to the representatives of the Latin American governments. This affirmative message, which clears the way toward better inter-American comprehension and understanding, was delivered just 2 days after I had fulfilled my constitutional obligation to present an annual message to the Congress of the Republic of Venezuela. In that document I said clearly and sincerely that your first steps as Chief of State of the United State were an indication of a change of direction in U.S. conduct toward Latin America. I wish to transcribe for you the statements I made to the Venezuelan Parliament and nation, because they show how democratic government officials in this hemisphere are disposed to adopt a receptive, responsible attitude of optimism when the White House begins to speak a language that has not been heard since the days of Franklin Delano Roosevelt.

After referring to the message your Secretary of State sent to the Congress of the United States, urging it to make a legislative pronouncement regarding Dominican sugar that would be in accord with the concrete resolutions of the sixth meeting of Consultation of Ministers of Foreign Affairs, I continued:

"This attitude of President Kennedy is one more indication that the present President of the United States and his group of assistants are on the way toward correcting the repeated mistakes made by previous American administrations. In his inaugural address President Kennedy called on the peoples of America to join an 'Alliance for Progress' and said explicitly that his country desired 'to convert good words into good deeds * * * and to assist free governments in casting off the chains of poverty.' The peoples of Latin America aspire to nothing more and to nothing less. * * * The contacts I have already had with personal representatives of the present President of the United States lead me to believe that his administration will be receptive to the views which I have stated with clarifying frankness. And I can assure you that the task force chosen by the President of that country to coordinate its Latin American policy comprises men with whom I have ties of friendship and whom I know to be sincere in their desire for positive cooperation with our nations."

Some of the questions stated in my speech, which were a synthesis of anxieties noted not only in Venezuela but in other Latin American nations among whose people I have lived, are answered in your message of March 13, in which you outline 10 very concrete points to provide a basis of acts rather than promises for your "Alliance for Progress" program. The fulfillment of that plan will make it possible for this decade—unlike the last decade, which was one of frustration of Latin American hopes and deterioration of relations between the United States and the other Americas—to be a period of accelerated economic, social and cultural progress in the vast underdeveloped portion of the hemisphere, and of real understanding and friendship among the peoples and governments.

Your idea and that of your associates, that foreign contribution to the development of our economies and the improvement of our standards of living and of culture should be matched by our own sustained and firm efforts to help ourselves, is also widespread in Latin America. The time when it was possible for loans or financing to be solicited abroad for the sole benefit of governmental authorities lacking administrative ethics and of privileged minorities is coming to an end.

Honesty in the management of public funds is already a rule of conduct of many governmental authorities, and the idea is growing daily in Latin America that there should be a revolution, accomplished through agrarian reform and the extension of the economic, social, and cultural advantages of civilization to the millions of people who are today deprived of everything that makes life worth living. Such a revolution would be entirely within the bounds of law. It can be accomplished by evolutionary methods, without breaking the ties and commitments of the regional system we have established in the Organization of American States.

The stabilization of prices of our raw materials, the long-term reimbursable loans for economic development plans, and other measures mentioned in your message are requisites essential to a future solution of the problems of underdevelopment, a technical term which for easier understanding we might define as problems of poverty and misery that plague millions of Latin Americans. Together with the planning and the long-term credit, bold and speedy measures to meet economic, fiscal and social problems whose solution must be delayed and to which priority must be assigned, are imperative.

These immediate problems are found in all the countries of the hemisphere. In some of them, convalescing from prolonged tyrannies, it is necessary, for the very stability of the democratic regime faced with its obstinate enemies, to prove to the people that systems based on law, which respect human liberties, are more appropriate not only for promoting human dignity but also for seeking a solution of their crushing common problems.

I also wish especially to mention that part of your message in which you refer so explicitly to the need for all the American nations to have systems of government guaranteeing the freedoms of the people.

If the Charter of the Organization of American States, of which I had the honor

to be one of the drafters at the Ninth Inter-American Conference, held in Bogotá, is correctly interpreted, only representative governments that result from free elections, respect human rights, and guarantee human freedoms can belong to our juridical regional community. To give this rule greater force, the Government of Venezuela plans to present at the forthcoming Quito Conference a draft of an additional accord specifying and requiring that only such governments may belong to the regional community.

Accept, Mr. President, the renewed assurances of my esteem and friendship.

THE JOHN BIRCH SOCIETY

Mr. DODD. Mr. President, it is unfortunate for our society that opinions about communism frequently tend to polarize to extreme positions.

On the one hand, there have always been naive or softheaded people, ultraliberals who refuse to believe that communism can be all evil; who insist that the Communists are like ourselves and that, if we are prepared to be reasonable, coexistence with them is possible; who close their eyes to all the massive evidence that communism is an international conspiracy committed to the destruction of freedom and religion; who cry "witch hunt" or McCarthyism at every effort to investigate Communist front operations and Communist infiltration of government positions; who are not pro-Communist, but react with far greater emotion against every manifestation of anticommunism than they ever seem capable of displaying against communism.

At the other extreme, there are those who are sincerely anti-Communist but who believe that everyone who disagrees with them is either a Communist or a dupe of the Communists, that every political figure who has been guilty of an error in judgment or a policy that failed, is ipso facto, a member of the Communist conspiracy.

These extreme positions beget and encourage each other. The ultraliberal extremist becomes more extreme every time he is presented with evidence that someone has been the target of unjust or exaggerated accusations.

The ultraconservative extremist becomes more extreme, more set in his views, with every new manifestation of ultraliberal tolerance toward Communist and Communist-front operations.

For these reasons, Mr. President, I believe that the distinguished senior Senator from North Dakota performed a real service when he brought certain facts about the John Birch Society to the attention of this body on March 8.

Here is an organization which many thousands of sincere, dedicated citizens have joined because they are concerned over the Communist successes in recent years and would like to know more and to do something about it.

The evidence, however, suggests that many of those who joined the John Birch Society did so in ignorance of the real views of the leadership of the organization.

Mr. Robert Welch, the head of the John Birch Society, is certainly opposed to communism. But how does he oppose communism? Approximately 4 years ago he brought out a book entitled "The Politician," which was given limited circulation. In this book, Mr. Welch assailed Presidents Roosevelt, Truman, and Eisenhower, the late Secretary of State John Foster Dulles, Mr. Allen Dulles, head of the Central Intelligence Agency, Chief Justice Warren, Dr. Milton Eisenhower, and many others, as Communists or Communist agents.

To accuse people like President Eisenhower and John Foster Dulles and the others of being Communist agents is an affront to both decency and intelligence. It brings our leaders and our institutions into disrepute, it sows division, it makes it easier for the Communists and the ultraliberals to equate opposition to communism with political lunacy.

I believe, Mr. President, that the extreme views of Mr. Welch are not shared by the great majority of the sincere Americans who have joined the John Birch Society because of their genuine concern over communism. But these views cannot be dismissed out of hand as the individual views of one man. Mr. Welch happens to be the head of the organization. The views in question moreover are recent views, which Mr. Welch has never repudiated.

Quite inevitably, Mr. Welch's extremism has infected some of his more impressionable followers. It has come to my attention, for example, that the senior Senator from North Dakota and the senior Senator from California have been the targets of vicious, organized campaigns of letterwriting. The gist of these letters, some of them addressed directly to the Senators, some of them sent to local newspapers, is that the Senators in question are soft on communism or are dupes of the Communists. Sometimes these charges are made openly; sometimes they are made by innuendo and implication. The people who write these letters do not identify themselves as members of the John Birch Society, but no knowledgeable person has any doubts about the origins of this despicable campaign of harassment.

But I want to tell the people of America and, in particular, I want to tell the members of the John Birch Society, that there are no more stanch anti-Communists in our country than the senior Senator from North Dakota and the senior Senator from California. I consider the attacks on them to be beneath contempt.

I agree with the opinion expressed by the conservative Los Angeles Times in its editorial of March 12:

> If the John Birchers follow the program of their leader, they will bring our institutions into question exactly as the Communists try to do. They will sow distrust, and aggravate disputes, and they will weaken the very strong case for conservatism.

I believe that it weakens the anti-Communist cause and it plays into the hands of the Communists, when anti-communism can be associated with this kind of sweeping, irresponsible, and repugnant charges made against so many distinguished Americans.

Few men have held high public office without committing their quotas of blunders and miscalculations. For my own part, I believe that the free world has been guilty of many grave blunders in the postwar period—blunders committed because we failed to understand the true nature of communism. But it is the worst kind of madness to charge that all of these blunders were perpetrated under the direction of the Communist conspiracy by men who hold or have held the highest offices our country has to offer.

I want to commend the American press for bringing this situation to light. I welcome this evidence of vigor and initiative on the part of the press.

The press has a tremendous weapon for public good in the power of exposure. It has used it effectively in the case of the John Birch Society. But for some reason which I cannot understand it has not used this weapon anywhere near as effectively against the Fair Play for Cuba Committee, the various offshoots of the Communist peace offensive, and the other Communist-front operations in this country.

There is a job of political balancing to be done. For my own part, I would be more than satisfied if our press devoted as much column space in coming months to exposing the subterranean operations of the Communist Party in this country as they have in recent weeks to exposing the excesses of the John Birch Society.

Mr. KUCHEL. Mr. President, I am more grateful than I can say for the comments made by the distinguished Senator from Connecticut [Mr. DODD].

Mr. President, international communism has been and will continue to be an evil, dangerous worldwide conspiracy. Its intent continues to be to destroy freedom. It is the very antithesis of freedom. Everything which Americans hold dear is directly, completely opposite to international communism.

This country, under Democratic administrations and under Republican administrations, has demonstrated a courage and a zeal to maintain freedom, to deter Communist aggression, and, if necessary, to combat it.

We have in this country, regrettably, some few people who are guilty of treason. I suppose that is always the case in any society. There are some who would pull down the pillars and try to destroy the very freedom under which they are able to engage in their kind of ugly and reprehensible activity.

But there is an equal danger in this country from those who take shocking and unbelievable positions, who continue an extreme philosophy of objecting to every kind of progress, who point the finger at those who disagree with them, and say, "There walks a Communist."

It is a fantastic and incredible libel upon one of the world's great exponents of freedom when the head of this society accuses Dwight Eisenhower of being "a card-carrying Communist." Should the American people and the American Government let that kind of vile spleen be poured upon one who has given his whole life to dedicated service to America, through participation in the world's greatest war, as the top com-

mander, in which his armies emerged victorious, and through 8 years of unselfishly serving the American people as their Chief Executive?

Mr. President, I denounce anyone who makes that kind of false and contemptible charge.

Across the street sits the Chief Justice of the United States, another great American. People in this society besmirch his character.

Many of us in Government have been denounced and our names have been reviled by some members of this organization.

There are many good but mistaken people who belong to the John Birch Society, but there are some others who are neither good nor mistaken, and they are its leaders. Speaking for myself, I suggest to the Senate that a proper function of the Senate Government Operations Committee would be to call before it Mr. Welch of Massachusetts and ask him the basis upon which he makes these fantastic charges. Since he will be unable to document them, he should be made to apologize in public not alone to Eisenhower, not alone to Warren, but also to the people of the country.

Mr. YOUNG of North Dakota. Mr. President, I deeply appreciate the kind comments concerning me made by the distinguished Senator from Connecticut with respect to the John Birch Society and charges which have been leveled against me by its members.

I have been the subject of a barrage of letters written to every newspaper in my State which will carry them, which insinuate, at times, that I may be opposed to any movement which would contain communism and which charge me with all manner of things.

I believe that in my State the great majority of the members of the society are very good people, but they have been unaware of the type of person they have as a leader and the accusations he has been making. No one knows for sure exactly who are the members of the society; that is one of the difficult things in dealing with the organization. I do not know of more than a half dozen people in my State who will admit they belong to the organization.

Those who are members of the organization, for the most part, are very fine people. I believe they are honestly and sincerely trying to combat communism, and that one day they will repudiate the charges made by their leader, Robert Welch, against President Eisenhower and other fine patriotic citizens and leaders of our Nation.

HURRICANE MESA

Mr. BENNETT. Mr. President, in the special message on the defense budget which President Kennedy submitted to the Congress Tuesday, the President announced that he had directed the Secretary of Defense to take steps to inactivate and discontinue 21 oversea bases and 52 military installations in the United States, thought by the new administration to be excess to the defense needs of our country. Although not on the official list, one of the facilities to be closed by the Kennedy administration is the Hurricane Supersonic Research Site, located at Hurricane, Utah. This is an Air Force installation operated under contract by the Coleman Engineering Co., Inc., of Torrance, Calif. At this site, high speed rocket sled tests and aircraft crew escape systems are tested under the direction of the Air Force Flight Test Center, Air Research Development Command, Edwards Air Force Base, Calif.

The Hurricane test track is a comparatively new installation, first activated in 1954 and formerly referred to by the Air Force as Project Smart. The track is unique in many ways. It is located on a high plateau in southwestern Utah near Zion National Park and approximately 75 miles north of Grand Canyon National Park. HSRS provides the only known facility in the world on which a test item can be guided at supersonic speed over a 12,000-foot track, launched from a precipice 1,500 feet above the surrounding terrain, and then closely observed through a relatively horizontal free-flight path. The Air Force has two other test tracks, one at Edwards Air Force Base, Calif., and one at Holloman Air Force Base, N. Mex., and the Navy operates a track at the U.S. Naval Ordnance Test Station, Inyokern, Calif. All three of these installations have flat tracks, whereas the facility at Hurricane has the only elevated launch track.

The concept of an elevated launch facility was originated by the Wright Air Development Division as a means to provide an extended period of free-flight testing for aircraft escape systems. A comparable period of free flight before ground impact is not available to test items launched upward from moving vehicles on flat tracks. Flight characteristics can be more fully studied at the Hurricane track, because the free-flight feature provides designers and engineers time to study and evaluate stabilization and parachute recovery systems under conditions similar to those experienced in actual flight.

The Hurricane track was designed and originally constructed at a cost of $2.4 million. The present value of facilities and equipment at HSRS is $5.6 million. Approximately 3,508 acres have been utilized for this test facility. Of this total 2,851 acres were obtained under permit from the Department of Interior, 643 acres were leased from the State of Utah and 14 acres were leased from private individuals.

Mr. President, the Air Force has stated its reason for discontinuance of the Hurricane track, as follows:

> The Hurricane Supersonic Research Site (HSRS) was constructed primarily to test aircraft crew escape systems. At the present time the major use of this facility is divided between tests of conventional aircraft escape systems and aircraft capsule escape systems. With the decline of emphasis on new manned aircraft, the requirement for escape systems tests has accordingly been diminishing. We have recently completed a study of our requirements for future sled track operations, and have considered in this study a request by the Atomic Energy Commission to conduct certain tests on Air Force tracks. We have concluded that Air Force and AEC testing can be accomplished on two tracks instead of three. Accordingly, we plan to discontinue operations at Hurricane Mesa at the expiration of the present contract on June 30, 1961.

I cannot quarrel with the principle of economy and the need for elimination of duplication wherever it may exist in our Defense Departments or other governmental agencies. However, I do question whether the correct decision has been made as to which track should be discontinued and which kept in operation. It is significant that the Hurricane track has unique features not available at any of the other tracks and that future testing of aircraft escape systems will be seriously hampered by the closing of HSRS. In this regard, I ask unanimous consent to place in the RECORD at the end of my speech, five communications testifying as to the continuing need for the Hurricane facility and showing that this track has particular advantages over the flat tracks which will be kept in operation. These communications are as follows: Lockheed Aircraft Corp., Vought Aeronautics, Grumman Aircraft Engineering Corp., Convair, Department of Navy Airborne Division.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Utah? The Chair hears none, and it is so ordered.

(See exhibit 1.)

Mr. BENNETT. Mr. President, another significant fact which I think should be taken into account is that the Hurricane track is the only one of the four now in operation which is operated by a private company under an Air Force contract. The decision to close this track is another body blow at private industry and runs contrary to the recommendations of the Hoover Commission of getting the Government out of all business-type activities. In this regard, this project is of particular importance to Washington County, Utah, because it constitutes the only industrial type activity in this area of the State. At present there are 65 permanently employed technicians at the site and the annual payroll is approximately half a million dollars. Although this may appear to be an insignificant amount, it is of major importance to this remote area of Utah, and its closing will create a real hardship, because there is no other industry to provide jobs or take up the slack when the testing track is closed.

Mr. President, I have sent a letter to the chairman of the Senate Armed Services Committee, asking that the Preparedness Subcommittee make a thorough study of the four existing tracks to determine whether, in the best interest of our Nation's defenses, the Hurricane track should be kept on operational status.

I ask unanimous consent that the letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 16, 1961.

Hon. RICHARD B. RUSSELL,
Chairman, Armed Services Committee,
U.S. Senate,
Washington, D.C.

DEAR DICK: I am writing to request that the Senate Armed Services Committee make an investigation into the administration and operation of the four existing supersonic research track sites presently being operated by the Defense Establishment. Of the four, three are so-called flat tracks, the first at the Air Force Flight Test Center, Edwards Air Force Base, Calif.; the second at the Air Force Missile Development Center, Holloman Air Force Base, N. Mex.; and the third at the U.S. Naval Ordnance Test Station, Inyokern, Calif. The fourth is the Hurricane Supersonic Research Facility at Hurricane, Utah.

The investigation should look toward a recommendation leading to the more economic and equitable use of all four of the facilities. Although the Hurricane Mesa facility has many unique features of present and future value to the Defense Establishment, the Air Force has announced that it plans to cease activities at this facility on June 30, 1961. The Hurricane facility is the only elevated launch, high speed rocket test track facility in the United States. It has a precisely alined 12,000-foot track, ending at a 1,500-foot precipice. Beyond the precipice, a surveyed and instrumented range, 8 miles in length, now exists, and an extension of up to 75 miles south is practicable.

I understand that the Defense Establishment will be carrying out experimental activities well beyond next June 30, which the unique Hurricane facilities could carry out, and for which a flat track is technically and economically unsound.

Currently testing continues at Hurricane on the USAF B–58 and B–70 escape capsule programs. Continuance of these programs well into fiscal year 1962, beyond the projected closing of the Hurricane facility, is most likely. Considerable repetitive qualification testing to insure acceptable reliability is absolutely necessary to insure capsule occupant safety. The flat tracks would not insure such safety.

It is also my understanding that live subject tests with the B–58 capsule carrying chimpanzee subjects and later a human occupant are planned by the Air Force. If the Hurricane track is not available, the ejection tests with the capsule must be made from an actual B–58 aircraft or some other aircraft modified to accept the capsule. If any failure of the ejection system or other parts of the capsule occurs, the release of the capsule into the airstream can constitute a major hazard to the safety of the entire aircraft and crew. Prior to the inception of the Hurricane research activity, an aircraft and crew were lost at El Centro, NAAS, California, in such a program of inflight ejection of escape systems.

Many successful live subject tests have already been conducted at Hurricane for the Aeromedical Laboratory, Wright Air Development Division. Utilization of the Hurricane facility for live subject qualification tests for the B–58 and B–70 has been technically and economically proved during these previous test programs. Again I wish to emphasize that flat tracks are technically and economically unsound as well as unsafe for such testing.

In addition, the U.S. Navy plans to convert many of its current aircraft to the rocket seat escape system. Considerable testing during fiscal year 1962 is expected from the U.S. Navy and its civilian contractors if the Hurricane facility were available for use. If Hurricane is not used, these Navy programs will be run at the naval ordnance test station flat track, with the very real possibility of economic disadvantage.

In addition, the Hurricane facility has economic advantages in carrying out research on the Chance Vought nose capsule, aerospace vehicle development, testing of aircraft escape systems including missile launching from sleds, warhead testing, and parachute testing.

I am attaching a copy of a detailed statement listing the many economic advantages which the Hurricane facility has over all other test tracks.

I feel, too, that the proposed investigation should consider the possibility of combining all defense research tracks under the Defense Department, removing them from the jurisdiction of the individual services. This would insure against what to me is the apparent lack of coordination in the operation of these facilities. Furthermore, an effort should be made to coordinate the activities of the Atomic Energy Commission track testing with those of the Defense Establishment.

I sincerely hope that the Armed Services Committee will take favorable action on my proposal.

With kindest personal regards.

Sincerely,

WALLACE F. BENNETT.

Mr. BENNETT. Mr. President, I have received assurances from both the Senator from Georgia [Mr. RUSSELL], chairman of the Armed Services Committee, and from the Senator from Mississippi [Mr. STENNIS], chairman of the Subcommittee on Preparedness Investigating, that a complete investigation will be made into the operation of the various supersonic tracks and that a report on this matter will be made in the near future. Last week I arranged for the staff director of the Preparedness Subcommittee to meet with Mr. T. C. Coleman, president of the Coleman Engineering Co. and to discuss informally the operations of HSRS, and his views regarding the plans to close this defense facility. It is my hope that the subcommittee will develop evidence showing the need for the continuation of this facility and will be able to convince the Defense Department and the Air Force of the wisdom of canceling the closing order.

EXHIBIT 1

LOCKHEED AIRCRAFT CORP.,
Burbank, Calif., January 31, 1961.

FT/61–376
Subject: Cessation of operations at HSRS.
COLEMAN ENGINEERING CO.,
Torrance, Calif.
(Attention of project administrator, Hurricane Supersonic Research Site.)

GENTLEMEN: It has been brought to my attention through newspaper reports that operation of the Hurricane Supersonic Research Site will soon be terminated. If these reports are correct, I feel impelled to point out why I believe that such a step would be scientifically unwise and economically unsound.

Lockheed engineers have conducted test programs on missiles, aircraft, escape systems, etc. at every track available to the industry. First-hand knowledge, therefore, enables us to evaluate the relative capabilities and merits of these tracks. We know from experience that the variety of test programs, present and future, calls for a variety of facilities.

The Hurricane Supersonic Research Site was constructed for the specific purpose of providing "altitude" at the termination of a sled run. This "altitude," achieved by the long drop off the rim of Hurricane Mesa, serves two purposes. This extended free fall permits observation and data gathering from ejected packages far longer than on conventional tracks. From the economic standpoint, large sums can be saved when test objects are recovered by parachute rather than being dashed to pieces at trackside. Nowhere else is this unique and valuable capability available. Since the facilities offered by HSRS are so useful and yet are duplicated nowhere else in the United States, they certainly should not be abandoned. Research and development programs calling specifically for the special feature found only at HSRS can be conducted elsewhere only at extra cost in time, money, and degradation of the quality of results.

We are constantly being reminded of the vital importance of maintaining the high rate and quality of American advancement in aeronautics and space. At the same time, we are being impressed with the necessity for watching the dollars and practicing economy. It is our considered opinion that closing HSRS will be contrary to both of these high objectives, and we urge most strongly against such a step.

Very truly yours,

R. L. THOREN,
Chief Development Engineer.

VOUGHT AERONAUTICS,
February 7, 1961.

COLEMAN ENGINEERING CO.,
Torrance, Calif.
(Attention of Mr. A. H. Schlueter.)
Subject: Availability of test facilities at Hurricane Supersonic Research Site.

GENTLEMEN: This is to inquire as to whether Chance Vought should continue to consider the Hurricane Supersonic Research Site as an available test facility. To date, Chance Vought has used the facility on 17 high-speed sled tests and have evaluated many other test and development programs on the assumption that it would be available. Costs for these programs have been predicated on the high data recovery rate which is unique to this track because of the 1,500-foot cliff.

Chance Vought is now proposing that a certain amount of high-speed sled testing be done at HSRS to qualify the use of a rocket catapult on the Martin-Baker pilot escape system in the F8U airplane. The work is planned for later this year and will be similar to the tests Chance Vought has conducted in the past. However, there is some concern about the availability of the facility since Chance Vought has observed what appears to be an effort to curtail the amount of work done there. Some of the propulsion sleds have been moved to other tracks as well as some of the test work which was originally started at HSRS.

Of course, no one track user is likely to be cognizant of all aspects of the situation, but Chance Vought's experience may be of interest to the persons responsible for administering these important facilities. Since October 1957, this company has conducted 17 tests of pilot escape systems at HSRS. The close camera coverage during the long descent time afforded the ejected mass by the 1,500-foot escarpment, which is peculiar to HSRS, has proven invaluable. In nine of the tests, the parachute was expected to be open before the dummies returned to track level, but this was actually accomplished in only one. At least three major deficiencies in the escape systems would not have been detected if the tests had been conducted at a "flat" track where the ejected items are extensively damaged on impact with the ground. This damage greatly complicates the effort of discerning whether damage is caused by wind blast during

ejection or by premature impact with the ground. Aside from obtaining more complete and accurate data, there is a monetary saving which accrues from preventing damage to the equipment. Of the five instrumented dummies which were procured at a cost of $16,500 each for these tests, four are still serviceable.

If further high-speed testing of escape systems must be done at a flat track, Chance Vought would consider it necessary to fund for 50 percent more than the minimum number of tests, in order to take care of the contingencies associated with premature impact of ejected items with the ground.

Very truly yours,

S. LOVE,
Chief Engineer.

GRUMMAN AIRCRAFT ENGINEERING CORP.,
Bethpage, N.Y., January 13, 1961.

PROJECT MANAGER,
Hurricane Supersonic Research Site,
Torrance, Calif.
(Attention: Mr. Harry Schleuter.)

GENTLEMEN: We wish to express concern over the planned closing of the Hurricane Supersonic Research Site.

It is our opinion that the Hurricane Mesa track is the best available facility for aircraft escape system evaluation tests. While our particular experience with your facility has been only in the field of escape systems, we also feel certain that this track is superior for testing of many other components and systems.

Because of the planned closing of the Hurricane site, it has been necessary for us to conduct our most recent ejection seat tests at a flat track facility. The ejection capability demonstrated during the last run of this test series was estimated, from film data, to be minus 30 feet. Most of the test equipment was destroyed during this run. At HSRS, all of this equipment would have been saved. Furthermore, the values of parachute sink rate, system stability and overall system capability could have been measured rather than estimated.

The earlier program conducted for Grumman at HSRS was entirely successful. We found the track characteristics excellent, and we consider that the manner in which our tests were conducted by the track operators was superior. The test results were, in turn, highly satisfactory.

We are currently planning a series of sled tests for the escape system of an aircraft now in development. We would like to have HSRS available as a potential site for this test and we, therefore, are particularly interested in having every consideration given to retaining HSRS as an active facility.

Respectfully,

JOHN KARANIK,
Chief, Systems Design.

FORT WORTH, TEX.
Subject: Curtailment of activities at HSRS.
HURRICANE SUPERSONIC RESEARCH SITE,
Hurricane, Utah.
(Attention: Project manager.)

Convair has been advised that serious consideration is being given to closing the test facilities at HSRS approximately June 30, 1961. We have been informed that the level of activity between now and June 30 will be curtailed to the equivalent of three sled tests per month.

Convair and Stanley Aviation have been conducting B–58 escape capsule tests at HSRS for several months. The HSRS test site was specifically chosen for these tests because no other known track test site had the capability to conduct tests that would demonstrate the performance requirements of the B–58 escape capsule.

A minimum of 14 sled tests for the B–58 escape capsule are contemplated after January 1961. These tests will extend beyond June 30, 1961. It should be noted that these 14 tests include only 2 reruns for unforeseen difficulties. No tests for developing and demonstrating improvements to the escape system have been included. In addition, the frequency of testing contemplated for the B–58 escape capsule would demand almost complete usage of the test facility if the level of activity is curtailed as noted above.

Convair would appreciate any action you can take to prevent curtailment of activity or closure of the HSRS test facility prior to completion of the sled test programs for the B–58 escape capsule.

E. V. GISH.

DEPARTMENT OF THE NAVY,
BUREAU OF NAVAL WEAPONS,
Washington, D.C., January 24, 1961.
COLEMAN ENGINEERING CO.,
Torrance, Calif.

GENTLEMEN: In a recent telcon Mr. T. C. Coleman requested BuWeps comments regarding Navy experience in connection with rocket sled tests at the Hurricane Supersonic Research Site and any future plans for utilization of the test facilities.

During the last several years the Bureau of Naval Weapons through its airframe contractors has obtained much valuable information on escape system performance during high-speed sled tests at HSRS. The over-the-cliff ejection capability is of great importance in obtaining full trajectory information particularly in systems such as capsules where separation of the test item might be desirable after the test vehicle leaves the end of the mesa.

The Bureau of Naval Weapons has plans for an evaluation of flight capsule systems within the next year. In order to assist the U.S. Air Force in planning for future use of the track information on the BuWeps planned program has been forwarded to the USAF under separate correspondence.

By direction of the Chief of Bureau:

R. C. STARKEY,
Captain, U.S.N.,
Director, Airborne Equipment.

RATIFICATION OF THE 23D AMENDMENT PROVIDES ELOQUENT TESTIMONY THAT AMERICAN DEMOCRACY IS NOT A FINISHED PRODUCT: DISTRICT OF COLUMBIA CITIZENS GIVEN RIGHT TO VOTE

Mr. RANDOLPH. Mr. President, yesterday the State of Kansas provided the final act of assistance in moving this Republic forward another step toward the ideal of universal suffrage.

It is my conviction that the newspapers of Washington, D.C., deserve our commendation for their consistent and cooperative efforts toward the fulfillment of this dream—a dream now become dynamic.

By the ratification of the 23d amendment to the Constitution, there is assured the right of citizens of the District of Columbia to vote in the election of our President and Vice President. And in the enactment of this amendment we shall remove one of the major anachronisms from the voting laws of our Nation.

The citizens of the District of Columbia have been denied by congressional statute any form of suffrage since 1874. The gratifying action of the legislature and the legislatures of the other 37 States, including West Virginia, which have ratified this amendment, corrects an injustice of 87 years standing. This action finally removes the absurd paradox of the national disfranchisement of the citizens in the Capital of the world's greatest democracy.

But more important the ratification of the 23d amendment provides eloquent testimony to our own citizens and to the people of the world that American democracy is not a finished product. It is a moving process, in which this most recent achievement serves as a symbol of our steady march toward new frontiers.

ARNON M. GULICK, CONGRESSIONAL AID

Mr. SCOTT. Mr. President, within the past few days there retired a distinguished gentleman by the name of Arnon M. Gulick, who for the past 18 of his 40 years of service was my assistant in the House of Representatives and in the Senate. Mr. Gulick served under 10 Presidents, and at the time of his retirement was, so far as I am aware, the senior Federal employee in either House of the Congress.

He came here originally in 1905, and there is not today a single Member of either the House or the Senate who was serving when he came as a young assistant to the then Representative Irving P. Wanger, of Bucks County, Pa. He recalls among many anecdotes the fact that a Member of Congress from Minnesota introduced to him a young boy as his son Charles Augustus. That was Charles Augustus Lindbergh, the famous "Lone Eagle."

Mr. Gulick's service is full of memory, of anecdote, and of service. He had a great deal to do with securing the Naval Hospital located at Philadelphia, and all of his friends wish him well, long life, and happiness in his retirement. I ask unanimous consent to have printed in the RECORD at this point in my remarks an article from the Philadelphia Evening Bulletin of March 28, 1961.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CONGRESSMEN'S AID RETIRES AFTER 50 YEARS—SAYS HE'S NEVER KNOWN A DULL DAY

One spring day shortly before this Nation entered World War I a Congressman from Minnesota greeted an old friend in the lobby of the Congressional Apartments, almost in the shadow of the Capitol dome and on the site of the present Supreme Court Building.

"Arnon," he said, "I want you to meet my son. He's named after me—Charles Augustus."

Arnon M. Gulick, the Philadelphian then serving as secretary to Congressman George P. Darrow, of the Germantown-Chestnut Hill district, took the boy's hand in that courtly, friendly way which was rapidly becoming his hallmark.

LINDBERGH'S SON

Then to the beaming Minnesotan:

"He's a fine-looking boy, Mr. Lindbergh."

This memory of his introduction to the boy who won worldwide fame as America's "Lone Eagle" came back to Gulick today. It was one of a flood of pleasant memories which engulfed him as he reminisced about his half century of service as a key aid to three lawmakers from this city.

Gulick, who will be 75 this summer, officially retired March 1 as executive assistant to Senator HUGH D. SCOTT, JR., Republican of Pennsylvania, whom he began serving back in 1911 when SCOTT was a young Congressman.

So far as SCOTT and Gulick could determine, at the time of his retirement the executive secretary had set a record of service in his posts.

FIFTY YEARS IN CAPITAL

Actually, Gulick arrived in Washington in 1905. However, he spent several years in private employment between Capitol assignments, which dropped his total of years served to 50.

Congressman Irving P. Wanger, of the Bucks-Montgomery district, first asked him how he'd like to be his combined office boy-stenographer-secretary at $75 a month.

Wanger had already checked with Gulick's father, Christopher, for many years registrar of wills for Bucks County, and his father had said yes. The son was enthusiastic; a few weeks later he was in Washington.

"Government activity was so small then, it's hard to imagine it today," Gulick recalled. "There were no offices for Congressmen except committee chairmen."

HE GETS MARRIED

In 1908 he married Gertrude Grosser, of Shamokin. His pay jumped to $85 a month. They eventually bought the home they still occupy at 2320 W. Cheltenham Avenue.

After 8 years with Wanger, he served 24 with Congressman Darrow (1915–37, then 1939–41) and a final 18 with SCOTT (1941–45 and 1947–59 in the House and 1959–61 in the Senate).

Today his home contains many treasured items—the desk at which he worked so many years; an autographed photograph of President Eisenhower, and an authographed copy of the American's Creed from its author, William Tyler Page, Clerk of the House of Representatives, presented to him when it was approved by Congress and President Wilson in World War I.

"Yes," he said today, "I think I've had a full life. I've never known a dull day. And I never will.

"The years behind me have been fun. But the years ahead are going to be even better."

DISTRICT OF COLUMBIA VOTE LAW SHOULD BE MODEL FOR NATION

Mr. KEATING. Mr. President, following the good news yesterday of the ratification of the 23d amendment to the Constitution, we are now advised that our next responsibility is to implement the provisions of the 23d amendment by appropriate legislation. This presents an opportunity to Congress to devise a voting law for the District of Columbia which can serve as a model for the entire Nation.

In the last election, over 19 million citizens of voting age were unable to vote. A small proportion of this number was denied ballots for legitimate reasons. For example—because they were in prisons or were illiterate. But the overwhelming proportion of the 19 million Americans who were disenfranchised were prevented from voting only by unreasonable restrictions on the right of the ballot under many State laws.

Five million Americans were kept from the polls by illness; 8 million Americans were unable to vote because they could not meet State, county, or precinct residence requirements; 2,600,000 Americans were unable to vote because they were traveling for business, health, vacation, or other reasons and were unable to obtain absentee ballots. Conservative estimates based on the report of the Civil Rights Commission indicated that 1,750,000 Americans were kept from the polls by rigged literacy tests, poll taxes, and various forms of improper pressure.

Let us make certain that none of these disabilities are allowed to infect the electoral processes of the Nation's Capital. Our residence laws, our provisions for absentee voting, our safeguards against discrimination, should be designed to permit every qualified citizen who wants to vote on election day 1964, to do so. We cannot, and should not, compel any American to vote, but there is no justification for a single, unfair impediment to the exercise of the franchise by citizens who want to vote.

We should study carefully the election law which the District of Columbia Commissioners are expected to submit to the Congress in the very near future. As a member of the Subcommittee on Privileges and Elections of the Senate Committee on Rules and Administration, I have had a special interest in voting problems, and I have proposed a broad study of the situation which now exists, by the subcommittee, at an early date. A sound and progressive District of Columbia voting law could readily become a standard for all the States of the Union interested in bringing their own statutes and practices up to date.

THE HOT DOG AND HIGH FINANCE

Mr. KEATING. Mr. President, one final word on a subject dear to my heart, the New York World's Fair. The fair is moving ahead. I have from time to time taken it upon myself to apprise the Senate of the progress that has been made.

I am happy to point out today that 33 nations are now signed up to exhibit at the fair. Many other international organizations, companies and private groups also plan to exhibit.

But, the big news this week is that the fair has let contracts for the construction of some 29 refreshment stands at the Flushing Meadow Park fairgrounds. In a release by the New York World's Fair Corp., of which I am one of the directors, it was stated that "the plebeian hot dog and hamburger entered the realm of high finance today."

Mr. President, I am happy to pass along this information, which indeed is just one more encouraging sign as to the scope and grandeur of the forthcoming 1964–65 New York World's Fair.

EASTER ADJOURNMENT OF THE HOUSE

Mr. MANSFIELD. Mr. President, after consultation with the minority leadership, I send a concurrent resolution to the desk and ask for its immediate consideration.

The PRESIDING OFFICER laid before the Senate House Concurrent Resolution 211, which was read, as follows:

Resolved by the House of Representatives (the Senate concurring), That when the House adjourns on Thursday, March 30, 1961, it stand adjourned until 12 o'clock meridian on Monday, April 10, 1961.

The PRESIDING OFFICER. Is there objection to the present consideration of the concurrent resolution?

There being no objection, the concurrent resolution (H. Con. Res. 211) was considered and agreed to.

THIRD SUPPLEMENTAL APPROPRIATION BILL—CONFERENCE REPORT

Mr. HAYDEN. Mr. President, I ask unanimous consent that the Senate resume the consideration of the conference report on the supplemental appropriation bill.

There being no objection, the Senate resumed the consideration of the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5188) making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

Mr. WILLIAMS of Delaware. Mr. President, would the Senator explain what the amendments would do?

Mr. HAYDEN. Mr. President, the first four amendments in the bill related to the Commodity Credit Corporation and consisted of $2,820 million included in the bill by the Senate. These amendments had not been considered when the bill was in the House.

The Senate conferees exerted every effort to impress upon the conference committee the necessity for these funds. However, the House managers were adamant and the only way we could get a conference report on this bill was for the Senate to recede.

The House managers were strongly opposed to any additional appropriation for the Development Loan Fund. However, we were able in the end to secure $50 million, which the conference committee agreed should be earmarked for development loan programs in the Western Hemisphere.

In amendment No. 69, the Senate sought to repeal a language prohibition against Senators being reimbursed for official committee trips to their home States. The Senate will recall that in the Legislative Branch Appropriation Act, 1961, a prohibition in this regard was included on the floor of the House as an amendment to the Williams amendment, which provided for reporting in detail on expenditures for foreign travel.

The managers on the part of the House took the position that the rule of comity was violated by the Senate when the Senate made the Williams amendment applicable to the House, and after the Senate had done this, they were

within their rights in prohibiting reimbursement for official committee trips of Senators to their home States.

I predicted that this would be the effect of the adoption of the amendment offered by the Senator from Delaware, [Mr. WILLIAMS] when it was under consideration in the Senate on June 20, 1960, when I said:

Mr. President, a very similar proposal was before the Senate last month, on an amendment offered by the Senator from Delaware [Mr. WILLIAMS]. We adopted it, and took it to conference. The House very properly, in my judgment, said, "We do not allow the Senate of the United States to tell us what our Members shall do." I feel that the House has that right: namely, to regulate the conduct of its own members; and the Senate has no right to attempt to do otherwise.

On the other hand, if we set a pattern for ourselves, and if the House then wishes to include its own Members, or if it wishes to adopt its own rules, it may do so.

I am sure that all Senators would resent an effort by the House to dictate how the Members of this body should conduct themselves while traveling abroad; and of course that rule works both way, as applied to this measure.

For the RECORD, I shall quote from Senate precedents which support what I have said:

On May 25, 1896 (54th Cong., 1st sess., RECORD, p. 5661), during the consideration of a deficiency appropriation bill in the Senate in connection with certain Senate amendments to the bill, Mr. Eugene Hale, of Maine, said:

"The rule is always observed between the two Houses that the examination in reference to items touching the employment of the force of the two Houses and as to elections and contests and all that is attended to by each House, neither interfering with the other."

On March 18, 1914, during the consideration of a deficiency appropriation bill by the Senate, in connection with an amendment to pay a year's salary to the father of a deceased Representative, Mr. Thomas S. Martin, of Virginia, chairman of the Committee on Appropriations said:

"The Senator from Iowa, Mr. Kenyon, knows very well that it has been a long established rule here, a rule of comity between the two Houses, that each House fix the expenditures for its own body. The Senator knows that whenever that rule is departed from it results in friction and causes trouble."

Mr. Martin further said that the only time the Senate put in matters relating to the House was when it was requested by the House Appropriations Committee to do so.

On June 14, 1946, Mr. Tydings, of Maryland, chairman of the Legislative Appropriation Subcommittee, made the following statement with reference to the policy of the two Houses in dealing with appropriations for its own employees:

"There is no law on the subject, but we have a definite understanding that the Senate will not interfere with any appropriation the House makes for its own body, and the House will not interfere with any appropriation the Senate makes for its own body."

I ask unanimous consent to have printed at this point in the RECORD excerpts from the CONGRESSIONAL RECORD which have been prepared for me by the Parliamentarian.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

POLICY OF THE APPROPRIATIONS COMMITTEES OF THE TWO HOUSES WITH REFERENCE TO ITEMS CONCERNING EMPLOYEES AND ELECTIONS IN THE RESPECTIVE HOUSES IS NOT TO INTERFERE WITH EACH OTHER

On May 25, 1896 (fn: 54th Cong., 1st session, RECORD, p. 5661), during the consideration, as in Committee of the Whole, of the bill (H.R. 8293) making appropriations to supply deficiencies in the appropriations for the fiscal year ending June 30, 1896, and for prior years, and for other purposes, Mr. Francis M. Cockrell, of Missouri, said:

"There are a number of Senate amendments relating to matters concerning the other House as to which I should like to have the Senator from Maine in charge of the bill make some explanation as to why the committee reported to place them in the bill."

Mr. Eugene Hale, of Maine, replied:

"I was just ready to say that the rule is always observed between the two Houses that the examination in reference to items touching the employment of the force of the two Houses and as to elections and contests and all that is attended to by each House, neither interfering with the other. In some cases it happens after a bill has passed the House of Representatives, and there has been no opportunity to examine certain matters, there are items which need to be put in the appropriation bills here touching House matters. The Senate committee on Appropriations has always observed this rule, that it does not take jurisdiction or cognizance of such subjects, unless the proper committee deal with them in the House and request the Senate to insert the items; and there are items of that kind in this bill. In no other case have we interfered with the appropriations for the other House."

EACH HOUSE, UNDER THE ESTABLISHED PRACTICE OF THE TWO HOUSES, FIXES THE EXPENDITURES FOR ITS OWN BODY

The Committee on Appropriations of the Senate, under this practice, will not report in an appropriation bill an item relating exclusively to the House of Representatives unless requested to do so by the House Committee on Appropriations.

On March 18, 1914 (fn: 63d Cong., 2d sess., RECORD, pp. 5042, 5043), during the consideration of H.R. 13612, an urgent deficiency appropriation bill, Mr. William S. Kenyon, of Iowa, proposed an amendment to pay to John Pepper, father of Rufus F. Pepper, late a Representative from the State of Iowa, $7,500.

Mr. Kenyon stated that Mr. Pepper was a Representative from the Second Iowa district, was unmarried, and that this amendment was to pay to his father the customary amount that had been paid to widows of Members of Congress who died in office. Mr. Kenyon stated further that the amendment had been considered by the House and omitted from the bill because there was no precedent for paying a year's salary to the father of a deceased Representative.

Mr. Thomas S. Martin, of Virginia, chairman of the Committee on Appropriations, said:

"The Senator from Iowa knows very well that it has been a long established rule here, a rule of comity between the two Houses, that each House fix the expenditures for its own body. The Senator knows that whenever that rule is departed from it results in friction and causes trouble."

Mr. Kenyon then called attention to an item in the bill inserted by the Senate making an appropriation of $1,000 for stationery for the use of the committees and officers of the House.

Mr. Martin then said:

"I will state that we had a letter from the chairman of the House committee asking us to insert that item. It is not a departure from the rule; it is a compliance with the rule. The item was omitted inadvertently in the House; and, I repeat, the chairman of the House committee asked us to put it in, and we did so. That has been the rule ever since I have been a Member of the Senate. If the House had said that they wanted the Pepper item inserted, we would have inserted it; we did telephone over there; we got in touch with Mr. Fitzgerald and would have been glad to have added the item if the chairman of the House committee or the House itself had said that it would be agreeable to them to have us do so, but Mr. Fitzgerald was out of the city, and we were told by the person who came to the telephone, representing him, that Mr. Fitzgerald would not send a letter or ask us to insert the item."

Mr. MARTIN subsequently consented to the adoption of the amendment so far as he was concerned, but the amendment, on recommendation of the conferees, was omitted from the bill as finally passed.

IT IS THE POLICY OF THE TWO HOUSES FOR ONE HOUSE NOT TO INTERFERE WITH APPROPRIATIONS MADE BY THE OTHER HOUSE FOR ITS OWN EMPLOYEES

On June 14, 1946, during the consideration of H.R. 6001, the third deficiency appropriation bill, an amendment was offered providing payment for the pages of the Senate until January 3, 1947. During discussion of the matter, Mr. Tydings, chairman of the subcommittee of the appropriations having charge of the legislative appropriation bill, made the following statement with reference to the policy of the two Houses in dealing with appropriations for its own employees:

"There is no law on the subject, but we have a definite understanding that the Senate will not interfere with any appropriation the House makes for its own body, and the House will not interfere with any appropriation the Senate makes for its own body.

"It is often the case that one officer of the House is paid at one rate and a similar officer in the Senate at another. There is a tendency in time for both to seek the higher level, never the lower level. We have had a rule that neither the Senate nor the House will interfere with measures which have to do with either body only."

Mr. WILLIAMS of Delaware. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. WILLIAMS of Delaware. Will the Senator from Arizona sum up in simple language what the amendment does? Does it change in any way the amendment adopted last year which requires an accounting by Members of Congress?

Mr. HAYDEN. The conference did not change it in any way. The House said:

The Senate told us what to do last year, and now they ask us to agree to a change in that situation and we will not agree to it.

They would not agree. That is all there is to it. So the amendment the Senate added to this bill is out.

Mr. WILLIAMS of Delaware. In other words, it leaves the law as it was passed last year. Is that correct?

Mr. HAYDEN. We did not change the law. The Senate amendment sought to relieve certain Senators from a burden which they had unwittingly assumed.

Mr. WILLIAMS of Delaware. The amendment is stricken out of the appropriation bill, and we now go back to the original text of the bill. Is that correct?

Mr. HAYDEN. There is no change made of any kind.

Mr. WILLIAMS of Delaware. That is good.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. DWORSHAK. Apparently in the conference between the House and the Senate, the Senate receded on amendments Nos. 1, 2, 3, and 4. During the debate the other day it was indicated that the Commodity Credit Corporation could not carry on its business during the remaining 3 months of this fiscal year unless it received almost $3 billion in appropriations to restore impaired capital and to meet the cost of many programs. Can the distinguished chairman of the Committee on Appropriations assure the Senate that we are not in any way jeopardizing the programs of the Commodity Credit Corporation by the elimination of these funds?

Mr. HAYDEN. That was not the representation made to the Senate. The representation made to the Senate was that for a long time we have failed to provide funds currently to reimburse the Commodity Credit Corporation for advances it has made, and that it would be well to bring it all up to date—to wipe the slate clean and start again with no backlog. That is what the Senate attempted to do. The House would not agree to it.

Mr. DWORSHAK. Mr. President, will the Senator further yield?

Mr. HAYDEN. I yield.

Mr. DWORSHAK. It was pointed out in the discussion in the Appropriations Committee, as the chairman will recall, and also in the debate on the floor of the Senate on the appropriation bill, that, having authorized the expenditures in the feed grains bill, it would be inevitable that the CCC would require some funds with which to implement and carry out the instructions contained in the feed grains bill.

Without giving the Commodity Credit Corporation any funds, and assuming they may require $300 million or $400 million for that program, what will the results be in the face of this report?

Mr. HAYDEN. The situation is that there is a disagreement between the Senate and the House as to the amount of funds remaining unobligated at the present time. The House insists there is enough to worry along until the 30th of next June, or until Congress passes another bill. The main problem is to find money to pay for the grain bill. The main problem, we say, is to get this out of the way, and restore the Commodity Credit Corporation to good financial condition, so that we will not have to be taking care of deficits.

Mr. DWORSHAK. Then it is likely that in the regular Department of Agriculture appropriation bill for 1962, consideration will be given to the various programs involving surplus commodities, and that there will be ample time to provide essential funds to carry out these objectives?

Mr. HAYDEN. If the House is correct about the amount of money available, yes. That is the sole question.

Mr. DWORSHAK. How does the chairman of the Committee on Appropriations feel about it?

Mr. HAYDEN. It may be a narrow squeak; but if enough funds are not available, we may have to pass another supplemental appropriation between now and the end of the fiscal year.

Mr. DWORSHAK. I thank the Senator from Arizona.

Mr. CHAVEZ. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. CHAVEZ. Do I correctly understand that the Senate version of the item for the Department of Defense was left intact in conference?

Mr. HAYDEN. That is correct.

Mr. CHAVEZ. It is included in the conference report?

Mr. HAYDEN. It is included in the conference report. The House accepted what the Senate recommended with respect to national defense.

Mr. CHAVEZ. I thank the Senator.

Mr. HOLLAND. Mr. President, will the Senator yield?

Mr. HAYDEN. I yield.

Mr. HOLLAND. Did the conferees retain the $500 million which was placed in the bill in the Senate to finance the operation of the emergency unemployment compensation payments?

Mr. HAYDEN. Yes.

Mr. HOLLAND. That amount remains in the bill, undiminished?

Mr. HAYDEN. That is correct.

Mr. HOLLAND. Second, did the conferees retain in the bill the $80,000 which was placed in the bill in the Senate at the request of the President for the operation of the labor-management committee which he had created by Executive order?

Mr. HAYDEN. That amount was included.

Mr. HOLLAND. I thank the distinguished chairman.

Mr. WILLIAMS of Delaware. Mr. President, in recent months the Department of Justice has said much about the evils of the leaders of industry conspiring to rig prices. I commend the Department of Justice for trying to break up this practice.

However, I call their attention to the fact that today the U.S. Government, through one of its agencies, is deliberately rigging a market with the taxpayers' money. I refer to the manner in which they are rigging the feed grain market, or the price of corn on the exchange, under the recent authority which the Department of Agriculture was given under the Kennedy administration's feed grain bill. In the Wall Street Journal of March 29 and March 30, we find Mr. Willard W. Cochrane, economic adviser to Secretary of Agriculture Freeman, boasting of the fact that the Department plans to drive the cash corn price down to $1 a bushel in order, as he points out, to encourage—I think "force" would be a better word—the American farmers who are producing corn to come under the umbrella of the Government's new farm program.

I quote briefly from some of the articles published in the trade newspapers. First, I read from the Wall Street Journal of March 29, 1961:

> Selling of feed grains was again attributed to weakness in the cash market. Corn was the weakest. The 2-day drop for corn futures at Chicago amounted to almost 5 cents a bushel. Stepped-up Government selling of corn from Federal bins and the threat of further Government selling caused general selling of feed grain futures. No. 2 Yellow corn in the Chicago cash market, a key grade, sold at $1.09 a bushel, the lowest level since last December.

Continuing with the article:

> According to Willard W. Cochrane, economic adviser to Secretary of Agriculture Freeman, the Government plans to sell corn most of this year to keep the price about $1 a bushel on the farm. The Government intends to sell corn also to get more farmers to comply with the new feed grain law.

In today's Wall Street Journal, we find a similar comment. I quote again:

> Cash corn prices at Chicago fell more than 3 cents a bushel to the lowest level since December 20. The price for No. 2 yellow corn, a key grade, is around $1.05 a bushel, almost 15 cents below a recent high.

Further on, the article continues:

> Government officials said they thought if the price for corn is reduced to $1 a bushel, farmers would comply with the new feed grain legislation and reduce new production.

About 4.4 billion bushels of corn were produced in the 1960 crop. Of that crop it is estimated that 65 percent will be used as feed on farms, and about 45 percent will move in the normal channels of trade. Based on the Department of Agriculture figures it is estimated that as of January 1, 1961, 2,856 million bushels of this corn remained on hand, of which it is estimated that about 1 billion bushels will be sold in what is called the free market. This is corn which will be moved from the farms into the normal channels of trade—corn which will not be locked in under the Government's support program. It is corn produced by farmers without the benefit of the Government support program. It will be sold in the so-called free corn movement.

Based upon the information in the trade newspapers and upon the quotation of Mr. Cochrane and other unidentified department spokesmen, it can be seen that this is a deliberate, planned attempt to break the corn market down to a dollar a bushel on the farm. It is now down to about $1.05. Mathematically, it means that the farmers in the market who have corn which they were planning to sell this spring have already had the price driven down by Government manipulation about 15 cents a bushel. Thus, $150 million has been taken off the value of the 1 billion bushels of corn which the farmers of

America had planned to sell in the spring months.

Based upon Government reports, the Department of Agriculture is planning to break this market further by forcing the price down another nickel a bushel before they reach their objective of $1 corn on the farm. The plan of these New Frontier bureaucrats is to force farmers either into bankruptcy or under the Government umbrella.

The Department apparently intends to use the taxpayers' dollars to drive the price down another nickel and thereby take another $50 million of purchasing power from the farmers who have been trying to operate without Government subsidies.

At the time we passed the feed grain bill it was admitted by Department of Agriculture officials—and they were very honest in their statements—that with the authority they were seeking and the authority which they got as a result of the reinstatement of a part of section 3 in the conference report, they would manipulate the grain market and force prices down to the point where farmers would be confronted with the situation of either going bankrupt or signing up under the Government program as recently enacted.

At a time when the Department of Justice is saying so much about the evils of private industry's manipulating prices it would be well for the Government itself to examine the damage it is doing in the manipulation of the feed grain market.

I point out one further danger in this policy of manipulating markets which is not shown in the newspaper articles but which exists—that is that the Department is creating a speculator's paradise as they manipulate this market. There is no clique of bureaucrats who can get behind closed doors of any bureaucracy and use the millions of dollars which are at the Government's command to manipulate the market without some speculator getting advance information and cashing in on it.

I hope that before they proceed further in bankrupting an element of the farm industry which is trying to operate independently, the Secretary of Agriculture and his economic adviser will talk the situation over with some of these farmers who have produced their crops without government aid or with some businessmen who have met a payroll. I respect these professors, but I most respectfully say that they need to take a postgraduate course in economics by at least trying to meet a payroll. They just do not realize the sensitivity of a market.

This deliberate action on the part of the Department of Agriculture to force down the price of grain will provide cheaper feed for the poultry and dairy industry in our immediate area. We are large consumers of corn and it could be said our area will benefit from this manipulation. But no group of farmers benefits in the long run as a result of a program designed to bankrupt another group of farmers. I strongly protest this action of the Department's manipulation of the grain markets.

It seems ironic that the new administration, which has boasted so loudly of its desire to prevent price rigging and its desire to help the American farmers, should now be caught deliberately rigging a market and rigging that market in such a manner as to take $150,000,000 from that group of farmers which has been operating without government subsidies.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

The PRESIDING OFFICER laid before the Senate a message from the House of Representatives announcing its action on certain amendments of the Senate to House bill 5188, which was read as follows:

IN THE HOUSE OF REPRESENTATIVES, U.S.,
March 29, 1961.

Resolved, That the House recede from its disagreement to the amendments of the Senate numbered 23, 25, 53, 60, 61, 66, 67, and 91 to the bill (H.R. 5188) entitled "An Act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes", and concur therein.

That the House recede from its disagreement to the amendment of the Senate numbered 27, and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$20,000,000".

That the House recede from its disagreement to the amendment of the Senate numbered 36, and concur therein with an amendment as follows: In lieu of the sum named in said amendment, insert "$600,000".

That the House recede from its disagreement to the amendment of the Senate numbered 38, and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$20,000,000".

That the House recede from its disagreement to the amendment of the Senate numbered 50, and concur therein with an amendment, as follows: In lieu of the sum named in said amendment, insert "$65,000".

Mr. HAYDEN. I move that the Senate concur in the amendments of the House to the amendments of the Senate numbered 27, 36, 38 and 50.

The motion was agreed to.

Mr. HAYDEN. I ask unanimous consent to have printed at this point in the RECORD a table which shows, by appropriation item, the amounts in the budget estimates, the amounts included in the bill as passed by the House, the amounts included in the bill as passed by the Senate, and the final amount agreed to for each item in the conference.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

The third supplemental appropriation bill, 1961 (H.R. 5188)

	Budget estimate [1]	House bill	Senate bill	Conference action
Department of Agriculture:				
Title I:				
Forest Service:				
Forest protection and utilization:				
Forest land management	$35,580,000	$35,580,000	$35,580,000	$35,580,000
Forest research	946,000	946,000	946,000	946,000
State and private forestry cooperation	74,000	74,000	74,000	74,000
Acquisition of lands, Klamath Indians	68,717,000	68,717,000	68,717,000	68,717,000
Commodity Credit Corporation:				
Restoration of capital impairment (S. Doc. 19)	1,017,610,000		1,017,610,000	
Reimbursement to Commodity Credit Corporation for costs of special milk program (S. Doc. 19)	90,000,000		90,000,000	
Reimbursement to Commodity Credit Corporation for costs of special activities (S. Doc. 19):				
International Wheat Agreement	88,790,000		70,681,000	
Emergency famine relief	255,685,000		140,868,000	
Sales for local currencies (Public Law 480)	1,353,000,000		1,310,500,000	
Migratory waterfowl feed	13,000		35,000	
Bartered material for stockpile	163,163,000		174,800,000	
Grading and classing activities	1,264,000		2,813,000	
Long-term supply contract losses			13,000,000	
Total, title I, Department of Agriculture	3,074,842,000	105,317,000	2,925,624,000	105,317,000
Title II—Increased pay costs:				
Agricultural Research Service, salaries and expenses:				
Research	4,097,000	4,097,000	4,097,000	4,097,000
Plant and animal disease and pest control	1,734,000	1,734,000	1,734,000	1,734,000
Meat inspection	1,564,000	1,564,000	1,564,000	1,564,000
Extension Service, cooperative extension work, payments, and expenses:				
Federal Extension Service:				
Appropriation	41,000			
Transfer authority	(96,000)	(137,000)	(137,000)	(137,000)
Farmer Cooperative Service: Salaries and expenses	37,000	37,000	37,000	37,000
Soil Conservation Service:				
Conservation operations	5,472,000	5,472,000	5,472,000	5,472,000
Great Plains conservation program	168,000	168,000	168,000	168,000

See footnotes at end of table.

A REALISTIC APPROACH TO A BALANCED BUDGET

Mr. McGEE. Mr. President, I call the attention of the Senate to an article, written by Walter Lippmann, which was published this morning in the press. The burden of the article is the difficulty of playing with the phrase "a balanced budget," and at the same time being realistic.

Because of the very rational way in which Mr. Lippmann has dealt with this subject, and because of his learned treatment of the problem itself, I ask unanimous consent that the article be printed at this point in the RECORD, in order that all Members of the Senate and others who read the CONGRESSIONAL RECORD may profit from Mr. Lippmann's views.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Mar. 30, 1961]

ON THE FIRST PHASE

(By Walter Lippmann)

As I am writing a final article before leaving for a few weeks in Europe, it is tempting to look back and do a bit of generalizing about the first 2 months of the Kennedy administration.

The general character of this first phase has been, I would say, preliminary and preparatory. Unlike 1933, there was no emergency when Mr. Kennedy took office, and the grave problems which he is committed to deal with do not call for crash solutions but for careful planning and perseverance over the years. This is true of the problem which is central to almost all the others: the problem of overcoming the sluggishness which has characterized the American economy since the end of the Korean war.

As yet, the administration has made no frontal attack on this problem. It has not done so because of a deliberate decision that the country is not yet ready for it. Despite the unemployment and the unused capacity, the feeling that we are in bad times is spotty and local, not general and national. Because of the likelihood that a kind of recovery, probably a shallow recovery is just around the corner, the President has felt that for the present he must follow the Eisenhower economic ideology which was the fiscal orthodoxy of the age before the great depression. Yet his principal advisers are, so far as I know, unanimous in the belief that a very considerable departure from the Eisenhower ideology is necessary if the American economy is to meet the needs of the sixties: international, national, and local. But despite these opinions the administration is operating within the Eisenhower slogans and stereotypes about the budget. This is not because the Kennedy men believe in them but because there are large majorities in both parties who do believe in them.

As between the Kennedy doctrine, which is being held back, and the Eisenhower doctrine, which holds it back, the crucial and central issue is not whether the Federal budget should be balanced. The Kennedy doctrine, which is stated but not heavily emphasized in last week's budget message, is that Federal revenues and expenditures should be in balance "over the years of the business cycle"—about 4 or 5 years. The Eisenhower doctrine is that, regardless of the business cycle, the budget should be in balance every year. If the budget is not in balance annually, even as now in a year of recession, the Eisenhower ideology demands that politicians and editors should regard this as deplorable, and that the President should apologize for it.

The true and emerging Kennedy doctrine is that in a year of recession there ought to be a deficit and that in years of boom there ought to be a surplus. When, as has been the case since the early 1950's there is a chronic sluggishness in the economy, it is an unsound fiscal policy to try to achieve a budget surplus.

To many this sounds like the grossest heresy. It shocks them to hear it said that when there is so much unemployment and when the economy is running 10 percent below its normal capacity, there ought to be a deficit. But that is exactly what the great majority of modern economists are saying, particularly those on whom the Kennedy administration depends.

But the President has not yet braced himself to the effort of explaining to the public the difference between balancing the budget annually and balancing it over the business cycle. Yet most of what he has promised to do, most of what for the long pull urgently needs to be done, depends on explaining this theoretical issue to the people.

To explain it seems at times like trying to explain to a man that the earth is not flat, as it seems to him, but that it is in fact round. "It is flat," he can be heard to say, "wherever I have been." So with budget balancing. Say to a man that the Federal budget should be out of balance when the economy is in recession, he is likely to reply that he and all other decent and honorable men live within their income and why should the Government be disreputable?

It is a complicated thing to explain why the earth is round. It is a complicated thing to explain that the Federal budget is not only an accounting of revenues and expenditures. It is also a great fiscal engine which as a matter of national policy has to be managed in such a way as to promote a stabilized growth of the economy. It is a makeweight which has to be swung from deficit to surplus and from surplus to deficit to compensate for the ups and downs of the business cycle. There is nothing sinister or mysterious in this idea. But it is a new idea, new at least to a great many people.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

PRESIDENT KENNEDY MOVES TO DISTRIBUTE ON MORE EQUITABLE BASIS FEDERAL CONTRACTS FOR DEFENSE PROCUREMENT IN LABOR SURPLUS AREAS

Mr. RANDOLPH. Mr. President, the subject of defense spending is an appropriate one, in the light of the commendably forthright and thoroughly understandable message President Kennedy sent on Tuesday to the Congress.

I believe it is also timely to discuss briefly a recent development related to the issue of revitalization of areas and communities suffering the economic consequences of substantial and persistent unemployment.

As is well known to the Members of this body, President Kennedy, in his "Program for Economic Recovery and Growth," delivered to the Congress on February 2, 1961, stated his intention "to improve the machinery by which Federal contracts can be channeled to firms located in labor surplus areas."

I commend the President's statement of purpose, and I am appreciative of the complexities of the problems he and his administration face in seeking its fulfillment. For example, in an effort to implement his policy pronouncement, the Department of Defense developed a plan to set aside certain military procurement to be bid upon by, or negotiated with, firms located in areas of recorded substantial labor surplus, in order to help improve the economy of those areas. But, on March 3, the Comptroller General ruled against the Defense Department's plan and he did so on the ground that it would not, "In the absence of free and unrestricted competition, assure the lowest obtainable price."

The ruling by the Comptroller General was greeted as "great news" by the esteemed minority whip, the energetic senior Senator from California [Mr. KUCHEL]—that is, according to an article in the March 18 issue of the Washington Daily News, in which was added the unfortunate comment—attributed to my dear friend, the Senator from California—that "it is unthinkable for the President to try to turn the defense program into a vast WPA project."

In cognizance of this reported statement, I offer the observation that in the President's message on February 2 there was not a word or phrase that would support the unwarranted construction placed upon it by the Senator from California.

I am not insensitive to the concern of the Senator from California for the defense contracts which have helped to make his State the great industrial center it has become. In this connection, I note in the Congressional Quarterly's Weekly Report for the week ending March 24, 1961, a table which lists the military personnel, pay, and procurement by State, for the fiscal year which ended June 30, 1960. I observe that California leads all other States very substantially in every category. Especially do I note that the value of listed military procurement actions for California was in excess of $4.8 billion, representing 23.7 percent of all procurement which could be listed as being distributable on a State-by-State basis. I should add that I have no way of knowing how much of an item of $2.05 billion "not distributed by State" represents additional military procurement actions for California not included in the precentage cited. Only one other State—New York—is shown in the table as having benefited by more than 10 percent—less than half of the figure for California. The military procurement actions for New York in the fiscal year 1960 amounted to $2.37 billion, or 11.7 percent of total.

Mr. President, it is not my desire to fan the coals of sectional antagonism; but I point out that 23.7 percent of military procurement actions accruing to firms in an individual State in a single fiscal year is inordinately high. Eight States, including West Virginia, participated at a level of one-tenth of 1 percent or lower. West Virginia ranked 47th on the military procurement actions list.

In active duty military payrolls and civilian employees payrolls, California far out-paced the other States, too. On the military payroll list, West Virginia ranked 49th.

We have seen the steady growth in the number of areas classified as having substantial labor surplus—meaning, of course, a high rate of unemployment. It is an extremely abstract and unrealistic view of our national economy which would maintain that the effects of this increase are not felt tragically by the whole economy.

Therefore, it is difficult to understand how any Member of this body can find occasion for rejoicing—as the senior Senator from California seems to have done, according to the newspaper article—about any difficulty the President experiences in aiding these labor surplus areas. Perhaps the Comptroller General's ruling was "good news" for California, but not for numerous other States which need to share more equitably in the distribution of the defense dollar.

Unemployment is a national problem, and its solution must be framed in national terms, using every available instrument at the disposal of the Federal Government.

Are we a union of States only when confronted by an external threat? I say we must be a union of States when faced with the problems indigenous to our own population, too.

The defense expenditures of some $43 billion or more are a vital stimulant to our national economy. With the "multiplier effect" they comprise a large segment of our gross national product. It is therefore in the interest not only of equity but of our national economic well-being that these funds be as widely allocated throughout our economy as is practicable. A serious imbalance of defense dollar distribution has been permitted to develop and exist during the past decade, and I have no doubt that it has contributed to the problem of labor surplus in many areas. It is a situation that will be most difficult to right, especially in the light of factors pointed up by the Comptroller General's ruling relating to the stringent provisions of the Defense Production Act and appropriations acts.

Mr. KEATING. Mr. President, will the Senator yield?

Mr. RANDOLPH. I yield.

Mr. KEATING. I wish to commend the distinguished Senator from West Virginia for the very forceful statement he is making in the Senate today. As the Senator knows, this entire problem is a matter of great concern to the Senators from New York. We had some discussion of it yesterday. The scholarly and careful analysis which the Senator from West Virginia is making here today adds greatly to the efforts which many of us from other States are making in this same field.

I am very grateful to the Senator from West Virginia for his statement.

Mr. RANDOLPH. I am appreciative that the Senator from New York would explain, not only as he is doing today, but as he has explained it before, his intense interest in the equity involved in the matter of the allocation of defense contracts; and I compliment him. Of course, I compliment all Senators who are keenly aware of the disparity which now exists in the distribution of our procurement program. West Virginia is but one of several States, Mr. President, confronted with the problem of labor surplus areas with its debilitating effects. Of course, we know of the degree of enlargement of the number of these areas as a consequence of the recent report of the Department of Labor, which revealed that, as of February 1961 there were 101 major areas of substantial labor surplus. In these areas alone the work force totals 29 million persons.

In the instance of West Virginia, we know that our problem stems largely from a long period of dependence on coal mining as our major industry and the mainstay of our economy. But even though we are proud of the many years when West Virginia coal fueled the factories, furnaces, and railroads of America, we know that West Virginians did not create the carboniferous period when the coal was formed—any more than Californians today create the wonderful climate which has made the southern part of their State a natural center of the aircraft industry, for example.

I cite these facts of geology and climatology, over which we as individuals have no control, and I insist they are relevant to our national economy. And there are other equally relevant historical and technological facts over which no individual, or group of individuals, or State has had control. But as a nation—as a union of States—we have the capability for planned and intelligent action which we do not have as a mere aggregate of separate States.

Therefore, though I do not doubt the authority of the Comptroller General, and though I do not question the legal position on which his ruling was based, I hope the President will not be permanently blocked in his praiseworthy efforts to have distributed on a more equitable basis the Federal contracts for military procurement, so that labor surplus areas will not increase either in degree of persistency or in numbers.

The continued development and utilization of our human resources and industrial facilities play as vital a role in our total national security as does our Defense Establishment. It is my opinion that it is entirely appropriate to seek to use defense expenditures, wherever feasible and practicable, to maintain a viable economy.

This does not imply turning the defense program into a vast WPA project, as the minority whip mistakenly interpreted the President's proposed program. Nor does it signify the President's proposed program. Nor does it signify the President's intent to circumvent procurement regulations in order to "solve social problems"—as the senior Senator from California is further quoted by the Washington Daily News as having said was another purpose of the President's program and the Defense Department's plan.

However, the recent White House directive and the Defense Department's program for implementation do, in my judgment, presume a recognition of the intricate web of human, economic, technological, and military factors which comprise our total national defensive strength. I say that, within this context of thinking, and although the Defense Department's proposed plan of action is hedged in by legalistic restrictions which were imposed by law at a time when the economy was in better health, it is a thoroughly legitimate and commendable effort on the part of the administration to use some of the immense military expenditures to help revitalize our sagging economy in areas where such help is most needed.

So that there may be a better understanding of the problem about which I have been speaking, and so that the comments attributed to the senior Senator from California, to which I have voiced exception, may be noted in the form in which they were published, I ask unanimous consent, Mr. President, to have printed in the RECORD the news article from the March 18, 1961, Washington Daily News and the text of the Comptroller General's ruling in the form of a letter dated March 3, 1961, to the Secretary of Defense.

There being no objection, the article and letter were ordered to be printed in the RECORD, as follows:

[From the Washington Daily News, Mar. 18, 1961]

CAMPBELL REJECTS DEFENSE CONTRACTS PLAN—DEPRESSED AREA AID RUNS INTO GAO SNAG

(By Jack Steele)

Comptroller General Joseph Campbell has put a major crimp in President Kennedy's

proposal to channel more defense contracts into depressed areas.

Mr. Campbell, in an unannounced ruling nearly 2 weeks ago, rejected a plan developed by the Defense Department—in response to a Kennedy directive to do this.

Under the defense plan, 100 percent of some military orders would have been diverted to firms in so-called labor-surplus areas.

RIDERS

But the Comptroller General ruled that, under a rider attached by Congress to the defense appropriation bill, it is illegal to pay price differentials to divert defense contracts to companies in depressed areas.

Mr. Campbell held that, under the defense plan to shift all of the procurement of some military supplies to firms in these areas, there would be no way to assure the Government was obtaining the lowest possible price.

Mr. Campbell's ruling was cheered today as "great news" by Senator THOMAS H. KUCHEL of California, Senate Republican whip.

When the President announced his proposal and directive to the Defense Department in his economic message to Congress on February 2, Senator KUCHEL charged it was "regrettable, unfortunate and illegal."

"It is unthinkable for the President to try to turn the defense program into a vast WPA project," Senator KUCHEL said today.

"The law which prohibits this is plain. If he wants to solve social problems, he will have to send separate legislation to Congress to do it."

The Defense Department has notified the White House of Mr. Campbell's stand, thus returning the problem to the President.

His apparent alternatives are:

1. To abandon the effort to shunt enough defense contracts to depressed areas to help relieve their plight.

2. To ask Congress to amend the law so price differentials can be paid on such contracts.

The latter move would stir up strong opposition in Congress from Members who do not want their States to lose defense orders.

SOME DIVERSION

Under the present law, the Defense Department can divert a percentage of each military order to firms in depressed areas.

It does this by ordering a "set-aside" of a portion of the procurement for such firms, provided they match the low bid submitted by companies which sought the contract in competitive bidding.

The Defense Department contended that, with many areas of the Nation now classed as labor-surplus areas, it could be reasonably sure it would pay no price differentials if it restricted bidding on some contracts to firms in these areas.

Mr. Campbell rejected this thesis, holding that the Government could not be sure it got the lowest price—as required by law—unless each contract was open to unrestricted bidding.

COMPTROLLER GENERAL
OF THE UNITED STATES,
Washington, D.C., March 3, 1961.

To the Honorable the SECRETARY OF DEFENSE.

DEAR MR. SECRETARY: We have a letter dated February 25, 1961, from the Assistant Secretary (Installations and Logistics), asking to be advised whether our office would object to the use of total set-asides of certain procurements for award to firms in labor surplus areas, in the light of the prohibition contained in section 523 of the Defense Appropriation Act of 1961 against the payment of price differentials on contracts made for the purpose of relieving economic dislocations.

The letter refers to a Presidential request to you, the Secretary of Labor, and the Administrator, General Services Administration, for recommendations as to improved means for channeling contracts to areas of labor surplus. It is stated to be the consensus of all agencies concerned that to increase measurably the volume of contract awards to such firms total set-asides of appropriate procurements for award exclusively to such firms should be made. In your department, such set-asides would be made under criteria similar to those currently applicable to small business firms.

Both the small business and labor surplus area preferences in award of Government contracts had their origin in the policies declared in the Defense Production Act of 1950, 64 Stat. 798, and amendments thereto, and in various Executive orders and supplementary directives issued to implement those policies. At an early stage in the development of these programs this office had occasion to consider certain legal questions presented as to the propriety of payment of appropriated funds under contracts awarded thereunder. The position taken was that when advertising of public contracts was required by law awards should be made only to responsible bidders whose bids, conforming to the invitations, would be most advantageous to the Government, price and other factors considered, and that awards to other than the low bidders could not properly be made solely on the basis of small business status or surplus labor area location. (See 28 Comp. Gen. 662; 31 id. 279; 31 id. 347.) However, in view of the authority to enter into contracts by negotiation during the period of a national emergency proclaimed by the President, contained in section 2(c)(1) of the Armed Services Procurement Act of 1947 (now 10 U.S.C. 2304(a)(1)), and in the corresponding section of the Federal Property and Administrative Services Act of 1949, it was stated that this office would not object to payments under contracts negotiated pursuant to that authority with small business firms or bidders in labor surplus areas upon administrative determination that such awards were necessary in the public interest.

The small business preference was thereafter given more express legislative sanction by the enactment of the Small Business Act of 1953 (67 Stat. 232). The procedures adopted with respect to awards to labor surplus area firms, however, became the subject of controversy in Congress, which resulted in the enactment, in section 644 of the Defense Appropriations Act of 1954 (67 Stat. 357), of the limitation, identical to that appearing as section 523 of the 1961 Appropriation Act, prohibiting the expenditure of appropriated funds for the payment of price differentials on contracts made for the purpose of relieving economic dislocations.

The language of the proviso leaves little room for doubt, and examination of the legislative history confirms, that the intent of the Congress was that the practice of negotiating contracts with labor surplus area firms which would meet the lowest price offered by any other bidder on a designated procurement might be continued, but that no such contract could be awarded at a price in excess of the lowest available. The prohibition originated as a Senate committee amendment to the House bill (see S. Rept. No. 601, 83d Cong., 1st sess., p. 11), and in the form proposed by that committee was apparently intended to prohibit the payment of appropriated funds on any contract negotiated for the purpose of correcting or preventing economic dislocations. On the floor of the Senate a strenuous effort was made to eliminate the proviso, but it was adopted in the form proposed by the committee. (See CONGRESSIONAL RECORD, vol. 99, pt. 7, pp. 9500–9508.) The House rejected the Senate amendment, and in conference the proviso as finally enacted was substituted. (See H. Rept. No. 1015, 83d Cong., 1st sess.) The intent of the provision is further clarified by debate which occurred in both Houses upon adoption of the conference report. (See CONGRESSIONAL RECORD, vol. 99, pt. 8, pp. 10252–10258, 10339–10349.)

On the record we must construe the limitation in question as precluding the expenditure by the defense establishment of appropriated funds under any contract awarded on the basis of a labor surplus area situation at a price in excess of the lowest obtainable on an unrestricted solicitation of bids or proposals.

In the referenced letter it is suggested that if total set-asides were made only where there was a reasonable expectation that bids or proposals would be obtained from a sufficient number of responsible labor surplus area concerns to insure fair and reasonable prices, no question of a price differential would be involved.

The fallacy of that suggestion is that it would substitute fair and reasonable prices for the lowest price obtainable.

In the light of the clearly expressed intent of the Congress, which has been repeated without change in each annual appropriation act since 1954, we do not feel that we could, with proper regard for our obligations to the Congress, accept any showing or determination of a fair and reasonable price as establishing that such price was the lowest obtainable, in the absence of free and unrestricted competition.

Sincerely yours,

JOSEPH CAMPBELL.

Mr. KUCHEL. Mr. President, I wish to make a very short reply to the comments which have been uttered by my friend the able senior Senator from West Virginia.

A number of weeks ago the President of the United States announced he had directed the Department of Defense, among other agencies of the executive branch—I think I quote his words correctly—

To take prompt steps to improve the machinery by which Federal contracts—

Meaning in this instance, Federal defense contracts—

can be channeled to firms located in labor surplus areas.

At the time the President made that statement public I objected to it. I said it was regrettable, unfortunate, and illegal. I pointed out a section of the Defense Department Appropriation Act which is now the law, and which provides:

Provided further, That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations.

The Comptroller General of the United States, as my able friend from West Virginia has indicated, issued a ruling earlier this month. In a word, he determined that defense moneys under the Defense Appropriation Act could not be used to channel defense contracts into labor surplus areas.

Yesterday I put a copy of the ruling of the Comptroller General into the RECORD. I simply refer to it today.

I think it is fair for me to say, therefore, that the Comptroller General agrees with the position which I took originally, that the suggestion of the President was illegal.

I also said at the time—and I was quoted correctly by my friend from West Virginia—

> It is unthinkable for the President to try to turn the defense program into a vast WPA project.

I said it then. I meant it. I repeat it today. I mean it now.

Yesterday I tried as best I could to point out, as a Senator of the United States that I believe the money which the Congress of the United States appropriates for use by the Department of Defense ought to be used by the Department of Defense for one single, sole, solitary purpose, and that is to determine how best and how most efficiently defense appropriation money should be expended to give the people of the United States and to the Government of the United States the strongest posture of defense necessary to maintain our freedom, to deter aggression, and, if necessary, to combat it.

Mr. President, I am glad to say that the spokesmen for the Department of Defense, testifying before the Senate Committee on Armed Services a year ago, said precisely the same thing. The Department of Defense officials then took the position—I believe they would take the same position today—that the Department of Defense should not be saddled with an additional responsibility to relieve unemployment in this country.

My friend is correct, and I agree with him, when he says that unemployment is a problem of national concern. I recall to my friend from West Virginia that only the other day in this Chamber, we considered proposed legislation to provide for additional unemployment compensation. The question arose as to whether each State should care for its own. The distinguished Senator from Virginia [Mr. BYRD] offered an amendment to provide that each State should take care of its own and that no one State in the American Union should receive any assistance in ameliorating unemployment in the State from any other State in the Union.

The Senator from California objected to the amendment offered by the distinguished Senator from Virginia. I recall to my friend from West Virginia that I voted with him in opposition to what seemed to me to be an amendment based on the theory that each State should look after its own interests alone. America is a Union, in emergency and out of it. Unemployment is a national problem and should have the urgent and continuing attention of the Federal Government. My friend from West Virginia and I voted alike in this instance, and we were on the prevailing side.

My only point, Mr. President, is to say, most simply, that in my judgment the Department of Defense has a prodigious enough task in determining how best our defense should be provided and how best it should be maintained. There are other agencies of the Federal Government which have and should continue to have the responsibility of determining how best the Federal Government might be of assistance in ameliorating unemployment in our country.

Perhaps it is a good thing that we have these discussions spread upon the RECORD, because if the issue in this debate is simply whether defense moneys ought to be used for social purposes, however laudable they may be, then let the issue be joined. I have very, very little doubt as to the outcome.

The Congress of the United States over the years has written clearly into defense appropriation statutes a prohibition against using defense moneys for the relief of labor surplus areas. That was a decision not lightly made. It was a decision not made a short time ago. It has been the policy of the Congress over the years. It has been the policy of the Government over the years. I think it is a wise policy. I think it is a policy which ought to be continued.

Speaking for myself, Mr. President, I believe Congress will continue the policy.

CONGRATULATIONS TO A GREAT DOMESTIC INDUSTRY

Mr. KUCHEL. Mr. President, during the two centuries since the fertility and the marvelous productivity of its soil first was recognized, California agriculture has undergone a series of economic and technical revolutions which have brought it to the position of national leadership in value of all crops.

Throughout this long period, one type of agricultural activity has been prominently identified with California and one product has achieved great significance in the statistics covering returns from cultivation of foods and fibers.

The growing and processing of grapes has been carried on in California since the arrival of the earliest Spanish priests and the building of the long chain of missions. Large quantities of table grapes and almost all of the supply of domestic raisins are the product of California farms and vineyards.

The past century has seen scientific grape culture undertaken and extended on a scale which the world never before witnessed and in a fashion unmatched in any other part of the globe. As a consequence, California occupies first rank as a producer of wine, and today 85 percent of all the domestic wine consumed in the United States comes from California. The economic importance of this activity is indicated by the fact that California vineyards and wineries employ, including seasonal workers, approximately 111,000 persons.

The centennial of modern California viticulture occurs this week. On April 1, 1861, thanks to the vision of pioneers in agriculture who foresaw great possibilities in broad-scale grapegrowing and winemaking, the first planned and organized steps were taken to put these operations on a truly scientific basis. Subsequently, during the century ending on Saturday, California both transplanted cuttings and practices of the Old World to America's Pacific frontier and embarked on operations and procedures which brought vast improvement in cultivation of vineyards and processing of their juice-laden crop.

The California agriculturalists who today gather nearly 3 million tons of this luscious fruit owe an incalculable debt to those ancestors who a century ago laid the stable foundation for what has become truly a major and a distinctive California industry. I believe this 100th anniversary is worthy of national notice, as has been taken in the legislature of my native State. Accordingly, I ask leave to have printed as part of my remarks a joint resolution of the California Legislature honoring those responsible for the establishment of this colorful, enterprising, and wealth-creating form of agriculture.

There being no objection, the joint resolution was ordered to be printed in the RECORD, as follows:

SENATE JOINT RESOLUTION 30

Joint resolution relating to the centennial of modern California viticulture

Whereas the Legislature of California on April 1, 1861, enacted a joint resolution requesting the then Gov. John G. Downey to appoint a commission to consider ways and means best adapted to promote the improvement and culture of the grapevine in California; and

Whereas this farsighted action resulted in the appointment of Col. Agoston Haraszthy to the commission and his subsequent voyage to Europe, a mission from which he returned with more than 100,000 cuttings of about 300 varieties of grapes, all choice wine types; and

Whereas the foresight and initiative exhibited by Colonel Haraszthy was typical of the man, who also was among the first to advocate a State college of agriculture and who developed, at his Buena Vista ranch at Sonoma, one of the world's finest wineries which still is in existence; and

Whereas the grape cuttings he supplied led to an increase in vineyard acreage in California from an estimated 7,000 acres in 1860 to more than 450,000 acres at present, to the end that Colonel Haraszthy was recognized as the father of modern California viticulture and this State is now the wine land of America; and

Where as grapes and winemaking constitute the State's leading fruit industry, with vineyards and winery property worth over $650 million, an annual return to farmers of $140 million, an annual grape crop of two and three-quarter million tons and an annual gross wine production of 160 million gallons; and

Whereas the quality of the wine produced from descendants of the vines brought to California 100 years ago has become so widely and favorably known that this State now grows 85 percent of all wine produced and consumed in America; and

Whereas Saturday, April 1, 1961, will mark the centennial of the legislative act which was instrumental in bringing about this result: Now, therefore, be it

Resolved by the Senate and Assembly of the State of California (jointly), That the Legislature of the State of California does hereby urge the State's residents to join in honoring the memory of the pioneer California lawmakers responsible for this fruitful contribution to the State's economy and the welfare of its citizens, and to join in honoring the memory of Col. Agoston Haraszthy as the father of modern California viticulture; and be it further

Resolved, That Saturday, April 1, 1961, be observed with appropriate ceremony as the centennial of modern California viticulture; and be it further

Resolved, That the Congress of the United States is hereby respectfully requested to join the State of California in recognition of this historic event; and be it further

Resolved, That the secretary of the senate is hereby directed to transmit copies of this resolution to the President and the Vice

President of the United States, the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Governor of the State of California; two suitably prepared copies to the Wine Institute; and a suitably prepared copy to the owner of Buena Vista Vineyards, Sonoma, Calif.

COVERAGE OF ANTICOMMUNIST NEWS

Mr. DODD. Mr. President, I have had occasion before now to remark upon the inadequate news coverage given, in certain instances, to anti-Communist news. I do not know how this comes about; and I am neither criticizing particular papers or particular reporters, nor attempting to second-guess editors on what news should be played and where. The fact remains that often news of very considerable importance to the free world is buried or ignored.

The Washington Daily News of March 14 carried a three-paragraph news item with a one-column head, "Fidel Hits Aid Plan." The lead on the story reported that Premier Castro had assailed President Kennedy's proposed hemispheric Alliance for Progress as "an attempt to buy the conscience of Latin America."

The second paragraph expanded on what Castro had said in this regard. Then, in the third paragraph, this news story reported that:

> Earlier, Ambassador to Moscow Faure Chaumont had formally proclaimed the Castro regime's "loyalty to communism" to the same audience, while Castro looked on, beaming.

This paragraph impressed me, Mr. President, as having terrific significance. How many people there are in this country, or in the free world, who still do not know that the Castro regime is a Communist regime, I cannot say. But I do know that there are in this country some who still argue that the Castro regime is not Communist, not Communist infiltrated, not Communist controlled. So long as there are any who hold that view—so long, indeed, as there is even any propaganda being disseminated from Cuban sources to deny the Communist character of the Castro regime—I think it is of the greatest importance for the people of this country, and the people of the free world, to know that Fidel Castro sat on the platform at the University of Havana with a smile on his face, and President Dorticos of Cuba sat there at the same time, listening without protest to a speech by a Cuban diplomat, affirming and reaffirming the Communist character of the Castro government.

I am sorry to say that I have not been able to obtain a copy of the full text of Ambassador Chaumont's speech. I do have a summary of what Ambassador Chaumont said, and I propose to place this in the RECORD at the end of my remarks.

I have also checked up on the item published in the Washington Daily News, and find that it represented the first three paragraphs of a nine-paragraph filing which was carried on the UPI ticker at 9:19 a.m. on March 14. I have learned that this story was filed in Havana by Henry Raymond, and I think Mr. Raymont and UPI are to be congratulated for making mention of Ambassador Chaumont's speech, and for giving some recognition to the importance of this item by placing it in paragraph 3 of the story which moved on the UPI wire. I do not know what other wire services, if any, carried the story of Mr. Chaumont's speech, and I do not know what other newspapers made reference to it in their columns. I only know that I did not see it anywhere except in the Washington Daily News.

In considering the importance of the fact that Ambassador Chaumont's speech brought no protests or denials from either Fidel Castro or President Dorticos, it is important to know that the speech was made at the University of Havana, at a meeting of the students of that university commemorating one of the honored anniversaries of the Castro revolution. In his speech, Ambassador Chaumont not only affirmed and reaffirmed the Communist character of the Castro revolution; he also stated clearly its purpose to "consolidate all revolutions in Latin America." He declared:

> We, the Communists, will continue to advance together with our truth. We, the Communists, will continue to honor the martyrs of the fatherland, the Cuban martyrs, whether Catholics or atheists, Socialists or Nationalists.
>
> The students of today and tomorrow will be greatly interested in learning how an entire people calls itself Communist, how even children deceived by religious schools have become Communists.
>
> We shall see very soon that all people of Latin America will become Communists.

I ask that the full text of this summary of the speech by Faure Chaumont, Cuban Ambassador to Moscow, at the Havana University students' meeting on March 13, 1961, may be printed in full in the RECORD at this point as a part of my remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SPEECH BY FAURE CHAUMONT, CUBAN AMBASSADOR TO MOSCOW, AT HAVANA UNIVERSITY STUDENTS' MEETING COMMEMORATING MARCH 13 ANNIVERSARY IN PRESENCE OF DORTICOS AND FIDEL CASTRO

(Summary)

We are here to recall our obligation to our comrades who fell in 1957. Another year of revolution has passed. On this day the best words uttered are those condemning the traitors who try to misuse the name of Jose Antoine Echeverria, those who served the tyranny and those who sacrificed Christ—the conspirators in cassocks.

The people are united under Fidel. There are the traitors, the ambitious, and those subservient to foreign exploitation. The revolution has been sufficiently strong to crush them. The revolution is invincible. Jose Antoine Echeverria can rest in peace, because his enemies have not been able to use his name against the revolution.

We are the revolutionary party. We shall consolidate all revolutions in Latin America. At the Mexico City conference attended by delegations from all sister nations of Latin America, Cuba was recognized as example of all Latin America whereby each country can win its independence:

"We are united by truth—the truth which is opening the way in the world and in space and the truth which has earned us the label of Communists by the servants and worms of imperialism. We, the Communists, will continue to advance together with our truth. We, the Communists, will continue to honor the martyrs of the fatherland, the Cuban martyrs, whether Catholics or atheists, Socialists or Nationalists. We will honor them with the truth, which has earned us the name of Communist.

"The students of today and tomorrow will be greatly interested in learning how an entire people calls itself Communist, how even children deceived by religious schools have been Communists. Since this must continue—this truth uniting the Cuban people—we shall see very soon that all people of Latin America will become Communists. We will demonstrate that we Communists really pay homage to comrades who fell on March 13 and to our comrade Jose Antoine Echeverria about whose Catholic militancy the enemies of the revolution talk too much. The Cuban people will pay homage to Jose Antoine and carry forward their revolution, proud of it and their leader, comrade Fidel Castro. Long live the revolution."

WIRETAPPING

Mr. DODD. Mr. President, I introduce, for appropriate reference, a bill which will outlaw all private wiretapping; prohibit most police wiretapping, and subject all authorized wiretapping to rigid standards of procedure and reporting.

I approach this issue fully aware that it involves fundamental questions of public policy. Most of the vital internal problems facing free government require an intricate balancing of the rights and responsibilities of individuals as against the legitimate needs and interest of the public good. The keeping of this balance is at the heart of the continuing struggle to promote a government which is effective while preserving a society which is free.

Few questions which attempt to balance the rights of individuals against the needs of government cut closer to the bone than the matter of wiretapping. The stakes here are high. An answer which goes too far toward the protection of individual rights could cripple law enforcement and endanger national security. An answer which goes too far toward meeting the needs of law enforcement could gravely impair basic individual rights.

These considerations doubtless account for the long failure by the Federal Government to act decisively in this field. But its failure to act has encouraged the unrestricted growth of wiretapping in its most vicious and offensive forms.

Each day in every major city of the Nation private telephone conversations are being listened to and recorded by unknown and unsuspected persons. The hidden participant in the most personal of telephone discussions may be a private detective eavesdropping to get evidence for a divorce case. He may be the employee of some business executive trying to gain secret intelligence about his competitors. He may be a criminal wiretapping for extortion purposes or for other criminal motives. Or he may be a police officer seeking some informa-

tion that will make easier the enforcement of the law.

The full extent of telephone wiretapping cannot be known. It is in the nature of things impossible to obtain reliable statistics about clandestine wiretapping. But we do know from fragmentary information that this practice is shockingly widespread and that it is growing from year to year. One responsible observer of the problem in New York City places the number of illegal police wiretaps in a recent year as high as 30,000. There is one case on record in which a private lawyer, with the help of a few associates, was able to tap at will almost 100,000 telephones. And each new technical advance in electronic devices enables the wiretappers to extend the scope of their operations.

We may fairly summarize this situation by saying that virtually no one in America is safe from having his most private telephone conversations overheard and recorded on tape. If someone seriously wants to tap your phone, the overwhelming probability is that he can do it and get away with it.

We know instinctively that this situation is repugnant and unacceptable. We cherish among our basic rights the inviolability of the home, the right of privacy; and our telephone conversations are an important part of this privacy.

Are we to continue to allow private sneaks or even public guardians to intercept the most intimate conversations between a man and his wife, a mother and her daughter, a patient and his doctor, a clergyman and his parishioner, a client and his lawyer, businessman and his colleague, a friend and his neighbor?

My answer is that the Federal Government, which alone has the power and the responsibility to act effectively in this field, should outlaw all wiretapping except that which is clearly essential to national security and the most critical requirements of law enforcement. Before we remedy the situation, we must discover how it is that a condition so inimical to individual rights and so foreign to the Constitution has come about in this land of civil liberty and constitutional government.

Wiretapping is running wild today because the one Federal law dealing with it, Section 605 of the Federal Communications Act, which outlaws all wiretapping and public disclosure of information gained thereby, is ambiguous and inadequate. A series of court decisions have served only to point up these uncertainties.

The wiretapping picture is chaotic. It is confused because Federal law leaves in doubt whether the prohibited offense is wiretapping alone or whether there must be public disclosure before the law is broken; confused because law enforcement agencies are themselves often knee-deep in wiretapping of such shaky legality that the police are generally reluctant to bring private wiretappers into court; confused because State law enforcement officers are clearly violating section 605, since they both wiretap and publicly disclose in court the information thus obtained; confused because under various Supreme Court decisions, wiretap evidence obtained by Federal or State officers is inadmissible in a Federal court, but the same evidence obtained by the same State officers is admissible in a State court.

The private wiretapper proceeds full speed ahead, confident in the knowledge that the police are reluctant to move against him because their own hands are not clean; the police wiretapper proceeds in a twilight zone, a legal no man's land, unaided by clear authority to wiretap in cases where wiretapping is patently justified, and unhindered by any clear prohibition against wiretapping respecting trivial offenses or no offenses at all.

This anarchy has paralyzed the vigorous legal action against private wiretappers that alone can drive them out of business; and it has fostered indiscriminate wiretapping by police officials who, in the absence of clear law, are following the path of least resistance.

I believe that the answer to this chaos lies in the legislation which I introduce today which would clearly outlaw most wiretapping and legitimize necessary wiretapping while subjecting it to rigid controls and procedures.

I know there are many who would go much further and abolish all wiretapping. It would perhaps be exhilarating to mount the hobbyhorse of unrestricted individual rights and demand an end to all wiretrapping on the ground that the right of privacy is so sacred as to be inviolate; or upon the ground that the power to tap wires is so dangerous to freedom that it cannot be entrusted to anyone.

But before we go too far in pressing the claims of inalienable rights, we must remember that many of what we popularly call individual rights are not inherent rights at all, not natural rights that man possesses as a human being but instead are limited rights, derived from society itself, rights which are products and growths of society, which have meaning only within a social context.

The right to use a telephone in absolute secrecy is certainly not an inherent right of man. The telephone is a product of a highly developed, cooperative, social existence. Therefore, man's rights with respect to the telephone may be properly limited by the needs of the society which developed it, which has a stake in its use and which suffers grievously from its abuse by criminals.

As to the second objection, that the power to authorize wiretapping is too dangerous to be entrusted to any man, I say this: Almost every action of our lives involves the placing of trust in someone. If we are not to be paralyzed completely as a people, we must repose somewhere the authority to act and we must assume that the highest officials in the land can be safely entrusted with that authority.

In the case of the proposed legislation, authority of grave import is vested in State judges, Federal judges, and the Attorney General, authority which is subject to strict standards of procedure and reporting. This is about as far as we can sensibly go in protecting against abuses.

I am certain that the common sense of the American people would not permit the passing of a statute which denied to our Federal agents the right to wiretap in cases involving the national security of the United States or a statute that would cripple the attempts of police officials to cope with murderers, kidnapers, extortionists, narcotics pushers, and syndicated crime.

The choice before us, then, is not whether there shall be wiretapping or no wiretapping but whether there shall be controlled wiretapping as I propose, or indiscriminate, universal wiretapping as exists today.

My bill contains the following provisions:

First, subject to clearly defined exceptions, it would outlaw both wiretapping and disclosure of wiretap information by Federal, State, and local police officials, making each a Federal crime.

Second, it outlaws all private wiretapping.

Third, Federal law enforcement officials, acting upon the order of a Federal court, may wiretap in connection with the crimes of murder, extortion, bribery, gambling, racketeering and violations of narcotics laws.

Fourth, Federal officials are permitted to wiretap, acting upon the order of a Federal court or upon the express permission of the Attorney General of the United States, who may not delegate his authority, with respect to the crimes of espionage, treason, sabotage, sedition and kidnaping.

Fifth, State and local law enforcement officials, acting upon the order of a State court, may wiretap in connection with the crimes of murder, extortion, bribery, felonious gambling and narcotics violations; but only where existing State law already permits wiretapping in these fields.

Sixth, all applications by law enforcement officials for permission to wiretap, whether made to the Attorney General of the United States, to a Federal court or to a State court must meet the following standards: (a) One of the delineated serious crimes has been or is about to be committed; (b) the interception will furnish evidence essential to a conviction for, or to the prevention of, the crime; (c) there are no other means readily available for obtaining the evidence.

Seventh, Federal and State courts will be required to report to the Administrative Office of the United States Courts all applications for authorized wiretapping, all denials and all orders granting authorization, and the administrative office will in turn be required to furnish Congress with an annual report which transforms this information into statistical material in order that the Congress may intelligently review the operations of this bill.

Eighth, a wiretapping violation shall be a felony punishable by up to 2 years in prison, a $10,000 fine, or both. (Violation of the present Federal wiretapping law is only a misdemeanor.)

How will this bill end the present confusion and move effectively against illegitimate wiretapping?

By clearly resolving the status of legal wiretapping, it frees law enforcement officials of their present reluctance to move vigorously against all private wiretapping.

By providing that unauthorized wiretapping, irrespective of disclosure, is a crime, it removes the uncertainties which have inhibited prosecution.

By definitely stating when law enforcement officials may or may not wiretap, it will eliminate most wiretapping by law enforcement officials.

By requiring rigid standards of procedure and statistical reporting for all authorized wiretapping, it assures that police officials will act with restraint and in good faith.

By permitting the admissibility in Federal and State courts of evidence obtained through authorized wiretapping and by outlawing any use in State or Federal courts of wiretap evidence obtained in violation of this bill, it will prevent those patent abuses that are now tolerated, and resolve those inconsistencies in court procedures which offend our sense of the logic of legal processes.

What would this bill do to State laws? The bill imposes four limitations on State laws: First, that wiretapping is permissible concerning serious crimes only; second, within this area only a State court may authorize the wiretapping; third, that the State court must use the bill's standards in reviewing applications and orders; and fourth, that the State courts must report on applications and orders to the Administrative Office of the United States Courts. Otherwise, State law controls State officers; it may be more relaxed or more stringent than that applying to Federal officers.

I suspect that the principal controversy that will arise over this bill will revolve around the exceptions that have been made to the general prohibition against wiretapping by police officials. The most difficult problem which faced me in the drafting of this bill was determining which offenses were so serious, or so peculiarly related to the telephone as to be excluded from the general ban.

Crimes involving treason and espionage offer little problem. Surely our Federal agents must be equipped with every reasonable weapon in their effort to protect America against those vast hidden forces which ceaselessly seek the destruction of our country.

Nor should there be much controversy over the exclusion of kidnaping, a capital offense which requires instantaneous action by the police if the life of the victim is to be saved, and which generally involves the use of the telephone for criminal purposes.

The authority to permit wiretapping is lodged in the Attorney General in cases involving either espionage or kidnaping since the time element may be of such critical importance so as not to permit going to court and since an application to a court in espionage matters might require the disclosure of highly confidential information that should not be disclosed.

By requiring the Attorney General to rule personally on applications in these areas, I feel we have placed an effective obstacle in the path of frivolous or needless wiretapping while at the same time giving our Federal agents the tools they need to protect national security and public safety.

I think most people would agree that the overriding necessity of preventing and exposing murder, the ultimate crime, justifies the use of wiretapping.

Extortion and bribery of public officials are serious crimes which again peculiarly involve the use of the telephone. And while here the case for wiretapping is less conclusive, I have, after careful thought, included these crimes among the exemptions, and respectfully await opinions of experts in this field.

On the Federal level, racketeering is a specifically defined offense, but the various statutes of 50 States and the possible interpretations of those statutes by State judges could open up legal wiretapping to a far greater extent than that anticipated in this bill. Therefore, no exclusion with respect to the term "racketeering" is made for State officials. I believe that by permitting wiretapping concerning such offenses as felonious gambling and extortion we adequately meet the needs of State officials while avoiding the potential for widespread abuse inherent in the use of so indistinct a term as is racketeering in some State statutes.

If it were possible to permit the use of wiretapping against nationally organized, syndicated gangsters, while prohibiting it in the case of the corner bookie, I would gladly do so. But I do not think it is possible either in terms of legal draftsmanship or the practical realities involved. The small-time racketeer, preying upon the gambling instinct, is the foundation of organized crime. He is the magnet around whom criminals of every type gather and no onslaught upon organized crime can be effective which does not move against him with every legal weapon.

I believe that this bill is basically sound both in what it prohibits and in what it permits. It is my hope that as it proceeds on its way through the legislative process, it will stimulate the interest of the Congress and of the Executive Branch in a long neglected subject; bring out the best in thought, pro and con, from our legal fraternity; cause the Nation to become more aware of this major problem, and prompt the Federal Government to decide in this year of 1961 that whether through this bill or through another, wiretapping must be brought under effective control.

Mr. President, I ask unanimous consent that the bill and a résumé describing this legislation be printed at this point in the RECORD.

The PRESIDING OFFICER. The bill will be received and appropriately referred; and, without objection, the bill and résumé will be printed in the RECORD.

The bill (S. 1495) to prohibit wiretapping by persons other than duly authorized law enforcement officers engaged in the investigation or prevention of specified categories of criminal offenses, and for other purposes, introduced by Mr. DODD, was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Federal Wire Interception Act."

DEFINITIONS

SEC. 2. As used in this Act—

(1) The term "wire communication" means any communication made through the use of telephone or telegraph facilities furnished by any person engaged, as a common carrier for hire, in providing such facilities for the transmission of interstate or foreign communications;

(2) The term "interstate communication" means any communication transmitted (A) from any State to any other State, or (B) within the District of Columbia or any possession of the United States;

(3) The term "foreign communication" means any communication transmitted between any State or any possession of the United States and any foreign country;

(4) The term "intercept" means the acquisition by any person, through the use of any intercepting device, of the contents of any wire communication made by any other person;

(5) The term "intercepting device" means any mechanical, electrical, or electronic device or apparatus other than a telephone or telegraph instrument, an extension telephone instrument, a switchboard, a wire communications line, cable, or system, or other part of the facilities used for the transmission of a wire communication from the sender to the person intended by the sender to be the recipient thereof;

(6) The term "contents", when used with respect to any wire communication, means any information concerning the existence, contents, substance, purport, or meaning of that communication;

(7) The term "person" means any individual, including any individual serving as an investigative or law enforcement officer of the United States, any Federal agency, or any State, and any partnership, association, joint-stock company, trust, or corporation;

(8) The term "Federal agency" means any department, agency, or armed force of the United States;

(9) The term "State" means any State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and any possession of the United States; and

(10) The term "judge of competent jurisdiction", when used with respect to any application for leave or any order granting leave to intercept any wire communication, means—

(A) a judge of a district court of the United States or a court of appeals of the United States, as to any application made or order entered to obtain evidence of, or to prevent, the commission of any offense in violation of any statute of the United States; and

(B) a judge of any court of a State who is authorized by a statute of that State to enter orders granting such leave, as to any application made or order entered to obtain evidence of, or to prevent, the commission of any offense in violation of the law of that State.

INTERCEPTION AND DIVULGENCE OF WIRE COMMUNICATIONS PROHIBITED

SEC. 3. (a) Except as otherwise specifically provided by this Act, it shall be unlawful for any person to—

(1) intercept, attempt to intercept, procure any other person to intercept or attempt to intercept, or conspire with any

other person to intercept or attempt to intercept, any wire communication; or

(2) divulge or disclose to any other person the contents of any wire commuication if the person divulging or disclosing that information knows that such information was obtained through the interception of a wire communication by any person.

(b) It shall not be unlawful under this section for any person to intercept any wire communication if that person is—

(1) the sender of that communication;

(2) the person intended by the sender to be the recipient thereof;

(3) a person authorized by the sender or by the intended recipient thereof to intercept that communication;

(4) an officer, agent, or employee of any common carrier for hire whose facilities are used in the transmission of that communication who intercepts that communication in the normal course of his employment while engaged in any activity which is a necessary incident of the rendition of service by that common carrier; or

(5) an investigative or law enforcement officer acting pursuant to and in compliance with authorization duly given under section 4 of this Act.

(c) It shall not be unlawful under this section for any person to divulge or disclose to any other person the contents of any wire communication if—

(1) the person making such divulgence or disclosure is the sender of that communication, the person intended by the sender to be the recipient thereof, or a person authorized by the sender or by the intended recipient thereof to intercept that communication;

(2) such information has been divulged or disclosed previously by any person described in paragraph (1) of this subsection to any other person, or by any individual while giving testimony in compliance with the provisions of section 5 (b) of this Act in any action or proceeding described in that section; or

(3) such divulgence or disclosure is authorized by and made in compliance with the provisions of section 5(a) or section 5(b) of this Act.

(d) Violations of this section shall be punished as provided by section 1362, title 18, United States Code.

AUTHORIZATION FOR CERTAIN INTERCEPTIONS OF WIRE COMMUNICATIONS

SEC. 4. (a) Upon application made by any investigative or law enforcement officer of the United States or any Federal agency, the Attorney General may authorize such officer to intercept any wire communication if the Attorney General determines that there is reasonable ground for belief that:

(1) a criminal offense punishable by death or by imprisonment for more than one year under chapter 37, 55, 105, or 115 of title 18 of the United States Code, or as an attempt or conspiracy to commit any such offense, has been committed or is about to be committed;

(2) evidence essential to the conviction of any person for, or to the prevention of, that offense will be obtained through such interception of the described wire communications; and

(3) no other means are readily available for obtaining such evidence.

(b) The Attorney General, or any officer of the Department of Justice or any United States Attorney specially designated by the Attorney General, may authorize any investigative or law enforcement officer of the United States or any Federal agency to apply to a judge of competent jurisdiction for leave to intercept wire communications when such action is required to obtain evidence of, or to prevent, the commission of any criminal offense punishable by death or by imprisonment for more than one year (1) under chapter 37, 55, 105, or 115 of title 18 of the United States Code, (2) as an offense under any other statute of the United States which involves murder, extortion, bribery, gambling, racketeering, or the possession, use, or furnishing of narcotic drugs, or (3) as an attempt or conspiracy to commit any offense in violation of any such statutory provision.

(c) Any investigative or law enforcement officer of any State or any political subdivision thereof who is authorized by or pursuant to a statute of that State to make application to a judge of competent jurisdiction for leave to intercept any wire communication may apply, in conformity with the procedures prescribed by the law of that State, for leave to intercept wire communications within that State when such action is required to obtain evidence of, or to prevent, the commission of any criminal offense which is punishable under the law of that State by death or by imprisonment for more than one year as an offense defined by the law of that State which involves murder, kidnaping, extortion, bribery, gambling, or the possession, use, or furnishing of narcotic drugs, or as an attempt or conspiracy to commit any such offense.

(d) Upon application made to a judge of competent jurisdiction by any investigative or law enforcement officer authorized by or pursuant to subsection (b) or subsection (c) to make such application, the judge may enter an ex parte order granting leave to intercept the wire communications designated therein, at any place within the territorial jurisdiction of the court of which the judge is a member, if the judge determines that there is reasonable ground for belief that:

(1) a criminal offense of any category described in subsection (b) or subsection (c) has been committed or is about to be committed;

(2) evidence essential to the conviction of any person for, or to the prevention of, that offense will be obtained through such interception of the described wire communications; and

(3) no other means are readily available for obtaining such evidence.

(e) Each application under subsection (b) or subsection (c) shall be made in writing upon oath or affirmation of the applicant, and shall contain a full and complete statement of the facts and circumstances relied upon by the applicant. The application shall (1) include a statement of the authorization under which the application is made, (2) include a statement of the purpose for which the application is made, (3) specify the nature and location of the communications facilities involved, (4) describe with particularity all previous applications made under this section to any judge by the applicant, or by any other person on behalf of the investigative or law enforcement office or agency of which the applicant is a member, for leave to intercept wire communications involving the same communications facilities for the same or any similar purpose, and (5) state the action taken by the judge upon each such previous application. The judge to whom any such application is made, before entering any order thereon, may require the applicant to furnish in support of the application additional documentary evidence or additional oral testimony.

(f) Each order granting leave under subsection (d) to intercept any wire communication shall specify—

(1) the nature and location of the communications facilities as to which leave to intercept is granted;

(2) each offense to be prevented or as to which evidence is to be sought;

(3) the identity of the officers authorized to intercept those communications; and

(4) the period of time during which such officers are authorized to intercept those communications.

(g) No order entered under subsection (d) may grant leave to intercept any wire communication for any period exceeding sixty days. The effective period of any such order may be extended for not more than thirty days upon application made to the judge who entered that order and a showing of reasonable ground for belief that such extension is necessary to obtain evidence of, or to prevent, the commission of an offense described in the order for which extension is sought.

AUTHORIZATION FOR CERTAIN DISCLOSURES OF INTERCEPTED WIRE COMMUNICATIONS

SEC. 5. (a) Whenever any investigative or law enforcement officer intercepts any wire communication pursuant to and in compliance with the terms of any authorization duly given under section 4 for the purpose of obtaiinng evidence as to the actual or probable commission of any offense, and that communication provides, or may lead to the discovery of, evidence as to the actual or probable commission of that offense, such officer may divulge or disclose the contents of that communication to any officer or employee of the United States, any Federal agency, or any State if such divulgence or disclosure is required for the proper performance of the official duties of the officer making the divulgence or disclosure.

(b) Any individual who has received, by any means authorized by section 4 or section 5(a) of this Act, any information concerning a wire communication intercepted in compliance with authorization duly given under section 4 may divulge or disclose the contents of that communication, to the extent that it provides evidence as to the commission of any offense specified in the order authorizing the interception of that communication, when required to do so while giving testimony under oath in any criminal action pending in any court of the United States or any State, or in any proceeding of a duly authorized committee or subcommittee of the Congress or either House thereof, or of the legislature of any State or any house thereof.

(c) Whenever any wire communication has been intercepted by any person, no part of the contents of that communication obtained through that interception may be received in evidence in any proceeding in or before any court, grand jury, department, officer, agency, or regulatory body or authority of the United States or any State from any witness if the disclosure or divulgence of that information by that witness (by any means other than the giving of testimony in that proceeding) would be in violation of section 3 of this Act.

PENALTY FOR UNAUTHORIZED INTERCEPTION OR DISCLOSURE OF WIRE COMMUNICATIONS

SEC. 6. Section 1362 of title 18, United States Code, is amended by—

(1) redesignating the text thereof as subsection (a) thereof; and

(2) inserting at the end thereof the following new subsection:

"(b) Whoever—

"(1) willfully intercepts, attempts to intercept, or procures any other person to intercept or attempt to intercept, or conspires with any other person to intercept or attempt to intercept any wire communication in violation of section 3 of the Federal Wire Interception Act, or

"(2) willfully divulges or discloses to any other person, in violation of section 3 of the Federal Wire Interception Act, any part of the contents of any wire communication with knowledge that such information has been obtained through the interception of a wire communication by any person, shall be fined not more than $10,000, or imprisoned not more than two years, or both. As used in this subsection, each term defined by section 2 of the Federal Wire Interception Act shall have the meaning given thereto by that section."

REPORTS CONCERNING INTERCEPTED WIRE COMMUNICATIONS

SEC. 7. (a) Within 30 days after the expiration of any order (including any extension thereof) entered by any judge under section 4(d) of this Act, the judge shall transmit to the Administrative Office of the United States courts a true and correct copy of (1) that order and any order for the extension thereof, (2) the application made therefor, and (3) any application made for the extension of that order. Within 30 days after the denial by any judge of any application made to him for the entry of any order, or for the extension of any order previously entered by him, under that section, the judge shall transmit to the Administrative Office of the United States Courts a true and correct copy of that application.

(b) In March of each year the Director of the Administrative Office of the United States Courts shall transmit to the Congress a full and complete report concerning (1) all applications made under section 4(b) or 4(c) of this Act which were denied during the preceding calendar year, and (2) all orders entered under section 4(d) which expired during the preceding calendar year and the applications made therefor. Each such report shall state with respect to such applications and orders the following information:

(1) the number of applications made by, and the number of orders granting leave which were entered upon applications made by, each Federal agency and each investigative or law enforcement authority of any State or any political subdivision thereof;

(2) the number of orders granting leave entered, and the number of applications denied, by judges of competent jurisdiction of each court;

(3) the number of applications made, and the number of orders granting leave entered, with respect to each classification of criminal offenses as to which such applications were made;

(4) the number of applications made, and the number of orders granting leave entered, for the interception of wire communications within each State, indicating separately (A) the number of applications made, and the number of orders granting leave entered, for the interception of communications within each municipality or other political subdivision of each State, and (B) with respect to each classification of criminal offenses as to which information is furnished under paragraph (3), the number of applications made, and the number of orders granting leave entered, within each State, and within each municipality or other political subdivision thereof; and

(5) such other information as may be requested in writing from time to time by the Chairman of the Committee on the Judiciary of the Senate or of the House of Representatives, or by the Chairman of the Committee on Interstate and Foreign Commerce of the Senate or of the House of Representatives.

COMMUNICATIONS ACT AMENDMENT

SEC. 8. The proviso contained in section 605 of the Communications Act of 1934 (48 Stat. 1103; 47 U.S.C. 605) is amended to read as follows: "*Provided*, That this section shall not apply to (a) the interception, receiving, divulging, publishing, or utilizing the contents of any radio communication broadcast, or transmitted by amateurs or others for the use of the general public, or relating to ships in distress, or (b) the interception of any wire communication, or the divulgence or disclosure of the existence, contents, substance, purport, or meaning thereof, if such interception, divulgence, or disclosure is declared by section 3 of the Federal Wire Interception Act not to be in violation of that Act."

The résumé presented by Mr. DODD is as follows:

RÉSUMÉ OF PROPOSED FEDERAL WIRE INTERCEPTION ACT

Sentor DODD's bill, entitled the Federal Wire Interception Act, is a comprehensive proposal for dealing with the wiretapping of telephone and telegraph communications by devices not ordinarily a part of the communications facilities. The bill does not deal with eavesdropping generally, nor with eavesdropping by devices which are a part of communications facilities (such as extension telephones and switchboards).

Except as provided, the bill makes unlawful either a wire interception or a disclosure of the contents of that interception with the knowledge that it is a prohibited interception. The penalty for violation is imprisonment for not more than 2 years or a fine of not more than $10,000 or both—that is, violation is punishable as a felony.

The bill declares that it shall not be unlawful for the sender, the intended recipient, or a person authorized by either to intercept or disclose; and that it shall not be unlawful for a communications company employee to intercept when acting in the necessary course of his employment. In addition, further disclosure is not prohibited once the contents of an interception have been disclosed by the sender, the intended recipient, or a person authorized by either to intercept or disclose, or have been disclosed in court proceedings.

In the case of certain designated crimes, the bill permits Federal law enforcement officers, upon authorization by the Attorney General or his delegee, to apply to a U.S. judge for an order permitting wire interception. The designated crimes are those of espionage, treason, sabotage, and sedition set forth in title 18 of the United States Code, those of murder, kidnaping, extortion, bribery, gambling, and racketeering, and violations of the narcotics laws, provided the criminal act is punishable as a felony. State officers may apply to a State judge for a similar order for the felonies under State law of murder, kidnaping, extortion, bribery, and gambling and for felonious violations of State narcotics laws, but only to the extent that wire interception is permitted by State law and only if the application accords with the procedures of State law.

The bill prescribes the minimum contents of an application for a court order for wire interception, the standards that are to govern judges in reviewing an application, and the minimum contents of an order granting leave to intercept. The standards that are to govern judges in reviewing applications are: that one of the delineated serious crimes has been or is about to be committed; that the interception will furnish evidence essential to a conviction for, or to the prevention of, the crime; and that there are no other means readily available for obtaining the evidence. The bill also prescribes that no order shall be effective for more than 60 days, subject to renewal for 30 days.

For crimes of espionage, treason, sabotage, sedition, and kidnaping, set forth in title 18 of the United States Code, the Attorney General may directly authorize wire interception. This power is nondelegable and is required to be exercised under the same standards that govern judges in reviewing applications for wire interception orders. The Attorney General will be required to issue the general rules and regulations under which he will exercise this power.

As to disclosures, the bill permits the contents of an authorized wire interception to be disclosed by a law enforcement officer where required for the proper performance of his duties. (The bill is intended to permit disclosures in this category between Federal and State officers.) The bill also authorizes disclosure in both Federal and State criminal proceedings and before committees of Congress and of State legislatures. The bill prohibits the admissibility in evidence in any proceeding of the contents of any unauthorized interception or disclosure.

By way of reporting requirements, Federal and State judges are required to report to the Administrative Office of the U.S. Courts all applications for authorized wiretapping, all denials, and all orders granting authorization. The Administrative Office of the U.S. Courts is in turn required to furnish Congress with an annual report which transforms what is transmitted to it into statistical material of value to the Congress in reviewing the operation of the act.

Finally, section 605 of the Communications Act of 1934 is amended to remove any prohibition therein against the interception or disclosure of a wire communication to the extent that interception or disclosure is not in violation of the Federal Wire Interception Act.

THE 38TH STATE TO RATIFY THE 23D AMENDMENT TO THE CONSTITUTION

Mr. CARLSON. Mr. President, I have in my hand a dispatch taken from the news ticker, datelined Concord, N.H. It reads as follows:

CONCORD, N.H.—The New Hampshire House elbowed Kansas out of the way today and became the 38th State to ratify the 23d amendment—giving District of Columbia residents the vote in presidential elections.

Kansas thought it had sewed up the honor of being the crucial 38th State. Two-thirds of the States must ratify to put an amendment on the books.

But today the New Hampshire House voted to reconsider its vote of yesterday. The vote today was equally favorable, though only a voice vote was taken.

Thus New Hampshire technically voted after Kansas. The Kansas ratification yesterday had followed New Hampshire's earlier vote by about half an hour—a device interpreted here as a bid to clinch the 38th spot.

Lawmakers here now claim that Kansas, ignorant of the parliamentary device up New Hampshire's sleeve, now becomes the 37th State to ratify.

In a telegram to Gov. John Anderson, of Kansas, Gov. Wesley Powell, of New Hampshire, said:

"This is to officially advise you that New Hampshire has this day become the 38th State to ratify the 23d amendment. This is in keeping with the tradition set by our sovereign State in breathing life into the Constitution of our country as the ninth State to ratify the same.

"We congratulate your legislature upon being the 37th State to vote for ratification of the 23d amendment. May your sunflowers be brighter than ever this year."

Mr. President, yesterday was a great day for the citizens of the District of Columbia, in that they were given the right to vote for President and Vice President of the United States. As I read this message to the Governor of our State, it states that—

This is in keeping with the tradition set by our sovereign State in breathing life into the Constitution of our country as the ninth State to ratify the same.

I merely wish to say that it was fortunate for our Nation that this off-again-on-again-Finnigan attitude which evidently prevails in the administration of

New Hampshire was not in effect at the time of the adoption of the Constitution. I sincerely trust that nothing will happen or that has happened today which will in any way endanger the rights of the citizens of the District of Columbia to vote.

Kansas yesterday was proud to have ratified the 23d amendment. We were proud that we might have been classed as the 38th State to ratify the amendment, and for a very definite reason. That reason is that this year is our Centennial Year. It was 100 years ago that Congress ratified and recognized us as one of the States of the Union—as the 34th State, as a matter of fact. Our State motto is "Ad Astra per Aspera," which means "to the stars through difficulty." That certainly was true of the early history of Kansas. Perhaps the people of the District of Columbia, as they look back on the travail and tribulations and trials which they went through in securing the vote might say that that motto of Kansas would apply to the District of Columbia in securing the right to vote.

I was going to place in the RECORD some of the editorials and fine comments on the part of the press in the District of Columbia on the action on the part of Kansas. I shall not do so at this time.

However, I wish the RECORD to show that we were sincerely interested in the welfare and the voting rights of the citizens of the District of Columbia. Whether we are the 38th State or the 37th State, we still stand very much committed and rejoice with the people of the District that they have been given this voting privilege.

RECOGNITION OF ABILENE, KANS., IN THE ALL AMERICA CITIES CONTEST

Mr. CARLSON. Mr. President, last week I called the Senate's attention to the fine recognition given Abilene, Kans., in the All America Cities contest sponsored by the National Municipal League and Look magazine.

In my statement I mentioned the fact that Abilene was the hometown of our past President, Dwight D. Eisenhower. This morning I received a letter from President Eisenhower stating that he had noticed in the CONGRESSIONAL RECORD that I had called this honor to the attention of the Senate.

I was pleased to receive the letter and note that the President is following the proceedings of the Senate by reading the CONGRESSIONAL RECORD. No matter what positions President Eisenhower has held during his lifetime, he has not forgotten his associations with Abilene and his many friends there.

The letter reads as follows:

PALM DESERT, CALIF., *March 26, 1961.*
The Honorable FRANK CARLSON,
U.S. Senate,
Washington, D.C.

DEAR FRANK: As I looked through the CONGRESSIONAL RECORD the other day I was delighted to come upon your remarks on Abilene. I certainly agree that it is a great honor that the National Municipal League and Look magazine has bestowed on the citizens of my old hometown. Please extend to my good friends in Abilene my hearty congratulations on receiving this well-deserved recognition.

With warm regard.

Sincerely,

D.E.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Bartlett, one of its reading clerks, announced that the House had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guarantee authority of the Interstate Commerce Commission.

CALIFORNIA WATER DEVELOPMENT—ADDRESS BY SENATOR KUCHEL

Mr. KUCHEL. Mr. President, on March 8 I had the pleasure of speaking in San Francisco to the California Municipal Utilities Association. I ask unanimous consent that my comments at that time be printed at this point in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ADDRESS BY U.S. SENATOR THOMAS H. KUCHEL, BEFORE THE 29TH ANNUAL CONFERENCE, CALIFORNIA MUNICIPAL UTILITIES ASSOCIATION, SAN FRANCISCO, CALIF., MARCH 8, 1961

Members of the California Municipal Utilities Association, friends and fellow Californians, surely no one in this gathering of California water men needs to be told how glad I am to be home here in my native State with you and to be discussing water development in California. Water, and laws pertaining to it, is a subject to which I have devoted much of my years of public service, both in California and now as your Senator in Washington.

As California water men, we are meeting at a momentous and propitious time for our State. We are on the threshold of a great new era in water resources development in California, which I firmly believe will see further progress in the great physical developments for bringing into being new sources of water and other projects for the better conservation and more efficient use of existing sources which our State already has planned and made provision for.

But equally important, we are at the beginning of an era, I hope and believe, of genuine cooperation, both legally and physically, between the Federal Government and our State and local governments for the maximum development and use of our water resources in accordance with State and local needs and customs, and the desires of the people of California. At the same time, the Federal function and responsibility will be carried forward far more effectively. Hopefully, in some ways this era will constitute something of a departure from what I have fought in Washington as the "Federalistic" approach, under which the Department of Justice has claimed the U.S. Government owns all water rights in our State and that it is the repository of all wisdom as to what should be done with those water rights. This new approach will be, I hope and believe, one of greater recognition and greater respect by the Federal Government for the historic principle of local autonomy and self-government under which our Nation has grown great. At the same time, the State will recognize the responsibilities of the Federal Government under our constitutional system and have due respect for and appreciation of its role in water resources development.

Such an approach by both the Federal Government and the State government—for lack of understanding of the Federal and the State roles and functions has not been the fault of Washington exclusively—will free the creative energies of California for the planning and execution of the water conservation and developments so necessary if we are to meet successfully the present and future needs of the Golden State. Up to now, to a great extent, the initiative has been carried by local subdivisions within the State and by the Federal Government. Now our State and our people are assuming greater responsibilities.

The physical development to which I referred is grounded first on the approval last November by our fellow Californians of the $1,750 million water development plan; and, secondly, on a continuation of strong Federal programs, such as the proposal for the $73 million plus items for construction by the Federal Bureau of Reclamation in California and another $40 million for construction by the Corps of Engineers recommended in the Federal budget for fiscal 1962 submitted by President Eisenhower on January 16 of this year. These figures are for construction only, and do not include moneys for investigations and surveys.

This makes a total of $113 million in Federal expenditures this next fiscal year for water construction alone in California.

I have every hope the new administration will at the very least adopt these approved proposals, and that it will see fit to concur in additional recommendations which those of us who represent California in Washington are planning to make.

To this probable minimum of $113 million in Federal expenditures next year, it is fair to add the $35 million in the 1962 State budget for the Feather River project, including completion of relocation work and diversion tunnels at Oroville Dam, work on the South Bay Aqueduct, and land acquisition. So we can reasonably expect authorizations for at least $150 million for water resource construction in California during this next year.

The political aspect of our coming new era has as its base not only the mandate of our California voters in approving the State water plant, but also the findings and recommendations of the Select Committee on National Water Resources of the Senate. This committee was composed of 17 Senators from each section of our country—West, Midwest, South, and East. It was headed by Senator ROBERT S. KERR, of Oklahoma, as chairman. I was honored to serve as vice chairman. A truly expert staff was assembled, most of whom were specialists drawn from private research and scientific organizations, and from agencies of the Federal Government. Hearings were held over the entire country, from Missoula, Mont., to Jacksonville, Fla., and from Augusta, Maine, to Los Angeles. Over 800 witnesses presented almost 4,000 pages of testimony. In addition, qualified private and Federal agencies made special studies for the Committee, and the official views of the States, including those of California, were solicited and fully considered.

I would like here to pay deserved tribute to my friend, Harvey Banks, who drafted California's comprehensive and constructive position statement. It is my firm conviction that this report of the Select Committee on National Water Resources, and the creative contributions made to it by many individuals such as Mr. Banks, will be a sound guide for the planning and development of new Federal policies with respect to our water resources. Our committee had 92 studies made ranging from such broad

areas as "National Water Resources and Problems" to such technical subjects as "River Forecasting and Hydrometeorological Analysis."

Using 1954 as a base year for supply-demand studies, because it was the last year for which statistics on water use had been completed, the committee found that water withdrawals in the United States total some 300 billion gallons a day. By 1980, demands on the Nation's water resources will almost double, or reach a total of nearly 600 million gallons daily, and they will triple by the year 2000.

Now the year 1980, by which time our present uses are expected to double, is a mere 20 years away. Statistically, most of us in this room have a reasonable life expectancy of being around that long. Therefore, the problem is not something that we can let our children worry about. It is a problem for us here today. We must also remember that these projections exclude Alaska and Hawaii. Our needs in California are, of course, much, much greater.

Harvey Banks' presentation estimated that the future population of California will be about 28 million persons by 1980, nearly double our present figure. Thus, our municipal uses for the ever-growing urban and suburban areas at maximum development will be about 6 million acre-feet annually, or over 7 billion gallons a day. Agricultural demands for our State will reach 37 million acre-feet annually.

In all, the California position statement sets forth that "under conditions of full development of the State's land and other resources, the water requirement will increase to an amount in the order of 55 million acre-feet annually."

Still another need for increased water resources is in the generation of power. Ever since the days of President Theodore Roosevelt, the production of electricity from falling water has been recognized as a reasonable public purpose. On this accepted principle, great Federal and local multipurpose projects have been constructed, enriching the lives of millions upon millions of our citizens.

I do not think that this is either the time or the place to debate the public versus private power issue. I firmly respect the right of the people to decide for themselves, under law, whether they wish to have public or private power development.

You, who have responsibility for the districts and cities of California that produce and distribute electricity to the consumers of our State, must rejoice with me that the platforms of both our great political parties pledge themselves to honor the preference clause in the marketing of Federal electric energy, thus assuring that the benefits of public expenditures will benefit the greatest number of people.

Happily, use of water for production of power is, by and large, a nonconsuming use. As to the increased use of water for production of power, authorities such as the Federal Power Commission and the Edison Electric Institute differ in their estimates.

However, as the select committee report states, "Regardless of amount, there is no question but that the costs of hydroelectric power generation facilities can and should be borne by the users of that power."

It seems clear to me that, with increasing development of our water resources by construction of storage facilities, there will be abundant opportunities for hydroelectric power development. Advantage should be taken of opportunities for hydroelectric power installations wherever possible, so that the economies inherent in large-scale installations can be passed on to electric power users.

Happily, the problem of adequate water supplies is not at all insoluble, either for the Nation as a whole or for California. The Senate report states:

"With its abundant supply of good water, and its advanced technology and skills, the United States need never suffer for lack of water. Water shortages can be alleviated. The lack of water need not limit our economic destiny. But positive action must be substituted for complacency."

First, and most important, step toward getting the job done, is the development of increased public awareness and understanding of the Nation's water resources problems; of their effects on the Nation's water resources problems; of their effects on the Nation's economy; and of the possible ways of solving them.

As to California in particular, Harvey Banks' report stated:

"It has been demonstrated that the future demands for water can be met by conventional methods. The California Water Plan, published in 1957, provides a general long-range guide for accomplishing the massive alteration of nature's scheme of supplying water. A State water project construction program is called for to supplement local and Federal efforts. The job is beyond the scope of any one of these agencies.

"There are legal, financial, and political considerations that pose problems in launching a State water project construction program. They can be overcome by the coordinated efforts of all concerned."

I think it significant to stress the fact that both the Senate select committee report and California's report find as a fact that the Nation's water problem in general and California's in particular can be met in the foreseeable future through known methods, the so-called conventional methods, if you wish, of conservation and development of known existing water supplies. This includes construction of surface and underground reservoirs, long-distance and in some cases interstate transmission of water, far more effective pollution control as our industrialization grows, reuse, evaporation reduction and seepage control, vegetation management, and extensive watershed development.

In other words, neither the Federal nor the State report finds that we necessarily will be dependent by 1980 or even the year 2000 upon two new sources of increased water supplies that now appear to offer great promise, namely, saline and brackish water conversion, and weather modification and control. Substantial progress has been made in both of these promising fields. There is now before Congress legislation which would greatly step up our scientific and economic investigation in both areas. I have coauthored a bill which would authorize a demonstration program of desalinization. I pledge my support to both approaches.

It has been estimated that cloud seeding in California could give us another inch of precipitation, or 8½ million acre-feet annually. This would result in an increase of nearly 3½ million acre-feet in our runoff.

As to desalinization, scientists are now talking in terms of a cost of 25 cents per thousand gallons at the plant. My bill would specifically promote the use of atomic power for desalinization, and in the event of a breakthrough, even this cost might well be much lower.

Up to this point, I have been talking principally about the physical aspects of the solution to our water problems. These physical aspects involve, of course, many weighty economic, geographic, scientific, and policy considerations. I realize I have touched upon only a few of those considerations and then all too briefly. But, mainly, we must remember that, while it will take a lot of hard work, the water supply problems of both our State and our Nation can be solved within the framework of existing methods.

Now, I would like to turn to the even more complex and delicate problems of Federal-State relationships in water resource development in California. All Californians must recognize that the Federal Government has had and must continue to have a most important and crucial role in this development. By way of background, I would like to mention two outstanding precedents—Hoover Dam and the Central Valley project—where California has led in Federal-State cooperation in this vital area.

Mention of Hoover Dam in such a context to a California audience would not be complete without tribute to that great American and great Californian who as much as any other man deserves the title of "Father of Hoover Dam."

I refer, of course, to our late, great Senator Hiram W. Johnson. In the long and often trying legislative history of the authorization for Hoover Dam, there should be linked with Hiram Johnson another wonderful Californian and fine statesman, former Congressman Phil Swing who happily is still with us. But for these two farseeing men, we might well not have the development and foundation for prosperity in the Imperial Valley and in the cities of Los Angeles and San Diego that we enjoy today.

As far back as 1907, the Federal Government, under the leadership of President Theodore Roosevelt, recognized the need for Federal action if human habitation and agricultural development in the Imperial Valley were to be made safe and permanent.

In July 1919, the Department of the Interior, after careful investigation, recommended the construction of an all-American canal, but public hearings showed the need for a more comprehensive and far-reaching project. The Kinkaid Act of May 1920, directed the Secretary to conduct a broad investigation of the problems of the lower Colorado. The Secretary of the Interior submitted his formal report on February 28, 1922. This report recommended not only the canal, but also construction of the high dam on the Colorado at, or near, Boulder Canyon.

Shortly thereafter, Senator Johnson introduced the first of a long series of bills for what was then referred to as the Boulder Canyon. For 8 long years, Senator Johnson led the fight in Congress for Hoover Dam. And finally, the Swing-Johnson (Boulder Canyon) bill was signed by President Coolidge on December 21, 1928. As Senator Johnson noted, "This date will ever be memorable to the people of the Imperial Valley as marking the end of the long legislative struggle."

Regrettably, the signing of the Swing-Johnson bill creating Hoover Dam did not end the titanic struggle. But we are making progress even there, too.

Perhaps the outstanding example of Federal-State cooperation in water resource development is our own Central Valley project. I am honored to have had a part in this tremendous development, having authored and piloted through the Interior Committee and the Senate, the bill S. 44, in the 86th Congress for the largest single unit in the project, the San Luis. This climaxed a 4-year-long fight. The members of the association will recall that my measure, which was signed into law by President Eisenhower on June 3, 1960 (P.L. 488 of the 86th Cong.), authorizes appropriations of more than $290 million in Federal funds for construction, with the State of California, of joint use facilities at San Luis, and another $192 million for construction of distribution systems and drains, if the local water districts do not construct them.

On May 19, 1960, I stated just prior to final legislative action on my San Luis bill:

"The legislation before us envisages a great storage reservoir to be constructed and used

jointly by the Government of the United States and the government of California. It will serve a Federal reclamation project on the one hand, subject to Federal reclamation law, and it will also serve a State project, the Feather River project, on the other hand, under State law. An expanded area of the Central Valley project, a Federal reclamation project, will receive supplemental water in accordance with Federal statutes, and the lower San Joaquin Valley and the parched areas of southern California will receive an additional water supply under State statutes."

The San Luis bill was described by the Secretary of the Interior, who recommended approval of my measure to the President, as "a trailblazing step in Federal-State relations which will greatly assist in solving California's future water-supply problem."

Of course, there is far more to the Central Valley project and to the Federal-State cooperation and collaboration inherent in it, than the San Luis unit. As far back as 1873, the 43d Congress passed an act to authorize the President—who was then Ulysses S. Grant—to assign two Army engineer officers and what was then a coast survey officer to form a board, with the chief of the Geological Survey of California and another civilian to survey and report on a system of irrigation for the San Joaquin, Tulare, and Sacramento Valleys. This Federal law was the basis for the Alexander report of 1874, which provided a first root for our Central Valley project.

Up to the end of the current fiscal year, the Federal contribution to the Central Valley project will have amounted to over $650 million. We Californians must not overlook this fact in our insistence that California law should apply.

As to this problem of Federal-State law, the members of this association may recall that almost a year ago I described in the Senate a grave danger to the mutual cooperation which is so necessary if our Nation and our States are to reach their fullest potential in water resource development. This danger is best illustrated by what I call the federalistic philosophy set forth in the United States position in the so-called Fresno case. There, the Department of Justice claimed outright ownership by the Federal Government, in fee simple absolute, of all lands and all rights to all unappropriated waters in California and the rest of the area ceded by the Treaty of Guadalupe Hidalgo. My remarks must have have hit home, for I have been criticized sharply for some of my statements by the former Solicitor General of the United States.

At that time, I said that the Government's position in the Fresno case, and the special master's report in *Arizona* v. *California*, "brought to the fore the pressing necessity for recognition by the Congress of the crisis, and for action by the Congress to deal with it."

I am happy to say that at least part of my call has been heeded. In the select committee report agreed to by Senators from every region of the United States, cognizance is taken in some detail of the Federal-State conflict with respect to water resource development. The report states:

"Precedents for Federal-State relationships in water resource development have been set in section 8 of the Reclamation Act of 1902 (32 Stat. 388, 399) and in the Flood Control Act of 1944 (58 Stat. 887). These farsighted Federal laws have stood the test of time and experience. Patently, however, they are not the final answer.

"The U.S. Department of Justice clearly recognized the problem when in 1956 it cited, with appproval, the following statement:

" 'It follows that the preservation of the integrity of State water laws cannot be accomplished if efforts for that purpose are confined to the insertion in various acts of Congress of a provision requiring that Federal agencies constructing and operating Federal projects shall observe the State laws respecting appropriation, use, and distribution of water. It is evident that the solution lies largely in the integration of the operation of physical facilities and the coordination in an appropriate manner of jurisdictions in a dual form of Government.'

"The problem of Federal-State water rights is one that calls for broad objective inquiry, and for statesmanship of the highest caliber on the part of both the Congress and the State in its solution. A solution must be worked out, and worked out promptly, for the preservation of the historic pattern under which our people have grown great."

To the end of working out a solution such as that envisioned in the select committee's report, I have had several conferences with the chairman of the Interior Committee, Senator CLINTON P. ANDERSON of New Mexico. He has now assured me and others that the Interior Committee will conduct this year a broad study of Federal-State relationships in the water rights field. As a senior member of the Interior Committee, I will see to it that California's experiences and problems will continue to be considered.

In closing, I reiterate my conviction that the facts I have touched upon here give rise to the hope that we are on the threshold of a new era in Federal-State relationships for the development of our water resources, in California and in the Nation as a whole.

It is not too much to say that California is leading the way. But much work remains to be done. I am confident that, given the start we have, we will do the job.

I am aware that the cost will be great. Our State water plan, carried to maximum fruition, totals some $11 billion. The select committee report estimates that for the Nation as a whole reservoir storage capacity will require capital investment of $12 billion by 1980 and an additional $6 billion, for a total of $18 billion, by the year 2000. Municipal and industrial sewage collection and treatment works under the program, which calls for water of relatively high quality in all of our streams, would require new investments estimated at $42.2 billion by 1980, and an additional $39.4 billion between 1980 and the year 2000 for a total of $81.6 billion.

These are tremendous sums, and frankly I do worry about them, and so should you. But huge as they are, both with respect to California and the Nation, they are modest when related to the expected growth of the gross national product which, at the medium growth rate assumed for the select committee's studies, would increase at a rate of about 3¾ percent annually, reaching $1,060 billion at constant 1959 price levels in 1980, and $2 trillion in year 2000. The growth of the national economy may very well increase at a faster rate, in which case larger amounts of water will undoubtedly be needed, requiring even larger investments. It seems clear that as the Nation grows, larger and larger amounts can be made available for construction of water facilities without detriment to the economy.

So, too, with California. If we continue to forge ahead in water resource development, it will be an investment in tomorrow, the cost of which will be repaid by those who benefit from it. More important, we will leave a better California and better United States.

The Old Testament prophet warned many centuries ago in the Book of Proverbs, chapter 29, the 18th verse: "Where there is no vision, the people perish." But California, like the Nation, has a vision. And we do not propose to perish.

DISTRICT OF COLUMBIA NATIONAL SUFFRAGE AMENDMENT

Mr. KEATING. Mr. President, first I wish to assure the distinguished Senator from Kansas that I am delighted to know he is glad that the District of Columbia National Suffrage Amendment has been ratified. I assure him that New York, which was one of the early States to ratify the amendment, will not attempt to reconsider its action so as to try to "beat out" Kansas or any other State of the Union. We are very proud to have been in the vanguard of the movement to grant the people of the District of Columbia the right to vote for President and Vice President of the United States.

I know of the great interest of the distinguished Senator from Kansas in this movement. He has been one of the stalwarts in the effort. I simply wanted to give him this assurance from the sovereign State of New York.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. KEATING. I yield.

Mr. CARLSON. I express my appreciation to the distinguished Senator from New York. Evidently Kansas was in some fashion maneuvered out of the position we thought we were in for 24 hours, and possibly during a very short time, the District of Columbia National Suffrage Amendment was not ratified, and, therefore, the citizens of this good District did not have the right to vote.

Mr. KEATING. I am glad the situation has now been clarified. I congratulate the State of Kansas on its efforts in this regard, regardless of whether history denotes it as the 38th or the 39th State to ratify the amendment.

Mr. President, does the majority leader wish me to yield to him?

Mr. MANSFIELD. No; only when the Senator has finished.

Mr. KEATING. I shall not speak at length.

Mr. MANSFIELD. I like to hear the Senator so much that I hope he will speak all afternoon.

Mr. KEATING. I assure the Senator from Montana that the Senator from New York will not speak all afternoon. He sees his friend from Minnesota champing at the bit. What I have to say will take only a few moments, and I shall be happy then to yield to the next speaker.

Mr. HUMPHREY. That will be a pleasant surprise. [Laughter.]

NOW IS THE TIME FOR A DEPARTMENT OF URBAN AFFAIRS

Mr. KEATING. Mr. President, yesterday, the House enacted and sent to the President the bill enabling him to create new agencies and departments of the executive branch. This bill has already passed the Senate, and should be signed into law within the next few days.

The most important single step which, I hope, will result from the enactment of this measure is the establishment of the Department of Urban Affairs. I have long felt that such a department is urgently needed in order to coordinate and place emphasis upon the programs designed to assist and modernize our Nation's cities. I have introduced bills to accomplish this purpose both in the 86th and 87th Congress.

Two-thirds of our Nation's citizens today live in cities. Urban and suburban areas are expanding at a terrific rate. The problems of cities are unique and far-reaching, and become more pressing every day.

In the same way that the Federal Government treats the problems of agriculture, labor, and commerce, we must think in terms of a single, coherent approach to the tremendous challenges that face our cities.

The Federal Government already has a large role to play in urban renewal, slum clearance, public housing, air pollution control, rapid transportation, the construction of community facilities, the insuring of home mortgages, and the development of comprehensive urban planning concepts. These and many other activities of the Federal Government must be continually revitalized and must also be tackled at the highest level of Government. In a day and age when to simply park a car is often as grueling as climbing Mount Matterhorn, we cannot afford to accord a second-class status to the problems of urban life.

The present arrangement of a group of disjointed lower level Federal agencies with overlapping functions affecting urban life and urban development is sadly deficient. The HHFA is a hybrid without any real authority, except perhaps for the Administrator himself, and without any clear function to perform.

Although this arrangement is presently inadequate, it can, and should, form the basic framework for a new Department of Urban Affairs.

The HHFA itself would, I presume, go out of existence, and the several agencies subsidiary to it would become bureaus or divisions headed by Assistant Secretaries. The Department would also pull in some, but not all, of the relevant agencies in other departments which have functions inherently and directly relating to urban affairs.

This would be more than a needed organizational restructuring. It would also give important recognition to the priority and urgency of activities of the Federal Government which assist and contribute to the administering of our Nation's great metropolises and cities of all sizes, ages, and shapes.

Another development, Mr. President, which highlights the need for a Department of Urban Affairs was the transmission to Congress on yesterday, by the President, of proposed housing legislation. This legislation will, of course, require careful and complete scrutiny by the Congress. I am hopeful that out of such consideration will arise new and more vigorous programs and concepts to invigorate and redevelop our Nation's urban areas.

To sum up, the time is clearly propitious for the creation of a Department of Urban Affairs. The enabling legislation has been passed. The President's new housing proposals are in the air. Great interest is now focused on the needs of our metropolitan areas. To my mind, Mr. President, nothing could be more fitting to highlight these needs than the creation of a full-fledged Cabinet-level Department of Urban Affairs.

I hope the President will act forthwith; and in expressing this hope I realize that the President himself has also expressed great interest in the possible creation of such a department.

ORDER FOR ADJOURNMENT TO MONDAY

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate concludes its business today, it adjourn until Monday next at 12 o'clock noon.

The PRESIDING OFFICER. Without objection, it is so ordered.

AUTHORIZATION FOR PRESIDENT OF THE SENATE OR PRESIDENT PRO TEMPORE TO SIGN ENROLLED BILLS

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President of the Senate or the President pro tempore be authorized to sign enrolled bills during the adjournment of the Senate.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXTENSION OF RAILROAD LOAN GUARANTEE AUTHORITY—CONFERENCE REPORT

Mr. MANSFIELD. Mr. President, on behalf of the Senator from Florida [Mr. SMATHERS], I submit a report of the committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guarantee authority of the Interstate Commerce Commission. I ask unanimous consent for the present consideration of the report.

The PRESIDING OFFICER. The report will be read, for the information of the Senate.

The legislative clerk read the report.

(For conference report, see House proceedings of today.)

The PRESIDING OFFICER. Is there objection to the present consideration of the report?

There being no objection, the Senate proceeded to consider the report.

Mr. MANSFIELD. Mr. President, as agreed to, this measure extends the loan guaranty authority of the ICC to June 30, 1963. Otherwise, it would expire on March 31 of this year.

The Senate receded on all its amendments; the House conferees felt that, without further study, those amendments would unduly broaden the scope of this legislation.

It is my understanding that the report is a unanimous one. I request its adoption.

The PRESIDING OFFICER. The question is on agreeing to the conference report.

The report was agreed to.

ANNUITIES FOR WIDOWS OF CERTAIN FOREIGN SERVICE OFFICERS

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 116, Senate bill 1067.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1067) to amend Public Law 503, 84th Congress, so as to provide annuities for the widows of certain Foreign Service officers who retired prior to the effective date of the Federal Employees Group Life Insurance Act of 1954, which had been reported from the Committee on Foreign Relations, with an amendment, on page 1, line 5, after the word "after", to strike out "the word 'died' the words 'or retired'" and insert "'1954,' the following: 'or retired before such date and has heretofore died or hereafter dies,'; and by inserting after the word 'widow' where it first appears the phrase 'who was married to the participant at the time of his retirement,'", so as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5 of the Act approved May 1, 1956 (70 Stat. 125; 22 U.S.C. 1079d), as amended, is amended by inserting after "1954," the following: "or retired before such date and has heretofore died or hereafter dies,"; and by inserting after the word "widow" where it first appears the phrase "who was married to the participant at the time of his retirement,".

SEC. 2. Any annuity provided by the amendment made by this Act shall commence on the first day of the month following the date of death of the participant or the date of enactment of this Act, whichever is later.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD an excerpt from the committee report.

There being no objection, the excerpt from the report (No. 129) was ordered to be printed in the RECORD, as follows:

BACKGROUND AND REASONS

In 1956 Congress enacted section 5 of Public Law 503, 84th Congress, to make special provision for certain widows of retired Foreign Service officers. The provision reads as follows:

"In any case where a participant under the Foreign Service retirement and disability system died, leaving a widow who is not entitled to receive an annuity under the system, the Secretary of State is authorized and directed to grant such widow an annuity of not to exceed $1,200 per annum, if he finds that such widow (whether remarried or not) is in actual need and without other adequate means of support."

The foregoing provision pertained to only several persons. It was enacted for three reasons: First, because provisions of the Foreign Service Act relating to survivorship annuity made it expensive for Foreign Service

officers to provide survivorship benefits; second, because Foreign Service wives share the rigors of their husbands' jobs to an extent not true of civil service wives; and third, because the group affected by section 5 was small.

In 1960 Congress increased and adjusted the financial benefits to these widows. Section 5 of Public Law 503, 84th Congress, was amended to read as follows:

"In any case where a participant under the Foreign Service retirement and disability system died before August 29, 1954, leaving a widow who is not entitled to receive an annuity under the system and who is not receiving benefits under the Federal Employees Compensation Act, the Secretary of State is authorized and directed to grant such widow an annuity of not to exceed $2,400 per annum."

The 1960 amendment was explained by the report of the Committee on Foreign Relations as follows:

"The committee agreed that this amount is too low and recommends that it be increased to $2,400 per year. The committee eliminated the "need test" because it is inconsistent with the annuity principle. On the other hand the committee felt that it would be improper for a widow of a Foreign Service officer to receive an annuity payable from the Foreign Service retirement fund if she were receiving benefits under the Federal Employee Compensation Act, and accordingly the committee bill prohibits such dual benefits."

The date, August 29, 1954, was selected in the 1960 amendment because it was the effective date of the Government Employees Life Insurance Act. Any Foreign Service officer who retired after that date would have some Government life insurance which would benefit his widow in the event of his death. On that reasoning the 1960 amendment was not well drafted. It covered widows whose Foreign Service husbands died before August 29, 1954, but not widows of officers who retired before that date. The purpose of S. 1067 is to correct this error.

Only 20 persons are eligible or potentially eligible under the bill. The average annual cost of providing annuities for these 20 additional widows is estimated to be approximately $13,480, or a total cost of approximately $579,800 projected on an actuarial basis for the total life expectancy of these widows.

COMMITTEE ACTION

The committee considered S. 1067 on March 21, 1961. It had before it the position of the Department of State favoring the bill. The Department's letter suggested an amendment because "the language in the bill is apparently broad enough to include widows who did not marry the officer until after his retirement. In view of the basis upon which the widows of retired officers are granted annuities, it is not believed that this is the intent of the proposal."

The committee decided to adopt the amendment recommended by the Department of State and another amendment which merely clarified the language of the bill.

CONCLUSION

The committee believes these changes in section 5 of Public Law 503, 84th Congress, as amended, will more effectively carry out its intent. The committee recommends that the Senate approve S. 1067 with an amendment.

The PRESIDING OFFICER. The question is on agreeing to the committee amendment.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

AMENDMENT OF INDIAN LONG-TERM LEASING ACT

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 117, Senate bill 108, to amend the Indian Long-term Leasing Act.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. I ask unanimous consent to have printed at this point in the RECORD excerpts from the report by the Committee on Interior and Insular Affairs.

There being no objection, the excerpts from the report (No. 133) were ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of S. 108 is to amend section 1 of the 1955 Indian Leasing Act (69 Stat. 539) relating to leases of individual and tribal lands for public, religious, educational, recreational, residential, business, and some farming purposes.

The Senate report on S. 34, a bill that became Public Law 255, 84th Congress, the Long-Term Leasing Act, explained the need for such legislation in the following terms:

"The bill, as reported, would permit the Indian owners of restricted Indian lands in the United States to lease their lands for a period of 25 years with the approval of the Secretary, for public, religious, educational, recreational, residential, or business purposes, including the development or utilization of natural resources in connection with operations under such leases. In addition, these lands could be leased for farming purposes which require the making of substantial investment in the improvement of the land for the production of specialized crops. The bill in section 2 would also authorize leasing of restricted lands of deceased Indians for the benefit of their heirs or devisees.

"In general, the laws now governing the leasing of restricted Indian lands preclude leasing for periods of longer than 5 years. The absence of authority for long-term leases discriminates against Indians who own restricted lands that are suitable for the location of business establishments, residential subdivisions, summer homes, airports, or for other purposes that require a substantial outlay of capital by the prospective lessee. It also penalizes Indian owners of raw but potentially valuable farmlands on which the cost of subjugation is too great for the Indian himself to finance. In such cases, prospective lessees are willing to undertake these expensive improvements only if guaranteed tenure by a long-term lease.

"Because of existing limitations upon the duration of leases, many Indian lands which could be profitably utilized under long-term leases are idle, and the Indians are deprived of much-needed income. Other lands that are leased for shorter periods would bring much higher rentals to the Indians if the lands could be leased on a long-term basis. Enactment of S. 34 will remove these unfair restrictions."

NEED

In the interim since enactment of Public Law 255, there have arisen several instances where the 50-year maximum leasing period was inadequate for the proper development of resources. To meet the needs of the Palm Springs Indians, and the Navajo Tribe, Congress enacted Public Laws 86-326 and 86-505, amending the 1955 statute to permit up to 99-year leases on these two reservations.

In the report on S. 2456, 86th Congress, which became Public Law 86-505, the committee described the need for longer leases on the Navajo reservation as follows:

"LONG-TERM LEASING

"Section 2 of S. 2456 would amend the Indian Long-Term Leasing Act of 1955, as amended by the act of September 21, 1959 (73 Stat. 597), to permit 99-year leasing on the Navajo Reservation. The need for extended leasing authority arises from the difficulty in financing improvements through bank and insurance company loans on the basis of the present 50-year limitation on Indian leases. Normally, a 50-year lease has less than 50 years to run at the time it is negotiated by the lessee. This prevents the lessee from getting a loan from a national bank or a federally insured loan because the applicable statutes preclude loans secured by the mortgage of a leasehold estate unless the lease has not less than 50 years to run (12 U.S.C. 371, 1707, 1713). Some of reasons: First, because provisions of the For-Reservation will depend upon the ability of interested business firms to secure sufficiently long leases to justfy the construction of substantial buildings and improvements, and to permit borrowing for this purpose. For example, the Navajo Tribe is constructing a $7 million sawmill near Fort Defiance, Ariz. Byproducts industries have expressed an interest in locating in this same area, but will not do so unless long-term leases are available. Similarly, tribal members who will be employed at the sawmill will desire to purchase housing for their families. Unless 99-year leasing is authorized, these individuals will not be able to obtain FHA financing for home construction. The tribe wishes to attract industry to the reservation area to create jobs for its population. By granting authority for leases it will be possible to induce industries such as the Arizona Public Service Co., which contemplates building a $150 million powerplant on the reservation to locate on tribal lands, thereby providing employment for the Indians and lessening their dependence on the Federal Government.

"The extension of 99-year leasing to the Navajo Tribe does not mean that all leases will be for the maximum term authorized by the bill. The committee understands that the Department of the Interior will not approve leases for terms that are longer than needed to get the best return for the Indian owner and to permit the financing of maximum economic development."

The committee understands that the Seminole Indians in Florida, the Torres-Martenez group in California, and the Papago, Fort Mojave, and Colorado River Tribes in Arizona have all requested leasing authority beyond the present 50-year maximum.

In view of the several requests from tribes to have longer leasing privileges, the committee believes general legislation on the subject should be enacted.

This bill is designed to permit a lease with a term that is long enough to enable a lessee to obtain financing for the type of development that is contemplated. Some development depends upon the ability of the lessee to obtain large loans, which take time to negotiate. A lessee may obtain a 50-year lease from the tribe or individual Indian, but before he can complete his financing, the lease has less than 50 years to run. As pointed out in the Department's report on S. 108, the National Housing Act, the Federal Reserve Act, and some lenders require leases running not less than 50 years from the date of the loan. Generally, insurance companies require leases extending well beyond the date for amortizing the loan; and in some cases they require 99-year leases.

S. 108 is drafted in such a way as to provide for lease periods up to 99 years.

However, the Secretary of the Interior may not approve any lease with a term longer than is necessary to obtain maximum economic benefits for the Indian owners.

The 10-year limitation on grazing leases, and the 25-year limitation on farming leases that require substantial investments in improvements, that are contained in the present law, are retained in the bill. Farming leases that do not require substantial investments in improvements are included in the bill in order that all nonmineral leasing authority may be included in one act.

The language of the present law about options to renew is not retained in the bill, and it is not needed because the increase in the permissible term from 25 to 99 years will adequately meet the problem.

The language of the present law to the effect that business leases may include the "development or utilization of natural resources in connection with operations under such leases" is omitted because it is ambiguous. The present law is not intended to include mineral leases. The quoted language, however, has raised a question of construction, and its omission will be a clarification.

The favorable reports from the Department of the Interior, and the Bureau of the Budget, recommending enactment of the bill follow:

DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., January 18, 1961.

Hon. CLINTON P. ANDERSON,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C.

DEAR SENATOR ANDERSON: This is a report on S. 108, a bill to amend the Indian Long-Term Leasing Act.

We recommend that the bill be enacted.

The act of August 9, 1955 (69 Stat. 539), authorized leases of Indian lands to be made for specified purposes for terms not to exceed 25 years, with an option to renew for one additional term of not to exceed 25 years. Grazing leases are limited to 10-year terms without an option to renew, and farming leases that involve the making of substantial improvements to the land are limited to 25-year terms without an option to renew.

The 1955 act was amended by the act of September 21, 1959 (73 Stat. 597), and the act of June 11, 1960 (74 Stat. 199), to permit leases on the Palm Springs and Navajo Reservations (excluding grazing leases) to be for terms not to exceed 99 years. No change was made in the renewal provision. Similar legislation has been requested by the Torres-Martenez, Papago, Seminole, and Colorado River Indians.

This bill would make the 99-year lease authority already enacted for the Palm Springs and Navajo Indians applicable to all Indian lands. We believe that general legislation of this kind is preferable to special legislation for selected tribes. There is no reason why the authority should be granted to one tribe and denied to another. All tribes should have the authority available for use when it is needed.

The bill is needed in order to permit a lease with a term that is long enough to enable the lessee to obtain financing for the type of development that is contemplated. As we explained when the Palm Springs and Navajo bills were before the Congress, some developments contemplated by a lessee depend upon the ability of the lessee to obtain large loans for the construction of substantial buildings and improvements. Other developments require the subdivision of an area and provision for separate improvements, all of which take time.

A difficult problem arises from the fact that after a lessee obtains from the Indian or Indian tribe what is the equivalent of a 50-year lease under the present law, some time must elapse before he can complete his financing arrangements, and the lapse of even a few days means that he has a lease with something less than 50 years to run. Under the National Housing Act, mortgage insurance is available for residential housing loans based on a leasehold interest only if the lease had not less than 50 years to run from the date the mortgage was executed (12 U.S.C. 1707). The same limitation applies under the rental housing insurance program (12 U.S.C. 1713). Under the Federal Reserve Act, a national bank may make a loan secured by a real estate lease only if the lease has not less than 50 years to run from the date the loan is made (12 U.S.C. 371). We understand that the insurance companies follow restrictive policies that vary, but that in general they require the lease to extend well beyond the date for amortizing the loan; and in some cases they require 99-year leases.

If a long-term lease is to be used effectively in the interest of the Indian owner, it must be for a term that is long enough to permit the financing of maximum economic development. This does not mean, of course, that all leases will be for the maximum term allowed by law. As a matter of policy, the Department will not approve leases for terms that are longer than needed to get the best return for the Indian owner, and this direction is written into the bill.

The 10-year limitation on grazing leases, and the 25-year limitation on farming leases that require substantial investments in improvements, that are contained in the present law, are retained in the bill. Farming leases that do not require substantial investments in improvements are included in the bill in order that the bill may include in one place all nonmineral leasing authority.

The language of the present law about options to renew is not retained in the bill, and it is not needed because the increase in the permissible term from 25 to 99 years will adequately meet the problem.

The language of the present law to the effect that business leases may include the "development or utilization of natural resources in connection with operations under such leases" is omitted because it is ambiguous. The present law is not intended to include mineral leases, and is so construed by this Department. The quoted language, however, has raised a question of construction, and its omission will be a clarification.

The Bureau of the Budget on December 30, 1960, advised us that there is no objection to the submission of this report.

Sincerely yours,

GEORGE W. ABBOTT,
Assistant Secretary of the Interior.

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D.C., March 20, 1961.

Hon. CLINTON P. ANDERSON,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, New Senate Office Building, Washington, D.C.

MY DEAR MR. CHAIRMAN: This is in response to your request for the views of the Bureau of the Budget on S. 108, a bill to amend the Indian Long-Term Leasing Act.

The purpose of the bill is to authorize nonagricultural leases of Indian-owned land for periods up to 99 years. Existing law generally limits such leases to 25 years with an option to renew for an additional 25 years.

There is no objection to the enactment of S. 108 from the standpoint of the administration's program.

Sincerely yours,

PHILLIP S. HUGHES,
Assistant Director for Legislative Reference.

On March 3, 1961, the Secretary of the Interior wrote the chairman as follows:

"This will supplement our letter of February 14, 1961, regarding a review of the legislative materials that were submitted to Congress by this Department before January 20, 1961.

"We have completed our review, and we concur in the comments and recommendations made by the prior administration with respect to the following proposed bills and introduced bills:

" 'INDIANS

* * * * * *

" '12. Report on S. 108, a bill to amend the Indian Long-Term Leasing Act.'

"The Bureau of the Budget has advised us that there is no objection to the presentation of this report from the standpoint of the administration's program.

"Sincerely yours,

"STEWART L. UDALL,
"Secretary of the Interior."

Mr. CASE of South Dakota. Mr. President, will the Senator from Montana please state the principal changes made by this measure in the existing law?

Mr. MANSFIELD. I understand that in the case of a lease on less than a 50-year basis, there is extreme difficulty in obtaining the proper kind of financing. According to the committee report, which I understand is a unanimous one, and was approved by the Department of the Interior:

NEED

In the interim since enactment of Public Law 255, there have arisen several instances where the 50-year maximum leasing period was inadequate for the proper development of resources. To meet the needs of the Palm Springs Indians, and the Navajo Tribe, Congress enacted Public Law 86–826 and 86–505, amending the 1955 statute to permit up to 99-year leases on these two reservations.

In the report on S. 2456, 86th Congress, which became Public Law 86–505, the committee described the need for longer leases on the Navajo Reservation as follows:

This measure has been recommended by both the Eisenhower administration and the Kennedy administration; and, so far as I know, there is no objection to it.

I now read further from the report:

LONG-TERM LEASING

Section 2 of S. 2456 would amend the Indian Long-Term Leasing Act of 1955, as amended by the act of September 21, 1959 (73 Stat. 597), to permit 99-year leasing on the Navajo Reservation.

Mr. CASE of South Dakota. Is the bill, as amended, limited in application to the Palm Springs and the Navajo Reservations?

Mr. MANSFIELD. No, the bill goes beyond them. But the previous bills were applicable to the Palm Springs Indians and the Navajos.

Mr. CASE of South Dakota. I wonder whether the Senator from Montana will withhold requesting the passage of the bill until I have an opportunity to look a little further into this matter.

Mr. MANSFIELD. I shall be delighted to do so.

Mr. CASE of South Dakota. I thank the Senator from Montana.

Mr. MANSFIELD. Mr. President, I move that Senate bill 108 be temporarily laid aside.

The motion was agreed to.

The PRESIDING OFFICER subsequently said: Does the Senator from Montana wish to have the Senate return to Calendar No. 117, Senate bill 108?

Mr. MANSFIELD. Not unless the Senator from South Dakota is agreeable to that course.

Mr. CASE of South Dakota. Mr. President, I have examined the report on the bill, and I note a paragraph which I think satisfies the question which was in my mind.

Part of the paragraph reads as follows:

The 10-year limitation on grazing leases, and the 25-year limitation on farming leases that require substantial investments in improvements, that are contained in the present law, are retained in the bill.

So there would be a 10-year limitation on grazing leases and a 25-year limitation on farming leases that require substantial investments in improvements.

Therefore, I have no objection to the bill.

Mr. MANSFIELD. I thank the Senator from South Dakota; and I appreciate his interest.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1 of the Act of August 9, 1955 (69 Stat. 539), as amended is hereby amended to read as follows: "Any restricted Indian lands, whether tribally or individually owned, may be leased by the Indian owners, with the approval of the Secretary of the Interior, for public, religious, educational, recreational, residential, business, farming, or grazing purposes. The term of a grazing lease or a farming lease that does not require the making of a substantial investment in the improvement of the land shall not exceed ten years. The term of a farming lease that requires the making of a substantial investment in the improvement of the land shall not exceed twenyt-five years. The term of any other lease shall not exceed ninety-nine years. The Secretary of the Interior shall not approve any lease with a term that is longer than is necessary in his judgment to obtain maximum economic benefits for the Indian owners."

EMPLOYMENT OF CERTAIN ADULT INDIANS

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 118, Senate bill 200.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 200) to amend the act entitled "An act relative to employment for certain adult Indians on or near Indian reservations," approved August 3, 1956.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD pertinent excerpts from the report on this measure by the Committee on Interior and Insular Affairs.

There being no objection, the excerpts from the report (No. 134) were ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of S. 200 is to amend the act of August 3, 1956 (70 Stat. 986), entitled "An act relative to employment for certain adult Indians on or near Indian reservations."

The 1956 act (Public Law 959, 84th Cong.) authorized a vocational training program for American Indians residing on or near Indian reservations.

The bill repeals the $3,500,000 annual authorization to carry out the training program and makes the amount of the annual appropriation subject to the normal budgetary process.

BACKGROUND OF THE LEGISLATION

Although the Indian vocational training program has been in operation less than 5 years, it has become a most effective tool for equipping American Indians between the ages of 18 and 35 with available work skills. In its report on S. 3416, 84th Congress, the bill that became Public Law 959, the Committee on Interior and Insular Affairs made the following observations in connection with the need for Indian vocational education.

"The American Indian's standard of living today is below that of the general population. S. 3416 is an attempt to do something constructive about this problem. With the Indian's average income below that of his non-Indian neighbors, there is a consequent drop in living standards. One of the major problems faced by Indians is that reservation resources are inadequate to support the increasing population at a reasonable standard of living. Additional land might solve this problem for a short while, but it would not be the permanent solution, for with the increasing birth rate, the present situation would develop again in the future. Because of the lower standard of living on the reservation, the Indian is turning more and more to wage work off the reservation. Being unskilled in any trade, the Indian usually works as a laborer at lower wages. Low wages, in turn, create problems of poor health, housing, clothing, food, and sanitation.

Laborers are fast disappearing from the labor scene, while semiskilled and skilled workers are in demand. The Indian represents a valuable source from which to fill that need. This increasing demand for skilled workers has been recognized by Federal and State Governments with appropriations for vocational training, rising from $3,039,061.15 in 1918 to $164,761,217.75 in 1955. S. 3416 would extend this training to Indians who cannot take advantage of vocational programs because of the remote location of most reservations.

"For many years people have been prone to consider the Indian as an agriculturist, but actually there has been a changing pattern in effect brought about by the inadequate resources on the reservations to support the population, and the desire of many Indians to follow some other kind of work. A study of the work experience of 301 Indians from 1946 through June 30, 1952, indicates that 220 were engaged in agricultural occupations and 23 in construction work in 1946. The year 1952 found 34 in agricultural occupations and 128 engaged in construction work of some kind.

"The training program contemplated by this bill will have two purposes. First, it should be of great value in preparing and orienting participants in the Indian relocation program, and second, it should stimulate industries to locate near Indian reservations. Although the relocation program is of recent creation, it appears obvious that since the marginal reservations cannot support their growing populations, it is imperative that some of the tribal members be equipped with vocational skills which will encourage them to seek employment elsewhere.

"The program envisioned in S. 3416 would be of direct benefit, not only to the individual Indian, but to the Nation. The Indian trained under this program would command a higher salary and be able to adequately support his family at a decent standard of living. In turn, individual Indians would cost the Federal Government less in special services and begin paying higher income tax, thereby beginning a circle. As the individuals began supporting themselves, and paying taxes, the Federal Government would be training others. Another point to be considered is that for every individual Indian trained and earning a good living, the Government will not have to support his children, whereas if he remains on the reservation as at present, the Government would be required to give him, and later his children, special services."

COMMITTEE COMMENT

The response of Indians to the opportunities afforded them in vocational courses and on-the-job training has been most favorable. In fiscal year 1961, there were 1,700 students enrolled in various vocational programs throughout the United States. The average cost per single trainee has been $2,216 and the average cost per family trainee has been $4,248, including program direction costs and administrative expense. The Bureau of Indian Affairs reports that as of May 1, 1960, 743 Indians had completed training. Of this total 459 (61 percent) were employed in their field of training. Forty-nine trainees (7 percent) were employed in related fields. Forty-seven (7 percent) were employed in unrelated fields, and 33 (4 percent) were unemployed. The whereabouts of 155 graduate trainees (21 percent) is uncertain but it is known that they have not returned to their reservations.

Vocational training courses extend from 4 months to 2 years. Because presently available funds are all committed, approximately 3,000 Indians are unable to begin training. The Committee on Interior and Insular Affairs has gone into the vocational training program in some detail. It is the opinion of the membership that the program should be expanded in order that substantial numbers of qualified Indians may be trained and placed in suitable jobs. As population pressures increase on already overtaxed reservation resources, the need for additional vocational training opportunities becomes more apparent. Departmental witnesses testified that the percentage of dropouts in this program approximated 30 percent, but that many of these trainees found suitable employment prior to completing their course of instruction.

By repealing the $3,500,000 authorization in the 1956 act, and adopting in lieu thereof the language in S. 200, the Department of the Interior and the Bureau of Indian Affairs will be able to present to Congress in the annual budget a request for adequate funds to provide training for all of the Indians applying for vocational benefits. Every eligible Indian should then be afforded the schooling he desires at the earliest possible time.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 200) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2 of the Act entitled "An Act relative to employment for certain adult Indians on or near Indian reservations", approved August 3, 1956 (70 Stat. 986), is amended to read as follows:

"SEC. 2. There are authorized to be appropriated such sums as may be necessary to carry out the provisions of this Act."

Mr. CASE of South Dakota subsequently said: Mr. President, I should

like to make a brief statement on Calendar No. 118, Senate bill 200, which offers more potential benefit for the development of individual self-sufficiency by the members of the various Indian tribes than any bill the Senate has had on the floor in this session. S. 200 proposes to remove the dollar limitation on the annual authorization for the carrying on of adult education and on-the-job training. It would make existing law in this respect available, for the purposes of appropriation, according to the actual needs as might be determined by the Bureau of Indian Affairs and the Bureau of the Budget in any 1 year.

During the past few months there has been established on one Sioux reservation, the Pine Ridge Reservation, an on-the-job training program in connection with the location there of an industry for the manufacture of fishing tackle and other sporting goods. During the brief time this program has been in operation, it has provided employment for 125 Indians who were not previously employed.

Within the brief time it has been in operation, the skills exhibited by the Indians, developed as a result of the on-the-job training program, have been such that the company has been so encouraged it wants to double the number of employees. The company already has the equipment and material necessary to increase the employment to 170. It is believed that in time the number will exceed 200 employees. The training provides opportunity for employment of a permanent type, which will relieve the demands on the Federal Treasury of individual Indian relief, and is all to the good.

On another reservation in South Dakota, the Standing Rock Reservation, another industry is about to get under way which offers similar promise.

All those activities would have been impossible, and would not have been started, without the on-the-job training program to develop the initial skills necessary to make the Indians self-sufficient.

This is good legislation, and in the interest of the Indians. It is also in the interest of the Treasury of the United States itself, because many of the Indians who have been unemployable are finding employment through the program which the measure helps initiate and sustain.

FORT HALL INDIAN IRRIGATION PROJECT

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 119, Senate bill 1294.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1294) to supplement and amend the act of June 30, 1948, relative to the Fort Hall Indian irrigation project and to approve an order of the Secretary of the Interior issued under the act of June 22, 1936.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD excerpts from the report by the Committee on Interior and Insular Affairs.

There being no objection, the excerpts from the report (No. 135) were ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of S. 1294, introduced by Senator CHURCH, is (1) to approve an order of the Secretary of the Interior eliminating certain lands from the Fort Hall Indian irrigation project; (2) to change the size of the project as defined in the act of June 30, 1948 (62 Stat. 1167), from 47,044.63 acres to 47,064.63 acres and authorize the Secretary to redesignate the irrigable acreage from time to time within the limits of the total figure; and (3) to increase the duty of water to be furnished project lands by 0.5 acre-foot per acre per year.

The bill was introduced at the request of the Department of the Interior as the result of an executive communication dated January 12, 1961.

NEED

The act of June 30, 1948, establishes the net irrigable lands on the Fort Hall project at 47,044.63 acres.

In 1958, the Department of the Interior conducted a redesignation survey on the Fort Hall project. The survey disclosed that approximately 468 acres of agricultural land should be eliminated from the project because it is being used for residential, commercial, and road purposes. The Fort Hall project is the only Indian irrigation project for which the Secretary of the Interior does not have authority to redesignate irrigable acreage.

The Secretary has submitted an order eliminating the 597.57 acres from the project when the owners sign a consent to the elimination and pay delinquent assessments. Such order becomes effective when approved by Congress. Penalty charges ($2,085.40) are canceled by the order on the ground that the elimination of the acreage involved and the transfer of the water to other lands will benefit the project and, therefore, attempts to collect penalty charges would be resisted and probably cost more than the amount involved. The consent requirement does not apply to the owners of 129.37 acres who never signed original water contracts because the 1948 act requires that acreage to be eliminated. The committee understands that all of the owners have signed consent agreements.

The Secretary's order requires the collection of delinquent assessments which total $356.72 for construction and $8,435.84 for operation and maintenance.

When the 597.57 acres have been eliminated as proposed, the water formerly available for that acreage, should be made available to other lands. The secretarial order provides for the inclusion of additional acreage in the project and for the transfer of the water to it. The additional acreage is 617.57 acres, which require a slight increase (20 acres) in the total size of the project.

Amendatory language has been included in the 1948 act to increase the duty of water prescribed in the act from 3 acre-feet to 3.5 acre-feet per acre per year. Additional water is required because of more efficient farm equipment and the use of modern fertilizers. The committee was informed that sufficient water is available on the project to permit this increase.

On June 28, 1960, the Senate passed S. 3650, a bill identical with S. 1294.

Mr. MANSFIELD. Let me say, Mr. President, that all the measures we are considering today have been taken up with the minority leadership; and, so far as we have been able to ascertain, there is no controversy in connection with any of them.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 1294) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the order of the Secretary of the Interior dated May 12, 1960, which provides for the elimination from the Fort Hall Indian irrigation project of four hundred sixty-eight and twenty one-hundredths acres and one hundred twenty-nine and thirty-seven one-hundredths acres of land, and which provides for the cancellation of penalty charges against the eliminated land, which order was made pursuant to the Act of June 22, 1936 (49 Stat. 1803), is hereby approved, and the lands when eliminated shall not thereafter be entitled to water from the project.

SEC. 2. Section 4 of of the Act of June 30, 1948 (62 Stat. 1167), is hereby amended to read as follows:

"SEC. 4. The net irrigable area of the Fort Hall Indian irrigation project is hereby established at forty-seven thousand sixty-four and sixty-three one-hundredths acres, more or less, and the Secretary of the Interior is authorized to redesignate the project within the limit of the acreage authorized by this Act. The noninclusion of the Fort Hall townsite within the net irrigable area of the project shall not prevent the obtaining of water rights therefor in accordance with the Act of March 1, 1907 (34 Stat. 1015, 1025), as amended or supplemented."

SEC. 3. Section 2 of the Act of June 30, 1948 (62 Stat. 1167), is amended to read as follows:

"SEC. 2. The duty of water on the Fort Hall Indian irrigation project until modified by the Secretary of the Interior shall be three and five-tenths acre-feet per acre per annum if available, and available excess water may be furnished for use on project lands on terms, conditions, and rates prescribed by the Secretary."

NEZ PERCE TRIBE OF INDIANS

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 120, Senate bill 1295.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1295) to authorize the use of funds arising from a judgment in favor of the Nez Perce Tribe of Indians, and for other purposes.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD certain excerpts from the report by the Committee on Interior and Insular Affairs.

There being no objection, the excerpts from the report (No. 136) were ordered to be printed in the RECORD, as follows:

PURPOSE OF THE BILL

The purpose of S. 1295, introduced by Senator CHURCH, is to authorize the distribution of a $4,177,605.06 judgment recovered by the tribe against the United States in Indian Claims Commission docket No. 175–A. The net judgment now on deposit in the Treasury is subject to payment of expense of litigation and attorney fees.

The bill provides for a division of the funds between the Nez Perce Tribe of Idaho and the Confederated Tribes of the Colville Reservation, Wash. In addition, it provides for the same division—86.6 percent to the

Nez Perce and 13.4 percent to the Colvilles—in connection with any other judgment awarded to either group. This will preclude the need for further legislation. Also, provision is made for any Nez Perce Indians who have joined other tribes to rejoin the Nez Perce Tribe of Idaho if they wish to. Some Nez Perce Indians were adopted by the Umatilla Tribe. No divsion of the funds covered by this act will become effective until the Nez Perce and Colville Tribes, by resolution satisfactory to the Secretary of the Interior, agree to the percentage figures specified in the bill. The committee understands such an agreement has already been reached.

S. 1295 authorizes the use of the judgment funds for such purposes as are authorized by the respective tribal governing bodies and approved by the Secretary of the Interior. If a per capita payment is made to tribal members, no part of the funds distributed shall be subject to Federal or State income tax.

The PRESIDING OFFICER. The question is on the engrossment and third reading of the bill.

The bill (S. 1295) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assmbled, That the funds on deposit in the Treasury of the United States to the credit of the Nez Perce Tribe that were appropriated to pay a judgment by the Indian Claims Commission in docket 175–A, and the funds that may be deposited in the Treasury of the United States to the credit of the Nez Perce Tribe to pay any judgments arising out of proceedings presently pending before the Indian Claims Commission in dockets 175 and 180–A, and the interest thereon, after payment of attorney fees and expenses shall be divided by crediting 86.5854 per centum of such funds to the account of the Nez Perce Tribe of Idaho and 13.4146 per centum to the account of the Confederated Tribes of the Colville Reservation. These funds may thereafter be advanced or expended for any purpose that is authorized by the respective tribal governing bodies and approved by the Secretary of the Interior. Any part of such funds that may be distributed per capita to the members of the tribes shall not be subject to Federal or State income tax.

SEC. 2. The credit to the account of the Confederated Tribes of the Colville Reservation authorized by this Act, insofar as the judgment in docket 175–A is concerned, shall not be made until the Confederated Tribes of the Colville Reservation submit to the Secretary of the Interior assurances satisfactory to him that the Confederated Tribes have agreed that any judgment against the United States that has been or may be recovered by one or more of the constituent groups thereof, including the judgment in docket 181, will be deposited to the credit of the Confederated Tribes. The credit to the account of the Nez Perce Tribe of Idaho authorized by this Act, insofar as the judgment in docket 175–A is concerned, shall not be made until the Nez Perce Tribe of Idaho submits to the Secretary of the Interior assurances satisfactory to him that Indians who have resigned from the Nez Perce Tribe of Idaho and have joined another tribe under conditions that do not permit them to share in the benefits of any claims judgment recovered by that tribe shall be given the opportunity to rejoin the Nez Perce Tribe of Idaho if they wish to do so. The credits to the accounts of the Confederated Tribes of the Colville Reservation and the Nez Perce Tribe of Idaho that are authorized by this Act, insofar as any judgment in docket 175 or 180–A is concerned, shall not be made until the tribal governing body of the Confederated Tribes of the Colville Reservation and the tribal governing body of the Nez Perce Tribe of Idaho have submitted to the Secretary of the Interior resolutions satisfactory to him which agree to a division of the judgment in accordance with the percentage figures specified in section 1 of this Act.

CONVEYANCE OF CERTAIN SCHOOL PROPERTIES

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 121, Senate bill 1299.

The motion was agreed to; and the Senate proceeded to consider the bill (S. 1299) to amend the act of June 4, 1953 (67 Stat. 41), entitled "An act to authorize the Secretary of the Interior, or his authorized representative to convey certain school properties to local school district or public agencies", which had been reported from the Committee on Interior and Insular Affairs, with an amendment, to strike out all after the enacting clause and insert:

That the second proviso in the Act of June 4, 1953 (67 Stat. 41), as amended, is amended to read: *"Provided further,* that no more than fifty acres of land shall be transferred under the terms of this Act in connection with any single school property conveyed to State or local governmental agencies or to local school authorities."

The amendment was agreed to.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a statement from the report of the Committee on Interior and Insular Affairs on S. 1299.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

EXPLANATION OF THE BILL

The purpose of S. 1299, introduced by Senator CHURCH at the request of the Department of the Interior, is to amend the act of June 4, 1953 (67 Stat. 41), as amended, authorizing the Secretary of the Interior to convey certain Indian school properties to local school districts or public agencies.

The 1953 act authorizes the Secretary to convey to a public agency for a public purpose any lands or improvements that were formerly used for Indian school purposes that are no longer needed for that purpose. Under present law such conveyances are subject to the following conditions: If the lands are in trust status the Indian owners must consent, mineral interests in the lands must be reserved, the grantee must agree to make the property available to Indians on a nondiscriminatory basis, and there must be a reversion of the title in the event the land ceases to be used for a public purpose. The final condition is that not more than 20 acres may be conveyed.

As introduced, S. 1299 would have eliminated the 20-acre limitation. In several instances the present limitation has prevented conveyances of surplus Indian school properties that should be made. Representatives of the Indian Bureau testified that the original 20-acre limitation has seemingly served no useful purpose and that in fact, where surplus school facilities are no longer used, their retention because of existing acreage restrictions results in unjustified administrative and maintenance costs.

In view of testimony from departmental witnesses that the only known school properties not transferable under existing law did not exceed 40-odd acres, the committee was of the opinion that an increase from the present 20 to 50 acres would be advisable. Any conveyances exceeding 50 acres should be the subject of further legislation.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be offered, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

STATUS OF CALENDARS

Mr. MANSFIELD. Mr. President, for the information of the Senate, may I say that action clears the calendar. Under "General Orders" there is no legislative business pending before the Senate; and the only nomination on the Executive Calendar is one which is being held up at the request of a Member of this body.

U.S. INDUSTRY IN LATIN AMERICA

Mr. HART. Mr. President, the sobering dimensions of the worldwide responsibility of the United States in these times demand new ideas and new approaches. The standard brand foreign aid program of former years is not adequate to the job and it is not even economical.

The Peace Corps proposal has been received with enthusiasm by our young people—and, indeed, by many not so young in years but eager to have a part in our country's effort to help others help themselves.

The response to the Peace Corps proposal is concrete evidence that this country has not gone soft, that its people have not become complacent, that they have not ceased to care what happens to others. Is it unreasonable to assume that this same reservoir of vitality and affirmation is available in the circles of enlightened American industry, if it is but called forth? President Kennedy has indicated on several occasions since he took office that he looks to industry not as an alien but as an indispensable source of strength. So do I.

In this spirit I invite the attention of my colleagues and the administration to a most challenging speech given recently by Peter R. Nehemkis, Jr., Washington Counsel for the Whirlpool Corp. of St. Joseph, Mich. Mr. Nehemkis points out the critical importance of prompt and substantial action in Latin America, and he outlines a program in which the Government and industry would cooperate to do what neither one could do as well alone. This speech, in my opinion, offers some very important ideas for stepping up and improving our efforts in Latin America, with the cooperation of American industry. I commend it to all those who are trying to evolve the programs that we are being called upon to undertake, and ask unanimous consent that it be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

ALIANZA PARA PROGRESO

(Address by Peter R. Nehemkis, Jr., Washington counsel, Whirlpool Corp., at the 24th Chicago World Trade Conference, March 6, 1961.)

Latin America's restless millions know that the 20th century exists; they are passionately

determined to partake of its benefits. The governing and ruling classes of Latin America, who for centuries have shown only a cruel indifference to the wants and needs of their people, now have the choice of either sharing their power or being swept aside by Castro-like revolutions.

President Kennedy's offer to the other American Republics of an Alliance for Progress has raised great hopes and high expectations in every capital of Latin America that at long last this country's indifference to and neglect of Latin America has drawn to a close.

These hopes and expectations are freighted with both opportunity and danger.

If they should now be frustrated because once again we are too late with too little, the consequences are not too difficult to predict; in plain English, we will have plunged Latin America into an historic disaster in which the continent will run red—with blood and communism; the non-Communist intellectual leaders, the university students, and the people will sink into a cynical and bitter despair from which there is no return; our democratic friends, such as Alberto Lleras Camargo, Romulo Betancourt and Jose Figueres, will be unable to hold back the tides of Fidelismo; if these stanch fighters for democracy are forced to go under, they will carry with them into the vortex of reaction everything which is good and worthwhile in Latin America.

For the United States the hands of the clock stand at 3 minutes to midnight: either we shall seize this historic opportunity—probably the last such opportunity in our lifetime—to assist the people of Latin America to move into the 20th century under a democratically inspired social revolution; or by default there will be lost to us—and to the entire West—a civilization whose cultural traditions, whose friendship, whose markets, whose raw materials, whose people are vital to our well-being and to our prosperity. For it should never be forgotten that, if Latin America is lost to the non-Communist world, there is not much chance of holding the loyalty of the newly emergent lands on the other continents. With Latin America and Canada at our side, the United States has a spiritual and material base from which it can continue to lend support to the other free nations of the world.

Prompt and decisive action is called for on a broad economic and political front.

1. The time is at hand when the U.S. Government must exercise the political courage required to make the most important political decision since the promulgation of the Monroe Doctrine: a declaration of our willingness to join with the other industrial nations in price stabilization agreements for Latin America's primary export commodities on which her economic progress and prosperity depends. This is the key to Latin America's economic stability; it is the archstone around which everything else must be built.

2. We must convey to the other American Republics our desire to see steps taken to convert Latin America's mammoth military establishment into engineer, sanitation and highway construction corps, along the lines of Peru's newly formed work battalions. There is no military logic which can justify economically impoverished countries spending over a billion dollars annually for obsolete military forces when this money is so desperately needed for socially and economically useful programs.

3. Here in the United States—mainly in Washington—we need a keener realization that Latin America's social revolution cannot be underwritten by bankable loans; a new kind of capital is needed—social capital—the kind of capital which directly reaches the people.

4. That the Kennedy administration contemplates placing greater emphasis upon a regional approach to foreign aid is both gratifying and heartening. For Latin America, I have elsewhere proposed that we give consideration to utilizing a managerial device which has a proven record of success in the United States and in Europe—the public authority. Establishment of a number of regional authorities in Central and South America would, I am persuaded, do for this hemisphere what the European Coal and Steel Authority did for Europe—accelerate regional economic integration; provide more compact markets for locally manufactured consumer goods; and, conceivably, lead to an eventual political unification of the continent's fragmented sovereignties. Being decentralized, the authorities would operate directly in the problem areas. As international bodies they would draw on the technical personnel of virtually the entire world. With the power to issue their own securities, guaranteed by all of the capital-exporting countries of the world, the authorities would provide an ideal medium for buying up unused or underused land from powerfully entrenched local landowners, without having to resort to expropriation. Jose Figueres has advanced the imaginative suggestion that we might name these authorities after the Great Emancipator and the Great Liberator—the "Lincoln-Bolivar authorities."

(5) In consultation with the other American Republics, we need—promptly and decisively—to establish the minimum, but highest priority, programs where the concentration of our joint technical resources will lead to a quick saturation of effective results—for instance: land and agrarian reform; health improvement; vocational and technical training; a frontal attack upon illiteracy; and housing for the mass of people who live in rural slums and urban shanty towns under subhuman conditions—conditions which form the ideal breeding ground for Castroism and communism; or the Ligas Camponesas, the Peasant Leagues which are flourishing in the hunger-ridden northeast of Brazil.

These are the long overdue social reforms which will constitute democratic Latin America's best—and most effective—answer to the revolutionary impulses generated by Moscow, Peiping, and Havana.

Now these are all essentially programs and policies in which governmental initiative and action is paramount. I suggest to you that the time has come when the American business community must assume some new responsibilities, take on some additional burdens, and accept some revolutionary challenges—if the private economy is to be of any real help to Latin America—and if we are to preserve the system of capitalism in the Western Hemisphere and elsewhere.

Will you indulge me if I endeavor to set the stage for your consideration of the problem?

If over the past 12 years our worldwide governmental loans-and-grants and technical-aid programs have not been notably successful in meeting the challenge of the revolution of rising expectations, neither can it be said that the private economy is eligible for any blue ribbons for its contribution.

In the assessment for blame, however, there is greater justification for the private economy's limited role as a significant developmental force in the underdeveloped countries.

Government can deploy the public investment funds solely on the basis of strategic considerations. The private economy, on the other hand, can only deploy its investment funds on the basis of anticipated profits. Thus, private capital tends to flow to an already established industrial complex such as exists at Sao Paulo, for example, rather than to the northeast of Brazil where the infrastructure is not yet in place. Hence the private economy unwittingly exacerbates social tensions in an underdeveloped land by concentrating its investments in the few, isolated oases of (industrial) prosperity while detouring the vast desert of indigenous poverty. Because its stockholder relationship and profit motivation leaves it with no other investment choice, the private economy unfortunately develops the reputation of being insensitive to the aspirations of the people of the poor lands.

This is not to suggest that the global mining and oil companies, or an occasional pioneer from the ranks of light industry, or the adventurous pharmaceutical industry will not continue to probe for investment opportunities outside of the promising industrial complexes in the underdeveloped lands. But the bulk of the manufacturing industry with its dependency upon advanced technology, engineering, and sophisticated consumer markets will continue to shun the world's high-risk areas.

It should be apparent, therefore, that there is no coincidence between the considerations of the private economy in promoting the interests of the stockholder and the strategic considerations of government in protecting the security of the nation. It is a profound disservice to the people of the underdeveloped lands to lead them to believe that private investment provides a panacea for their countries.

Because the people of Latin America—as, indeed, the people of most of the planet—have learned in this first half of the 20th century that poverty is not their preordained lot, their political leaders will find it increasingly difficult to justify an economic growth which is dependent for the kind, the size, the location, and the timing of private investments upon the vagaries of the decisions of corporate boards of directors in London, in Paris, in Brussels, in Bonn, in New York, in Chicago, in San Francisco, in Toronto, in Tokyo.

Neither will the Latin American countries—least of all the democratically oriented countries—encourage or permit American investment capital to become so prominent and pervasive as to duplicate the private economy's pre-expropriation position in Cuba. In a revolutionary world, economic colonialism is as dead as political colonialism.

This means, therefore, that unless the private economy has something new and better to offer to the underdeveloped lands, their political elite will be forced to place an increasing emphasis upon government-owned plants and industries—with growth and development centrally planned instead of being left to the investment opportunism of the private economy.

As Professor Rostow reminds us, this is in reality the central problem for the underdeveloped lands: If economic progress is not moving as rapidly as the popular aspirations dictate, will they continue to rely on the traditional methods for modernization, or will they opt for the centralized, dictatorial techniques of communism? The choice appears to be leaning heavily in the direction of economic centralization.

These are very real threats—threats which affect the foundations of the private economy.

But on the wings of the world stage—and from its beachhead in Cuba—stands the greatest competitive threat of all: The ability of the Soviet bloc to mobilize all of its resources into an integrated development program for strategic deployment upon any geographical area of the world which it seeks to assist or to subvert. The Soviet bloc can lay down the infrastructure; supply the steel mill (as a status symbol); furnish the communications network (complete with transport planes for the airlift of troops, if need be; and with radio broadcasting facilities ready to pour out propaganda for the new dispensation); supply through export or by local manufacture cars, trucks, and a fairly complete line of consumer goods; take the

country's entire output of sugar, bananas, coffee, rice or whatever, thereby putting an end to balance-of-payments problems; assign first-rate technicians, engineers and plant managers (who can adapt to local conditions better and less expensively than their U.S. counterparts).

This capability of furnishing low-cost, integrated developmental programs is a formidable striking weapon because of its powerful impact upon the people of the poor lands. The private U.S. economy acting through individual companies engaged in the normal pursuit of investment profits cannot duplicate this competitive advantage. Under our system of political organization—short of war—neither can the Government of the United States.

Does it follow that the private economy can do little or nothing to assist in the development of the poor lands as many in Government and in the business community believe? In my view, the private economy has a tremendous potential for the fulfillment of this objective, but its true role has not been properly assessed; nor has the Government heretofore supplied the requisite leadership in mobilizing the unique resources of the private economy as a collective instrumentality for attacking the economic and social problems of the poor lands.

There is a practical solution to the problem: it lies, on the one hand, in a much closer union between the private economy and the Government in the planning for and in the undertaking of developmental programs; and, on the other hand, in associating numerous companies under central management to undertake the balanced and integrated economic and social development of vast areas of an underdeveloped country—from infrastructure to the ultimate distribution of consumer goods—through programed phases which might extend as long as 20 or more years.

How would the idea work in practice?

First. It would require the U.S. Government to establish the areas and programs of strategic priority for which the private economy will be asked to deploy its concentrated resources.

Second. Where none now exist (and there are many in the Government files), feasibility studies would have to be underwritten by the Government—studies proposed either under its own initiative or by the private economy. Such studies should not be academic exercises but rather the work of companies who are most apt to be concerned with the project at the later operational phase.

Third. Once the strategic goals have been set and the feasibility studies completed and accepted by the governmental authorities, a company would be selected to serve as project manager for an entire program. The project manager would have the responsibility of selecting the other companies whose skills and experience would be involved in the various phases of operations. It would also be the function of the project manager to corral the requisite capital from either private or Government sources, or both.

The project manager might select, for instance, one or more engineering firms for the building of a power supply, dams for an irrigation system and roads to connect newly opened lands or new farms with markets; an agricultural chemical company to develop a source of supply for fertilizers, fungicides, herbicides, and pesticides; one of the foundations to assist in the establishment of marketing and credit mechanisms to enable small farmers to purchase fertilizer, modern agricultural equipment and to build homes; a food processing company for meat and agricultural products; a canning and packing company to provide fish for the people in the interior; a successful Midwest farmer to manage and supervise the development of new grain crops, hog and dairy herds; a pharmaceutical company to provide basic drugs for human and animal use; an agricultural equipment company to develop a simple tractor which could be used by barefoot caboclos, say, in the northeast of Brazil; an export company to promote the oversea sale of local regional products.

These are but illustrative of the manifold activities which could be undertaken—from infrastructure to light industry, to creating products for export.

What happens in the case where the project manager cannot assure any profitable return to a participating company because a cash market does not exist and will take too long to bring into being to support the initial investment on a project? In these circumstances, participating companies whose profitability in such projects is doubtful in the early years would, under appropriate safeguards, be insulated against loss. By the same token, where U.S. costs cannot meet the competitive proposal for a Soviet bloc utility or industrial facility in an underdeveloped country, the U.S. Government—if it is deemed strategic to meet such competition—should be prepared to support a comparable project from the private economy.

The point is this: Neither high risks, inadequate markets, insufficient capital, nor competitive cost disadvantages with the Soviet bloc should be permitted to prevent the fulfillment of the strategic objective of providing developmental assistance to the country which needs it—and wants it.

By this kind of collective action on the part of a congeries of business organizations both large and small, by combining a multitude of technological, engineering, and managerial resources over large areas of a country or over whole regions, it becomes possible to achieve a balanced and integrated development with proper emphasis upon economic growth, but without neglecting the immediate social needs of the people.

The cardinal advantage of this kind of arrangement is that it provides a machinery whereby the resources of the private economy can undertake collectively what no single company can accomplish individually. It makes available in concentrated form the unique features of the private economy—its self-imposed discipline; its experimental methods; its capacity for avoiding sentimental judgments; its use of trained technical and managerial manpower who are accustomed to working under organizational restraints; and it affords the free play of individual initiative and ingenuity which gets jobs done.

Through the financial participation of government—many governments, not only the U.S. Government—the element of risk (so frequently the decisive barrier to investment by the private economy) is minimized.

The proposed approach to developmental progress is a flexible arrangement which allows joint public and private planning, operation and financing. It can separate the private and public phases of activity, or it can consolidate them. It presents opportunities for the employment of the larger units as well as the smaller enterprises. The criterion is what combination of facilities, organizations, and financial support can best do the particular job for an underdeveloped country or region.

The idea of an association of companies to undertake large-scale projects is not new: It is being used in Africa for the development of an aluminum industry; in Argentina, for the development of a petrochemical industry; in Iran, for the construction of dams and irrigation systems. In the United States for years we have utilized in our military procurement a system analogous to the proposed association of companies: a prime contractor who has working under his direction a satellite system of subcontractors—sometimes running into the hundreds. In substance, therefore, all the proposal amounts to is pouring new wine into old bottles.

This "mother hen" concept has in recent weeks been under serious discussion by a number of my colleagues in the international business community. I have borrowed liberally from our dialog.

What is required in order to begin an experiment in this type of private-public international association? First, a more sophisticated attitude by the business community toward Government. Companies that are allergic to Government—let alone participating with Government in planning, operations and financing—are obviously not mentally ready for this kind of joint venture. Second, it would require a more sophisticated attitude on the part of Government—less suspicion of the motives of the private economy; a willingness to lift the historic restraints which might prevent the pooling of industrial resources in the manner herein proposed. It commits the Government to a policy of joint financial participation with the U.S. private economy, or in mixed ventures of United States, European, Canadian, Japanese and Latin American private interests. It involves new legislation to provide a guarantee against Cuban-style expropriation which would go beyond what the ICA and other governmental agencies now provide.

This program, if it is to be consummated successfully, will also necessitate a new kind of economic diplomacy to supplement the traditional political diplomacy. We may as well face the hard fact that, in most of our oversea Embassies, the commercial attachés and commercial officers would be utterly incapable of promoting, coordinating and assisting with this concept of utilizing the resources of the private economy. Regretfully, it must also be said in the interest of candor that many of the conventionally trained and conventionally minded Ambassadors would be lost—totally lost—in this arena. The new "development diplomat," as Mr. Eugene Black (one of the leading practitioners of the new economic diplomacy) describes him, "must fill the gap between the conventional diplomat and the trader and the investor."

Is it realistic to expect that any sizable number of companies would express interest in this kind of approach to investment in the underdeveloped lands?

I would not expect that American corporate management in droves would begin hammering on the doors of Washington for the opportunity to join in a new crusade to develop the poor lands of the world.

As a matter of fact, any such response (even were it to come to pass) would automatically doom the whole project. To be successful, the response needs to be selective—highly selective.

There are, however, boards of directors and managements in this country who would gladly respond to a call to action from the President of the United States because they are fully aware that, in a revolutionary epoch where the entire world is undergoing a transformation, neither government-as-usual nor business-as-usual will be able to survive the dynamic, ruthless, and effective competition of an adversary who makes no bones of his intention to bury us.

These same directorates and managements are also fully aware that to meet the challenge of the revolution of rising expectations in Latin America—and elsewhere among the emergent lands—the conventional and orthodox methods of investment—whether public or private—are inadequate.

There is ample awareness among these sectors of the business community that when man is without hope and lacks opportunity—when whole societies are mired in economic stagnation—when the educated and intellectual elite seethe with political and social tensions—there can be no real security for the United States.

There are those—the skeptics—who will say that this idea for harnessing the resources of the private economy is all well and good, but that it can only be consummated under conditions of war—and we are not at war.

Well, the plain truth of the matter is that we are at war—a war against poverty, disease, ignorance, and social injustice; and unless the industrialized North wins this war, it cannot hope to have as its partners and friends the 1.7 billion hungry and poor people of the underdeveloped South.

President Kennedy has put the problem neatly and eloquently when he said in his inaugural message: "If a free society cannot help the many who are poor, it cannot save the few who are rich."

Is it realistic to expect that the Government would respond favorably to this proposal for a more effective utilization of the resources of the private economy?

I believe the answer is "yes." Again, President Kennedy provides the clue to his administration's attitude when, speaking before the National Industrial Conference Board in Washington on February 13, he said to the American business community: "Whatever past differences may have existed, we seek more than an attitude of truce, more than a treaty—we seek the spirit of a full-fledged alliance."

What are we waiting for?

TAX INCENTIVES

Mr. HART. Mr. President, some time ago I became concerned about the possibility that a very desirable tax-incentive program of the President might take a form which would jeopardize existing plant locations and might result in some measure of pirating.

I recently wrote to Secretary of the Treasury Dillon and received a reply from Stanley S. Surrey, Assistant Secretary-designate, on this subject. It is encouraging to note that the Department of the Treasury is considering in its study of the President's investment-incentive program ways to "reduce the risk that the plan might favor one geographical area over another."

While I believe that this investment-incentive program can be of benefit to many widespread industrial areas of our Nation, the economic impact of such a program must be carefully analyzed so as not to provide undue incentive to relocate but rather place an emphasis on incentive to modernize and expand existing plant and equipment in their present locations. I certainly intend to follow developments of this program with the greatest interest and care.

Mr. President, I ask unanimous consent to have the letters printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

MARCH 6, 1961.

The Honorable Secretary of the Treasury
DOUGLAS C. DILLON,
U.S. Treasury,
Washington, D.C.

DEAR MR. SECRETARY: It is my understanding that the Department is presently working on specific provisions to carry out the President's recommendations for tax incentives that would encourage corporations to modernize plant and equipment. In considering these provisions, I would hope that the Department can devise a workable provision which would assure that in taking advantage of such tax incentive manufacturing establishments would not find an easy excuse for geographically moving their plants from areas of persistent labor surplus.

Certainly the Federal Government, with its emphasis on rebuilding the economy of our depressed areas, would not through its tax policies wish to encourage the movement of industry from these areas of high unemployment where much of our older plant capacity is now located.

While I do not have a precise suggestion as to how there could be built into this program encouragement for firms to remain in their present locality and modernize existing equipment, I believe some assurance might be required before advantage could be taken of this proposed tax incentive.

As you develop your studies, I hope you will give all possible consideration to the problems which cause me to write this letter of concern.

Sincerely,

PHILIP A. HART.

MARCH 14, 1961.

Hon. PHILIP A. HART,
U.S. Senate,
Washington, D.C.

DEAR SENATOR HART: For Secretary Dillon, I want to thank you for your letter of March 6, suggesting the possible need for provisions to check plant relocation away from depressed areas under President Kennedy's recommendation for tax incentives to encourage plant modernization and expansion.

The Secretary and I are glad to have your thoughts on this matter. They will have full consideration in our further work on the President's investment incentive program.

As you know, in the development and consideration of the Douglas bill, S. 1, for aid to depressed areas, careful attention was given to the formulation of so-called anti-pirating provisions to prevent giving financial assistance to establishments for merely relocating from one area to another. The major concern here apparently was with relocation into the depressed area at the expense of other parts of the economy. The reverse type of problem, with which your thoughtful comments are concerned, will also be explored in the work on the President's investment-incentive measure.

While the general application of a broadly based type of incentive allowance which would be available on additional eligible domestic investment anywhere in this country would tend to reduce the risk that the plan might favor one geographical location over another, this possibility and safeguards against it will need to be considered. Certainly it would be contrary to the intent of such a plan to encourage mere relocation at the expense of these areas which particularly need revitalization and growth, without actually contributing to the economic growth of the Nation as a whole.

Again, thank you for sending the Secretary your suggestions on this important aspect of economic policy for growth. Your comments will be most helpful as the Treasury continues its work on specific features of the tax incentive program.

Sincerely yours,

STANLEY S. SURREY.

PROJECT HOPE

Mr. HUMPHREY. Mr. President, one of the most gratifying developments in recent months relates to the overseas activities of the American people, to the technical assistance programs which are made available through the cooperation of the citizenry of this country. It is Project Hope. Project Hope is a ship, with of course technical personnel and supplies, dedicated to relieving human suffering caused by disease and hunger.

Project Hope is an expression of American compassion, through the use of our technology and our professional competence in the fields of medicine, science, and agriculture.

Project Hope, as the ship SS *Hope*, has been serving off Indonesia, in the southeast Asian area. The ship has been docked at Djakarta, the capital of Indonesia, and has been cruising along the shoreline, making stops wherever there was a need for or a call to supplement the health activities of the Indonesian medical profession or of the Indonesian Government.

After the Easter recess I shall give a report to the Senate on the activities of this remarkable endeavor on the part of our people.

I have visited with Dr. Walsh, who is the chief medical officer and the moving spirit behind this excellent program.

I noticed recently in the New York Times a brief story under the byline of McCandlish Phillips entitled "Captain Reports on Medical Ship," with a subheadline, "Skipper of the *Hope* Is Here After 6 Months on Asia Good Will Tour."

The skipper, Jack M. Windas, said in part:

There never has been a ship quite like her before. She's essentially a floating medical training institute trying to upgrade medical and nursing practice wherever she goes.

Then the story describes the ship:

The *Hope*, a World War II Navy hospital ship, was refitted at Seattle early last year. Her service is a good-will project whose costs are paid by public subscription.

The captain of the ship tells a remarkable story in the brief news report. He said:

I would say the mission had its greatest success at the extremely primitive island of Sumbawa, where there is 1 doctor for 180,000 people and communication and transportation are about nonexistent. Sumbawa has a very tropical aspect. We anchored offshore because there was no dock for a ship our size.

We set up a clinic on the beach in an old wooden customs shed with no lights and no running water. People came from all over and stood under a piece of canvas waiting to be treated. Launches took the most serious cases out to the ship.

There is one final quotation I should like to give from the article, which relates to something I am sure every Member of Congress and every American citizen is extremely conscious of. We have been told many times, in the propaganda stories we read from the Communists, of the saying "Yankee, go home." Wherever one goes overseas, there is always a Communist parade with people carrying placards telling us to go home.

Dr. Walsh, the director of this People-to-People Health Foundation sponsoring the venture of Project Hope, said at a press conference that the ship had so altered the image of the United States in Indonesia that Soviet medical teams are "following us around."

Dr. Walsh continued:

Whenever one of us goes ashore in a Jeep on the outer islands, kids dart out of the jungle and yell "Hopie, Hopie." They certainly don't say "Hopie, go home."

I think our fellow Americans ought to be greatly excited about this particular program.

Mr. CARLSON. Mr. President, will the Senator yield?

Mr. HUMPHREY. I am happy to yield to the Senator from Kansas.

Mr. CARLSON. I wish to associate myself with the remarks of the distinguished acting majority leader in regard to Project Hope. It has been my privilege to follow this project with a great deal of interest. I concur in the comments made by the distinguished Senator from Minnesota regarding the work being done.

This gives to us and to the people in the countries mentioned a picture of the true sympathy and feeling of the people of this Nation for the problems and difficulties of the people of other nations. We need more of this type of program, in my opinion.

I sincerely hope the distinguished Senator from Minnesota will, after Easter, devote more time to this subject. I should like to cooperate with the Senator at that time and to urge our people to take a very personal interest in this type of program, which is strictly humanitarian. In my opinion, it is a labor of love.

Mr. HUMPHREY. The Senator has been most helpful and generous in his comments. I know the People-to-People Foundation which sponsors Project Hope will be very grateful for his comments.

Mr. President, I speak today because this program needs the help of the American people. The American people need to recognize that the greatest thing we can do is not to use our Government alone, but also to use great voluntary organizations which really represent the strength and the spirit of this Nation. Project Hope needs the help of the American people. It needs the financial help of the American people. It needs the understanding and sympathetic cooperation of the American people.

The doctors of the American Medical Association are contributing their time free of charge to make this great hospital ship literally a floating modern medical laboratory and hospital of 230 beds. There is a tremendous modern outpatient clinic.

The pharmaceutical industry of the United States has given the ship a million dollars' worth of modern drugs, and keeps the ship constantly replenished with the modern drugs necessary to treat the sick.

The nursing profession of America has placed nurses upon this ship free of charge, as volunteers.

The automobile industry has made available Jeeps and other vehicles so that the outpatient clinics can be taken inland.

Right now in Indonesia this ship is training doctors and nurses to equip a huge hospital. The Government of the United States is not doing this; the people of the United States are doing it.

It is about time we recognized that the best kind of foreign aid is not merely Government foreign aid, but a cooperative endeavor between the Government of this Nation, which belongs to the people, and the people themselves.

Dr. Walsh is going to visit with the President of the United States, I am happy to tell my colleagues, because I wish to see not one Project Hope—not merely one ship literally performing miracles in terms of healing and in terms of the message of American democracy and good will—but several.

Other Senators have joined with me in sponsoring what we call the White Fleet resolution. This program was described at some length a year ago this month in Life magazine. Thousands of letters came to Members of Congress about the proposed White Fleet. A resolution on the White Fleet is pending in one of the Senate committees. A resolution was favorably reported from the Committee on Foreign Relations day before yesterday, commending the Project Hope on what it has accomplished and what its purpose is and will continue to be.

I should like to see a ship like this one for Latin America—not one, but perhaps two or three. I want to see one or more ships like this for Africa. I want to see one for south Asia and the Middle East. I desire that people of the world see American ships that are something besides warships. And let me tell my colleagues that because our merchant marine has dwindled in size, all too often no American flag is to be found in many ports of the world. The flags of the merchant marines of other nations are to be found, but not the American flag. The only time an American flag appears in many ports of the world is when it is flown from a warship, and this fact has been commented upon throughout the world.

I visited today with a very prominent and well known American, Dr. Albert Burke, the professor and TV commentator who was described in Newsweek magazine as one of the truly great sensations in modern television documentaries and commentaries. He is doing great things. This gentleman has traveled in many parts of the world. He has told us on one of his TV programs, which are dedicated to better public understanding of the great issues of our times, that all too frequently, when the American flag is seen around the world, it is regrettably seen only with the Armed Forces.

Do not misunderstand me. We need the Armed Forces. We are proud of our Navy. We are proud of our Defense Establishment. But every member of the Armed Forces knows that he is in the service primarily because of his love for an America that is dedicated to peace and justice.

What we need is a great mercy fleet that would carry the message of American education, American technology, medicine—not only American medicine, but medical knowledge generally—medical discovery and medical science to the sick, the hungry, and the illiterate.

When we do so, we shall be living in the spirit of this great holy season that is now with us from Palm Sunday to Good Friday and to Easter Sunday with its message of peace, justice, and forgiveness.

I ask unanimous consent that an article entitled "Captain Reports on Medical Ship," published in the New York Times on Sunday, March 5, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD.

CAPTAIN REPORTS ON MEDICAL SHIP—SKIPPER OF THE "HOPE" IS HERE AFTER 6 MONTHS ON ASIA GOOD-WILL TOUR

(By McCandlish Phillips)

After 6 months of coastal steaming and stopping at tropical ports in the Java Sea, the 44-year-old first master of the navigable medical center called *Hope* is back in New York.

"There never has been a ship quite like her before," Capt. Jack M. Windas said the other day. "She's essentially a floating medical training institute trying to upgrade medical and nursing practice wherever she goes."

The *Hope*, a World War II Navy hospital ship, was refitted at Seattle early last year. Her service is a good-will project whose costs are paid by public subscription.

Captain Windas supervised the ship's sea trials last summer before steaming off for Indonesia. His stops were at Djakarta for 2 weeks, then at Surabaja, Bali, Sumbawa, and Makassar for a month each.

He quickly learned to call the islands in the archipelago by their Indonesian rather than their Dutch names—Ambon for Amboina, Sulawesi for Celebes. "I wasn't there long before I learned that 'Celebes' was a dirty word," he said.

NO DOCK BIG ENOUGH

"I would say the mission had its greatest success at the extremely primitive island of Sumbawa, where there is 1 doctor for 180,000 people and communication and transportation are about nonexistent," he said. "Sumbawa has a very tropical aspect. We anchored offshore because there was no dock for a ship our size.

"We set up a clinic on the beach in an old wooden customs shed with no lights and no running water. People came from all over and stood under a piece of canvas waiting to be treated. Launches took the most serious cases out to the ship."

The faces on the *Hope's* volunteer American medical staff change several times a year, but there are nearly always a dozen general practitioners, an ophthalmologist, dermatologist, anesthesiologist, internist, 2 dentists, 20 nurses and 30 medical technicians aboard, in addition to a crew of 125 men.

"When they see this great shining ship anchored out on the water, the local people are a bit suspicious at first," Captain Windas said. "They wonder what it is about. But when they learn that this is being given to them by the American people, not by the Government, they are very, very much impressed."

Though its mission is to teach, the people tend to regard the ship as a free clinic and, after their initial hesitation, they usually send out word and the sick begin to be brought to the ship from deep inland.

Captain Windas lives at 241 Sixth Avenue near Houston Street. He regularly sails the *President Polk* on 4-month around-the-world runs for the American President Lines, which serves as operating agent for the *Hope*. His term of duty aboard the ship is now over, and another of the line's captains has gone to take his place.

Dr. William D. Walsh, director of the People-to-People Health Foundation, which sponsors the venture, announced yesterday in San Francisco that the foundation would like "to put another such ship in Africa and another in South America."

Dr. Walsh said at a press conference that the ship had so altered the image of the

United States in Indonesia that Soviet medical teams are "following us around."

"Whenever one of us goes ashore in a Jeep on the outer islands," he said, "kids dart out of the jungle and yell 'Hopie. Hopie.' They certainly don't say 'Hopie, go home.'" he said.

The *Hope* is 520 feet long and has 6 decks, 3 decks enclosed in the hull and 3 open decks above the hull. As a Navy ship, she had 830 beds. Now there are only 230 beds, but there are 3 operating rooms with closed-circuit television that carries closeups of surgery into classrooms. The cost of running the ship is figured at about $3,500,000 a year.

It is expected that the *Hope* will move to Saigon, South Vietnam, June 1 for 3 months.

Mr. HUMPHREY. In line with that comment, I have refrained from taking the time of the Senate on some other subjects when pressing legislation has been before the Senate, because I wanted to see the legislative calendar completed. But I have become concerned of late lest we lose our sense of direction and our sense of purpose and objective.

The President of the United States, Mr. Kennedy, appointed George McGovern as Director of the food-for-peace program. Mr. McGovern is performing an admirable job. He and the able Secretary of Agriculture, Orville Freeman, are telling the American people that food is a great resource at any time, whether it be in peace or in war, or whether it be in a period of tranquillity or a time of cold war.

Others have made that statement. The distinguished Senator from Kansas [Mr. CARLSON], who commented a moment ago on the Project Hope, has been one of the foremost advocates of this very concept of the use of our food and fiber as a great asset in building a better world. My comment is merely that we should project a new agricultural program. The President has sent a message to Congress on this subject. Members of Congress have their own points of view. There are many bills before us on agricultural policy. Ultimately, there will be some reexamination of these policies and differing points of views, and we shall have an agricultural program somewhat different from that which we have today.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. HUMPHREY. In a moment.

Whatever the program may be, I hope that we as Senators and as public officials will keep in mind the importance of having a food and fiber budget or a food and fiber policy that goes far beyond our immediate domestic needs. I hope that we will eliminate from our thinking the negative word "surplus," in a world that is filled with hungry people, and in a world in which there is a crying need for food and fiber.

I trust that as we come to design a new agricultural policy, whatever may be its details, we shall recognize that we need to consider in the food and fiber program a sizable amount of food and fiber for international purposes—humanitarian purposes—and that we shall not let the extent of surplus production guide our policies, but, rather, that we shall design a policy and call upon our people to produce food and fiber to fulfill those policies and those goals.

Let me give an example of what I mean. Not long ago—within a month—the Government of the United States, through the Secretary of Agriculture, and through the Food-for-Peace Director, said that we wanted to make available to needy people a substantial amount of vegetable oil. Though I have forgotten the exact amount, I believe it was approximately 100 million pounds or more. The figure is insignificant. It is not important. What is important is that after the directive had been given for the vegetable oil, we awoke and found there was none. We had been led to believe that, in view of the many surpluses of agricultural commodities, all we would need to do would be to say, "You wanted something," and there it was.

So the Government of the United States had to go into the open market and bid against private enterprise for available supplies of vegetable oils, when in fact we ought to have had supplies of peanut oil, soybean oil, cottonseed oil, linseed oil, and supplies of lard in substantial quantities, because it so happens that there is a great deficit of vegetable oils and fats and oils in the world market. These fats and oils will be more vital to the overall strength of the United States than many of our weapons. They will be needed in Latin America. Food is desperately needed in certain parts of Latin America—in Bolivia, for example, and in Chile. Food will be needed in Africa, where people have been facing mass famine in the Congo and other areas. This is one area in which the United States has undisputed leadership. The Soviets can talk to us about their sputniks and they can talk to us about their achievements in outer space, but they have never been able to equal us in the accomplishments of the fruits of the soil—the production of agricultural commodities.

Mr. President, ever since I have been in the Senate I have been trying to tell the greatest success story in America, the greatest success story in the world, a success story which apparently some people are unwilling to publicize and unwilling to write about. It is the success story of agriculture, the success story of American agricultural production. No other agriculture can even touch it. Collective agriculture is a colossal failure. Free enterprise, family farm agriculture in America is the most amazing story of success in the world.

Yet some people prefer to cry over their troubles rather than to ring out the story of our achievements.

I wish to say that our Government and our people and, yes, our journalists and our commentators should be willing to adjust their sights, in order to see the true picture, and that we have a story to tell in terms of food and fiber, of social values, of the care of the soil, of conservation, and of family living, in the agricultural areas of America that is the miracle story of the 20th century. There is nothing like it.

The Soviet Union has been able to produce the atom bomb, but not one family farm. The Soviet Union has been able to produce fabulous machine tools and vast fighter planes and bombers and tremendous military power. It has been able to produce every conceivable kind of industrial equipment. However, it has not been able to produce corn; nor has it been able to produce an adequate food supply even for its own people, despite the vast areas that it has put under the plow, and despite the assistance of seed from other parts of the world, including the United States. Nevertheless, Mr. President, its agriculture is a failure.

I wish the "Voice of America" would get a little in tune with what is going on, and tell the story, that the Soviet Union, with all its planned economy, with all its alleged power, with all its alleged genius, and with all its Marxism and all its communism has not earned to satisfy human want.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. HUMPHREY. Mr. President, we have in this country learned not only how to satisfy it, but also to provide an abundance. I now yield to the Senator from Idaho.

Mr. DWORSHAK. Mr. President, I compliment and commend the Senator from Minnesota for paying this tribute to American agriculture, particularly to the record of Secretary Benson during the 8 years when agriculture made this outstanding record of production in serving the needs of the world. Would the Senator yield for a question?

Mr. HUMPHREY. I am always glad to yield to the Senator for a legitimate purpose.

Mr. DWORSHAK. It is always legitimate.

Mr. HUMPHREY. I know.

Mr. DWORSHAK. The Senator from Minnesota has always been an ardent supporter of agriculture. I should like to commend him now for the generous distribution of our surplus agricultural commodities. I wonder if the Senator is not somewhat disturbed by the conference report which was adopted earlier today, wherein the Senate receded from its amendments 1, 2, 3, and 4, which referred to almost $3 billion which the Senate made available to the Commodity Credit Corporation to restore impaired capital and for accelerating the distribution of food throughout the world. I understand that every dollar that was added by the Senate for that particular program for CCC now will be unavailable.

Is not the Senator from Minnesota fearful that the programs of CCC will be curtailed to such an extent that we shall not be able to distribute these surplus foods in the next 3 months which remain in the present fiscal year?

Mr. HUMPHREY. I shall be very frank with the Senator in saying that I am not at all happy by the receding of the Senate conferees on this item. However, I do not believe it will mean that production will be curtailed. It will mean, however, that in the coming fiscal year outlays have to be made to take care of the needs that might have been provided for by the bill.

Mr. DWORSHAK. The Senator will recall that in the discussions in the subcommittee, of which he and I are mem-

bers, the emphasis was placed upon the need of replenishing the capital now.

Mr. HUMPHREY. Yes.

Mr. DWORSHAK. The Senate was responsive, but the other body refused to provide any of these appropriations. Does the Senator feel that we can get along without them?

Mr. HUMPHREY. It is regrettable. I trust we will be able to do so, and I hope that we shall be able to get along. If not, we shall have to perform our duty and provide funds. The Senator from Minnesota was one of the Senators who voted to provide the funds required. I regret that the conference committee did not keep faith with what we hoped would be a public policy.

Mr. DWORSHAK. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield. First I should like to say that my good friend makes me happy with any kind words that he wishes to say about Mr. Benson at this late period in his career. I am always pleased to hear a kindly word about one who has suffered undue pain and anguish. It is always welcome to hear such words. I wish him well. I am much more friendly toward him now, since he has returned home, than when he was here.

Mr. DWORSHAK. The Senator from Minnesota was generous in his praise of the Secretary.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. HUMPHREY. I yield.

Mr. COOPER. I am glad the Senator from Minnesota has made the point that I believe is not made often enough in this country or abroad, and that is that the Soviet Union and Communist China and other totalitarian countries have not been able to meet the most basic needs of mankind of food and clothing, which our country has been able to do without any difficulty at all. I would hope that in the future our country would continue its surplus food distribution program. I would hope that it would do something else, too, namely, that it would help the countries which need food and show them how to produce it themselves, to make them self-sustaining. I believe that if some of the developing countries could show to their people that they could thus provide food and clothes for their people, it would be a long step along the road toward maintaining democratic institutions.

Mr. HUMPHREY. I thank the Senator from Kentucky. The Senator from Kentucky and the Senator from Kansas have demonstrated not only their sincerity in all of these programs relating to our food production and the use of that food, but they have also been leaders in this effort. I wish to commend them for it. There should be no partisanship or pride of authorship in this matter. It is something on which we as Americans ought to work together.

It is a part of our overall national policy and national objectives. I thoroughly agree with the Senator from Kentucky that one of the needs is to help other countries improve their basic agricultural production and their methods of production and their methods of distribution, and also to improve their soil.

It may be that we have become too mechanized and too industrialized, and because of that we perhaps tend to forget that about 80 percent of the population of the rest of the world lives on farms, on the land.

While it is wonderful to have tractors and combines, and all the rest of the technical machinery of modern American machinery, these are completely out of place in vast areas of the world. What is needed in most places is the steel point on the wooden plow. What may be needed is the simple irrigation ditch, or a pump to bring fresh water on the land. What may be needed is the knowledge of how to tend the land, to conserve its fertility and replenish its fertility.

My point is that as we design agricultural policies, we should not forget that we ought to have as an objective the production of food and fiber. The Senator from Kansas [Mr. CARLSON] comes from one of the great wheat producing States of the country. I do not come from a State which produces a great deal of wheat. At one time we did, but not now. We produce great quantities of corn and soybeans and small grains and dairy products.

I have heard Senator after Senator and commentator after commentator and reporter after reporter talk about the staggering wheat surplus. I say in all reverence, thank God for wheat.

Thank God that we have wheat in our bins, so that we can fulfill to the great free country of India a 5-year commitment for the shipment of wheat, so that for once the people of India and the Government of India can look to the future without fear of famine.

When we design a wheat program we will, of course, want one which will give the American farm producer a fair price. He has no responsibility to subsidize the world out of cheap production at less than cost to himself. But, above all, let us not curtail wheat production to the point that when wheat is needed for a friendly neighbor in Latin America or Africa or Asia, we will not have it. A bushel of wheat cannot be produced by talking about it or hoping about it. It is necessary to have it in storage. We have developed in this country a phobia over what I call storage and surpluses, when in fact what we ought to be talking about is the great story of Joseph, in which we are taught that in the fat years and the good years we should store up for the lean years.

While the cost of the storage of grain is expensive, let me tell the American consumer that without it the food costs of this country would skyrocket. The costs of storage are a small part of the total cost of the food budget. The day this country gets on a supply-and-demand basis, which is classic economics in agriculture, the price of wheat in the market will be beyond the reach of thousands of American families. Fortunately, we are not in that position today.

I repeat what I have said in this Chamber for 12 years. Food is the best buy in America. No other country has food of such high quality or at such reasonable prices. No country and no person in America need worry lest there not be food for the morrow. Even charitable organizations will provide food for those who are in need.

No other nation in the world, with few exceptions—possibly some of our Western European allies—can say that it is certain that tomorrow or in the coming week there will be no danger of a shortage of food.

Mr. President, it seems to me that once in awhile a voice needs to be heard in this Chamber about some of the great positive assets we have. I read only yesterday that there is now concern that Communist China will get the atom bomb. She will have the atom bomb long before she has a good crop. So long as Communist China is without adequate food that she can supply herself, her aggression possibilities are limited. The day when Communist China has the atom bomb and enough food for her armies will be the day we will need to worry about. America today stands ready with the atom bomb and enough food to feed half the world. We can honor that portion of the Lord's Prayer which says:

Give us this day our daily bread.

We can do it. Instead of having the great information mechanism of this great free Republic telling the world that we can do it, we act as if we are ashamed; that it is a mistake. We go around the world asking, "How did we ever get into this mess?" We have enough to eat. Yet the whole world has been wondering how we have been able to do it. We say it was all by accident; we are sorry; we should not have done it. I do not understand how people can get so mixed up in their values.

This Nation needs to make up its mind that food is a great asset in our national policy and diplomacy, just as the gold in our reserves, the products of our industry, the skill of our labor, or the technology of our scientists. When we understand that, our agricultural policy will be put in perspective.

I compliment those who are speaking out in our Government—Mr. McGovern, Mr. Freeman, and others—on the whole subject matter of the positive use of our food for peace. I want our President to speak out again, as he has done. I want the Secretary of State to speak out on this subject. The Secretary of State speaks for the Nation in international affairs. The voice of the Secretary of State added to this understanding of the value of food and fiber as an instrument or as a meaning of national policy, accomplishment, or achievement will mean much. This is not simply a matter for the consideration of the Secretary of Agriculture or the Director of Food for Peace; it is a matter for consideration by those who conduct our foreign policy.

Mr. President, an article entitled "Food for Peace Plan May Be Reorganized," written by Charles W. Bailey, a staff correspondent, was published in the Minneapolis Tribune of March 18, 1961. I ask unanimous consent that the article be printed at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FOOD FOR PEACE PLAN MAY BE REORGANIZED

(By Charles W. Bailey)

WASHINGTON.—The future of the food-for-peace program launched 2 months ago by President Kennedy with resounding fanfare, has been clouded by a proposed reorganization plan now under study at the White House.

The central issue is whether the oversea food distribution operation, which the Chief Executive only this week said could be "a significant instrument of foreign policy," will retain its status as an arm of the White House or will be made a subordinate part of the State Department.

As things stand now, George McGovern, Food-for-Peace Director, reports directly to the President. His offices are in the White House Office Building; the agency still in skeleton form, is independent.

Under the reorganization plan proposed by Under Secretary of State George Ball for a series of agencies involved in what can be categorized as foreign assistance programs, McGovern's shop would be put under the supervision of Ball's office.

The same reorganization plan would also move the Peace Corps, the Development Loan Fund and the Export-Import Bank under State Department control. Operations of the International Cooperation Agency (ICA), the major foreign-aid agency, would be similarly supervised.

The reorganization program is still under debate in the White House, where it must be worked out by the middle of next week in time for inclusion in the administration's foreign aid message to Congress.

There has been considerable argument about the Ball plan. Three of the agency directors involved—McGovern, R. Sargent Shriver of the Peace Corps, and Frank Coffin, head of the Development Loan Fund (DLF)—have entered strong dissents to the takeover plan.

There are reports that some modifications have been proposed to meet their objections. But the prospect remained strong Friday that some kind of consolidation would be ordered.

On one side of the argument is the desire for some kind of working coordination of these varied oversea activities—a desire that has frequently been voiced in Congress and by the series of special committees set up to study U.S. foreign operations.

But while few would quibble with this desire—particularly as it might result in better coordination in the field abroad—questions are being raised about the wisdom of putting the food-for-peace program into the vast administrative and policy labyrinth of the State Department.

As conceived in Congress several years ago, and as discussed both during the campaign and since by the President, the food-for-peace operation was depicted as an attempt to set up a single authority to mediate and decide the inevitable differences involved in the concurrent—and sometimes conflicting—operations of the Agriculture and State Departments.

Agriculture has the food, and Agriculture has the job of getting it to the places where it can be used. On the other hand, State has the responsibility for working out foreign policy—and U.S. food can affect the conduct of foreign policy in many ways.

A major factor in setting up McGovern's agency in the White House itself was the hope that he would thus have both the independence and the prestige to mediate—and settle—these inevitable interdepartment rows.

Some backers of the food-for-peace program fear that placing it in the State Department might well weaken congressional support for the concept. Similarly, they fear that tying it to the much less popular foreign aid programs might rob it of important backing in Washington.

Mr. HUMPHREY. Mr. President, the article expresses considerable concern over what may happen to the food-for-peace program in the reorganization which was suggested for our foreign aid operations. I wish to go on record now as saying that I think the food-for-peace program should be attached to the highest office in the land, namely, the White House. The food-for-peace program should be under separate direction, as it is today, where it can serve as an instrument of both the Department of Agriculture and the Department of State. If it falls under the immediate supervision of either of the major departments alone, it will lose some of its effectiveness.

I hope that as we study the reorganization plans, we will give careful consideration to the role which food-for-peace ought to have in our national policy.

SELF-HELP FOR INDIANS AND ESKIMOS THROUGH VOCATIONAL TRAINING

Mr. GRUENING. Mr. President, I am pleased that the Senate has passed S. 200, a bill to remove the statutory limitation on the amount that may be appropriated for adult Indian vocational training, which I was glad to support both in the Subcommittee on Indian Affairs, and also in the full Committee on Interior and Insular Affairs.

In my opinion, the bill is one of the more important measures which we will have before us this session. This is in fact an educational measure which can be practically and promptly translated into self-support and economic opportunity.

Under this program, Indians and Eskimos are helped to help themselves. They are aided—on a voluntary basis—to establish their economic self-sufficiency and to make a new life for themselves as integral parts of the community. A small start has been made under the present statutory ceiling of $3.5 million. More, much more remains to be done. I shall continue to work for this end.

I hope, Mr. President that S. 200 will be speedily passed by the other body. But I also hope that the administration will shortly thereafter present to Congress a request for a budget increase for this program that will realistically approach the actual needs of the program.

EXECUTIVE SESSION

Mr. HUMPHREY. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to consider executive business.

Mr. HUMPHREY. Mr. President, I ask that certain nominations which are at the desk be called up for consideration.

BOARD OF REGENTS OF THE NATIONAL LIBRARY OF MEDICINE, PUBLIC HEALTH SERVICE

The PRESIDING OFFICER. The nominations will be stated.

The legislative clerk read the nomination of Dr. Hugh Hudson Hussey, Jr., of the District of Columbia, to be a member of the Board of Regents of the National Library of Medicine, Public Health Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Dr. Robert Morgan Stecher, of Ohio, to be a member of the Board of Regents of the National Library of Medicine, Public Health Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

The legislative clerk read the nomination of Dr. William Lowell Valk, of Kansas, to be a member of the Board of Regents of the National Library of Medicine, Public Health Service.

The PRESIDING OFFICER. Without objection, the nomination is confirmed.

Mr. HUMPHREY. Mr. President, I ask that the President be immediately notified of the confirmation of these nominations.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith of the confirmation of the nominations.

Mr. HUMPHREY. Mr. President, I may say to the acting minority leader, the distinguished Senator from Kansas [Mr. CARLSON], that these nominations represent the true bipartisan spirit. They represent a blending of the old and the new, because the nominations originally were submitted by President Eisenhower and then were resubmitted by President Kennedy. So I extend a hand across the aisle in this bipartisan spirit of happiness and joy over their confirmation.

Mr. CARLSON. Mr. President, in view of this happy ending—I notice no other Senators seek recognition at this time—I join with the distinguished Senator from Minnesota. I am pleased that this administration is now beginning to cooperate and bring forth programs which were recommended both by President Eisenhower and President Kennedy. I assure the acting minority leader that it will be easier for some of us to cooperate more often.

LEGISLATIVE SESSION

Mr. HUMPHREY. Mr. President, I move that the Senate resume the consideration of legislative business.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

THE EASTER SUNDAY

Mr. CARLSON. Mr. President, as we conclude this session and adjourn over the Passion Week weekend, I pray that we may let our thoughts go back to that period of time—the darkest period of the world's history.

May we think of the crucifixion and death of the Saviour in the dark days that followed, and of the wonderful inspiration and encouragement the world received on Easter morning. That period and that event have brought hope and faith to all mankind. They have made the world a better place in which to live, and they give hope for the future.

The Senate is privileged to have as its Chaplain the honored and revered Frederick Brown Harris, who daily leads us in devotions. Oftentimes, however, because some of us are not present at the opening of the Senate sessions, we fail to receive the full benefit of his outstanding prayers for divine mercy and guidance.

At this Easter season, I think it appropriate that we look back on some of the prayers delivered by our Chaplain during past Easter seasons. I have selected extracts from some of his prayers as a prayer at the closing of this session:

Our Father, God, in this holy week of the Passion, by a crude cross lifted up on the earth, that blossomed into victory, help us to realize anew, from that invincible symbol, that Thy purposes are beyond defeat. In the light of that cross, may we see that Thy purposes of redemption are as wide as mankind.

* * * * *

Make us persons of brotherly love in an unbrotherly world. To others' faults, make us forgiving, as we would be forgiven. As our lives touch the lives of others, teach us to be gentle in our thoughts, just in our dealing, and generous in our judgments.

May the beauty of the Master of these days of the Passion be seen in us, casting out all envy and uncleanness. Lead our minds in the quest of truth—even the truth of eternal life in the midst of our fleeting days.

* * * * *

May these days of the week of weeks, which for Him, in the anguish of loneliness, was reddened with blood, bring us face to face with the truth He dared to follow, the words He dared to utter, the hypocrisy He dared to flay, and the steadfast purpose from which He would not shrink, even when the road He took grew bleak and black before Him.

For these days of the Passion, hear this, our prayer—"O God, to us may grace be given to follow in His train." Amen.

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, March 30, 1961, he presented to the President of the United States the enrolled bill (S. 153) to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963.

ADJOURNMENT TO MONDAY

Mr. CARLSON. Mr. President, if there is nothing further to come before the Senate at this time, I move that the Senate adjourn, in accordance with the order previously entered.

The motion was agreed to; and (at 3 o'clock and 2 minutes p.m.) the Senate adjourned, under the previous order, until Monday, April 3, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate March 30, 1961:

U.S. MARSHALS

Anton T. Skoro, of Idaho, to be U.S. marshal for the District of Idaho for a term of 4 years, vice Saul H. Clark.

Jack D. Obbink, of Nebraska, to be U.S. marshal for the District of Nebraska for the term of 4 years, vice William Raab.

FOREIGN CLAIMS SETTLEMENT COMMISSION

LaVerne R. Dilweg, of Wisconsin, to be a member of the Foreign Claims Settlement Commission of the United States.

IN THE ARMY

The following-named officers for temporary appointment in the Army of the United States to the grades indicated under the provisions of title 10, United States Code, sections 3442 and 3447:

To be major generals

Brig. Gen. Harrison Alan Gerhardt, O18697, Army of the United States (colonel, U.S. Army).

Brig. Gen. Clinton Stone Lyter, O18291, Medical Corps, U.S. Army.

Brig. Gen. Charles Wythe Gleaves Rich, O19910, Army of the United States (colonel, U.S. Army).

Brig. Gen. Reuben Henry Tucker, 3d, O19894, Army of the United States (colonel, U.S. Army).

Brig. Gen. John Tabb Snodgrass, O29670, Army of the United States (colonel, U.S. Army).

Brig. Gen. George Wilson Power, O18691, Army of the United States (colonel, U.S. Army).

Brig. Gen. James Dyce Alger, O19848, Army of the United States (colonel, U.S. Army).

Brig. Gen. Charles John Timmes, O29777, Army of the United States (colonel, U.S. Army).

To be brigadier generals

Col. William Nels Redling, O31516, Army of the United States (lieutenant colonel, U.S. Army).

Col. John Martin Cone, O20658, Army of the United States (lieutenant colonel, U.S. Army).

Col. John Gordon O'Brien, O42171, Judge Advocate General's Corps, U.S. Army.

Col. Douglass Phillip Quandt, O20605, Army of the United States (lieutenant colonel, U.S. Army).

Col. Chester Lee Johnson, O20681, Army of the United States (lieutenant colonel, U.S. Army).

Col. Douglas Blair Kendrick, Jr., O20511, Medical Corps, U.S. Army.

Col. Kenneth Francis Dawalt, O20226, Army of the United States (lieutenant colonel, U.S. Army).

Col. Edward Leon Rowny, O23744, Army of the United States (major, U.S. Army).

Col. Robert Henry Schellman, O22002, Army of the United States (lieutenant colonel, U.S. Army).

Col. Roy Lassetter, Jr., O51714, U.S. Army.

Col. Frederic William Boye, Jr., O21891, Army of the United States (lieutenant colonel, U.S. Army).

Col. Donald Clinton Clayman, O20866, Army of the United States (lieutenant colonel, U.S. Army).

CONFIRMATIONS

Executive nominations confirmed by the Senate March 30, 1961:

NATIONAL LIBRARY OF MEDICINE

To be members of the Board of Regents of the National Library of Medicine, Public Health Service, for terms expiring August 3, 1964 (appointed during the last recess of the Senate):

Dr. Hugh Hudson Hussey, Jr., of the District of Columbia.

Dr. Robert Morgan Stecher, of Ohio.

Dr. William Lowell Valk, of Kansas.

HOUSE OF REPRESENTATIVES

THURSDAY, MARCH 30, 1961

The House met at 12 o'clock noon.

The Chaplain, Rev. Bernard Braskamp, D.D., offered the following prayer:

I Timothy 1: 15: *This is a faithful saying and worthy of all acceptation, that Christ Jesus came into the world to save sinners.*

Almighty God, whose amazing love we cannot fathom in this Holy Week, with its days of solemn and sacred memory, may we be filled with a humble spirit and a contrite heart as we meditate upon the sufferings and sacrifice of our Lord and Saviour.

Grant that on Easter Sunday we may share His glorious resurrection by rising with Him into newness of life and rededicating ourselves to the task of building that blessed highway where men and nations shall walk and work together in His spirit.

Inspire us with the joyous conviction that we are living and laboring for that which our Master proclaimed to be our noblest quest when we seek first the kingdom of God and His righteousness and which can only be established through the power of sacrificial love.

May Thy name be glorified. Amen.

THE JOURNAL

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 118. An act for the relief of Helen Irma Imhoof;

S. 126. An act for the relief of Edward W. Scott III;

S. 132. An act for the relief of Man-Yeh Chow;

S. 138. An act for the relief of Mico Delic;

S. 139. An act for the relief of Krste Angeloff;

S. 164. An act for the relief of Cherie Helen Bratton;

S. 177. An act for the relief of Hadji Benlevi;

S. 178. An act for the relief of Michael J. Collins;

S. 217. An act for the relief of Alessandro Gellhorn;

S. 225. An act for the relief of Dr. Chien Chen Chi;

S. 262. An act for the relief of Constantinos Georgiou Stavropoulos;

S. 274. An act for the relief of Hajime Asato;

S. 277. An act for the relief of Erica Barth;

S. 285. An act for the relief of Alpo Fransilla Crane;

S. 292. An act for the relief of Mah Jew Ngee (also known as Peter Jew Mah);

S. 298. An act for the relief of Earl H. Pendell;

S. 313. An act for the relief of Ante Tonic (Tunic), his wife, Elizabeth Tunic, and their two minor children, Ante Tunic, Jr., and Joseph Tunic;

S. 330. An act for the relief of Harry N. Kouniakis;

S. 417. An act for the relief of Haruo T. Hendricks;

S. 423. An act for the relief of Fotios Gianoutsos (Frank Giannos);

S. 438. An act for the relief of Mrs. Maria Giovanna Hopkins;

S. 444. An act for the relief of Ok Hi Shin and Tae Soo Chung;

S. 532. An act for the relief of Stanley Bulski (Zdzislaw Rekosz);

S. 533. An act for the relief of Irena Maria Koller;

S. 545. An act for the relief of Mrs. Elizabeth Clifford;

S. 546. An act for the relief of In Fil Chung, In Ae Chung, In Sook Chung and In Ja Chung;

S. 555. An act for the relief of Nicolaos A. Papadimitriou;

S. 593. An act for the relief of Hans Christian Gunnar Mikkelsen;

S. 644. An act to amend the Foreign Service Act of 1946, as amended, concerning reemployment of officers or employees;

S. 663. An act for the relief of Andreas Rakintozis (also known as Andreas Rakintzis or Rakajes);

S. 696. An act for the relief of Angel Ardaiz Martinez;

S. 697. An act for the relief of Maria Luisa Martinez;

S. 713. An act for the relief of Anastasia Stassinopoulos;

S. 894. An act for the relief of Captain Ernest Mountain;

S. 939. An act for the relief of Zlata Dumlijan and Djuro (George) Kasner; and

S. 1097. An act for the relief of A. E. Waterstradt.

INACTIVATION OF MILITARY BASES AND INSTALLATIONS

Mr. PELLY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Washington?

There was no objection.

Mr. PELLY. Mr. Speaker, the President of the United States has directed that the Defense Department dispose of or inactivate certain bases and installations which are surplus to the present and future needs of the military. Mr. Speaker, I know it takes political courage to eliminate these installations that are often unnecessary and I commend the President for taking this action. I do not know, of course, the merit of each one that is listed, but I do say that this is a step in the right direction and I am very glad to support the President in this regard.

OPPOSITION TO FEDERAL AID TO EDUCATION

Mr. YOUNGER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks, and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. YOUNGER. Mr. Speaker, Mr. E. Maxwell Benton, a California Tax Schools consultant, has issued the following statement in opposition to Federal aid to education:

U.S. SCHOOL CONTROL BID OPPOSED

"The current Federal aid to education bill proposed by the President is designed to soak the so-called 'rich' States, such as California, and force them to help foot the school bill in other States," E. Maxwell Benton, Cal-Tax Schools consultant, told the recent annual meeting of the Santa Barbara County Taxpayers' Association.

The administration plan envisages programs of allowances to all States on the basis of average daily attendance. Since California has a larger public school enrollment than any other State, it would stand to receive many millions of dollars in Federal support under this program.

However, California taxpayers should not be fooled by this obvious attempt to garner support for a measure calculated to cost them far more than would be returned in Federal allotments. The basic issue in this perennial Federal school aid battle is whether the National Government should introduce a program of general Federal subsidies for elementary and secondary schools. California Taxpayers' Association continues its strong opposition to any such legislation.

Benton said that under the President's plan, no State would get less than $15 per pupil. Some States would get considerably more under the "equalization" formula. The $2.3 billion proposed in the plan would be allotted over a 3-year period and could be used for teacher salaries or school construction as determined by the States.

In the first year, it is estimated that the average per pupil allowance to all States would amount to $19.75. The U.S. Office of Education reports that California would get something less than $17 per pupil while the allowance to some States may reach a high of about $30 per pupil.

California Taxpayers' Association strongly opposes any such legislation because:

1. California pays more into the Federal Treasury than is returned to California in Federal aid. Estimated tax payments from California to support this legislation would far exceed the amount which we would receive in allocations under terms of the bill. The plain fact of the matter is that Californians would be helping other States support their public school systems. We have yet to see any demonstration that other States, making the same effort as does California, are unable to support their schools adequately. We do our job at the State and local level and oppose subsidizing other States' educational programs.

2. The Federal Government has been operating in the red for many years and is in no position to assume an unnecessary added burden for the support of public schools. Expanded Federal support would increase the probability of continued and increased Federal deficit financing. It would tend to postpone indefinitely reductions in Federal taxes. Higher Federal taxes would leave less money for the support of State and local governments.

3. Federal aid leads to Federal control of education and the loss of local autonomy. "He who pays the piper calls the tune." When a superior government allocates funds to a local unit, it not only has the right but the responsibility to see that the funds are expended according to regulations laid down in the legislation. Even though the proposed legislation for general aid may provide no specific controls, controls are inevitable and follow the increasing Federal share of the cost of education. Special education programs, currently supported by Federal grants, almost without exception contain very definite controls.

The proposed education subsidy in the administration bill is a relatively small amount of the total annual expenditures for public education. But, it is a "foot" in the door and will be followed by pressures for added billions in years to come. Here is where the real danger lies. Those who decide spending policies ought to be faced with the responsibility for raising the taxes. Massive Federal aid to education strikes a real blow against responsible and independent local government.

We urge that you will write your Senators and Congressmen and tell them that California neither needs nor wants this educational subsidy. See the Tax Digest, first quarter 1961, for their names and addresses. This issue will reach you soon.

THE BUDGET AND INFLATION

Mr. CURTIS of Missouri. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

Mr. CURTIS of Missouri. Mr. Speaker, I take this time just before the Easter recess to call attention to the budget that the President has submitted. The Joint Economic Committee had the Director of the Bureau of the Budget before it on Monday but, significantly enough, he appeared before the second, and major, part of the budget was presented, which was on Tuesday.

In light of the deficits predicted I, for the life of me, cannot see how we are going to avoid the pressures of inflation. I am happy to say one thing, though; the Council of Economic Advisers to the President will appear before the Joint Economic Committee on Monday right after the recess, and at that time one series of questions I intend to direct will deal with inflation. I fear that we have it before us. We must remember that as we vote these expenditures, as we did yesterday, we have to pay for them in some way.

RETIREMENT OF WILLIAM L. FENSTERMACHER, OFFICIAL REPORTER OF DEBATES

Mr. AVERY. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. AVERY. Mr. Speaker, in 1930 Herbert Hoover was President of the United States and the Honorable Nicholas Longworth, of Ohio, was Speaker of this House. On March 1, 1930, Speaker Longworth appointed William Fenstermacher Official Reporter of Debates in the House of Representatives. Tomorrow, on March 31, 1961, after 31 years of faithful service and devotion to this body William Fenstermacher will retire and no longer serve as Official Reporter.

It may come as a surprise and perhaps be of interest to some Members to learn that Lew Deschler, our highly respected Parliamentarian was appointed to his

position just 2 years previous to that, in 1928, also by Speaker Longworth.

During these 31 years of service, Bill Fenstermacher has served under Speaker John Nance Garner, of Texas; Speaker Henry T. Rainey, of Illinois; Speaker Joseph W. Byrns, of Tennessee; Speaker William B. Bankhead, of Alabama; of course Speaker Joe Martin, of Massachusetts, as well as our present beloved Speaker, Sam Rayburn, of Texas.

Mr. Speaker, Bill Fenstermacher has recorded famous debates by such persons as John Rankin, "Ham" Fish, Fiorello La Guardia, Dewey Short, former Vice President Nixon, the present Vice President Lyndon Johnson and, of course, the President of the United States, John F. Kennedy.

I am taking the floor this afternoon to pay tribute to a long and faithful servant of this House. Bill Fenstermacher was born in Chapman, Kans., in 1883. He graduated from the Dickinson County High School in Chapman and then taught school for 1 year. For approximately 25 years following his experience as a schoolteacher, he was an official reporter for several railroads and as a general reporter in private practice previous to his appointment by Speaker Longworth in 1930.

It has long been a source of amazement to me that despite his 77 years of age he can stand here in the well of this House and without ever looking around to see who is speaking recognize the voice of the speaker, if that particular Member has been here for at least 1 year. I believe he is entitled to a fine tribute as one who has served so long.

So, William Fenstermacher, I speak for all Members of the House now serving and many Members who are no longer with us, to wish you a very happy retirement and we only admonish you to return and visit us as often as you can.

Mr. Speaker, if there is some curiosity as to why I should be making this presentation today, I should like to be permitted to say that Chapman, Kans., is only 18 miles from my hometown of Wakefield.

Mr. McCORMACK. Mr. Speaker, will the gentleman yield?

Mr. AVERY. I would be honored to yield to the distinguished majority leader.

Mr. McCORMACK. It is a pleasure to me to join with my friend and I know I speak the sentiments of my colleagues in wishing Mr. Fenstermacher in the years that lie ahead of him every happiness and success. We of the House are very proud of those who are part of the organization of the House. We deeply respect them. They enjoy our confidence. This particularly applies to our official reporters, whose arduous duties are well known by all of the Members of the House. Each and every one of our official reporters are men who are dedicated to the service of the House and dedicated to the service of each Member of the House. They love their duty, and they perform it in a manner that reflects credit upon the House of Representatives and also upon themselves. Our distinguished friend who is about to retire has faithfully lived up to the high ideals of our official reporters of the past years in a manner which, as I said, reflects credit upon the House and themselves. Again, I extend to Mr. Fenstermacher my every good wish, and with my expression I know go the sentiments of every Member of the House and without regard to party.

Mr. AVERY. I would certainly wish to thank the gentleman from Massachusetts, our distinguished majority leader, because I know in the years to come Bill Fenstermacher will look back with a great amount of pride at the tribute paid him by our leader.

Mr. McCULLOCH. Mr. Speaker, will the gentleman yield?

Mr. AVERY. I yield to the gentleman from Ohio.

Mr. McCULLOCH. Mr. Speaker, I should like to say that I never heard a Member say that he was misquoted. I join in this tribute to Mr. Fenstermacher.

Mr. AVERY. Mr. Speaker, I ask unanimous consent that all Members may be permitted to extend their remarks following this tribute, and I further ask unanimous consent that the Speaker may be permitted to extend his remarks and include a letter of his own composition.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. RAYBURN. Mr. Speaker, I wish to join with others in their complimentary remarks about Mr. Fenstermacher. Mr. Fenstermacher submitted his resignation to me which I accepted, and I wrote him the following letter:

THE SPEAKER'S ROOMS,
U.S. HOUSE OF REPRESENTATIVES,
Washington, D.C., March 27, 1961.

Mr. W. L. FENSTERMACHER,
Official Reporters of Debate,
House of Representatives,
Washington, D.C.

DEAR FENSTERMACHER: I have your letter of resignation as Head Official Reporter for the House of Representatives, and I regret that circumstances force you to retire.

I want you to know, however, that it has been a pleasure to work with you because throughout the years you have been fine and kind and have been one of the most efficient men in your work that I have ever been associated with.

It is my sincere hope that you will have the many happy days of retirement you so richly deserve.

With all good wishes to you, I am,
Sincerely yours,

SAM RAYBURN.

Mr. MARTIN of Massachusetts. Mr. Speaker, I am sorry to learn of the coming retirement of our senior Official Reporter of Debates, William L. Fenstermacher. There has never been a more faithful or more devoted servant of the House. He has been an accurate and a conscientious reporter, whose fine work has stemmed from a deep affection and respect for the work of the Congress. In my terms as Speaker there was no one more dedicated than William L. Fenstermacher. He has earned respite and rest from the exacting duties the pressure of reporting imposes upon our reporters. His youthful vigor belies his years. He is still young in spirit and I am sure all of our colleagues join with me in wishing him good health and happiness in his well earned retirement. We who have served with him so long will miss a good friend and a splendid public servant.

COMMITTEE ON THE JUDICIARY

Mr. McCULLOCH. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary may have until midnight tonight to file a report.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

PROVIDENCE COLLEGE, N.I.T. CHAMPS

Mr. McCORMACK. Mr. Speaker, I ask unanimous consent that the gentleman from Rhode Island [Mr. FOGARTY] may extend his remarks at this point in the RECORD on the great victory of last Saturday by the Providence College basketball team when they won the National Invitational Tournament championship.

The SPEAKER. Without objection, it is so ordered.

There was no objection.

Mr. FOGARTY. Mr. Speaker, it was a thrilling moment last Saturday when Providence College, down by seven points with 10 minutes to go, swept to a 62 to 59 victory in the National Invitational Basketball Tournament. On the way to their victory they had defeated De Paul, Niagara, Holy Cross—in overtime—and the St. Louis Billikens in the final. Vincent Ernst was, very appropriately, I thought, named the most valuable player in the tourney. He and John Egan constitute one of the greatest backcourt combinations in basketball. This is a fit reward for this gallent team, and their fine coach, Joe Mullaney, who were edged out by Bradley in the finals of the tournament last year.

Providence College, whose faculty is largely composed of professors who are members of the Order of Friars Preacher, popularly known as the Dominican Order, insists upon high academic standards for their students and athletes. Thus it combines the two qualities—a sound body in a sound mind—which are so necessary for all Americans. Providence College deserves our heartiest congratulations for its fine demonstration of skill and heart last Saturday.

In a recent report on youth fitness, Dr. A. L. Capman, Chief of the Division of Special Health Services of the Public Health Service, put this challenge to all of us:

Youth fitness—

He said—

must involve fitness of the spirit, mind, and body—total fitness * * *. Each can be identified separately and described, yet they are really inseparable.

I know that fitness of spirit, mind, and body is a goal at Providence College for all of its students. It is, therefore, especially pleasing to me to know that they were so appropriately represented by their basketball team in a nationwide television broadcast which all the Nation watched.

AMERICA'S POSITION WITH RESPECT TO COMMUNIST CHINA

The SPEAKER. Under previous order of the House, the gentleman from Wisconsin [Mr. ZABLOCKI] is recognized for 60 minutes.

Mr. ZABLOCKI. Mr. Speaker, I am taking the floor at this time to discuss our country's position with respect to Communist China, particularly as it affects the admission of Red China to the United Nations and the recognition of that regime by the United States. I think it is imperative, as we discuss this issue, that we remember the Soviet Union still has an effective voice in the policies of Red China, that there is no breach between these two countries, and that both countries are determined to communize the world.

On this very subject, and on at least 2 occasions in recent years, and on 16 occasions since 1948, the House of Representatives has formally expressed its views. The Congress has overwhelmingly opposed the admission of the Communist regime on the mainland of China to the United Nations and its specialized agencies.

In 1956, a resolution opposing the admission of Red China to the United Nations was approved by a vote of 391 to 0 in the House and by a vote of 86 to 0 in the Senate.

In 1959, House Concurrent Resolution 369, a measure which I sponsored, and similar to the 1956 resolution, was approved in the House by an overwhelming vote of 368 to 2.

More recently, and in a somewhat less formal manner, 338 Members of the Congress, 55 Senators and 283 Members of the House of Representatives, signed a declaration circulated by the Committee of One Million which reads as follows:

> We continue to oppose the seating of Communist China in the United Nations, thus upholding international morality and keeping faith with the thousands of American youths who gave their lives fighting Communist aggression in Korea. To seat a Communist China which defies, by word and deed, the principles of the U.N. Charter would be to betray the letter, violate the spirit, and subvert the purposes of that charter.
>
> We further continue to oppose U.S. diplomatic recognition or any other steps which would build the power and prestige of the Chinese Communist Regime to the detriment of our friends and allies in Asia and of our national security. Any such action would break faith with our dead and the unfortunate Americans still wrongfully imprisoned by Communist China and would dishearten our friends and allies in Asia whose continued will to resist Communist China's pressures and blandishments is so vital to our own security interests in that part of the world.

Mr. Speaker, I ask unanimous consent to include in the RECORD at this point the names of the 338 Members of Congress who signed the above declaration.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

(The list of Members referred to follows:)

Representative WATKINS M. ABBITT, Democrat, Virginia.

Representative THOMAS G. ABERNETHY, Democrat, Mississippi.

Representative E. ROSS ADAIR, Republican, Indiana.

Representative JOSEPH P. ADDABBO, Democrat, New York.

Representative HUGH J. ADDONIZIO, Democrat, New Jersey.

Representative CARL ALBERT, Democrat, Oklahoma.

Representative HUGH Q. ALEXANDER, Democrat, North Carolina.

Representative DALE ALFORD, Democrat, Arkansas.

Representative BRUCE ALGER, Republican, Texas.

Senator GORDON ALLOTT, Republican, Colorado.

Representative H. CARL ANDERSEN, Republican, Minnesota.

Senator CLINTON P. ANDERSON, Democrat, New Mexico.

Representative JOHN B. ANDERSON, Republican, Illinois.

Representative VICTOR L. ANFUSO, Democrat, New York.

Representative LESLIE C. ARENDS, Republican, Illinois.

Representative JOHN M. ASHBROOK, Republican, Ohio.

Representative ROBERT T. ASHMORE, Democrat, South Carolina.

Representative JAMES C. AUCHINCLOSS, Republican, New Jersey.

Representative WILLIAM H. AVERY, Republican, Kansas.

Representative CLEVELAND M. BAILEY, Democrat, West Virginia.

Representative HOWARD H. BAKER, Republican, Tennessee.

Representative JOHN F. BALDWIN, JR., Republican, California.

Representative WALTER S. BARING, Democrat, Nevada.

Representative WILLIAM A. BARRETT, Democrat, Pennsylvania.

Representative ROBERT R. BARRY, Republican, New York.

Representative WILLIAM H. BATES, Republican, Massachusetts.

Representative JAMES F. BATTIN, Republican, Montana.

Senator J. GLENN BEALL, Republican, Maryland.

Representative FRANK J. BECKER, Republican, New York.

Representative RALPH P. BEERMANN, Republican, Nebraska.

Representative PAGE BELCHER, Republican, Oklahoma.

Representative ALPHONZO E. BELL, JR., Republican, California.

Representative CHARLES E. BENNETT, Democrat, Florida.

Senator WALLACE F. BENNETT, Republican, Utah.

Representative E. Y. BERRY, Republican, South Dakota.

Representative JACKSON E. BETTS, Republican, Ohio.

Senator ALAN BIBLE, Democrat, Nevada.

Representative IRIS FAIRCLOTH BLITCH, Democrat, Georgia.

Senator J. CALEB BOGGS, Republican, Delaware.

Representative HALE BOGGS, Democrat, Louisiana.

Representative FRANCES P. BOLTON, Republican, Ohio.

Representative FRANK T. BOW, Republican, Ohio.

Representative FRANK W. BOYKIN, Democrat, Alabama.

Representative WILLIAM G. BRAY, Republican, Indiana.

Representative J. FLOYD BREEDING, Democrat, Kansas.

Senator STYLES BRIDGES, Republican, New Hampshire.

Representative JAMES E. BROMWELL, Republican, Iowa.

Representative OVERTON BROOKS, Democrat, Louisiana.

Representative WILLIAM S. BROOMFIELD, Republican, Michigan.

Representative JOEL T. BROYHILL, Republican, Virginia.

Representative DONALD C. BRUCE, Republican, Indiana.

Representative CHARLES A. BUCKLEY, Democrat, New York.

Representative JAMES A. BURKE, Democrat, Massachusetts.

Senator PRESCOTT BUSH, Republican, Connecticut.

Senator JOHN MARSHALL BUTLER, Republican, Maryland.

Senator ROBERT C. BYRD, Democrat, West Virginia.

Representative JAMES A. BYRNE, Democrat, Pennsylvania.

Representative WILLIAM T. CAHILL, Republican, New Jersey.

Senator HOMER E. CAPEHART, Republican, Indiana.

Representative HUGH L. CAREY, Democrat, New York.

Senator FRANK CARLSON, Republican, Kansas.

Senator JOHN A. CARROLL, Democrat, Colorado.

Senator CLIFFORD P. CASE, Republican, New Jersey.

Senator FRANCIS CASE, Republican, South Dakota.

Representative BOB CASEY, Democrat, Texas.

Representative ELFORD A. CEDERBERG, Republican, Michigan.

Representative CHARLES E. CHAMBERLAIN, Republican, Michigan.

Representative George O. Chambers, Republican, Indiana.

Representative FRANK CHELF, Democrat, Kentucky.

Representative J. EDGAR CHENOWETH, Republican, Colorado.

Representative ROBERT B. CHIPERFIELD, Republican, Illinois.

Representative MARGUERITE STITT CHURCH, Republican, Illinois.

Representative FRANK M. CLARK, Democrat, Pennsylvania.

Representative MERWIN COAD, Democrat, Iowa.

Representative HAROLD R. COLLIER, Republican, Illinois.

Senator RALPH YARBOROUGH, Democrat, Texas.
Senator MILTON R. YOUNG, Republican, North Dakota.
Representative J. ARTHUR YOUNGER, Republican, California.
Representative CLEMENT J. ZABLOCKI, Democrat, Wisconsin.

Mr. TOLL. Mr. Speaker, will the gentleman yield for a question?

Mr. ZABLOCKI. I am delighted to yield.

Mr. TOLL. Can the gentleman inform me whether the position taken would preclude any opportunity of discussing, say, a possible disarmament project with a nation which is not a member of the United Nations?

Mr. ZABLOCKI. We are at the present time holding negotiations with Communist China in Warsaw, and in the past we have had negotiations with Communist China in Geneva. Yes, we can negotiate with them even though we do not recognize them and even though they are not admitted to membership in the United Nations.

Mr. TOLL. And the gentleman believes, then, there is no reason why we cannot include them in the discussion or that Soviet Russia can control Communist China on the disarmament issue?

Mr. ZABLOCKI. Yes. I thank the gentleman.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I am delighted to yield.

Mr. JUDD. The contention is frequently brought up that we must have Communist China in the United Nations in order to get an agreement on disarmament, and an agreement cannot be effective unless Communist China participates in the agreement. But we should not cross that bridge until we get to it. Until there is some evidence of reasonable prospects for agreement with the Soviet Union, which is the main Communist power with atomic weapons, there is no use bringing into the club the subordinate, which Red China definitely is. If and when the day comes, and I hope and pray it does, that the Soviet Union will agree to realistic and effective disarmament proposals, at that time there will be some point in approaching Communist China for its participation. After all, we cannot negotiate atomic disarmament with 99 countries. We have got to negotiate with the three other nations

which now have such weapons. Whenever we get agreement, if we can, is the time to consider extending those negotiations to get others to agree to it.

Mr. ZABLOCKI. I agree wholeheartedly with my colleague and want to express by sincere appreciation for his contribution.

To continue my statement:

The position of the overwhelming majority of Members of Congress who have expressed themselves on the issue of the admission of Red China to the United Nations is based on reality. It is based on solid facts of history.

It may be useful to recall and review some of these facts.

They show, by every standard of national and international conduct, the Communist regime on the mainland of China is an outlaw and an aggressor.

That regime has perpetrated mass murder upon its own people. It has thrown foreign citizens into prison without cause and without trial, submitting many of them to inhuman tortures and death. It has confiscated without compensation the property of foreign nationals running into millions upon millions of dollars.

In one decade, it has provoked at least six civil or foreign wars—in Korea, in Tibet, in Indochina, in the Philippines, Malaya and Laos. It has fought and defied the United Nations. It has been branded an aggressor by the United Nations. And to this very day, it continues to defy the United Nations aims to reunify Korea, and it continues to violate the international armistice agreements involving Korea and Indochina.

These are hard facts which should shatter the futile hopes or wishful thinking of those who maintain that Red China should be admitted to the United Nations. And these facts spell one thing: Red China does not meet the principles and the specific requirements of the United Nations Charter for admission to membership in the United Nations organization.

The U.N. Charter is very clear on the question of membership. Article 4 of the charter states that membership in the United Nations is open "to all other peace-loving states which accept the obligations contained in the present charter and, in the judgment of the organization, are able and willing to carry out these obligations."

There is nothing in the conduct of the Communist regime on the China mainland to suggest, even remotely, that it is peace-loving.

There is not one shred of evidence in the pronouncements of Red China leaders, or in their actions, that they are willing to carry out the obligations placed upon all member states by the U.N. Charter.

But there is ample evidence, as I have already shown, to the contrary.

Further, Mr. Speaker, there is another—and vitally important—issue involved in this entire question of the admission of Red China to the United Nations.

Under the charter, China is one of the five permanent members of the Security Council, and possesses the veto power. The question of who will sit in the Security Council, and exercise that veto power, is the one that we have to face in any discussion of the issue at hand.

There is ample evidence that Red China will not be satisfied with simple admission to the United Nations. The Communist regime expects and will demand the unseating of the Republic of China. It will demand a seat on the Security Council, and it will demand veto power.

We must keep these consequences in mind.

Mr. PUCINSKI. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Illinois.

Mr. PUCINSKI. The gentleman from Wisconsin is to be commended for preparing such an excellent indictment and bill of particulars as to why Red China should not be admitted to the United Nations at this time. As a distinguished member of the Committee on Foreign Affairs the gentleman certainly has provided a great deal of stimulus in calling the attention of the free world as to why Red China should not be admitted. I think the gentleman's remarks are particularly timely at this time in view of the fact that throughout the world today, even among some of our most noble allies, an effort is being made to soften the attitude of the free world so that Red China may be considered for admission to the United Nations. Until they have shown some signs of conducting themselves as a civilized nation they should be denied this admission. I was wondering whether the gentleman in his remarks intends to include figures as to how many Americans are still being detained and imprisoned illegally by Red China?

Mr. ZABLOCKI. According to the latest figures I have there are approximately 450 Americans that have not been accounted for by Red China.

I want to thank the gentleman for his kind remarks and contribution.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Minnesota.

Mr. JUDD. These are 450 persons who we know at one time were in their hands?

Mr. ZABLOCKI. That is correct.

Mr. JUDD. We know because some of them sent post cards in their own handwriting home to their folks. Some of them were allowed by the Chinese to broadcast over their radio from Peiping and their relatives heard their voices. So, we know they had them. Maybe they are all dead now. But why do the Reds not at least account for them? This is not the behavior of a government that qualifies for admisison to the United Nations, with any reason to believe it will behave itself in the way that civilized nations must behave in carrying on relations with other nations.

Mr. ZABLOCKI. First of all, let me say I have little hope that of the 450 any of them are still alive. I am sure one reason that the Communist Chinese are not accounting for them is because they could not truthfully tell us how they died. They are ashamed of the fact that they have mistreated our American soldiers.

Furthermore, we have known from the past, and it is history, that whenever it was to the Communist Chinese advantage they would let out one or two or let it be known where one or two were in the hope that we would soften up further if some of our friends and allies began to worry about what our future policy will be. And if they are showing a little bit of softness, I truthfully cannot blame them; if they see that some of our leaders who are beginning to speak of coexistence are willing to accept the theory that admission of Red China would somehow solve the Communist problem of the world. How can you expect these people that are at the very border of the Soviet regime to resist. If they see that we are a paper tiger, then how can we expect them to stand up against communism and to fight communism as we hope they will so that communism could be contained? We must tell our friends and allies that we are behind them and we will demonstrate by force, if necessary, that we will not permit communism to spread, to permit communism to enforce its way of thinking on nations just because they are small nations that are helpless.

Mr. PUCINSKI. Mr. Speaker, if the gentleman will yield further, I am in complete agreement with the gentleman and I wish to associate myself with his philosophy. The point I was trying to make, I am very much disturbed when I see, for example, indications coming from one of our greatest allies, England, that there is a strong movement of serious consideration of admitting Red China to the United Nations. Then, in our own hemisphere, when we see indications from a nation like Brazil that Brazil would join in the consideration of permitting Red China to enter the United Nations. These are not people on the border of the Soviet Union. These are among our stanchest allies, and it disturbs me that apparently there is a softening attitude.

Mr. Speaker, I congratulate the gentleman again for taking this time today, for sounding the alarm that this sort of reasoning is irrational. We cannot do business with the Communists. We have had a whole series of broken promises, we know that today. Most of Europe is in Communist bondage by reason of this softening attitude. And, it disturbs me very much to hear responsible leaders saying that perhaps the time has come to give serious consideration, when the Red Chinese have not indicated one iota of evidence that they are worthy of serious consideration for admission to the United Nations.

Mr. ZABLOCKI. I hope that we can learn a lesson from history. The gentleman mentioned Great Britain, which is not on the border of the Soviets, and was willing to recognize Communist Red China. But, what advantages has Great Britain obtained from the recognition? We should learn a lesson from the treatment that has been accorded to the representatives of Great Britain by Red China. Further, Great Britain is in a very precarious position in Hong Kong, and if Red China should want Hong

Kong, they could take that area at the snap of a finger.

I again repeat, we must learn from history. We can only hope to cope with communism if we first remain strong, help our friends and allies become strong, and then deal with this menace from a position of strength.

Mr. DERWINSKI. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Illinois.

Mr. DERWINSKI. I think the gentleman's discussion of this subject is timely, for this reason, that in addition to the allied nations who have indicated a softer attitude toward Red China and the Communists in general, we have influential citizens in the United States voicing the opinion that recognition of Red China is inevitable, contrary to the view of some Members of Congress against the admission of Red China. I certainly wish to commend the gentleman for bringing this matter to our attention again.

I would suggest that should he feel it necessary to offer a resolution in the House, he would receive the overwhelming support of the Members of Congress.

Mr. Speaker, I commend the gentleman for the timely nature of the speech he is making.

Mr. ZABLOCKI. I thank the gentleman. I think I ought to make one thing clear, since repeatedly even I have stated that some of our leaders are beginning to say that we ought to seriously consider the admission of Red China to the United Nations, or that we should recognize Red China; I am very happy that the President is very resolute in his position and I think will not weaken in it. That is the purpose of my taking this time on the floor, so that our President will know that we are behind him, and that we are behind him even if he is moved by necessity to use force, that we are united solidly behind our President in dealing with communism from a position of strength.

Mr. GROSS. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Iowa.

Mr. GROSS. Mr. Speaker, I want to join in commending the gentleman for bringing this issue to the House floor. It is timely. Only a few days ago or comparatively a few days ago, there was a vote in a meeting of the World Health Organization in New Delhi, India. That vote was comparatively close. But the startling thing was that many nations abstained from voting on the issue, many more than would have given a majority necessary to admit Red China into the World Health Organization; in other words, getting a foot in the door.

It is timely again, because the British Prime Minister is on his way to this country, if he is not already here, as I understand. To me it was one of the most inexplicable things in connection with the Korean war that the British, who were supposed to be fighting in that war, never severed diplomatic relations with Red China. Now they want to admit this nation into the United Nations. While I have not too much use for the United Nations, I am certainly opposed to any such admission.

Mr. ZABLOCKI. Yes, they continued their relations with Red China.

Mr. GROSS. They continued to do business while they were supposed to have combat troops fighting in Korea, in the Korean war, shipping strategic materials into China during that war.

Mr. ZABLOCKI. I agree with the gentleman, and I cannot fathom the thinking of the British on that score. I want to assure the gentleman that my taking this time today is not entirely accidental.

Mr. BRUCE. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman.

Mr. BRUCE. Mr. Speaker, I, too, would like to commend the gentleman for taking the position he has and bringing to the forefront the majority opinion of the American people in opposition to any compromise or any deal with the gangster element that is in control of the Chinese Communist people. I think it is particularly vital at this time when there appear to be many moves to bring about what cannot be done through the front door, through a back-door approach; little deals here and there even with the Chinese Communists through certain accommodations, and so forth. I think it is imperative that the United States and the non-Communist world recognize that these are not just opportunists in China, that Mao Tse-tung and Chou En-lai are hard-line, dyed-in-the-wool, well-trained, dedicated Communist leaders; that Mao Tse-tung is the author of the Soviet Strategic Handbook of two steps forward and one step backward, the compromise and the dialectic in action.

It is imperative that we recognize, as the gentleman has so well recognized, that it is part of the softening up process, that with the admission of Red China into the United Nations obviously it would close off the island of Taiwan. As a symbol of resistance, a psychological symbol, if nothing more, in this one island they have produced to where the leader of the Chinese Nationalists was able to offer as a master stroke surplus food from the island of Formosa to the Red dictator of China for the starving people of China. Certainly it is wise not to look at the surface manipulations and the deals here and there by those who practically within our system have adopted the theory that it is better to crawl on your belly to Moscow than to stand up. This is a time when principle again has to be reestablished. Certainly we have learned by the mistakes in our dealings with the other half of the Moscow-Peiping axis the fallacy of trying to appease, to compromise. We dare not confuse our policy regardless of what some of the so-called enlightened neutrals may tell us or the pressure they put on. The course of liberty in the generations to come rests on our realizing the dialectical realism, the cold scientific formula being used by this Moscow-Peiping axis to soften us up, to get us to agree with what on the surface seems logical in terms of their dialectic as part of the overall conflict in the world. Their goal is clear, the conquest of the world. As I have stated in the well of the House, they will use every dodge and trick, including failure to tell the truth. As long as communism exists we cannot live in peace. In the end the funeral dirge will be sung for one or the other. It is for us to dodge and maneuver.

I congratulate the gentleman for taking this occasion to draw this into the limelight, that there are forces moving throughout the world seeking to get an accommodation with evil and totalitarianism, that will only end in a greater victory for those who would destroy us.

Mr. ZABLOCKI. I thank the gentleman for his observation.

To return to my statement:

There remains a second, and separate issue of the recognition of the Communist regime on the mainland of China by our Government.

I believe that the facts which I have cited earlier about Red China's conduct and attitudes apply with equal vigor to the issue of recognition.

There is nothing that our country can gain by establishing diplomatic relations with Red China. Certainly the experience of those countries which recognized the Communist regime should prove that. Our recognition, per se, will not change Red China's behavior or objectives. It will provide no assurance that, after U.S. recognition, Red China will be willing to negotiate, to reach agreements, to honor agreements and international law.

Anyone who maintains that, by recognizing Red China we will cause her to respect the accepted rules of international conduct and to honor international commitments, is simply indulging in wishful thinking. There is absolutely nothing on record to support such assumptions.

I commend the gentleman for his very clear analysis. I am very happy that he brought out just what the political situation is and what violence there exists on the mainland of China.

There are some who criticize and say that we are unwilling to assist the poor starving Chinese. I am sure that we would be very happy to share our blessings, but when we see that the Communist regime in China is sending wheat out for military purposes, should we then support that regime by making up their shortages with our wheat? We would want to help the Chinese people, but we have no assurance that our aid would get to them. The critics say that our Government is waiting until the Chinese stretch out their hands. This is not true. We are ever willing to help the Chinese people, but we will never aid the Mao Tse-tung government.

Mr. DORN. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from South Carolina.

Mr. DORN. I wish to commend and compliment the gentleman and associate myself with the timely remarks he has made here today, and also to say that the surest way to lose this cold war is to recognize and put our stamp of approval on the gangster tactics of Red China.

Mr. HIESTAND. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from California.

Mr. HIESTAND. I congratulate the gentleman from Wisconsin for taking this time to place before the House all of the circumstances for and against this proposed recognition of Red China. I congratulate him further for securing the views of the gentleman from Minnesota [Mr. JUDD] whose very eloquent address is a classic.

I have a question for the gentleman from Wisconsin, a distinguished member of the Committee on Foreign Affairs. Is it not a fact that when we recognize another nation we are in effect only recognizing the government of that nation?

Mr. ZABLOCKI. That is true.

Mr. HIESTAND. Can we not therefore further make this clear, as the gentleman has so ably stated, by invariably referring to the Government of Red China rather than Red China? We are going to recognize China, the great nation, some day or other, although the gentleman and I may not live to see it. Certainly it should never be the present Government of Red China, that bunch of unscrupulous conspirators, that have so enslaved that great people.

Mr. ZABLOCKI. We should not extend recognition to the Communist regime on the China mainland because by doing so we would be tacitly agreeing with their abuse of the Chinese nation. Very often it is stated, What will happen in the United Nations if the United States finds itself in the minority? We will not be able to prevent the admission of Red China to the U.N. In reply, I say what is wrong about being in the minority if we are correct and morally right in our position?

I would like to read a passage on this subject from the report of the 14th session of the General Assembly of the United Nations, at which I was privileged to be a delegate. This is House Report No. 1385, 86th Congress, 2d session. The two Congressmen who served as members of the United States delegation had this to say:

> We are also concerned about what seems to be a suicidal tendency in some quarters of the United Nations to be more concerned with war prevention at any price than with the demands of justice and with the principles of the charter. Our own Government has not been above resorting to expediency with respect to some other issues considered by the United Nations. We are deeply concerned lest, in the resort to expediency, a race may be set off in the United Nations to settle issues on the basis of strength and of a number of votes, not on the basis of right or wrong. We must determine to face issues squarely. We must also actively discourage the apparent willingness of some nations to allow a wrong to be swept under the rug. Unless we do this, the latter attitude can spread with disastrous consequences for the future of the United Nations. On our part, we believe that, under certain circumstances, the U.S. representation in the United Nations must have the courage to fail for principle—or else we may ultimately fail because of lack of principles.

I hope that even if we should be in a minority, that the United States will still vote against the admission of Red China to the United Nations. And I hope that we will have the courage to vote, instead of merely abstaining from voting.

Mr. HIESTAND. Mr. Speaker, will the gentleman again yield?

Mr. ZABLOCKI. I yield to the gentleman from California.

Mr. HIESTAND. I thank the gentleman for his very complete answer to my question. May I again reemphasize the issue. The gentleman has talked about these great issues and his position is a correct one. This issue is not the recognition of the Chinese people, and the issue is not talking about recognizing the people of China, but the issue is the question of the recognition of the Communist government. If we, in our communications and in our attitude keep that issue clear, I think we can be much more effective.

Mr. JUDD. Mr. Speaker, will the gentleman yield?

Mr. ZABLOCKI. I yield to the gentleman from Minnesota.

Mr. JUDD. Let me give some precedents on just this point. The Soviet Union seized Lithuania, Latvia, and Estonia in 1940. We have never recognized that conquest. The free Government of Latvia has a legation with a chargé d'affaires right here in Washington today, 20 years later. I try to go to its reception each year on the national holiday of Latvia to celebrate their equivalent of our Fourth of July. The fact that their country, no matter how tiny, has been crushed and absorbed by a giant does not make it right or permanent. They are a distinct people with an ancient heritage and honorable history of self-government. Our official recognition goes to their independent government.

Another illustration. During the last war Hitler overran Norway and set up what claimed to be the Norwegian Government under a Norwegian named Quisling. The rightful Government of Norway was driven out. It did not hold one island or one foot of Norwegian soil. It was in exile in Great Britain. But we never extended diplomatic recognition to the Quisling government. It was there, it was in power. Some might have claimed it was there to stay; so we should face reality and recognize it as the Government of Norway. But, very properly, we did not do that. We continued our recognition of the legitimate Government of Norway in exile until the Norwegians could regain their freedom. That is the course we should follow with the Red Chinese regime—until it is weakened and overthrown, or becomes a law-abiding, peace-loving government and ceases its operations against and within other nations, not only those on its borders but in Africa and Latin America as well. Such a change of behavior, of course, would by definition mean it would have to abandon communism, for communism requires it to engage in international lawlessness, deception, subversion, and violence. Communists will not abandon communism until they are compelled, by clear demonstration of strength in the free world, to recognize that they cannot succeed. The great need now is for steadfast firmness and strength in support of freedom and justice. This is the way to real peace.

The SPEAKER. The time of the gentleman from Wisconsin has expired.

GENERAL LEAVE TO EXTEND

Mr. ZABLOCKI. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days to extend their remarks at this point in the RECORD.

The SPEAKER pro tempore. Without objection, it is so ordered.

There was no objection.

BURNS CREEK PROJECT

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Idaho [Mr. HARDING] is recognized for 10 minutes.

Mr. HARDING. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Idaho?

There was no objection.

Mr. HARDING. Mr. Speaker, I understand that on April 17 and 18 the Irrigation and Reclamation Subcommittee of the House Committee on Interior and Insular Affairs will hold hearings on the Burns Creek project in eastern Idaho. The gentlewoman from Idaho, my colleague, Mrs. PFOST, and I have introduced bills authorizing the construction of this vital upstream reclamation project.

The Burns Creek project is an investment in the future of America. It is a project that has had the support of the Eisenhower administration and now the Kennedy administration. It has been backed by Idaho's entire congressional delegations during the past 5 years—Democrats and Republicans alike.

Authorization of the Burns Creek project has been urged by the following joint memorial which passed the Idaho State House of Representatives and Senate without a dissenting vote. Leaders of both political parties in Idaho see the great need for the Burns Creek project.

HOUSE JOINT MEMORIAL 2

To the Honorable Senate and House of Representatives of the United States in Congress Assembled:

We, your memorialists, the Legislature of the State of Idaho, respectfully represent that:

Whereas the multiple-purpose use of the water resources of the Snake River has become the backbone of the economy of Idaho during the past more than 50 years, the Palisades Reservoir and powerplant, which is located on the upper Snake River near the eastern boundary of Idaho, being the most recent addition to this multiple-purpose use; and

Whereas, at the time of and ever since the planning of the Palisades project it was and has generally been recognized by the Federal Power Commission and other Government departments, as well as by many persons and groups interested in the development of the resources of this State, that the maximum benefits to the Nation and to the State of Idaho in terms of power production and water storage for irrigation purposes will be attainable from the Palisades project only through the construction of a reregulating dam downstream to link irrigation storage releases with the power

plant of the Palisades project, and the Burns Creek project was designed for integration operationally and financially with the Palisades project in order to attain the maximum of complementary benefits from both projects; and

Whereas, there is urgent need in the State of Idaho for greater power production and increased reservoir capacity for the storage of water for irrigation puposes; and

Whereas, the Burns Creek project was determined to be feasible by the Secretary of the Interior in his report, dated February 26, 1957, and both the Department of the Interior and the Bureau of the Budget reported favorably on legislation to authorize this project by letters directed to the chairman of the Senate Committee on Interior and Insular Affairs of the 85th Congress, which committee reported favorably on the bill (S. 2757) in the 85th Congress which would have authorized the construction of the Burns Creek project, and recommended that it do pass: Now, therefore, be it

Resolved, by the 37th session of the Legislature of the State of Idaho, now in session (the senate and house of representatives concurring), That we most respectfully urge the Congress of the United States of America, to proceed with all due speed to enact legislation similar to Senate bill 2757 of the 85th Congress authorizing the construction, operation and maintenance of a reregulating reservoir and other works at the Burns Creek site in the upper Snake River Valley, Idaho, and to implement such authorization with necessary appropriations; and be it further

Resolved, That the secretary of state of the State of Idaho be, and he hereby is, authorized and directed to forward certified copies of this memorial to the President and Vice President of the United States, the Speaker of the House of Representatives of the Congress, and to the Senators and Representatives representing this State in the Congress of the United States.

Mr. Speaker, the Burns Creek project has the endorsement of farmers, labor unions, small businessmen, municipalities, rural electrification associations, chambers of commerce, and wildlife groups. Never in the history of the State of Idaho has a project had more unanimous endorsement and support than the Burns Creek project.

It is being opposed only by selfish special interests in Idaho along with other opposition they are now attempting to enlist throughout the United States.

The Burns Creek project is an excellent multipurpose project. The wide support it has is evidence of this. It would store 100,000 acres of vital irrigation water. In addition it would act as a reregulating reservoir allowing the Palisades power plants to be used at full capacity to meet peak loads. Furthermore, it would contain a power plant of its own with a capacity of 90,000 kilowatts. In addition the Burns Creek Dam would provide a beautiful mountain reservoir that would enhance the fishing and recreational activities of a fast-growing population.

The Burns Creek project would cost roughly $48 million. However, 99.9 percent of this money would be repaid to the Federal Government and 97 percent of the repayment would be with interest.

We are asking our fellow Americans to have the faith in our region and our region's economy necessary to build this much needed project which will enable us to fully utilize our natural resources.

At this point I would like to insert in the RECORD today an excellent editorial from the Idaho Falls Post-Register on the Burns Creek project.

[From the Post-Register, Mar. 19, 1961]

THE EDITOR'S NOTEBOOK—BURNS CREEK WEDDING

If the Burns Creek Dam were approved in the original Palisades Dam package as originally intended, there would have been no need for this week's divisive hearings in Washington, D.C.

The private power utilities in Idaho and Utah raised no objection to Palisades Dam. They are vigorously opposing the downstream appendage to Palisades Dam and they have drawn several key Congressmen along with them.

What opponents of Burns Creek Dam have failed to realize is that Burns Creek Dam is really part and parcel of Palisades Dam. The original draft for Palisades Dam included the reregulating dam downstream at Burns Creek. But it was taken out of the first proposal because it was felt by water leaders in Idaho anxious to obtain additional irrigation storage that it would be too large a project for Congress to digest in one swallowing. It is nevertheless a natural adjunct to Palisades Dam, and has always been considered so by water leaders.

The fact that Burns Creek Dam almost allows a doubling of power when operated in conjunction with Palisades Dam for nearly half the cost of Palisades is not the only cogent reason for approving the Burns Creek site. There is a little matter of 100,000 acre-feet of supplemental irrigation storage that can be of inestimable value in a dry year—the "make or break" margin possibly.

The most important phrase to come out of the hearings this week on behalf of Burns Creek was this one "• • • the full potential use of the Snake River in that stretch of the river." This means power, irrigation, recreation, and wildlife development. And we should not forget that power is to be utilized for irrigation pumping as well as servicing Idaho Falls and REA's which have been traditional public power users.

Yes, Burns Creek Dam is primarily a power installation and, yes, it is more expensive than Palisades Dam, but what succeeding project on the Snake isn't? We have used up our first choice sites. But is the Snake River and its economy to be denied the full potential of the Snake? The ratio of benefit to cost, considered with Palisades, is still 1.65 to 1 and that's the way it should be considered.

Representative JOHN P. SAYLOR of Pennsylvania said Thursday that he "had heard there may be a couple of sites for development on the stream with twice as much water" as he tried some almost ludicrous heavyfooting on the Burns Creek project. If there is, it goes without saying that the Bureau of Reclamation that has investigated the upper Snake River from stem to stern, would like to know about them. Congressman SAYLOR must have been thinking of something downstream on the Snake. What he and a lot of other nonreclamation State congressmen have never given any thought is that water should be saved in the upstream reaches for full benefit.

Despite the hearsay approach of Congressman SAYLOR and the erroneous pamphleteering of the Utah Power & Light Co., Burns Creek may still survive. One of the forays by the power company—the charge that Palisades has bypassed water for irrigation to make power for preference customers—has been neatly nailed down as a bald misstatement by Watermaster Henry Eagle of Idaho Falls. The power company apparently forgot that the water users keep records on the river, too. And their records clearly show the need and the benefit to be derived from the Burns Creek Dam.

I sincerely hope that when this project comes before the Congress that you, my fellow Congressmen, will have the faith in Idaho to authorize us to build this much needed and much sought after reclamation project.

Mr. HOSMER. Mr. Speaker, will the gentleman yield?

Mr. HARDING. I yield.

Mr. HOSMER. I say it is a project that has been concocted to generate power. The irrigation features of it are so minor as to be almost not apparent to the naked eye. As a consequence, I asked the gentleman to yield that I might have on the record my thoughts and feelings in order that the Congress might know that the merits of the Burns Creek project are not undisputed.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. HARDING. I would like to answer the gentleman from California first; then I will yield to the gentleman from Florida.

During a recent hearing before the Senate Committee on Irrigation and Reclamation Lynn Crandall who for 29 years was the watermaster of the Snake River in Idaho and knows more about the Snake River than any other person in Idaho, was asked if this was not a power project, and he stated that the project was for the irrigators of Idaho but that the REA's and municipalities merely jumped on the bandwagon. The fact that 97 percent of this project is allocated to power is good, because it enables us to repay this money to the Federal Government with interest.

It is also interesting to note that there are some 9 million acre-feet of water stored at the Hoover Dam that is being used for irrigation, for municipalities, and for industrial water users, yet not 1 cent of the cost of the Hoover Dam was charged back to irrigation; it was all charged to electric power.

Mr. Speaker, I now yield to the gentleman from Florida [Mr. HALEY].

Mr. HALEY. I just want to say to my distinguished friend that before he goes too far overboard on these things I think he ought to have probably some of the real history of this project. The gentleman has just said that the people who oppose this project were not enlightened. Maybe I am not enlightened and probably will not be insofar as this project is concerned, but I would like to call the gentleman's attention to the fact that power in the Burns Creek project is 98.7 percent. Admittedly it is purely and simply a power project, with only 1.3 percent for irrigation and reclamation.

The gentleman talks about the huge reservoir he might create there, but he could do that same thing by simply building a reregulating dam at a cost of about $5 million. The warning I want to give to my distinguished friend is this: In the 17 Western States where you have irrigation and reclamation you are in a very favored position. Now, do not misunderstand me. I think there have been tremendous improvements in that re-

spect but, on the other hand, I want the gentleman to recognize the fact that the Congress in its wisdom has put the 17 western reclamation States in a very favored position at great cost to the other taxpayers of the United States. There is going to come a time when if you abuse this privilege, which I think you are doing in this particular project, you are going to lose that preferential status that you in the Western States have enjoyed, all of the reclamation States that come under this preferential law. You had better look to what you are doing because if this Congress or the Members of the Congress who in fact vote time and time again to subsidize power in your Western States, help you build up your economic situation by the erection of irrigation and reclamation projects, if you abuse that, my young friend, there will come a time when the Congress will clamp down. After all, this takes money, and it comes from all of the taxpayers of the United States. Do not forget that you are receiving huge subsidies in every respect, and if you abuse that privilege you are going to lose your favored position, which I hope will not come about. But you will bring it on yourselves by presenting to the Congress projects that are not justified under the irrigation and reclamation laws of this Nation. I thank the gentleman for yielding.

Mr. HARDING. I am delighted to hear the remarks of the gentleman from Florida. May I say at this point that nowhere in my statement have I said that people who oppose this project are unenlightened. I have said before this is a good project. I only wish I had more time to discuss it here today. I see also my good friend from Pennsylvania in the Chamber, and I wish we had 10 hours instead of 10 minutes to discuss it. But in concluding the discussion of this vital multiple-purpose project, I can only say that I wish all projects were as good. Ninety-nine and nine-tenths percent of the cost of this project will be repaid to the Treasury, 97 percent of this with interest. Then after completely paying for itself it will return about 4 percent of its cost to the Treasury annually. This is what I call a good project.

The SPEAKER. The time of the gentleman from Idaho has expired.

BURNS CREEK PROJECT

Mr. SAYLOR. Mr. Speaker, I ask unanimous consent to address the House for 10 minutes, to revise and extend my remarks, and that they appear following the remarks of the gentleman from Idaho [Mr. HARDING] in the body of the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. SAYLOR. Mr. Speaker, our colleague, the gentleman from Idaho [Mr. HARDING], inferred in his comments on the Burns Creek project that anyone who opposed the Burns Creek project is unenlightened and anyone who approved of the Burns Creek project is enlightened. I do not know where our colleague got his information that he gave here on the floor of the House, but he said that this was a self-liquidating project.

Now, I think my colleagues of the House should know that the Department of the Interior has been submitting reports on this project for quite a number of years, and every report that the Department has submitted has indicated that it is not only not a self-liquidating project but they further state that this project is so poor that the sale of the power at the prevailing rate in the area will not even pay the interest on the bonds which it will be necessary to float in order to secure money to build this project, let alone ever pay out the principal of it.

Now, those who live in that area of the country have decided they would like to have the Burns Creek project developed as a public power project under the guise of reclamation. As our colleague, the gentleman from Florida [Mr. HALEY], has just commented, approximately 98-and-a-fraction percent of this project is public power and three-tenths of 1 percent, according to the figures submitted by the Bureau of Reclamation, is for reclamation purposes, and a fraction of 1 percent is allocated to fish and wildlife.

Now, the only way that this project can ever be financed is to saddle a good reclamation project in the State of Idaho, namely, the Palisades project, with the full cost of this power site and this power dam that is proposed to be built. Now, long before our colleague came to the Congress from Idaho and under two prior administrations, Democrat and Republican, the Department of the Interior has been endeavoring to get this project through.

Mr. HALEY. Mr. Speaker, will the gentleman yield?

Mr. SAYLOR. I will be happy to yield to the gentleman from Florida.

Mr. HALEY. I just want to say to my distinguished friend from Pennsylvania that I think he is probably as well informed and probably as sympathetic as any man in the Congress when it comes to irrigation and reclamation projects. I sat on the committee with him for 8 years, and I know that he is and has been and probably will continue to be interested in real irrigation and reclamation projects. In defense of our young friend who has just left the floor, I think that probably he needs a little of the background that the gentleman from Pennsylvania and the gentleman from Florida and the gentleman from California have on this project.

The gentleman from Pennsylvania [Mr. SAYLOR] well knows that had the Burns Creek project been attached to the Palisades project at the time that project was presented to the Congress, it is doubtful that the Congress would have authorized that project.

Mr. SAYLOR. That is correct. Even the advocates of the Palisades project now admit that.

Mr. HALEY. Mr. Speaker, will the gentleman yield further?

Mr. SAYLOR. I am happy to.

Mr. HALEY. Of course, the gentleman knows that if this project were authorized and built, it would supply electric energy at probably the highest cost of any project ever attempted to be built by the Federal Government. What I was warning my young friend about just a short while ago was that he should not mislead, because if the Burns Creek project had to stand on its own, without the assistance of the Palisades project it never could have been built under any law.

Furthermore, what I was trying to warn the Members of Congress from these reclamation States about was this: If you abuse this power that exists in the reclamation laws, they are going to be faced with a situation where, in my opinion, one of these days Congress will rebel against that particular section of the Nation.

Mr. Speaker, I know that the gentleman from Pennsylvania [Mr. SAYLOR], for a long period of time has been favorably inclined toward real irrigation and reclamation projects and has helped to put many of them through the committee. I say to the gentleman, let us not penalize anyone here, because he knows, as practically every member of the committee does, that if we are to authorize this project, it would not be justified; the cost ratio is entirely out of line. And as the gentleman has well said, standing alone this project would not even pay the interest on the money and further, it would take away several millions of dollars, in order to keep it in operation, from the Palisades project, which money could be used in a few years to expand other projects in irrigation and reclamation.

I thank the gentleman for his courtesy in yielding to me.

Mr. SAYLOR. Mr. Speaker, I thank my colleague for his kind remarks and his contribution.

Mr. Speaker, we who come from nonreclamation States are delighted to assist those people who come from States that have projects which are genuine reclamation projects. I am proud of the record that I have made and that this Congress has made since I have been a Member of it, in approving good reclamation projects. We have approved projects in almost all of the 17 Western States. It was my good fortune to be a member of the House Committee on Interior and Insular Affairs when the original bill for the Palisades project was introduced by our colleague from Idaho, John Sanborn. That project was approved. It is a good project. It puts water on the land to produce crops for the benefit of all. It has some power connected with it, and the power is produced at a low rate and is being sold to the people in that area at a low rate. But it will pay out.

If those who support the Burns Creek project persist in trying to put over projects like this, if we approved it we would not be abiding by the reclamation law. Because under every standard that has been set up in the law from

1902, when the original Reclamation Act was passed, until the revision of 1939, this project cannot be built.

I shall have more to say on Burns Creek when the House reconvenes after Easter.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. McGown, one of its clerks, announced that the Senate had passed without amendment a concurrent resolution of the House of the following title:

H. Con. Res. 211. Concurrent resolution that when the House adjourns on Thursday, March 30, 1961, it stand adjourned until 12 o'clock meridian on Monday, April 10, 1961.

The message also announced that the Senate agrees to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 5188) entitled "An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes."

The message also announced that the Senate agrees to the amendments of the House to the Senate amendments Nos. 27, 36, 38, and 50 to the above-entitled bill.

The message also announced that the Senate disagrees to the amendments of the House to the bill (S. 1) entitled "An act to establish an effective program to alleviate conditions of substantial and persistent unemployment and underemployment in certain economically distressed areas," requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. DOUGLAS, Mr. CLARK, Mr. PROXMIRE, Mr. WILLIAMS of New Jersey, Mr. MUSKIE, Mr. CAPEHART, Mr. BENNETT, and Mr. BUSH, to be the conferees on the part of the Senate.

LOAN GUARANTEE AUTHORITY OF THE INTERSTATE COMMERCE COMMISSION

Mr. HARRIS submitted the following conference report and statement on the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guarantee authority of the Interstate Commerce Commission.

CONFERENCE REPORT (H. REPT. No. 214)

The committee of conference on the disagreeing votes of the two Houses on the amendment of the Senate to the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for fifteen months the loan guaranty authority of the Interstate Commerce Commission, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses as follows:

That the House recede from its disagreement to the amendment of the Senate to the text of the bill and agree to the same with an amendment as follows: In lieu of the matter proposed to be inserted by the Senate amendment insert the following: "That section 510 of the Interstate Commerce Act (49 U.S.C. 1240) is amended by striking out 'March 31, 1961' and inserting in lieu thereof 'June 30, 1963'."

Amend the title to read as follows: "An Act to amend section 510 of the Interstate Commerce Act so as to extend for twenty-seven months the loan guaranty authority of the Interstate Commerce Commission."

And the Senate agree to the same.

OREN HARRIS,
JOHN BELL WILLIAMS,
WILLIAM L. SPRINGER,
Managers on the Part of the House.

GEORGE A. SMATHERS,
FRANK J. LAUSCHE,
A. S. MIKE MONRONEY,
ANDREW F. SCHOEPPEL,
JOHN MARSHALL BUTLER,
Managers on the Part of the Senate.

STATEMENT

The managers on the part of the House at the conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guaranty authority of the Interstate Commerce Commission, submit the following statement in explanation of the effect of the action agreed upon by the conferees and recommended in the accompanying conference report:

The bill as it passed the House proposed to amend title V of the Interstate Commerce Act, which contains the loan guaranty authority of the Interstate Commerce Commission with respect to common carriers by railroad, by extending such authority for 15 months, or until June 30, 1962.

The Senate struck out all of the bill after the enacting clause and inserted a substitute extending the loan guaranty authority for 36 months, or until March 31, 1964. The conference agreement provides for extending this authority for 27 months, or until June 30, 1963.

The Senate amendment also proposed other changes in title V of the Interstate Commerce Act. However, since the conference agreement does not include any of these proposed changes, it is unnecessary to discuss them.

The conference agreement also makes a necessary conforming change in the title of the bill.

OREN HARRIS,
JOHN BELL WILLIAMS,
WILLIAM L. SPRINGER,
Managers on the Part of the House.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent for the immediate consideration of the conference report on the bill (H.R. 1163) to amend section 510 of the Interstate Commerce Act so as to extend for 15 months the loan guarantee authority of the Interstate Commerce Commission.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. HARRIS. Mr. Speaker, I ask unanimous consent that the statement be read in lieu of the report.

The SPEAKER. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

The Clerk read the statement.

Mr. HARRIS. Mr. Speaker, I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

FEDERAL AID TO CHURCH-RELATED SCHOOLS

The SPEAKER. Under previous order of the House, the gentleman from Illinois [Mr. PUCINSKI] is recognized for 15 minutes.

Mr. PUCINSKI. Mr. Speaker, I ask unanimous consent to revise and extend my remarks and to include extraneous matter.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PUCINSKI. Mr. Speaker, perhaps one of the most widely discussed and debated subjects in America today is the question of Federal aid to education, and in particular Federal aid to church related schools.

The other day the Department of Health, Education, and Welfare prepared an analysis of the legal aspects of this question regarding Federal aid to church-related schools. The Department has also prepared an analysis of the constitutional authority of the Congress to enact legislation providing Federal funds to the public school system of America. I am including these reports in toto at the conclusion of my remarks, because I believe it is extremely important that the American people have an opportunity to study the vast complexities of this entire problem. I think the report prepared by the Department of Health, Education, and Welfare is an excellent analysis of existing law and Supreme Court decisions, and while I may not agree entirely with some of the conclusions drawn by the Department, I believe making this report available to all who want to participate in this discussion will certainly help clarify the issue. Secretary of Health, Education, and Welfare Abraham Ribicoff is to be commended for making such a thorough contribution toward a better understanding of this entire problem.

Mr. Speaker, as I read the Department's report, the Department maintains and supports the contention, by reason of Supreme Court decisions in the Everson, McCollum, and Zorach cases, that it would be unconstitutional for the Congress to enact legislation which would give across the board grants or loans to church-related elementary and secondary schools. This is the position of the President of the United States, Mr. Kennedy, and this report sustains the President's position. There may be, I believe, merit in this conclusion.

One of the arguments that has frequently been raised is that it is unconstitutional to ask a citizen of one religious belief to contribute tax funds to the Federal Treasury and then use these same funds to help another religious group perpetuate, preach, or teach its religious beliefs.

What do we mean by "across the board" loans or grants? Across the board loans or grants represent funds that the Federal Government would make available to a religious group for constructing or rehabilitating a school building, the facilities of which are used,

in part at least, for the teaching of a particular religion along with other academic subjects. It is on this very point that the question of constitutionality arises. Opponents of any across-the-board loans or grants to parochial schools argue that such loans or grants make possible the teaching of a specific religion and therefore violate the fundamental principle of separation between church and state.

The Department's analysis appears to sustain unequivocally this argument. I think there may be merit to the Department's position that if an across-the-board grant or loan is made to a church-related elementary or secondary school and any part of that money then is used for the teaching of religion, it may clearly be in conflict with the first amendment to the Constitution.

This report also concludes that it would be unconstitutional for the Federal Government to provide tuition payments to individual students which could in turn be used to support parochial schools.

The report states in part:

> Tuition payments for all church school pupils are invalid since they accomplish by indirection what grants do directly. The form of governmental assistance is not controlling. Since tuition payments, whether made to the school or to the parent or student, would constitute support of church schools, they are prohibited by the first amendment. State courts have followed the statements of the Everson case to invalidate tuition proposals, since such a practice compels taxpayers to contribute money for the propagation of religious opinions which they may not believe.

Perhaps, again, there may be merit in this position, but the one interesting aspect of this report which I think all Members of Congress will want to familiarize themselves with is that this report does sustain the position that Federal funds may be used in parochial schools for special purposes affecting the national interest.

In this area, of course, we have precedent now under the National Defense Education Act. We today make loans available to church-operated high schools for the specific purpose of installing science laboratories, language laboratories, and mathematics courses simply because there is a shortage of graduates in all three of these fields. Congress in its wisdom believed in 1958 when it enacted the National Defense Education Act that these private schools, even though they are church related, should be permitted to make their contribution toward filling the need of America in these three critical fields.

Therefore, in summarizing this entire document prepared by the Department it seems to me that we may draw this conclusion:

The Department feels that loans across the board, grants across the board, or tuition payments to individual students for support of parochial elementary and secondary schools would be clearly unconstitutional, and they cite the Everson, McCollum, and Zorach cases to sustain that position.

But this memorandum does open the door for a valid discussion as to whether or not Federal funds can be used in parochial schools for a special purpose totally unrelated to religious instruction. If Congress decides that there is an educational crisis in America and that local communities cannot meet this crisis and therefore the Federal Government must come with some form of assistance to help solve this problem through grants to public elementary and secondary schools, the Congress may then quite properly want to ask further whether or not this same crisis does not confront the Nation's elementary and secondary private schools, church related though they may be, and provide them with Federal assistance for special purposes affecting national interest.

There are 6 million youngsters in this country today attending church-related elementary and secondary schools. These youngsters go on to college; these youngsters make their contribution to science, the professions, to medicine and teaching, and various other fields of our social endeavor and national interest. And, therefore, in view of this report prepared by the Department of Health, Education, and Welfare in which they clearly state that Federal funds may be used in church-related schools where such funds are used for a specific purpose totally unrelated to religious teaching, Congress quite properly may want to give consideration to including in any Federal legislation some form of assistance to these private schools.

It would appear the key here is that such Federal assistance must not be used for any form of religious teaching per se but it can be used for specific facilities within a parochial school where these special facilities are not used for teaching religion but rather are used for teaching academic subjects which are important to the national purpose and to national survival.

I earnestly hope everyone interested in this very complicated subject will take the time to read this entire report so that this distinction can be brought into proper perspective.

I am also including in my remarks today a report on Federal programs under which institutions with religious affiliations today receive Federal funds through grants or loans.

In the current discussion regarding assistance to church-affiliated schools, a great deal is said about the doctrine of separation of church and state. I doubt very much if there is any Member in the Congress of the United States, including myself, who would ever want to enact legislation which would in any way disturb the traditional doctrine of separation of church and state in America. I hope the day will never come when this doctrine is violated. It is my firm belief the very fact that we have stubbornly defended this doctrine since the very inception of our country has distinguished us as free Americans from all other social orders. Certainly, while the Federal Government must never be hostile to religion, because we are a Nation under God with every American given the privilege to worship in the church of his choice, I am confident that all Americans want to preserve the wall of separation between church and state. But this does not mean that the Federal Government or the State government must be completely oblivious to the fact that religious institutions are very closely interwoven into the fabric of our Nation. It is for this purpose that I am introducing at the conclusion of my remarks this report prepared by the Department of Health, Education, and Welfare, which shows how the Federal Government and State governments today participate in church-affiliated activities, the line always being drawn at this critical point: Are these facilities and this assistance being used to help an individual or a project which does not benefit a particular religion or influence the teaching of any particular religion?

I should like to call attention to the vast amount of direct and indirect help the Federal Government renders church-related institutions of higher education of all denominations. This help has been held constitutional. Should this assistance ever be denied, it is safe to assume more than 1,300 church-related universities in America would have to close their doors for lack of funds.

In the report on Federal aid to parochial schools prepared by the Department, there is an interesting case which I should like to cite briefly:

> Payments to sectarian institutions have also been justified where the funds were used exclusively for public purposes and the institution merely operated as a conduit for those purposes. In Opinion of the Justices (99 N.H. 519, 113 A. 2d 114 (1955)), there was involved a proposed New Hampshire law which would have provided annual grants-in-aid to hospitals in the State offering nurses' training. This aid would have gone only to charitable hospitals, including sectarian ones which did not discriminate on the basis of the religion of either students or patients. Holding that the grant program would not violate either the first amendment or its New Hampshire equivalent, the court stated:
>
> "The purpose of the grant * * * is neither to aid any particular sect or denomination nor all denominations, but to further the teaching of the science of nursing * * *. The aid is available to all hospitals offering training in nursing without regard to the auspices under which they are conducted or to the religious beliefs of their managements, so long as the aid is used for nurses' training and for no other instruction or purpose * * *. If some denomination incidentally derives a benefit through the release of other funds for other uses, this result is immaterial * * *. A hospital operated under the auspices of a religious denomination which receives funds under the provisions of this bill acts merely as a conduit for the expenditure of public funds for training which serves exclusively the public purpose of public health and is completely devoid of sectarian doctrine and purposes.
>
> "The fundamental proposition that public moneys shall be used for a public purpose only has not prevented the use of private institutions as a conduit to accomplish the public objectives."

The report states further:

> Milk, school lunch, medical inspection and services, and such like do not raise substantial problems because they do not closely tie in with the religious function served. The Supreme Court has put transportation in the same category. True, all such programs make the sectarian school more attractive educationally than it would otherwise be.

But the Constitution does not require the State to handicap religious institutions or force parents to prejudice their children's health in exercising their constitutionally protected right to a sectarian education.

The same principle may, perhaps, be extended to textbooks for the use of individual students where the books in question are common to the secular and sectarian educational systems. It might also be extended to some equipment, or possibly to facilities, designed for special purposes totally unconnected with the religious function of the schools.

At another point, the report states:

At the present time, the National Defense Education Act permits the U.S. Commissioner of Education to make loans to private schools to acquire science, mathematics, or foreign language equipment. We believe such loans are constitutional because the connection between loans for such purposes and the religious functions of a sectarian school seems to be nonexistent or minimal. Furthermore, the money is loaned at one-fourth of 1 percent above the current average yield on all outstanding marketable obligations of the United States, thus avoiding characterization as more than a grant of credit.

I believe that within the framework of this concept and with the precedents before us, the Congress may decide whether or not, if we are going to deal with the problem of public education at the secondary and high school level, we can ignore the problem of private education, which in effect does serve as a conduit for general education. The fact that a youngster attending a church-related school must study religion, if he is of the school's particular faith, is incidental to the fact that that same youngster must also carry on a course of studies and a curriculum of instruction set by the State and meeting the tests of the State.

It would appear, Mr. Speaker, that if we accept the Department's view that overall or across the board, Federal help cannot be given church-related schools because in effect they are an extension of the church, then parents who pay tuition to such schools should be permitted to deduct this tuition from their income tax as they would any other contribution to a not-for-profit religious institution. This tax deduction would then be treated in the same manner as any other church contribution.

In conclusion, Mr. Speaker, I would like to add one final comment by calling attention to the third report which I am including at the end of my remarks. This is an excellent brief analysis of the constitutional authority of the Congress of the United States to deal with the entire subject of Federal aid to education. The precedents for such aid are many. I am hoping that with the aid of these three documents, the American people will have an opportunity to study all of the complexities of this problem. I hope this problem will be resolved without the emotionalism that we have seen heretofore in many areas. The Department itself points out there are no clear cut decisions. We are in a field that is extremely complicated. I think that reasonable men proceeding on a reasonable basis will, indeed, be able to find a solution to help meet the educational crisis in America at both the public school level and the private school level without in any way disturbing the fundamentals of our Constitution and the basic doctrine of separation between church and state.

Mr. Speaker, the three reports I mentioned earlier follow:

MEMORANDUM ON THE IMPACT OF THE FIRST AMENDMENT TO THE CONSTITUTION UPON FEDERAL AID TO EDUCATION

SUMMARY OF CONCLUSIONS WITH RESPECT TO ELEMENTARY AND SECONDARY SCHOOLS

This summary sets out briefly the conclusions reached in the attached memorandum with respect to the application of the first amendment to Federal aid to elementary and secondary schools with religious affiliations. The field of higher education, which presents different factual, historical, and constitutional considerations, is discussed in the body of the memorandum. The memorandum also discusses the problem of obtaining judicial review.

I

The Supreme Court has ruled that the first amendment to the Constitution forbids the use of public funds to "support religious institutions" or "finance religious groups." Legislation which renders support to church schools is unconstitutional in some circumstances. But laws designed to further the education and welfare of youth may not be unconstitutional if they afford only incidental benefits to church schools. For example, public funds may unquestionably be used to provide fire and police protection to church schools.

The line between direct support and incidental benefits is not always easy to determine. Decisions of the Supreme Court and relevant State cases cited and discussed in the accompanying memorandum make it clear that it is easier to determine what the first amendment forbids than what it allows.

II

A. Several unconstitutional proposals can be readily identified

1. Across-the-board grants to church schools may not be made. The Supreme Court has declared: "No tax in any amount, large or small, can be levied to support religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion" (*Everson* v. *Board of Education*, 330 U.S. 1). Plainly an across-the-board grant is the type of support which the Court has ruled is prohibited. Since no effort is made to earmark the funds for specific purposes, such a broad grant would inevitably facilitate the performance of the religious function of the school. This the first amendment forbids.

2. Across-the-board loans to church schools are equally invalid. A loan represents a grant of credit. When made at a rate of interest below what is normally available to the borrower, it also constitutes a grant of the interest payments which are saved. These benefits plainly have the purpose of providing financial advantage or convenience to the recipient. And like the broad grant, the across-the-board loan would inevitably facilitate religious instruction.

The Supreme Court has ruled that the first amendment forbids the lending of a public classroom for religious instruction during released time (*McCollum* v. *Board of Education*, 333 U.S. 203). The lending of public property and the lending of public credit are constitutionally equivalent forms of Government assistance. In *Zorach* v. *Clauson*, 342 U.S. 306, the Supreme Court stated, "Government may not finance religious groups."

3. Tuition payments for all church school pupils are invalid since they accomplish by indirection what grants do directly. The form of governmental assistance is not controlling. Since tuition payments, whether made to the school or to the parent or student, would constitute support of church schools, they are prohibited by the first amendment. State courts have followed the statements of the Everson case to invalidate tuition proposals, since such a practice "compels taxpayers to contribute money for the propagation of religious opinions which they may not believe" (*Almond* v. *Day*, 197 Va. 419, 89 S.E. 2d 851; *Swart* v. *South Burlington Town School Districts*, 167 A. 2d 514).

B. Areas of uncertain constitutionality

The permissible area of legislation which renders incidental benefits to church schools is not clear. The Everson case illustrates the closeness of the question. In upholding bus transportation, a form of assistance in no way connected with the religious function of a church school, the Court divided by 5 to 4. The majority opinion suggested that the statute in question "approaches the verge" of impermissible action under the first amendment (330 U.S. 16). Nonetheless, bus transportation has been ruled valid, and other collateral benefits like provision of milk and lunches appear equally constitutional, since the benefit is plainly to the health of the child and not to the school itself.

It is also likely that where funds are made available to a church school on a loan basis for special purposes not closely related to religious instruction, constitutional objections may be avoided. An example is title III of the National Defense Education Act which enables church schools to borrow funds for equipment to assist in teaching science, mathematics, and languages. Such programs advance specific national purposes, and their relationship to the religious function of a church school is remote. Moreover, the requirement that such funds be repaid makes it unlikely that a church school will be enabled to free its own funds for religious purposes.

In what other directions this principle of special purpose loans may be extended is difficult to ascertain. Typically secular and sectarian education is so interwoven in church schools as to thwart most possibilities.

MEMORANDUM ON THE IMPACT OF THE FIRST AMENDMENT TO THE CONSTITUTION UPON FEDERAL AID TO EDUCATION

The extent to which government, whether Federal, State, or local, may, consistently with the United States Constitution, aid religious schools is a problem which, surprisingly enough, is a relatively new one.

Prior to 1947 Federal judicial concern with this field was limited. The only case presented to the Supreme Court involving the expenditure of federally controlled funds to religious schools was *Quick Bear* v. *Leupp*, 210 U.S. 50 (1908), which held merely that provisions in certain Indian appropriation acts prohibiting the use of public funds for the education of Indians in sectarian schools did not prevent trust funds belonging to the Indians and administered by the Federal Government from being used for such schools at their request and such action did not involve the prohibitions of the first amendment.

It was only recently that State action in this field was held subject to first amendment limitations.[1] The first amendment provides

[1] For this reason the limited number of earlier cases touching upon State action affecting religious schools came up in the context of the question whether property rights were impaired without due process of law in violation of the 14th amendment. See *Pierce* v. *Society of Sisters*, 268 U.S. 510 (1925), upholding as a constitutional right

that "Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof. * * *" By itself this language is not a limitation on State action, though similar provisions exist in many State constitutions. In 1934, however, freedom of religion as guaranteed by the first amendment was construed to be among the liberties protected by the due process clause of the 14th amendment limiting State action (*Hamilton* v. *Regents of the University of California*, 293 U.S. 245 (1934)). Later, in 1947, the now leading case of *Everson* v. *Board of Education*, 330 U.S. 1, made it clear that the due process clause forbade State action which would effectuate "an establishment of religion" prohibited by the first amendment. The impact of that case is that State and Federal action affecting religion must now satisfy the standards of the amendment. Under those standards, what is forbidden to a State is also forbidden to the Federal Government, and what is forbidden to the Federal Government is also forbidden to a State. It is possible, however, that what the Federal Government and the States may properly do without offending the first amendment may nevertheless be prohibited to a particular State because of its own constitutional prohibitions.

In Everson, the Supreme Court in a 5–4 decision, held that where a local school district, as authorized by State law, reimbursed parents for the bus fare paid by them for public transportation of their children to parochial, as well as public schools, such aid did not violate the establishment of religion clause of the first amendment. It was followed in 1948 by *McCollum* v. *Board of Education*, 333 U.S. 203. With only Mr. Justice Reed dissenting, the Court there held that the first amendment (as made applicable by the 14th amendment to the State) forbade a public school program of "released time" under which religious teachers provided by various denominations were permitted by the board of education to hold classes in public school buildings for students who had volunteered for religious instruction. The children not desiring such instruction continued their regular studies in other rooms. In 1952, *Zorach* v. *Clauson*, 343 U.S. 306, was decided. By a 6 to 3 vote, a voluntary "released time" program, basically differing from that involved in the McCollum case only in that the religious instruction was provided off the school premises, was held constitutional. These three cases constitute the most important judicial precedents in the field. The paucity of Supreme Court precedent is due to two factors: First, it was only in 1934 that the Court read the 14th amendment as embodying the pertinent provisions of the first amendment; second, despite the existence of a number of Federal educational programs in recent years, judicial review in Federal courts at the instance of a taxpayer of the lawfulness of Federal expenditures has not been available since *Massachusetts* v. *Mellon*, 262 U.S. 447, decided in 1923.[2] It should therefore be emphasized that the questions discussed in this memorandum are probably not open for judicial determination, unless adequate special statutory provisions are enacted to authorize judicial review.

---

the maintenance of private, including parochial, schools; *Cochran* v. *Board of Education*, 281 U.S. 370 (1930), holding that the use of State money to provide textbooks for school children, including those attending private schools, whether sectarian or nonsectarian, is not a taking of property for private purposes.

[2] In *Doremus* v. *Board of Education*, 342 U.S. 429 (1952), the Supreme Court dismissed an appeal for want of jurisdiction in a suit filed by a State and local taxpayer who had not, on the facts alleged, shown a requisite financial interest.

The difficulties of obtaining a court test of legislation in this area impose a solemn responsibility upon both Congress and the Executive to be especially conscientious in studying the Constitution and relevant Supreme Court decisions so that any enactment will scrupulously observe constitutional limitations.

I

The constitutional principles

At the outset it is evident that resolution of the constitutional problems of present concern requires us to deal with the interrelation of three constitutional limitations. Two are contained in the provisions of the first amendment: Neither Congress nor the States may pass any law "respecting an establishment of religion"; neither may they pass any law "prohibiting the free exercise thereof." The third constitutional limitation is found with respect to the Federal Government in the due process clause of the fifth amendment and for the States, in the due process and equal protection clauses of the 14th amendment. These limitations prohibit the Federal Government or a State from unreasonable discrimination in governmental programs (see *Bolling* v. *Sharpe*, 347 U.S. 497 (1954); *Brown* v. *Board of Education*, 347 U.S. 483 (1954)).

In many instances these three constitutional limitations overlap in one regard or another to prohibit Federal or State action. For example, a Government program of compulsory education exclusively at State-operated schools which taught religion would violate all three. In other factual circumstances, however, a program which satisfied one or more of the limitations might violate another. For example, a program of educational grants to returning war veterans for their readjustment into civilian life perhaps could not have constitutionally excluded from its benefits applicants who wished to attend sectarian institutions. This would probably be regarded as a classification so unrelated to the expressed public purpose as to offend due process requirements.

There is agreement that education serves a fundamental public purpose (see *Brown* v. *Board of Education*, *supra*, at 493) and accordingly that the Federal Government or a State may use public funds for that purpose. In addition, to that end States with respect to education under their control may also compel children, within reasonable limits of age and maturity, to attend schools. Moreover, they may set reasonable standards for education. At the same time, there seems little doubt that Government may not use its authority in the field of education in order to instruct children in religion generally or in any specific religion. This would violate the establishment of religion clause of the first amendment. Nor may Government, without interfering with the religious freedom guaranteed by the first amendment and the due process clause, reserve educational functions to public schools and forbids education by private institutions meeting the standards prescribed by law for the public school (see *Pierce* v. *Society of Sisters*, supra). And in any educational program in which public funds are expended there must be equal treatment for all children; that is, a State may not classify children on the basis of their religion, race, or similar irrelevant considerations without violating equal protection and due process requirements.

It is also evident that these constitutional limitations must be interpreted in the light of specific factual situations. It is the difficulty of attempting to interpret and apply them under contemporary conditions that brings about a potential conflict among them. The most significant of these conditions is that to a substantial extent education at the lower levels, which a State requires and compels, is being carried out by schools which teach according to particular religious tenets, although at the same time satisfying secular educational standards established by the State. This is a form of education which the State cannot constitutionally prohibit. It is settled that individuals have a constitutional right to a religious education. At the same time, sectarian schools are ones which the State cannot constitutionally require a student to attend. There is a constitutional right to freedom of religion or no religion.

The difficult problem is posed by the dual constitutional mandate: That the State must recognize these schools as part of its educational system for purposes of compulsory attendance laws, but that it cannot support them in ways that would constitute an "establishment of religion."

The problem is accentuated by the fact that American society is one in which religion touches much of everyday life, both in the home and in the school. It is a society in which customs, practices, morals, and ceremonies have been importantly influenced by religion. Fundamental as are the principles contained in the first amendment, it is clear that they cannot always be absolutes. The problem is to draw a line between what is permitted and what is prohibited in accordance with applicable constitutional principles. Since this must be done in the society in which we actually live—a society in which aspects of religion are inextricably entwined with knowledge and culture—history and experience may be sounder guides to locating Jefferson's "wall of separation between church and state" than abstract logic.

Even the general agreement that the State cannot constitutionally permit teaching of religion in public schools illustrates some of the difficulties. Examples of efforts to draw the line between constitutionally permissible and impermissible State action have extended to such matters as readings from the Bible, prayers, and celebrations of religious holidays. Pushing the separation doctrine to its logical extreme would make education virtually impossible. History is replete with religious ideas, principles, and experience. Furthermore, it is readily apparent that what one person would classify as simply secular knowledge another would regard as religious instruction. The content of religious belief is largely the prerogative of religious groups to define, though they differ among themselves as to what is included. The content of education is for public authorities to define. Where definitions overlap difficulties arise.

It would be footless to deny that drawing the line between the permissible and impermissible is a hard task. In the Everson case itself, although the Court was unanimously of the view that the establishment of religion clause forbade a State from using public funds for sectarian education, it nevertheless divided by the closest margin (5–4) on whether State reimbursement of parents for fares paid for public transportation to a sectarian school constituted a prohibited use. But, however difficult it may be to find the line in marginal situations, this difficulty cannot properly be used to avoid constitutional proscriptions. There are clear cases as well as difficult ones.

To summarize, the broad principles are clear enough in the light of recent decisions. The first amendment does not require government to be hostile to religion, nor does it permit governmental discrimination against religious activities. The objective is neutrality, however difficult it may be to be neutral or to determine what neutrality requires in relation to particular factual situations. Zorach reaffirms that the State may not actively support a religious organization. On the other hand, it may, and perhaps under some circumstances must, temper

its secular requirements if religious observances conflict with them.[3] There is the consistent emphasis in the cases that public funds may not be used to finance religion and that public property may not be used to assist it. Yet, the decisions warn that a person may not be denied general public benefits on religious grounds without violating the first amendment and the due process and equal protection clauses of the 5th and 14th.

II

The judicial precedents

As earlier noted, prior to the decision in Everson, the Supreme Court had little occasion to consider the problem of governmental aid to religious schools. The right to attend such schools was clearly established in the 1920's (see *Pierce* v. *Society of Sisters*, supra; see also *Meyer* v. *Nebraska*, 262 U.S. 390 (1923); *Farrington* v. *Tokushige*, 273 U.S. 284 (1927)). The Quick Bear case, supra, had dealt with the unique problem of the use of Indian trust funds. The Cochran case, supra, had been decided before it had been determined that the establishment of religion clause of the 1st amendment operated upon the States by virtue of the due process clause of the 14th amendment.[4]

As indicated above, the controversy in the Everson case concerned a local school board resolution adopted pursuant to a New Jersey statute. This resolution authorized reimbursement to parents of expenditures for transportation of their children to public and Catholic schools on regular buses operated by the public transportation system. A taxpayer filed suit challenging this action of the school board. The court unanimously agreed that the due process clause of the 14th amendment embodied the "establishment of religion" prohibition contained in the 1st amendment. Five justices found that the statute involved did not constitute a "law respecting an establishment of religion." It should be emphasized, however, that all nine justices agreed that the clause prohibited governmental aid to religion; the disagreement turned, rather, upon whether the benefit was conferred upon the children or upon the parochial schools.

The most extensive discussion appears in the dissenting opinion of Mr. Justice Rutledge. On the basis of his evaluation of the historical materials and his view of the objectives of Madison and Jefferson, leading proponents of the amendment, he stated that—

"The amendment's purpose was not to strike merely at the official establishment of a single sect, creed, or religion, outlawing only a formal relation such as had prevailed in England and some of the colonies. Necessarily it was to uproot all such relationships. But the object was broader than separating church and state in this narrow sense. It was to create a complete and permanent separation of the spheres of religious activity and civil authority by comprehensively forbidding every form of public aid or support for religion. In proof the amendment's wording and history unite with this Court's consistent utterances whenever attention has been fixed directly upon the question" (330 U.S. 31–32).

He concluded, therefore, that the taxing power may not be used to give support to religious training or belief and that "transportation, where it is needed, is as essential to education as any other element"; and that it "is impossible to select so indispensable an item from the composite of the total costs, and characterize it as not aiding, contributing to, promoting or sustaining the propagation of beliefs which it is the very end of all to bring about" (330 U.S. 47, 48).

Justice Black, writing for the majority, adopted a similar view of the purpose of the first amendment. He stated:

"The establishment of religion clause of the first amendment means at least this: Neither a State nor the Federal Government can set up a church. Neither can pass laws which aid one religion, aid all religions, or prefer one religion over another. Neither can force nor influence a person to go to or to remain away from church against his will or force him to profess a belief or disbelief in any religion. No person can be punished for entertaining or professing religious beliefs or disbeliefs, for church attendance or nonattendance. No tax in any amount, large or small, can be levied to support any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion. Neither a State nor the Federal Government, can, openly or secretly, participate in the affairs of any religious organizations or groups and vice versa. In the words of Jefferson, the clause against establishment of religion by law was intended to erect 'a wall of separation between church and state'" (330 U.S. 15–16).

He concluded, however, that the State cannot deny any of its citizens the benefits of public welfare legislation because of their religion. He emphasized that much of such legislation (for example, that providing fire and police protection, etc.) incidentally benefits religious institutions, and that such benefits do not constitute proscribed support of the institutions. In this light he viewed the New Jersey statute merely as providing a program to get children, "regardless of their religion, safely and expeditiously to and from accredited schools." He therefore interpreted the purpose of the statute as a general, nondiscriminating one, designed to protect the health and safety of all schoolchildren. On this basis he was led to the conclusion that, while the New Jersey statute "approaches the verge" of impermissible action under the first amendment, it did not actually breach the "wall of separation between church and state."

The specific holding in the Everson case permitted the use of public funds to confer a limited benefit upon children attending religious schools.[5] Nevertheless, the language and reasoning of both the majority and minority gives scant comfort to those who feel that, as a matter of fairness, State support ought to be provided to those schools. Proponents of this view point out that religious schools meet the educational standards imposed by the States and relieve the States of the burden of educating large numbers of children. The parents of children attending religious schools are taxed to support the public schools, yet receive no reciprocal benefits from the States.

The majority opinion states that "no tax in any amount, large or small, can be levied to support any religious activities or institutions, whatever they may be called, or whatever form they may adopt to teach or practice religion." If one assumes that a principal reason for the existence of a religious school is to provide religious teaching and the practice of religion (not available in public schools), and that religious considerations are intertwined in the entire fabric of sectarian education, moneys raised by taxation cannot be used to support such education. Obviously then, direct grants to sectarian schools are prohibited. The only question remaining open is whether the use of funds for general welfare purposes in a manner which benefits religious schools also constitutes prohibited support.

Because the clear import of the Everson opinion was that neither the Federal Government nor the States can directly support religious schools, a concentrated attack was made upon its rationale. The focus of this attack was on the Court's reading of history; that, in fact, the purpose of the first amendment was merely to strike at the official establishment of a single sect, creed, or a religion, as exists in England, and that the amendment was not intended to prohibit nonpreferential aid to all religions.[6] This view has been vigorously argued by some scholars. For present purposes it is sufficient to note that it was presented to and considered by the Supreme Court in *McCollum* v. *Board of Education*, supra. While it might be argued that Justice Reed adopted this view in his dissent, it is plain that the eight other members of the Court rejected it. The question is not open today.

The McCollum case involved the constitutionality of the system of "released time" adopted in Champaign, Ill. Under an arrangement made with various religious faiths, representatives of those faiths were permitted to offer classes in religious instruction in the public schools. The classes were held once a week for 30 minutes in the lower grades and 45 in the higher grades. The teachers were not paid by the public school authorities, and the classes were attended only by students whose parents had requested it. Students who did not choose the program continued their secular studies in other classrooms. Justice Black, writing the opinion of the Court, stated that the arrangement was clearly prohibited by the holding in Everson:

"The foregoing facts, without reference to others that appear in the record, show the use of tax-supported property for religious instruction and the close cooperation between the school authorities and the religious council in promoting religious education. The operation of the State's compulsory education system thus assists and is integrated with the program of religious instruction carried on by separate religious sects. Pupils compelled by law to go to school for secular education are released in part from their legal duty upon the condition that they attend the religious classes. This is beyond all question a utilization of the tax-established and tax-supported public school system to aid religious groups to spread their faith. And it falls squarely under the ban of the 1st amendment (made applicable to the States by the 14th) as we interperted it in *Everson* v. *Board of Education*, * * *" (333 U.S., at 209–210).

He went on to state:

"Recognizing that the Illinois program is barred by the 1st and 14th amendments if we adhere to the views expressed both by the

---

[3] See, for example, the flag salute case, *Board of Education* v. *Barnette*, 319 U.S. 624 (1943).

[4] For this reason the Cochran case is dubious authority for the proposition that textbooks may be provided by a State to parochial school students. The crucial question of whether the establishment clause of the first amendment prohibits the expenditure of public funds for textbooks to be used by church school pupils was not presented to the Court in this case, and the Court therefore had no occasion to rule upon the question.

[5] Earlier this year the Supreme Court dismissed an appeal for want of a substantial Federal question in *Snyder* v. *Town of Newton*, — U.S. — 5, L. Ed. 2d 688 (1961), a case in which the Connecticut Supreme Court of Errors, on the authority of Everson, upheld the constitutionality of providing bus transportation to parochial school students. Justice Douglas, who had voted with the majority in Everson, and Justice Frankfurter, who had voted with the minority, both specially noted their votes to have the Supreme Court review the Connecticut decision.

[6] See J. M. O'Neill, "Religion and Education Under the Constitution" (1949). The use of the O'Neill thesis by counsel in the McCollum case is referred to in Pfeffer, "Church and State: Something Less Than Separation," 19 U. of Chi. L. Rev. 1, 2 (1951).

majority and the minority in the Everson case, counsel for the respondents challenge those views as dicta and urge that we reconsider and repudiate them. They argue that historically the 1st amendment was intended to forbid only Government preference of one religion over another, not an impartial governmental assistance of all religions. In addition they ask that we distinguish or overrule our holding in the Everson case that the 14th amendment made the 'establishment of religion' clause of the 1st amendment applicable as a prohibition against the States. After giving full consideration to the arguments presented we are unable to accept either of these contentions" (id., at 211).[7]

Zorach v. *Clauson*, supra, is the last case in which the Supreme Court has considered the "establishment of religion" prohibition. It also involved "released time." There the plan permitted students actually to be released from the public schools at their parents' request in order to obtain religious instruction elsewhere. The churches participating reported to the schools the names of children released from school who did not appear for religious instruction. In a 6-to-3 decision, the Court concluded that there was no element of coercion in the plan and that the only issue involved was whether public schools may excuse those who wish to worship or obtain religious instruction. The principles of the earlier cases were, however, carefully preserved. The Court stated:

"Government may not finance religious groups nor undertake religious instruction nor blend secular and sectarian education nor use secular institutions to force one or some religion on any person. But we find no constitutional requirement which makes it necessary for government to be hostile to religion and to throw its weight against efforts to widen the effective scope of religious influence. The Government must be neutral when it comes to competition between sects. It may not thrust any sect on any person. It may not make a religious observance compulsory. It may not coerce anyone to attend church, to observe a religious holiday, or to take religious instruction. But it can close its doors or suspend its operations as to those who want to repair to their religious sanctuary for worship or instruction. No more than that is undertaken here" (343 U.S. 314).

In separate dissents, Justices Black, Frankfurter, and Jackson said that since in effect the machinery of the State was being used to provide pupils to religious groups, the plan was constitutionally indistinguishable from that held invalid in McCollum.

The majority opinion, while emphasizing that ours is a religious Nation, with profound religious traditions affecting and intermingling with secular activities (id., at 313–314), does not abandon the basic view of the first amendment adopted in Everson and McCollum. The most that can be said is that the opinion evidenced a somewhat more flexible attitude toward problems of separation.

The State court cases which have been decided since Everson have interpreted that case and McCollum and Zorach as precluding use of public funds to pay tuition at sectarian schools. *Almond* v. *Day*, 197 Va. 419, 89 S.E. 2d 851 (1955), held that State payments to sectarian elementary and secondary schools for the education of war orphans violated the first amendment because such payments utilize—

"Public funds to support religious institutions contrary to the principles laid down in Everson. * * * It affords sectarian groups an invaluable aid in that it helps to provide pupils for their religious classes through use of the State's compulsory public school machinery. * * * It compels taxpayers to contribute money for the propagation of religious opinions which they may not believe" (89 S.E. 2d, at 858).

Swart v. *South Burlington Town School District*, 167 A. 2d 514 (Vt., (1961)), involved a school district which did not maintain a high school. Pursuant to statute the parents were permitted to choose schools, and the district paid the tuition. Under this plan it made tuition payments to Catholic high schools. The court read the Everson, McCollum, and Zorach cases as raising the following question, which it answered affirmatively:

"Does the payment of tuition to a religious denominational school by a public entity finance religious instruction, to work a fusion of secular and sectarian education?" (167 A. 2d, at 520).

The court, although noting that the district did not maintain a public high school, that the Catholic schools involved had been approved by the State board of education, and that non-Catholic students were not required to attend religious instruction, concluded, nevertheless, that the first amendment had been violated.

The foregoing two cases are the only State court decisions since Everson that have dealt with the payment of tuition to sectarian schools. Both hold such payments unconstitutional on the basis of that authority. Other State cases, however, have sustained payments to other types of sectarian institutions in specialized circumstances. Thus, payments for the support and maintenance of neglected and dependent children in denominational homes and institutions were upheld because they were considered as reimbursement rather than a use of appropriated funds prohibited by the State constitution (*Schade* v. *Allegheny County Institution District*, 386 Pa. 507, 126 A. 2d 911 (1956)). Payments to sectarian institutions have also been justified where the funds were used exclusively for public purposes and the institution merely operated as a conduit for those purposes. In Opinion of the Justices, 99 N.H. 519, 113 A. 2d 114 (1955), there was involved a proposed New Hampshire law which would have provided annual grants-in-aid to hospitals in the State offering nurses' training. This aid would have gone only to charitable hospitals, including sectarian ones which did not discriminate on the basis of the religion of either students or patients. Holding that the grant program would not violate either the first amendment or its New Hampshire equivalent, the court stated:

"The purpose of the grant * * * is neither to aid any particular sect or denomination nor all denominations, but to further the teaching of the science of nursing. * * * The aid is available to all hospitals offering training in nursing without regard to the auspices under which they are conducted or to the religious beliefs of their managements, so long as the aid is used for nurses' training 'and for no other instruction or purpose'. * * * If some denomination incidentally derives a benefit through the release of other funds for other uses, this result is immaterial. * * * A hospital operated under the auspices of a religious denomination which receives funds under the provisions of this bill acts merely as a conduit for the expenditure of public funds for training which serves exclusively the public purpose of public health and is completely devoid of sectarian doctrine and purposes.

"The fundamental proposition that public moneys shall be used for a public purpose only has not prevented the use of private institutions as a conduit to accomplish the public objectives" (113 A. 2d, at 116).[8]

The Everson, McCollum, and Zorach cases have also inspired a large body of scholarly comment. Appendix A is a representative bibliography of such comment. In appendix B we shall briefly describe some of the representative views contained in such comment.

III

The relevant criteria

The foregoing review suggests the relevancy of several considerations in determining the constitutional reach of the first amendment. The Supreme Court has made it absolutely clear that public funds and public property may not be used for the purpose of assisting any or all religions. In the Everson and McCollum cases, it has unequivocally rejected the historical argument, whatever its merits, that the establishment clause merely forbids State favoritism among religions.

The initial inquiry, therefore, must be whether a given legislative proposal is honestly designed to serve an otherwise legitimate public purpose and is not a mere subterfuge for religious support. Application of the test is not always easy. In the Everson case the majority characterized the New Jersey law as related to the health and safety of children—a legitimate public concern. It was likened to police and fire protection services, concededly legitimate benefits to religious institutions, incidental to the larger public interest (330 U.S., at 16–18). The dissenters viewed the statute differently. They pointed out that, contrary to the Court's interpretation, it discriminated against other private schools. And all four dissenting Justices characterized the statute as having the purpose of getting the child to school—an indispensable part of his education—rather than protecting his health and safety. Indeed, the characterization largely decided the case for both majority and minority. Justice Black for the majority suggested that once the characterization is made in his fashion, it might well be a violation of the 14th amendment and the free exercise clause of the first to discriminate on religious grounds.

This analysis is confirmed by McCollum where the Court forbade the use of public school facilities for religious instruction during "released time." Here there could be no possible public purpose except to assist and support religious education—a purpose the Court found proscribed by the first amendment.[9]

The existence of a bona fide legislative purpose does not, however, validate a measure irrespective of any collateral benefit that might be rendered to a religious institution. Assume a legitimate public purpose not explicitly or implicitly related to religious support, as in the concededly constitutional

[7] In his concurring opinion, Justice Frankfurter also made it clear that "the 1st and 14th amendments have a secular reach far more penetrating in the conduct of Government than merely to forbid an 'established church'" (id., at 213). Justice Jackson who, in a separate concurrence expressed doubts as to the standing of the complainant and the scope of the relief granted, concurred in this opinion.

[8] A similar early holding by the Supreme Court is *Bradfield* v. *Roberts*, 175 U.S. 291 (1899). There the Court held that the first amendment did not preclude the Commissioners of the District of Columbia from entering into a contract with an eleemosynary corporation organized by Catholic sisters for the construction of buildings to be operated as part of the hospital.

[9] In the McCollum case, the Court stated: "Here not only are the State's tax-supported public school buildings used for the dissemination of religious doctrines. The State also affords sectarian groups an invaluable aid in that it helps to provide pupils for their religious classes through use of the State's compulsory public school machinery. This is not separation of church and state" (333 U.S., at 212).

examples cited in Everson—police, fire, sewage, and (on Everson's assumptions) transportation. Could it properly be contended, for example, that since improving educational standards generally is a legitimate public purpose, any program which has that for an objective is constitutional irrespective of the establishment clause of the first amendment? If the objective is legitimate, are the benefits bestowed on religious schools always and necessarily "incidental"? We think not. The end cannot always justify the means. And where the means employed result in fact in support of religious institutions, the constitutional judgment cannot be avoided.

The problem area, then, is with regard to legislation which has a constitutionally legitimate public purpose but which at the same time has the additional side effect of benefiting a religious institution. This was the problem raised by Everson, and the difficulty of its resolution is evidenced both by the 5–4 division of the Court itself and the widespread comment it engendered. How is the line to be drawn between what is proscribed and what is permissible? Once a benefit to a religious institution is conceded, what are the relevant criteria for determining that it is merely "incidental"? What factors are to be taken into account and evaluated?

As Justice Douglas acknowledged in Zorach, we live in a culture and society in which religion has played and continues to play a vital role. It is not possible to separate religion completely from other aspects of life, and the Constitution does not require the impossible. There may be no wholly logical distinction between tax exemption of religious property and governmental grants to construct religious edifices. Yet the whole history of church and state and the constitutional policy embodied in the first amendment put tax exemption and grants at opposite poles.[10] Neither the majority nor dissenters in Everson could suggest an easy, workable rule of thumb against which to measure all governmental aid. But history, the language of the Constitution, the judicial decisions, and past practices do furnish an understanding of the criteria that are relevant to a judgment.

1. How closely is the benefit related to the religious aspects of the institution aided?

We are here concerned, as previously, with the underlying problem of distinguishing aid to the public generally, or general classes thereof, from aid to religion in particular. As the fire, police, and sewage examples indicate, churches and other religious institutions may receive benefits in their capacities as members of the general public and as property owners. The Constitution does not require that they be discriminated against or be excluded from a general class conceptually and factually unconnected with religion, i.e., property owners.[11] So, too, a church or church school may receive tax exemption when classified with others as nonprofit organizations. Again it meets the group criteria, and there is no constitutional obligation to exclude it from benefits common to the class. Similarly, it may be said validly that children, as such, constitute a class which is a proper object of general welfare legislation. The State has a legitimate concern with their health, their safety, and, indeed, their education. It may extend financial assistance in various ways to achieve these ends. But where this assistance is also assistance to a religious institution, the means become crucial. One horn of the constitutional dilemma is that the State may aid a child to achieve a sound body and a sound mind; the other is that: the State may not aid the religious instruction of a child.

To adopt without qualification the theory that whatever benefits the child is ipso facto constitutional is to ignore the obverse prohibition. It either proves too much or proves nothing at all. The crucial question then becomes separating the permissible from the prohibited, the educational function from the religious one.

The clearest case is across the board aid, which necessarily includes items of aid that are closely related to the religious function. No separation is even attempted, and therefore general State grants to sectarian education would seem to be plainly prohibited. Public schools have already been constitutionally prohibited from providing classrooms for religious instruction during released time at no measurable cost to the public purse. A fortiori the Government is prohibited from granting funds to sectarian schools which would, directly or indirectly, serve the same prohibited use.

Milk, school lunch, medical inspection and services, and such like do not raise substantial problems because they do not closely tie in with the religious function served.[12] The Supreme Court has put transportation in the same category. True, all such programs make the sectarian school more attractive educationally than it would otherwise be. But the Constitution does not require the State to handicap religious institutions or force parents to prejudice their children's health in exercising their constitutionally protected right to a sectarian education.

The same principle may, perhaps, be extended to textbooks for the use of individual students where the books in question are common to the secular and sectarian educational systems.[13] It might also be extended to some equipment, or possibly to facilities, designed for special purposes totally unconnected with the religious function of the schools.

How far this type of assistance, unquestionably of benefit to the sectarian school, can go cannot be conclusively stated. Unavoidably we are dealing here with matters of degree. State court cases indicate that it may be possible to make a tenable distinction between aid to sectarian hospitals and aid to sectarian schools.[14] The Supreme Court put transportation at the outer limits of the constitutionally permissible. Those who see no distinction between transportation and any other form of assistance whatsoever should keep in mind that, apparently, the Court did.

2. Of what economic significance is the benefit?

The spectrum of monetary benefits begins with an outright grant and moves through various loan arrangements to the most limited form of assistance, the contract for specified services.

The benefits of a grant are clear. Significant support is provided to the recipient. Moreover, the absence of any required repayment enables the recipient to free its own funds for any purposes, including those which directly support religious aspects of the institution.

A loan confers economic benefit of less degree but not of a different quality than a grant. A loan represents a grant of credit. When made at a rate of interest below what is normally available to the borrower, it also constitutes a grant of the interest payments which are saved. Whatever the interest rate, the lending of credit can be analogized to the lending of a classroom proscribed in the McCollum case. While the Everson case did talk about the expenditure of tax moneys as constituting the proscribed conduct, McCollum did not involve any expenditure, and, therefore, is closer to the loan situation. The lending of public property and the lending of public credit seem indistinguishable as forms of governmental assistance. And in the Zorach case, Justice Douglas, speaking for the majority, expressly stated: "Government may not finance religious groups. * * *" (343 U.S. 314). It is our view that the statement, admittedly dictum, was not confined to grant assistance.

It is also important to recognize that the measurement of economic value is not necessarily the same from the standpoint of the governmental donor and the private recipient. While a loan at slightly above the prevailing rate of Government borrowing might involve no economic loss from the standpoint of taxpayers, it might, nonetheless, be of measurable economic assistance to a private institution unable to secure reasonable credit from non-Government sources.

Also relevant is whether the assistance provided enables a private institution to free its own funds for unrestricted purposes. To the extent that this occurs, the economic benefit becomes the type of across-the-board assistance which inevitably assists religious purposes. Unless a grant is earmarked for a specific purpose which would not otherwise be undertaken by the recipient, a grant program is more likely than a loan program to have the effect of releasing funds for constitutionally impermissible purposes.

When the Government makes contracts for initiation of particular studies or grants for undertaking particular research, any benefit to a religious institution seems too remote to be constitutionally proscribed. Unlike an across-the-board grant for education or an unrestricted grant for classroom construction and teacher salaries, such programs are primarily to serve a special governmental interest, and the size of the fee or grant is closely related to the cost of the program. In such cases the religious benefits seem remote and incidental. Alternatives would require a preference to secular institutions which in many instances might be less well equipped to carry out the required research.

3. To what extent is the selection of the institutions receiving benefits determined by Government?

There is an important difference between governmental programs that aid institutions as such (including sectarian institutions) or aid them on behalf of all their students and, on the other hand, programs that aid a small number of selected students whose choice of institution alone results in benefit to a sectarian school. In the former case the aid to sectarian institutions is an automatic consequence of Government action; in the latter, it is a matter of chance so far as Government is concerned.

Under the original GI bill, each individual selected the institution he wished to attend, although the Government made the tuition payment directly to the institution. If the Government had selected the institution, however, it would obviously have presented a very different situation, and the mode of selection would have been more relevant than the identity of the payee of the Government check.

A program of financial aid to qualified students attending institutions of their choice to carry out a public policy of assisting unusually able students to develop their full potentialities, or to encourage study in

[14] See, for example, Opinion of the Justices, supra; cf. *Schade* v. *Allegheny Country Institution District, supra.*

subjects where there is a shortage of adequately trained persons to serve national needs, does not seem to raise a serious question. The support which a particular religious institution might receive would depend upon the student's choice and would seem, therefore, both indirect and incidental. From the governmental viewpoint it would depend upon chance, not governmental decision. There would seem to be no constitutional significance to the fact that, like other problems of probability, some statistical prediction might be possible of how much aid particular religious institutions might receive. Only if selective standards of eligibility of recipients were to be virtually abandoned so that all college students were eligible would the program appear a disguised method of assisting all colleges, including sectarian ones. Under such a system there would be no fundamental difference between the award of scholarships and direct payments to colleges on a per capita basis. A program so equivalent to direct subsidy would transcend, we believe, the constitutional prohibition.

Everson put some emphasis on who received the assistance, student or institution. From this it has been argued that while assistance to the institution itself is prohibited, assistance to the student is more likely permissible, even though, functionally viewed, a similar purpose is served. This view overstates the significance of form alone. We believe that who receives the benefit is important only where form serves a substantive end. The examples above illustrate that it is not simply the identity of the payee which is the determinant of constitutionality.

4. What alternative means are available to accomplish the legislative objective without resulting in the religious benefits ordinarily proscribed? Could these benefits be avoided or minimized without defeating the legislative purpose or without running afoul of other constitutional objections?

Within this category, where the constitutional significance of incidental religious assistance is discounted in part by necessity, one could include many of the traditional "benefits" received by church organizations; for example, police protection, fire protection, and sewage disposal, although these could also be justified by other criteria suggested above. The point is that protection of health and safety within the community cannot reasonably be accomplished without including religious institutions within the class of beneficiaries. Furthermore, to exclude religious institutions from the class benefited would probably be violative of the first amendment as tending to prohibit freedom of worship and of the due process clause as an unreasonable classification.

Another illustration of the criterion here applied lies in the employment of chaplains and the construction of churches and places of worship by the Armed Forces. The purpose of employing chaplains is related to the morale and discipline of the forces, and it is difficult to see how an army could effectively perform its military functions without making provisions for the moral welfare of the troops. In the context of military operations, this purpose can be effectuated only by active assistance on the part of the Government.

Conversely, to refuse to facilitate religious activities would be to throw the power of the Government against religion, not to maintain neutrality. To make it legally or factually impossible for a soldier to worship freely and to fail to adjust military necessity to religious freedom, within reasonable limitations, would itself be unconstitutional. Here, it seems, history and constitutional theory require cooperation of church and state not to breach, but rather to preserve, the "wall of separation." Soldiers may not be coerced into church attendance, but making church attendance possible cannot, under the facts of military organization, be constitutionally proscribed. And the difference between using public facilities within the armed services and permitting the use of public facilities in the released time school cases is found in the different demands of military life and the life of school children in a typical American community.

The Everson case itself provides an example, for once it has been determined that the legislative purpose relates to the safety and health of children, it is difficult to see how it could be accomplished without including all children.

One final example where the practicalities are relevant is the GI bill. The purpose of the bill was readjustment of veterans to civilian life by making it possible for them to continue their education. To have conditioned their benefits on attendance at a secular institution would have been impractical in view of the number of veterans and the limited educational resources available. In view of the short-range duration and urgency of the program, the construction of adequate additional facilities would have been impractical if not impossible.[15] Thus, the legitimate legislative purpose could not have been achieved by other reasonable means.

One cannot blink the difficulties of applying this criterion, nor do we suggest it is by any means conclusive. In some instances the support of religious institutions incident to a legitimate public policy may well be so direct and substantial that the policy itself may be legislatively unattainable despite the absence of practical alternatives.

One final argument made by proponents of governmental aid to nonprofit private schools should be mentioned. It has been suggested that the only criterion is whether or not the religious institution benefits qua religious institution or as a member of a more general class. This argument seems to be directly contrary to Everson and meets none of the criteria which we believe are determinative of constitutionality. This argument seeks to avoid the Constitution rather than to apply its terms as judicially interpreted. Benefits of some kinds may be conferred upon general classes, as earlier suggested—property owners, corporations, and nonprofit organizations—but we do not believe that the prohibition of tax-raised "support" of religious institutions can be circumvented merely by giving like support to other institutions, however numerous.

IV

Legislative programs and proposals

Against the authority and criteria already discussed, this section considers legislative proposals which have been introduced or which may possibly be seriously urged. These are (a) general educational grants to private nonprofit elementary and secondary schools; (b) general educational loans to private nonprofit elementary and secondary schools; (c) special purpose programs.

(a) General educational grants to private nonprofit elementary and secondary schools.

Federal grants to sectarian schools for general educational purposes would run squarely into the prohibitions of the first amendment as interpreted in the Everson, McCollum, and Zorach cases. Grants for assistance in the construction of general school facilities and for increasing teachers' salaries, to be administered by governmental agencies and made available directly to sectarian schools, are the clear case of what is proscribed by the Constitution. They meet none of the criteria suggested in the foregoing section. Indeed, if such grants would not violate the establishment provision of the first amendment as judicially interpreted, it is difficult to think of a form of Government aid which would. Aid by way of grants to sectarian schools could only be justified by a reversal of the Supreme Court's interpretation of the establishment clause and a new interpretation which would regard it as merely prohibiting discrimination among religions. Whatever its historical justification, this latter interpretation of the clause has been urged upon the Court in the cases cited and rejected by nine Justices in Everson and by eight in McCollum. While the tone of the Zorach opinion may imply a slight modification of the rigid separation doctrine espoused in McCollum, it is clear that it did not modify the Court's earlier interpretation of the establishment provision in any substantial way. Rather, the opinion reiterates the principle that Government may not finance religious institutions.

Since the Supreme Court has spoken, the only serious argument put forward against this conclusion rests more on considerations of fairness than of law. The argument is that, because sectarian schools meet all prescribed standards of education and because they contribute significantly to the education of American children, they should be entitled to governmental assistance. This argument is bolstered by stating that, in effect, the refusal to grant assistance to children attending such schools constitutes a discrimination against them incompatible with the spirit of the fifth amendment, and, viewed realisticaly, violates the mandate of the first amendment against prohibiting the free exercise of religion.

The difficulty with this viewpoint, apart from the fact that it has been consistently rejected by the courts,[16] lies in the fact that students attending such schools do so as a matter of free choice. If the choice is not "free" it is because of the religious beliefs of the individuals making the choice, not because of governmental edict. Since the public schools are open to all children without exception, it cannot be argued that constitutionally proscribed discrimination exists.

The prohibition embodied in the free exercise provision of the first amendment is only a prohibition against Government action which interferes with religious freedom. The Constitution does not require the Government to create conditions which make the free exercise of religion less burdensome financially.

(b) General educational loans to private nonprofit elementary and secondary schools.

---

[15] To have excluded from its benefits those veterans who, by conscience or preference, wished to attend sectarian institutions might conceivably have violated due process.

[16] In *Swart* v. *South Burlington Town School District*, 167 A. 2d 514, *supra*, the Supreme Court of Vermont forbade the payment of tuition by the school district for students attending a parochial school. In meeting the argument stated above, the court said (at pp. 520–521): "Considerations of equity and fairness have exerted a strong appeal to temper the severity of this mandate. The price it demands frequently imposes heavy burdens on the faithful parent. He shares the expense of maintaining the public school system, yet in loyalty to his child and his belief seeks religious training for the child elsewhere. But the same fundamental law which protects the liberty of a parent to reject the public system in the interests of his child's spiritual welfare, enjoins the State from participating in the religious education he has selected. See *Pierce* v. *Society of the Sisters*, 268 U.S. 510, 45 S. Ct. 571, 69 L. Ed. 1070, 39 A.L.R. 468.

"Equitable considerations, however compelling, cannot override existing constitutional barriers. Legislatures and courts alike cannot deviate from the fundamental law."

It has been suggested that even if grants to sectarian elementary and secondary schools are unconstitutional, long-term low-interest loans would not be. While we believe that loans constitute a less substantial assistance to religion than outright grants, we are persuaded by the decisions of the Supreme Court that this proposal is no less a form of support than grants and is equally prohibited by the Constitution. Loans are prohibited by the rationale of the Everson decision, and this conclusion is reinforced by McCollum, where the Supreme Court declared unconstitutional the provision of classrooms in a public school for religious instruction during "released time."[17] No measurable cost to the Government was involved in the use of such facilities, yet the Court held that the use nonetheless constituted assistance to religion by a governmental entity in violation of the establishment provision.

Low-interest across-the-board construction loans do provide measurable economic benefit to religious institutions. Moreover, there is a total failure in this proposal to distinguish between those aspects of a school which are involved with religious teaching and those which may not be. This combination of factors when applied to elementary and secondary schools places the proposal beyond the limits of permissible assistance.

(c) Special purpose programs.

The Federal Government at present engages in a wide variety of statutory programs that have some impact on sectarian educational institutions. It is significant that the great bulk of Government-supported programs is in fields of higher education. Examples are aids for specialized training; or research connected with national defense, public health, or improving educational methods; or loans for college housing facilities or to permit needy students to attend college. In all such programs no direct connection with religion is present,[18] and the funds in each case appear adequately separated from any religious function to stay within constitutional bounds.

Existing Federal programs at the elementary and secondary level are less extensive in number and size. Typically, such programs either bear a clear-cut relationship to children's health or promote a special purpose with a clear national defense implication. These programs are devoid of any substantial aid to the religious function, and such aid as might possibly occur is both remote and unavoidable.

To what extent a special purpose provides constitutional legitimacy to assistance to elementary or secondary schools depends on the extent to which the specific objectives being advanced are unrelated to the religious aspects of sectarian education. The problem is complicated because assistance for one purpose may free funds which would otherwise be devoted to it for use to support the religious function and thus, in effect, indirectly yet substantially support religion in violation of the establishment clause. At the present time, the National Defense Education Act permits the U.S. Commissioner of Education to make loans to private schools to acquire science, mathematics, or foreign language equipment. We believe such loans are constitutional because the connection between loans for such purposes and the religious functions of a sectarian school seems to be nonexistent or minimal. Furthermore, the money is loaned at one-fourth of 1 percent above the current average yield on all outstanding marketable obligations of the United States, thus avoiding characterization as more than a grant of credit.

There may be some other special purposes for which loans would be equally defensible, but any specific proposal would have to be evaluated against the criteria discussed above.

In considering whether an existing governmental program or a given proposal for new governmental action exceeds constitutional limits of assistance to a religious institution, no single criterion is necessarily decisive. And none of the criteria we have discussed affords precise units of measurement susceptible of easy application. Nevertheless, each criterion is an aid to judgment. What is least likely to be constitutional can readily be distinguished from what is most likely to be constitutional. In forming a judgment as to legislative proposals in the middle ground, all relevant criteria must be accorded due consideration. Ultimately a judgment is required—not a doctrinaire conclusion as to what should be done or should not be done, but a reasoned consideration of how an imprecise statement of fundamental constitutional principles is likely to be applied to each particular factual situation.

V

Higher education

This memorandum has discussed first amendment principles, relevant judicial decisions, and criteria for determining the constitutionality of specific legislative proposals all in the context of elementary and secondary education. Since proposals are currently being advanced in the field of higher education, it is appropriate to give consideration to the significantly different context in which any constitutional problem concerning these proposals might arise.

The constitutional principles involved are obviously the same whether the subject is elementary and secondary school education or higher education, but the factual circumstances surrounding the application of the principles are dramatically different. The reasons are largely historical.

The history of education in the United States at the grammar and high school level is largely one of free public schools. While private institutions exist and cannot be constitutionally prohibited, the fact of the matter is that some 85 percent of children in the United States are educated in public schools. The reason for this historically lies both in the public policy perceived in educating children and in the implementation of that policy by making education at the lower levels compulsory. In order to compel the education of children, States were obliged to provide a system of education which was open to all. In addition, it was prohibited to the States to teach religion or to give a religious education in such schools. Whatever other courses might have, in theory or even in fact, been possible, the States chose to implement their policy by a system of free public schools.

The history of college and university education is almost precisely the opposite. While from a relatively early date the Federal and some State governments subsidized State universities and colleges, the bulk of advanced education has until recently been carried on by private institutions, the majority of which have a religious origin.

Primary schooling has long been accepted as essential for every American child, and secondary education is rapidly becoming recognized as almost equally a necessity. Attendance at a university or college, on the other hand, has always been a matter of individual decision, dictated or influenced by the circumstances and preferences of the individual child and his family. Even today fewer than half of the high school graduates enter college on a full-time basis, and of these 41 percent are students in nonpublic institutions.[19]

Reflecting these differences in history and practice, State laws everywhere require school attendance of all children for a substantial period of years, whereas, needless to say, there is no corresponding requirement at the college level. Those children whose parents so elect may satisfy the compulsory attendance laws by attendance at private schools, but they are still subject to compulsion once that election has been made. The election can be reversed if the parents wish to do so—if not immediately, then at the start of the next school term or year—but while the election stands, the child is not absolved from enforced attendance at classes, secular or sectarian as the case may be.

The position of the college student is very different. His attendance is wholly voluntary, not merely a choice between alternative commands of the State. He is mature enough, moreover, to have made the decision to attend college and to select the institution best suited to his career objectives, or at least to have participated intelligently in those decisions. Furthermore, he can better understand the significance of sectarian as compared to secular teaching. At some sectarian institutions he is not required to study religion, but if he chooses to do so, or chooses an institution where religious instruction is mandatory, he is merely asserting his constitutional right to the free exercise thereof.

There are thus important differences between school and college, not only in terms of history and tradition but also in terms of the compulsory nature of attendance. There are differences, too, from the standpoint of the national interest involved. At the college and graduate levels the public institutions alone could not begin to cope with the number of young men and women already in pursuit of higher education, and expansion of these institutions or the creation of new ones sufficient to meet the expected increase of enrollment is out of the question. The effort which it is agreed must now be made in the field of higher education would, if confined to public institutions, force an ever more intensive selection of

[17] Although use of the pressures of the compulsory attendance laws was a factor in the decision, Zorach indicates that use of the school facilities tipped the balance.

[18] One seeming exception, more apparent than real, has been the aid given over a 5-year period by the National Institute of Mental Health under 42 U.S.C. 242a to three divinity schools to develop curricula for training clergymen in the recognition and understanding of mental illness. For the purpose of such aid, clergymen along with teachers and lawyers are looked upon as groups which frequently deal with individuals in personal difficulty. The development of training for such groups presents an opportunity to advance the practical utilization of psychiatric knowledge. Such aid would seem to fall, therefore, within the special purpose doctrine.

A more difficult case is the program for the disposal of surplus Government property which includes sectarian institutions. Certainly, measured by the criteria set out in this memorandum, this program has in some instances approached and, it can be argued, has even transgressed constitutional boundaries. In most such cases, however, the property disposed of did not directly benefit the religious programs and training in sectarian schools. In any event the general language, the long history in similar preceding programs, and the legislative acquiescence in such disposal make quite clear the intention of Congress that sectarian institutions not be excluded altogether from the benefits of the program.

[19] The U.S. Department of Health, Education, and Welfare, Office of Education, estimates that of those who graduate from high school 43 percent enter college on a full-time basis and 10 percent on a part-time basis. Of those who do enter, approximately 60 percent eventually graduate.

students and ever more concentrated effort to guide them into fields of study deemed important to the national defense and welfare. It would likely induce these institutions to overemphasize particular fields of study to the detriment of a balanced curriculum. Such warping of our educational policies is not to be contemplated lightly, and, to the extent that Congress finds it appropriate to encourage expansion of our university and college facilities, Congress must be free to build upon what we have, the private as well as the public institutions.

All these considerations indicate that aid to higher education is less likely to encounter constitutional difficulty than aid to primary and secondary schools. The same considerations apply even more forcefully to graduate and specialized education.

The administration bill to assist higher education authorizes loans to institutions, without distinguishing between public and private ones or between those under secular and sectarian sponsorship. It also provides for college scholarships awarded on a competitive basis. These scholarships may be used at any accredited college which the recipient selects. In addition, the bill provides for the payment to the college of a cost-of-education allowance to supplement the scholarship.

Governmental assistance directly to colleges for the construction and expansion of academic facilities perhaps raises, in the case of sectarian institutions, a closer constitutional question than scholarships. Fundamentally the distinction between assistance to sectarian colleges and assistance to sectarian elementary and high schools rests upon differences between the educational system which exists in the United States at the college and graduate school level and the predominantly free public educational system at the elementary and secondary school level. These differences create importantly different factual circumstances against which the criteria previously discussed must be considered to determine the constitutional question.

We are not, at the college level, dealing with a system of universal, free, compulsory education available to all students. The process is more selective, the education more specialized, and the role of private institutions vastly more important. There are obvious limitations upon what the Government can hope to accomplish by way of expanding public or other secular educational facilities. If the public purpose is to be achieved at all, it can only be achieved by a general expansion of private as well as public colleges, of sectarian as well as secular ones.

Loans for construction of facilities may be less constitutionally vulnerable than grants for the same purposes. But this distinction is not here the only one or perhaps even the crucial one. More important are the distinctive factors present in American higher education: the fact that the connection between religion and education is less apparent and that religious indoctrination is less pervasive in a sectarian college curriculum; the fact that free public education is not available to all qualified college students; the desirability of maintaining the widest possible choice of colleges in terms of the student's educational needs in a situation no longer limited by the necessity of attending schools located close to home; the extent to which particular skills can be imparted only by a relatively few institutions; the disastrous national consequences in terms of improving educational standards which could result from exclusion of, or discrimination against, certain private institutions on grounds of religious connection; and the fact that, unlike schools, the collegiate enrollment does not have the power of State compulsion supporting it.

All of the foregoing factors related to higher education are, of course, relevant to the scholarship grants. In addition, the decision as to which college is attended is entirely controlled by the student.

The additional cost-of-education grant paid to the institution is also, in effect, closer to a scholarship than a grant to support the institution chosen. Tuitions vary among colleges owing both to cost differentials and the size of endowment and annual private or public subsidy, but invariably the cost of education exceeds the tuition charged. It is to take account of this fact that the scholarship grant is supplemented by a cost-of-education allowance. In essence, it too is subject to the student's, not the Government's, educational choice.

The payment to the institution is in reality merely a supplement to the scholarship, no less valid constitutionally than the scholarship itself. To regard such payments as unconstitutional would make the question of who receives the payment the one decisive criterion and sacrifice substance to form.

Weighing all these factors, we conclude that the administration's proposals for higher education are within constitutional limits.[20]

VI

Judicial review

The constitutionality of existing Federal legislation which confers some incidental benefits upon sectarian educational institutions has never been tested in the courts. Federal spending legislation ordinarily carries no provisions for judicial review. In the absence of such provisions, the only challenges to spending legislation usually come in the form of suits by individual taxpayers. These litigants lack standing sufficient to sue in a court of the United States, and, where a party to a lawsuit lacks sufficient standing, there is no "case or controversy" which the Federal courts may decide. This requirement of a "case or controversy" is imposed upon the Federal courts by article III of the Constitution, and there appears to be no way in which legislation can dilute this requirement.

The Federal rule with regard to standing to sue on the part of a taxpayer was established in 1923 in the case of *Massachusetts* v. *Mellon*, 262 U.S. 447, and is significantly different from the position of a taxpayer in a municipality. In that case, Mr. Justice Sutherland distinguished the two positions as follows:

"But the relation of a taxpayer of the United States to the Federal Government is very different. His interest in the moneys of the Treasury—partly realized from taxation and partly from other sources—is shared with millions of others; is comparatively minute and indeterminable; and the effect upon future taxation, of any payment out of the funds, so remote, fluctuating and uncertain, that no basis is afforded for an appeal to the preventive powers of a court of equity" (262 U.S. 487).

The Federal courts are similarly barred from considering an appeal from a State court where a taxpayer's interest is not substantial (*Doremus* v. *Board of Education*, 342 U.S. 429 (1952)).

Because of the rule in *Massachusetts* v. *Mellon*, existing Federal aids to education have presumably been immune to attack in the courts on the ground that they violate the Constitution. There is, therefore, no significance to be attributed to the fact that the existing programs have not been litigated. We can regard them as precedents only for what the Congress and the President, not the Supreme Court, regard as within the first amendment.

If Congress wishes to make possible a constitutional test of Federal aid to sectarian schools, it might authorize judicial review in the context of an actual case or controversy between the Federal Government and an institution seeking some form of assistance.

For example, Congress could direct the Commissioner of Education to make some benefit available to private schools with a requirement that such benefit shall not contribute to an establishment of religion or prohibit the free exercise thereof. The same legislation would also provide for a hearing on a written record of any application rejected and a statement of findings by the Commissioner. The Commissioner's decision rejecting any application for a benefit would be made subject to judicial review. If the Commissioner were to reject the application of a sectarian school on the ground that extending the benefit would violate the statutory provision embodying the prohibition of the first amendment, the applicant could then in effect litigate the constitutional question in court.

In the absence of some such statutory provisions, there appears to be no realistic likelihood that Federal legislation raising the constitutional issues discussed in this memorandum will be resolved by judicial decision.

ALANSON W. WILLCOX,
General Counsel, Department of Health, Education, and Welfare.

Appendix B

Description of some representative comments on the Everson, M'Collum, and Zorach cases

The views of the scolars who have commented on the Everson, McCollum, and Zorach cases fall roughly into three categories: (1) The view that an inflexible doctrine of separation has the effect of restraining religious freedom in violation of the first amendment and that the holding in Everson was correct as far as it went and logically should be extended to permit governmental aid to children attending sectarian schools; (2) the view that the separation must be absolute and that Everson was therefore incorrectly decided; and (3) the view that there is room for cooperation between church and state so that governmental aid for education is not invalid because sectarian schools receive incidental benefits, provided that the aid is aimed at achieving a broad public purpose.

1. The view that extensive Federal aid is constitutionally permissible: At present there are about 6,752,000 elementary and secondary school pupils in nonpublic schools.[1] Of these more than 80 percent are in Roman Catholic schools.[2] Confronted by rising costs in the economy generally and in education specifically, Catholic parents contend that in effect they are subject to double taxation. Although some Catholic spokesmen disclaim any attempts to obtain general public support of religious schools because they believe it may endanger religious liberty and hence would be satisfied with long-term, low-interest loans,[3] there are others who would like to see far more pervasive Federal aid to sectarian schools and the child-benefit theory extended to include aid either to the sectarian institution itself or to the parent.

For example, Professor Weclew is of the opinion that as from the standpoint of public welfare no distinction can be drawn in Federal aid to education between the university and elementary school levels.[4] He said: [5]

"Health, emotional stability, and literacy come more and more to be recognized as community assets in which government has a vital concern. These assets should be developed and not simply ignored as far as private schools are concerned because parents exercise their constitutional right to send their children to religious schools. Programs promoting these matters of vital concern when set up in religious schools leave the State and children as beneficiaries, and the religious schools only benefit incidentally."

After enumerating various programs under different acts of Congress which have provided assistance both to sectarian institutions and to the individuals utilizing sectarian institutions, Weclew concludes: [6]

"We can only conclude that the wall of separation is permeable, lacks definite boundaries, and is of uncertain height. Time, place, circumstances, and subject matter determine what degree of separation there shall be. There are areas where none will deny that the maximum degree of separation is best for all. There are areas where separation is unnecessary, undesirable, or impossible."

The opinion frequently expressed by the supporters of all-out aid to parochial schools is that the existing restrictive system actually operates to abridge the first amendment's guarantee of freedom of religion. They say that where the Catholic parent has no real choice under existing laws but to violate his conscience because compelled by economic pressures to send his children to a public school, then the law has fallen short of protecting religious liberty for all—poor and rich alike.

---

[1] U.S. Department of Health, Education, and Welfare, Office of Education: "Projected Enrollments in Full-Time Public and Nonpublic Elementary and Secondary Day Schools." The figure for nonpublic schools is 15.2 percent of the estimated total of schoolchildren, kindergarten through grade 12, there being approximately 37,551,000 children in public schools. The total estimated enrollment, public and nonpublic, is 44,303,000.

[2] Based on data from "Summary of Catholic Education 1959," National Catholic Conference, Department of Education, Washington, D.C., which states that the October 1959 enrollment in Catholic elementary and secondary schools was 5,087,197. When projected this indicates 1960–61 enrollments in the neighborhood of 5,240,000.

[5] Id., 21.

[6] Id., 26.

This view, vigorously espoused by Professor Henle,[7] is as follows:

"We cannot, as Americans, simply say that this religious scruple is their own affair; that they may come to the public schools if they want aid, but, if they choose not to do so, that's their own affair. This religious conscience is one of the factors in the case and must be taken into account by the Government. Religious liberty and the prohibition of religious qualifications are meaningless unless they relate to the precise peculiarities of each type of conscience. Hence, our courts have shown a punctilious and precise concern to protect the consciences even of minorities commonly regarded as extremists" (p. 245).

"It might be said that the economic pressure is no concern of the State. Yet, it is our concern as Americans not to render lip service to an abstract religious liberty, but to work it out and safeguard it 'n the concrete. As a matter of fact, in the area of labor law, the courts have recognized 'economic pressure' as destroying any real choice when it is actually present. If, in the factual situation, there is no real choice, under the law, except to violate one's conscience, then the law is not safeguarding religious liberty. And this is the worst form of religious discrimination, because it allows true religious liberty only to those who can afford it. American ideals demand an arrangement which will allow religious liberty for each man's conscience, for Catholic, Protestant, Jew, and unbeliever, for rich and poor alike" (p. 248).

Under Henle's theory, State aid should be made available to parents whose children go to sectarian schools in the same way as it is to those parents whose children go to public schools.

He says:

"We are thus faced with this practical situation: American ideals and principles demand that the educational aid, intended to be made available to all through the public school, should actually be made available to all American children whether they attend a public school or, for reasons of conscience, a religious school. The Lutheran parent or child, the Catholic parent or child, the Seventh Day Adventist parent or child, and so forth, who need and want this aid, are entitled to an equivalent share of public aid from the funds to which they also contribute under the law" (p. 248).

Under Henle's views, a precedent is the program of veteran's educational benefits, except that he would permit the choice of school to be made by the parent rather than by the student:

"In a similar manner we could work out a plan envisioning the child or parent as the beneficiary of all funds collected for educational purposes; if the parent selected the public school the funds can be made available through the public school; if, for conscience reasons, the parent selected a religious school, the fees (to a fair amount) could be paid in the name of the child or parent and in view of the education, not of the religious functions of the institution" (p. 251).

Cast in somewhat different language, the argument for "proportionate aid" to sectarian schools is that the general welfare clause of the Constitution (art. 1, sec. 8), which is the basis for Federal aid to education, should not be construed as requiring religious considerations as a standard for inclusion or exclusion of beneficiaries. In this connection, Professor Costanzo says: [8]

"Federal aid to education which excludes religious schools from its beneficiaries precisely because of their religious profession and affiliation may place Congress in the incongruous role of promulgating a law prejudicial to the 'free exercise thereof' clause; of establishing a preferential status for a secularized education as more worthy of its benefits then religious education, and find itself in the unenviable position of constructively setting a religious test as a norm for inclusion amongst the beneficiaries in the exercise of its general welfare powers, and, lastly, allow, if not actually intend, that exercise of religious liberty in education becomes a liability before the law in the disbursement of the benefits of the law. This would convert the 'no establishment' clause into an affirmative official action in favor of nonreligious education."

2. The view that absolute separation is constitutionally required: A leading exponent of the absolute separation doctrine is Leo Pfeffer whose book, "Church, State and Freedom" (1953), is widely known and cited. Pfeffer draws heavily on the dissents of Justices Jackson and Rutledge in the Everson case in challenging the conclusion reached by the majority of the Court that by furnishing bus transportation to pupils attending sectarian schools, the State is doing no more than it does when it provides police protection for children crossing the street or when it supplies fire protection:

"It is submitted that both these assumptions rest on fictions. As both dissenting opinions, by Justices Jackson and Rutledge, point out, the New Jersey statute and the Ewing resolution do not provide transportation for children on the streets; they provide transportation only for children going to school, either to a public school or to a Catholic parochial school. A child going to visit a neighbor or to a motion picture theater is just as much subject to the hazards of the road as a child going to school. Yet New Jersey did not make any provision for the transportation of children going to any destination other than school—public or parochial. If New Jersey had so provided, none would dispute that the purpose of the legislation was to provide welfare benefits—indisputably within the State's police power. Since it was restricted to school transportation, it would seem clear that the purpose of the legislation was to provide an educational service.

"It would therefore seem fallacious to equate—as Justice Black did—bus transportation and police or fire protection. The purpose of supplying traffic police is to protect children from accidents; all children are protected, Catholics and Protestants, believers and nonbelievers. The purpose of supplying fire protection is to preserve society's economic assets, whether in the form of church buildings or burlesque theaters. But the purpose of supplying bus transportation is to get children to school, not (at least, primarily) to protect them from traffic hazards." [9]

So too, Pfeffer finds strong support in Justice Jackson's dissent in Everson in his (Pfeffer's) opposition to the argument that Catholic parochial schools provide the secular education which the State is empowered to provide. In the same vein, Pfeffer says: [10]

"These authoritative church writings leave little doubt that the education received in Catholic parochial schools is not the secular education which a State may constitutionally provide or pay for."

In Pfeffer's view, if reimbursement for bus transportation may be justified under the State's police power to provide for the welfare of children, so may other expenditures of a similar character: fireproofing sectarian schools; repair of unsafe walls and ceilings, their replacement, and the like.[11]

Despite his strong views respecting various aspects of parochial education, Pfeffer, as well as others in the "absolute separation" school, is able to distinguish the assistance discussed above from the aid rendered by a State in providing free medical and dental services or free hot lunches to children in parochial schools:

"These are not educational services but true welfare benefits. A child needs medical and dental care and hot lunches, whether he goes to a public school, to a parochial school, or to no school at all. But he does not need transportation to a school unless he receives instruction at that school; and only in that case is his safety and health protected if the school building is fireproof and the rooms warm and ventilated." [12]

Professor Konvitz of Cornell University may be considered as another advocate of absolute separation. He has tried to answer the arguments of Father Wilfred Parsons [13] that parochial schools, insofar as they satisfy Government standards for the teaching of secular subjects, should receive financial support to pay the costs of those teaching these subjects. The thrust of Konvitz's argument is that under official Catholic doctrine all the teaching and the whole organization of the school, including teachers and books, are under the supervision of the church; that religion is the foundation of the student's training not only in the elementary school but in the intermediate and higher institutions of learning as well.[14] It is from education in the parochial school that there springs Catholic growth, cohesion, discipline and loyalty. Konvitz says:

"When this official philosophy of Catholic education is considered, it becomes clear why any form of public aid to parochial schools is a violation of the Constitution, a breakdown of the separation of church and state.." [15]

Konvitz concedes, as Father Parsons suggests, that Americans may not be logical when they refuse public aid to parochial schools yet recognize them as fulfilling the requirements of compulsory education. But Konvitz asserts "the departure from a narrow logic has been in the interests of a broad liberty. * * * Just as 'complete separation between the state and religion is best for the state and best for religion', so, too, the liberty of religious groups to maintain their own schools is 'best for the state and best for religion.'" [16]

In accord with some of the views advocating "absolute separation" are various articles prepared by the editorial staffs of the law reviews. One in the University of Pennsylvania Law Review says: [17]

"The strictest limitation upon governmental aid to religious institutions is required by the language, the historical content and the present validity of American constitutional provisions. The principle is clear and undisputed that formal interrelation of church and state institutions is prohibited by the letter and spirit of these provisions. Once established, the principle should be preserved intact against indirect as well as direct abridgement. To support the doctrine of separation is not to advocate irreligion but to maintain institutionally a separation of functions the fusion of which

[16] Id., 59. This is similar to Justice Jackson's view in Everson. See 330 U.S. 27.

[17] Note, "Public Aid to Establishments of Religion", 96 U. Pa. L. Rev. 230, 240–241 (1947).

has invariably destroyed the usefulness of both institutions according to democratic standards.

"The Everson case indicates that a court appraising auxiliary services like transportation to sectarian schools in terms of a present danger of substantial inter-control of church and state may circumvent the restriction. Logically, however, if such services are public functions justifying state support, then the public welfare feature of sectarian education itself provides an even stronger claim to state support; but there is no judicial dissent from the view that such direct support is proscribed by both Federal and State constitutions.

"The use of governmental authority, financial or persuasive, to aid or hinder religious institutions directly or indirectly should be prohibited under the establishment clause of the first amendment."

Another article emphasizes that it is not easy to seal the wall between church and state once it has been pierced in the name of the public welfare: [18]

Teaching of nonreligious courses in religious schools, and the standard of such instruction, is certainly for the public interest—cannot the State then pay to that extent the salaries of religious teachers? * * * Physical fitness of American youth is a matter of public concern—can the State not, under the Everson case, build gymnasiums and furnish nurses to parochial schools? * * * The majority opinion in the Everson case suggests no line which would be drawn. It serves but one purpose—to enunciate a doctrine which amounts to a tool for the circumvention of the absolute prohibition against establishment of religion in the first amendment."

3. The "intermediate" position: In contrast to the two positions discussed above, there is considerable sentiment among legal scholars for a more moderate position which it is claimed would strike a fair balance between competing interests.

Professor Katz of the University of Chicago Law School originally suggested that, in order to protect the freedom of parents in their choice of schools, a tax deduction of some kind for tuition paid to such schools would be permissible but that affirmative aid to religion should be avoided.[19] He would now go further in the use of tax funds for religious schools upon the theory that the use thereof is not really aid to religion but rather chiefly aid to education, so long as the State's standards for education are satisfied by the religious schools. He says:

"If one assumes that the religious schools meet the State's standards for education in secular subjects, it is not aid to religion to apply tax funds toward the cost of such education in public and private schools without discrimination. Like the dissenters in the busfare case, I am not now able to distinguish between the minor payments there involved and payments for educational costs. I believe, therefore, that none of such nondiscriminatory uses of tax funds are forbidden by the first amendment."

He admits, however, that his position would be a most unpopular one generally and be subject to attack upon various grounds: [20]

"The widespread rejection of the position just defended may be explained in a number of ways. It may reflect a general bias in favor of Government operation for any activity which is to be supported with tax funds. It may reflect a specific bias in favor of public education with only grudging concession of freedom for private schools. It may reflect skepticism as to the quality of education in religious schools and as to the feasibility of enforcing standards. It may reflect distrust of the position of the Roman church as to religious liberty. It may reflect a conviction that the problem is too explosive to be left to ordinary political processes and that the usual principle of State neutrality must, at this point, yield to a principle of absolute and hostile separation."

Prof. Robert F. Cushman believes that since the Everson decision the problem of aid to sectarian schools is cast in a different light: [21]

"It becomes clear that the crucial issue is not aid to the child against aid to the school; it is not even the question of whether religion is being aided; the real question is, as it has always been, How do you distinguish aid to the public in general from aid to religion in particular? Religion does and should, as part of the public, share in the benefits extended to the public in general. To hold otherwise is to adopt a position which would permit the State to make of religion an outlaw having no rights which the law is bound to protect. The question then is, Under what circumstances and in what way do religious institutions become part of the public in general?

"The difference between providing police protection and providing teachers does not lie in the identity of the beneficiary but in the way in which the aid is extended. Aid is not normally extended to individuals or institutions by name, but rather to groups or classes of individuals or institutions. Any individual or institution falling under the restrictions of the law, or falling heir to its benefits, does so only as a member of such a group. An individual may be a pupil, a pedestrian, a property owner, and a parent. A church is at once a corporation, a piece of property, a building, a meeting place, a religious institution, and a nonprofit institution. Furthermore, a church may receive police protection when classed as property, tax exemption when classed as a nonprofit institution, sewage connections when classed as a building, and yet be denied financial aid when classed as a religious institution, since such a class may not validly be given public aid. Since the aid goes to groups rather than the individual components of any one group, the eligibility of an institution to receive public aid would seem to depend on which group it is classed in, rather than on its individual characteristics" (p. 348).

"The Constitution, according to the Court, does not forbid all aid to religious institutions. They may receive fire and police protection. What the Constitution forbids is aid to the religious function, and the Court in the Everson case divided over the question whether this function was in fact being aided. This being the case, if a State wished sincerely to protect the safety of its children, it could set up children's buses on which any child could ride, whether going to a parochial school or to the movies. To insure the health of its children it could provide free lunches, dental, and medical care for all children. To improve their minds and morals it could provide free books, museums, and libraries. These aids would be available to all children regardless of the school they attended, or whether or not they attended school. The aid would truly be to children (a group which the State may validly aid) irrespective of the religious activity of the individual concerned" (pp. 348–349).

Under Professor Cushman's view, constitutional questions would be avoided through legislation which would provide aid for all children of the State, without earmarking it as assistance to children enrolled in schools, both public and religious:

"When, however, the State undertakes to aid just pupils and schools it is no longer aiding all children and all buildings. It is aiding only those identified with the function of institutionalized education, since pupils and schools are groups set up for the sole purpose of identifying certain children and institutions with the function of education. Aid to these groups, then, becomes aid directly to the function for which they are set up. Where schoolbuses are extended to schools, or pupils, they are in aid to the function of education. Where this includes parochial schools and pupils this becomes aid to the function of religious education" (p. 349).

"As the majority in the Everson case pointed out, a State cannot aid religion, but it cannot be denied the right to aid all its children even though some of them attend religious schools. A State statute so drawn as to provide aid to all children as a group, regardless of what that aid might be, would be exceedingly difficult to attack on constitutional grounds as an aid to religion. Thus, a State which provided medical service and books to all the children in the State would be virtually assured of the validity of its action. Where, however, a State limits its aid to children enrolled in schools, and this includes both public and religious schools, it lays itself open to the charge that it is aiding two kinds of education, secular and religious, and religious education is something which the States are forbidden to aid" (p. 349).

Still another approach has been advanced by Judge Fahy. After citing various precedents, both judicial and legislative, he said: [22]

"Consistent with these views on the place of religion in our national life is the established rule that public funds may be used to pay for services rendered, notwithstanding the fact that the payment is to a religious organization. It is immaterial that tax-raised funds are paid to these individuals or organizations by way of reimbursement for money spent by them in furtherance of a public program. Illustrations of existing or possible arrangements of this type include payments by local governments to denominational hospitals, conducted by religious orders or otherwise, for medical services rendered to those entitled to receive such service at public expense; and expenditures by the Federal Government toward the construction of or additions to denominational hospitals, under the Hospital Construction Act.

"The same concept has been applied in the field of education. Federal Government payments to a denomination college for teaching or training draftees or veterans, even including training for the clergy, is authorized by the GI bill of rights."

A Student Note in the Yale Law Journal suggests other standards for achieving a fair and valid result in borderline cases. It was said: [23]

"One method of qualifying the Everson absolute throughout would be to balance the public benefit in each instance against the aid to religion. Inculcation of moral principles, for instance, may well be found to outweigh the sectarian nature of New York 'released time' or religious exercises, even though insufficient to qualify as a full-fledged 'public purpose' of the Everson variety."

[23] Note, "Tracing the 'Wall': Religion in the Public School System," 57 Yale L.J. 1114, 1121 (1948).

Based upon the dissent of Justice Reed in *McCollum* v. *Board of Education*, supra, at 248–249, that the Everson decision did not intend to preclude religious bodies from receiving incidental advantages which other groups similarly situated obtain as a by-product of organized society, the Yale Law Review Note continues: [24]

"Even more far-reaching is the method suggested in Mr. Justice Reed's dissent, which would remove the need for any propitiating justification where the 'aid' was merely a 'byproduct of organized society' and not 'purposeful assistance directly to the church itself or to some religious group performing ecclesiastical functions.' Such a modification would transcend piecemeal exceptions by shifting the entire wall to a position where practices involving no direct expense to the State, such as 'released time' and the use of public buildings for sectarian meetings, could easily be sustained. And direct expenditures, which theoretically are barred by the precept that no tax whatever can be constitutionally 'levied to support religious activities,' could be validated by a parallel definition of the word 'support.' While this approach was not specifically negated by the majority or concurring opinions, the 8–1 decision over Mr. Justice Reed's dissent indicates that the Court would be reluctant to relax its Everson prohibition to such an extent. The essence of this concept, however, might well be accepted in diluted form by construing State 'neutrality' towards religion, which technically seems to save only those benefits in which all share, broadly enough to uphold desirable types of insignificant aid which could not be logically sustained on less drastic grounds."

FEDERAL PRORGAMS UNDER WHICH INSTITUTIONS WITH RELIGIOUS AFFILIATION RECEIVE FEDERAL FUNDS THROUGH GRANTS OR LOANS

Attached is a description of Federal programs under which educational institutions with religious affiliation receive Federal funds through grants or loans. The following should be kept in mind in using this material:

1. Payments to institutions for which the United States receives a quid pro quo in a proprietary sense are outside the scope of the attached listing. However, Federal programs are so diverse that a clear line in this respect is not always possible, and many programs, not listed here because the Federal Government receives such a quid pro quo, are frequently of benefit to institutions.[1]

2. Programs to pay institutions for training Government civilian or military personnel are not included here. See, for example, 5 U.S.C. 2301 for a Government-wide employees' training program.

3. Except as noted under item 3 of the description of programs of the State Department, and in the case of payments for the education of Indian children, institutions with religious affiliation participate in all of the programs listed.[2]

---

[24] Id., 1121.

[1] 42 U.S.C. 1891–1893 provides that authority to contract for basic scientific research at nonprofit insitutions of higher education shall be deemed authority to make grants for that purpose. Furthermore, authority to make grants or contracts for basic or applied research at such institutions provides authority to vest in the institution title to equipment purchased with grant or contract funds, without further obligation to the Government.

[2] No statute has been found where authority to deal with nonpublic institutions excludes dealing with those with religious affiliation, except 25 U.S.C. 278, 279. That law declares "the settled policy of the Government to make no appropriation whatever out of the Treasury of the United States for education of Indian children in any sectarian school." Subsistence and clothing are provided for some children in such schools.

25 U.S.C. 280 authorized the Secretary of the Interior to issue a patent to religious organizations for lands used by them prior to Sept. 21, 1922, for mission or school purposes.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Office of Education

A. National Defense Education Act programs.

1. National defense student loan program (NDEA (Public Law 85–864), sec. 201 et seq.; 20 U.S.C. 421 et seq.): Funds are made available by the Commissioner of Education under title II of the National Defense Education Act to enable public and private, nonprofit institutions of higher education to make low-interest loans to needy students.

The Federal Government advances up to 90 percent of the capital needed for a loan fund at an institution.[3] In any fiscal year, the Federal capital contribution at any institution may not exceed $250,000. The loan to an individual student may not exceed $1,000 for a fiscal year and no student may borrow more than $5,000 for all years. Special consideration must be given in providing loans to students with superior academic backgrounds who express a desire to teach in elementary or secondary schools (not necessarily those which are public) and students with strong academic backgrounds in science, mathematics, engineering, or a modern foreign language, but other students may also receive loans. Each note must provide that up to 10 percent of the loan (plus interest) will be canceled for each year of service as a full-time teacher in a public elementary or secondary school, but not more than 50 percent of a loan can be canceled in this manner.

2. National defense fellowships (NDEA (Public Law 85–864), sec. 404; 20 U.S.C. 464): Graduate programs in institutions of higher education are given quotas by the Commissioner of Education for the award of graduate fellowships. The Commissioner awards 1,500 fellowships per year for periods of study in such programs, not in excess of 3 academic years. The individual receiving the fellowship receives $2,000 to $2,400 per year, depending on the year of study, plus an allowance for dependents. In addition, the institution which the individual attends receives the portion of the cost attributable to such individual's study not to exceed $2,500 per fellowship holder per academic year.

3. Loans to nonprofit private schools (NDEA (Public Law 85–864), sec. 305; 20 U.S.C. 445): Title III of NDEA is designed to strengthen science, mathematics, and modern foreign language instruction in elementary and secondary schools. The title contains provisions for grants to strengthen State supervisory services for public elementary and secondary schools and for grants to enable public elementary and secondary schools to acquire science, mathematics, and modern foreign language equipment (and to remodel space used for such equipment).

Twelve percent of each appropriation for the acquisition of science, mathematics, or foreign language equipment (or minor remodeling of space for such equipment) is required to be allotted by the Commissioner of Education for loans to private, nonprofit, elementary and secondary schools. Affiliation or nonaffiliation with a religious organization is immaterial. The loans are authorized to enable the borrowing school to acquire equipment of the types referred to above (and do minor remodeling) and must bear interest at one-fourth of 1 percent above the current average yield on all outstanding marketable obligations of the United States, adjusted to the nearest one-eighth of 1 percent. Such loans must mature within 10 years.

4. Testing students in secondary schools (NDEA (Public Law 85–864), sec. 504(b); 20 U.S.C. 484(b)): Under title V of the National Defense Education Act, grants to State educational agencies may be used, among other things, for testing students in secondary schools, public or private. The Federal participation through the State grant is one-half the cost of such testing. The section cited above provides that in any State with an approved State plan which is not authorized by law to pay for the cost of testing students in one or more secondary schools, the Commissioner of Education shall arrange for the testing of such students and pay one-half the cost thereof (for the first fiscal year of the program the payment for testing was the full cost). In carrying out this provision during the 1960–61 school year, the Commissioner arranged for testing students in private secondary schools of 40 States. (For purposes of the act the Virgin Islands, Puerto Rico, the District of Columbia, and Guam are treated as States).

The provision for the Commissioner to arrange testing was inserted in the law because of the knowledge that in some States the State educational agency would not have authority to make payments toward the testing of students in nonpublic schools, particularly those with religious affiliation.

5. Institutes for training secondary school counselors and institutes for training modern foreign language teachers (NDEA (Public Law 85–864), secs. 511, 611; 20 U.S.C. 491, 521): The Commissioner of Education is authorized to contract with institutions of higher education for summer and regular academic year training programs to improve the qualifications of counselors in secondary schools and modern foreign language teachers. The teachers from public, sectarian or any other types of private schools receive the opportunity for training without tuition costs. However, the act authorizes the Commissioner to pay a stipend for subsistence only to those who are to teach in public schools.

Although the instruction is conducted under a contractual arrangement pursuant to statute, it is included in this listing because the effect is very similar to that of a grant. The contract finances educational services by which the participating institutions serve a segment of people whom it would be their normal function to train.

6. Language and area centers (NDEA (Public Law 85–864), sec. 601(a); 20 U.S.C. 511 (a)): The Commissioner of Education is authorized to arrange through contracts with institutions of higher education for the establishment and operation by them of centers for the teaching of certain modern foreign languages and studies related to the cultures in which such languages are used. The languages are confined to those for which trained individuals are needed in business, government, or education. While the statute authorizes only contracts for payment of one-half the cost, the program has all the earmarks of a grant situation.

7. Language fellowships (NDEA (Public Law 85–864), sec. 601(b); 20 U.S.C. 511(b)): The Commissioner of Education is authorized to pay stipends to individuals undergoing advanced training in any modern

[3] The Commissioner may make loans to institutions to help them finance their required 10 percent advance to the loan fund, where such funds cannot be secured from non-Federal sources upon terms and conditions deemed reasonable by the Commissioner. The term is up to 15 years with interest at such rate as the Commissioner determines will cover all costs to the Government, including probable losses.

foreign language with respect to which he determines there is a special need in business, government, or education. No payment is made to the institutions of higher education, although the stipend is so computed as to include an amount which will enable the individual to meet his tuition and subsistence needs.

8. Foreign language research (NDEA (Public Law 85–864), sec. 602; 20 U.S.C. 512): The Commissioner of Education is authorized to contract for studies and surveys relating to the need for improved instruction in modern foreign languages and research in effective methods of improving such instruction. While the statute provides for a contractual arrangement, the program has many of the attributes of a grant situation.

9. Research and experimentation in more effective utilization of television, radio, motion pictures, and related media (NDEA (Public Law 85–864), sec. 702; 20 U.S.C. 542): In carrying out his authorization to make grants or contracts for research, experimentation, and dissemination of information in the development of methods for utilizing new media of communication for educational purposes, the Commissioner of Education has frequently paid for research, experimentation, and dissemination activities of institutions of higher education without regard to religious affiliation.

B. Grants for teaching in the education of mentally retarded children (Public Law 85–926, sec. 1, as amended by Public Law 86–158, 73 Stat. 346; 20 U.S.C. 611): The Commissioner of Education makes grants to public or other nonprofit institutions of higher education to assist them in providing training of teachers in fields related to the education of mentally retarded children. These grants may be used both in connection with the costs of instruction and for establishing and maintaining fellowships. This is a new program under which grants have been made to only 19 institutions. One of these is known to have religious affiliation.

C. Cooperative research on problems in education (Public Law 531, 83d Cong., sec. 1; 20 U.S.C. 331): The Commissioner of Education is authorized to contract or make other jointly financed cooperative arrangements with institutions of higher education for studies and research on problems in education. In practice all arrangements have been made through contract. The program is listed here, however, because it has many of the attributes of a grant situation.

Public Health Service

A. Health research project grants (PHS Act, sec. 301(d); 42 U.S.C. 241(d) Public Law 660–84th Cong.; 33 U.S.C. 466, et seq. Public Law 159–84th Cong.; 42 U.S.C. 1857 et seq.): Grants are authorized to defray the cost of research projects relating to the causes, prevention, treatment or control of the physical and mental diseases and impairments of man, and also relating to the cause, control and prevention of air and water pollution.[4]

B. Construction of hospitals and other medical facilities (PHS Act, title VI; 42 U.S.C. 291 et seq.): Grants are authorized to meet from one-third to two-thirds the cost of construction of general hospitals and other medical facilities. Such other facilities include hospital-related housing for nurses and nursing homes.

C. Construction of health research facilities (PHS Act, title VII; 42 U.S.C. 292 et seq.): Grants are authorized to meet up to 50 percent of the cost of construction, remodeling or equipping of facilities for the conduct of research in the sciences related to health.

D. Categorical training grants and traineeships (PHS Act, secs. 403, 412, 422, 433(a) and 303; 42 U.S.C. 283, 287a, 288a, 289c, and 242a): Grants may be made to training institutions to meet the costs of providing specialized, technical, or advanced training with respect to particular diseases of public health significance (cancer, heart disease, mental health, etc.) or with respect to air or water pollution (42 U.S.C. 1857; 33 U.S.C. 466). One example of such grants were those by the National Institute of Mental Health to schools of divinity of the three major faiths to develop on a 5-year pilot basis improved instruction in mental health. Authority is also provided for awarding traineeships to individuals, selected either by the training school or by the Public Health Service, to provide them subsistence support and expenses during their period of categorical training (42 C.F.R., pts. 63 and 64).

E. Research fellowship grants and awards (PHS Act, secs. 301(c), 433(a); 42 U.S.C. 241(c), 289c): Authority is provided to award fellowships to individuals selected by the Service, or to make grants to institutions to permit them to award fellowships, for the purpose of providing subsistence support and expenses to an individual in his conduct of research or in his acquisition of research training (42 C.F.R., pt. 61).

F. Traineeships for professional public health personnel (PHS Act, sec. 306; 42 U.S.C. 242d): Authority is provided for awards either directly to individuals or by means of grants to the training institution to cover the cost of the individual's tuition, fees and subsistence during his graduate or specialized training in public health for physicians, engineers, nurses and other professional health personnel.

G. Advanced training of professional nurses (PHS Act, sec. 307; 42 U.S.C. 242e): Authority is provided for the award of traineeships by grants to training institutions to cover the cost of tuition, fees, stipends and allowances of professional nurses being trained to teach or to serve in an administrative or supervisory capacity.

H. Projects grants for graduate training in public health (PHS Act, sec. 309; 42 U.S.C. 242g): Project grants are authorized to be awarded to schools of public health, nursing or engineering to meet the costs of graduate or specialized training in public health for nurses or engineers and for the purpose of strengthening or expanding graduate public health training in such schools.

I. Indian health: Aid in construction of community hospitals (Public Law 85–151; 42 U.S.C. 2005): Grants are authorized to aid in the construction of community hospitals based on the proportion of construction costs attributable to the health needs of the Indians in the community.

J. Cancer control grants (Public Law 86–703): Under authority of the current Department of Health, Education, and Welfare Appropriation Act (Public Law 86–703), grants are made to hospitals, universities or other such institutions, for the conduct of cancer prevention, control, and eradication programs.

Office of Vocational Rehabilitation

A. Grants for research, demonstration, and training projects related to vocational rehabilitation (Vocational Rehabilitation Act (Public Law 565, 83d Cong.), sec. 4(a); 29 U.S.C. 34(a)): The Secretary of Health, Education, and Welfare is authorized to make grants to public and other nonprofit organizations for paying a part of the cost of projects for research and demonstrations in the field of vocational rehabilitation and training of individuals in professional fields which provide services to physically handicapped individuals. Many of the grants for research and demonstration are made to institutions of higher education, and most of the grants for training are made to such institutions. The training grants include an amount to enable the institutions to pay stipends to persons in training.

B. Vocational rehabilitation fellowships (Vocational Rehabilitation Act (Public Law 565, 83d Cong.), sec. 7(a)(3); 29 U.S.C. 37(a)(3)): The Secretary of Health, Education, and Welfare is authorized to provide training in technical matters relating to vocational rehabilitation services, including the establishment and maintenance of research fellowships with stipends and allowances. Pursuant to this a limited number of research fellowships are awarded for study and research at various institutions of higher education.

Social Security Administration

A. Cooperative research or demonstration projects (sec. 1110 of the Social Security Act, as added by sec. 331 of Public Law 880, 84th Cong.; 42 U.S.C. 1310): The Secretary of Health, Education, and Welfare is authorized to make grants to or contracts with public and other nonprofit organizations for paying part of the cost of research or demonstration projects relating to public welfare and social security matters. While the enabling legislation was effective for fiscal year 1957, appropriations were first available to carry out this program during the 1961 fiscal year. Three hundred and fifty thousand dollars has been made available for this purpose, and it is anticipated that one-third to one-half of that amount will be for financing projects at institutions of higher education. In the approval of such projects no distinction is made because of religious affiliation of an institution.

B. Children's Bureau: Special projects relating to crippled children and maternal and child health services (secs. 502(b) and 512(b) of the Social Security Act, as amended by secs. 707(b)(1)(A) and 707(b)(2)(A) of Public Law 86–778; 42 U.S.C. 702(b) and 712(b)): The Secretary of Health, Education, and Welfare is authorized to make grants to State health agencies and nonprofit institutions of higher education for special projects in the field of services for crippled children and maternal and child health. Up to now such projects have been financed by State agencies as the result of receiving grants from the Federal Government. In the future, however, grants will be made directly from the Federal Government, and no distinction is planned with respect to sectarian institutions.

Office of Field Administration

Surplus property utilization program (Federal Property and Administrative Services Act of 1949 (Public Law 152, 81st Cong.), as amended, secs. 203(j) and 203(k); 40 U.S.C. 484 (j) and (k)): Under these provisions the Secretary of Health, Education, and Welfare is authorized to allocate surplus personal property for transfer by the Administrator of General Services to State agencies for distribution to educational, health and civil defense organizations. Surplus real estate assigned by the General Services Administrator is transferred by the Secretary of Health, Education, and Welfare for educational and public health purposes at a public benefit discount which can be as much as 100 percent of the appraised fair value. The institutions which receive real and personal property include public and private nonprofit elementary and secondary schools and institutions of higher education.

ATOMIC ENERGY COMMISSION

Aid for nuclear equipment and loan of nuclear materials to colleges (Atomic Energy Act of 1946 (Public Law 585, 79th Cong.), as

[4] A recent amendment (Public Law 86–798) has also authorized the use of up to 15 percent of the amounts appropriated for health research projects for grants to nonprofit universities or other institutions for the general support of their health research and research training programs. While no such grants have yet been made, present plans are to make awards without regard to the religious affiliation of the grantees.

amended, secs. 3(a), 5(c)(2); 41 U.S.C. 2051, 2111): The Atomic Energy Commission operates a variety of programs under which support is given for activities in institutions of higher education. For purposes of this listing these programs are grouped as follows:

1. Special fellowships for study at institutions of higher education under which payments are made to individuals to cover tuition and subsistence costs for students in nuclear science and engineering and for graduate work in the atomic energy aspects of the life sciences.

2. Grants to institutions to enable them to acquire (a) nuclear laboratory equipment, (b) research reactors, and (c) teaching aids and laboratory equipment for radioisotope technology.

3. Loans of materials for instruction in nuclear fields and for research reactors.

4. Support of research in institutions of higher education through grants or contracts in various fields involving atomic energy.

5. Summer institutes in institutions of higher education to train teachers in various fields relating to atomic energy. Instructional costs are defrayed by the Atomic Energy Commission; stipends to teachers, who may be from schools with religious affiliation are paid by the National Science Foundation. (cf. NDEA counseling and foreign language institutes (supra) where, because of statute, stipends are paid only to public school teachers.)

VETERANS' ADMINISTRATION

A. Vocational rehabilitation (veterans' benefits (Public Law 85–857), ch. 31, secs. 1503, 1504; 38 U.S.C. 1503, 1504): Training is purchased from educational institutions of all types, including those with sectarian affiliation, for the rehabilitation of war veterans with service-connected disabilities. In addition, a subsistence allowance is paid the veteran.

B. Educational benefits for World II and Korean veterans (veterans' benefits (Public Law 85–857), ch. 33, sec. 1601 et seq.; 38 U.S.C. 1601 et seq.): Educational benefits for veterans of World War II were included in Public Law 346, 78th Congress. Under the original arrangement, a tuition payment was made directly to the school which the veteran attended, and this could include a theological school. In addition, a subsistence payment was made to the veteran. The arrangement for payment of tuition directly to the school was changed by Public Law 550, 82d Congress, which authorized a payment to the veteran and left it to him to take care of any tuition charges. The program for World War II veterans ended in July 1956, except for a small number of persons who were entitled to training benefits beyond that date. The present program authorized by Public Law 85–857 provides for an education and training allowance directly to the veteran. Small allowances are paid to each educational institution to reimburse it for the cost of making required reports to the Veterans' Administration regarding the veterans in attendance (38 U.S.C. 1645).

C. War orphans educational assistance (veterans' benefits (Public Law 85–857), ch. 35, secs. 1701 et seq.: 38 U.S.C. 1701 et seq.): This program provides educational opportunities for children of wartime veterans who died from a service-incurred disease or injury. The student must be pursuing an approved program of education in an institution of higher education or in a vocational school below the college level. Payments are made directly to the student to meet in part the expense of his tuition and subsistence. The Veterans Administrator is required to pay each educational institution $1 per month for each eligible person enrolled to assist in defraying the cost of preparing and submitting reports (38 U.S.C. 1765).

NATIONAL SCIENCE FOUNDATION

(National Science Foundation Act of 1950 (Public Law 507, 81st Cong.), secs. 3(a) (2), (3), (4) and (b), 11(c) and 14, as amended by Public Law 85–510, sec. 2 and, Public Law 86–232, sec. 1; 42 U.S.C. 1862(a), (2), (3), (4) and (b), 1870(c) and 1872a(b))

Pursuant to broad statutory authorizations to foster research and education in scientific fields, the National Science Foundation provides the following support for activities in institutions of higher education:

1. Fellowships for various types of graduate studies include allowance for tuition and subsistence and permit study at any accredited nonprofit institution of higher education in the United States or abroad.

2. Summer academic year, and inservice institutes are financed at institutions of higher education through stipend and tuition payments to improve the qualifications of high school and college teachers in science and mathematics. Stipends are paid without regard to the fact that the teacher is from a school with religious affiliation. (Cf. NDEA counseling and foreign language institutes, supra, where, because of statute, stipends are paid only to public school teachers.)

3. Special projects in science education are financed to provide the experimental testing and development of promising new ideas for the improvement of science instruction.

4. Programs are financed to improve course content and supplementary teaching aids in science.

5. Grants are made for basic research in the sciences, including funds for the use of graduate students as research assistants.

STATE DEPARTMENT

The State Department supports educational activities to a considerable extent by a variety of programs for international exchange, improvement of cultural relationships and rendering of technical assistance to foreign countries. Basically, under the programs students from this country are permitted to attend educational institutions abroad and students from foreign countries are permitted to attend educational institutions in this country. In either case payments are made to cover the cost of instruction and subsistence. For the education of foreign students in this country, the State Department makes contractual arrangements with the Institute of International Education, a private nonprofit organization in New York City, which in turn sponsors and makes specific arrangements for educating the foreign students. Training for a profession in religion is not financed but schools with religious affiliation are used. In performing this service IEE gives financial aid to the students to cover tuition and other related student costs.

The State Department has also made direct financial arrangements with universities and charitable organizations in this country to provide student leader seminars, high school training for teenagers, and English language classes for foreign students. In addition, the State Department has a variety of exchange and other educational programs by which foreign individuals are able to study in this country with the assistance of other Government agencies and private educational organizations. Examples of programs are: (1) U.S. information and educational exchange programs (22 U.S.C. 1991, et seq.); (2) technical cooperation with foreign countries (22 U.S.C. 1891 et seq.).

Under 22 U.S.C. 1448, a program has been implemented for technical cooperation in the form of assistance to schools abroad founded or sponsored by citizens of the United States and serving as demonstration centers for methods and practices employed in the United States in certain areas of training. A specific limitation of this program established by the State Department is that no funds may be channeled to a school operated under religious auspices.

DEPARTMENT OF DEFENSE

The Department of Defense has a number of training and research programs which finance activities at institutions of higher education. Research contracts fall under the procurement authority of each of the three branches of the Armed Forces. Thus, research is supported because of benefits to be received by the Defense Department and training is paid for because it improves the qualifications of military and civilian personnel. Such arrangements have also been made on a grant basis to institutions pursuant to 42 U.S.C. 1891–93, which specifies that the authority to contract for certain scientific research at nonprofit institutions of higher education shall be deemed to be authority to make grants.

SMALL BUSINESS ADMINISTRATION

Business management research (Small Business Investment Act of 1958 (Public Law 85–699, sec. 602(c); 15 U.S.C. 636(d)): The Small Business Administration is authorized to make grants to various organizations including colleges, universities and schools of business for research in the field of business management and finance. Grants have been made in prior years including those to institutions with religious affiliation. No funds are available to conduct this activity for the 1961 fiscal year.

DEPARTMENT OF AGRICULTURE

A. National school lunch program (National School Lunch Act (Public Law 396, 79th Cong., as amended; 42 U.S.C. 1751 et seq.): The purpose of this program is to improve the health and well-being of the Nation's children by providing funds and foods to States and territories for use in serving nutritious midday meals to children attending schools of high school grade and less. The Federal assistance is through payments to the educational agency of each State which then channels the aid to participating schools. However, 42 U.S.C. 1759 provides that in any State where the State educational agency is not permitted by law to disburse the funds to nonprofit schools they shall be disbursed directly to such schools for program purposes. In more than half of the States the educational agency has considered that it could not make the funds available to nonprofit private schools and as a result in those States the Secretary of Agriculture makes funds available directly to such nonprofit schools, including those with religious affiliation.

B. Special milk program (Agricultural Act of 1954 (Public Law 690, 83d Cong., sec. 204(b); 7 U.S.C. 1446(c)): Under this program funds of the Commodity Credit Corporation are used to increase the consumption of fluid milk by children in nonprofit schools of high school grade and under, in nonprofit nursery schools, child care centers, etc., devoted to the care and training of children.

C. Forestry research (Public Law 466, 70th Cong., sec. 1; 16 U.S.C. 581): The Secretary of Agriculture is authorized to conduct research relating to reforestation and forest products through arrangements with outside organizations. A part of this program is conducted through cooperative arrangements with colleges and universities, and at least one such arrangement has been made with a university with religious affiliation.

D. Use of national forests (30 Stat. 36; 55th Cong.; 16 U.S.C. 479): The act of June 4, 1897, cited above, authorizes a group of persons residing in the vicinity of national forests to occupy not exceeding two acres of forest land for the erection of a school and not exceeding one acre for the erection of a church. One hundred and sixty-three schools were on forest land on June 30, 1959.

Information is not available as to possible religious affiliation, but it is believed that few, if any, of such schools have religious affiliation. There is, however, no rule to prevent erection of a school because of such affiliation.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION

University research program (National Aeronautics and Space Act of 1958 (Public Law 85–568), sec. 203(b)(5); 42 U.S.C. 2473 (b)(5)): Research is conducted through contract with institutions of higher education in matters within the scope of interest of the National Aeronautics and Space Administration. The agency has also made grants to institutions with religious affiliation pursuant to the provision of 42 U.S.C. 1891–93, which provides that authority to contract with institutions of higher education for certain types of research shall also include the authority to make grants.

DEPARTMENT OF INTERIOR

Education of Indian children: Title 25, section 278, United States Code, declares it "to be the settled policy of the Government to make no appropriation whatever out of the Treasury of the United States for education of Indian children in any sectarian school." (See *Quick Bear* v. *Leupp* (1908), 210 U.S. 50, holding that a similar prohibition did not apply to an appropriation from funds held by the United States in trust for a tribe.) Title 25, section 279, United States Code, authorizes the Secretary to provide Indian children in missions with the rations and clothing to which they would be entitled under treaty stipulations if living with their parents.

The Bureau of Indian Affairs arranges for the placement of Indian children in schools with religious affiliation only because of special circumstances. In such cases they make no payment toward instructional costs but do use welfare funds to pay the institution for other needs of the children.

HOUSING AND HOME FINANCE AGENCY

College housing loan program (Housing Act of 1950 (Public Law 475, 81st Cong.), sec. 401 et seq.; 12 U.S.C. 1749): The Housing and Home Finance Administrator is authorized to make construction loans to assist public and private nonprofit institutions offering at least a 2-year program of higher education and public and private nonprofit hospitals operating student nurse or internship programs so that they may provide new or improved housing and other related facilities (such as dining rooms, student centers, and infirmaries) for students and faculties. Under this program, loans are made only where the institution is unable to secure funds for such purposes from other sources upon equally favorable terms and conditions. The loans can cover up to the full cost of construction and have a maturity of up to 50 years, with interest one-fourth of 1 percent above the average interest rate on all outstanding Federal obligations.

MEMORANDUM ON THE CONSTITUTIONAL AUTHORITY OF THE CONGRESS TO ENACT S. 1021

The power of the Congress to enact S. 1021 rests on its constitutional authority to appropriate funds to provide for the general welfare of the United States. The scope of that congressional power has been so broadly defined by decision of the Supreme Court, and the expenditures contemplated by S. 1021 fall so clearly within the power, that there is no need to review the controversy which for a century and a half surround the Federal power of expenditure, or to refer to the innumerable Federal expenditures that have been made throughout our history for purposes of the general welfare. It is not amiss to point out, however, that the first Federal grants to the States for the purpose of education antedated the Constitution, and that grants for this purpose have been made from time to time ever since.

The existence of the power of expediture as a separate power independent of the other enumerated powers of Congress, which had so long been in dispute, was finally affirmed by the Supreme Court in *United States* v. *Butler*, 297 U.S. 1 (1936); the contrary view, that expenditures could be made only in support of the other congressional powers, was expressly rejected. The Court did not find it necessary in that case to indicate further the scope of the general welfare clause, but clarification was not long delayed. Challenge to the unemployment compensation and old-age insurance provisions of the Social Security Act brought further decisions affirming in the broadest terms the discretion of Congress in determining what expenditures are for the general welfare of the United States.

In *Steward Machine Company* v. *Davis*, 301 U.S. 548 (1937), the Court said of expenditures for the relief of the unemployed (pp. 586–587):

"The problem had become national in area and dimensions. There was need of help from the Nation if the people were not to starve. It is too late today for the argument to be heard with tolerance that in a crisis so extreme the use of the moneys of the Nation to relieve the unemployed and their dependents is a use for any purpose narrower than the promotion of the general welfare."

In *Helvering* v. *Davis*, 301 U.S. 619 (1937), the validity of the old-age insurance system was upheld. The Court expounded more fully the meaning of the general welfare clause (pp. 640–641):

"Congress may spend money in aid of the 'general welfare' (Constitution, art. I, sec. 8; *United States* v. *Butler*, 297 U.S. 1, 65; *Steward Machine Co.* v. *Davis*, *supra*). There have been great statesmen in our history who have stood for other views. We will not resurrect the contest. It is now settled by decision (*United States* v. *Butler*, *supra*). The conception of the spending power advocated by Hamilton and strongly reinforced by Story has prevailed over that of Madison, which has not been lacking in adherents. Yet difficulties are left when the power is conceded. The line must still be drawn between one welfare and another, between particular and general. Where this shall be placed cannot be known through a formula in advance of the event. There is a middle ground or certainly a penumbra in which discretion is at large. The discretion, however, is not confided to the courts. The discretion belongs to Congress, unless the choice is clearly wrong, a display of arbitrary power, not an exercise of judgment. This is now familiar law. 'When such a contention comes here we naturally require a showing that by no reasonable possibility can the challenged legislation fall within the wide range of discretion permitted to the Congress' (*United States* v. *Butler*, *supra*, p. 67); Cf. *Cincinnati Soap Co.* v. *United States*, *ante*, p. 308; *United States* v. *Realty Co.*, 163 U.S. 427, 440; *Head Money Cases*, 112 U.S. 580, 595). Nor is the concept of the general welfare static. Needs that were narrow or parochial a century ago may be interwoven in our day with the well-being of the Nation. What is critical or urgent changes with the times."

The Supreme Court has subsequently sustained, as valid exercises of the power to spend for the general welfare, Federal construction of public housing and Federal projects for reclamation and irrigation (*Cleveland* v. *United States*, 323 U.S. 329 (1945); *United States* v. *Gerlach Live Stock Company*, 339 U.S. 725 (1950)). In both of these decisions the Court, on the authority of the social security cases, treated the congressional determination as decisive of the propriety of the expenditures.

The President in his message to Congress on this subject, and the Secretary of Health, Education, and Welfare in his testimony on S. 1021, have presented to Congress convincing reasons for exercise of the national power of expenditure, in the manner provided in the bill, in support of public primary and secondary school education throughout the Nation. There is no need to repeat or summarize those reasons here. If the Congress concurs in the judgment which the President and the Secretary have expressed, it cannot be doubted that the Supreme Court would accept that judgment as conclusive.

Since Congress would be exercising a power expressly conferred upon it by the Constitution, no question under the 10th amendment would arise. "The 10th amendment states but a truism that all is retained which has not been surrendered." (*United States* v. *Darby*, 312 U.S. 100, 124 (1941)).

The Supreme Court held many years ago that Federal grants-in-aid to the States, though conditioned upon various actions by the States, raise no justiciable issue at suit of a State or of a taxpayer (*Massachusetts* v. *Mellon*, 262 U.S. 447 (1923)). The Court observed (p. 480):

"Probably, it would be sufficient to point out that the powers of the State are not invaded, since the statute imposes no obligation but simply extends an option which the State is free to accept or reject."

To the same effect is *Oklahoma* v. *Civil Service Commission*, 330 U.S. 127 (1947).

United States v. *Butler*, *supra*, has occasionally been cited as though it construed the 10th amendment as a limitation upon powers otherwise granted to Congress. It did not do so. The Court held that the regulatory effect of the expenditures there under consideration, in matters not falling within the powers of Congress, rendered the statute invalid as exceeding the scope of congressional authority. The 10th amendment, said the Court, serves to "forestall any suggestion" that Congress may exercise powers not granted, expressly or by reasonable implication.

Any argument that the Butler case construed the 10th amendment as restricting the granted powers was put to rest in the following year, by *Helvering* v. *Davis*, *supra*. The lower court had held the old-age insurance system unconstitutional, on the ground that assistance to the aged was a matter reserved to the States at the time the Constitution was adopted, and thus reserved to them by the 10th amendment (*Davis* v. *Edison Electric Illuminating Co.*, 89 F. 2d 393 (C.C.A., 1st Circ., 1937)). The court likened care of the aged, in this respect, to education.[1]

In reversing the judgment the Supreme Court said (301 U.S., at pp. 644–645):

"Counsel for respondent has recalled to us the virtues of self-reliance and frugality. There is a possibility, he says, that aid from a paternal government may sap those sturdy virtues and breed a race of weaklings. If Massachusetts so believes and shapes her laws in that conviction, must her breed of sons be changed, he asks, because some other philosophy of government finds favor in the Halls of Congress? But the answer is not doubtful. One might ask with equal reason whether the system of protective tariffs is to be set aside at will in one State or another whenever local policy prefers the rule of laissez faire. The issue is a closed one. It was fought out long ago. When

---

[1] It may be noted that, if practice in 1789 were controlling, it would confirm the propriety of Federal grants for educational purposes.

money is spent to promote the general welfare, the concept of welfare or the opposite is shaped by Congress, not the States. So the concept be not arbitrary, the locality must yield (Constitution, art. VI, par. 2)."[2]

That the 10th amendment does not limit the granted powers has been consistently held by the Court in subsequent cases (*United States* v. *Darby, supra; Oklahoma* v. *Civil Service Commission, supra*).

It is thus beyond dispute that S. 1021, if enacted by Congress, will be a valid exercise of congressional authority, and that no issue will arise by reason of the 10th amendment.

ALANSON W. WILLCOX,
General Counsel, Department of Health, Education, and Welfare.

IMPORTATION OF MEXICAN WORKERS FOR EMPLOYMENT ON U.S. FARMS

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Iowa [Mr. COAD] is recognized for 30 minutes.

Mr. COAD. Mr. Speaker, legislation dealing with the extension of Public Law 78, a wartime emergency program, which provides for the legal importation of Mexican workers for employment on U.S. farms will be brought to the floor of the House from the Committee on Agriculture almost immediately following the Easter recess. But, Mr. Speaker, a simple extension of Public Law 78 raises serious moral, social, and economic issues, as well as principles of public policy.

By means of this program, approximately 316,000 Mexican braceros were imported for work on U.S. farms during 1960. Unless Congress acts to extend the program again, it will terminate at the end of this calendar year.

The administration is unalterably opposed to any extension of Public Law 78 unless the law is amended in a manner which will prevent the already intolerable economic condition of domestic farmworkers from deteriorating any further because of the adverse effect caused by the employment of Mexican labor.

This is a program which feeds on poverty and unemployment in Mexico and increases poverty and unemployment at home. As it is presently operating, it has been denounced by religious leaders of all faiths and repudiated by responsible citizens from all walks of life. In its present form, it is a black mark against the domestic policy of the United States—a black mark which should be erased as quickly as possible.

Originally initiated to meet Korean war needs, the Mexican farm labor import program has been extended repeatedly since that time. The Department of Labor, during its 10-year administration of the program, has accumulated a vast amount of evidence which proves conclusively that despite an allout effort by the Department to administer the law equitably, the mass importation of Mexican labor has had a detrimental effect on the wages, working conditions, and employment opportunities of domestic agricultural workers.

This fact is particularly alarming because American farmworkers are the most underprivileged group in the Nation's labor force. Underemployment of rural people is estimated as the equivalent of 1,400,000 fully unemployed workers. The average earnings of agricultural workers is barely over $1,000 a year. Farmworkers are excluded from minimum wage, unemployment insurance, and most workmen's compensation legislation. In addition, they are excluded from legislation which protects the right of workers to organize into unions and bargain with their employers.

Each year, approximately 400,000 American farmworkers are forced to migrate in order to avoid either unemployment or low wages at home. While on the road, their lives are very often characterized by underemployment, low wages, poor housing, lack of education, lack of health and welfare services, and in some cases, unsafe vehicles for transportation.

For 9 months in 1959, four prominent Americans studied the effects of Public Law 78 on domestic farmworkers at the request of former Secretary of Labor James P. Mitchell. These men conducted their investigations not only in Washington, D.C., but also in all of the areas where Mexican nationals are employed. They conferred with growers, domestic migrants, braceros, State and Federal Government officials, and others close to or directly concerned with the Mexican farm labor program.

The four men who reported to the Secretary of Labor were: Ex-Senator Edward J. Thye, of Minnesota, one of the men who helped write Public Law 78; Rufus B. von Kleinsmid, chancellor of the University of Southern California and ex-president of the University of Arizona; Glenn E. Garrett, executive director of the Good Neighbor Commission and chairman of the Texas Council on Migratory Labor; and Msgr. George G. Higgins, social action director of the National Catholic Welfare Conference.

These distinguished Americans, whose views concerning Public Law 78 were often conflicting when they began their investigations, arrived at the unanimous conclusion that the Mexican farm labor program was undermining the wages, working conditions, and employment opportunities of American farm workers.

Since that time, other groups have stepped forward and, for entirely different reasons, have expressed concern about the effects of Public Law 78.

This program is of benefit to only 2 percent of the growers in the United States. This 2 percent is made up of large commercial growers, small or medium sized growers who belong to labor contracting associations and/or distributing and marketing cooperatives, and growers whose crops are sold on a contract basis to corporations who are engaged in the processing, distribution, and marketing of farm products. In most cases, the legal employers of Mexican nationals are labor contracting associations. It is the task of these associations to supply labor to their members whether they be growers or distributing and processing cooperatives or corporations. Often the grower does not even pay for the Mexican labor he is supplied with. The Great American Sugar Co., the Northern Ohio Sugar Co., and the National Pickle Growers Association, to give a few examples, bear the entire cost of the Mexican labor supplied to growers with whom they hold contracts.

Spokesmen for several farm organizations have taken a dim view of this system. The Farmers Union, for example, has questioned the effect of foreign contract labor on the competitive position of family operated farms; the National Grange has taken the position that continued extensions of Public Law 78 are not in the best interests of a majority, or, in the long run, of even a minority of American farmers.

Assistant Secretary of Labor Jerry R. Holleman, testifying on behalf of the administration before the Subcommittee on Equipment, Supplies, and Manpower, has recommended specific amendments to the law. Contingent upon the adoption of these amendments, the administration recommends a 2-year extension of Public Law 78.

H.R. 6032 contains the administration's recommendations. It would provide the following:

First. Eligibility to employ Mexican workers should be conditioned upon the employers attempting to recruit U.S. workers by offering them wages at least equivalent to average farm wages in the State. Employers would in no case be required to raise their wage offers by more than 10 cents per hour in any 1 year or to raise their wage offers to more than the average farm wage for the Nation as a whole—97 cents per hour in 1960. Where the wage offer thus determined is less than the wage already prevailing, the prevailing wage must, of course, be offered and paid.

Second. Eligibility to employ Mexican workers should be restricted to employers who make reasonable efforts to attract domestic workers by offering—and actually providing—terms and conditions of employment reasonably comparable to those offered to foreign workers.

Third. Employment of Mexican workers should be confined to employment in seasonal and temporary jobs—less than year-around—and to employment not involving the operation of or work on machinery, except in specific cases where found necessary by the Secretary of Labor to avoid hardship.

Fourth. The Secretary of Labor should be authorized to limit the number of foreign workers who may be employed by any employer to the extent necessary to assure active competition among farmers for the services of U.S. farmworkers.

Fifth. If amended in the respects proposed above, the law should be extended for 2 years, terminating December 31, 1963.

Among the organizations joining with the administration in support of this bill are: The National Council of Churches of Christ in the U.S.A., the National Catholic Welfare Conference, the Unitarian Fellowship for Social

---

[2] It may be noted that of the six Justices who concurred in the Butler opinion, four (Hughes, C. J., and Roberts, Sutherland, and Van Devanter, J. J.) concurred with Cardozo, Stone, and Brandeis, J. J., in *Helvering* v. *Davis*.

Justice, the National Catholic Rural Life Conference, the Board of National Missions of the Evangelical and Reformed Church, the Bishops Committee on Migratory Labor, the Young Christian Workers, the Bishops Committee on the Spanish Speaking, the National Consumers League, the AFL-CIO, the American G.I. Forum, the Joint United States-Mexico Trade Union Committee, Amalgamated Meatcutters and Butcher Workers, AFL-CIO, the National Advisory Committee on Farm Labor, the National Sharecroppers Fund, the National Education Association, the National Council on Agricultural Life and Labor, and the National Child Labor Committee.

These organizations as well as the administration believe that the time has come when we should make it public policy to accomplish in agriculture what we have already accomplished in other sectors of our economy; namely, the restoration of respect and dignity, based upon good wages, good working conditions and steady employment, to the men and women who labor for hire on American farms.

The passage of H.R. 6032, would constitute a definite step toward the accomplishment of this goal.

OUR FIRST GRAVE CONSTITUTIONAL CRISIS—1861

Mr. ALFORD. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Arkansas?

There was no objection.

Mr. ALFORD. Mr. Speaker, 100 years ago, a general convention of the Commonwealth of Virginia, elected pursuant to an act of its General Assembly passed January 14, 1861, was in session in the old hall of the House of Delegates of the capitol in Richmond.

Convened for its first session on February 13, 1861, with James H. Cox of Chesterfield County as temporary president, the convention included among its members some of the most distinguished men of the Old Dominion.

At that time, seven States had already adopted acts of secession from the United States and formed the Confederate States: South Carolina, Mississippi, Florida, Alabama, Georgia, Louisiana, and Texas. But Virginia, fully alert to the crucial significance of whatever action it might take, was delaying decision with the hope of peace and conciliation. The attempt of the United States to reinforce Fort Sumter was yet to be made.

It was under these circumstances that the convention, on the first day, elected for its permanent president one of Virginia's ablest lawyers and statesmen, John Janney—1798–1872—of Leesburg.

A recognized leader who had missed becoming President of the United States by only one vote, Janney was a constitutional unionist. As such he was associated with other Virginians heroically striving to prevent secession and thus to avoid the great tragedy that was clearly foreseen.

Escorted to his seat by a committee composed of George W. Summers of Kanawha and Thomas S. Flournoy of Halifax, President Janney opened his administration of the convention with a moving address aimed at saving the Union. Its appeal bore fruit on April 4, when the convention voted 89 to 45 not to secede.

Unfortunately, 8 days later, on April 12, 1861, and under circumstances too complicated for recital here, the first shot in the War Between the States was fired at Fort Sumter, aggravating an already critical situation.

Unable to secure a status of neutrality for Virginia, the convention, faced with the cruel choice of supplying troops to invade other States in an unauthorized war or of resisting an unconstitutional invasion of its own territory, reversed its previous stand. On April 17, 1861, it adopted by a vote of 88 to 55 an ordinance for repeal of Virginia's "ratification of the Constitution of the United States" and for resumption of "all the rights and powers granted under said Constitution," President Janney voting in the negative.

It was following this decision that Col. Robert E. Lee, on April 20, after having been offered supreme command of the forces that were to be used for the coercion of other States, resigned his commission in the U.S. Army.

Promptly appointed major general and commander in chief of the armed forces of Virginia, he was acclaimed on April 23, 1861, by the convention in a memorable ceremony attended by such southern notables as Alexander H. Stephens, Vice President of the Confederate States, and Matthew Fontaine Maury.

For a second time, Mr. Janney, a lifelong friend of General Lee, moved the convention in the same old House of Delegates Hall by his eloquent tribute to the commander in chief. General Lee's response, brief and modest, is today inscribed on his monument on the spot in the hall where he stood at the time.

After guiding the convention through its most difficult period incident to the collapse of one Federal Government and the setting up of a new one, Mr. Janney, worn out by his efforts, on November 6, 1861, resigned from the presidency of the convention for reasons of health. He was succeeded by Robert L. Montague of Matthews and Middlesex.

After Mr Janney's resignation, the convention on December 6, 1861, passed a resolution thanking him for the "impartial, efficient, and dignified performance of his duties, whilst presiding over their deliberations." In response, Mr. Janney made a third stirring address.

Mr. Speaker, these three addresses by John Janney, as well as anything I have ever read, epitomize the supreme catastrophe of our history. As such, they should be read by every thoughtful American today, especially the young on whose shoulders will fall the task of maintaining constitutional liberty.

I can think of no more effective manner in which the start of the War Between the States and the great tragedy that it generated can be commemorated than by quoting the three indicated addresses of Mr. Janney and General Lee's response:

PRESIDENT JANNEY'S OPENING ADDRESS,[1] FEBRUARY 13, 1861

The President: Gentlemen of the convention, I tender you my sincere and cordial thanks, for the honor you have conferred upon me, by calling me to preside over the deliberations of the most important convention that has been assembled in this State since the year 1776.

I am without experience in the performance of the duties to which you have assigned me, with but little knowledge of parliamentary law and the rules which are to govern our proceedings, and I have nothing to promise you but fidelity and impartiality. Errors I know I shall commit, but these will be excused by your kindness, and promptly corrected by your wisdom.

Gentlemen, it is now almost 73 years since a convention of the people of Virginia was assembled in this hall to ratify the Constitution of the United States, one of the chief objects of which was to consolidate, not the Government, but the Union of the States. Causes which have passed, and are daily passing, into history, which will set its seal upon them, but which I do not mean to review, have brought the Constitution and the Union into imminent peril, and Virginia has come to the rescue. It is what the whole country expected of her. Her pride as well as her patriotism—her interest as well as her honor, called upon her with an emphasis which she could not disregard, to save the monuments of her own glory. Her honored son who sleeps at Mt. Vernon, the political mecca of all future ages, presided over the body which framed the Constitution; and another of her honored sons, whose brow was adorned with a civic wreath which will never fade, and who now reposes in Orange County, was its principal architect, and one of its ablest expounders—and, in the administration of the Goverment, five of her citizens have been elected to the chief magistracy of the Republic. It cannot be that a government thus founded and administered can fail, without the hazard of bringing reproach, either upon the wisdom of our fathers, or upon the intelligence, patriotism, and virtue of their descendants.

It is not my purpose to indicate the course which this body will probably pursue, or the measures it may be proper to adopt. The opinions of today may all be changed tomorrow. Events are thronging upon us, and we must deal with them as they present themselves.

Gentlemen, there is a flag which for nearly a century has been borne in triumph through the battle and the breeze, and which now floats over this capitol, on which there is a star representing this ancient Commonwealth, and my earnest prayer, in which I know every member of this body will cordially unite, is that it may remain there forever, provided always that its luster is untarnished. We demand for our citizens perfect equality of rights with those of the empire States of New York, Pennsylvania, and Ohio, but we ask for nothing that we will not cheerfully concede to those of Delaware and Rhode Island.

The amount of responsibility which rests upon this body cannot be exaggerated. When my constituents asked me if I would consent to serve them here if elected, I answered in the affirmative, but I did so with fear and trembling. The people of Virginia have, it is true, reserved to themselves, in a certain contingency, the right to review our action, but still the measures

[1] Journal of the Acts and Proceedings of a General Convention of the State of Virginia, assembled at Richmond on Feb. 13, 1861. Richmond: Wyatt M. Elliot, printer, 1861, pp. 8–10.

which we adopt may be fraught with good or evil to the whole country.

Is it too much to hope that we, and others who are engaged in the work of peace and conciliation, may so solve the problems which now perplex us, as to win back our sisters of the South, who, for what they deem sufficient cause, have wandered from their old orbits? May we not expect that our old sister, Massachusetts, will retrace her steps? Will she not follow the noble example of Rhode Island, the little State with a heart large enough for a whole continent? Will she not, when she remembers who it was who first drew his sword from the scabbard on her own soil at Cambridge, and never finally returned it, until her liberty and independence were achieved, and whence he came, repeal her obnoxious laws, which many of her own wisest and best citizens regard as a stain upon her legislative records?

Gentlemen, this is no party convention. It is our duty on an occasion like this to elevate ourselves into an atmosphere, in which party passion and prejudice cannot exist—to conduct all our deliberations with calmness and wisdom, and to maintain, with inflexible firmness, whatever position we may find it necessary to assume.

CONFIRMATION OF GEN. ROBERT E. LEE AS COMMANDER IN CHIEF AND THE GENERAL'S RESPONSE[2] APRIL 23, 1861

The President: Major General Lee, in the name of the people of your native State, here represented, I bid you a cordial and heartfelt welcome to this hall, in which we may almost yet hear the echo of the voices of the statesmen, the soldiers and sages of bygone days, who have borne your name and whose blood now flows in your veins.

We met in the month of February last, charged with the solemn duty of protecting the rights, the honor and the interests of the people of this Commonwealth. We differed for a time as to the best means of accomplishing that object; but there never was, at any moment, a shade of difference amongst us as to the great object itself; and now, Virginia having taken her position, as far as the power of this convention extends, we stand animated by one impulse, governed by one desire and one determination, and that is that she shall be defended; and that no spot of her soil shall be polluted by the foot of an invader.

When the necessity became apparent of having a leader for our forces, all hearts and all eyes, by the impulse of an instinct which is a surer guide than reason itself, turned to the old county of Westmoreland. We knew how prolific she had been in other days, of heroes and statesmen. We knew she had given birth to the Father of his Country; to Richard Henry Lee, to Monroe, and last, though not least, to your own gallant father, and we knew well, by your own deeds, that her productive power was not yet exhausted.

Sir, we watched with the most profound and intense interest the triumphal march of the army led by General Scott, to which you were attached, from Vera Cruz to the capital of Mexico; we read of the sanguinary conflicts and the bloodstained fields, in all of which victory perched upon our own banners; we knew of the unfading luster that was shed upon the American arms by that campaign; and we knew, also, what your modesty has always disclaimed, that no small share of the glory of those achievements was due to your valor and your military genius.

Sir, one of the proudest recollections of my life will be the honor that I yesterday had of submitting to this body the confirmation of the nomination made by the Governor of this State, of you as commander in chief of the military and naval forces of this Commonwealth. I rose to put the question, and when I asked if this body would advise and consent to that appointment, there rushed from the hearts to the tongues of all the members, an affirmative response that told, with an emphasis that could leave no doubt of the feeling whence it emanated. I put the negative of the question for form's sake, but there was an unbroken silence.

Sir, we have, by this unanimous vote, expressed our convictions that you are, at this day, among the living citizens of Virginia, "first in war." We pray to God most fervently that you may so conduct the operations committed to your charge, that it will soon be said of you, that you are "first in peace," and when that time comes you will have earned the still prouder distinction of being "first in the hearts of your countrymen."

I will close with one more remark.

When the Father of his Country made his last will and testament, he gave his swords to his favorite nephews with an injunction that they should never be drawn from their scabbards, except in self-defense or in defense of the rights and liberties of their country, and, that if drawn for the latter purpose, they should fall with them in their hands, rather than relinquish them.

Yesterday, your mother, Virginia, placed her sword in your hand upon the implied condition that we know you will keep to the letter and in spirit, that you will draw it only in her defense, and that you will fall with it in your hand rather than the object for which it was placed there, shall fail.

Major General Lee responded as follows:

Mr. President and gentlemen of the convention: Profoundly impressed with the solemnity of the occasion, for which I must say I was not prepared, I accept the position assigned me by your partiality. I would have much preferred had your choice fallen on an abler man. Trusting in Almighty God, an approving conscience, and the aid of my fellow citizens, I devote myself to the service of my native State, in whose behalf alone, will I ever again draw my sword.

FAREWELL ADDRESS,[3] DECEMBER 6, 1861

Mr. President and gentlemen of the convention: When you called me, in the month of February last, to preside over your deliberations, I was wholly without experience, and had nothing to promise you but fidelity and impartiality in the discharge of my duty. Errors I know I must have committed; but the promise that I made you has been faithfully performed. For the approbation which you have been pleased to express, I am more indebted to your kindness than to any merit of my own, but I ought not and do not thank you the less on that account. We have been engaged in the discussion of subjects of the most intense interest, calculated to arouse into action the highest energies of the human intellect and the stormiest passions; but I can state, with truth, that during my administration of the duties of the chair, not a word was spoken by any member that violated the order and decorum of debate. To have presided over such a body of gentlemen is a distinction of which any man might well be proud. I shall cherish the recollection of it to the latest hour of my life. Gentlemen, the clouds are lowering, the tempest is brewing all around us; the forked lightning is seen, and the muttering thunder is heard in the distance. By the blessing of Providence upon the arms of our brave defenders, the storm may yet be averted; but, if not, and it shall burst with fury upon us, don't turn your backs to it—turn your faces. Don't give up the ship, and never despair of the Republic; all will yet be well, if each one of you will adopt for his motto, with the change of a single word, the last signal of England's greatest naval hero: "The South expects every man to do his duty."

CUTBACK IN AIRCRAFT NUCLEAR PROPULSION PROJECT (ANP)

Mr. PRICE. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. PRICE. Mr. Speaker, I have read the President's statement concerning the cutback in the Aircraft Nuclear Propulsion ANP project, and am glad that he has made a forthright decision on the program. It is a decision I regret and question. This means indefinite delay for the flight test program. It is true that AEC will continue with ANP research, but at a much reduced rate.

In view of the large expenditures to date, and the further expenditures required to achieve nuclear flight, I can understand the President's decision in relation to other competing demands for funds.

I hope, however, that the President's message will not set a precedent for other atomic energy projects. The message adopted the criterion used by the Defense Department in past years of the necessity of achieving a militarily useful aircraft in the foreseeable future. It has been my position and that of many members of the Joint Committee on Atomic Energy that we cannot foresee the military uses of an atomic powered engine until we get an experimental engine in operation. When something has been demonstrated our military people see a great many uses. For example, I note the message cites our greatest need for expansion in the Polaris nuclear submarine system. This combines the nuclear submarine with a solid fueled missile and a lightweight nuclear warhead. If the United States had waited until it foresaw a militarily useful purpose for each of these components we would have no Polaris system today.

I note also that the defense message sees a military purpose in the Skybolt system which utilizes a conventional aircraft with only a limited range to provide a mobile launching platform for intermediate range missiles. This is the same system originally recommended for nuclear powered aircraft of virtually unlimited range, known as the Camal system.

The amount recommended for appropriation to AEC will unfortunately not provide for the research and development of any experimental nuclear powerplant for a nuclear aircraft. It will only provide for some laboratory work in high temperature materials.

I have pointed out many times that we could have had nuclear aircraft in flight today if it had not been for the on-again, off-again system of mismanagement by the Defense Department and its scientific advisers.

I can see the same approach creeping into the management of other defense projects and the Rover nuclear rocket program. I expect to have more to say on these problems at a later date.

In conclusion, I can understand the President's decision on ANP from a fiscal standpoint. I cannot agree with his scientific and defense advisers as to the approach being taken toward developmental projects.

WHO WILL WIN IN AFRICA?

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Illinois [Mr. MICHEL] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. MICHEL. Mr. Speaker, the present mixed state of affairs in Africa and arguments as to how best to dispose of problems in that dark and little-known continent seem to me to be symbolized in a story now going the rounds:

The lion, king of the beasts, summoned the denizens of his realm recently and said to them, "I called you together because—well, frankly, if things get worse, men are going to turn Africa into a jungle."

Perhaps this story epitomizes the situation about as well as it can be stated. This seems to be true in spite of the tidbits of optimistic news trickling into the daily press and which certainly are welcomed by a weary world that probably does not understand Africa at all.

What I learned in school about Africa contrasts sharply with what is occurring there today. As I recall it, in my schooldays there were only about three independent nations—Liberia, Ethiopia, and South Africa. Now all this is changed and by 1962 I feel that about 30 African Nations will have delegates sitting in the United Nations. Whereas few cared or even knew much about Africa in my schooldays, the entire world today is locked in a struggle to gain independence for, or to enslave, that Dark Continent.

Thus, in spite of the signs of progress made as a result of the recent meeting of Congo leaders, which the Christian Science Monitor of March 14, 1961, says has left a "remarkable impression of achievement," I take this opportunity to cite some facts which we must take into account in considering the entire African problem.

As U.S. News & World Report of March 6 declared:

> The real battle for Africa has just begun. * * * Black Africa is slipping deeper into turmoil. * * * Out of it all a single question is arising: Who is going to emerge as the winner of the struggle for a continent?

Before we can even hazard a guess as to who the victor may be, it might be well to examine several phases of the problem.

First of all, the treasures at stake are high for whoever wins Africa. The Dark Continent's treasures tempt all the industrial powers of the world with its vast stores of raw materials that are vital to a jet age.

This continent now supplies most of the world's cobalt, columbite, tantalite, and diamonds; 20 percent of the world's copper stocks, 25 percent of the manganese, 15 percent of the chrome ore and tin, 10 percent of all graphite and lead, as well as large quantities of iron ore, coal, zinc, asbestos, bauxite, tungsten, gold, antimony, vanadium, and gypsum.

From her vast land area come most of the world's supplies of cocoa, cloves, palm oil, sisal, peanuts, coffee, bananas, rubber, tobacco, and tea.

Her great waters promise 40 percent of the world's usable water power, just waiting to be harnessed. Her vast rivers offer unparalleled opportunities for water transportation.

RACISM AND TRIBALISM

Against this background of needed supplies and undeveloped resources play the emotions of men in a grim battle. The best laid plans of these men go awry because two issues—racism and tribalism—cut across frontiers and wreck the best intentions and the best programs for developing Africa. A third factor is the so-called cold war, which occasionally gets warm, and which has brought Red Russia into the picture as a formidable contestant for the rich prizes that Africa offers, and adds further to the already muddled situation. On this subject, U.S. News & World Report says:

> Racism in Africa cuts two ways: In the West African countries where blacks now rule * * * there is discrimination against whites. In the East African and South African countries, where whites rule * * * there is discrimination against blacks.
>
> * * * * *
>
> Inexperienced native leaders are caught up in world struggles beyond the comprehension of tribal peoples. * * * All the new countries need aid, guidance.

The top issue for Africans is race, not cold war, this publication then explains:

> National boundaries mean little to Africa. What counts is the color of the skin, the tribal membership. * * * Through much of this continent men consider only your color, then, if it's black, as your tribe.

Ultimate anarchy seems to be the answer; for racism, as rampant as it is, is not so much a threat as tribalism in some areas. The publication adds, explaining:

> In the Congo last summer, for example, Congolese blacks celebrating their independence turned to an orgy of antiwhite violence, then turned to tribal warfare until the Premier of the Congo called in the United Nations.

Tribalism was the downfall of Patrice Lumumba and led to his slaying. It gave Khrushchev his chance to try for power in the Congo:

> The cold war has been added on top of the tribal and racial barriers to peaceful development in Africa. * * * All over Africa * * * the rise of African nationalism is cutting across conflicts of race, tribe, and cold war. There will be trouble in Africa for years to come and the winner of the struggle for the continent is not now in sight.

I have cited the foregoing background material for a number of reasons, which I would like to discuss now in some detail. As to problems of the individual hotspots in Africa, let us consider them.

THE CONGO

Although the Congo problem, in my opinion, has served to keep the cold war at the United Nations from defrosting, native tribes now no longer under Belgian rule are reviving their ancient terrors, thus bearing out my statement above, that tribalism is the all-consuming issue in Africa. Here we have the Congo, a nation whose days of freedom have been marked by bloody strife, whose independence has been a travesty since King Baudoin elaborately handed over sovereignty last July. Surely, this is a sad state of affairs. As the Sunday Star of Washington said on March 26: Here is a "nation without nationality;" a country with political "leaders who lead factions, not people," and whose troubles the Sunday Star attributes partly to "European entrepreneurs whose vested interests in a colonial Congo were totally disrespectful of political freedoms."

As in the Congo, Africans everywhere have come to face the fact that merely getting the white man out will not solve their problems. They are discovering there is no such thing as instant freedom. They have learned that premature withdrawal of white authorities can mean chaos when their own people lack political education, lack knowledge of the ins and outs of modern types of governments, and are in ignorance of modern technical methods and the myriads of catacombs of protocol and ways of accomplishing political objectives. How are we to deal with this Congo problem when we seem to have no starting point, no sense of artifice, no education, and no apparent desire to seek solutions to problems other than those that exist in their own tribal groups?

THE RHODESIAS

Between the Congo and South Africa lies a vast multiracial union, the middle ground between white and black extremities. It is known as the Federation of Rhodesia and Nyasaland, and it has recently seen violence between its 292,000 whites and its 7.6 million blacks. Some whites demanded more stringent measures to suppress this violence, but many more seem to have seen the light and are seeking some way in which they and the blacks can arrive at a cooperative working arrangement.

As if this situation is not muddled enough, in Nyasaland, the smallest nation in this federation, little Nationalist Leader Dr. Hastings K. Banda, a powerful and respected person in his own country, is paying homage to British Colonial Secretary Iain Macleod, saying he trusts Macleod implicitly and that independence for his nation is not a matter of 10, 20, or even 50 years. Said he: "We are not thinking in terms of years at all."

Meanwhile, in Northern Rhodesia, by far the wealthiest of the three federation members, freedom until recently would have seemed absurd. But British-appointed Governor General Sir Evelyn Hone has pushed through the legislature a measure that bans all racial discrimination in all Northern Rhodesia's eating and other public places. The blacks cheered, the whites booed, but the whites obeyed and finally the conviction has been growing that what had been granted to Nyasaland hardly could be refused their own vast black majorities.

Southern Rhodesia, however, has faced its problem differently. Self-governed, it cannot be pressured into desegregation. The trend there is toward giving Africans a more important role in government affairs. Perhaps the African can realize the dream of the founder of Rhodesia, Sir Cecil Rhodes, who asserted that there should be equal rights for all civilized men.

KENYA

In this country, the whites have resisted the opening of the formerly restricted White Highlands to competent blacks. They have been bitterly critical of the British Government's threat to ultimately release Jomo Kenyatta, the burning spear of the Mau-Mau blood bath. Yet Kenyatta seems even now to hold the key to Kenya's political future. He may become the personification of the country—"Mr. Kenya"—and prove to be, according to some whites and most of the blacks, the only savior available. Meantime, many British hope he will have shed his bitterness by the time he is freed and accept the need for the blacks and whites to live together in harmony, as partners, rather than having the blacks ruling the whites; and they even feel he may someday rule the nation.

Begging to differ with this optimistic viewpoint is the March 22 issue of the Wall Street Journal, whose staff reporter, Joseph E. Evans, quotes one authority on Kenya's affairs as asserting:

> The old Kenyatta never changed.

According to this same issue of the Journal, a British-Kenya politico concurs:

> Kenyatta was and is a fanatic and a Communist.

This same issue of the Wall Street Journal begs to differ with the opinions stated above concerning Kenyatta when it says:

> It is one thing to release Kenyatta and quite another to let him assume political power. For that to happen, the British themselves would have to make it possible—and that is hardly likely.

The Journal continues by reporting that many African leaders do not really want Kenyatta released, but quotes the Minister of Labor, Ronald Ngala, of the present caretaker government that rules until September, as declaring:

> We want him released so we can find out where he stands.

Creation for Kenyatta of the post of chief minister is, according to this article in the Wall Street Journal, theoretically the next step on Kenya's road to independence.

So here, for Kenya, we have apparently contradictory interpretations of what is going on there and what is likely to happen.

TANGANYIKA

Because of the prevalence of the dread tsetse fly, this country has been largely shunned by whites, of which there are now about 20,000. Asians number 80,000. Blacks total 8 million. Even with this racial imbalance, things seem to be moving toward a happy solution. In September, British East Africa's first predominantly black government is almost certain to be elected. Its first African prime minister is all but certain to be the beloved, 38-year-old Catholic-mission-school-educated Julius Nyerere, a graduate of Edinburgh University. Adored by the blacks, he also is greatly respected by the whites. Says he:

> All of our tribes * * * will be participating in our new government. The newer tribes—Asians and Europeans—will be just as welcome as the Africans.

Tanganyika, then, seems to be no problem, but I cite it as an example of what can be done in this welter of mixed races, tribal customs, and widespread lack of preparation for self-government.

And now for the questions I have in mind. As for the solution, I can only suggest that none can be found until some order is made out of the chaotic and contradictory word-picture I have painted.

First. There is what to me has been the ineptitude of the New Frontier's efforts to deal with the African problem. In this connection, I call attention to the March 14 story in the Washington Post and Times Herald which reported as unsatisfactory to them the efforts of the new Assistant Secretary of State for African Affairs, Mr. G. Mennen "Soapy" Williams. I hope the appointment of Mr. Williams, whose antics and rudeness while he was in Africa has been widely reported in the daily press, is not indicative of what the conduct and perhaps ineptness of other New Frontier "salesmen" of the United States may be in the future. Here alone is a problem which seems to be crying for attention.

Second. What are the aims of the United States for Africa? In reaching into this Darkest Continent, has the long arm of the New Frontier faltered? Has it caused irreparable damage to our prestige in handling foreign affairs? In addition to what the Africans have been quoted as saying, to the effect that "Soapy" Williams' efforts are unsatisfactory, there is added the apparently long-range policy of the Kennedy administration, which, according to Ray Cromley, writing in the Washington Daily News of March 14, is practically one of despair, inasmuch as the New Frontiersmen are quoted as having little hope of any satisfactory solution for 10 to 20 years. Says Mr. Cromley:

> The most the Kennedy men expect is that they can keep the Red takeover as small as possible during this period.

Have we got 10 to 20 years to spare in our efforts to solve the African riddle? The answer, most assuredly, is an emphatic "No." This, to my mind, is practically a philosophy of despair and one which we must abandon in favor of a program of cooperation that will at least keep step with moves of the Soviets and Red Chinese. Better yet would be a plan that would keep ahead of the modern barbarians' efforts to conquer this rich land. How this may be accomplished, is, I feel, a problem which we should study so that we may cooperate with the efforts of the United Nations.

Third, there is the criticism of the United Nations. It comes from the Communists. As the Washington Daily News editorial of March 8 points out:

> It also comes from * * * each of the political factions in the Congo, and most of the nations which supply the men for the U.N. force. * * * Too often overlooked in such criticism are the handicaps under which the U.N. functions in the Congo. * * * The United Nations probably can protect itself from its declared enemies, the Soviet Communist bloc. But the U.N. desperately needs help if it is to be saved from some of its friends.

Here there seems to be an opportunity for the United States to offer its good offices in a most worthy cause. Perhaps some of this help will be forthcoming from discussions of Africa in the Congress of the United States, but perhaps only after the American people have been better informed concerning the issues involved.

THE TREASURY'S UNLOCKED "BACK DOOR"

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Washington [Mr. TOLLEFSON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TOLLEFSON. Mr. Speaker, the leader of efforts in the House of Representatives to stop back-door spending is my colleague, the distinguished gentleman from Washington [Mr. PELLY]. An article describing this method of uncontrolled Government spending appeared in a recent issue of Spotlight, a publication devoted to national issues.

Congressman PELLY maintains that hundreds of millions of dollars can be saved to the taxpayers of our Nation if Congress will only close the door on back-door spending. I urge the Members of the House to read his article which follows herewith:

THE TREASURY'S UNLOCKED "BACK DOOR"

(By Congressman THOMAS M. PELLY, of Washington)

Under the rules of the House of Representatives, exclusive jurisdiction over legislation involving spending rests with its Committee on Appropriations. That has been the rule since 1920, when one committee was given this responsibility so as to obtain better control of expenditures. Prior to 1920 there was no one committee to provide for overall review of all the requests or to weigh relative urgencies under existing conditions and available revenues each year.

The House saw the desirability of a check on pressure groups or special interests controlling any one legislative committee. The new arrangement, it was found, did indeed provide a better system of fiscal control and responsibility.

About 1932, with the creation of the Reconstruction Finance Corporation, a new language device was drawn to supply this Corporation with funds. Rather than using the regular appropriation process, the Corporation was authorized to go direct to the Federal Treasury and borrow money for its operations.

Over the ensuing years Congress has provided similar borrowing authority to a number of Federal corporations and for a number of noncorporate Government programs, such as housing, CCC, REA, FHA, some types of

farm loans, defense minerals procurement, the British loan in 1946, the International Monetary Fund contribution, and so on.

This method of authorization to expend from public debt receipt—which circumvents normal appropriation and budgetary control procedures—has come to be known as back-door spending. It has become a popular legislative instrument for initiating programs involving large-scale and long-range spending.

Back-door spending devices not only include this type of public debt transactions but also a note cancellation technique whereby a Government agency's notes to the Treasury are canceled, and then without mention of an appropriation, the agency borrows again under the original authorization. This, of course, bypasses the normal established annual appropriation process, including budget review.

A third method of back-door spending is the financing of continuing operations with agency receipts derived from such operations without the regular annual review and action by the Congress.

A fourth device used in several programs involves language in a bill authorizing an agency to make obligations in advance of appropriations to carry out programs. This does not do away with the appropriations process but it reduces the function of the Committee on Appropriations to one of honoring a commitment already made. No matter what the fiscal situation, the Government's contracted liabilities must be honored. Annual discretion and control of the budget thereby is impaired.

The Constitution of the United States, article 1, section 9, paragraph 7, states: "No money shall be drawn from the Treasury, but in consequence of appropriations made by law."

This provision was placed there by the framers to assure that expenditures from the public treasury to carry out congressional policies would be carefully weighed in terms of necessity, revenue availability and the fiscal solvency of the Nation.

Congress regularly has two steps, in that first it must authorize or establish a policy. Then it must take a second step to provide for the expenditure of public funds to carry out that policy. In the House of Representatives that procedure places all appropriations under the jurisdiction of one committee having jurisdiction and intended to provide overall control.

Unfortunately, under the Boggs decision of 1949, in construing clause 4 of rule XXI of the House rules, language in bills to expend from debt receipts was declared not to come under the definition of "appropriations." As a consequence, legislative scrutiny and control of billions of dollars annually expended by the Congress was eliminated.

In the meanwhile, the principal financial officer of the Congress, the Comptroller General of the United States, has criticized the public debt transaction technique for authorizing expenditures. Significantly, too, Secretary of the Treasury Robert B. Anderson in August 1958 stated his opinion that a legislative enactment permitting money to be drawn from the Treasury is an appropriation. President Eisenhower, in his final budget message to the Congress, reiterated his opposition to financing outside the appropriations process.

Abortive efforts without success have been made in recent years to amend individual bills to provide against back-door provisions and change the method of financing to the normal appropriations procedure. On such occasions one legislative leader has revealed his opposition to any such attempts to eliminate the process of bypassing the House Committee on Appropriations by saying that otherwise much progressive legislation would have never been passed.

The amount of expenditures involved is huge. In 1 year 16 bills authorizing $9 billion to be financed outside of the appropriations process were considered by the House. Under back-door methods of past years, the present administration's housing program, including college housing, would exceed $6,800 million, of which only $50 million or less than 1 percent would be by direct appropriation.

With the organization of the 87th Congress, there has been a new attack on back-door spending. One hundred and twenty-three Members of the House joined in a bipartisan drive in support of a resolution to change the House rules to overcome the Boggs decision and place full jurisdiction of all kinds of Federal spending under the House Committee on Appropriations.

After a hearing in the newly enlarged Committee on Rules, this resolution was rejected 8 to 6.

Other resolutions or means of ending back-door spending are contemplated and even the possible use of a discharge petition is being considered.

As it is, by bottling up this resolution, the majority will of the House is being thwarted.

Public opinion, however, is needed to break the bottleneck. Of course, there is the hope that if not in this session of Congress, there will be successful action in the future. Meanwhile, however, citizens who oppose back-door spending and desire to see a change in congressional procedure should write their views to Members of the House of Representatives.

There have been many measures introduced with the hope of effecting economy and cutting down on waste and duplication. However, the first and fundamental step in the direction of fiscal responsibility is to lock the back-door of the Treasury.

Changing the rules of the House, furthermore, is not a complicated matter. The views of the White House are not involved, nor does this require the consent of the Senate.

If public opinion can be enlisted in curbing back-door spending and it results in the switch of only one vote—if all Members of the Committee on Rules are in attendance—Congress might well restore to itself the power and ability to control the public purse. What a challenge to those Americans who have been fighting against inflation and for a stable economy. National solvency is at stake, as is public confidence in our economy both here and abroad.

Every citizen is invited to participate in the anti-back-door spending drive. Such persons should write their views to Members of the House of Representatives—and especially to members of the House Committee on Rules.

EISENHOWER GETS JAPANESE APOLOGY

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Washington [Mr. TOLLEFSON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TOLLEFSON. Mr. Speaker, the entire world was shocked at the Tokyo student riots which protested the proposed visit to that city by President Eisenhower. The newspapers of the world carried front page stories about the incident. The same newspapers, unfortunately, failed to accord similar attention to an extremely important aftermath of those riots, namely, the recent meeting between participating student rioters and General Eisenhower at his winter home in California where the students apologized for the riots. It seems to me that this action on the part of the Japanese students was most significant and should have received greater publicity. The New York Times of March 30, 1961, carried a story which I herewith insert in the CONGRESSIONAL RECORD.

EISENHOWER GETS JAPANESE APOLOGY

PALM DESERT, CALIF., March 29.—Members of the Japanese national student federation, known as Zengakuren, apologized today to former President Eisenhower and the American people for the part they played in last year's student riots.

Koichi Morita, chairman of the student federation, spoke on behalf of 40 students present to General Eisenhower in front of his winter home at the El Dorado Country Club here.

Mr. Morita explained that the June 16, 1960, riots in which James C. Hagerty, then the White House press secretary, was mobbed and President Eisenhower was stopped from visiting Japan had caused many Japanese students to reanalyze their own beliefs and in doing so many became firm advocates of moral rearmament.

"If this was a development of these riots," General Eisenhower said, "they turned out to be a success instead of a failure."

"I'm for you 100 percent," he added, "I want to come to Japan this fall to assure the people that we [Americans] don't want to dominate any country either economically or militarily. We don't want any territories. We just want to keep the world free."

Approximately 75 members of the world-wide moral rearmament movement met with General Eisenhower.

AN EASTER MESSAGE FOR THE WHOLE WORLD

Mr. LINDSAY. Mr. Speaker, I ask unanimous consent that the gentleman from Washington [Mr. TOLLEFSON] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. TOLLEFSON. Mr. Speaker, one of the outstanding figures in the world, and one who has done as much as anyone else in our time to bring about better understanding and better relationships among many nations, is Dr. Frank N. D. Buchman, the initiator of Moral Re-Armament. The great work of this world force is well known to many people throughout the world and to Members of Congress. The latter will be much interested, I am sure, to read his "Easter Message for the Whole World" which I am inserting in the CONGRESSIONAL RECORD.

AN EASTER MESSAGE FOR THE WHOLE WORLD—ALL THE MORAL FENCES ARE DOWN

(By Dr. Frank N. D. Buchman)

In Oxford a few months ago, my old friend, Sir Richard Livingstone, once vice chancellor of the university and a leading educator of the world, said, "When you and I were young, there were moral fences on the road of life. We did not always keep to them. But we always knew when we crossed them. But today all the moral fences are down, and look at the world. Your job is to build these fences anew."

In country after country it holds true. In one country people shamelessly admit their leaders have their mistresses and are just not honest. They say men in the Cabinet have their price. That country is very close to Communist takeover. Today whenever the moral fences are down, communism walks in.

Leaders of Japan came to see me. They said the moral fences were down in their country. They admitted they were down in their own lives. Corruption, mistresses, dishonesty in politics had become a way of life. These men and women decided to build the moral fences again in their lives and in their nation. Then came the rioting in Japan at the time of the American-Japanese Mutual Security Pact. The Government felt it was a critical moment for Japan and the world. Prime Minister Kishi sent word a short time ago, "At the crucial hour men trained in Moral Re-Armament in labor, youth, and politics stood up and refused to compromise with evil."

THE TIGER

Then we met the leaders of the Zengakuren student organization which had created the riots of 300,000 before the Diet buildings. They had mobbed the car of James Hagerty, press secretary to President Eisenhower, and kept the President from visiting the country. The chairman of the Foreign Relations Committee of the Diet at that time, speaking recently in Washington said, "That moment was another Pearl Harbor in the relationships between my country and America." These youth leaders changed. They saw how communism through their moral weaknesses had used them in an effort to take over their country. They have put their experiences in a play. They call it "The Tiger." It clearly shows how men without moral standards become the tools of men with an ideology and how so-called private sins become a public menace and how through Moral Re-Armament they found a new direction for themselves and for their nation.

The statesmen who understand the real nature of the ideological battle immediately called these young men and women with their play to their aid. They came to Germany. They played in all the major cities and to units of the Armed Forces.

In France the leadership concerned with rebuilding the moral fences of the nation invited "The Tiger" to Paris. Among them were Robert Schuman; the president of the Senate Monnerville, General Bethouart and Gabriel Marcel. It was national news. A film producer said he had never seen a Paris audience so gripped.

It was Robert Schuman who said to me at the Japanese Peace Treaty Conference in San Francisco, "You made peace with Japan 2 years before we signed it."

As the moral fences are repaired the answer is being brought to the antifeelings about other nations which are so prevalent today. It was in Paris at Mont Valerien, the World War II shrine to the French resistance, that Madame Anthonioz, the niece of President de Gaulle, and Madame Ely, welcomed for the first time since the war representatives of the German nation. They were a group of mineworkers who through Moral Re-Armament had found the answer to the ideological infiltration of their nation. They said at that time, "We do not ask you to forget. We do ask you to forgive and unite with us to remake the world."

RESTORED TO THE CHURCH

In sharp contrast with the form of pressure being exerted on their neighbors by nations which have deliberately rejected moral standards is the work of another Frenchman. For 45 years he was a Marxist, a seaman, Victor Laure, one of the favorite pupils of Marcel Cachin. He and his wife, Irene Laure, who was secretary general of the 3 million Socialist women of France, decided to change and rebuild the moral fences in their family life and in France's relationships with Germany and North Africa. Chancellor Adenauer was one of the first to write a letter of condolence to Madame Laure just a few weeks ago on the death of her husband.

German and French leaders say of Victor and Irene Laure, "These two have done more than any other living couple to bring about understanding between our two countries." These two had found the element of unity at Caux. They were restored to the church and married there. Said their son who pioneered this work in Brazil, "It is unusual for an adult son to be present at his parents' wedding."

It was Victor Laure and Madame Laure whom Mohammed Masmoudi, Minister of Information for Tunisia, first met when he came to Caux. He said at that time, "I was as full of hate as a bomb is full of explosion. I had a letter from my mother saying, 'God bless you, my son, and God curse the French.' But after meeting the Laures I replied, 'God bless me. I need it. But do not curse the French. I have met French people with whom we can work to build a solid bridge between North Africa and Europe.'"

This way of restoring broken fences has been forgotten. Victor Laure is an example of what God intends men to be and to do for their nations. Victor also made friends with the first Prime Minister of independent Morocco who found a new approach to the French-Moroccan division. He wrote me, "I am determined to make absolute moral standards the basis of our government," and his late King, Mohammed the Fifth, sent me this word: "You will find Morocco is ready soil for Moral Re-Armament. We need this ideology to maintain the freedom we have won."

The Japanese leaders with their play "The Tiger" are now in America. They have received standing ovations from packed-out houses in the Carnegie Hall in New York, in Washington, and in the Henry and Edsel Ford Auditorium in Detroit. In New York they met Mr. Hagerty whom they had mobbed at the Tokyo Airport. He saw their play. He was moved. He came to the stage afterwards. He said, "This is more than an apology." He recognized one young Japanese as one of the men who had been threatening him through the window of his car. The news of this astonishing sequel to the story of last year's riots has swept across America by television. It has been seen by the millions in the Philippines in the same medium and in Japan.

Police chiefs throughout the world are welcoming this message. In Washington the police arranged a special showing for their men including the White House Police. Deputy Commissioner James J. O'Brien, of New York, who welcomed the Japanese at Carnegie Hall, was also responsible for showing an MRA film and giving the news of the advance of MRA to police chiefs of the world meeting at their annual convention in New York. They admitted this was the one thing which had the fundamental answer for the acute problems they face.

The military men of the world too are responding. One of the senior generals in America received these young Japanese. He said to them, "Both President Eisenhower and I were puzzled why after we had done so much economically for Japan there was such resistance to America and to the visit of the President. Now I understand. You men have a spirit money cannot buy. It must be built into every nation."

ONE HUNDRED PERCENT FOR YOU

General Eisenhower when he received the Japanese Zengakuren student leaders in Palm Springs last week said, "I am for you 100 percent. I cannot tell you how happy I am to have you come and tell me of the changes that have taken place in your lives. This is the last act in the June riots and it has a happy ending. I hope to go back to Japan in the fall, but I don't expect to see you there. I expect to see you in South America and other places taking this message there. We have got to have an absolute conviction and be ready to sacrifice. Mankind is not going to live in peace until they have a higher moral plane on which to conduct their affairs."

Now these young men are planning to take their message into South America. They know that communism gallops across lands where the moral fences have been destroyed. It edges forward through the soft spots in men's characters. They know that a man who can be bought with women, men, drink, position, power, will be used by communism in its bid for control. Moral breakdown is the problem. Moral Re-Armament is the answer.

OUTMATCHING COMMUNISM

The leaders of Hollywood welcomed these Japanese to America. In a message to their opening in Carnegie Hall, they said, "The ideology of Moral Re-Armament must become the policy of our nations. You are equipping the nations of the world with the ideology to outmatch communism and answer its causes." Think of the miracle of Hollywood beginning to build moral fences for the millions. Through movies and television, Hollywood producers, actors, and technicians are preparing films on Moral Re-Armament for the world.

Stars like Muriel Smith, called the greatest voice on film today, and Ann Buckles of Broadway fame, are devoting all their lives and energy and talent to restore to the nations the moral standards which in the past so much of the product of Hollywood has been tearing down.

It was Muriel Smith's song, "The World Walked Into My Heart," which she sings in "The Crowning Experience," now filling theaters with record audiences on every continent, that won the heart of one of Japan's great political personalities, Saburo Chiba. He recently visited me in Europe. He said, "Moral Re-Armament taught my granddaughter to recognize right and wrong. It has given me the courage to live and speak the full truth before all men." It is his conviction that the leaders of the nations must unite to restore the moral fences around the world.

He was received by Chancellor Adenauer in Germany, by leaders in France and Rome. Everywhere the response was the same. Having seen the power of the play in his own Japanese, he understood the work of St. Francis, for St. Francis built the moral fences in the church when he produced a play before the door of the Cathedral in Florence that healed the rift between the mayor and the church.

ALTERNATIVE TO PEKING AND MOSCOW

From Rome Mr. Chiba went to Rangoon. There on the front page of The Nation was headlined his conviction: "Moral Re-Armament, the Answer to Communism." He told of the determination of himself and his colleagues to build an Asian Center for Moral Re-Armament in Japan, an alternative to Peking and Moscow, for the leaders of these nations. Prime Minister Kishi and Mr. Chiba are building the fences again in Japan with some success.

One of Mr. Chiba's colleagues in Burma is U Narada, secretary of the Presiding Abbots Association, who has distributed the Moral Re-Armament pictorials with the aid of his 80,000 monks through the length and breadth of the land. More recently they had "The Crowning Experience" shown officially at the fifth all-Burma Assembly of the Presiding Abbots Association in Mandalay. He said, "Our work is to make Moral Re-Armament the policy of our nation."

U Narada had just returned from meeting with leaders of Kerala in South India. These men are now taking the answer they have worked out in Kerala to Bengal which threatens to become the Yenan of India. As a result of their change, the Kerala Janatha reported recently that of 612 members in six branches within an area covered by one Communist-controlled village council, there are now only 74 left on the rolls. The former secretary of the Kallara branch of the Communist Party describes the party as "struggling for breath" and is quoted as saying, "MRA has shattered the Communist Party's centers of exploitation." This man had been a full-time Communist worker for 13 years. Through MRA he says, "At last I have begun to understand the meaning of right and wrong. God is telling me to put right what is wrong in my past in order to see things clearly in the future." These men are determined to restore moral fences in India for they know when moral fences come down enemies of freedom come in.

BULWARK IN THE CONGO

Take the Congo. For nearly a year the force of MRA has been building up fences in that strife-torn land. Among them are former Mau Mau leaders from Kenya, working with white settlers; black and white South Africans; three young Americans, who gave up Hollywood contracts to use their genius in song to bring an answer to nations. Through months of violence and chaos they sang their songs in Swahili, Chiluba, Lingala, and French on the national radio. Twice a day at the most popular morning and evening hour of broadcasting, their message went out to millions. They met with thousands of Congolese and U.N. forces in the Congo, and records of their songs are popular everywhere.

With their friends they gave training in MRA night after night to troops and their officers. The American Ambassador introducing these Colwell brothers to a diplomat visiting the Congo, told him, "These men have been a bulwark in the frontline of the battle here. They stuck in there with their radio broadcasts even after the Communists had taken over."

The MRA force was invited by the head Sisters, St. Augustine order, Leopoldville, to the cathedral ceremony where new Congolese nuns were to take their vows. Dr. Close, formerly surgical resident at Roosevelt Hospital in New York, had been the only white surgeon to remain on duty when the crisis was at its height and was responsible for a hospital of 1,200 beds. He earned the gratitude of the nation by his services. When he and his MRA friends arrived at the cathedral, they were met and escorted to seats of honor among the parents of the new nuns. They were the only white people there except for the clergy and European nuns among a congregation of 2,000.

The MRA force was invited to Katanga. There the Mwami Mwata-Tamvo, grand chief of the Lunda and greatest tribal ruler in Katanga, received them. The king's drummers sounded a beat heard for 15 kilometers around to summon the elders and people to the palace. The king, wearing his beaded robes, was carried in his ceremonial chair to the assembly of the people. Seated with the king were elders, also in beaded headdresses, and the royal princesses.

Traditional spearmen and modern soldiers stood on guard. The king said, "I am grateful for what you have brought us. You have taught us many new things. Stay with us a long time."

The MRA force went to President Tshombe with the conviction, "A President who sets a new standard of discipline and a new pattern of living will build an incorruptible nation." The Colwells sang him a song written in his own language. President Tshombe told them, "Everywhere you go people will accept this ideology. We will all be brothers." When told of the reception given by Grand Chief Mwami Mwata-Tamvo, his face lit up. He said, "He is my father-in-law. I was born there." Leaders of Katanga said, "When some people come to us, we fire off guns and make a lot of noise. But they leave nothing behind. Your coming has created a peaceful revolution."

An official in the Swiss Red Cross unit in the Congo said on his return to his country, "Moral Re-Armament are doing the only thing that is really effective in the Congo."

ALLTIME RECORD

In Lucerne, in the Catholic heart of Switzerland, showings of "The Crowning Experience" have broken all records. The Hollywood Reporter carried the headline, "Half Population Attends MRA Film." The story says, "In Lucerne, Switzerland, this city has 70,000 inhabitants, and during a period of low cinema business due to continually fine weather, the MRA feature 'The Crowning Experience,' starring Muriel Smith and Ann Buckles, has chalked up its 35,000th customer with a 32-day run. This is an all-time attendance record for a film of non-Swiss origin."

News of the response in Catholic Switzerland has been translated into Latin American tongues. Translated into Spanish and printed on miniature sized pages, it was dropped from the air on Cuba by the largest Cuban newspaper now published in Miami.

Japanese students are planning to take their play ""he Tiger," with its answer to subversion and communism, to the South American Republics. There is need for an intelligent and unified thrust forward in these countries where economic aid is necessary but cannot succeed unless it is backed with a moral ideology that changes men. Miami, is the throttle which affects the speed of the movement between the South American Republics and the rest of the world today. At Miami from April 14 to April 24 will be held an assembly for the Americas.

In the invitation they say, "We need political and economic measures, but above all we must create the new type of man."

The dockers of Brazil wrote and produced a film describing how they had ended gang warfare, pilfering and interunion rivalry, to make their port once again prosperous and peaceful. When Mr. Kishi, as Prime Minister of Japan, arrived at the port of Rio, he was met by waterfront workers changed through MRA. One of them, who had worked for 30 years as a militant dockers' leader, took off his trade union pin and gave it to Mr. Kishi in thanks for help given by the Japanese dockers whom they met at MRA assemblies. Mr. Kishi proudly wore that trade union pin when he returned to Japan.

A VERITABLE REVOLUTION

A French Ambassador to Brazil says, "I have met these men. Every word is true. When I arrived in Brazil gang warfare was rife in the docks. Black and white were settling their differences with knives. Police did not dare enter some sections of the dockers' quarters. One day I heard that a veritable revolution was under way among the dockers and was changing the spirit of the port. This story is not fiction. It is a human tapestry woven in the lives of men who have found a new wisdom. They are convinced their experience has a message for all nations."

These films of MRA are going from Catholic center to Catholic center in Latin America at the invitation of Catholic priests. They are welcomed for the new life they bring and the radiant hope that things can be different.

Adm. Sir Edward Cochrane will be at the Miami assembly. He was one of the great commodores of convoys in World War II, and was decorated for his courage. He knows the leaders of South America and has been traveling for years in those countries. His ancestor, Adm. Lord Cochrane, known as Cochrane the Liberator, is a household word throughout Latin America.

Men will be coming to Miami from Peru, Argentina, Uruguay, Paraguay, Chile, Brazil. Brazilian dockers' leaders will be in Miami. Former Communist leaders who through MRA have changed and are giving an answer to their countries—political, industrial, and labor leaders from America will be there. Rajmohan Gandhi, grandson of the Mahatma, will be coming, and Peter Howard, journalist and playwright from Europe.

These men with delegates from many parts of the world are going to study and train in Miami.

An American admiral, who went three times to similar assemblies for training in MRA and whose wife went for a fourth time, was asked by his strategy board in Washington to tell them what was going on at these assemblies. He replied, "I learned what an ideology means—to start doing what we should have been doing all along and to do it all day every day for the rest of our lives."

FREE COMPETITIVE ENTERPRISE AND THE AMERICAN TELEPHONE & TELEGRAPH CO.

Mr. PUCINSKI. Mr. Speaker, I ask unanimous consent that the gentleman from California [Mr. HOLIFIELD] may extend his remarks at this point in the RECORD and include extraneous matter.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. HOLIFIELD. Mr. Speaker, America has grown to greatness under the free competitive enterprise system.

It is this economic system which we offer as the free world's alternative to state control and monopolies of the Communist and Fascist states of the world.

Yet we permit the American Telephone & Telegraph Co. and the Bell System companies to operate as monopolies under state control. Monopolies are allowed in the publicly regulated areas of our economy to best serve the public interest. However, in the operation of such monopolies many times the public interest is not protected let alone best served.

The American Telephone & Telegraph Co. and the Bell System companies are the major operators of telephonic communications in the United States. All oversea voice communications are provided by the American Telephone & Telegraph Co. At present it is seeking worldwide monopoly in using communications satellites to provide commercial telephone, television, data, and global communications.

The American Telephone & Telegraph Co. now is pushing vigorously for this preferred position. The company knows that by obtaining the aid of the Federal Space Agency and the consent of the Federal Communications Commission in orbiting a communications satellite, it could exclude all potential competitors from being able to operate. Furthermore, if successful in this venture it would add fuel to the fire that the U.S. worldwide communication satellite program is devised to enrich the

private communications interests rather than to benefit the people of the world.

I believe it is time to take stock of what is going on. The Congress should decide whether there will be competition in satellite communication systems which will affect the entire world or shall the American Telephone & Telegraph Co. be granted also this monopoly allegedly under Government regulation or control. In any event, it is necessary that the public interest be best served. At present it is becoming more obvious that the public interest has not been protected and that the American Telephone & Telegraph Co. has been able to lull the responsible supervisory governmental agencies to a point so the American Telephone & Telegraph Co., in most instances, may do what it pleases.

INTRODUCTION

Without going to trial, the Department of Justice entered into a consent decree judgment with American Telephone & Telegraph Co. on January 24, 1956. This occurred approximately a half century after the first complaints were received and some 20 years after the first congressional steps were taken to force action, and 17 years—the life of a patent—after the publication of the report of the Federal Communications Commission to the Congress in 1939.

This consent decree accomplishes little, if anything, in the public interest. The heart of the complaint was that American Telephone & Telegraph and Western Electric Co. were conspiring to monopolize the manufacture, distribution, and sale of telephones, telephone apparatus, equipment, materials, and supplies and did have a monopoly in these areas. The remedy sought was the separation of Western Electric from American Telephone & Telegraph and the division of Western Electric into three separate entities. None of these goals was achieved.

What was hailed, as of January 24, 1956, as an achievement by the Department of Justice were the provisions in the consent decree affecting some 8,600 Bell System patents. Yet these statements were obviously made without the realization of the dire consequences due to the pitfalls of the patent grant back provision.

BACKGROUND

In the 1920's and early 1930's many complaints were registered with the Congress concerning the operation and regulation of American Telephone & Telegraph Co.—hereinafter called A.T. & T.

With the advent of Franklin Delano Roosevelt and the Democratic Congress, the Administration and Congress moved into action. This led to the passage of the Communications Act of 1934 under which the Federal Communications Commission—FCC—was established to extend communications regulations to telephone and telegraph services and to centralize all such regulations in one Government body.

Shortly thereafter in 1935, the FCC proceeded with an investigation of A.T. & T. and the Bell System companies. This investigation was authorized by House Resolution 8, 74th Congress. It culminated in 1939 in an FCC report—House Document No. 340, 76th Congress—to Congress that found extensive antitrust violations and recommended urgent action.

World War II intervened before action could be taken.

Finally, in 1949 the Department of Justice filed an antitrust complaint against A.T. & T., Bell Laboratories, and Western Electric, basing its action on the facts brought out in the original FCC report.

THE COMPLAINT

The complaint filed January 14, 1949, charged that A.T. & T. and its wholly owned subsidiary, the Western Electric Co. were conspiring to monopolize the manufacture, distribution, and sale of telephones, telephone apparatus, equipment, materials and supplies.

A.T. & T. was charged with refusing to purchase from manufacturers other than Western Electric, even though the equipment manufactured by such manufacturers was superior in operating economy, service, and initial cost.

The complaint charged that A.T. & T. owns and operates more than 98 percent of the facilities used in the rendition of long-distance telephone service in the United States. It owned and controlled operating companies furnishing approximately 85 percent of all local telephone service in the United States; and required these operating companies and the Long Lines Department to buy substantially all of their telephone equipment from Western Electric. In turn, Western Electric manufactures and sells more than 90 percent of all telephones, telephone apparatus and equipment sold in the United States. It alleged that the absence of effective competition resulted in higher prices for telephone equipment, and higher subscriber rates. It noted that the two concerns control both plant investments and operating expenses.

The complaint further charged, as part of the conspiracy to monopolize the telephone industry, that A.T. & T. and Western Electric bought up or eliminated competitive manufacturers of telephones, telephone apparatus, and equipment and that A.T. & T. gives Western Electric the exclusive right to purchase and sell all surplus and scrap equipment of A.T. & T. and the Bell System companies.

REMEDIES SOUGHT

The complaint sought the separation of Western Electric from its parent by directing A.T. & T. to dispose of its stock ownership in Western Electric. It sought to dissolve Western Electric into three competing manufacturing companies, and to require Western Electric to dispose of their 50-percent stock ownership in Bell Telephone Laboratories to A.T. & T., fostering conditions under which A.T. & T. and its operating subsidiaries would thereby buy telephone equipment only under competitive bidding. In addition, the complaint sought to compel the two defendant companies to license their patents to all applicants on a nondiscriminatory and reasonable royalty basis together with technical assistance and know-how to use such patents.

THE HEART OF THE COMPLAINT

The core of the complaint was that A.T. & T. and Western Electric had destroyed competition in the manufacture and produciton of telephones, telephone equipment, and apparatus; that Western Electric is an illegal monopoly. It pointed out that the operations of A.T. & T. manufacturing subsidiary, Western Electric, are not subject to public utility regulations and hence should be in the sphere of our free competitive enterprise system. On the other hand, the operations of A.T. & T. and its operating companies, are subject to public utility regulation. The purpose of this complaint was to do away with Western Electric's operation of a prima facie illegal monopoly under the protection of the natural monopoly enjoyed by A.T. & T. and its operating companies as a public utility.

STATUS OF CHARGES MADE IN THE COMPLAINT IMMEDIATELY PRIOR TO THE CONSENT DECREE

Former Assistant Attorney General Barnes, in charge of the Antitrust Division at the time of the consent decree, testified on March 29, 1956, before Subcommittee No. 5 of the House Select Committee on Small Business, chaired by Mr. ROOSEVELT, that the charges referred in the complaint were still true as of the date of negotiating the consent decree except as to the exclusive dealing allegation between Western Electric and A.T. & T. The allegations admitted to be true by Judge Barnes suffice to prove prima facie that Western Electric is a monopoly of formidable proportions and as such is illegal under the antitrust laws of the United States.

THE CONSENT DECREE JUDGMENT ABANDONMENT OF PURPOSE

However, Judge Barnes stated before the House subcommittee that the original purpose to separate Western Electric from A.T. & T. had to be abandoned for the belief that the court would not go along. No further explanation was possible according to Judge Barnes—why? No further explanation was preesented to the Monopoly Subcommittee of the House Judiciary Committee, chaired by Representative CELLER, even though it was sought.

Yet in the Pullman Co. decree citation, the court did order the separation of Pullman's unregulated monopoly in the manufacture and sale of sleeping cars from the Pullman Co.'s governmental agency regulated sleeping car operational service. That, as here, an unregulated monopoly hid behind the protection of a Government regulated monopoly but came far short of controlling 90 percent of the market.

THE CONSENT DECREE VERSUS THE COMPLAINT'S PRAYER FOR RELIEF

As a result of the provisions of the consent decree, Western Electric is still a wholly owned subsidiary of A.T. & T. Its manufacturing monopoly is unbroken. It still has a 50-percent stock ownership in Bell Telephone Laboratories.

Nothing in the decree requires A.T. & T. and its operating subsidiaries to buy telephone equipment under competitive bidding. It can refuse to purchase from any manufacturers other than Western Electric, even though equipment manufactured by such manufacturers is superior in operating economy, service, and initial cost. However, Western Electric is required by the decree to manufacture for A.T. & T. and the operating companies.

The decree allows A.T. & T. and Western Electric to buy up or otherwise legally eliminate competing manufacturers of telephones, telephone apparatus, and supplies. Western Electric is specifically given the exclusive right to purchase and sell all surplus and scrap equipment of the Bell System companies—a formidable monopoly in itself.

Nor has the economic position of A.T. & T. been altered. It still owns and operates more than 98 percent of the facilities used in the rendition of long-distance telephone service in the United States. It owns and controls operating companies furnishing about 85 percent of all local telephone service in the United States. It may require their operating companies and their long lines department to buy substantially all of their telephones from Western Electric which manufactures and sells 90 percent of all telephones, telephone apparatus, and equipment sold in the United States. This operation is certainly not free, competitive enterprise.

What then does the consent decree do to restore competition in the manufacture, distribution, and sale of telephones, telephone apparatus, equipment, materials, and supplies and break up the monopoly charged in the original complaint filed in 1949?

POSITIVE STEPS UNDER THE DECREE

A.T. & T. and the operating companies are enjoined from engaging in any business other than the furnishing of common carrier communications services. Western Electric is required to manufacture and is limited to manufacturing for A.T. & T. and the operating companies. It was compelled to sell Westrex, a minor subsidiary, which makes sound recording equipment for the movie industry. However, it may engage in any business or function when acting for the U.S. Government or any agency thereof.

The net effect of these provisions of the consent decree is to remove Western Electric, and Bell Telephone Laboratories with their research and manufacturing capacity from that area of the commercial market place, for example, electrical equipment, where they did not have a monopoly and where they were either a potential competitor or an actual competitor. This made General Electric, Westinghouse, and RCA—Radio Corporation of America—more secure in their commercial markets.

Although Western Electric is confined to the manufacturing activities it engages in for A.T. & T. and the operating companies which are restricted to common carrier communications services, there is left both remarkable variety and scope to its operations. Digital computers, teletypewriters, recording devices, telephone answering devices, radio transmission and receiving, dataphone—inventory data—photowire service, wiring cable, electronic components, transistors, tubes, batteries, telephones, and electrical equipment are all within their bailiwick. Digital computers and recording devices, since they may be attached to the telephone system and the service rendered, rightly fall within the term "common carrier communications services." Furthermore, Western Electric may engage in any business as a prime contractor, subcontractor, or consultant if for a governmental instrumentality.

DEPARTMENT OF JUSTICE'S ATTEMPTS TO JUSTIFY THE CONSENT DECREE REGULATION BY THE FEDERAL COMMUNICATIONS COMMISSION

One of the major points made by the Department of Justice in attempting to justify this consent decree is that A.T. & T. is now confined to regulated areas, thus enabling more effective regulation.

Monopolies are allowed in the publicly regulated areas of our economy in order that the public interest may be best served. The regulatory agency has the duty of maintaining closed supervision over the utility to protect the public interest. A.T. & T. and the Bell System operating companies are carriers providing communications and their interstate operations are subject to regulation by the Federal Communication Commission under the Communications Act of 1934.

When the Department of Justice stated that A.T. & T. is now confined to regulated areas, thus enabling effective regulation, it may well mean effective regulations by A.T. & T. for the benefit of A.T. & T., the Bell System companies, and Western Electric. However, it is certain that any such action does not promote free competitive enterprise. As to how the public interest is or is not being served and how close supervision is or is not being maintained over the utility to protect the public interest, I plan to discuss at a later point in this paper.

THE DEPARTMENT OF JUSTICE'S ATTEMPT TO JUSTIFY THE CONSENT DECREE ON THE EFFECT OF THE LANGUAGE OF SECTION IX OF THE JUDGMENT

The 1939 Report of the Federal Communications Commission to Congress on Investgiation of the Telephone Industry—pursuant to Public Resolution 8, 74th Congress—pointed out Western Electric's lack of a basic cost accounting system and that it was impossible to secure "significant competitive prices upon equipment included in the rate basis underlying 90 percent of the telephone business in the United States."

The Department of Justice claims that the effect of the language of section IX of the judgment will develop an effective basic cost accounting method of determining the reasonableness of the costs and prices of telephone apparatus, equipment, and supplies, where the manufacturer or supplier and the operating company are under common ownership. The language is:

Western is ordered and directed to maintain cost accounting methods that conform with such accounting principles as may be generally accepted and that afford a valid basis, taking into account the magnitude and complexity of the manufacturing operations involved, for determining the cost to Western of equipment sold to A.T. & T. and Bell operating companies for use in common carrier communications services.

The language is broad, vague, ambiguous, and meaningless and is doubtful if a court would hold Western Electric in contempt for an alleged violation of this section.

No basic cost accounting method is set out that could be effective in determining the cost of the equipment manufactured by Western Electric. Furthermore, Western Electric's cost accounting methods have not provided an authentic basis for determining the reasonableness of charged prices and it is still impossible to secure a competitive price as to Western Electric manufactured equipment for Western Electric has 90 percent of the market while other telephone manufacturers divide up the remaining 10 percent. When queried by the House subcommittee as to what changes this language would make in Western Electric's accounting methods, Judge Barnes stated "We do not necessarily know that it will make any." Thus, it is not seen how this language creates any significant change from the conclusion reached in the 1939 Federal Communications Commission's Telephone Report.

Furthermore, the absence of effective control on any particular area of an overall operation can tend to defeat regulatory efforts in another area. For example, A.T. & T. could order their manufacturing subsidiary, Western Electric, to adopt policies and prices which would make their alleged reasonable service rates actually unreasonable. Therefore it is absolutely essential that the Federal Communications Commission determine, in all instances, whether service rates are actually reasonable—which the agency has not done.

DEPARTMENT OF JUSTICE'S ATTEMPT TO JUSTIFY THE CONSENT DECREE BASED ON THE PATENT SECTIONS OF THE JUDGMENT

PATENTS—THE HEART OF THE COMPLAINT?

Assistant Attorney General, Judge Stanley Barnes, stated after the decree was entered into, "finally, at the heart of the complaint was the charge that the Bell System's strong patent system had been used to protect Bell from competition by alternative methods of communication, and to divide markets with concerns engaged in telephone, as well as noncommunication fields." The Department of Justice press release dated January 14, 1949, announcing the filing of the A.T. & T. complaint, makes no reference to this as being the heart of the complaint, and it is not evident from the actual filed complaint. Furthermore, it appears from the 1939 Federal Communications Commission Report and T.N.E.C. Monograph No. 31, that Judge Barnes' statement was correct prior to 1907 but not thereafter. The following quote is from Monograph No. 31:

In 1907 the Bell System fell under the dominance of the investment bankers. A change in strategy attended the coming to power of the Houses of Banker and Morgan. Capital passed in the strategic place form-

erly occupied by technology and the arts and wiles of high finance were called in play. In instances it was cheaper to buy out the independents that to fight them; in others, it was more feasible to deny access to funds than to press the infringement suit. Finance suggested an easier, less expensive, far surer way to abate a nuisance. The blow was delivered from under cover and was not subject to judicial review.

There is nothing in the referred to materials to disclose a return to the prior-to-1907 strategy as indicated by Judge Barnes.

Judge Barnes has further asserted "and, via extraordinary patent relief the decree seeks to promote competition in the nonregulated areas, as well as in the production of telephone components in the regulated sector". This suit brought to restore competition in the manufacture and sale of telephonic equipment. Yet, all the conceivable patent relief cannot restore competition as long as Western Electric is left with 90 percent of market control and as long as A.T. & T. and the Bell System companies will purchase its equipment only from Western Electric.

PATENT RELIEF IN THE ELECTRONIC FIELD

The Antitrust Division of the Department of Justice has also attempted to justify the decree by stating that a measure of patent relief has been granted in the electronic field.

PATENT RELIEF, ILLUSORY OR IMAGINARY

Prior to the filing of the complaint in 1949, A.T. & T. published a patent licensing policy which would license anyone for any purpose at a reasonable royalty rate. This patent license included the furnishing of know-how and technical information that went with the patent. Dr. Vannevar Bush, a director of A.T. & T., has stated that A.T. & T.'s transistors patents were licensed at a reasonable royalty rate, based as a reasonable fee for know-how and a proportional development cost of the invention.

The consent decree requires royalty-free licensing to all applicants on the then 8,600 existing patents of A.T. & T. and Western Electric. However, this license does not provide the licensee with technical information and know-how. If a royalty-free patent licensee desires know-how and technical information the decree requires him to pay Western Electric a reasonable amount for the know-how and technical information. Under the decree, the reasonable amount permitted shall reimburse A.T. & T. for the cost of gathering and reproducing the technical information, a reasonable allocable proportion of the development expense of the class of equipment for which information is being furnished, and related development and engineering expense accounts of Western Electric.

The Department of Justice has admitted that the charge for know-how and technical information allowed under the consent decree could be as much as the former royalty. It is conceivable that the reasonable amount charged for know-how and technical information under the decree even exceeds the former reasonable patent royalty charge which included this assistance.

Furthermore, a substantial number of the 8,600 royalty-free patents involved in the consent decree have expired. Patents issued subsequent to the date the consent decree judgments are to be licensed at reasonable royalty rates.

The decree accomplishes very little in requiring the licensing of the patents involved, as it only makes the previous Western Electric—Bell System companies—patent-licensing policies mandatory.

For this negligible concession what do A.T. & T. and Western Electric receive in return?

PATENT RELIEF FOR A.T. & T., WESTERN ELECTRIC AND BELL LABORATORIES

A.T. & T. and Western Electric are required under the terms of this consent decree to grant a patent license to all applicants but only if the applicants or their associated companies shall grant a license subject to reasonable royalty to A.T. & T. and Western Electric under any or all of the applicants' existing or future patents. Therefore, if one takes a license under the provisions of this consent decree he has to open up his own research and development on new and improved products and processes which become patented to A.T. & T. and Western Electric. This grant back allows the giant colossus—A.T. & T.—if it so desires to rape any patent licensee of their research and development efforts for A.T. & T. and Western Electric certainly have the facilities and the necessary legal monopolies to execute the marketing of any new or improved product or process in the marketplace, even to the exclusion of the inventor. This is especially true in the common carrier communications equipment market and the markets secured by the award of enormous Government contracts.

Despite the provision in the consent decree providing for one license for all the Government departments and agencies the Civil Division of the Department of Justice, acting for all the various governmental agencies, negotiated a patent licensing agreement with Western Electric outside the provisions of the consent decree to avoid the pitfalls of the grant back provision.

The consent decree could not abolish the American patent system. However, it does attempt to destroy the intent and purpose of the antitrust laws, the patent laws and system by the patent licensing provisions of this consent decree. For when an inventor or a corporation takes a patent license from Western Electric with the resultant grant back license, the effect as between the licensee and Western Electric is to destroy the protection the patent law provides in the marketplace.

The effect of this grant back provision raises the important query whether the management of the companies, having taken a patent license under the provisions of this consent decree, can afford to authorize expenditures of millions of dollars in the development of new products and processes that will be appropriated the moment they are placed on the market. The American patent law, by its grant to the inventor to exclude others from using the invention, attempts to provide an incentive to invent by assurance of possible economic return through the marketing of the invention. The only measure of an invention's financial worth is what can be obtained from marketing the invention. With A.T. & T.'s and Western Electric means to control the market and their access to the inventions of patent licensees under this decree, the financial worth to the patent licensee of his own inventions becomes highly speculative. The resultant effect of the patent licensing provisions under this consent decree could create loss of economic incentive to invent, produce, and market new and improved products or processes through research and development, for a captive technology offers little or no chance to invent except to those already in control, or to others on such terms as those in control dictate.

POSSIBLE DESTRUCTION OF A COMPETITIVE FACTOR

The patent monopoly—exclusive right for 17 years to exclude others from using the invention—is one of the very few possible protections that the small inventor, small, middle, and even large businesses have in the market areas where they attempt to compete with A.T. & T. and Western Electric.

The inventor and the corporation, in competition with Western Electric, need every possible advantage, for no one can rival A.T. & T. and Western Electric in having or obtaining capital, credit, manufacturing facilities, research and development laboratories, regulated monopoly operations, monopoly protected operations, ability of being favored as Government contractor, guaranteed income returns without a determination of the reasonableness of the rates, and the added market protection granted to A.T. & T. by the Federal Communications Commission and public utility commissions by tariff regulation. Other devices used by A.T. & T. are the application of sanctions against competitors who seek to add attaching devices to the common carrier system, agreements with giant potential competitors not to infringe each other's market area, volume production through mass manufacturing means with a volume guaranteed market creates an item price sufficient to drive competitors out of the remaining market, ability of investment banking houses interested in A.T. & T. to choke off capital or credit to competitors, package tie-in tariffs, unfair trade practices such as poor service to competitors with allowable attachment devices and many others.

The Bell System companies do not need the patent monopoly to aid them in obtaining market control and they have long held the view "if the American patent system were abolished the next day, it would not make one iota of difference to the Bell System."[1] This would remove an essential marketplace asset and protection of the smaller competitor and leave the competitor even more at the mercy of A.T. & T. and Western Electric.

---

[1] Statement of Dr. Frank Jewett, head of Bell Laboratories before T.N.E.C.

THE EFFECT OF A CONSENT DECREE

"Though consent judgments bind both parties and estop future de novo proceedings involving matters covered, their provisions ofttimes receive only cursory judicial scrutiny."

To quote Judge Barnes:

A consent decree once entered embodies the force of a litigated judgment. * * * To effectuate * * * the basic purpose of the original consent decree—courts may approve modifications after entry. But if the party opposing modification can show "actual disadvantage" or "the persistence of an inequality" stemming from change, the terms of the original decree must stand intact.

Thus the terms of a consent decree does bind the Government and remains intact as to the matters covered unless the other parties to the decree agree to the modification. In allegedly attempting to protect the free competitive enterprise system, the Justice Department, acting for the Government, has legalized Western as a monopoly by this consent decree judgment. The result reached in the consent decree is certainly contrary to the intent and purpose of the antitrust and patent statutes.

Again I ask what has happened to our free competitive enterprise? Do our corporations and Government actually believe in this system or do they merely, with tongue-in-cheek, shout they believe in this ideal to further fool the public?

OPERATION UNDER REGULATION

The Federal Communications Commission must sanction all the tariffs prepared and filed by the operating companies. The tariff then becomes a regulation.

Among such tariff regulations on file with the Federal Communications Commission are those affecting interstate and foreign message toll telephones and rates. They contain clauses barring the use of all devices not specifically authorized in the tariffs. They contain clauses referred to as the "foreign attachment" provisions and have been incorporated in the tariff schedules of telephone service since 1913.

In effect, they protect A.T. & T.—Bell System companies—from competition by alternative methods of common carrier communications since the companies have a monopoly in their area of operation and the tariff regulations "bar the use of all devices, in connection with service, unless the devices are furnished by, or specifically authorized in the tariffs of the telephone company."

As a result, customers may be required to own, maintain, and install some of the facilities at locations where the telephone company's facilities are not available. However, if the telephone company finally decides to provide facilities, the customer is required to use the facilities of the telephone company and not his own. In such instances, there is an obvious hardship on the customer in the form of loss in investment and a much costlier rate. This is certainly not free competitive enterprise but monopoly operation in a manner freely within the operating telephone company's discretion.

Where the tariff permits customer owned equipment, it is required that the equipment be connected to the telephone circuit by the telephone company and by means of apparatus furnished and installed by the telephone company.

Upon successful Federal Communications Commission hearings and appeals by other manufacturers to incorporate their manufactured equipment, such as recording devices, telephone answering devices as allowable under the tariff, the telephone company then provided competing equipment. The average period of time necessary successfully to achieve inclusions through the Federal Communications Commission's procedures within such a tariff is approximately 8 years. This period plus that prior to the bringing of action accounts for the greater portion of the life of a patented invention.

Usually service rates are determined by the local tariffs which are rubberstamped by the local public utility agencies. Thus, as a result, service and service rates are provided and determined by the telephone company practically at its discretion. When installing equipment manufactured by companies other than Western Electric, the telephone operating company may, by its operating discretion, have unfair competitive advantages.

Furthermore, the telephone companies have consistently contended that the Federal Communications Commission does not have jurisdiction to allow attachments on telephone equipment. Where a customer makes use of a device not authorized in the tariff, he is informed by the Bell System companies that he will have his service discontinued. The telephone companies contend the application of sanctions is a matter resting solely with them. The Federal Communications Commission allows them this discretion.

By the operation of the tariff regulations, A.T. & T.—Bell System companies—may secure its own position and that of its manufacturing subsidiary, Western Electric, by using only devices furnished by the manufacturing company and specifically authorized in telephone operating company's tariff. The operational result is that it is almost impossible for an independent, nonaffiliated manufacturing company, either to invent or to provide any device for the common carrier system, let alone major components.

OTHER EXAMPLES OF REGULATION

The Federal Communications Commission has yet to determine the reasonableness of the service rates charged by A.T. & T. for carrying television programs, monochrome—black and white—and color. This service is presently a $50 million a year business and increasing each year. This service has been provided for over the past 24 years without a determination of whether the tariff rates are reasonable.

The Federal Communications Commission also has never determined the reasonableness of tariff rates for oversea telephone service, presently over $25 million a year business, and increasing with each year.

Our integrated defense warning control system—SAGE semiautomatic ground environment—is a multichannel telephone, voice, and telegraph wire service. The Government owns some of the equipment but private lines make up about 75 percent of the system. The Government has contracted for long terms—10 years—to pay the telephone operating companies the published utility rate based on 10-year amortization basis for operating the system. The Government also pays a service fee for the use of those lines. Yet the Federal Communications Commission had never determined if the tariff rates charged the Government for use of the private line services are reasonable. Finally, the General Services Administration, on February 7, 1958, intervened on behalf of the executive agencies of the Government in the docket relating to special construction tariffs—multichannel telephone and telegraph service—and petitioned the Federal Communications Commission to place an immediate rate reduction of 25 percent into effect on the basis the rate was unreasonable. A.T. & T. opposed this petition. General Services Administration filed another petition for expeditious handling on April 30, 1958, which A.T. & T. also opposed. The Federal Communications Commission had its staff examine the submitted and automatically adopted tariffs. Its determination was that the service rate charged the Government was unreasonable and it ordered a reduction of 15 percent into effect.

Through the tariff regulations the telephone operating companies may set their own rates and operating regulations without hardly being subject to review by the regulatory agency.

Monopolies are allowed in the publicly regulated areas of our economy so the public interest may be best served. The Federal Communications Commission has the duty of maintaining close supervision over A.T. & T. to protect the public interest. The Federal Communications Commission should carry out this mandatory duty and should determine whether the submitted tariffs are reasonable. This is essential to the protection of the public interest and the new administration should see to it that the public's interest is protected.

For its relatively successful action in appearing before regulatory agencies where the Government's interest as a consumer is substantial, in accordance with its statutory mandate the General Services Administration has been under constant attack by A.T. & T., the chamber of commerce, and others for saving the Government and other consumers hundreds of millions of dollars.

In summary then, I believe that the following points can be made:

First. The American Telephone & Telegraph Co., the Bell System, and the Western Electric Co. have established monopoly operations in their fields of business.

Second. The U.S. Department of Justice has failed in its antitrust prosecutions to effectively control, prohibit, or substantially modify the monopolistic procedures of this triumvirate.

Third. The U.S. Department of Justice has, through the provisions outlined in its consent decree declarations, ac-

tually legalized certain monopolistic practices of the Western Electric Co.

Fourth. The Federal Communications Commission has failed miserably to protect the public interest during the many years in which this monopolistic combine has been developing.

Fifth. This great and important segment of our business and industrial economy is no longer subject to real competition nor is it effectively controlled by the governmental supervisory and regulatory board charged with the protection of the public interest.

Sixth. Efforts are underway to further expand their monopolistic advantages by excluding competition in the upcoming area of space communication. A.T. & T. has made proposals to the Federal Communications Commission and the National Space and Aeronautics Agency which, if approved, would give them a worldwide monopoly in voice communication through the use of space satellites. The Federal Communications Commission has never established the reasonableness of the service rates for oversea voice communications, but apparently accepted a schedule of rates as suggested by A.T. & T. As the Federal Government would undoubtedly be the best customer in this field, it would seem that the General Services Administration, acting under its statutory powers, should have been a party to the establishment of any schedule of rates in this new medium. The General Services Administration has saved hundreds of millions of dollars in acting for Government agencies in utility rate negotiation. They have, in many instances, forced the Federal Communications Commission to determine the reasonableness of utility rates on service offered to Federal agency consumers.

This particular critical speech deals only with one segment of our business economy. It is only one example of our retreat from the principle of competition in our so-called free enterprise system. Other great segments of business have, for all practical purposes, deserted the principle of real competition.

We can point to similar situations in steel, rubber, chemicals, petroleum products, finance, and labor.

We have been told throughout the complete development of our economy that our progress has been based on the incentives of reward under competitive effort in a free enterprise system. But throughout the length and breadth of our land, we can see a pattern of monopoly, managed prices, regional distribution agreements, collusive agreements between great labor unions and their employers, and rigged collusive bidding gradually taking the place of competitive practices and procedures.

Profits no longer are based primarily on efficiency of production and distribution between real competitors. Profits depend too often upon the elimination of competition through various devices which I have described. I am deeply concerned with the erosion of the competitive principles.

If our system of competitive free enterprise is a valid one, and if it is to succeed in the world struggle against the Communist system of production, it must be allowed to function without crippling distortion. We will not be able to successfully compete with the Soviet system through operating a system that denies the transmission of its benefits to the consumer.

I say we cannot deny to our people the advantages and improvements in the productive and distributive processes of a free society which operates under the competitive principle and which is inevitably stifled when monopoly takes over.

We are in a desperate cold war struggle with the Soviets, not only for the minds, but for the markets of free and neutral nations. If we are to be crippled with the deadweight of monopoly, managed prices, limited production, and unjustified profits we cannot win. We are doomed to failure.

It would be wise to return to the traditional principles of competition before it is too late.

I hope to consider this overall problem from time to time and offer constructive measures to alleviate some of the evils I have described.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. PUCINSKI, for 15 minutes, today.

Mr. COAD, for 30 minutes, today.

Mr. VAN ZANDT, for 2 hours, on April 13, 1961.

EXTENSION OF REMARKS

By unanimous consent, permission to extend remarks in the CONGRESSIONAL RECORD, or to revise and extend remarks, was granted to:

Mr. COHELAN and to include extraneous matter, notwithstanding the fact it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $216.

Mr. ALFORD.

Mr. BALDWIN and to include extraneous matter.

(The following Members (at the request of Mr. LINDSAY) and to include extraneous matter:)

Mr. HALPERN.

Mr. SAYLOR.

(The following Member (at the request of Mr. PUCINSKI) and to include extraneous matter:)

Mr. GIAIMO.

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 118. An act for the relief of Helen Irma Imhoof; to the Committee on the Judiciary.

S. 126. An act for the relief of Edward W. Scott III; to the Committee on the Judiciary.

S. 132. An act for the relief of Man-Yeh Chow; to the Committee on the Judiciary.

S. 138. An act for the relief of Mico Delic; to the Committee on the Judiciary.

S. 139. An act for the relief of Krste Angeloff; to the Committee on the Judiciary.

S. 164. An act for the relief of Cherie Helen Bratton; to the Committee on the Judiciary.

S. 177. An act for the relief of Hadji Benlevi; to the Committee on the Judiciary.

S. 217. An act for the relief of Alessandro Gellhorn; to the Committee on the Judiciary.

S. 225. An act for the relief of Dr. Chien Chen Chi; to the Committee on the Judiciary.

S. 262. An act for the relief of Constantinos Georgiou Stavropoulos; to the Committee on the Judiciary.

S. 274. An act for the relief of Hajime Asato; to the Committee on the Judiciary.

S. 277. An act for the relief of Frica Barth; to the Committee on the Judiciary.

S. 285. An act for the relief of Alpo Fransilla Crane; to the Committee on the Judiciary.

S. 292. An act for the relief of Mah Jew Ngee (also known as Peter Jew Mah); to the Committee on the Judiciary.

S. 313. An act for the relief of Ante Tonic (Tunic), his wife, Elizabeth Tunic, and their two minor children, Ante Tunic, Jr., and Joseph Tunic; to the Committee on the Judiciary.

S. 330. An act for the relief of Harry N. Kouniakis; to the Committee on the Judiciary.

S. 417. An act for the relief of Haruo T. Hendricks; to the Committee on the Judiciary.

S. 423. An act for the relief of Fotios Gianoutsos (Frank Giannos); to the Committee on the Judiciary.

S. 438. An act for the relief of Mrs. Maria Giovanna Hopkins; to the Committee on the Judiciary.

S. 444. An act for the relief of Ok Hi Shin and Tae Soo Chung; to the Committee on the Judiciary.

S. 532. An act for the relief of Stanley Bulski (Zdzislaw Rekosz); to the Committee on the Judiciary.

S. 533. An act for the relief of Irena Maria Koller; to the Committee on the Judiciary.

S. 545. An act for the relief of Mrs. Elizabeth Clifford; to the Committee on the Judiciary.

S. 546. An act for the relief of In Fil Chung, In Ae Chung, In Sook Chung, and In Ja Chung; to the Committee on the Judiciary.

S. 555. An act for the relief of Nicolaos A. Papadimitriou; to the Committee on the Judiciary.

S. 593. An act for the relief of Hans Christian Gunnar Mikkelsen; to the Committee on the Judiciary.

S. 644. An act to amend the Foreign Service Act of 1946, as amended, concerning reemployment of officers or employees; to the Committee on Foreign Affairs.

S. 663. An act for the relief of Andreas Rakintozis (also known as Andreas Rakintzis or Rakajes); to the Committee on the Judiciary.

S. 696. An act for the relief of Angel Ardaiz Martinez; to the Committee on the Judiciary.

S. 697. An act for the relief of Maria Luisa Martinez; to the Committee on the Judiciary.

S. 713. An act for the relief of Anastasia Stassinopoulos; to the Committee on the Judiciary.

S. 894. An act for the relief of Capt. Ernest Mountain; to the Committee on the Judiciary.

S. 939. An act for the relief of Zlata Dumlijan and Djuro (George) Kasner; to the Committee on the Judiciary.

S. 1097. An act for the relief of A. E. Waterstradt; to the Committee on the Judiciary.

ENROLLED BILLS SIGNED

Mr. BURLESON, from the Committee on House Administration, reported that

that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1163. An act to amend section 510 of the Interstate Commerce Act so as to extend for 27 months the loan guarantee authority of the Interstate Commerce Commission;

H.R. 5188. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes;

H.R. 5463. An act to amend and extend the Sugar Act of 1948, as amended; and

H.J. Res. 32. Joint resolution to designate the first day of May of each year as Law Day, U.S.A.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 153. An act to further amend the Reorganization Act of 1949, as amended, so that such act will apply to reorganization plans transmitted to the Congress at any time before June 1, 1963.

BILLS PRESENTED TO THE PRESIDENT

Mr. BURLESON, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 1163. An act to amend section 510 of the Interstate Commerce Act so as to extend for 27 months the loan guarantee authority of the Interstate Commerce Commission;

H.R. 5188. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes;

H.R. 5463. An act to amend and extend the Sugar Act of 1948, as amended; and

H.J. Res. 32. Joint resolution to designate the first day of May of each year as Law Day, U.S.A.

ADJOURNMENT

Mr. PUCINSKI. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER. In accordance with House Concurrent Resolution 211, the Chair declares the House adjourned until 12 o'clock noon on Monday, April 10, 1961.

Thereupon (at 2 o'clock and 12 minutes p.m.), pursuant to House Concurrent Resolution 211, the House adjourned until Monday, April 10, 1961, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

737. A letter from the Secretary of Agriculture, transmitting the reports of the general sales manager for the months of November and December of 1960, concerning the policies, activities, and developments, with regard to each commodity the Commodity Credit Corporation owns or which it is directed to support; to the Committee on Appropriations.

738. A letter from the Comptroller General of the United States, transmitting a report on a review of the mutual security program presentation to the Congress for fiscal year 1961, which contains the requests for authorization and appropriation of funds for economic assistance to foreign countries proposed under the 1961 mutual security program; to the Committee on Government Operations.

739. A letter from the Secretary of Labor, transmitting a report of claims paid by this Department during the year ending December 31, 1960, pursuant to title 28, section 2673, United States Code; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. THOMPSON of New Jersey: Joint Committee on the Disposition of Executive Papers. House Report No. 213. Report on the disposition of certain papers of sundry executive departments. Ordered to be printed.

Mr. HARRIS: Committee of conference. H.R. 1163. A bill to amend section 510 of the Interstate Commerce Act so as to extend for 1 year the loan guarantee authority of the Interstate Commerce Commission (Rept. No. 214). Ordered to be printed.

Mr. CELLER: Committee on the Judiciary. S. 912. An act to provide for the appointment of additional circuit and district judges, and for other purposes; with amendment (Rept. No. 215). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ELLSWORTH:

H.R. 6086. A bill to amend section 202(c) of the Interstate Commerce Act to provide for partial exemption from the provisions of part II of such act of terminal area motor carrier operations performed by or for common carriers by water in interstate commerce subject to the Shipping Act, 1916 and the Intercoastal Shipping Act, 1933; to the Committee on Interstate and Foreign Commerce.

By Mr. FRAZIER:

H.R. 6087. A bill to amend the Internal Revenue Code of 1954 so as to provide for scheduled personal and corporate income tax reductions, and for other purposes; to the Committee on Ways and Means.

By Mr. GUBSER:

H.R. 6088. A bill to extend the benefits of the Panama Canal Construction Service Annuity Act of May 29, 1944, to certain individuals; to the Committee on Merchant Marine and Fisheries.

By Mr. HAGEN of California:

H.R. 6089. A bill to direct the Secretary of the Interior to establish a research program in order to determine means of improving the conservation of game and food fish in dam reservoirs; to the Committee on Merchant Marine and Fisheries.

H.R. 6090. A bill to encourage the establishment of voluntary pension plans by self-employed individuals; to the Committee on Ways and Means.

By Mr. HALPERN:

H.R. 6091: A bill to authorize the Secretary of Health, Education, and Welfare to make grants to the States to assist in the provision of facilities and services for the day care of children; to the Committee on Education and Labor.

By Mr. MORRISON:

H.R. 6092. A bill to amend the provisions of law relating to longevity step increases for postal employees; to the Committee on Post Office and Civil Service.

By Mr. QUIE:

H.R. 6093. A bill to amend the Federal Seed Act, as amended, with respect to screenings of seed; to the Committee on Agriculture.

By Mr. REUSS:

H.R. 6094. A bill to amend section 4 of the Employment Act of 1946; to the Committee on Government Operations.

By Mr. RHODES of Arizona:

H.R. 6095. A bill to amend section 206 of the Labor-Management Relations Act of 1947; to the Committee on Education and Labor.

By Mr. RHODES of Pennsylvania:

H.R. 6096. A bill to establish the Federal Agency for Handicapped, to define its duties, and for other purposes; to the Committee on Education and Labor.

By Mr. SIKES:

H.R. 6097. A bill to amend the Tariff Act of 1930 to increase the rate of the duty imposed on the importation of plywood; to the Committee on Ways and Means.

By Mr. TOLLEFSON:

H.R. 6098. A bill to provide that employees whose basic compensation is fixed and adjusted from time to time in accordance with prevailing rates by wage boards or similar administrative authority serving the same purpose, shall be paid on a weekly basis; to the Committee on Post Office and Civil Service.

H.R. 6099. A bill to prohibit discrimination because of age in hiring and employment of persons by Government contractors; to the Committee on the Judiciary.

By Mr. BONNER:

H.R. 6100. A bill to amend title VI of the Merchant Marine Act, 1936, to authorize off-season cruises by American-flag passenger vessels; to the Committee on Merchant Marine and Fisheries.

By Mr. BROOKS of Louisiana:

H.R. 6101. A bill to amend the Internal Revenue Code of 1954 so as to provide that lawful expenditures for legislative purposes shall be allowed as deductions from gross income; to the Committee on Ways and Means.

By Mr. HALEY:

H.R. 6102. A bill to authorize the Secretary of the Interior to sell reserved phosphate interests of the United States in lands located in the State of Florida to the record owners of the surface thereof; to the Committee on Interior and Insular Affairs.

By Mr. HALL:

H.R. 6103. A bill for the relief of the Stella Reorganized Schools R–I, Missouri; to the Committee on the Judiciary.

By Mr. HALPERN:

H.R. 6104. A bill to amend title I of the National Housing Act, as amended, to extend the maturity of home improvement loans to section 213 cooperatives; to the Committee on Banking and Currency.

By Mr. KEARNS:

H.R. 6105. A bill to extend the classified (competitive) civil service to certain employees of the Department of Defense, and for other purposes; to the Committee on Post Office and Civil Service.

By Mr. KOWALSKI:

H.R. 6106. A bill to amend title V of the Housing Act of 1949 to assist in the provision of housing for domestic farm labor; to the Committee on Banking and Currency.

H.R. 6107. A bill to amend the act of June 6, 1933, as amended, to authorize the Secretary of Labor to provide improved programs of recruitment, transportation, and distribution of agricultural workers in the United States, and for other purposes; to the Committee on Education and Labor.

H.R. 6108. A bill to amend section 13(c) of the Fair Labor Standards Act of 1938 with respect to the exemption of agricultural employees from the child labor provisions of such act; to the Committee on Education and Labor.

H.R. 6109. A bill to provide for the establishment of a council to be known as the National Citizens Council on Migratory Labor; to the Committee on Education and Labor.

H.R. 6110. A bill to amend the Fair Labor Standards Act, 1938, as amended, to provide for minimum wages for certain persons employed in agriculture, and for other purposes; to the Committee on Education and Labor.

H.R. 6111. A bill to provide for the registration of contractors of migrant agricultural workers and for other purposes; to the Committee on Education and Labor.

H.R. 6112. A bill to provide certain payments to assist in providing improved educational opportunities for children of migrant agricultural employees; to the Committee on Education and Labor.

H.R. 6113. A bill to provide grants for adult education for migrant agricultural employees; to the Committee on Education and Labor.

H.R. 6114. A bill to amend title III of the Public Health Service Act to authorize grants for improving domestic agricultural migratory workers' health services and conditions; to the Committee on Interstate and Foreign Commerce.

H.R. 6115. A bill to amend title V of the Social Security Act to further assist States in establishing and operating day-care facilities for the children of migrant agricultural workers; to the Committee on Ways and Means.

By Mr. LANE:

H.R. 6116. A bill to extend the provisions of the Civil Service Retirement Act of May 29, 1930, as amended, and the Federal Employees' Group Life Insurance Act of 1954 to members of the Capitol guide force; to the Committee on Post Office and Civil Service.

By Mr. OLSEN:

H.R. 6117. A bill relating to certain inspections and investigations in metallic and nonmetallic mines and quarries (excluding coal and lignite mines) for the purpose of obtaining information relating to health and safety conditions, accidents, and occupational diseases therein, and for other purposes; to the Committee on Education and Labor.

By Mr. PERKINS:

H.R. 6118. A bill to amend the Classification Act of 1949 to place in grade 18 of the general schedule the position of hearing examiners of the Social Security Administration in the Department of Health, Education, and Welfare; to the Committee on Post Office and Civil Service.

By Mr. SAUND:

H.R. 6119. A bill to amend the Internal Revenue Code of 1954 to permit the deduction of irrigation and other water district assessments; to the Committee on Ways and Means.

By Mr. BENNETT of Michigan:

H.J. Res. 355. Joint resolution to temporarily suspend the authority of the Interstate Commerce Commission to approve consolidations, unifications, or acquisitions of control of railroad properties; to the Committee on Interstate and Foreign Commerce.

By Mr. HAGEN of California:

H.J. Res. 356. Joint resolution to encourage the discovery, development, and production of domestic gold; to the Committee on Interior and Insular Affairs.

By Mr. MERROW:

H. Con. Res. 212. Concurrent resolution expressing the sense of Congress that all of our U.S. naval shipyards and facilities be maintained on a fully manned operational basis performing essential Navy or other Department of Defense work in the interest of our national defense, and that the President of the United States be urged to instruct the Secretary of Defense to take all necessary steps to insure this end, including the immediate cancellation and withdrawal of any and all instructions or orders issued or contemplated by the Department of the Navy incompatible with this purpose; to the Committee on Armed Services.

MEMORIALS

Under clause 4 of rule XXII, memorials were presented and referred as follows:

By the SPEAKER: Memorial of the Legislature of the State of New Mexico, memorializing the President and the Congress of the United States to enact enabling legislation to set aside a day to be known as American Indian Day; to the Committee on the Judiciary.

Also, memorial of the Legislature of the State of Oklahoma, memorializing the President and the Congress of the United States relative to ratification of a proposed amendment to the Constitution of the United States granting representation in the electoral college to the District of Columbia; to the Committee on the Judiciary.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MARTIN of Massachusetts:

H.R. 6120. A bill for the relief of Francis Ainsworth; to the Committee on the Judiciary.

By Mr. ROUSSELOT:

H.R. 6121. A bill for the relief of Albert Ai-Chun Fung; to the Committee on the Judiciary.

By Mr. WALTER:

H.R. 6122. A bill for the relief of Maria Luisa Reis (nee) Loys; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

112. By Mr. SHRIVER: Resolution by the 180 members of the Kansas Retail Jewelers Association requesting and urging the Congress to take immediate action toward transferring the 10-percent Federal excise tax on jewelry at the retail level to a 10-percent Federal excise tax at the manufacturer's level; to the Committee on Ways and Means.

113. By the SPEAKER: Petition of Herman C. Massey, president, Coffee County Teachers Association, Manchester, Tenn., petitioning consideration of their resolution relative to recommending enactment of the proposed school assistance act without any crippling amendment; to the Committee on Education and Labor.

EXTENSIONS OF REMARKS

Byelorussian Independence Day

EXTENSION OF REMARKS

OF

HON. SEYMOUR HALPERN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 1961

Mr. HALPERN. Mr. Speaker, today about 10 million Byelorussians live in their historic homeland under the Soviet totalitarian regime, but the Soviet Government has always acted as though there is no such distinct ethnic group, and has tried to obliterate all Byelorussian national traits. For that reason we in the West hear little of these people, and know very little of their history. Nonetheless, there they are, and they have persistently resisted all Soviet attempts to Russianize them.

These people lived under their own government in their historic land, between eastern Poland and western Russia, long before the formation of the modern Russian state, but in 16th century Russian czars overran and conquered the country, and since then, except for a period of 3 years, they have been living under czarist autocracy and under Communist Soviet tyranny.

The 3-year brief but unforgettably happy interlude between 1918 and 1921 was the only time these people were free in modern times. In 1918, on March 25, they had proclaimed their independence and had established the Byelorussian National Republic. Then until early 1921 the new state struggled against formidable odds for its very existence. In the end it was defeated, the country overrun by the Red Army in 1921, and then made part of the Soviet Union. Since then the fate of the Byelorussian people has been no different from that of other peoples suffering under the Kremlin's unbearable yoke. Fortunately these people have not lost their hope for freedom, and they still cling to their national ideals, their national independence. On the 43d anniversary of their Independence Day let us hope they will someday be restored to freedom and independence.

Confederate Flag Day

EXTENSION OF REMARKS

OF

HON. DALE ALFORD

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 1961

Mr. ALFORD. Mr. Speaker, the General Assembly of the State of Arkansas, in its session in 1957, adopted, and the Governor signed, act No. 124, designating the Saturday before Easter of each year as Confederate Flag Day.

I have heartily commended this action in the past, and I now call national attention to the fact that this observance

falls upon Saturday of this week. On that occasion, members of the United Daughters of the Confederacy in all parts of the State of Arkansas will not only make patriotic display of the glorious Stars and Bars of the Confederacy, but also plan to distribute miniature copies of the flag to the citizenry in general.

This exemplary action by a dedicated group of southern patriots is entitled to the applause of all those who cherish the memory and the ideals of the Confederacy. I am proud and happy to join in this salute.

Forty-third Anniversary of the Byelorussian Declaration of Independence

EXTENSION OF REMARKS
OF
HON. ROBERT N. GIAIMO
OF CONNECTICUT
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 30, 1961

Mr. GIAIMO. Mr. Speaker, March 25 marked the 43d anniversary of the Byelorussian Democratic Republic's declaration of independence. It is fitting that we should pause at this moment in history to remember this day and to pay tribute to the brave people who must celebrate their anniversary of freedom in silence and amidst the cruelty of Soviet domination. For the record of the Byelorussian people dramatically gives lie to the Soviet pretentions of serving the cause of the world's oppressed.

Byelorussia is a culturally and historically independent nation. Situated at the crossroads of West and East, Byelorussia as an independent country held an important place in the medieval history of Eastern Europe. Late in the 18th century the country was forcefully absorbed into the Tzarist Empire. Since that day, the people of Byelorussia have continuously sought to regain their freedom and independence. The 19th century was marked by several courageous revolts against Russia domination.

The national aspirations of the Byelorussian people were finally realized on March 25, 1918. On that day the elected representatives of the people seized upon the opportunity created by the Russian Revolution and declared the independence of Byelorussia. The promise of freedom was realized only to be frustrated again by military force. Against overwhelming odds, Byelorussia could not long resist the pressure of Soviet imperialism, and the young nation fell victim to the Red Army.

Since that tragic day the people of Byelorussia have been constantly subject to the most ruthless of persecutions. Millions of these brave people have been deported and millions of others exterminated. The Kremlin's efforts have been heartless and they have been thorough, but they have not been successful. Despite decades of cruel oppression the spirit of freedom and the desire for independence continues to live in the hearts and minds of the Byelorussian people.

As we commemorate the anniversary of Byelorussian independence, let us hope that our sympathy for and our deep admiration of these courageous people will be of some comfort to them. We who are more fortunate pray and hope that the time will not be long before the Byelorussian's long nourished aspirations will be once again fulfilled and the people of this unfortunate nation can openly and joyously celebrate the anniversary of their independence as we in free nations celebrate ours.

Results of Questionnaire Mailed by Hon. John F. Baldwin of California, to Residents of the California Sixth District

EXTENSION OF REMARKS
OF
HON. JOHN F. BALDWIN, JR.
OF CALIFORNIA
IN THE HOUSE OF REPRESENTATIVES
Thursday, March 30, 1961

Mr. BALDWIN. Mr. Speaker, 6 weeks ago I mailed a questionnaire to every family of registered voters in the California Sixth Congressional District. The response to this questionnaire was so large that my office was swamped for weeks with returned completed questionnaires and accompanying correspondence. Many constituents not only answered the questionnaire, but wrote detailed comments on the back of the questionnaire, or attached supplementary letters. I have spent many hours personally reading all these comments, and they have been most helpful. I am firmly convinced that a Congressman can better represent his constituents if he knows the views of all of those constituents on important issues pending before Congress, than if he does not know them.

The tabulation of the questionnaire is summarized below:

1. A constitutional amendment has been introduced in Congress to eliminate the electoral college procedure for electing the President, and to provide for the election of the President and Vice President by direct popular vote. Would you favor or oppose this amendment? Favor, 82 percent; oppose, 13 percent; undecided, 5 percent.

2. If Premier Castro of Cuba demands that we give up our Naval Base at Guantanamo Bay, Cuba, do you believe that we should give it up, or that we should stand fast and defend the Base if necessary? Give it up, 6 percent; stand fast, 87 percent; undecided, 7 percent.

3. In view of present world conditions, do you believe that our defense expenditures should (a) be increased 56 percent; (b) remain the same 34 percent; or (c) be decreased 10 percent?

4. If Russia and the United States cannot agree within, say, 6 months, on a written agreement for the permanent cessation of nuclear tests, do you feel that the United States should resume underground testing of nuclear weapons? Yes, 80 percent; no, 9 percent; undecided, 11 percent.

5. Do you believe that the House Un-American Activities Committee should be continued or abolished? Continued, 70 percent; abolished, 18 percent; undecided, 12 percent.

6. In the past our major U.S. Embassies at London, Paris, Rome, etc., could only be filled by Ambassadors who were personally wealthy because Congress had never appropriated an adequate sum to operate these Embassies. Would you be in favor of having Congress increase the appropriations for operating these Embassies so that career diplomatic personnel could be assigned to them without personal financial sacrifice? Yes, 80 percent; No, 12 percent; undecided, 8 percent.

7. A proposal has been made that the United States should establish a "Foreign Service Academy" to train personnel properly for service in overseas posts, including foreign language training. Would you favor or oppose this proposal? (a) Favor, 85 percent; oppose, 9 percent; undecided, 6 percent.

8. The United States has been experiencing a serious outflow of gold to other countries. In view of this fact, would you favor a limitation on the expenditures of U.S. tourists in foreign countries? Yes, 73 percent; no, 19 percent; undecided, 8 percent.

9. Do you believe the President should, by legislation, be given the right to require compulsory arbitration of a strike where he determines that the safety or welfare of the Nation is adversely affected by the strike? Yes, 86 percent; no, 9 percent; undecided, 5 percent. Answers from union members: Yes, 87 percent; no, 10 percent; undecided, 3 percent. Answers from non-union members: Yes, 87 percent; no, 9 percent; undecided, 4 percent.

10. The Aid to Needy Children Program has been criticized because it requires one spouse to leave the home before a family can qualify for "Aid to Needy Children" payments. Would you favor a modification in the Law so that a family whose wage earner is unemployed or underemployed could qualify for "Aid to Needy Children" payments without one spouse being physically required to be absent from the home? Yes, 57 percent; no, 25 percent; undecided, 18 percent.

11. We have a serious postal deficit, which this year will exceed $800 million. Would you favor increasing postal rates so that each class of mail pays its own way? Yes, 74 percent; no, 18 percent; undecided, 8 percent.

12. It has been proposed that the Federal Internal Revenue Laws be tightened up so that deductions for business entertainment expenses would be materially restricted in scope. Would you favor this proposed change? Yes, 80 percent; no, 13 percent; undecided, 7 percent.

Secretary of the Interior Stewart Udall Announces Administration Support for Legislation Proposing National Fuels Study During Significant Address

EXTENSION OF REMARKS
OF
HON. JENNINGS RANDOLPH
OF WEST VIRGINIA
IN THE SENATE OF THE UNITED STATES
Thursday, March 30, 1961

Mr. RANDOLPH. Mr. President, it was my privilege, along with a substantial number of colleagues in the Congress and other citizens who attended the annual dinner meeting of the National Coal Policy Conference at the

Statler-Hilton Hotel in Washington last night, to have heard the distinguished Secretary of the Interior, the Honorable Stewart Udall, deliver a significant address.

Secretary Udall spoke of reasons why the new administration and the producers of fuels can no longer allow our energy production "to grow like Topsy," pointing out that "the primary concern of the Department of the Interior—under explicit instructions from the President—is with the conservation and development of our natural resources."

The Secretary further stated that "under the Kennedy administration, the Interior Department will always favor long-range resource planning—and the wisest possible use of the God-given bounties of nature," following which he declared support, in the following words, for pending legislation which would set up a study in the Congress of the Nation's fuels and energy resources:

I can state to you this evening the position of the President of this administration with regard to a national fuels study. The administration wants what is good for the Nation. The administration wants a type of long-range study, a balanced study, that will look into this subject very thoroughly and will use the yardstick and the only test that I think your industry wants, and that is what is good in the long run for the country. This is what the President wants. This is what the Department of the Interior wants. We cannot, in something as important as fuels and energy, let policy be set by drift or by default, because we need a policy which will take into account considerations—paramount considerations—of national security and of the health of our economy. And, therefore, we shall support before the Congress the legislation which is pending for a national fuels study because this is in the interest of all of us, in the interest of the national defense, in the interest of our national security, and in the interest of the growth of our economy.

Mr. President, there is pending in the Senate Committee on Interior and Insular Affairs a resolution (S. Res. 105) which I introduced for myself and 62 colleagues, "to create a Senate Special Committee on a National Fuels Study." A modified version of this resolution is pending in the House of Representatives.

It is most gratifying to have the forthright assurance of the esteemed Secretary of the Interior that the administration, appropriately responsive to the prior position statements by President Kennedy, supports this legislation for a national fuels study. I know I bespeak the sentiment of the 62 Senators cosponsoring the resolution which I introduced when I express the hope that this measure will have expeditious attention by appropriate committees, and that it will be adopted by the Senate at an early date in order that the important and necessary study of the Nation's fuels and energy resources may be undertaken soon and completed during the life of this Congress.

I ask unanimous consent, Mr. President, that the following excerpts from the text of Secretary Udall's forthright speech be printed in the RECORD.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

EXCERPTS FROM ADDRESS BY SECRETARY OF THE INTERIOR STEWART L. UDALL AT NATIONAL COAL POLICY CONFERENCE DINNER MEETING, WASHINGTON, D.C., MARCH 29, 1961

Thank you very much, George Love, John L. Lewis, my former colleagues in the Congress, and friends. Let me say that my training in Washington is on the 5-minute speech and not the Senate variety, so I won't detain you too long.

It is a real honor for me to represent President John F. Kennedy here this evening. As you know, about a year ago, this time, the President got out in the coal country, got some of the coal dust in his system, and his interest in the problems of the coal industry and the people affected by the coal industry has been very deeply and sincerely felt since that time. I am going myself next week to the coalfields of West Virigina. The two Senators from West Virginia have invited me to go and to get out and get my shoes and hands a bit dirty and find out some of the things I don't know about the coal industry.

I believe all Americans admire the underdog. They admire a fighter, and I know more about this from what I have seen in the past 2 months. I have come to admire those of you who formed this conference and other of your spokesmen because there are fighters among them. Not so long ago everyone was ready to count coal out, but as Mark Twain put it, your death, or the reports of your death would seem this evening, George and John, to be grossly exaggerated; the corpse has a lot of kick, as they say. But, of course, there has always been a lot of fight in the coal industry. It has always been a turbulent industry.

But we admire, all of us, the statemanship that has brought you all together. The fact is refreshing that you who were formerly antagonists sit here this evening as partners and allies in an attempt to revive and keep going and strengthen one of the great industries of this country. I have learned much in the last 60 days about a lot of things, about coal and about oil, and I know you gentlemen in these industries are stern teachers. I have taken my lumps but, of course, I take this physical fitness business seriously. I move in fast company and when I haven't been wrestling with oil or coal, I go out and take on professional football players, so you see I'm really staying in good shape.

One fact already has made a deep impression on me as far as your industry is concerned. I do not think you have done a complete job of selling the public on it, namely, that coal is a modern industry. Mr. Lewis mentioned it, Mr. Love mentioned it, and that is that coal is not an outmoded, dirty industry but today one of the most modern industries. In fact, you should take a leaf from one of the statements, again I am sorry, Mr. Lewis, but you seem to be adding spice to my speech, another of the famous statements of John L. Lewis in the thirties at the time when he was speaking up loudly and, some say, vociferously for the men he represented. At one time he was upbraided by someone for speaking too long and too loudly in behalf of his people, but, indulging in a Biblical paraphrase, said that "he who tooted not his own horn, the same shall not be tooted for him." And so toot your horn a little louder. I think you have a story to tell.

I was surprised after assuming my office when I learned of the coal industry's remarkable achievement in production effort. The increase in productivity is in itself a fine tribute to your industry. Today a coal miner produces 13 tons of coal each working day—more than double the individual production of 1947 and about 10 times the output per worker in Western Europe and Great Britain.

I am even more impressed by the fact that, in these years of inflation, the mine price of commercial coal has been reduced 15 percent in the past 12 years.

In fact, you people, in terms of stability and resisting the inroads of inflation, probably deserve one of the biggest medals which could be rewarded.

This remarkable achievement is a tribute to all segments of your industry—to Mr. John L. Lewis and the United Mine Workers, who were clearheaded enough to see that the efficiencies of automation were absolutely essential if coal was to survive; it is a tribute also to the mine operators, to the railroads, and to the utility people who invested millions in plant improvements in a time of adversity; and to the manufacturers of mining equipment, whose fantastic automatic machines have wrought a revolution in mining technology.

Your aggressive determination to expand existing markets and create new ones deserves our commendation. It is no happenstance that the use of coal by electric utilities has increased in almost direct proportion to the reduction in the amount of coal required to produce 1 kilowatt hour of electricity.

Your efforts to regain a part of the home heating market through electric home heating; through the transmission of high voltage over long-distance lines; the use of pipelines for moving coal—all of these strike me as signs of an alert and vigorous industry.

My remarks would be wide of the mark this evening if I did not discuss with you the vital subject of America's future energy potential—the question of a sound fuels policy for our country.

When we speak of natural fuels it is the end product, the energy, in which we ultimately are interested. It is this energy, be it heat or light, which is of ultimate significance to an expanding society in a turbulent world.

I know President Kennedy shares with me the conviction that our energy capacity is the index of our national strength and growth potential. It tells far more than carloadings, housing starts, or bank deposits. It is the one authentic utterance of how big a punch we pack, of our vitality, our maneuverability, of our ability to sustain a rate of growth that will vouchsafe our national strength in the years ahead.

During this decade of the sixties we must consciously plan our energy production and use requirements so that we will have a stable and sensible fuels picture in the troubled decades ahead.

There are three obvious reasons why the new administration—and the producers of fuels—can no longer allow our energy production to grow like Topsy:

First, and obviously, there is the exploding population. By 1967, it is estimated that the population of the United States will be 235 million. And these Americans will be using more energy in daily living, doing more traveling, consuming more than we do today.

In the second place, the gross national product will increase to $1 trillion—doubling the figure for 1960. This means at least twice as much energy will be consumed industrially.

And, thirdly, we are in an across-the-board competition with the Communist world. We must be in a position to meet our energy needs at all times.

Our energy supply is like a bank balance. Every check drawn against that balance is good, except the last one which overdraws the account. We will undoubtedly have to cash some big checks against our energy balance in the years ahead—and we cannot afford to have any of them bounce.

This is probably as good a point as any for me to refresh your memories with the fact that I am not, as Secretary of the Interior, a czar of prices, or franchises, or economic intricacies. The primary concern of the Department of the Interior—under explicit instructions from the President—is with the conservation and development of our natural resources. We are concerned with their intelligent use today, and their exploration and development for tomorrow.

Under the Kennedy administration this Department will always favor long-range resource planning—and the wisest possible use of the God-given bounties of nature.

And I can state to you this evening the position of the President, of this administration, with regard to a national fuels study. The administration wants what is good for the Nation. The administration wants a type of long-range study, a balanced study, that will look into this subject very thoroughly and will use the only yardstick and the only test that I think your industry wants, and that is what is good in the long run for the country. This is what the President wants. This is what the Department of the Interior wants. We cannot, in something as important as fuels and energy, let policy be set by drift, or by default, because we need a policy which will take into account considerations, paramount considerations, of national security and of the health of our economy. And, therefore, we shall support before the Congress the legislation which is pending for a national fuels study because this is in the national interests (applause); it is in the interests of all of us, in the interest of our national defense, in the interest of our national security, and in the interest of the growth of our economy.

I assure you that we in the administration will go just as far as we can in helping the coal industry to achieve its proper goals. Over the past 2 months I have been tremendously pleased at the cooperation and advice I have received from the leaders of the coal industry.

Of course, we've looked each other in the eye a time or two and disagreed, but that is part of the game, too. And in the process we've learned understanding as well.

I sat within the past month with many of you in the room. You were spokesmen for all segments of the coal industry, and I threw a challenge at you. I said I wanted for the Office of Coal Research a Director who would be one of the top men in the country in this field, and I am happy to say, although I am not quite in a position yet to announce his name, that he is an outstanding figure and one who will serve in this Office not simply to direct the research program but as one of my advisers on fuels policy, on natural resources, and as my special adviser on all coal matters. So we look forward to his services with us, and we know he is going to strengthen our Department and the administration in this important field.

We are also fortunate in the outstanding members of the Resources Advisory Council we have whose advice and guidance we seek on broad policy matters on coal and fuels.

And now a final word about how the Kennedy administration hopes the Office of Coal Research will function: The industry itself—you who hear my voice here—will bear a heavy responsibility for the success or failure of your Government's attempt to help the industry help itself. You know where work needs to be done to strengthen coal in the marketplace. You know better than anyone else where extra effort will produce results.

In our research work we want to explore new ideas. We want to broaden the scale of the research now underway and we want research that will encompass the entire industry—utilization, transportation and the technology of mining itself. The laboratory will be industry itself. We are not talking about abstract research in laboratories. We are talking, in the main, about research that will be conducted in the industry itself. For our part I can promise you we will move energetically to implement the projects approved.

I am already on notice from the President himself that he is deeply interested in this program, and I know he will give it the support and muscle we need to do a strong job in this field.

We must boldly face the tremendous demands that our Nation will make on the suppliers of basic fuels in the years immediately ahead. You must bear a heavy part of the load in this task. There is work for all of us to do, in the words of President Kennedy, "Let us begin."

Federal Aid to Education

EXTENSION OF REMARKS

OF

HON. JOHN P. SAYLOR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 1961

Mr. SAYLOR. Mr. Speaker, in the current controversy over whether private and parochial schools should be included as recipients of Federal largess in the proposed aid-to-education program, the basic issue is being shoved into the background. The question of whether Federal aid to education is necessary or desirable is being sidetracked.

It is time to get back into focus, for we must not let our citizenry lose sight of the fact that the big billion-dollar lollypop for the Nation's schools would be manufactured with taxpayers' contributions and then wrapped for distribution only after the Washington bureaucracy had taken a substantial bite out of it. With the passing of years, the share for the several States and local schools would become progressively slimmer, for big government has an insatiable appetite.

For the State of Pennsylvania, the stick of candy handed to us by the patronizing bureaucrats would from the start be much smaller than what we put into it. The Federal aid to education bills are nothing less than an insult to the intelligence of the people of our State, inasmuch as those bills brashly set forth a set of calculations which would require us to put millions of dollars more into the school kitty than we would get back for our own educational needs.

Pennsylvania, plagued with critical unemployment in scores of communities, would experience only additional hardship if the proposed legislation were to be enacted. Of course, some of our friends who have cooked up this expensive scheme are attempting to cover up the deficit that would be incurred by our State by indicating that the whole program can be carried merely by undertaking to put the Federal Government further into debt. Our people have had enough of these delusory promises. Our citizens recognize only too well that increases in the Federal debt are the direct cause of inflation, which cruelly reduces the buying power of wage earners, pensioners, and all others who look to savings and social security payments to see them through their twilight years.

Back in 1956 some Members of Congress began making headlines with the idea of setting up a $400 million fund annually for a total of 4 years to provide for construction of schoolhouses. At that time we were assured that $400 million was the maximum figure that proponents wanted, that 4 years would be the limit of the program, and that construction alone was the objective. Since then this balloon has been inflated out of all proportion, teachers' salaries have been thrown into the recipe as an added sweetener, and where it will all end is too vague for conjecture. What will come in the next go-round would tax the most precocious imagination, but the history of the program could very well lead one to believe that the local school board member will be offered a sugar plum in hopes of promoting additional support for the Federal aid project.

Mr. Speaker, I suggest that Congress can better promote the general welfare and national defense by getting the Federal aid to education bills out of the way and moving on to the business that we have been sent to Washington to handle. I do not deny that many local school districts could find their burden much lighter and be able to provide well-deserved increases in teachers' salaries through congressional action. I stand ready to help in this worthy objective by any of a number of sound legislative possibilities.

For a number of years I have proposed a larger deduction in income tax rates for all individuals—men, women, and children. I know of no more convenient way to make more funds available for educational needs and for other local purposes. If our constituents prefer that some portion of Federal taxes now being channeled into Washington be earmarked specifically for school funds, then there is a variety of ways in which this mission can be accomplished.

Perhaps the simplest method is for us to pass a law ordering the Director of Internal Revenue to remit to each State a check for an amount equal to an agreed-upon percentage of the personal and corporate Federal income taxes collected for any 1 quarter, or any 1 year, with said sums to be used by each State for educational purposes only. Such a plan would enable the States, on a fair basis, to help themselves to solve their educational problems—whether they pertain to schools, equipment, or teachers—in their own way without any Federal control, intervention, supervision, regulation, or interference.

The matter should be settled promptly. I have read recently of isolated cases in which communities have rejected bond issues designed to provide the wherewithal to build new schools. Unless the Federal aid problem is disposed of once and for all, there is a serious danger that promises made in Washington will prompt more and more communities to hesitate in planning for new schoolhouses. If the Federal free-spenders are

going to make funds available for obligations that have heretofore been our own responsibility, why should the local citizens bother to put up the money? Thus the promises being made by proponents of Federal aid to education become a detriment to local initiative and industry.

There is also the case of the failure of St. Louis voters to accept a bond issue to build new schools and modernize some of the old ones. As reported in the Johnstown Tribune-Democrat on March 24 by a staff writer for the Associated Press:

Apathy, ignorance, and resistance to taxes were major factors, but in St. Louis it was something more.

It was distrust of the St. Louis School Board, rocked by scandal and hint of scandal.

I have excerpted the crux of the article, Mr. Speaker. There were other reasons cited by the writer, but I believe that what I have quoted should give Congress reason to ponder.

If the citizens of a city are so distrustful of their own school board as to hesitate to approve a bond issue for new schools, can the Federal Government in conscience turn over Treasury funds to such groups? Does Congress have no more pride in its own stewardship? Furthermore, Federal grants would tend to destroy whatever interest a community has in cleaning up unsavory conditions, for when local funds are not involved the incentive for keeping a close watch on responsible parties would be lacking. I also point out that, according to proponents of Federal aid to education, the Federal Government could do nothing regardless of how dishonest a local school board happened to be, for no control from Washington is one of the assurances that perennially goes with the proposal.

I regret that interest in the basic premise—whether it is good or bad for the Federal Government to get involved in local school problems—is being diluted by the important but only collateral issue regarding private and parochial schools.

When we get back on track, let us hope that the bills will be defeated on principle—a principle laid down by our Founding Fathers and respected until the whole concept of government by the people became distorted through attempts to advance a people-for-the-government philosophy.

Mr. Speaker, under unanimous consent heretofore granted, I include the following article from the Johnstown Tribune-Democrat of March 24, 1961:

BOND ISSUE REJECTION ADDS TO ST. LOUIS WOE

(By G. K. Hodenfield)

(EDITOR'S NOTE.—"Somehow we have to get our messages across," says the superintendent of schools in St. Louis. The message: More money needed. But the city's voters turned thumbs down all last year. This is the last of three articles on school financing problems.)

ST. LOUIS, MO.—St. Louis has found an enormous rathole and is busy shoveling dollars into it.

In March, in May, and again in November last year, the voters turned down a $24.3-million bond issue to build new schools and modernize some of the old ones. They also rejected, three times, a $5.2-million bond issue for school fire protection.

Because the bonds weren't passed, and the schools can't be built, the school system this year is chartering 70 buses to transport 3,600 pupils from their home neighborhoods to schools up to 9 miles away.

BUSES COST $195,000

The buses are costing the city $195,000 this school year, plus $40,000 in overtime pay for teachers who supervise the bus rides. This is $233,000 for the 1960–61 school year.

No one seriously argues here that the new schools aren't needed: Six elementary schools are at double their normal capacity; 2,000 elementary school pupils are attending classes in high school buildings; 525 elementary pupils are being taught in rented church quarters; some classrooms have as many as 60 pupils.

Then why did the bond issues fail?

Apathy, ignorance, and resistance to taxes were major factors. But in St. Louis it was something more.

BOARD DISTRUSTED

It was distrust of the St. Louis School Board, rocked by scandal and hint of scandal. A racial problem apparently was involved also.

Perhaps most of all, it was a State law requiring that school bond issues must be approved by a two-thirds majority. "We can get 60 percent," one leading citizen declared, "but that last 6 percent comes mighty hard."

A school building commissioner, appointed by the school board, was removed from office by a circuit court on charges of gross misconduct in office. Several board members have resigned amidst charges they used school board labor and materials on their own homes.

The voters are well aware of this state of affairs. One board member himself said that, under the circumstances, the people of St. Louis would be justified in turning down the bond issues.

Said one homeowner: "Of course I voted against the school bonds. Why should I vote money into the hands of those people?"

POPULATION DOWN 100,000

St. Louis has a population of about 750,000, a drop of more than 100,000 since the 1950 census.

Much of the loss can be attributed to the flight to the suburbs, which many American cities are experiencing.

But in that same 1950–60 decade, the average daily attendance in the St. Louis public schools rose from 80,626 to 90,581. Much of this increase has been in Negro pupils, who now make up about 45 percent of the school population.

Many of St. Louis' problems can be traced directly to the slum clearance project in Mill Creek, a section in the near-downtown area. Negroes from Mill Creek moved en masse to North St. Louis, which had been a predominately white neighborhood. There weren't enough schools to handle the influx of pupils, and it is these children who now are being taken by buses to other parts of the city.

RACIAL FEELING

"It's up North where they need the schools," said a housewife in conservative South St. Louis. "We don't need them down here. And if those colored folks think we're going to carry them on our backs, they've got another think coming."

In all three St. Louis elections the school bond issues carried by what, in suburban Parma, Ohio, would have been a comfortable majority. In February the vote was 62,236 for and 35,772 against (63.5 percent approval); in May it was 35,826 for and 21,453 against (62.5 percent approval); in November it was 95,565 for and 64,755 against (59.6 percent approval).

But in St. Louis, where it takes 66.6 percent approval, these are recorded as just three consecutive defeats for the school bonds.

But apathy played a big part, too.

In March, the "No" votes of 11.1 percent of the registered voters were enough to defeat the bonds.

In May, it took only 6.7 percent of the registered voters to block the passage.

In November, the "No" votes of 18.6 of the registered voters were decisive.

NO ORGANIZED OPPOSITION

As in Parma, there was no organized opposition to the school bonds. Both metropolitan newspapers urged their passage, although both papers had serious reservations about the school board. Catholic and Lutheran church officials supported the bond issues wholeheartedly. Parent-Teachers' Association groups worked hard for them.

It was stressed that the bond issues would not be expensive. The average cost to homeowners: About $5 to $6 a year in increased property taxes.

"I voted against them," a white-collar worker said. "I'll vote against them every time they come up. It means an increase in our taxes, and I can't afford it.

TAX BILLS COMPARED

"Look, here are my tax bills. In 1949 my property tax was $43.52, now it's $106.12. That's more than a 100 percent increase. How much do they want, anyway"?

A housewife said, "Our property tax is high enough right now. Those people at city hall are just trying to stuff something down our throats. I don't trust them."

On April 4, St. Louis will hold a school board election. Shortly after that, the school bonds will almost certainly be put up to the voters again.

MUST KEEP TRYING

"We have to keep trying," said Philip J. Hickey, superintendent of instruction for the St. Louis schools. "We just have to. Things are going to get worse as we go along.

"Our transportation costs will be much higher next year. We expect at least 2,000 new pupils, perhaps more, next fall. We can't keep those elementary pupils in high school buildings, the high schools themselves need the room.

"Nearly half our schools are more than 50 years old. Some of them go back almost to Civil War days. Some of them are fire traps.

"We'll just have to try again. Somehow, someway, we've got to get our message across."

Migrant Farm Labor: A Serious National Problem

EXTENSION OF REMARKS

OF

HON. JEFFERY COHELAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, March 30, 1961

Mr. COHELAN. Mr. Speaker, one of the truly significant domestic problems which we as a Nation face today is the plight of the migrant farm laborer.

On March 9, 1961, CBS Television presented a memorable debate entitled "The Migrant Farm Worker—Is Federal Legislation Necessary?" Arguing against Federal legislation was Charles Shuman, president of the American Farm Bureau Federation. Presenting the affirmative,

and basing his discussion on his experience as chairman of the Senate Subcommittee on Migratory Labor, was Senator HARRISON WILLIAMS, of New Jersey.

Senator WILLIAMS and Mr. Shuman sharply defined many aspects of this serious problem and, under unanimous consent, I include the text of their debate in the RECORD.

While arguments are raised against enacting Federal legislation which would insure minimum standards of protection for these interstate workers and their families, I am acutely aware of the discouraging conditions under which our migrant farmers live. These conditions constitute a serious problem for all Americans, for they include homelessness, poverty, ignorance, hunger, and disease.

Senator WILLIAMS' arguments are forceful and to the point, and I believe that it is time for Federal action in this field of human need:

Mr. SMITH. Good evening.

Last November CBS Reports televised "The Harvest of Shame," a 1-hour examination of the conditions of the men and women who move from State to State harvesting our bounty of fruits and vegetables. "Harvest of Shame" was highly praised and criticized in editorials throughout the Nation, and praised and criticized on the floors of the Senate and the House here in Washington.

The program helped to bring national attention to the condition of the migrant farmworkers, about which subject 11 bills were introduced in the Senate just last week.

Tonight, for 30 minutes, two distinguished authorities on the issue will debate the question: "The Migrant Farmworker—Is Federal Legislation Necessary?"

For the affirmative, Senator HARRISON WILLIAMS, Democrat, New Jersey, chairman of the Senate Subcommittee on Migratory Labor, and author of the bills on the subject; opposed to Federal legislation, and representing most of the growers of the Nation, Mr. Charles Shuman, the president of the American Farm Bureau Federation.

Mr. Shuman feels that migrant workers should have the right to join unions and to strike, but not during harvest season.

First to speak, for Federal legislation, Senator WILLIAMS.

Senator WILLIAMS. Thank you, Mr. Smith—Mr. Shuman.

First let me say that I am very grateful for this opportunity to discuss one of the hardest problems we have yet before us in this country. As a citizen, I have been interested for many years in the problems of our migratory farmworkers. Recently, as chairman of the subcommittee, for 18 months I have been intimately associated with these problems.

When we started our work 18 months ago, we believed that we then knew certain problems of the migratory farmworker, we knew that there were up to 2 million Americans traveling this country, bringing in the harvest, leaving Florida, traveling up the east coast through the various States to New Jersey, New York, on into New England; leaving Texas, and traveling up through the interior to the northern States of Minnesota and Wisconsin; and on the west coast, leaving southern California and traveling on to Oregon and Wisconsin—Oregon and Washington.

And we knew, too, that the children of the migratory farmworker did not share in educational opportunities enjoyed by all other American children.

And we knew that the average income was a pathetic $900 a year.

We knew at that time, when we began our work, the sad facts of high infant deaths, of tragic highway accidents in vehicles that were dangerous.

We knew, too, that children spent all day in the fields with their parents, or perhaps even more tragically, were left back at the camp to shift for themselves while their parents were out planting or picking the crops.

These were cold statistics that we analyzed when we started our work, but that was not enough. We wanted to understand and feel these problems, and following our creation as a subcommittee, in order to understand the wretchedness that had been described, the deprivation that had been described, we took our committee all over this country, and there we saw the statistics come to life.

We saw families crowded into one-room shacks. We saw the men and women working in the fields 12-hour days. We were there at the middle of the day at high noon, in hundred-degree temperatures, and we were there at the end of the day, when they got $6 for their day's work. We saw them at the end of the day, back in the camp, when literally there was nothing—nothing to do, no plans to make, no hopes to nourish.

Mr. SMITH. Senator, we are almost at the end of your time.

Senator WILLIAMS. I will say that we have seen these barren lives, we have seen youngsters whose only playground was a battered old car littered with glass, and there they played barefoot.

It seems to me that in this country where we have done so much for ourselves, where we have brought health care to all of our poor people, welfare to all of our poor people, we have excluded it from this group of people who are rootless and homeless, who have no State and no residence. We have protected ourselves in so many ways with minimum wages, child labor prohibition, short workweek of 40 hours, all the new deal has been excluded from the lives of our migrant farm families in this country.

I think the answer is yes, the time has come when our Nation must recognize that these people are entitled to the same protections that all other Americans enjoy.

Mr. SMITH. Senator, you will be able to come back to that.

Can we have the opening statement now from Mr. Shuman?

Mr. SHUMAN. Thank you, Mr. Smith, and Senator WILLIAMS.

I appreciate very much the opportunity to come here and first to compliment Senator WILLIAMS and his Subcommittee on Migrant Labor for the conscientious job that they did in examining the conditions, inquiring into it, and giving many people a chance to make statements as to what the conditions were in agriculture and in migrant work.

Now, we, representing farmers, frankly admit that we have problems. As far as migratory workers are concerned, these problems are more social than they are employer-employee relations problems. These problems are serious but they are not as serious, Senator, as you have described. They are not as serious as were described in "The Harvest of Shame," of November 25.

This was a very obvious propaganda piece. It was slanted, distorted, untruthful. For instance, "The Harvest of Shame" indicated, and I notice the Senator indicated, that 2 to 3 million migrants, "The Harvest of Shame" tried to make it appear that there was a dollar a day wages; you said six. At least we are $6—six times as well off as we were.

"The Harvest of Shame" tried to make it appear that these children had little or no schooling, said there's no record of a college graduate among the migrants. It pointed out that transportation was like cattle.

Now these are serious charges. It said that the housing was miserable, that these people had no chance to get out of the migrant stream.

What are the facts? I think that is the thing that the American people want to know, and I realize that I come here somewhat as an underdog. Farmers are one-tenth of the population, we are the lowest major segment on the totem pole, economically, our prices and our income are down. We have been regulated by the Federal Government and subsidized to the place where we are almost broke and much of our trouble is due to too much Government.

Now we come here with this distorted propagandized type of approach to justify Federal legislation.

What are the true facts?

Instead of 2 million to 3 million migrants, it's 400,000.

Instead of a dollar a day or $6 a day, many of these migrants make $15 to $20 to $35. The average pay is over a dollar an hour and not a dollar a day. They are transported under Federal interstate commerce regulations. If anybody transports them any size, any great distance in cattle trucks, they should be prosecuted.

The housing is not all the best that we would like, but it's improving a great deal.

And, Senator, I notice that in the hearing record that the folks who know about the migrant program and the problems best were the ones who were not enthusiastic for Federal regulation. For instance, a friend of mine, Martin P. Castlewood, Commissioner of New York State Department of Labor said "My own personal opinion is that any Federal legislation in the area of migratory farm labor should be on a basis which permits the States which are willing to accept the responsibility for reasonable standards, to continue to have the responsibility for the enactment and administration of such standards."

Then from your own State, Senator WILLIAMS, a friend of mine, Phil Lamphey, Secretary of the Department of Agriculture, he said "We have made tremendous progress over the past three decades in establishing suitable and adequate migratory labor camps."

Mr. SMITH. Excuse me, Mr. Shuman. I have allowed you 2 minutes beyond your time.

May I open up the discussion, but before I do, I wouldn't want my silence on your criticism of the program that we produced, the "Harvest of Shame," to be considered an agreement with what you said.

Since you did criticize the program, I would like to say to you that though I said there was praise and criticism, in fact there was much more praise than criticism and we received the remark from the executive secretary of the President's Committee on Migratory Labor to this effect "CBS Reports is receiving the same treatment everyone receives who dares to question labor practices in agriculture. If your program had not been attacked by the growers, it would have been a meaningless one."

However, that's about that program.

I hope we can now go back to the subject, and you can debate, not me, but Senator WILLIAMS.

Senator, the floor is yours, now.

Senator WILLIAMS. Thank you again, Mr. SMITH.

I don't want to take all of my time here in rebuttal to general statements of Mr. Shuman. I gather when he was talking about the propaganda piece he was talking about the CBS program "Harvest of Shame." CBS certainly does not need me in its defense and I don't believe you meant to imply that any of the work that we were doing receives the Farm Bureau charge that we are propagandizing or using——

Mr. SHUMAN. No, no.

Senator WILLIAMS. Any unhappy devices.

I would say in answer to, first of all, an observation—I got the impression that you're feeling a bit sorry for yourself, Mr. Shuman, that the farmer is the underdog, he is only 10 percent of the population. We are dealing here with the problem of farmworkers and these farmworkers are excluded from every piece of social and economic legislation in our Nation, with the exception of social security. And, believe me, I've been through many States and I have yet to see social security withholding on the average migrant farmworker. So here, too, in fact as a practical matter he is excluded. So, as underdogs, and if you are opposed to legislation you have certainly had your way but I would like to deal first of all with some of the legislation that we propose and I think we should get your view on it.

One of the hardest problems we have seen is the failure of communities to—to make possible education for the youngster who is there for a few weeks or maybe a month or two. We know that the young people of migrant farmers are falling every year farther and farther behind their age groups.

We have a report from Time magazine that, in August, out of 8,000 youngsters only 600 had gotten an education while they were in Colorado.

In response to this, a real, real problem, we have legislation that would provide Federal assistance to communities that try to welcome these youngsters into their school systems while they are there—a 75-percent grant of the operating costs, that scales down to 50 percent.

We also, and perhaps even more importantly, provide grant money to communities who will—who will start summer schools for these youngsters. They are there, as I describe, they are either in the fields or they're shifting for themselves. The schoolhouses are empty. The teachers could be found at very modest cost. We provide $250,000 a year, only that for summer schools for the youngsters when they are traveling north in the areas where schools are not in session.

Now it seems to me that the Farm Bureau could be proud of itself if it would recognize this as a problem and support this. I know that they know, and that you do support better educational opportunities for migrant farm youngsters and I just can't understand the opposition to this measure.

Mr. SHUMAN. Well, Senator, we are not opposed to regulation, per se. We are not opposed to the idea of improvement. In fact we recognize that there has been a tremendous improvement in the way in which the migratory workers are treated, their living conditions, their educational opportunities and all the rest and I think the hearings of your subcommittee——

Senator WILLIAMS. Well, now——

Mr. SHUMAN. Recognizes this and I think that you, sir, certainly do after hearing the testimony of the folks who know best.

Senator WILLIAMS. Here and there there is a blue patch in a very dark sky, I will grant that, and I always recognize it and applaud those people who are showing improvement—but, across the country they are being left out of education, the youngsters. Can't we have a view here, of—an understanding of the problem, at least?

Mr. SHUMAN. Now, let's get it straight.

The proposed legislation is a subsidy from the Federal Government to the States for the education of the migrant workers.

Now, the point that I want to make is that educational subsidies from the Federal Government will not necessarily improve the educational opportunities of these people. They are subject to the same compulsory school attendance requirements that any other children are and——

Senator WILLIAMS. And they are not getting the education, because the school communities can't stand the operating cost burden that this would impose.

(Simultaneous voices.)

Mr. SHUMAN. I don't think——

Senator WILLIAMS. It seems to me——

Mr. SHUMAN. I don't think this is true, Senator, because there is absolutely no evidence, either in the hearing record or anywhere else, that we cannot afford a good educational system with the resources we have at State and local levels. The Federal Government is far more—far less able to take care of the additional needs of the people, based on the relationship of the Federal debt to the resources and the tax load, than is the local and State school system.

Senator WILLIAMS. That is a conclusion, of course, not shared in by a majority of the people in the country, and the President has asked us to give him a program of support to public education for permanent residents.

But let us move on to one other aspect of the legislative program that we propose.

You and I know that the average adult who travels as a migrant farm worker, he, too, has been left out in his early years of the fundamentals of education to the point where he or she doesn't even comprehend the rudiments of simple living, using the flush toilet or the shower or the running water.

Wherever we go the growers first complaint is: When I put a shower in, the nozzle is taken off, the facilities are abused. If I put screens on, they are kicked out.

Now, we have a bill that again provides a modest amount of money, again it's $250,000 annually for adult education in just the rudiments of simple, sanitary, decent living. If your folks, when they tell us that this is a problem that they feel concerned about, they, I would think, would see here an opportunity to do something about our adults, too.

Mr. SHUMAN. Senator, the folks on the farms, a million, 600,000 families in our organization, a pretty good chunk of them——

Senator WILLIAMS. They are (words lost).

Mr. SHUMAN. Are just as much concerned, were just as much concerned about the education and good treatment of these folks as any Member of Congress or anyone else, and we are the ones that are doing something about it.

Now, will this progress, this is the question, will this progress that we've been making, and you admit that there is considerable progress that has been made in the last several years——

Senator WILLIAMS. I can't use the adjective "considerable."

Mr. SHUMAN. All right, I can. But——

Senator WILLIAMS. Measured, very halting progress by a few enlightened people.

Mr. SHUMAN. All right.

Will this progress, then, be speeded up by Federal legislation? And we say no, simply because whenever you pass legislation to subsidize education, to subsidize anything else, when you pass legislation to assume the regulation and the regulatory responsibilities, immediately then local communities and States transfer this responsibility to the Federal Government. And that has been going on in the field of housing and many other areas where the Federal Government has stepped in. We think that the best place to solve the migratory problems, the social, educational, and other problems of migratory workers, is right back in the local communities where people know what the need is, where they can do something about it with the resources which they have. And this is where the economic benefit comes to us, back in the local community, and that is where the burden of the cost of the program should be——

Senator WILLIAMS. Well, I will say that not all of your colleagues who are growers, or associated with growers, agree with you.

Mr. Abney Cox(?), who is a grower of Princeton, Fla., perhaps you know him, and other growers, have supported our legislation.

But I wish you would perhaps talk to the farm bureau of my State. They came in last week, or a couple of weeks ago, to talk to me, they were negative on my program for migratory workers, this I knew before they came, and they—certainly testified again when they were here, and at the end of our discussion they told me about the problem they were having with blackbirds. Blackbirds are spoiling their fruit crops, their corn crops, and they asked us at the end of the breakfast, at the end of our meeting, if the Federal Congress wouldn't appropriate $250,000 to do something about the blackbirds that are plaguing the crops and the farms of this country.

Now, I just cite this——

Mr. SHUMAN. Well, don't misunderstand——

Senator WILLIAMS. It seems to me that the farmers, where the program goes to their economic betterment, very, very easily see the advantage of a national program, a Federal program; where it will come to the benefit of others, perhaps they are slower.

But let me please try to make one point: If we improve the housing, the education, the working conditions, the general lives of these folks who are desperately wretched, and I know you have conclusions that progress is being made, but I have seen the misery and it's—it's not the exception, it's the rule——

Mr. SHUMAN. Senator,——

Senator WILLIAMS. The exception is not misery. And you will have better workers.

Mr. SHUMAN. Senator, there is misery in the slums of Newark and Jersey City.

Senator WILLIAMS. And Federal legislation to deal with it.

(Mixed voices.)

Mr. SMITH. Let Mr. Shuman make his point.

Mr. SHUMAN. Federal legislation will not cure the slums of Jersey City or Newark any more than it will cure the slums in the migrant labor camps. It's got to be done by local initiative and local effort. And this is the trouble of the subsidy route, or the regulation route of the Federal Government.

Senator WILLIAMS. Well, of course, I must disagree. I know there are problems with some of our metropolitan programs, but we are persisting in them and they are cleaning slums and they are providing decent housing and they are doing a job in our cities, and a lot more must be done. But we have a problem in Congress on that score. We can get hundreds of thousands of dollars for metropolitan problems, while you and I know we spend billions of dollars on farm problems.

Mr. SHUMAN. Let me get this straight, though. Now the farmers in the United States, most of them, the majority of them that are in our organization, and for some 15 years we have been urging that the Congress turn around and reduce the—price fixing subsidy control programs in the United States for agriculture. We are consistent, we are saying that we don't want these programs, they have hurt us more than they've helped us.

Senator WILLIAMS. You are here speaking for one group of farmers.

Mr. SHUMAN. The biggest group.

Senator WILLIAMS. The Farm Bureau.

Mr. SHUMAN. Over 50 percent of the organized farmers.

Senator WILLIAMS. Other farmers disagree with you on that.

Mr. SHUMAN. They do.

Senator WILLIAMS. I might advise you and you know that other farmers disagree with you on the comprehensive program that we had for migratory farmworkers and their families. The Farmers Union supports most

of the 11 point legislative program that I have introduced into the Congress——

Mr. SHUMAN. That's right.

Senator WILLIAMS. And with that support we are very grateful.

Let me deal with——

Mr. SMITH. Mr. Shuman, I don't think has had his full share of the time.

If there are some points you would like to make, Mr. Shuman——

Mr. SHUMAN. Yes, I would. I would like to make a very definite point that when you get Federal legislation, regulation, then you have to have administration; and in a country as large as the United States a federally administered program cannot take account of the extreme variation that there is from community to community and State to State. Furthermore you have the kind of thing, Senator, that we experienced with the former Secretary of Labor Mitchell who strained the interpretation I think of the legislation and certainly used rather dictatorial authorities to move into the farm labor field. I don't think that any of us believe that with increased Federal legislation we will have any more—any less of this approach to the solution to problems than we had with Secretary Mitchell.

We are going to have more of it because we'll have more administrators, more folks watching every community in the United States, huge cost to the Federal Government and slowing down progress to the rate of the slowest. That's what happens under Federal regulation, the minimum becomes the maximum. You transfer responsibilities from local people and local communities to the Federal Government and that's not a good direction to go.

Senator WILLIAMS. Is this what happened when almost 30 years ago we enacted a minimum wage, unemployment compensation, workmen's compensation——

Mr. SHUMAN. In my opinion——

Senator WILLIAMS. And limited workweek?

Mr. SHUMAN. It's my opinion that the laborers of the United States have been hurt more by the increased unemployment generated by the increase in minimum wages than they have been helped. I think the competitive way is the way to improve conditions for not only labor but agriculture and all the rest.

Senator WILLIAMS. Well, I would think that most of the people in this country recognize that with those built-in security measures that we have enjoyed for 20 to 30 years, has come the new opportunity for the average American to enjoy some of the good things of life.

But we're not asking anything extravagant for the farm worker, all we are asking for is education for—for his youngsters, an opportunity to have——

Mr. SMITH. Gentlemen——

Senator WILLIAMS. Health care and welfare care——

Mr. SMITH. I'm sorry to interrupt but we have to have the summaries now.

Can Mr. Shuman give his summary statement—2 minutes.

Mr. SHUMAN. Actually I think that we have seen the essential elements of the disagreement here. We on the farms of the United States are just as interested and just as—going to work just as hard to improve the conditions of these poor folks as anyone else. We have crops that still must be harvested by hand unfortunately, and we are—we're conscious of the fact that the way to solve the migrant labor problem is to do away with the kind of work that makes it possible. Federal legislation may in effect continue the migrant worker many, many years longer than he would be continued if we continue the way we have with research and emphasis on ways to eliminate the problem by eliminating the work.

Now, our basic belief is that the centralization of power in the central Government or Federal Government, power and authority, and encouragement of lack of responsibility by individual citizens is one of the greatest perils that we have to the future of our Republic and to our competitive enterprise system.

It has not been demonstrated that increased Federal responsibility improves the conditions for these people and this Federal legislation is an entering wedge to be broadened out, it's really a part of the campaign on the part of the monopoly powers in labor to organize and control the food industries just as they are commencing to control the transportation industry.

Mr. SMITH. Excuse me, Mr. Shuman, I'm sorry your time is up.

Could we have Senator WILLIAMS' concluding statement?

Senator WILLIAMS. Well I want to first of all give Mr. Shuman every credit for good will and a good heart, but the fact is, notwithstanding the good will expressed here, the average American migratory farmworker right now makes less than $900 a year. His youngsters are falling further and further behind in education. He does not receive any of the public health and welfare services that all other poor Americans receive. He has not had the opportunity to benefit from a floor for wages, there is no minimum wage that applies.

His youngsters are not protected, they are excluded from the provisions of the child labor law except for during school hours. Wherever you look for those legislative efforts to make the beginning of a better life, the American migrant farmer and his family have been left out. They are truly outcasts. Our legislative program deals with every, almost every item, those that we understand at least, the wages, economic conditions, the situation of the children, and opportunity to join in labor unions, yes, I thought we had grown up in this country to know that labor unions are a part of our way of life and that a working man or woman should have an opportunity to express himself and bargain collectively. And this we provide for, as well as looking into the future and providing for an advisory council to advise the President and the Congress on the continuing and the persistent problems of almost 2 million Americans who are desperately left out of the affluent society most of us enjoy.

Mr. SMITH. Gentlemen, I have done nothing but interrupt both of you and I apologize to you.

The time has been simply too brief for such a serious topic.

Thank you very much for coming here to debate this question.

SENATE

MONDAY, APRIL 3, 1961

The Senate met at 12 o'clock meridian, and was called to order by GEORGE D. AIKEN, a Senator from the State of Vermont.

The Chaplain, Rev. Frederick Brown Harris, D.D., offered the following prayer:

Our Father, God, in the afterglow of earth's gladdest day we come girding ourselves with its deathless message, as in the sense of the Eternal we take up our daily tasks again in these fields of time.

We rejoice, this hour, that all that the world celebrated yesterday with jubilant awe is not just a promise, but is a possession. Today we may be risen with the One who stepped out of a spoiled and beaten grave. Already we have passed from death to life.

May we know in truth that life in the here and now takes on a new sheen, a new value, a new dimension.

Above all the clamor of these agitated days may we hear Thy call to that which is excellent, generous, and true—rising in newness of life above that which is coarse, selfish, and false.

May the Risen Life make us persons of brotherly love in an unbrotherly world; to others' faults make us forgiving, as we would be forgiven. As our risen lives touch the lives of others, teach us to be gentle in our attitudes, just in our dealings, fair in our judgments, and steadfast in our purpose, though pressed by every foe.

We ask it in the Risen Redeemer's name. Amen.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED DURING ADJOURNMENT

Under authority of the order of the Senate of March 30, 1961, the President pro tempore, on March 30, signed the following enrolled bills and joint resolution which had previously been signed by the Speaker of the House of Representatives:

H.R. 1163. An act to amend section 510 of the Interstate Commerce Act so as to extend for 27 months the loan guaranty authority of the Interstate Commerce Commission;

H.R. 5188. An act making supplemental appropriations for the fiscal year ending June 30, 1961, and for other purposes; and

H.J. Res. 32. Joint resolution to designate the first day of May of each year as Law Day, U.S.A.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., April 3, 1961.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. GEORGE D. AIKEN, a Senator from the State of Vermont, to perform the duties of the Chair during my absence.

CARL HAYDEN,
President pro tempore.

Mr. AIKEN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Thursday, March 30, 1961, was dispensed with.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States submitting

a nomination was communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGE REFERRED

As in executive session,

The ACTING PRESIDENT pro tempore laid before the Senate a message from the President of the United States submitting the nomination of Thomas C. Mann, of Texas, to be Ambassador Extraordinary and Plenipotentiary to Mexico, which was referred to the Committee on Foreign Relations.

CALL OF THE CALENDAR DISPENSED WITH

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the call of the consent calendar be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following communication and letter, which were referred as indicated:

AMENDMENT OF SECTION 4 OF EMPLOYMENT ACT OF 1946

A communication from the President of the United States, transmitting a draft of proposed legislation to amend section 4 of the Employment Act of 1946 (with an accompanying paper); to the Committee on Banking and Currency.

RELIEF OF CERTAIN MEMBERS OF THE UNIFORMED SERVICES

A letter from the Secretary of the Navy, transmitting a draft of proposed legislation for the relief of certain members of the uniformed services erroneously in receipt of family separation allowances (with an accompanying paper); to the Committee on the Judiciary.

ALLOCATION OF MISSOURI BASIN WATER RESOURCES—RESOLUTION

Mr. SYMINGTON. Mr. President, the allocation of water in the upstream reservoirs on the Missouri River and the proper interpretation of the Flood Control Act of 1944 have received much attention over the past few weeks.

The City Council of Kansas City recently went on record as opposing changes in the present policy of operation of the reservoirs along the Missouri River.

Mr. President, I ask unanimous consent that the resolution of the Council of Kansas City, Mo., dated March 24, 1961, be inserted at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

A resolution protesting proposed change of policy relative to the Flood Control Act for the upper Missouri River

Be it resolved by the Council of Kansas City, That Kansas City, Mo., strongly opposes change in the present policy of operation of the multiple-purpose reservoirs constructed under the authority given in the Flood Control Act of 1944 on the upper Missouri River, which would make the production of the maximum amount of firm hydroelectric power the primary consideration in the release of water. This change would not only be a departure from the objectives of the reservoir construction agreed upon and established when the reservoirs were authorized but would be a breach of faith with all downstream interests which supported the proposal for their construction. Operation primarily, instead of incidentally, for hydroelectric power production is wholly incompatible with flood control, navigation on the lower river, as well as irrigation in the upstream areas. We believe the true objectives are adequately expressed in existing legislation and have been followed in the operating program of the Army Engineers and in the resolutions of the Coordinating Committee of the Missouri River Basin Interagency Committee. Kansas City condemns as unfair and not in the public interest any change which would militate against the multiple-purpose concept of reservoir operation and use originally agreed upon and now in effect; and be it further

Resolved, That copies of this resolution be forwarded to the Governors of Missouri and Kansas and to all Members of Congress from those States.

JOHN P. RYAN,
Acting City Manager.
JOHN COSGROVE,
Acting City Counselor.
TOM GAVIN,
Councilman.

REPORT ENTITLED "PATENTS, TRADEMARKS, AND COPYRIGHTS"—REPORT OF A COMMITTEE—INDIVIDUAL VIEWS (S. REPT. NO. 143)

Mr. McCLELLAN. Mr. President, from the Committee on the Judiciary I ask unanimous consent to submit a report entitled "Patents, Trademarks, and Copyrights," pursuant to Senate Resolution 240, 86th Congress, 2d session, as extended.

I ask unanimous consent that the report, together with the individual views of the Senator from Wisconsin [Mr. WILEY] and the Senator from Nebraska [Mr. HRUSKA], be printed.

The ACTING PRESIDENT pro tempore. The report will be received and printed, as requested by the Senator from Arkansas.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MANSFIELD (for himself and Mr. METCALF):

S. 1501. A bill to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs; to the Committee on Interior and Insular Affairs.

(See the remarks of Mr. MANSFIELD when he introduced the above bill, which appear under a separate heading.)

By Mr. BUTLER:

S. 1502. A bill to amend the Merchant Marine Act, 1936, in order to provide that for certain purposes cargo containers constructed for use with a vessel shall be considered as part of such vessel; to the Committee on Interstate and Foreign Commerce.

By Mr. BEALL:

S. 1503. A bill for the relief of Mario Simoes Da Fonseca; and

S. 1504. A bill for the relief of Kejen Pi Corsa; to the Committee on the Judiciary.

By Mr. MORSE:

S. 1505. A bill to repeal the tax on general telephone service and the tax on transportation of persons; to the Committee on Finance.

(See the remarks of Mr. MORSE when he introduced the above bill, which appear under a separate heading.)

By Mr. RANDOLPH (for himself and Mr. BYRD of West Virginia):

S.J. Res. 71. Joint resolution proposing an amendment to the Constitution of the United States, extending the right to vote to citizens 18 years of age or older; to the Committee on the Judiciary.

(See the remarks of Mr. RANDOLPH when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTION — RECOGNITION OF APRIL 15 OF EACH YEAR AS AFRICA FREEDOM DAY

Mr. HUMPHREY submitted a resolution (S. Res. 118) favoring the recognition of April 15 of each year as Africa Freedom Day, which was referred to the Committee on the Judiciary.

(See the above resolution printed in full when submitted by Mr. HUMPHREY, which appears under a separate heading.)

AUTHORITY TO SELL GOVERNMENT-OWNED BUREAU OF INDIAN AFFAIRS ELECTRIC AND TELEPHONE LINES

Mr. MANSFIELD. Mr. President, as my colleagues in the Senate know, various agenices of the Federal Government operate their own electric and telephone systems in isolated areas. During the past year, I have discovered that the Federal agencies are not authorized to expand this service to accommodate the general public.

This matter was brought to the attention of my colleague [Mr. METCALF] and myself when the Range Telephone Co-op, Inc., at Forsyth, Mont., made an application to purchase the telephone system of the Bureau of Indian Affairs, at Lame Deer, Mont., on the Northern Cheyenne Reservation. The local community was not receiving telephone service, and the agency switchboard was not being used to capacity, because its services were limited to the local Bureau offices and facilities.

When there are existing utilities and when there is a demand for the service, I think it is perfectly reasonable to permit the utility which is serving the immediate area to negotiate for the purchase of the existing system, so that

new telephone or electric service can be privided to the area. The provisions of the bill which I now introduce, on behalf of my colleague and myself, will permit the sale of the Federal facilities now operated by the Bureau of Indian Affairs.

It is my general impression that the Department of the Interior is sympathetic in regard to the situation that exists on the Northern Cheyenne Reservation, and I hope the Department will be able to expedite its report on this bill. Favorable consideration of this measure will permit the extension of new services in areas that now are isolated.

Mr. President, I ask unanimous consent to have printed at the conclusion of my remarks in the CONGRESSIONAL RECORD the language of the bill and three pieces of correspondence which are of direct concern in this matter.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and letters will be printed in the RECORD.

The bill (S. 1501) to authorize the Secretary of the Interior to contract for the sale, operation, maintenance, repair, or relocation of Government-owned electric and telephone lines and other utility facilities used for the administration of the Bureau of Indian Affairs, introduced by Mr. MANSFIELD (for himself and Mr. METCALF), was received, read twice by its title, referred to the Committee on Interior and Insular Affairs, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, Except for electric utility systems constructed and operated as a part of an irrigation system, the Secretary of the Interior is authorized to contract under such terms and conditions as he considers to be in the best interest of the Federal Government for the sale, operation, maintenance, repairs, or relocation of Government-owned utilities and utility systems used in the administration of the Bureau of Indian Affairs.

The letters presented by Mr. MANSFIELD are as follows:

U.S. SENATE,
COMMITTEE ON FOREIGN RELATIONS,
August 17, 1960.

Hon. ROGER ERNST,
Assistant Secretary of the Interior, Department of the Interior, Washington, D.C.

DEAR MR. ERNST: We are informed that an application has been submitted by the Range Telephone Co-op, Inc., Forsyth, Mont., to purchase the Bureau of Indian Affairs' telephone system which operates at Lame Deer, Mont., on the Northern Cheyenne Reservation.

As you know, there is no commercial telephone service in Lame Deer and the only telephone system is operated by the Bureau for its own use. Until such time as some other company or agency is prepared to supply this service to the Bureau there is no alternative. We now understand that the Range Telephone Co-op, Inc., is investigating the possibility of extending their lines to serve this area if there is an adequate number of interested consumers. Surveys show that service to the agency offices is vital in any plan which would bring commercial telephone service to Lame Deer.

Officers of the Range Telephone Co-op, Inc., visited our offices last week and stated that they were interested in buying the Bureau's exchange and integrating it into their system in the area. The application has been submitted authorizing this purchase and is now pending before the Director of Property and Management in the Department of the Interior. According to our information no objections have been made in the field or here in Washington. Such a purchase appears to be in the best interests of the general public and would promote the extension of telephone service to more isolated areas.

We would appreciate your checking into the status of this application and your assistance in expediting final action would be most appreciated. Telephone service is widespread in the rural areas of Montana but this area within the Northern Cheyenne Reservation still remains unserved and the local inhabitants are very anxious to have telephone service made available to them.

Thanking you and with best personal wishes, we remain,

Sincerely yours,

JAMES E. MURRAY,
U.S. Senator.
MIKE MANSFIELD,
U.S. Senator.
LEE METCALF,
Member of Congress.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., September 13, 1960.

Hon. MIKE MANSFIELD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: This is in response to letter dated August 17, 1960, signed by you, Senator MURRAY, and Congressman METCALF, which concerns the desire of the Range Telephone Co-op, Inc., Forsyth, Mont., to purchase the Bureau of Indian Affairs' telephone system at Lame Deer, Mont., on the Northern Cheyenne Reservation.

It is true there is no commercial telephone service in Lame Deer and such service is needed. It is also true that the only telephone system there is operated by the Bureau for its own use; and it is not authorized to spend Government funds for the purpose of expanding this service to accommodate the general public. The logical move, therefore, seems to be for a commercial telephone company to supply the service needs of the Bureau and the needs of the general public.

The difficulty we face is the fact that there is no authority to dispose of a serviceable utility system when there is a continuing need for the service by the Federal agency. Authority exists only to dispose of property no longer required.

We do believe that in such cases, and this is not the only Bureau utility with these circumstances, we should have authority to negotiate sales when there would be a resultant benefit to the Government and to the general public. To that end we are planning to seek legislation in the next session of Congress which will authorize such disposals. Until we obtain such authority we feel there is no way this transaction can be consummated. It is regretted that our reply must be unfavorable.

An identical reply is going to Senator MURRAY and Congressman METCALF.

Sincerely yours,

ELMER F. BENNETT,
Under Secretary of the Interior.

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., March 28, 1961.

Hon. MIKE MANSFIELD,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MANSFIELD: In answer to your letter of January 31, you are advised that the telephone system at Lame Deer, Mont., is not excess to the needs of the Bureau of Indian Affairs, and therefore cannot be disposed of without special legislation.

We are pleased to be able to inform you that the Bureau now has an excess line running from Ashland, Mont., to Lame Deer, Mont. This line will be disposed of by the Bureau's area office in Billings, Mont., in accordance with existing regulations. By acquisition of this line, the Range Telephone Cooperative, Inc., will be able to provide dial service to the residents of Lame Deer immediately. It is hoped that disposal of the line from Ashland to Lame Deer by the Bureau of Indian Affairs will result in phone service being made available to the residents of Lame Deer without delay.

In accordance with your request there is enclosed a draft of a proposed bill which would provide authority for the disposition of the system at Lame Deer. We have drafted this bill broad enough to cover all other similar utility systems operated by the Bureau. At the present time the Bureau has perhaps six or eight systems that are similar to the circumstances surrounding Lame Deer. As cooperatives and utility companies move closer to reservations, others will develop and the Bureau should have the authority to act when these commercial companies are in a position to provide a utility service to the general public around an Indian reservation and disposition of the system is in the interest of the Government.

The draft has been prepared as a drafting service, and I am sure you understand that because it has not been cleared through the Bureau of the Budget it is submitted without commitment from the Department.

The enclosures with your letter are being returned and a copy of this letter is being sent to Senator METCALF.

Sincerely yours,

JOHN A. CARVER, JR.,
Assistant Secretary of the Interior.

PROPOSED REPEAL OF EXCISE TAX ON PASSENGER TRAVEL AND LOCAL TELEPHONE SERVICE

Mr. MORSE. Mr. President, I introduce, for appropriate reference, a bill to repeal the tax on general telephone service and the tax on transportation of persons.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1505) to repeal the tax on general telephone service and the tax on transportation of persons, introduced by Mr. MORSE, was received, read twice by its title, and referred to the Committee on Finance.

Mr. MORSE. Mr. President, this measure will repeal, effective the first month after enactment, the 10 percent excise tax on passenger travel, and the 10 percent tax on local telephone service.

Both taxes were imposed during time of war not simply for money-raising purposes, but primarily to discourage wartime use of limited transportation and communication facilities.

The latter purpose is no longer applicable, and there are ample ways of raising the revenue from more equitable sources. These excise taxes are unfair to those who must pay them, and are a very heavy burden upon the industries they affect.

Both should be dropped in their entirety.

VOTING RESPONSIBILITY SHOULD BE EXTENDED TO 18-YEAR-OLD CITIZENS; CONSTITUTION SHOULD BE AMENDED

Mr. RANDOLPH. Mr. President, when a Member of the House of Representatives I introduced a resolution more than 18 years ago to amend the Constitution and extend voting rights to 18-year-olds. My interest in this matter has not abated during the almost two decades which have intervened. On March 29, 1960, I presented Senate Joint Resolution 179 for this purpose. Senator BYRD of West Virginia joined me in introduction of the measure to amend the Constitution to provide for such voting.

It is gratifying, therefore, to observe that this concern is shared by other Members of this body, and particularly by our able colleagues, the senior Senator from Tennessee [Mr. KEFAUVER], the junior Senator from New York [Mr. KEATING] and the leader of the minority, the eloquent junior Senator from Illinois [Mr. DIRKSEN]—each of whom has independently submitted such a resolution during this session of Congress.

I shall not presume upon the time of the Senate in order to relate the arguments which are well known to all of us. However, I believe it would be of more than passing interest and value to summarize the actions of the individual States in this field, and to note the present status of age requirements that prevail in the various States.

ALASKA AND HAWAII ACT

It is, perhaps, not mere coincidence or an accident of history that the two States most recently admitted to the Union, and hence the two which have achieved statehood under distinctively modern conditions of education and communication, are among the few with voting limitations of less than 21 years. The State of Alaska entered the Union under a constitution approved by a 2-to-1 majority which established the voting age at 19 years or above. During the same year our friends in Hawaii were admitted to the Union under a constitution which provided for voting at the age of 20 or above.

However, the first State to take positive action in this field was the State of Georgia, which lowered the voting age to 18 by referendum in 1943. The State of Kentucky, after several inconclusive efforts in the legislature during the forties and early fifties, finally succeeded in having the issue put to a referendum test, and in 1955 the citizens of Kentucky voted to lower the voting age to 18.

This is the roster of the States, Mr. President, where a voting age of less than 21 prevails. But it is not an accurate index of the actions taken by the other individual States, nor is it an adequate gage of the interest and sentiment among the American people in favor of lowering the voting age.

Since October 21, 1942, when I first submitted my resolution (H.J. Res. 354) in the other body—a time which I use as a benchmark simply because it relates to my own actions in this field—all but three of the States have taken some legislative action to lower the voting age, many of them having made repeated efforts. And in no less than 14 States—according to a study performed by the Library of Congress—measures to lower the voting age to 18 have passed in at least one house of the legislature. In three States—Indiana, Pennsylvania, and Tennessee—such measures have passed both houses, but have failed for lack of meeting other requirements of the amendment procedure.

The PRESIDING OFFICER (Mr. HUMPHREY in the chair). The time of the Senator has expired.

Mr. RANDOLPH. Mr. President, may I ask unanimous consent to have 1 additional minute, since there are few Senators who wish to make speeches?

The PRESIDING OFFICER. Without objection, the Senator is granted 2 additional minutes.

TWENTY-THIRD AMENDMENT IS RATIFIED

Mr. RANDOLPH. These actions have been taken, Mr. President, without benefit of the added momentum which would accrue if there were a national movement to amend the Federal Constitution. We have recently seen how effective such an effort can be in the record time in which the 23d amendment was ratified by the States.

Gratifying though it is to see the enfranchisement of the citizens of the District of Columbia, their plight was no less real or urgent than that of the millions of 18 to 21 year olds who bear so many of the responsibilities of citizenship without this most essential prerogative. It is, therefore, in the hope of correcting this inequity that I submit this resolution to amend the Constitution and extend the right to vote to citizens 18 years of age or older.

I ask that the joint resolution be appropriately referred and printed in the RECORD at the conclusion of these remarks.

The PRESIDING OFFICER. The joint resolution will be received, appropriately referred, and, without objection, printed in the RECORD.

The joint resolution (S.J. Res. 71) proposing an amendment to the Constitution of the United States, extending the right to vote to citizens 18 years of age or older, introduced by Mr. RANDOLPH (for himself, and Mr. BYRD of West Virginia), was received, read twice by its title, referred to the Committee on the Judiciary, and ordered to be printed in the RECORD, as follows:

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein), That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution when ratified by the legislatures of three-fourths of the several States:

"ARTICLE —

"SECTION 1. The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age. The Congress shall have power to enforce this article by appropriate legislation.

"SEC. 2. This article shall be inoperative unless it shall have been ratified as an amendment to the Constitution by the legislatures of three-fourths of the several States within seven years from the date of its submission to the States by the Congress."

CIVIL RIGHTS ACT OF 1961—ADDITIONAL COSPONSOR OF BILL

Under authority of the order of the Senate of March 24, 1961, the name of Mr. PASTORE was added as an additional cosponsor of the bill (S. 1434) to effectuate and enforce the constitutional right to the equal protection of the laws, and for other purposes, introduced by Mr. DOUGLAS (for himself and other Senators) on March 24, 1961.

SELECT COMMITTEE ON CONSUMER INTERESTS — ADDITIONAL COSPONSORS OF RESOLUTION

Under authority of the order of the Senate of March 24, 1961, the names of Senators LONG of Missouri, PASTORE, YOUNG of Ohio, METCALF, MORSE, HART, DOUGLAS, PROXMIRE, GRUENING, MCGEE, RANDOLPH, COOPER, PELL, and BARTLETT were added as additional cosponsors of the resolution (S. Res. 115) to create the Select Committee on Consumer Interests, submitted by Mrs. NEUBERGER, on March 24, 1961.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. SCHOEPPEL:

Address entitled "Medical Care for the Aged," delivered by Senator BENNETT before the Harvard Medical School, at Boston, Mass., on January 27, 1961;

TRIBUTE TO THE LATE SENATOR JAMES E. MURRAY

Mr. MANSFIELD. Mr. President, I ask that there be printed in the RECORD a tribute to my late colleague, Senator James E. Murray, prepared by Mr. Walter W. Heller.

There being no objection, the tribute was ordered to be printed in the RECORD, as follows:

STATEMENT OF TRIBUTE BY WALTER W. HELLER

It is with great sadness that I learned of the death of former Senator James E. Murray of Montana. Senator Murray's record of devoted service to his country, which he served for more than a quarter of a century as an eloquent, energetic, wise, and dedicated Member of the Senate, is an inspiring one. His passionate concern with the elimination of social injustice was responsible for the series of legislative proposals, with which his name is inseparably linked.

High among these is the Employment Act of 1946. He, more than any other single person, was the builder of this act. He sponsored it. He was responsible for the basic policy decisions which engendered it. His conviction and energy were crucial in transforming the idea behind the act into a specific legislative proposal, and his courage and unwavering faith were instrumental in shepherding the act into law.

It is now my privilege to serve as Chairman of the Council of Economic Advisers, which was created by this act. I know that I am joined by my colleagues on the Council, past and present, in expressing our real sense of personal loss at the passing of this courageous and dedicated legislator.

RONALD W. MAY

Mr. MANSFIELD. Mr. President, it has come to my attention that one of the outstanding newspapermen stationed in the Capitol, Mr. Ronald May, of the Madison Capital Times, Madison, Wis., and other newspapers, passed away suddenly this morning.

Mr. May had the reputation of being a good reporter. When he got onto a story, he followed it through to its logical conclusion. In doing so, he stepped on people's toes; but he always seemed to be able to achieve his objective.

It is with regret that I announce that this fine journalist and outstanding reporter passed away this morning, at the age of 38.

I wish to extend my deepest sympathy and condolences to the family of Mr. May.

ALASKA'S NEWLY PROJECTED MARINE HIGHWAYS

Mr. GRUENING. Mr. President, at the general election in Alaska, last November, the people of Alaska approved four bond issues.

One was for a gymnasium and powerplant for our excellent University of Alaska, a land-grant college a few miles west of Fairbanks.

Another bond issue was for a vocational boarding school north of the Yukon.

A third was for the development of airports throughout Alaska.

The fourth, in the amount of $23 million, was for two ferry systems and highways.

It is of the last that I wish to say a few words. The State legislature, which now is concluding its third annual session, implemented this bond issue vote by appropriate legislative action. Eighteen million dollars will go toward the two ferry systems. Five million dollars will go for roads. Actually, it would be correct to say that the entire amount will be expended on highways, for the two ferry systems have been aptly referred to as marine highways, which is, indeed, what they are.

Alaska coast is a fragmented one. It consists of both rugged mainland shorelines and thousands of islands. Indeed, southeastern Alaska, the narrow 300-mile so-called panhandle, which extends northwesterly along the upper end of the famous Inside Passage, is, in addition to a narrow strip of precipitous mainland indented by deep, canyon-like fiords, also an archipelago. It consists of hundreds of islands, some of very substantial size. It is virtually impossible to construct a north-south land highway over this rugged terrain. But through the islands thread magnificent waterways—the famed Inside Passage, with its ramifications—passing through some of the most beautiful scenery on earth. Large car ferries are the answer to this problem.

A similar situation exists farther west, where the island of Kodiak—about the size of Puerto Rico—is separated by the deep waters of Shelikof Straits from the mainland. The fishing town of Seldovia, at the southwestern end of the Kenai Peninsula, although on the mainland, is, like so many other Alaskan communities, not accessible by highway. A ferry from Anchorage, connecting these points, and perhaps others, will supply the transportation that is now lacking except for air service.

Kodiak Island is entitled to, and needs, more than air transportation. Except for an occasional freighter, it has no maritime service. It houses the headquarters of the 17th Naval District, and of the Alaska Sea Frontier. It contains the oldest community in Alaska, at least in historic times—one which dates from the closing days of the 18th century, when it was settled by the Russians. It is the center of the important and recently developed king crab industry. These crustaceans are giant in size, the larger specimens measure over 5 feet across, and their meat has found ready acceptance as a delicacy throughout our Nation.

Kodiak is also famed for its great brown bear, the largest carnivore on earth, and for years an attraction to big-game hunters. Kodiak is developing a beef cattle industry, for which its mild winter climate, caused by the warm Japan current, is particularly propitious.

The new ferry systems will greatly increase the accessibility of all parts of Alaska. Today, virtually the only ingress or egress is by air. Passenger service on the only U.S. steamship line from Seattle to Alaska was suspended in 1954. Several excellent cruise ships come up the Inside Passage during the summer months; likewise, once a week a Canadian Pacific vessel makes the trip.

But experience has shown clearly in recent years that many Americans would like to travel by automobile from their homes in the 48 lower States to Alaska. The southeastern ferry will enable them to go directly by highway to Prince Rupert, British Columbia, passing on their way through our scenic Northwest and the Canadian Rockies. The southeastern Alaska ferry system will begin at Prince Rupert, and will take the cars and passengers aboard. It will stop, northbound, at Ketchikan, Wrangell, Petersburg, Sitka, Juneau, Haines, and Skagway. Each of these southeastern Alaska coastal towns contains much to attract visitors. They can take their cars off in each, see the sights, and await the next ferry; or they can travel on through to Haines or Skagway, both superb in their scenery. At Haines, near the north end of the terminal fiord of the Inside Passage, known as Lynn Canal, the Haines cutoff will permit them to drive their cars to the Alaska Highway, and over it into western Alaska.

Reentering Alaska over the Alaska Highway, they can proceed northwestward to Fairbanks. They can take an alluring side trip over the Taylor Highway to Eagle, on the shore of the mighty Yukon; or they can swing southward over the Tok cutoff, skirting the giant Wrangell Mountains, and into the scenic Glenn Highway, with alternative routes to Valdez, on the Pacific, or to Alaska's metropolis, Anchorage. Or they can continue up the Alaska Highway to Big Delta, and strike southward on the Richardson Highway to the Denali Highway, which leads them directly into Mount McKinley National Park, where 90 more miles of highway within the park lead them to spectacular views of the monarch of the North American Continent, 20,300-foot Mount McKinley.

Or, after proceeding along the Glenn Highway to Anchorage, they may pass through it to Seward, on Resurrection Bay, or diverge along the Taylor Highway into the Kenai Peninsula. Or they may, from Anchorage, take their cars on the ferry to Kodiak.

Everywhere these visitors will see scenic beauty beyond compare, the unspoiled wonders of the last frontier.

The new projected ferry systems—the marine highways—will make all this possible, and will permit the visitors to return to their homes by a different route—the Alaska Highway, which will take them back home through Canada. Or they can reverse the process—driving up over the Alaska Highway, and returning after their vacations in Alaska by way of Haines and the southeastern Alaska ferry to Prince Rupert.

This projected ferry system will make the most beautiful scenery on the North American Continent and the unique wildlife resources of Alaska readily available to those who wish to drive to Alaska and savor of the friendly hospitality of the last frontier. For those who have not visited the 49th State, it will be an unforgettable experience.

LATIN AMERICA REPORTS BY SENATOR AIKEN AND SENATOR MORSE

Mr. MANSFIELD. Mr. President, in the March 1961 issue of the Foreign Service Journal appears an article entitled "A Footnote to Recent History." The article was written by L. D. Mallory; and in it references are made to the reports prepared by the Senator from Vermont [Mr. AIKEN], who at this time is the Acting President pro tempore of the Senate, and the Senator from Oregon [Mr. MORSE], as a result of their trips to South America. In the article much is said concerning the reports prepared by those two Senators; and reference is made to the fact that both of them will be benchmarks in our relationships with Latin America.

Because of the pertinence and timeliness of the article, I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Foreign Service Journal, March 1961]

A FOOTNOTE TO RECENT HISTORY

(By L. D. Mallory)

The "dismal science" of economics is on the verge of yet another retouching, re-

shaping, and remodeling. It is scarcely 9 years since a book entitled "The Big Change" gained wide currency by calling attention to a revolution that had taken place in basic concepts of American business, industry, and finance. It seems safe, nevertheless, to predict that we are now seeing the beginning of a new shift in emphasis and approach to America's concepts of economic productivity. Until recently, what was termed "social infrastructure" was not eligible for financing as part of economic development. Now, more and more, it is becoming respectable to consider financing some programs of social development as necessary for a healthy economy.

Soon there will be dissertations on the origins of the new trend and fine-spun arguments of rationale. Factors now included in the somewhat esoteric catchall term of "social infrastructure" will be worked over as important components of economics. One is impelled to throw out a few hints to future analysts: to point out to them influence they might otherwise overlook when they shuffle through contemporary headlines and commentaries on the chain of events we have witnessed in recent years.

In this mood, the opinion is ventured that, at least as far as the Government of the United States is concerned, two reports prepared by Senators AIKEN and MORSE after separate trips to Latin America in 1959 furnished the initial impulses for changes in official-level thinking and policies that set in motion the trend mentioned above.[1] Before those reports were issued, agencies in international finance had held that development comes only in terms of increased output or productivity and that, therefore, loans should not be concluded for other purposes. Our foreign aid program was administered in this spirit. Emphasis was placed on direct results from increase in production of goods and rise in gross national product, although exceptions were made, as in expenditures for technical assistance in the fields of education, health, and sanitation. Loans in such fields as housing were vetoed as not consistent with accepted theory concerning the bases for development. Now, economic pundits seem to have reviewed their thinking. They are beginning to define housing as being productive because workers who are inadequately housed cannot give a full measure of effort. Signs are already at hand that, by extension, a similar view will soon be taken toward health, educational, and other social factors. I believe it is fair to trace this evolution of thinking in the executive branch to questions asked of the lending agencies by Members of Congress. If I remember correctly, it was not until thereafter that the agencies began to entertain requests for foreign loans on housing.

Taking the senatorial reports as a point of departure, the sequence of events has been nothing short of dramatic. Early in 1960, a partial awakening to the shaky social substructure of many governments in Latin America took place in the United States. Reasoning on the subject covered a wide range of attitudes. There were those who saw, yet did not believe; those who did not see at all; and those who did see and believed that wide disparities in the social fabric of many countries in the hemisphere threatened the institutions of the Americas.

The force of this third group's convictions was largely responsible for the new departure taken by the executive branch of our Government when, on July 11, President Eisenhower announced from Newport, R.I., a "social development plan" addressed to Latin America in which it was provided that financial aid to cope with certain social problems could be extended to countries willing to participate. Congress opened the way for implementing this plan when, on August 31, 1960, it passed authorizing legislation for a $500 million social development fund. In September, at the hemispherewide meeting on economic questions held in Bogotá, Colombia, the U.S. delegation advanced the President's plan. It was enthusiastically received and, following some negotiation and drafting changes, adopted as the Act of Bogotá. The act is signally important. To put it mildly, new ground was broken by our Government's willingness to extend aid abroad for social infrastructure, and by hemispheric acceptance of the need to act on social reforms.

The act has four main sections: The first related to measures for social improvement, the second to the creation of a special fund for social development, the third to measures for economic development, and the fourth to multilateral cooperation for social and economic progress.

Implicit in this agreement is the engagement of the several countries to undertake steps to make the program workable. This may prove to be the crux of the matter. It does no good to plan on improved land use, for example, when land titles are not clear or even unavailable. In the same field of land use, the incidence of the tax burden may be determinant, and require adjustment in basic legislation.

Latin America's new-found willingness to undertake long-needed reforms and to bring about social changes stems from recognition of the same facts that prompted the United States to propose a social development program for Latin America. The first, the simple unvarnished fact is that, like it or not, change will come; that, if it does not come by planned orderly evolution, it will be imposed by violent revolution. The second is that, as they are now constituted, the governments of Latin America cannot, from their own resources, hope to promote evolution at a pace capable of satisfying the fast-mounting aspirations of their peoples.

At Bogotá other countries inquired anxiously whether the program was a one-shot affair. The chief U.S. delegate, Under Secretary of State Dillon, indicated that additional assistance would be forthcoming in the future. Therefore, passage by our Congress of appropriating legislation to enable the Act of Bogotá to get underway is awaited by the other countries of the hemisphere with a marked sense of urgency.

At Bogotá, decision was also made to have a separate entity, the new Inter-American Development Bank, administer as a trustee the major portion of the funds to become available. This unusual feature in international arrangements appears to have been signally fortunate. A regional organ that will administer funds along agreed lines should, by removing the United States and Latin American governments from the immediate scene of negotiations, reduce the frictions sure to arise recurrently over the question of whether a given country is doing its part. It must be evident that unless real, visible, and effective efforts are made by all, our Congress cannot be expected to continue making appropriations for the program. Also, achievement of the purposes of the Act of Bogotá program will, for some time, remain as urgent and essential as the day the act was adopted. The considerable history of cooperation by the hemisphere countries in the Organization of American States gives reason for optimism about the functioning of the new Bank. A regional international organization of its type was probably a prerequisite to acceptance and administration of the social program. Without the history of hemispheric cooperation, the Act of Bogotá probably would not have been adopted unanimously by those joining; that is, by all countries except Cuba and the Dominican Republic.

The free countries of the Americas thus enter the spring of 1961 armed with a brave new concept. The United States is sincere in its desire to make it work. Forward-looking statesmen in Latin America are almost desperately anxious for it to work, and to work quickly. The Inter-American Development Bank staff will do its polynational best. Doubts admittedly exist in some minds as to whether traditional inertia in several countries can be overcome by these new hopes and plans. Privileges have seldom been abandoned except under pressure of strong measures. Perhaps argument and persuasion will now succeed better than in the past because they will acquire cogency from consciousness of the forces now rampant in the world.

To return now to my hint to future analysts, to the "footnote to history," I would add a few comments about those responsible for this profound policy change. Even a brief exposure to Washington bureaucracy teaches that hardly ever is one man, and seldom are only few persons, responsible for a given event or chain of events. Therefore, I do not intend to oversimplify, and so mislead future historians. Many in the Foreign Service and the Department appreciated the urgency of problems of social development in most countries of Latin America and longed for a chance to move to resolve them. However, in the system as it has operated, their several judgments were not synthesized into positions or policy. For all intents and purposes, they remained mute. Credit, therefore, for taking the lead in stating the problems and for making the issues clear and public, belongs to the legislative branch. The Aiken and Morse reports were benchmarks. Wide appreciation is due the knowledge and understanding shown by Senator MANSFIELD. Respectful note should be taken of the concrete proposals of Senator SMATHERS. The list of credits due to Members of Congress does not, of course, close with these names.

There was, and is, one person to be especially singled out for this whole new departure in international relations; and he was not in the Government. Insights and appreciations gained from his first trip through South America in 1953 and subsequent travel into 1960 gave Dr. Milton Eisenhower the information which he talked over from time to time with his brother, the Chief Executive. This dramatic departure in diplomacy, economics, foreign aid policy, or whatever we may call it, that bears the imprint of President Eisenhower, was pointed out to him primarily by Dr. Eisenhower. It is now being based upon a deep consciousness of foreign affairs by the Congress. One paragraph of the statement made at Bogotá by the chairman of the Latin American Affairs Committee of the U.S. Senate, Senator WAYNE MORSE, should be repeated:

"Of all of these elements, as well as others which I shall not take the time to touch on, I think the one which loomed biggest in the congressional view was the emphasis upon self-help. This, in turn, was based upon the concept, for which history provides ample support, that the basic, the most important, factor in development is people who really want development and who want it badly enough not only to work for it but make their own substantial economic contributions as well as give up certain traditional customs in order to get it. Unless this basic urge is present, no amount of outside assistance will be effective."

---

[1] Report of Senator GEORGE D. AIKEN on a study mission, Feb. 2, 1960.

Report of Senator WAYNE MORSE on a study mission, Feb. 20, 1960.

STATEMENT BY EDWARD R. MURROW ON WORK OF THE U.S. INFORMATION AGENCY

Mr. SYMINGTON. Mr. President, last month, at the time his nomination as Director of the U.S. Information

Agency was submitted, Edward R. Murrow made a short statement.

Mr. Murrow set out his views on the role of the USIA in presenting the story of our country to peoples in other nations. He emphasized that truth and faith in freedom are our strongest weapons, and gave his appraisal of the tasks facing this country, referring to them as the "pivot upon which the history of our time will turn."

I commend this fine statement to the attention of Senators, and ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF EDWARD R. MURROW, NOMINEE TO BE DIRECTOR, U.S. INFORMATION AGENCY

Mr. MURROW. My name is Edward R. Murrow. I was christened Egbert but abandoned that name at the age of 16 while working in logging camps in western Washington.

Most of my adult life has been spent in the periphery of the academic world and in the field of radio and television. These activities have involved considerable travel, at home and abroad, and some acquaintance with statesmen, educators, and newsmen in many countries.

WORK OF USIA ABROAD

As a foreign correspondent, I am more familiar with the work of the U.S. Information Agency abroad than here in Washington.

At the conclusion of a trip around the world several months ago, I gave it as my opinion that the work of USIA abroad had improved very considerably under the direction of Ambassador George Allen, and am pleased to have the opportunity to repeat that opinion here.

ROLE OF USIA

If I am confirmed in the office to which the President has nominated me, I shall attempt to discharge the duties and responsibilities of that office to the best of my ability.

The Agency will attempt to make U.S. policy, as designed by the President, everywhere intelligent and, wherever possible, palatable.

We shall endeavor to reflect with fidelity to our allies, to the uncommitted nations, and to those who are hostile to us, not only our policy but our ideals.

We shall operate on the basis of truth. Being convinced that we are engaged in hot and implacable competition with Communist forces around the world, we will not be content to counter their lies and distortions. We shall constantly reiterate our faith in freedom.

To the emerging nations we shall say, "We share your dreams." There is a dynamism in freedom which permits and encourages progress without binding the individual to the wheel of the state. We shall try to make it clear that we as a Nation are not allergic to change and have no desire to sanctify the status quo. This Nation not only has a birth certificate, it holds the patent rights on change and revolution by consent.

EXAMPLE OF THIS NATION

The Agency will try to speak on behalf of all the American people with restraint and reason. All of us in the Agency recognise that in spite of electronic developments, the best form of communications is still face to face. To that end, any men and women we recruit and train must be able and eager to serve the cause of freedom which we regard as being indivisible.

The voice of this country should at all times be steady—firm but not bellicose—carrying the convictions that we will not flinch or falter in the face of threats or provocations.

In the end of the day it may well be that the example of this Nation will be more important than its dollars or its words. If we, in this generous and capacious land, can demonstrate increasing equality of opportunity, social justice, a reasoned concern for the education, health, and the equality under law of all our citizens, we will powerfully affect, and probably determine, the destiny of the free world and that freedom may be contagious, may incite those who have lost that most precious of all possessions to strive to do likewise.

CONTEST BETWEEN FORCES OF FREEDOM AND DICTATORSHIP

No man can set either a time or dollar limit upon this contest between the forces of freedom and those who would demean and brutalize mankind. The contest will be prolonged and it will cost much treasure. There is no guarantee that we will win it. If we should lose, it will be by default, and history will take its revenge. We cannot imitate the tactics or the techniques of the dictatorships that now ride the backs of most of this planet's people. We cannot threaten, we must persuade. Freedom cannot be imposed, it must be sought for, and frequently fought for.

We live in a world we didn't make. We are honored by an awesome responsibility of leadership we did not seek. We must defend and expand the leadership in company with our allies and other likeminded peoples because that is what our history and our heritage demand of us. We are the pivot upon which the history of our time will turn. Our task is formidable and difficult, but difficulty is one excuse history has never accepted.

We must, I think, approach the task with patience and fortitude and with an abiding belief that not only our own ancestors who bought our freedom for us but all those who have suffered and struggled and died in the pursuit of freedom throughout all time are watching to see whether we be worthy of our heritage.

If I am confirmed in the office to which the President has appointed me, I will, together with my colleagues in the Agency, attempt to be worthy of the trust.

THERE'S MORE TO SEE IN WASHINGTON, D.C.

Mr. MORSE. Mr. President, as a member of the Senate Committee on the District of Columbia, I ask unanimous consent to have printed in the RECORD an article written by Larston D. Farrar and published in Variety, 55th anniversary edition, entitled "There's More To See in Washington, D.C."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THERE'S MORE TO SEE IN WASHINGTON, D.C.

(By Larston D. Farrar)

WASHINGTON, D.C.—Washington, D.C., as contrasted to Washington, Va., or Washington, Pa., or Washington, Ohio, or wherever, is a strange town. For instance, it is the only town in the United States with my name in the telephone book, and, although there are thousands of writers in Washington, I am the only one listed as a "writer."

The others are listed as columnists, reporters, journalists, public relations men, administrative assistants, liaison officers, commentators, information specialists, communications counselors, or whatever. There's just one big difference between them and me—they eat steak. It's natural that they should take titles other than writers, in Washington. Here, a janitor is not a janitor but an assistant to the administrative director of maintenance operations.

Because I am listed as a writer, people are always asking me for advice about writing. I give them all the advice I know, in a few well-chosen words, and sum it up with one admonition: "If you persist in trying to make a living in this crazy game, remember my advice: Get out."

The Washington telephone book is quite revealing. It shows that Washington has terrific unused talent for both show business and the literary field. You can find Dora Schary's name there, and Gerry Wald's, and even Lilly Wilder's. Also, Louella Kilgallen, Frank Hemingway, and Joe Faulkner. I understand that Clark Gabriel is the most popular guy up around U Street, being pursued by all the gals. Real talent, that fellow. And if you want to see a well-built doll, just look up Janet Mansfield. Wow! Seriously, Thomas Wolfe is a reporter on the Post and they are going to put a plaque where John Charles Daly used to stand when he was a bus dispatcher for the old Capital Transit Co. Washington is a city filled with brains, although I admit it is difficult to find much wisdom there.

In Washington, you can hear politicians all talking about overall figures, but not a single one of them has a pair of overalls. In fact, my wife says that few of them have figures.

Washington is filled with insurance men who will sell you blanket coverage—if you will just sell your blankets and pay them cash.

DITTO IN DISTRICT OF COLUMBIA

In New York, a lot of rubes have purchased the Brooklyn Bridge—paid for it in cash, I understand. But in Washington, all the rubes have bought everything they see. Unfortunately, the tourists can no more move the various monuments and marbled buildings, which they "own," than can the people who purchased the Brooklyn Bridge. In fact, if a taxpayer even loiters around one of his own public buildings in Washington, past visiting hours, he's liable to be arrested by one of his own policemen. The White House, in which the peepul have some $20 million invested, is not even fully open to the public. The average man can see only a part of it by Executive order—the part the President seldom uses, or even sees. And every Executive gives the same orders, believe me.

ONLY IN WASHINGTON

Only in Washington, as Harry Golden would say, could you pick up a newspaper and see a headline like this: "Devoted father slays wife, three children." That's the way devoted fathers act these days in Washington, and maybe in other places in the country.

Or you pick up a newspaper on another day, in case you can read, and someone leaves it on the seat beside you. Another headline catches your eye: "Ideal bank teller arrested as thief." The story tells how this teller was voted the ideal bank employee for 3 years, and now, in the fourth year, was arrested for embezzling.

You don't blink your eyes—in Washington—at such things. It's perfectly normal for a devoted father to kill his wife and children, or for an ideal bank teller to be caught stealing. That's just the way things are.

You go into a bar—you must go into a bar, if you expect to retain your sanity, or to see any other people—and even before you take a drink, you hear a conversation like this:

"Are you a Secretary or an Under Secretary?"

"I'm the Secretary of my Division, but don't confuse me with the Under Secretary, who is over me. In our agency, there is an Under Secretary who has several Secretaries under him, and he has a Secretary. Each Secretary also has a battery of secretaries.

That's why I worked so hard to get this job of Secretary and why I'm angling for the post of Under Secretary."

It made sense to me, for I took a course in government in college.

In Washington, the winning candidate is the man who has stood up to be counted—on both sides.

It's not farfetched—to those who will stand off (without being standoffish) and view the Nation's Capital figuratively from a distance—to understand why I say that Washington is the most beautiful stage in existence today. For one thing, it undoubtedly is the most costly. A cool estimate is that the people have billions invested in Capitol Hill alone, and this does not include all the monuments and marbled buildings within just a few miles of the Capitol.

In Washington, everybody is trying to cut down the other fellow, while smiling at his opponent in public. Or, as Confucius say: "Cannibal who persists in decapitating victim only trying to get a head."

People in Washington have various goals. A lot of people who look like tourists line up to get into the Department of Justice every day. Others, who look like tourists, are trying to get away from the Department of Justice.

Many of both groups look like candidates for the 10 most unwanted persons in the country, and most of them, wanted or not, have a hard time getting a glimpse of J. Edgar You-Know-Whom. There's a sign at the Internal Revenue Service which offers "free guides." It turns out that they are special agents who will lead you on a tour that ends up in a special examination room, where, among other things, they get your fingerprints and demand to see a carbon of your 1960 income tax return. Or, if you don't like to fool around there, you can get directions as to how to go on a wild goose chase at the Fish and Wildlife Service. This is in the Department of the Interior, which, of course, superintends the exterior—the great outdoors.

Nothing is what it seems to be in Washington. The Senate Subcommittee on Internal Security is not the place to go to find out whether or not you have ulcers, believe me. And if you are looking for something different, why not visit the office of the South Dakota Congressman who advertises that his State is the land of infinite variety.

One man is trying to get off the FBI's 10 most wanted list. But another fellow I know is striving to become the most wanted by the FBI girls.

By all odds, Washington has the best paid stars and extras of any production company on earth. If the politicos drawing all this money weren't smiling—when the television cameramen focus in their direction—the people would have real cause to wonder. The Federal payroll now runs more than $1 billion a month.

There are more curious people—with curiosity, too—in Washington than anywhere else in the world. They come around asking me questions like this: "How do you get to be Washington editor for so many magazines?"

I tell of my first effort to become Washington editor for a business journal. I heard that the editor was looking for a man, and checking myself to be sure I was a man, I called the editor in Chicago (on the telephone, for I had laryngitis that week) and asked:

"May I be your Washington editor?"

"What are your qualifications?" he came back.

"I'm as crazy as anyone else I know here," I replied.

I was hired.

As recently as the other day, a New York editor called me on the telephone. He was in a Washington hotel, here to visit with his Washington editor.

"Why didn't you appoint me your Washington editor for your new magazine?" I asked. I'm always circumspect like that, beating around the bush, you know.

"Have you any money?" he answered me with a question.

"What's that?" I shot back.

When he explained about money, I said: "Oh, yes; I understand now. No, right at this moment, I don't have any. But my wife has money. The only trouble is that by the time she gets back from the grocery store, neither of us will have any."

"Just as I thought," he said. "The man I appointed to be my Washington editor also had to be an investor in this new magazine. Naturally, if a man has a million-dollar trust fund, he makes a wonderful Washington editor."

"Of course," I replied, urbanely, but my heart was beating fast. This low-living heel had the nerve to mention literary material, great writing, and all that, in the same breath as he talked about money. How crass can things get? Next thing you know, diskjockeys will be taking payola and Congressmen will be putting kinfolks on their payroll. Mercy, mercy. The avarice of bounds may know no man.

ODD JOBS GALORE

All my life, I have heard people talk about the odd jobs in Hollywood. But there are more odd jobs in Washington than in any other city on earth. For example, there's a man in charge of keeping Japanese beetles off airplanes. He has been getting publicity, but has little hope that the beetles will read it. He is trying to get members of the public to recognize a Japanese beetle when they see one. But there are so many problems. Most people think that any beetle is a Japanese beetle. You would think by now that people would look at the eyes and, if they weren't slanted, they would know that the beetle was a good old beetle of the type that doesn't do too much harm. But no; they persist in reporting every beetle as a Japanese beetle. It just proves again that people are so very unobservant.

One of the oldest ways of getting a job—in Washington—is to apply to be a radio or TV news commentator. They are not interested in what you know, if anything. They want to know three things—(1) how good looking you are; (2) how deep your voice is, and (3) whether or not you can pronounce words correctly. For—alas!—a news commentator no more has to know news, or history, or government, than a quiz show winner had to know the answers, spontaneously.

Yes, even after I have told you this little bit, you can take it from me that there's more to see in Washington, D.C., and I'm not talking about me.

CONCLUSION OF MORNING BUSINESS—ENFORCEMENT OF 3-MINUTE LIMITATION

Mr. MANSFIELD. Mr. President, is morning business concluded?

The PRESIDING OFFICER. Is there further morning business? If not, morning business is concluded.

Mr. MANSFIELD. Mr. President, before I ask the Chair to lay before the Senate a bill for consideration, I wish to say that the extension under the 3-minute rule, during the morning hour which has just been concluded, is not to be taken as a precedent. It is the exception which proves the rule.

The PRESIDING OFFICER. The Presiding Officer clearly understands that there were extenuating circumstances.

PROJECT HOPE

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 122, Senate Concurrent Resolution 8.

The PRESIDING OFFICER. The concurrent resolution will be stated by title.

The LEGISLATIVE CLERK. A concurrent resolution (S. Con. Res. 8) expressing the sense of Congress on Project Hope.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the concurrent resolution, which had been reported from the Committee on Foreign Relations with an amendment to the preamble, so as to make the concurrent resolution read:

Whereas the need for ever-increasing peaceful, humanitarian cooperation between the people of the United States and the peoples of other nations of the world is apparent; and

Whereas under the authorization of the President of the United States the United States Navy has furnished a mothballed hospital ship to the People-to-People Health Foundation, Incorporated, under private charter; and

Whereas the People-to-People Health Foundation, Incorporated, has engaged and staffed and equipped the hospital ship *Consolation*—now known as the steamship *Hope I*—as a floating medical training-teaching center currently serving in southeast Asia; and

Whereas the chief purpose of this undertaking, called Project Hope, is to bring to the medical professions of these developing nations the latest skills and techniques developed by the American medical and dental professions; and

Whereas the medical ship is staffed with medical personnel selected from among the top men and women of our medical, dental, and health professions; and

Whereas the $3,500,000 needed to staff and operate this hospital ship for a year is being raised from private sources throughout the country; and

Whereas Project Hope has received the enthusiastic support of Government, industry, business, labor, the medical, pharmaceutical, and dental professions and private citizens throughout the country: Therefore be it

Resolved by the Senate (the House of Representatives concurring), That Project Hope be commended as another step forward in increasing good will throughout the world and in bringing the peoples of all nations together in a bond of mutual trust, friendship, and cooperation.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a portion of the report which came from the Committee on Foreign Relations on Senate Concurrent Resolution 8.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

Senate Concurrent Resolution 8 was introduced by Senator HUMPHREY on January 23, 1961. A series of "whereas" clauses describes in general terms the steps taken by the U.S. Government and various private groups to equip a hospital ship to serve as a floating medical training-teaching center for the purpose of bringing the latest medical skills to developing nations.

The operating portion of the resolution simply commends this project—Project

Hope—as another step toward increased good will throughout the world and bringing the peoples of all nations together in a bond of mutual trust, friendship, and cooperation.

The Department of State, in response to a request by the chairman of the Committee on Foreign Relations, on March 8 welcomed and supported the proposed congressional commendation of Project Hope. The letter from the Department of State is as follows:

DEPARTMENT OF STATE,
Washington, D.C., March 8, 1961.

DEAR SENATOR FULBRIGHT: In your letter of January 24, you asked for the Department's comments on Senate Concurrent Resolution 8, introduced on January 23 by Senator HUMPHREY, expressing the sense of Congress on Project Hope.

The Department welcomes and supports this proposed congressional commendation of this project. Dr. William Walsh and his associates in the People-to-People Health Foundation, Inc., deserve such commendation for their successful work in this worthwhile cause. The nationwide fund-raising campaign on behalf of Project Hope, and the generous response of thousands of our fellow citizens, reflect the best traditions of American life—and contribute significantly to this Nation's efforts to enhance and expand people-to-people contacts between our country and the less-developed countries of the free world.

As you are aware, the U.S. Government in cooperation with the Project Hope sponsors, has provided substantial assistance to the project. The U.S. Navy hospital ship *Consolation* was made available to the foundation, and the ship was "demothballed" and prepared for sea duty at U.S. Government expense. The sum of $2.7 million has been provided from mutual security program funds to place the ship in operating condition, and an additional $500,000 of mutual security program funds was recently provided as an interest-free loan.

The Department has been impressed by the cordial reception accorded in Indonesia to *Hope I* and its fine medical and dental staff. We fully expect that the response in future ports of call will be equally favorable. We trust that these accomplishments and the efforts of the project sponsors will continue to elicit the required financial support of America's people.

In the light of the fine record of Project Hope to date, the Department fully endorses the views regarding the project set forth in Senate Concurrent Resolution 8.

The Bureau of the Budget advises that from the standpoint of the administration's program there is no objection to the presentation of this report for the consideration of the committee.

Yours truly,

BROOKS HAYS,
Assistant Secretary,
(For the Secretary of State.)

The PRESIDING OFFICER. The question is on agreeing to the concurrent resolution.

The concurrent resolution was agreed to.

Mr. MANSFIELD. Mr. President, there is an amendment to the preamble.

The PRESIDING OFFICER. The question is on agreeing to the amendment to the preamble.

The amendment to the preamble was agreed to.

The preamble, as amended, was agreed to.

Mr. MANSFIELD. Mr. President, before I turn to the next order of business, I wish to say that the present Presiding Officer, the distinguished Democratic whip, the senior Senator from Minnesota [Mr. HUMPHREY], is to be commended for the part he personally played in pushing the resolution and seeing that it was adopted on the floor of the Senate this afternoon.

COCOPAH INDIANS IN ARIZONA

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 123, Senate bill 54.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 54) to grant 81 acres of public domain to the Cocopah Indians in Arizona.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to insert at this point in the RECORD a portion of the report on Senate bill 54 from the Committee on Interior and Insular Affairs.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The purpose of S. 54, introduced by Senator GOLDWATER, is to place in trust 81 acres of land in Arizona for the Cocopah Indians.

The Cocopah Tribe occupies land on the east side of the Colorado River, near the Yuma reclamation project, that was set aside for them by Executive order in 1917. During the intervening years they have lived upon the land to be set aside by S. 54 in the belief it was included within the original reservation. A recent opinion of the Solicitor, Department of the Interior, concludes that said lands were not part of the reservation.

Since the Cocopahs have used the land, are living on it at the present time, and no claim has been filed on any of the lands, the committee believes the 81 acres should be made a part of the existing reservation.

Legislation identical with S. 54 passed the Senate on March 28, 1960.

The favorable reports of the Department of the Interior and Bureau of the Budget on S. 54 follow:

EXECUTIVE OFFICE OF THE PRESIDENT,
BUREAU OF THE BUDGET,
Washington, D.C., March 20, 1961.

Hon. CLINTON P. ANDERSON,
Chairman, Committee on Interior and Insular Affairs, U.S. Senate, Washington, D.C.

MY DEAR MR. CHAIRMAN: This is in response to your request for the views of the Bureau of the Budget on S. 54, a bill to grant 81 acres of public domain to the Cocopah Indians in Arizona.

The purpose of the bill is to donate in trust to the Cocopah Indians 81 acres of public domain which have been occupied by the Cocopah Tribe since 1917 and which was thought until recently to be a part of the reservation.

There is no objection to the enactment of S. 54 from the standpoint of the administration's program.

Sincerely yours,

PHILLIP S. HUGHES,
Assistant Director for Legislative Reference.

On March 3, 1961, the Secretary of the Interior wrote the chairman of the committee in part as follows:

"This will supplement our letter of February 14, 1961, regarding a review of the legislative materials that were submitted to Congress by this Department before January 20, 1961.

"We have completed our review, and we concur in the comments and recommendations made by the prior administration with respect to the following proposed bills and introduced bills:

"INDIANS

* * * * *

"11. Report on S. 54, a bill 'To grant 81 acres of public domain to the Cocopah Indians in Arizona.'

"The Bureau of the Budget has advised us that there is no objection to the presentation of this report from the standpoint of the administration's program.

Sincerely yours,

STEWART L. UDALL,
Secretary of the Interior.

The PRESIDING OFFICER. The bill is open to amendment. If there be no amendment to be offered, the question is on the engrossment and third reading of the bill.

The bill (S. 54) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That all of the right, title, and interest in the following described public domain are hereby declared to be held by the United States in trust for the Cocopah Indians in Arizona, subject to any valid existing rights heretofore initiated under the public land laws: lots 14 and 15, section 30, township 9 south, range 24 west; and lots 3, 4, and 5, section 25, township 9 south, range 25 west, Gila and Salt River meridian, Arizona, containing 81.64 acres.

PAYMENT OF PER DIEM TO MEMBERS OF THE INDIAN ARTS AND CRAFTS BOARD

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 124, Senate bill 1297.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 1297) to authorize the payment of per diem to members of the Indian Arts and Crafts Board at the same rate that is authorized for other persons serving the Federal Government without compensation.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed at this point in the RECORD a portion of the report on Senate bill 1297 from the Committee on Interior and Insular Affairs.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The Committee on Interior and Insular Affairs, to whom was referred the bill (S. 1297) to authorize the payment of per diem to members of the Indian Arts and Crafts Board at the same rate that is authorized for other persons serving the Federal Government without compensation, having considered the same, report favorably thereon without amendment and recommend that the bill do pass.

PURPOSE

The purpose of S. 1297, introduced by Senator CHURCH as the result of an executive communication from the Secretary of the Interior, is to authorize the members of the Indian Arts and Crafts Board to receive per diem payments at the same rate that is paid to other persons serving the Federal Government without regular compensation.

Presently the five members of the Arts and Crafts Board may receive only $10 per diem under the Interior Department Appropriation Act of 1940. Since 1940 the per diem of other Government employees has been adjusted to meet rising costs, and is now $12 for regularly employed persons and $15 for persons serving without compensation. Enactment of S. 1297 will provide the same per diem rate to the members of the Board as applies to others serving without compensation.

The legislation was requested by the Department of the Interior.

The PRESIDING OFFICER. The bill is open to amendment.

If there be no amendment to be offered, the question is on the engrossment and third reading of the bill.

The bill (S. 1297) was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1 of the Act of August 27, 1935 (49 Stat. 891), is amended by changing the proviso in the last sentence to read as follows: *"Provided,* That each Commissioner shall be paid per diem in lieu of subsistence and other expenses at a rate that does not exceed the rate authorized by the Act of August 2, 1946 (60 Stat. 808), as heretofore or hereafter amended (5 U.S.C. 73b–2), to be paid to persons serving without compensation."

SEC. 2. The limitation on the payment of per diem in lieu of subsistence to members of the Indian Arts and Crafts Board that is contained in the Interior Department Appropriation Act, 1940 (53 Stat. 685, 699), is repealed.

REVOCATION OF SCHOOL AND AGENCY FARM RESERVE ON THE LAC DU FLAMBEAU RESERVATION

Mr. MANSFIELD. Mr. President, I move that the Senate proceed to the consideration of Calendar No. 125, Senate bill 1298.

The PRESIDING OFFICER. The bill will be stated by title.

The LEGISLATIVE CLERK. A bill (S. 1298) to permit the Secretary of the Interior to revoke in whole and part the school and agency farm reserve on the Lac du Flambeau Reservation.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Montana.

The motion was agreed to; and the Senate proceeded to consider the bill.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that a portion of the report on Senate bill 1298 from the Committee on Interior and Insular Affairs be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

The purpose of S. 1298, introduced by Senator CHURCH as the result of an executive communication from the Secretary of the Interior, is to permit the Secretary to revoke in part or in entirety the school and agency farm reserve on the Lac du Flambeau Reservation in Wisconsin.

This legislation is necessary because the act of May 19, 1924 (43 Stat. 132), reserved approximately 700 acres of land in certain designated sections of the Lac du Flambeau Reservation for a school and agency farm.

Portions of this reserve have already been conveyed by act of Congress to the diocese of Superior for church purposes and to the town of Flambeau for cemetery purposes. While the Bureau of Indian Affairs still needs for administrative purposes about 15 acres of the remainder, the balance is no longer needed and can, under the bill, be restored to its prior status of tribal land. It will then be subject to regulations that are applicable to such land. The bill is so drawn that if the 15 acres, or any part of them, become surplus, they can also be removed from reserve status.

The committee understands there are no Government-owned improvements on that portion of the reserve which is currently excess to the needs of the Bureau of Indian Affairs.

DEPARTMENTAL REPORT

The communication from the Department of the Interior, dated January 5, 1961, requesting enactment of this legislation follows:

U.S. DEPARTMENT OF THE INTERIOR,
OFFICE OF THE SECRETARY,
Washington, D.C., January 5, 1961.

Hon. RICHARD M. NIXON,
President of the Senate, Washington, D.C.

DEAR MR. PRESIDENT: Enclosed herewith is a draft of a proposed bill, to permit the Secretary of the Interior to revoke in whole or in part the school and agency farm reserve on the Lac du Flambeau Reservation.

We recommend that the proposed bill be referred to the appropriate committee for consideration, and we recommend that it be enacted.

Section 3 of the act of May 19, 1924 (43 Stat. 132), reserves from allotment or other disposition, "for the school and agency farm," the unappropriated land in designated sections of the Lac du Flambeau Reservation.

A part of this school and agency farm reserve has been conveyed to the diocese of Superior for church purposes pursuant to the act of May 9, 1958 (72 Stat. 106). Another part of the reserve has been conveyed to the town of Flambeau for cemetery purposes pursuant to the same act. Both conveyances provided for a reversion to the United States in trust for the band when the land is no longer used for the specified purposes.

The Bureau of Indian Affairs presently needs for administrative purposes three tracts with a total acreage of 15.22 acres. The balance of the reserve is no longer needed for administrative purposes, but the unneeded portion cannot be removed from the reserve by administrative action because the reserve was established by statute.

The enactment of the enclosed draft of a bill will permit the Secretary of the Interior to revoke the reserve with respect to the lands that are no longer needed for administrative purposes. The lands will revert to their prior status of tribal land and be subject to the usual laws and regulations that are applicable to other tribal lands.

Under the act of August 6, 1956 (70 Stat. 1057), the Secretary of the Interior is authorized to convey to the band any improvements on the reserved land of the band that are no longer needed by the Secretary for the administration of Indian affairs.

If the proposed legislation is enacted, the Department plans to revoke the part of the reserve that is no longer needed for administrative purposes. The band is now leasing to the Simpson Electric Co. a portion of this land together with the buildings located thereon. That company has an on-the-job training contract with the Department, and since 1957 a total of 60 Indians have entered training there. Of that total, 39 have completed training, 11 are still in training, and 10 have discontinued training.

The Lac du Flambeau Band consists of about 1,105 persons and the reservation contains about 18,272 acres of allotted land in a trust status and 25,420 acres of tribal land. The Bureau of Indian Affairs maintains no agency there but does keep there a few employees for local forestry administration.

The Bureau of the Budget on December 30, 1950, advised us that there is no objection to the submission of this proposed legislation.

Sincerely yours,

GEORGE W. ABBOTT,
Assistant Secretary of the Interior.

On March 3, 1961, the Secretary of the Interior wrote the chairman of the committee as follows:

"DEAR SENATOR ANDERSON: This will supplement our letter of February 14, 1961, regarding a review of the legislative materials that were submitted to Congress by this Department before January 20, 1961.

"We have completed our review, and we concur in the comments and recommendations made by the prior administration with respect to the following proposed bills and introduced bills:

"INDIANS

* * * * *

"5. Proposed bill, to permit the Secretary of the Interior to revoke in whole or in part the school and agency farm reserve on the Lac du Flambeau Reservation.

* * * * *

"The Bureau of the Budget has advised us that there is no objection to the presentation of this report from the standpoint of the administration's program.

"Sincerely yours,

"STEWART L. UDALL,
"Secretary of the Interior."

Mr. MANSFIELD. Mr. President, before this measure is passed, may I say that S. 54, S. 1297, and S. 1298 have the approval of both the preceding Republican administration and the present Democratic administration. All these bills have been cleared by the minority, and they approve taking them up at this time.

The PRESIDING OFFICER. The question is on the engrossment and third reading of S. 1298.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3 of the Act of May 19, 1924 (43 Stat. 132), is amended by adding at the end thereof the following: "The reserve established by this section for school and agency farm purposes may be revoked in whole or in part by the Secretary of the Interior when the land is no longer needed for such purposes, and the lands so removed from reserved status shall be subject to the laws and regulations applicable to other lands of the band."

JOHN BIRCH SOCIETY: FASCIST GROUP

Mr. YOUNG of Ohio. Mr. President, I commend three of my distinguished colleagues for bringing to the attention of the Senate, and the public, ugly facts concerning the fake patriots controlling the John Birch Society.

In my opinion, the senior Senator from North Dakota [Mr. YOUNG], the senior Senator from California [Mr. KUCHEL], and the junior Senator from Connecticut [Mr. DODD] have performed an important public service by exposing the true character of the society.

I join them in their contempt for leaders of this vicious organization.

I assert the John Birch Society is a Fascist group. It is well larded with rightwing crackpots. It is an ideological abomination, and the self-appointed vigilantes who are its leaders deserve the disdain and scorn of every American who values his democratic heritage.

Unfortunately, these radicals of the right in the so-called Birch Society in many communities have been practicing character assassination without regard for the truth, threatening merchants with boycotts, threatening college professors and school principals with dismissal. They spread fear, hatred and suspicion. They are even proposing infiltration in such fine, worthwhile civic organizations as the Parent-Teachers' Association.

The little Hitler who commands the John Birch Society already has written his own version of "Mein Kampf." From all reports, it is a psychotic collection of hate, slander and demagoguery.

This "fuehrer," Robert H. Welch, Jr., of Massachusetts, flatly states, "Democracy is a perennial fraud."

He has impugned many of our most respected leaders, among them our great Chief Justice of the United States Earl Warren, who has been accused by Welch of not supporting the Constitution—of giving aid and comfort to enemies of the American way of life. Welch has demanded his impeachment. A leader of the society even suggested that the Kremlin should award the Order of Lenin to Chief Justice Warren for serving the cause of communism. Followers who have been duped by this demagog, Welch, have written their Senators urging impeachment of the Chief Justice.

That anyone should propose impeachment of this great American or imply in any way that he is disloyal, is ridiculous and outrageous.

Yet, I have received mail—clearly inspired by the John Birch Society—demanding that we Senators institute impeachment proceedings against Chief Justice Warren.

One letter warned:

> You will never get another vote of mine or anyone I know if you approve of Earl Warren's record.

Frankly, I would never want that crackpot's vote. Another charged Earl Warren is guilty of treason, and still another urged immediate impeachment "before he has the opportunity to sell us all out."

Mr. President, I am ashamed to read letters like this from fellow Americans. I am ashamed because these people, who unfortunately have been deceived by unscrupulous leaders, would destroy our rich heritage under the guise of protecting it.

An answer typical of those I am making to constituents demanding the impeachment of Chief Justice Earl Warren is:

> Some crackpot has given you false information or you are the recipient of utterly false information from some organization guilty of distributing false propaganda for mercenary motives.
>
> That anyone should propose impeachment of Chief Justice of the United States Earl Warren is ridiculous and outrageous.
>
> Some years ago Earl Warren was a candidate for the Republican presidential nomination and that party's nominee for Vice President of the United States. During recent years the Supreme Court of the United States, over which he presides, has won universal acclaim by its integration and other decisions.
>
> It is unfortunate you read such trash regarding an outstanding American and that you have been deceived.

Using the convenient cover of patriotism, members of the John Birch Society would crucify democracy itself, and crush the precious rights and liberties we cherish.

I assert, Mr. President, that smashing democracy is an illogical way to fight internal communism, and I charge that the leaders of the John Birch Society are dangerously Fascist-minded or viciously demogogic or stupid, in presenting their program as one designed to save America. There is more to being an American than simply denouncing so-called Communists in America. The Communist Party in this country is such a minute splinter group, it numbers fewer than 1,000—probably less than 500—in Ohio.

In my judgment, the Fascist John Birch Society, and others like it, are as serious a threat to our security and way of life as internal communism.

We live in a grim period of international anarchy. This Nation is in a war economy. Communist Russia and Red China threaten the peace of the world. It is amazing to me that in the face of the grave Communist menace from overseas, some of our good citizens shrug that off and imagine they see Communists under beds here in our country. Their hullabaloo about a Communist apparatus in Washington or Cleveland or San Francisco or Chicago, seeking to overthrow our Government by force and violence, reminds me of the couplet:

> Last night I saw upon the stair
> A little man who wasn't there.
> He wasn't there again today;
> Oh, how I wish he'd go away.

Many Americans have always been reluctant to admit the existence of a disturbingly large group of Fascist-minded people in our own country. We regard as grotesque the Know Nothing political movement of a century ago.

As the Presiding Officer [Mr. HUMPHREY], who is a student of history, will recall, the leaders of the Know Nothing movement in the United States opposed immigration and immigrants, particularly Irish immigrants, and even claimed that the Pope was coming here to America to establish a Vatican somewhere along the Mississippi. Political agitators of 1854, who had not been nominated by either of the leading political parties, were elected to high office. This Know Nothing movement elected members of Congress and influenced others. It had as its presidential candidate in 1856 a former President of the United States, Millard Fillmore.

Then, in the 1930's in the form of the Nazi bund and the lunatic fringe who clustered around Gerald L. K. Smith and other American Fascists, there was a resurgence of this un-American activity.

Now here we are again, and today's spokesmen of fascism in America are leaders of the John Birch Society.

They are the know-nothings of the 20th century, prophets of hatred who spread lies and foment suspicion and who would undermine the very foundations of our democracy.

Mr. President, there may be a tendency among many Americans to scoff at this Fascist group and to view it as a temporary phenomenon. This might be foolish—in fact, dangerous—for the John Birch Society is well-financed and should not be ignored.

The "fuehrer," Robert H. Welch, is a millionaire and apparently he is adding to his personal wealth by the promotion of the John Birch Society.

The society numbers in its leadership ranks many industrialists, retired high military officers, and former presidents and board members of the National Association of Manufacturers.

Robert H. Welch, head of the John Birch Society, failed when he sought to be the Republican nominee for Lieutenant Governor of Massachusetts in 1950. He is succeeding handsomely in selling life memberships in his society for $1,000 each and raking in thousands of dollars every month in members' dues—$24 a year for men and $12 a year for women. Very specifically, he stated that he, as leader, would not give an accounting to the members or to anyone else.

They believe that by identifying themselves as "anti-Communists" they can expand their membership.

Mr. President, I wish to point out that the Director of the Federal Bureau of Investigation, J. Edgar Hoover, only last week warned against vigilante action in the fight against communism. He said:

> The job of curtailing and containing communism is one for legally constituted authorities with the steadfast cooperation of every loyal citizen.

Without a doubt, it is legal for a man to be a Fascist—if he wishes to be that stupid—and to express opinions no matter how distorted, fantastic, and extreme they may be. Robert Welch, who founded this John Birch Society and conceived the idea of having small cells in various places, made the demagogic and false utterance that General Eisenhower at the time he was President of the United States was a dedicated, conscious agent of the Communist conspiracy.

Think of that, Mr. President.

The most amazing thing is that an educated man would say this and it is equally fantastic that there are some deluded followers who believe it. Nevertheless, we concede that any mercenary demagog has a right to express his opinions though distorted, unfounded, and false.

Mr. President, I am less concerned about the existence of possibly 500 or

1,000 Communists in my own State of Ohio—and certainly no more than 30,000 in the United States—than I am about the ugy boil of fascism which leaders of the John Birch Society represent.

In my State of Ohio, it is estimated that there are fewer than 1,000 Communists—more nearly 500. In the Nation, Communists at the most form one-twentieth of 1 percent of our entire population, according to Professor Chaffee, in the Bulletin of the American Association of University Professors.

The bulletin was issued some years ago. In this era of prosperity and hope, there are no doubt fewer.

The odds are 1,999 to 1 in favor of free institutions. Suppose at the Cleveland Indian opening game later this month the Cleveland Municipal Stadium is filled with 40,000 people. The chances are that 20 of them might be Communists, and 39,980 would not. Do we need the John Birch Society to help protect us, who outnumber them 2,000 to 1—who have also the Cleveland and State police, the FBI, the Army, the Air Force, and the Navy, never forgetting the Marines?

We can hope, Mr. President, that as more becomes known of this shadowy band, its activities and philosophy will have the exact opposite effect than that for which its leaders strive. Indeed, I predict that in time these Fascists will discredit themselves and the cause they stand for and in that way make a contribution to the principles of democracy which they oppose.

In a minority opinion by Justice Hugo Black, concurred in by Chief Justice Warren, is this important sentence which we should all remember:

> Liberty, to be secure for any, must be secure for all—even the most miserable merchants of hatred and unpopular ideas.

Robert H. W. Welch and other Fascist-minded leaders of the John Birch Society are seeking to rescind and repeal the 20th century.

Their Mussolini—their chief promoter—il duce or fueher, Robert H. W. Welch, is a fake patriot—a slick demagog proposing dangerous nonsense. His society, like the Know Nothing party of 105 years ago, may live a little while and then be gone with the wind, and, like the Know Nothing party, will pass away unwept, unhonored, and unsung. At the moment it is an irritation in our American way of life.

As busy as we are in the Senate and as busy as are Members of the other body, I know of no valid reason for any congressional investigation of this Fascist group.

THE B–70 PROGRAM

Mr. GOLDWATER. Mr. President, mistaken judgment is a costly exercise when it applies to our defensive or offensive posture. For example, when the decision was made in Casa Blanca in World War II that we would fight to an unconditional surrender, we set up a situation that prolonged that costly war. When Hitler, in the early part of that same war, decided to slow down the production of fighter planes and concentrate on bombers, so that he could have the satisfaction of personal vengeance on England, he undoubtedly created a situation that proved to be one of the major reasons for Germany's defeat.

I do not question the sincerity or the patriotism of those who advise that the B–70 program be cut back, but this decision has been made, and I am hopeful, that the President, in his judgment, will restore these cuts and failing in that, I suggest that it would be the responsibility of the Congress to see that this action is taken.

This weapon contains all of the advantages of the Polaris submarine, plus speed, maneuverability, and, as of now, and of the date of its completion, no known enemy capability to shoot it down. Wars are going to be fought by men—not by black boxes—so it is imperative that America have this most modern of all weapons, and have it completed and quickly.

Our President has indicated a desire that is shared by all, I am sure, that we develop a transport aircraft in this country capable of speed above the sonic barrier. As of today, we have nothing in the factories, and nothing on the drawing boards, for a transport that will travel at speeds exceeding Mach 1.

I suggest that if the President wishes this kind of transport, instead of allocating, as I understand, $10 million for research on such project, that he push the B–70 program, because we have the air frame, and the aeronautical breakthrough that will give us Mach 3 flight, or three times the speed of sound, which can be applied not only to this aircraft as a weapon, but in peaceful uses for a transport. I hope that a decision, by either the President himself, or by this body, will be made quickly to restore these cuts, because in the judgment of this particular Senator, this cutback is a very costly mistake to be made at this time when we cannot afford to make mistakes in the cold war, or in any hot war that we have coming.

RECOGNITION OF APRIL 15 OF EACH YEAR AS AFRICA FREEDOM DAY

Mr. HUMPHREY. Mr. President, I send to the desk a resolution and ask that it be appropriately referred.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The resolution will be received and appropriately referred.

The resolution (S. Res. 118) favoring the recognition of April 15 of each year as Africa Freedom Day, submitted by Mr. HUMPHREY, was referred to the Committee on the Judiciary, as follows:

> Whereas the emergence of Africa into the forum of world affairs is one of the most significant developments of this period of history; and
>
> Whereas on the African Continent new and independent countries are being born with great rapidity; and
>
> Whereas at the first Conference of African Independent States convened in Ghana in April of 1958, the then eight free nations of the continent called for the observation on April 15 of Africa Freedom Day until all Africa is free; and
>
> Whereas this call to the world was reiterated by the All African People's Conference held in Ghana in December 1958; and
>
> Whereas the peoples of Africa are sympathetic to the ideals of democracy espoused by the free world, and look for friendship and assistance from the United States; and
>
> Whereas our American tradition of freedom and independence makes us sympathetic to the desire of all people for self-determination: Now, therefore, be it
>
> *Resolved*, That it is the sense of the Senate that April 15 of each year should be recognized as Africa Freedom Day; and that we urge the President on that date each year to send a special message of good will to the independent countries of Africa.

Mr. HUMPHREY. Mr. President, the resolution relates to African Freedom Day. Perhaps the most remarkable event in the political history of the last decade and a half, particularly in the last 5 years, has been the increasingly rapid transformation of a majority of Europe's African dependencies into new independent states.

In fact, today the Vice President of the United States is the official representative of this Government at the independence celebration of the new African nation and State of Senegal. Vice President JOHNSON represents our Nation at this very important event and occasion. I know that he will do so with distinction, great honor, and credit both to himself and to our country.

The division of Africa among foreign powers that began with European mercantile expansion in the 16th century and reached its zenith in the period between the unification of Germany and the Second World War has now come to the end. Indeed, by the beginning of this year the areas still under European control had diminished until they represented less than half of Africa in number and population.

Since World War II Morocco, Tunisia, Guinea, the Cameroun Republic, Togo, the Central African Republic, Chad, the Republic of Congo—Brazzaville—Dahomey, Gabon, the Ivory Coast, Malagasy, Mali, Niger, Senegal, and Upper Volta have all gained their independence from France. During this same period, Britain relinquished its colonial rule in Ghana—including the British Togo Trust Territory—Nigeria, and the Sudan, which it had administered under a condominium with Egypt; in addition, Sierra Leone, will become an independent member of the Commonwealth on the 27th of this month, April; the British North and South Cameroons Trust Territories have just completed a referendum on their future as parts of other independent countries, and independence for the British Trust Territory of Tanganyika is scheduled for December 28 of this year. Libya and Somalia, former Italian colonies, have also gained their independence after limited periods of U.N. trusteeship, and the former British colony of Somaliland has been united with Somalia. Lastly, Belgium acceded to the demand for independence for its Congo colony last summer although unfortunately the events which followed in the wake of independence have created difficulties which have yet to be resolved.

I would add that I am confident of their resolution, however. There appears to be an improvement in the situation in the Congo, primarily due, may

I say, to the close cooperation of the freedom-loving nations in the United Nations, with particular reference to the cooperation between the United States and India. I believe that these two countries have done a great deal to restore a degree of order, and the possibility of a firm resolution of the problems that beset the economy.

By 1958 it became evident to the first few independent African countries that their continent soon would be freed from foreign control. To support independence movements in territories still subject to the European powers and to develop common policies on many issues, the then free states, Egypt, Ethiopia, Ghana, Liberia, Libya, Morocco, the Sudan, and Tunisia, convened a Conference of Independent African States in Accra, Ghana, in April of that year. The Conference designated April 15 of every year as African Freedom Day until the entire continent should be free. Later in the same year the All-African People's Conference, which brought together representatives of African political parties, unions, and sympathizers from all territories, enthusiastically supported the concept of Africa Freedom Day.

In response to the aspirations of members of both Conferences, as well as the U.S. historical support of freedom and democracy throughout the world, I introduced a resolution in the 1st session of the 86th Congress, resolving that it was the sense of the Senate that "April 15 of each year be recognized as Africa Freedom Day" and that "the President on that date each year send a special message of good will to the independent countries of Africa."

The events of the last 2 years, since this resolution was first introduced, have, indeed, been amazing. More than twice the number of independent states that first called for an Africa Freedom Day have appeared in this period. Recently the United States has demonstrated by its votes in the United Nations and by the statements of its officials that it will effectively back anticolonialism despite any hurt feelings of its allies. Under these circumstances, it seems particularly appropriate that the U.S. Senate should support a resolution marking the celebration of Africa Freedom Day.

I believe one of the great days in American foreign policy came in the recent session of the United Nations, when our Government broke with the past and joined with those who seek the freedom of every single colony; and in the instance of the vote on Angola, difficult as that vote was in the light of our close relationship with Portugal as an ally in NATO, when the representative of the United States in the Security Council and in the United Nations, Mr. Adlai Stevenson, cast the vote of this country to permit the United Nations to examine into the situation in Angola. I believe this was the turning point in American foreign policy relating to the African, Asian, and Latin American areas, proving, once again, that we mean everything we have said in behalf of self-determination, freedom, and independence. This was a very difficult decision in the light of our allies and our commitments to them, but it was the right decision. In matters of American foreign policy, it appears to me that virtue, right, and moral position were very important.

The significance of the original designation of African Freedom Day by the first Conference of African Independent States in 1958 is still alive today. Though most of the vast continent of Africa is free, there still are sizable areas which are not free and which have no immediate prospects for independence.

Because these areas still exist, particularly where the colonial rulers do not yet feel the winds of change or are preparing to struggle against them, the liberty of all of us is a little less secure—our stature somewhat diminished—our dignity somewhat tarnished. It is in the best interests of the United States, both politically and morally, to support the independence of the peoples of Africa. And we can make no better, more symbolic, start than to pass this resolution which I offer again today calling for our recognition of April 15 of each year as Africa Freedom Day.

I know that frequently we are told by those who claim to be very prudent, wise, and sagacious that those resolutions are but window dressing and do very little, if any, good. In fact, there are always those who exercise the prerogatives of caution—and I think sometimes of being very overcautious—in the development of what we call foreign policy. I suggest that the best thing for this country to do is to interpret its spirit to the world in tangible evidence such as resolutions and in concurring in what we know to be the desire of the American people; namely, freedom for people. The duty of representative government is to represent the true will of the people, not the will of merely a handful who feel that they are interpreting the will of the people. There is not a single residue of colonialism in the United States. There is no interest on the part of the American people in it. In fact, the American people find colonialism to be repugnant.

I suggest that the best thing our Government can do is what it is now doing; namely, to take the timely steps which are required to place this Government on record in support of freedom, independence, and self-determination. This is exactly what we mean by protecting human dignity.

I compliment the President of the United States, the Secretary of State, and Mr. Stevenson, our representative in the United Nations, for the courageous and timely action which has been taken in recent weeks in the United Nations and in reference to the official statement of our Government.

It is indeed highly significant that the Vice President of the United States should be on this day visiting Africa to give witness, again, to the American desire for close cooperation with the peoples of Africa, and our profound respect for their freedom and their independence. I know the Vice President will be well received and that he will convey the greetings and the true feelings of the people of the United States.

While I mention the Vice President, let me say that despite all the editorial criticism and some of the commentary in the press relating to the Assistant Secretary of State for African Affairs, Mr. Williams, on his trip to Africa, he performed outstanding service for this country. He did so in the sense that he represented the genuine spirit of the American people to the nations and the peoples whom he visited. Yes; he may have made an inappropriate remark in terms of what some persons think is appropriate; but I suggest that Mr. Williams spoke the heart of the American people when he went to the peoples of Africa and said that we were with them, and that we wanted them to build their own destiny. The peoples of Africa, as Mr. Williams pointed out, are not merely the Negro people or the Africans themselves, but also other settlers who wish to live there in peace, security, and independence. Mr. Williams was speaking for them, as well. However, I suggest that it may be simply one of the favorite political games of this country to attack a man of the stature and of the background of the Assistant Secretary of State for African Affairs; but it does not help our foreign policy. Mr. Williams was speaking well and was carrying the message of the Government of the United States. I think he is to be commended.

Mr. President, I desire now to turn to another subject.

The PRESIDING OFFICER. The Senator from Minnesota has the floor.

COMMITTEE ON APPROPRIATIONS

Mr. HUMPHREY. Mr. President, I desire to make a few observations relating to an action which took place in the Senate last week which was very disturbing to me, namely, the action of the committee of conference on the third supplemental appropriation bill for 1961. I am a junior member of the Committee on Appropriations. I lay no claim to any special knowledge as to the work of that committee or to any prerogatives over and above those of any one Senator. However, I was very much concerned over the final conference report. I am afraid that that final conference report may very well leave the administrative or executive branch of the Government with inadequate resources to do the work which Congress in previous action has directed the executive branch to perform.

As reported from the conference, the third supplemental appropriations bill for 1961, H.R. 5188, provided total appropriations of $1,694,055,637. The budget estimate which was presented to Congress was $5,339,565,127. This was the considered judgment of the Bureau of the Budget concerning the financial needs of the Government under existing legislation passed by previous Congresses and commitments made by the Government of the United States through their elected representatives up until June 30 of fiscal 1961.

Of the budget estimate figure $5,339,565,127, the House allowed $803,506,119. One of the reasons for that was, of course, that certain figures were not available for the House at the time of their early hearings.

The Senate allowed $4,637,419,970. That was the action of the Senate Committee on Appropriations and the U.S. Senate itself on the third supplemental appropriations bill.

The principal difference between the administration's request and the action of Congress, as well as between the actions of the House and Senate, was in funds for the Commodity Credit Corporation. The administration had requested the restoration of the impaired capital of the Commodity Credit Corporation, as well as the reimbursement for current costs of the special milk program, the International Wheat Agreement, emergency famine relief, the Public Law 480 program, the migratory waterfowl feed program, bartered material for stockpiles, grading and classing activities, and long-term supply contract losses. Every one of those items has been legislated by Congress. We had directed by legislative enactment the fulfillment of the Government's responsibility under those laws.

The estimate of $2,969,525,000 for these items had not been considered in the House. The Senate approved $2,820,307,000, but the House conferees refused to agree even to a compromise amount, and the entire amount was deleted.

We are not permitted under the rules of this body to make any unkind or unfavorable remarks relating to the respective Chambers of the legislative branch, and I shall abide by the rules. I simply say that the failure of the committee of conference to bring back a compromise figure has left the executive branch in a very difficult situation in terms of the administration of some of these programs. This is particularly true with respect to the special milk program for our children and in terms of the famine relief program or the area of the program for food for the distressed areas of the Nation.

I suppose that by taking moneys away from programs which may be less urgent, it might be possible to fulfill some of the emergency obligations. But this is a poor way to run a government, and particularly a poor way to operate programs which are not the special prerogatives of the executive branch but rather are the required programs of the legislative branch.

Of the remainder of the budget request, a total of $2,370,040,127, Congress approved $1,694,055,637. Of the $675,984,490 difference between these two figures, $555,615,500 represented a cut in the $1,080,397,000 requested for the Department of Labor. The major portion of this was in the requested payment to the Federal extended compensation account, where the estimate was reduced by $490 million.

Simply put, Mr. President, that was the reduction in the funds for temporary unemployment compensation. After all, the temporary unemployment compensation account relates to unemployment which has taken place in the past year or the preceding years; and it ought to be paid within this fiscal year, instead of playing games with the bookkeeping of the Government.

Of the $150 million requested for the Development Loan Fund, which the House had disapproved entirely, and the Senate had voted to restore, $50 million was approved in conference. The conference directed, however, that these funds were to be earmarked specifically for loans in the Western Hemisphere.

Of course, Congress can do whatever it wishes; and it has done so. But there was adequate testimony before the Senate Appropriations Committee, and, indeed, there was argument here in the Senate itself, in regard to the need for the $150 million for the Development Loan Fund. At the very time when Soviet Russia is exerting pressure all over the world, at the very time when we are facing the greatest threat to our security that we have ever known, we have decided to cut back the Development Loan Fund—the fund for the making of loans which are repayable with interest—despite the testimony which indicated that these funds are required and, in fact, were committed in August of last year. In fact, last August the Development Loan Fund Administrator was asked to return to the Congress, after January, to obtain the funds which might be required. Assurance was given that such funds would be made available. The Senate did vote to make them available. I simply say that I have a feeling that between now and June 30 we shall encounter trouble with this program; and if we do, I want the record clear as to why the trouble besets us. These programs cannot be operated without the required resources. The $150 million was the Eisenhower request, and it was the Kennedy request. It was the basic minimum. Even that was less than one-third of the amount required for the loans which already were in process. It was barely enough for the general authority under minimum standards. I am afraid we may very well encounter serious difficulties because of this particular action.

The estimate of $6 million for Federal payment to the District of Columbia, which had been entirely disallowed by the House, and had been restored by the Senate in the form of a $5,700,000 Federal loan to the District, was deleted in conference. Let me say that that action by the Senate was taken at the suggestion of the able and dedicated Senator from West Virginia [Mr. BYRD], the chairman of the Subcommittee on District of Columbia Appropriations. I thought the Senator from West Virginia made a very practical suggestion. He is a frugal and prudent man. He is not a spender. He has had years of experience in Congress with appropriations matters. However, in the conference that loan authority was deleted, and no funds at all were provided.

At the present time the Nation's Capital has pressing needs for new school buildings and for a host of public works projects. However, today the Capital of our country finds itself without funds with which to carry on those projects, and it is unable to commit moneys to those programs. It is said there will be a sales tax, and that it will provide the necessary revenues. But that tax will take effect in the future; the enactment of a sales tax is not exactly an example of rapid action by Congress. Instead, it is what I would call delayed action. In the meantime, funds which were supposed to be made available for a limited amount of constructive programing in the field of public works are not available. I suggest that the delay will cost the taxpayers much more, because building costs are rising; equipment which should be put to work is lying idle; and unemployment exists in this city, as well as in other cities. Such a situation does not make much sense to me. In fact, I think we would be much better off by having people at work, rather than to pay them unemployment compensation. I believe it makes much more sense to have a sensible public works program for the doing of things which need to be done, rather than to pay people for doing nothing, even though they have earned, under the law, the right to be paid unemployment compensation.

As I have stated, the conference committee deleted the entire item. However, the conference committee did accept the Senate's allowance for the District of Columbia, from the regular district of Columbia funds; and that was twice the amount which had been allowed by the House. The final figure was $10,820,619, as compared to the estimate of $11,163,119. The House had approved $8,636,169.

The conference committee approved more funds for the Department of Health, Education, and Welfare than had been requested. The estimate called for $110,543,000. $127,375,500 was appropriated. The difference resulted from the House action—in which the Senate had concurred—in adding $29,990,000 for Federal aid to schools in impacted areas. That was a very worthy action by the House, and I think it was fully justified, and was well concurred in by our conferees.

Considerable restoration was made in the funds for independent offices. I ask unanimous consent that the figures relating to the budget estimate, the House action, the Senate action, and the conference committee action be printed at this point in the RECORD.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

Estimate	$177,538,000
House	133,264,650
Senate	174,987,650
Conference	162,144,650

Mr. HUMPHREY. The funds for the Department of the Interior were cut considerably below the requests, largely by House and Senate disallowance of $12 million for the development and operation of helium properties. I ask unanimous consent that the figures in that connection be printed at this point in the RECORD.

There being no objection, the tabulation was ordered to be printed in the RECORD, as follows:

Estimate	$27,172,000
House	13,395,000
Senate	15,151,333
Conference	15,057,000

Mr. HUMPHREY. Mr. President, one significant reduction—on which the Senate gave in to the House—was in the funds for new construction in the national parks. The estimate was $467,000. The House voted $300,000. The Senate approved the entire amount of the estimate. However, the conference agreed on the figure voted by the House, which was a reduction of $167,000. That will not cripple the program, but it will slow down the construction program for our national parks.

Mr. President, I do not know how many Members of the Senate visit the national parks; but I have stated here in the Senate that, practically every year, one of the joys of the Humphrey family is to get in the car and travel to the national parks, and see how people live, instead of just remaining in Washington and seeing how people live here. I imagine that when the Senate takes a limited recess, such as it is taking now, very few of our colleagues visit the national parks. Instead, they visit their constituents, or they go to other places, where they can gain some rest and refreshment of their bodies and spirits. But let me say that the national parks are the people's playground, and our national parks need more development and modernization of their facilities. They are inadequately staffed. In addition, they have inadequate facilities with which to care for the growing population of our country. Sometimes I feel that if we gave a little less attention to country clubs and even to some of the elaborate and expensive types of recreation, and if we gave more attention to public parks, our country would be more beautiful.

I am suggesting that, when we come to matters like the National Park Service, we remember this is something that belongs to the people; and a little sum like $467,000 for our national parks is surely not asking too much, particularly at a time when there is a real need to put money to work on constructive and gainful employment.

It should be noted the Senate secured conference agreement on appropriations of $350,000 for construction by the Fish and Wildlife Service. This was in contrast to an estimate of $214,000, and a House figure of $200,000.

The Department of State fared fairly well. The budget estimate was $12,636,000. The conference gave $11,562,000.

Mr. President, I ask unanimous consent, also, that the figures for the Department of State be included at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Estimate	$12,636,000
House	11,762,000
Senate	11,562,000
Conference	11,562,000

Mr. HUMPHREY. Mr. President, it will be noted the Senate allowed less than the House, and the lower figure was accepted in conference.

The Department of Defense did quite well, as usual. The Department of the Army received all it had requested for civil functions, and military functions were cut only $2 million.

The estimate was $288,549,000, and the conference gave $286,549,000.

I ask unanimous consent that the figures on the Defense Department be printed in the RECORD at this point.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

(Military functions only)

Estimate	$288,549,000
House	285,549,000
Senate	286,549,000
Conference	286,549,000

Mr. HUMPHREY. So the Department of Defense, particularly the Army, was well taken care of in terms of the budget estimates. For this we can be grateful. But as long as I am expressing a note of gratitude for what we did for the Army, may I suggest it would not be a bad idea to do something for the school milk program. I cannot, for the life of me, see what has happened to values in this country. On the one hand, we respond, generally, to requests of the civil functions of the Army, which are the Army Engineers functions. It does a splendid job. I am not critical; I want to be laudatory. The Department of the Army does a good job in its civil functions. But when it comes to taking care of our national parks, food for distressed areas, special milk programs for our own children, somehow or other, we say this we cannot afford.

It does not add up, and I want the RECORD quite clear that I was not happy with the conference report. Despite the efforts of our Senate conferees to hold the line, the bill as finally enacted is inadequate to take care of the many pressing needs facing our people. I want to express my appreciation for the work of my colleagues on the Appropriations Committee who served on the conference committee, especially our beloved chairman, the Senator from Arizona [Mr. HAYDEN]. I know they did the best they could under the circumstances, and that some of them share my disappointment over the results.

I have expressed my views today because it will be my intention, when the regular appropriations come by for the fiscal year 1962, to do what I can to restore these funds, at least where there is a demonstrable need, so that the departments of our Government can operate effectively and can fulfill the requirements of legislation.

Mr. DWORSHAK. Mr. President, in view of the fact that there are no other Members of the majority present than the distinguished Senator from Minnesota [Mr. HUMPHREY] and the occupant of the Chair, the Senator from Ohio [Mr. YOUNG], I feel it incumbent upon me, as a member of the Appropriations Committee, to give assurances to the freshman member of the Appropriations Committee, who has admitted his lack of familiarity with the procedure and the techniques used by the Senate and House Committees on Appropriations and the conference committees.

I recall that on Thursday afternoon I engaged in a colloquy, very briefly, with the Senator from Minnesota, and called to his attention the action taken by the conference committee on the third supplemental appropriation bill.

I deplore very much that, while the Senator from Minnesota makes an emotional appeal that we are ignoring these very deserving programs and depriving the children in our schools of the milk which they need for their lunches, he is greatly distorting the record. I do think that, even though he has been on the Appropriations Committee a very brief time, and that therefore we should be tolerant of these misstatements, the fact remains that we were dealing with a supplemental appropriation bill on a budget request, revised by this administration, which requested funds, not for this fiscal year, but for the next fiscal year.

The Appropriations Committee and the various subcommittees have not yet started hearings, on the Senate side, on the regular budgets for 1962; and knowing that the Senator from Minnesota is a very adroit and canny politician, as he demonstrated during the past few years in his quest for the presidential nomination of his party, obviously he knows that last week, on this floor, there was a play made to transfer funds which legitimately will be expended in the next fiscal year. This would show them as part of the fiscal year ending June 30th, and thereby charge to the outgoing Eisenhower administration much of the deficit which ordinarily would be charged to the next fiscal year.

Mr. President, we will have ample time to provide funds for all of these activities. I want to remind the Senator from Minnesota that, in the recent debate on the appropriation bill, the Senator from Idaho presented a budget document, which went to the House under date of March 20, which was precisely 1 week prior to the consideration of the bill in this body—submitting revised estimates for many of these programs. The Senator will recall, I am sure, that when I called attention to this House document and offered a series of amendments, I reduced the appropriation by exactly $149,218,000. There was no roll call, because the chairman of the committee, the Senator from Arizona [Mr. HAYDEN], and the chairman of the subcommittee on the agricultural budget, the Senator from Georgia [Mr. RUSSELL], accepted the amendments because they were based upon a budget request submitted by this administration.

Mr. President, I do not want to belabor this subject, but I do think it is most unfortunate, when this administration and the majority party control this body with a membership of approximately two to one, and likewise control the Appropriations Committee of the Senate by a ratio of 17 majority members to 10 minority members—it certainly becomes apparent that the responsibility rests fully upon the majority Members of this body—that the distinguished Senator from Minnesota undertakes to lecture the Members of this body and to denounce considerations on the part of the House in handling this appropriation bill. I submit, Mr. President, that he is then denouncing vigorously the members of his own party and leadership in the White House, and the leadership of which he

is a part in the Senate of the United States.

Appeals are frequently made for unanimity and cooperation in handling the public business.

Certainly it would be in order for the distinguished majority whip to come forward with clean hands to commend the action taken by this body and by the conferees representing the House, and to point out that not only is it desirable at times to spend more Federal money but also that we should constantly be alert to the need for greater economy and efficiency in the operations of the Federal Government so that we can curtail our appropriations and expenditures and retard inflationary influences which are devastating to the security and to the welfare of our country.

WEATHER—TAKE IT OR MAKE IT

Mr. CASE of South Dakota. Mr. President, last week there was held in the city of Washington, D.C., a National Water Symposium. This symposium was called by the National Association of Soil Conservation Districts and by the National Reclamation Association. The sessions lasted 3 days. They brought together people who, in an official or in a private capacity, have been concerned with water problems, ranging from those which affect the farmer on the land to those which affect the person living in a large city.

If anything were needed to emphasize the conclusion of the Senate Select Committee on National Water Resources that water today is a national problem, the papers presented at the water symposium supplied the emphasis. I hope at a later date to present for inclusion in the RECORD some of the significant papers which were presented.

Among the speakers was the Commissioner of the Bureau of Reclamation, Mr. Floyd Dominy. A paper was presented in behalf of General Itschner, the Chief of Army Engineers, by Major General Cassidy. Papers were presented by heads of departments of various universities throughout the country and by people who are connected with the research institutions, both private and public.

The first session was devoted to assessing the need. The sessions of the second day were devoted to measuring the need and to consideration of what is being done in nonirrigated agriculture. The sessions of the third day were devoted to problems related to irrigated agriculture.

At the concluding session on Friday, it was my privilege to be one of the speakers. I discussed the methods of measuring the allocation of water for various needs under the concept of multiple use.

Members of the Congress were given the honor of opening certain sessions. The first session was opened by a talk by Mr. Ted Schad, who is not a Member of Congress but who was the director of the Senate Select Committee on Water Resources.

The second session was opened by an address by the Senator from Oklahoma [Mr. KERR], the chairman of the Senate Select Committee on Water Resources.

Mr. WAYNE ASPINALL, a Representative in Congress from the State of Colorado, the chairman of the House Committee on Interior and Insular Affairs, presented the opening paper at the morning session of the second day.

At the afternoon session, a paper was presented by the Honorable JAMIE WHITTEN of Mississippi, the chairman of the subcommittee dealing with agriculture of the House Committee on Appropriations.

In my paper I sought to deal somewhat with the need for allocating water. I pointed out that we live in a very dynamic country. An estimate of the needs of today will not necessarily measure accurately what will be the need 10 years from now. Nevertheless, I presented the current estimate to show the likely change in water requirements.

The estimate of the Select Committee on Water Resources is very revealing in this respect. It indicates that whereas the need for running water in streamflow for the production of hydroelectric power will almost triple between 1960 and the year 2000, the need for flowing water for navigational purposes will decrease somewhat in that same period of time. The need for water as a means to help control pollution will increase; and the need for flowing water, and water resources generally, for recreation and as a habitat for sport fishes will also increase during the next 40 years.

Because of the need we have to consider the various ways to increase the water supply. I devoted a part of my remarks to reviewing the progress which is being made in regard to desalinization of water, both ocean water and inland brackish waters.

I also spoke of the need for stepping up research in cloud modification. In particular I called attention to the possibilities in the interior parts of the country of using rockets to provide a mechanism by which the nucleating agent might be put into the clouds. I pointed out the difference between pertinent problems on the West coast and those in the Great Plains. On the West coast there are moisture-laden clouds coming in from the ocean which strike the mountains, creating an updraft, so that the vapor released from ground generators can be carried into the clouds. The situation in the Midwest and in the Great Plains is that the cold winds come from the northwest and strike the moisture-laden warmer winds from the south, passing under the warmer winds. In fact, I think that has been the reason why the attempt to use ground generators for carrying nucleating agents into the clouds has not been successful in the Great Plains area. The warm air rises, and the crosscurrents between the ground and the moisture-laden clouds do not permit the vapor generated from ground generators to reach the clouds.

On the other hand, there have been dramatic results in the Great Plains when aircraft were used and the nucleating agent, whether silver iodide or dry ice, was dumped directly into the cloud.

Mr. President, the Advisory Committee on Weather Control made its final report to the President on December 31, 1957. This two-volume report is still the most authentic and complete report on weather modification in existence. The committee was not authorized to do research but to evaluate the work being conducted by both private and public agencies, studying all the available literature on the subject, and then to make recommendations to the President as to what should be done to strengthen the program.

The committee found that more basic information was needed about the atmosphere and its behavior. They recommended, among other things, that basic and applied research was of prime necessity and should be enlarged without delay. They recommended that the research program be sponsored by the Government primarily through work with Federal agencies, universities, and colleges, industries, and other organizations.

Following the issuing of that report, I introduced a bill proposing such an expanded program. It was concluded to be advisable, after hearings, to place the program in the hands of the National Science Foundation.

The Senate Committee on Interstate and Foreign Commerce conducted hearings on the bill. It was subsequently passed by the Senate, approved by the House, and signed by President Eisenhower. The law gave the National Science Foundation the responsibility for developing a further research program. With the limited funds available for this purpose, the foundation has done a creditable job, but the possibilities in this field warrant a more vigorous program.

In 1959, the total Federal Government expenditure for support of scientific research and development was approximately $7.4 billion. There was appropriated by the Congress to all agencies of the Government some $36 million for meteorological research.

I daresay, Mr. President, that when the long span of history takes a look at what we do today, it will say the $36 million for meteorological research had much greater significance for the welfare of mankind than the $7.4 billion devoted generally to research and development. Research in the fields of weather and of water improvement and expansion of water resources offers more potential benefit for the welfare of mankind than does a great deal of the money being spent to develop methods for the destruction of mankind.

Mr. President, if we are to meet our own needs and to maintain our lead in meteorology among countries of the world, a greatly accelerated meteorological program must be instituted.

A very outstanding address was given in January by Adm. Luis de Florez, retired, U.S. Navy Reserve, at the 29th annual meeting of the Institute of the Aerospace Sciences that covers the need for research and the need for encouraging young men to enter the field of meteorology. His discussion under the title "Weather—Take It or Make It," should be of interest to everyone.

I request unanimous consent that the address by Admiral Florez be printed in the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

WEATHER—TAKE IT OR MAKE IT

(By Adm. Luis de Florez)

It is strange, indeed, that the American people—who live on the assumption that any problem can be solved if you have the intelligence to define it and the will to keep working at it—display the same fatalism and resignation about the weather that our remote ancestors did thousands of years ago. It is a fact, nevertheless, for when it comes to weather, we accept whatever comes passively, patiently, as an act of the Gods. We do not seem to realize that the problem of weather control, gigantic as it is, can be subjected to the same sort of attack which brought about our great discoveries in the fields of flight, nuclear power, chemistry, medicine, and others. In any case, we have not tackled the control of weather with the same determination and audacity that we have shown in harnessing nature in other ways.

It is my growing conviction that the only real obstacle in the way of controlling the weather is our attitude of mind which appears to be a combination of three things:

1. A lack of sense of proportion concerning what is important to our existence.

2. A form of mental block bequested us by countless generations of peoples awed and cowed by the elements and powerless to anything other than protect themselves against them.

3. Incomplete realization of the tremendous advances and power of science and technology of our time.

At this period in our history when we are bending every effort to conquer space and solve the great problems of space travel, we seem to have bypassed any serious thought of reshaping our own atmospheric conditions which vitally affect our existence in our own home grounds.

SINGLE GREATEST FACTOR

I do not imply that we should curtail our space programs in any way, but I do mean that our atmospheric conditions constitute the greatest single factor controlling the existence of life on earth, and that reshaping the conditions of inner space to our own advantage should accompany the attempts to master outer space.

Man—and countless other forms of life—breathes the atmosphere, feeds on the products that grow in it, and conforms to the climate it produces.

The incredibly complex movements of the atmosphere, caused by the absorption of solar energy and rotation of our globe, determine, in the main, our weather and our climates. In turn, our climates and weather detemines the living conditions which affect life itself, the evolution of species, and the characteristics of peoples.

Only man, out of all species of life, has learned to adapt himself artificially to all kinds of weather. He has discovered fire, invented clothing, habitations, refrigeration, and pressurization—in short—everything he has needed to exist anywhere on the earth, and possibly beyond it. This physically weak and hairless creature has survived and populated the earth, harnessed nature's energy, and rules the animal kingdom, while many more powerful and formidable species have become extinct. Man's brilliant accomplishments, his dedication to exploration and his earnest energy, courage, and determination are often dimmed by his understandable shortcomings in accustoming himself to his newly acquired power. Let us not underrate this remarkable adolescent of our world's species of life because he sometimes makes his mistakes in wielding his growing powers. He will become part of the weather when he seeks this goal with all his might.

It was Charles Dudley Warner, not Mark Twain, who said that everyone complained about the weather but nobody did anything about it. No doubt this quip was meant to be humorous, but it isn't so funny when a hurricane comes barreling up our east coast leaving billions of dollars of destruction in its wake, to say nothing of casualties.

When protracted droughts abort crops, decimate cattle, and wreak great losses upon our agriculture, or when prolonged rains swell our rivers and wash away homes, towns, and the soil vital for our future existence, it is a tragedy.

In 1935 the Midwest was subjected to the longest period of hot, dry summer weather in the memory of man. It saw the dust storms, the Black Blizzards—the Dust Bowl. Later, associated with this, Nebraska suffered devastating floods on the Republican River.

DROUGHT, SNOW, AND FLOODS

Again in 1936 the Midwest suffered disastrous summer drought, and in the following January and February came the longest period of sub-zero weather and the greatest snowfall ever experienced east of the Rockies. The March thaw of that year caused disastrous floods in the East and in April tornadoes raked the Southeast causing great destruction.

Dr. Gayle Pickwell, who records these facts in his book "Weather," published in 1938, comments, "One cannot experience or read about such weather without asking himself why?" That was 25 years ago and still no answer.

The question is: Can we do something about the weather besides complain about it? The answer is "Yes." This is not the isolated opinion of an old flyer and a long-time engineer but also the opinion of many scientists, professional meteorologists far more expert than I.

In 1958 the editor of Science Newsletter (Nov. 22, 1958) made a survey of professional meteorologists concerning the feasibility of weather control. Forty-two percent believed that within 10 years it will be possible to prevent hail and lightning and to increase or decrease precipitation. Forty-six percent believed that within a span of 50 years man will learn how to control tornadoes, hurricanes and squall lines. Thirty percent believed that large-scale weather patterns will be brought under control within the next 5 decades.

In 1956 Dr. John von Neumann, one of the greatest scientific minds of our time, said:

"Our knowledge of the dynamics and the controlling processes in the atmosphere is rapidly approaching a level that will make possible, in a few decades, intervention in atmospheric and climatic matters. It will probably unfold on a scale difficult to imagine at present. There is little doubt one could intervene on any desired scale, and ultimately achieve rather fantastic effects."

With intensive work all these time periods can be shortened.

Certainly we know that climates have changed and for that matter are changing. We suspect that atmospheric circulation could be changed by altering the absorption and radiation of parts of the earth's surface and we know that in so doing climate and weather would be changed. We know that we can induce precipitation by seeding clouds with dry ice, silver iodide or carbon black, and that in so doing great quantities of energy from the condensation of water vapor can be liberated. There is reason to believe that we may find triggering mechanisms which could make or dissipate atmospheric disturbances.

Some 15 years ago Irving Langmuir of the G.E. made a series of experiments in New Mexico in which he seeded the atmosphere with silver iodide generators at periodic intervals. He claimed that as a result of such seeding the weather on the east coast was observably affected. Others claimed that it was not. The controversy which arose was never settled, in spite of the far-reaching implications of such an experiment, nor was there any attempt made to repeat the experiment in order to shed light on the subject.

IS IT POSSIBLE?

The question is not who was right or who was wrong, but rather is it possible to produce long-range weather effects in this manner or, for that matter, any other way? A subject of such vital importance should never have been allowed to rest on uncertainty or on opinion.

The influence of weather control or modification on every phase of human activities beggars the imagination. Only slight improvements in precipitation or temperatures could result in making vast territories available for agriculture and normal living.

Small changes in atmospheric circulation could bring about more favorable temperatures to make additional areas suitable for human habitation. It is conceivable that hurricanes could be diverted or their force dissipated by breaking them into small disturbances before the system could gather all its destructive energy into one great storm. The yearly toll of disaster and enormous economic losses could be avoided or at least reduced by the capability of controlling or modifying the weather.

From a military standpoint the implications are even greater. With control of the weather the operations and economy of an enemy could be disrupted and by the same token we could be made to suffer enormous losses in our own economy and our military efforts crippled.

In a cold war the ability to control or modify weather would provide a powerful and subtle weapon to injure agricultural production, hinder commerce and slow down industries.

How then do we go about harnessing the weather? The answer is first to learn more about our atmosphere and its mechanisms. This calls for research and experiment, not on the present penny ante style, but on a scale commensurate with the immense benefits to be gained. This in turn calls for major expenditures to provide for scientific personnel, equipment, and the necessary educational program to create a source of competent workers for this field.

In addition, it requires support for a group of specialists whose primary objective is to apply current knowledge to the control or modification of weather as a point of departure. In spite of the meager support of meteorological research in the past, a good deal of basic work has been done by a relatively few competent and dedicated scientists. This work could begin to show tangible results if expanded and supported by experiment.

The development of mathematical weather models by means of computers and the simulation of circulation by means of water tank analogy has already provided modern tools for weather study. With more aircraft, rockets, balloons, and so forth, and personnel for observation we could arrive more rapidly at the point of full-scale experiment. We have recently launched a weather satellite which, along with others, will provide much needed information. I suspect, however, that this forunate development was dictated more by our desire to expand our space technology than for the benefit of meteorology.

We could do some things immediately: for instance, eliminate or greatly reduce air pollution around our cities which dims sun-

light, causes poor visibility, promotes fog and increases the collision hazard at our great air terminals. Those of us who fly in and out of New York have seen the pall of smoke which blankets the area for miles on relatively calm southwesterly days. The smog of Los Angeles is largely manmade.

As an investment, the reduction in smoke and vapors would save our airlines millions a year by reducing delays, reducing hazards which we cannot price, and certainly by improving everyone's health. It has been estimated that air pollution costs our country over a billion dollars a year.

Some of our cities such as St. Louis and Pittsburgh have already made major improvements. Why not a national effort in this line?

APPROPRIATIONS INADEQUATE

The present scale of appropriations for meteorological research is pitifully inadequate for the task confronting us, and it falls far short of that needed for current operations for the collection of available new data.

We have not enough aircraft for observation, not enough personnel for the collection and analysis of data, and virtually no support for experiment.

The records show that in 1959 the total amount appropriated for meteorological research by all departments and agencies was some $36 million. A good part of this was spent on equipment. Only about a million was directed specifically to the field of weather control or modification, despite its importance.

Contrast this sum of $36 million with $45 billion for a defense budget; some $17 billion for military aviation, $4 billion for military R. & D., $2,500 million for the gross revenue of our commercial airlines. When even minor modification of weather could turn out to be a superweapon to enhance military strength, affect major savings to airlines, and reduce hazards and casualties to all—$36 million is just plain peanuts.

The following table 8–A shows the budget of the various departments and agencies which support meteorological research and the amount of their support in dollars and as a percentage of their respective budgets.

I think you will agree that this is paltry support for a field of such immense opportunities.

TABLE 8–A.

Agency	Total budget	Meteorological research support, 1959	Percent of budget
	Millions	*Millions*	
Department of Agriculture	$5,926	$0.9	0.15
Atomic Energy Commission	2,723	1.3	.7
Department of Commerce	471	1.6	.34
Weather Bureau	452	1.8	.40
Department of Defense	45,517		.028
Army		2.9	.007
Navy		3.0	.007
Air Force		6.8	.17
Total, Department of Defense		12.7	
Department of Health, Education, and Welfare	3,255	.9	.27
Department of the Interior	791	.1	.013
National Aeronautics and Space Administration	305	8.6	2.8
National Science Foundation	136	8.1	6.0
Total		36.0	

It should be borne in mind that any increase in knowledge of our atmosphere and its existing movements will permit better forecasting which is badly needed. It should also be borne in mind that a great deal needs to be done to make current weather information and short term forecast available to those concerned. This means more and better personnel for the Weather Bureau and better communications. There could be no better national investment.

It has been said that it would not be wise to provide more funds at this time since the number of technically qualified people in the filed of meteorology is very limited.

STUDENTS NOT ATTRACTED

The answer is that so little money has been available for research in this field that young technical students seeking a career are not attracted to it in spite of the challenge it presents. Table 9–B shows the number of students graduating in various technical fields as compared to those graduating in meteorology for the year 1959. All told there were some 77,000 graduated in engineering and other technical courses and only 173 B.S.'s and 13 Ph. D.'s in meteorology. We cannot expect to improve enrollment unless we show our interest and the vital need of study in this field by providing more funds for research and experiment and prime the educational pump with educational incentives.

The question inevitably comes to mind as to what some of our less friendly contemporaries, such as the Soviets are doing in this field. Actually, we don't really know but we do know that they have capable scientists, that they have the power to direct their research efforts where their hierarchy sees fit and that they have great advantages of terrain for experiment.

TABLE 9–B.

Course	Degree		
	B.S.	M.S.	Ph. D.
Physical sciences	15,460	3,179	1,812
Mathematics	9,019	496	28
Engineering	38,134	6,753	714
Biology	15,149	2,002	1,045
Total	77,742	12,430	3,599
Meteorology	173	88	13

They have the vast reaches of the Siberian Continent for experiment and can observe results on possible changes of surface and the effects of seeding clouds and other experiment without hindrance. We know they are working on cloud physics, fog dispersal, and other meteorological projects but for the last 4 or 5 years there has been virtually no publication of experiments or results. Is it because of the lack of work in this field? It is more likely because this work has been classified and they are keeping the results to themselves.

There are those who contend that we are ahead of the Soviets in this field. They could be right, though I doubt it. But, so what? It would be a relief for once to lead the field in this vast enterprise to control weather, as we did in the nuclear field, and to use our own initiative and good sense to better our existence and protect ourselves, without requiring the goad of Russian competition.

WORLD PROBLEMS INVOLVED

We must realize that weather control or modification, like nuclear energy, involves world problems. If we change the weather in some parts of the world it will undoubtedly affect the weather in other regions. How? Research and experiment will give us the answer which we hope would produce benefits to all mankind. Nevertheless, the control of global climate and weather must eventually be tackled even though it be fraught with danger, both physical and political, in view of the pressure generated by growing population and perhaps, most of all, because man will never stop harnessing the forces of nature to his use.

Perhaps it is a matter for the United Nations to consider. Such consideration at an early stage might conceivably avoid bitter conflicts or even war later on.

In the foregoing I have tried to bring out the importance of meteorological research in comparison with other scientific fields and the disparity in the interest and the research effort it receives. It seems time to establish a sense of proportion between the value of even limited weather control and better forecasting and the funds allocated to bring about these results. Certainly the end results deserve the same consideration as that which we gave nuclear development and should be treated as such. We have led the world in nuclear power, why not lead the world in meteorology and its application?

To confound Charles Dudley Warner and/or Mark Twain I suggest the following specific objectives as a starting point:

1. Increase the financial support of basic meteorological research from $36 million in 1959 to $100 million a year starting now and being prepared to increase this as circumstances permit.

2. Increase the output of Ph. D.'s in meteorological research tenfold during the next 2 years.

This could be facilitated by evincing greater interests in meteorological research and offering educational incentives.

3. Expand research in weather control from a rather restricted field of cloud physics and cloud seeding to include investigation of the dynamics of the atmosphere on a planetary scale from the standpoint of triggering mechanisms.

Scientific means to reach this objective are now at hand in simulation of the atmosphere on electronic computers and hydrodynamical models. Furthermore, much greater consideration must be given to the interaction between the atmosphere and the sea which covers nearly three-quarters of the surface of the earth. Authority for such work already exists under Public Law 85–510.

4. Accelerate exploitation of the enormous power of meteorological satellites to bring global weather systems under surveillance.

This should not be limited merely to taking photographs of clouds, but should include the use of sophisticated sensing devices for the reconstruction of three-dimensional fields of pressure and temperature on a worldwide basis.

5. Initiate studies to assess the legal, economic, and social implications of large scale weather modifications.

6. Start now.

In conclusion, then, may I urge that the American people make control of the weather equal in scope to the Manhattan district project which produced the first A-bomb.

Mr. CASE of South Dakota. Mr. President, I also ask unanimous consent to have printed in the RECORD the report to the people of my State which I made of my remarks at the National Weather Symposium.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

SENATOR FRANCIS CASE REPORTS—USING EVERY DROP OF WATER

WASHINGTON, April 3.—Last week the most important long-range news in Washington may not have been on Capitol Hill or even at the White House. It could have been the results to flow from a National Water Research Symposium sponsored jointly by the National Association of Soil Conservation Districts and the National Reclamation Association.

With water becoming increasingly recognized as the No. 1 natural resource and the coming No. 1 problem for all parts of the country, these organizations teamed up to bring together chiefs of such agencies as Soil Conservation Service, Reclamation, Army Engineers, Agricultural Research and specialists in water supply and use from all parts of the country.

The program was divided under the general heads of "Water Supply and Management," "Use of Water in Nonirrigated Agriculture," "Use of Water in Irrigated Agriculture," and "Multiple Use of Water Resources and Equitable Allocation."

Sample of topics: Here were some of the topics by various speakers: "Surface and Ground Water Supplies," "Increase Through Weather Modification," "Saline Water Conversion," "Increase From Alpine Snowfields," "Efficient Use in Semiarid Areas," "Effect of Headwater Development," "Design of Storage and Conveyance," "Reducing Losses From Evaporation," "Municipal and Industrial Use," "Flood Control and Navigational Requirements," "Water for Recreational Use," and "Water Control on the Farm."

Following each group of topics, speakers discussed findings of recent research.

Some of the speakers: The partial list suggests the background of the speakers: D. A. Williams, administrator, Soil Conservation Service; Floyd Dominy, Commissioner of Reclamation; Dwight B. Kline, U.S. Weather Bureau; Joseph Strobe, Office of Saline Water; L. B. Nelson, TVA Chemical Development; Glenn H. Beck, dean of agriculture, Kansas; Omer J. Kelley, chief of Soil and Water Management, Colorado; Robert J. Hardman, Water Supply and Control, New Jersey; Grant W. Sharpe, Forestry, Michigan; W. L. Broadhurst, High Plains Hydrologist, Texas; and Dean D. F. Peterson, Research in Water Supply, Utah.

Sessions opened with remarks by four Members of Congress. These were: Senator ROBERT S. KERR, of Oklahoma, chairman of Senate Select Committee on Water; Representative WAYNE ASPINALL, of Colorado, chairman, House Interior Committee; Representative JAMIE WHITTEN, of Mississippi, chairman Appropriations for Agriculture; and Senator FRANCIS CASE, of South Dakota, ranking minority member Public Works Committee.

Printed proceedings: The various speeches and discussions are to be printed. We will endeavor to get copies to supply requests, or at least a résumé of the talks made. If interested let us know.

I think you will be interested in this table which I presented to show the shifting stream flow requirements as forecast in the final report of the Senate Select Committee on National Water Resources:

[In billions of gallons daily]

Streamflow uses	1954	1980	2000
Hydroelectric power	374.0	616.0	635.5
Navigation	281.0	238.4	221.4
Sport fish habitat	78.0	171.0	241.4
Dilution of pollution abatement	-------	332.2	446.5

Notice the shifting requirement as between navigation and power.

"In a dynamic economy such as ours, expanding and changing not only in population and industry, but also in irrigation, power use and recreation, decisions on water use will need to be made, revised and revised again," I pointed out, "and this cannot be done once and forever by fixed formulae. Laws and formulae must respond to human needs."

On demineralizing water: In my remarks, I also called attention to the new methods and devices being developed for taking the mineral salts out of water.

In addition to the demonstrated usability of electrodialysis for reducing hard and alkali waters to good quality for domestic use, I mentioned the fresh water processes that are being developed through freezing and distillation.

In particular, I think that some of the distillation processes, which vaporize thin films of water and draw off this "low-heat steam" and condense it offer practical possibilities for small town and even individual farms and ranches.

Must reach the clouds: We learned the hard way in South Dakota that ground generators tossing off silver iodide mist particles were of little practical value in modifying clouds in the northern Great Plains. We failed to heed the implications of the report by the Advisory Committee on Weather Control when it pointed to the orographic (uplift effect) created by the mountains on the west coast when the moisture-laden winds struck them.

I mention this, also, in my remarks, and pointed out that the dramatic effects of cloud seeding in the plains country came only when airplanes were used to get the nucleating agent directly into the cloud. This, whether silver iodide or dry ice was used, here, or water itself in Japan, or dust in Australia.

The droplets of moisture which are carried in the atmosphere are as small as one twenty-five-hundredths of an inch. They have to grow to one one-hundred-twenty-fifths of an inch in diameter to become heavy enough to fall as rain. In nature, they grow (1) by bumping together (like fog on your windshield); or (2) by cooling to the dew point (as on the outside of your iced tea glass); or (3) by freezing into a frost crystal and picking up more moisture until they fall as snow or hail—or rain, if they fall through a warm zone.

Any seeding operation is an attempt to provide a nucleus on which the moisture particle will grow or which will produce a temperature change enough to start the warm air to rise into an atmosphere cold enough to start the formation of frost crystals, that in turn will grow and fall.

Bentonite and rockets: Recently a professor in London has found that kaolin (a form of bentonite) which has been dehydrated has a special affinity for moisture. His findings reported in Scientific American and Time have suggested to me that we should try the well-known "thirsty" quality of our western bentonite as a nucleating agent.

The suggestion I advanced to the water symposium was that we experiment by using rockets to send small bombs of bentonite to spray or shower powdered bentonite into a cloud. Forest firefighters have found that slurry of bentonite is much more effective than plain water in dousing out treetop fires. It clings. Dams are grouted and dam leaks are sealed by the expansion of water-absorbing bentonite.

So, I suspect that "thirsty" bentonite sprayed into a cloud would gather to itself enough moisture particles to start the drop-growing process and "milk the cloud." Only a small fraction of the moisture that makes a cloud thick enough to become dark and look like rain would need to be obtained to make the difference between a crop and a failure, or drought and grass.

Such a project would be less fantastic than splitting the atom—and might do much more good for mankind. I am trying to promote a trial of the idea.

Mr. CASE of South Dakota. Mr. President, I invite attention to the fact that I made two new proposals. One related to the concentrated use of rockets as a mechanism for getting the nuclei into the clouds for the purpose of cloud modification. The second proposal related to the use of finely powdered bentonite as one of the nuclei, to be tried along with silver iodide, dry ice, and other materials.

Bentonite is a peculiar type of clay with a great affinity for water. It is called hygroscopic. I call it simply thirsty—because it has a faculty for drawing to itself small particles of moisture until it increases in size anywhere from 5 to 13 times.

Utilized in cloud modification, bentonite, by thus increasing in size, would make the small particles of moisture in a cloud grow until they were heavy enough to fall by gravity. This is in effect what happens when rain actually falls. The particles of moisture either run together or coalesce until they are heavy enough to fall. Or, frost crystals form if the cloud is high enough and the atmosphere is cold enough to produce frost crystals. The frost crystals grow in size until the moisture falls as hail, as frost crystals, or as snow.

I submit these observations and the statements in the hope that they will commend themselves to many Members of Congress.

I conclude by saying that the possibilities for good from meteorological research offer much encouragement to those of us who believe that the prime purpose of government is to better the welfare of the people and not to destroy them. In that spirit, I commend these remarks to the readers of the CONGRESSIONAL RECORD.

SUPPLEMENTAL APPROPRIATIONS

Mr. HUMPHREY. Mr. President, I feel that I would be doing an injustice to the Senate if I did not make some rejoinder to what I can only term "an attack" which was leveled a moment ago by the Senator from Idaho [Mr. DWORSHAK].

Mr. CASE of South Dakota. Mr. President, would the Senator agree to a quorum call?

Mr. HUMPHREY. Yes. I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. YOUNG of Ohio in the chair). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, I merely wanted the RECORD in reference to the supplemental appropriation to include the fact that the items which relate to the Commodity Credit Corporation, to which I directed most of my remarks, were items that were not given consideration by the House, simply because it did not have those items before it. They were acted upon by the Senate, and the Senate, by an overwhelming vote, approved their inclusion.

This was honorable bookkeeping. The simple fact of the matter is that in a fiscal year we ought to take care of the costs of that fiscal year. The fiscal year 1961 is exactly what the third supplemental appropriation refers to. It does not refer to any other fiscal year than fiscal 1961. The third supplemental of

fiscal year 1961 was the appropriation that was acted upon in the Senate last week. In that budget the new administration, on examination of the accounts of the Commodity Credit Corporation, found that there was an impairment of capital due to programs which had been authorized by the Congress and carried out by the executive branch. That impairment of capital was to be restored. Under the rules of the House, since the committee held no hearings relating to this capital impairment, it was the view of the House conferees that they could not vote for it in conference.

I merely point out that the impairment of capital still exists. A corporation, whether public or private, should not operate by draining its resources, its capital stock. The capital stock of the Commodity Credit Corporation has been impaired to the tune of more than $3 billion. That has not been reimbursed. It will have to be reimbursed next year. In fact, right now the Commodity Credit Corporation is within $500 million of the full utilization of its capital; and if between now and June 30 additional commodities come into the possession of the Commodity Credit Corporation, the capital will be impaired to the full value of the capital assets of the Commodity Credit Corporation.

I am not being partisan on this issue. I must say that one's objectivity should be greater than his partisanship. I do not believe that angry words are a substitute for fiscal understanding. We must pay these bills. The only question is when. It seems to me that the time to pay the bills is when they are due. I wish to say for the RECORD, and to the country, that fiscal year 1962 will have imposed upon it additional billions of dollars of unpaid bills from fiscal year 1961.

The majority party concurred in this supplemental appropriation. I am not one to refrain from criticizing my own party when I think it is wrong. I am first a citizen of America, an American, and second a partisan; and I will always keep it that way, too.

If the majority party is willing to saddle upon the first budget for which it has full responsibility, namely, fiscal year 1962, an additional $3 billion for Commodity Credit Corporation assets that have been used in fiscal 1961, if we are willing to take that additional responsibility, we have exceeded the bounds of what I call even prudent generosity. This we have done, and this will add to the deficit of 1962, because we cannot operate the Commodity Credit Corporation on faith, hope, and charity. Perhaps we could do a little better with charity. The other two would not help much. The Commodity Credit Corporation must be operated on the basis of sound cost accounting, in which the inventory is related to the assets that are available to pay for inventory plus storage charges.

All we did in connection with the third supplemental appropriation was to postpone the day of reckoning for the District of Columbia, for the Commodity Credit Corporation, and for certain other items. All those bills were due by January 30, 1961. That was the due date. But apparently we are so hopeful and joyful these days that we thought we would have the due date extended.

That will simply mean that fiscal year 1962 will have to have a larger appropriation in order to take care of the financial integrity of the world's largest corporation, the Commodity Credit Corporation. Today it stands within $500 million of having utilized all of its assets, with heavy demands upon it for the coming months, the crop years 1961 and 1962, and the fiscal year 1962.

I do not believe that the denunciation of one Senator is the answer to a serious fiscal problem. I feel that the duty of a Senator is to reason with his colleagues and not to engage in an exercise of vitriolic comment. We need to face up to our financial responsibilities. I have always found that in private business, relating to one's own finances, and in public finances it is better to have an honest set of books. Whether one can always pay his bills or not may depend upon resources available, but we had better have an honest set of books. We would be deluding ourselves if we thought we could ignore what has happened to over $3 billion worth of assets in this Government—in the Department of Agriculture, and the Commodity Credit Corporation.

Of course, we shall have to replace those funds because the entire agricultural price support stabilization structure depends upon it, unless we replace those funds next year, we shall put in jeopardy the solvency of the entire Commodity Credit Corporation.

So what will we do? We will replace those funds.

By the way, we have replaced the funds before, just as we have done this year. It was brought out in the RECORD that there were two other supplemental appropriations relating to Commodity Credit expenditures, I believe the years were 1956 and 1958. The RECORD can stand corrected if those are not the two appropriate years. There were two other times when substantial sums of money were appropriated by way of supplemental appropriation by a Congress that had relatively the same obligation politically and elsewhere. One of the times was only a very few months ago, when appropriations were made, and we restored the capital of the Commodity Credit Corporation.

I speak not as a Democrat but as a citizen and as a U.S. Senator. My party will be held accountable. One of the first things to do to be a good party member is to hold one's party accountable. I am going to hope, and I am going to work for the realization of party responsibility and fiscal integrity in this Government. The only way I know to have fiscal integrity is to face up to the counting of the costs of operating the Government, and when we do so, the American people will have reason to have confidence in the fiscal stability and the monetary policies of the Government of the United States.

ADJOURNMENT UNTIL THURSDAY

Mr. HUMPHREY. Mr. President, if there is no further business to come before the Senate, I move that the Senate adjourn until 12 o'clock noon on Thursday.

The motion was agreed to; and (at 1 o'clock and 49 minutes p.m.) the Senate adjourned until Thursday, April 6, 1961, at 12 o'clock meridian.

NOMINATION

Executive nomination received by the Senate April 3, 1961:

DIPLOMATIC AND FOREIGN SERVICE

Thomas C. Mann, of Texas, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Mexico.

EXTENSIONS OF REMARKS

Medical Care for the Aged

EXTENSION OF REMARKS
OF
HON. ANDREW F. SCHOEPPEL
OF KANSAS
IN THE SENATE OF THE UNITED STATES
Monday, April 3, 1961

Mr. SCHOEPPEL. Mr. President, on January 27, the distinguished Senator from Utah [Mr. BENNETT] delivered before the Harvard Medical Society, at Boston, Mass., a speech entitled "Medical Care for the Aged." Because of the importance of the speech and its interesting content, I ask unanimous consent that it be printed in the CONGRESSIONAL RECORD.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

MEDICAL CARE FOR THE AGED

(Speech by Senator BENNETT on January 27, 1961, Harvard Medical School, Boston, Mass.)

It is good to be with you today to discuss some of the problems pertaining to medical care for the aged. It is rather an unusual situation in 1961 for someone to be coming from Washington to Harvard. The trend in recent weeks has certainly been quite the reverse. However, I appreciate the invitation which was extended to me by Dr. Peterson to meet with you and give you some of my views on this important problem.

The problem of medical care for the aged has been with us for many years. However, the problem has only come to the forefront as a political issue during the past two Congresses. The length of the working life and the number of years an individual spends in retirement have increased tremendously since 1900. The average number of years an American male could expect to spend in the labor force increased by over 11 years between 1900 and 1961. At the same time, the number of years a male at age 20 could expect to spend in retirement increased by

3.6 years. In the year 1900 life expectancy in the United States was only 47.3 years, whereas today it is 69.7. Thus, we can see why this problem has grown to the extent where today we have almost 16 million persons over the age of 65.

Congress has not been unmindful of this problem as is evidenced by the enactment in 1936 of social security legislation which has been changed and added to by almost every Congress since that date. Last year, Congress passed a law setting up a program to supply medical and institutional care to meet the needs of people over 65 years of age. This legislation is referred to as the Mills-Kerr bill and is now Public Law 86–778. This law calls for cooperation between the Federal Government and the States and provides for Federal grants on the basis of local needs and efforts to meet the problems of the aged who are in need of medical attention. Several States have already passed legislation to implement the medical care bill passed by the last Congress and it is expected that most States will have this new program in operation before the end of this year.

Yet, even before this new law can become operative we are being asked to reconsider the problem and accept a different solution—a solution which was considered and rejected less than 6 months ago. At least seven bills have been introduced in the House and two in the Senate, all patterned after the Forand-McNamara-Kennedy bills of the last Congress which would institute a compulsory system of medical care for the aged under the social security system.

Why is there so much pressure being exercised for this new legislation? The answer is simple. There has been no change in the need for a law of this type, but there has been a change in the political administration in Washington. Last year, as a candidate, our new President supported the social security approach and used all the power he could exercise to get Congress to adopt such a plan. He failed. Now, with the greatly increased power he has as President, he is going to try again. Unfortunately, this time he may quite likely succeed.

ANALYSIS OF TWO APPROACHES OF MEDICAL CARE FOR THE AGED

Let's look at the situation, first as it existed last year, and secondly, as it exists now, and explore the two different approaches in trying to solve this problem.

1. Has there been, or is there now, any spontaneous public demand for any such program? The answer is no. During the months in which this legislation has been pending before Congress, I have received from my constituents only a handful of what I would consider personally written letters urging the adoption of a medical care program tied to social security. It is true, I have received several hundred identical form letters inspired by labor unions and other pressure groups urging approval of the social security formula for solving this problem. Generally, however, I have not received mail in sufficient volume to indicate that there is any great ground swell demanding enactment of a compulsory medical care program, such as that advocated by President Kennedy and his legislative leaders in the House and Senate. In fact, most of the mail received in my office has indicated just the opposite—that there is no emergency which would require a crash program in this area. Consequently, I am convinced that whatever pressure exists for this legislation has been politically generated. Last year medical care for the aged was a good campaign issue. Now it is a campaign promise to be kept.

2. Next we turn to the question of need—national and personal.

At the present time, the population of the United States is slightly in excess of 182 million people.

Of this number, approximately 16 million are 65 or over.

Only 4 million of the 16 million are not under social security.

Of the 16 million only half a million can be classified as suffering from chronic illness.

According to the Health Insurance Association of America, 49 percent of persons 65 or over are covered by health and medical insurance, and at the present rate of growth, this coverage is expected to reach 75 percent by 1965 and 90 percent by 1970.

According to a recent national study published last August by Dr. James W. Wiggins and Helmut Schoeck of Emory University, the medical needs of our aged have been greatly overexaggerated. Their survey indicated that:

Nine of every ten older persons report they have no unfilled medical needs.

Ninety percent of those 65 or over reported they enjoy good or fair health.

Sixty-eight percent said they could pay for a medical emergency out of their own means.

Half of the persons queried reported income in excess of $2,000 per year; 1 out of 20 had income in excess of $10,000.

Most of the aged reported net worth in excess of $10,000.

Sixty percent did not think a new Federal program could do anything for them personally.

Majority indicated life was much easier for them than for their aged parents.

Ninety percent could think of no medical needs that were not being taken care of.

Sixty percent are now covered by private voluntary health insurance.

Eighty percent are members of a church. If special care was needed from outside the family, twice as many elderly Americans would prefer to get such assistance from their church rather than from the Government.

Wiggins said much of what has been reported in the past about the health and welfare of older persons is based upon inaccurate data derived from the experiences of a generation ago or from the studies of the hospitalized or chronically dependent.

The Wiggins report indicates that the great majority of Americans over 65 are capably financing their own health care and prefer to do it without Federal Government intervention.

3. Based on the facts and statistics before us, Congress had to decide whether this record justified a Federal program—even in the face of the lack of public demand. But politics in a presidential election year creates its own demands and they were great enough to produce action. In the final debates in the House Ways and Means Committee and the Senate Finance Committee, and again on the floor of the House and Senate, the Forand and McNamara bills were soundly defeated. Likewise, the Kennedy-Anderson amendment, which preserved the social security approach, but which was more restricted as to benefits, was defeated 51 to 44. As I previously indicated, bills patterned after the Forand and McNamara approach have been reintroduced in this session.

4. Regardless of the details of any program selected to solve the medical care problem, we in the Congress are wrestling with a philosophical decision represented by three essentially different points of view. Briefly described they are the following:

1. Should the Federal Government recognize the value of the growing volume of private health insurance, and help to expand this protection by contributing part, or all, of the cost of premiums to those who could not provide these funds themselves?

2. Should these benefits be available to particular people as a matter of special right regardless of need, under a program added to the Social Security System?

3. Should we make actual need the basis of the distribution of benefits and thus reduce the cost by taking advantage of private funds available in each case? Under this approach, the States would share in the cost and administer the program, including the criteria for the determination of need.

The first-named program, introduced by Senator JAVITS, of New York, with the support of Vice President Nixon, was never really seriously considered. It got 28 votes on the Senate floor, and passed out of the controversy.

The social security approach, represented by the Forand bill in the House, and McNamara and Gore bills in the Senate had the support of AFL–CIO, as well as Candidate Kennedy, but was rejected by both Houses, even in such modified form as the Anderson amendment.

The "needs" approach had the approval and support of the AMA. It was worked out by the Ways and Means Committee of the House and adopted there. When it came to the Senate, the Finance Committee modified it further, but did not change its essential features, and it was passed on August 23 and became Public Law 86–778 on September 13, 1960.

RIGHTS AND NEEDS

The contest between the "rights" and the "needs" approach was bitterly fought, and is not settled yet. Each point of view has its strengths and its weaknesses, and these are worth cataloging.

A. Those who advocate medical care for the aged tied to the social security system, hope to benefit from the general public acceptance of that system. But as an opponent to this approach, I would like to point out the following weaknesses:

1. A medical care plan placed under social security would change the basic pattern of payments from one of cash benefits based on earnings to service benefits without regard to contributions.

2. Its added cost would overburden the Social Security System. Social security taxes, now at 6 percent, divided between employee and employer, are due to go to 9 percent by 1969. If medical care benefits are added this tax could conceivably rise to 20 percent in the not too distant future.

B. Cost estimates for the various medical care plans:

1. Forand-McNamara bills: Most conservative estimates place the initial cost between $3 and $4 billion with sharp increases expected as additional benefits and persons are added to the plan. In fact, if the same extensions are made to the medical care plan as has been our experience with other social security benefits, we could expect the cost of this program to soon be in excess of $8 billion per year.

2. Anderson amendment: Proponents of this bill estimated it would cost $700 million the first year and $1 billion each year thereafter. However, actuaries for the Health Insurance Association in reviewing this measure said the cost would be almost double the first year ($1,331 million) and would be in excess of $2 billion per year thereafter.

3. The Senate Finance Committee bill, which is now Public Law 86–778, is estimated to cost the Federal Government approximately $190 million per year.

Government security welfare programs incubate an overwhelming political demand for more welfare. Our own programs indicate this. But Sweden is much more of a welfare state. There, pensioners have become politically powerful, demanding even more from the rest of the people. During the past year, Sweden was forced to slap an additional 4 percent sales tax on top of all other taxes to help pay the ever-mounting

costs of their cradle-to-the-grave welfare programs.

It is important to point out that all of these plans are now in their infancy and would undoubtedly grow in the future. Originally, the cost of social security when it was enacted in 1936 was to be 2 percent on the first $3,000 of each worker's income. The cost is now more than 450 percent higher. We are now paying 6 percent on the first $4,800 of income each year and the program is still underfinanced. Deductions will go up to 9 percent by 1969.

Six major changes (four in the last 6 years) have been made in the social security program since its birth. Retirement benefits have been increased 17 percent more than the increase in the cost of living. Coverage has been vastly extended. Survivor benefits have been enlarged. The age for eligibility for women has been lowered to 62 and bills are now pending which would grant earlier retirement to men.

4. Malingering would be rampant if care as a matter of right were extended to all. This system which would substitute entitlement by right in place of actual need would encourage widespread overuse and abuse of medical facilities.

I have always remembered a personal experience I had 25 or 30 years ago. A small company with which I was connected instituted a system to provide sick benefits for employees and entitled each worker to a limited number of days of sick leave each year. One employee near the end of the year suddenly became sick almost every other day. When the visiting committee went to call on him unexpectedly, they found him in bed with his clothes on, including his shoes. They chided him for it and asked him why. His answer has been ringing through my mind ever since. He said, "I means to have my share." I am certain there are many persons who will attempt to have their share on the basis of entitlement rather than need.

5. Under the Forand-McNamara approach, service will be supplied as a matter of right to many who don't need it and will be denied to some who do. For instance, there are more than 4 million persons over 65 who are not covered by social security who would not be entitled to any benefits. Likewise, retired railroad employees and also Federal employees would not be covered under the plan even though their medical needs are certainly as great. On the other hand, many veterans would be eligible for double entitlement and could pick and choose wherever they thought they could obtain more benefits.

6. It would put an unfair burden on the presently employed people contributing to social security. Nine million would get benefits for which they have made no contribution.

7. It concentrates on a narrow tax base—$4,800.

8. It has been called pay-as-you-go but social security is pay now, you get benefits later—maybe. (There is no relationship between payments and benefits.)

9. Contributions would be compulsory, just as is England's health scheme but this was carefully played down, and the idea of "rights" was stressed.

10. To the doctor it represents an unhappy intrusion of the state into his relationship with his patient. While under the Anderson bill, he could get no money from the program for his services, the money to pay the other bills would come directly from the Social Security System to the vendor—the person would not pay his own bills. This would involve a proliferation of local social security office and eventually a new health care agency—duplicating existing State and local ones.

ADVANTAGES OF THE VOLUNTARY APPROACH

We who supported the Mills-Kerr approach, based on need, made the following arguments:

1. Under the present old-age assistance program, we have an existing system professionally staffed to care for the needs of our elderly—including to a limited extent health needs. The Mills-Kerr approach will add responsibilities but will be no wrench to the system, and would not adopt any new method of handling payments.

2. The costs can be kept at a minimum.

a. State participation will help control it.

b. Costs would vary only with need—might actually be near their peak now. The proportion of the aged in our population is now 8.6 and it is expected to level off at 9 percent.

c. Less susceptible to political measures.

d. Full needed services available—no foot-in-the-door limitations.

3. Cost would be spread over broadest possible tax base—all Federal and State taxpayers. It is a true pay-as-you-go basis.

4. No compulsory contributions—no double burden for present wage earners.

5. Services of doctors included—no change in present patient relationship.

The chief argument against the Mills-Kerr bill was a bold falsehood—that the bill required a pauper's oath. No such thing is required. The basis for determining need is left to each State. If this is degrading then all service involving decisions by trained social service workers is degrading.

WHAT TO EXPECT

The Kerr-Mills bill is now Public Law 86-778. I sincerely doubt it will be repealed. Instead, some version of the original Forand bill will probably be superimposed on top of it, and require two parallel organizations. Eventually, under Gresham's law, the rights approach will drive the needs approach out, and we may end up with compulsory Federal health insurance, covering all needs for all people. At first, we can expect medical care just for the aged, but eventually the age limit will be gradually reduced, and finally eliminated. Simultaneously, the definition of "right" will become fuzzy and disappear. This will be the end of the present social security, and we will have federalized medicine, dentistry, hospitals, nursing homes, medical education, and drug production for all our population.

Can it be stopped? We won the battle last August, but it will be much harder this time, with the power of the Presidency behind it. I think it's worth the fight.

SENATE

THURSDAY, APRIL 6, 1961

The Senate met at 12 o'clock meridian, and was called to order by the President pro tempore.

Rev. John D. Mears, rector, Church of the Good Shepherd, Buffalo, N.Y., offered the following prayer:

O God, whose upright hand and mighty arm didst free Thy children from their bonds, to pass over dryshod amidst dangers both of sea and armed might, and who led them from a wilderness of fears to a land of hope for the brave, lead us, with Thine arms upheld upon the crossbar of sacrifice, from the wilderness of men and nations' tortured plans, to a society of the free and the brave. Thus may the signal fruits of Thy love, of ordered peace and godly quietness, be shared by free men everywhere.

And give to these, Thy servants, now seated in authority, the continual guidance of Thy holy spirit, that over all their deliberations and decisions the grandeur of Thy vision shall be seen, and Thy straightway followed. We ask these things in the name of Him who is both Spotless Lamb and Risen King, Jesus Christ, our Lord. Amen.

THE JOURNAL

On request of Mr. MANSFIELD, and by unanimous consent, the reading of the Journal of the proceedings of Monday, April 3, 1961, was dispensed with.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

LIMITATION OF DEBATE DURING MORNING HOUR

Mr. MANSFIELD. Mr. President, under the rule, there will be the usual morning hour for the transaction of routine business. I ask unanimous consent that statements in connection therewith be limited to 3 minutes.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

REPORT ON AGREEMENTS CONCLUDED UNDER AGRICULTURAL TRADE DEVELOPMENT AND ASSISTANCE ACT OF 1954

A letter from the Administrator, Foreign Agricultural Service, Department of Agriculture, transmitting, pursuant to law, a report on agreements concluded during the month of February 1961, under title I of the Agricultural Trade Development and Assistance Act of 1954 (with accompanying papers); to the Committee on Agriculture and Forestry.

REPORT ON REAPPORTIONMENT OF AN APPROPRIATION

A letter from the Acting Director, Bureau of the Budget, Executive Office of the President, reporting, pursuant to law, that the "Limitation on salaries and expenses, Office of Alien Property," for the fiscal year 1961, had been apportioned on a basis indicating a need for a supplemental estimate of appropriation; to the Committee on Appropriations.

BENEFITS FOR CERTAIN MEMBERS OF PHILIPPINE SCOUTS

A letter from the Assistant Secretary of State, transmitting, for the consideration of the Senate, a copy of a letter from the Ambassador of the Philippines, expressing his views on the desirability of amending House bill 1133, to include the members and survivors of members of the Insular Force of the U.S. Navy among those entitled to receive the benefits provided for (with an accompanying paper); to the Committee on Armed Services.

CONSTRUCTION OF CERTAIN AIR NATIONAL GUARD FACILITIES

A letter from the Assistant Secretary of Defense, Installations and Logistics, reporting, pursuant to law, on the construction of certain Air National Guard facilities at Thomas C. Imeson Airport, Jacksonville, Fla., and Foss Field, Sioux Falls, S. Dak.; to the Committee on Armed Services.

NOTICE OF PROPOSED DISPOSITION OF CERTAIN WATERFOWL FEATHERS AND DOWN

A letter from the Administrator, General Services Administration, Washington, D.C., transmitting, pursuant to law, a copy of a notice to be published in the Federal Register of a proposed disposition of approximately 2 million pounds of waterfowl feathers and down now held in the national stockpile (with an accompanying paper); to the Committee on Armed Services.

EXTENSION OF BENEFITS FOR CERTAIN VETERANS

A letter from the Administrator of Veterans' Affairs, Veterans' Administration, Washington, D.C., transmitting a draft of proposed legislation to extend the provisions for benefits based on limited periods immediately following discharge from active duty after December 31, 1956, to veterans discharged before that date (with an accompanying paper); to the Committee on Finance.

AMENDMENT OF ARTICLES OF AGREEMENT OF THE INTERNATIONAL FINANCE CORPORATION

A letter from the Secretary of the Treasury, transmitting a draft of proposed legislation to authorize acceptance of an amendment to the articles of agreement of the International Finance Corporation permitting investment in capital stock (with an accompanying paper); to the Committee on Foreign Relations:

REPORT ON REVIEW OF CERTAIN PRACTICES RELATING TO HOSPITAL AND MEDICAL CARE PROGRAMS, DISTRICT OF COLUMBIA GOVERNMENT

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of admission and collection practices relating to the hospital and medical care programs, Department of Public Health, District of Columbia Government, January 1960 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF SELECTED CONTRACTS, INTERNATIONAL COOPERATION ADMINISTRATION

A letter from the Comptroller General of the United States, transmitting, pursuant to law, a report on the review of negotiation and administration of selected construction and technical service contracts, International Cooperation Administration, Department of State, fiscal years 1958–60 (with an accompanying report); to the Committee on Government Operations.

REPORT ON REVIEW OF SELECTED OPERATIONS OF COMPENSATION AND PENSION PROGRAM, VETERANS' ADMINISTRATION

A letter from the Assistant Comptroller General of the United States, transmitting, pursuant to law, a report on the review of selected operations of the compensation and pension program, Veterans' Administration; June 1960 (with an accompanying report); to the Committee on Government Operations.

DRAINAGE CONSTRUCTION PROGRAM ON ROZA DIVISION OF YAKIMA PROJECT, WASHINGTON

A letter from the Assistant Secretary of the Interior, transmitting, pursuant to law, a draft of contract covering drainage work and minor construction required for completion of the drainage construction program on the Roza division of the Yakima project, Washington (with accompanying papers); to the Committee on Interior and Insular Affairs.

AMENDMENT OF COMMUNICATIONS ACT OF 1934, RELATING TO ISSUANCE OF RADIO OPERATOR LICENSES TO NATIONALS OF THE UNITED STATES

A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the Communications Act of 1934 to authorize the issuance of radio operator licenses to nationals of the United States (with an accompanying paper); to the Committee on Interstate and Foreign Commerce.

REPORT OF TORT CLAIMS PAID BY DEPARTMENT OF LABOR

A letter from the Secretary of Labor, transmitting, pursuant to law, a report on tort claims paid by that Department, for the year ended December 31, 1960 (with an accompanying report); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY GOVERNMENT PRINTING OFFICE

A letter from the Public Printer, U.S. Government Printing Office, Washington, D.C., transmitting, pursuant to law, a report on tort claims paid by that Office, during the fiscal year 1960 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF ADMINISTRATIVE OFFICE OF THE UNITED STATES COURTS ON BANKRUPTCY STATISTICS

A letter from the Director, Administrative Office of the United States Courts, Washington, D.C., transmitting, pursuant to law, a report on business transacted by the bankruptcy courts, during the fiscal year ended June 30, 1960 (with an accompanying report); to the Committee on the Judiciary.

REPORT OF THE AMERICAN ACADEMY OF ARTS AND LETTERS

A letter from the Assistant to the President, the American Academy of Arts and Letters, New York, N.Y., transmitting, pursuant to law, a report of that Academy, for the year 1960 (with an accompanying report); to the Committee on the Judiciary.

SUSPENSION OF DEPORTATION OF CERTAIN ALIENS

Two letters from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders suspending deportation of certain aliens, together with a statement of the facts and pertinent provisions of law pertaining to each alien, and the reasons for ordering such suspension (with accompanying papers); to the Committee on the Judiciary.

ADMISSION INTO THE UNITED STATES OF CERTAIN DEFECTOR ALIENS

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, copies of orders entered granting admission into the United States of certain defector aliens (with accompanying papers); to the Committee on the Judiciary.

STATUS OF PERMANENT RESIDENCE OF A CERTAIN ALIEN

A letter from the Commissioner, Immigration and Naturalization Service, Department of Justice, transmitting, pursuant to law, a copy of the order granting the application for permanent residence filed by Edward Zurek, together with a statement of the facts and pertinent provisions of law as to such alien, and the reasons for granting such application (with accompanying papers); to the Committee on the Judiciary.

RECOMMENDATIONS ADOPTED BY INTERNATIONAL LABOR ORGANIZATION

A letter from the Assistant Secretary of State, transmitting, pursuant to law, recommendations adopted by the International Labor Conference, at Geneva, June 1960 (with accompanying papers); to the Committee on Labor and Public Welfare.

PRESENTMENT ENTITLED "IN THE MATTER OF THE INVESTIGATION OF THE ACTIVITIES OF THE FEDERAL FOOD AND DRUG ADMINISTRATION AS THEY PERTAIN TO THE PROBLEM OF COUNTERFEIT DRUGS IN NEW JERSEY"

A letter from the clerk to the grand jury of Hudson County, Trenton, N.J., transmitting, pursuant to the order of Hon. Peter P. Artaserse, assignment judge of the superior court in Hudson County, N.J., a copy of a presentment entitled "In the Matter of the Investigation of the Activities of the Federal Food and Drug Administration as They Pertain to the Problem of Counterfeit Drugs in New Jersey" (with an accompanying paper); to the Committee on Labor and Public Welfare.

PETITIONS AND MEMORIALS

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the PRESIDENT pro tempore:

A joint resolution of the Legislature of the State of Connecticut; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION 8

"Joint resolution ratifying the proposed amendment to the Constitution of the United States relating to the granting of representation in the electoral college to the District of Columbia

"Whereas, the 86th Congress of the United States of America at its 2d session, in both Houses, by a constitutional majority of two-thirds thereof, has made the following proposition to amend the Constitution of the United States, in the following words, to wit:

"'JOINT RESOLUTION —

"'*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein)*, That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within seven years from the date of its submission by the Congress:

"' 'ARTICLE —

"' 'SECTION 1. The District constituting the seat of government of the United States shall appoint in such manner as the Congress may direct:

"' 'A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such

duties as provided by the twelfth article of amendment.

"'"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation." '; be it

"Resolved by the General Assembly of the State of Connecticut, That the said proposed amendment to the Constitution of the United States of America be and the same is hereby ratified; and be it further

"Resolved, That certified copies of this resolution shall be forwarded by the Governor of the State of Connecticut to the President of the United States, the Secretary of State of the United States, the President of the Senate, and the Speaker of the House of Respresentatives of the United States."

A joint resolution of the General Assembly of the State of Ohio; to the Committee on the Judiciary:

"JOINT RESOLUTION 22

"Joint resolution providing for ratification of the proposed amendment of the Constitution of the United States, relating to the granting of representation in the electoral college to the District of Columbia

"Whereas, both Houses of the 86th Congress of the United States of America, at the 2d session of such Congress, by a constitutional majority of two-thirds of each House thereof, made a proposition to amend the Constitution of the United States in the following words, to wit:

"'JOINT RESOLUTION —

"'*Resolved by the Senate and House of Representatives of the United States of America in Congress assembled (two-thirds of each House concurring therein),* That the following article is hereby proposed as an amendment to the Constitution of the United States, which shall be valid to all intents and purposes as part of the Constitution only if ratified by the legislatures of three-fourths of the several States within 7 years from the date of its submission by the Congress:

"'"ARTICLE —

"'"SECTION 1. The District constituting the seat of government of the United States shall appoint in such manner as the Congress may direct:

"'"A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the twelfth article of amendment.

"'"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation"'; be it

"Resolved by the General Assembly of the State of Ohio, That the said proposed amendment to the Constitution of the United States of America be, and the same is hereby ratified; and be it further

"Resolved, That the secretary of state of the State of Ohio be, and he is hereby directed, to deliver to the Governor a certified copy of this resolution and such certified copy shall be forwarded at once by the Governor to the Administrator of General Services, Washington, D.C., to the President of the Senate, and to the Speaker of the House of Representatives of the Congress of the United States.

"ROGER CLOUD,
"Speaker of the House of Representatives.
"JOHN W. DONAHEY,
"President of the Senate.
"TED W. BROWN,
"Secretary of State."

A concurrent resolution of the Legislature of the State of Michigan; to the Committee on Finance:

"SENATE CONCURRENT RESOLUTION 20

"Concurrent resolution relative to the repeal of the Federal excise tax on automobiles

"Whereas the automotive industry has experienced a serious sales depression, which has created a grave situation of consequent curtailment of production, unemployment, economic hardship and exploding demands on tax-supported public services. It has been disruptive of Michigan's and the Nation's economy; and

"Whereas repeal of the Federal excise tax on automobiles is urgently needed to reverse these trends and regain State and National prosperity: Now, therefore, be it

"Resolved by the senate (the house of representatives concurring), That the Michigan Legislature respectfully requests the Congress of the United States to effect public hearings by the U.S. House of Representatives on the proposition of the repeal of the Federal excise tax on automobiles; and be it further

"Resolved, That copies of this resolution be transmitted to the President of the United States, the President of the Senate, and the Speaker of the House of Representatives, and to each Member of the Michigan delegation to the U.S. Senate and the House of Representatives.

"Adopted by the senate, March 15, 1961.

"FRED I. CHASE,
"Secretary of the Senate.

"Adopted by the house, March 23, 1961.

"NORMAN E. PHILLEO,
"Clerk of the House of Representatives."

A resolution of the House of Representatives of the State of Michigan; to the Committee on Finance:

"HOUSE RESOLUTION 25

"Resolution memorializing the Congress of the United States to enact legislation which will convert from loans to grants the moneys advanced to the several States for payment of temporary unemployment compensation

"Whereas severe unemployment in Michigan over the past several years has resulted from a general weakness in the national economy which is beyond the control of Michigan or any other State to deal with effectively; and

"Whereas such severe unemployment in the recession of 1958 resulted in benefit expenditures of $323 million, an amount greater than had ever been experienced before and which threatens to exhaust the fund; and

"Whereas this required an advance of $113 million, which advance is repayable to the Federal Government, either from the moneys in the Michigan Unemployment Compensation Fund or by a reduction in the offset granted to employers against their liabilities under the Federal Unemployment Tax Act; and

"Whereas such reduction in the Federal tax offset will become effective January 1963 on 1962 payrolls if the advance obtained in 1958 is not fully repaid; and

"Whereas the Congress of the United States, by Public Law 441 of the 85th Congress, authorized the advance of Federal funds to the several States for the purpose of paying temporary unemployment compensation to covered workers who had exhausted their entitlement under State laws; and

"Whereas the Michigan Employment Security Commission, and 17 other States, entered into an agreement with the Federal Government for the purpose of paying temporary unemployment compensation; and

"Whereas pursuant to such agreement Michigan paid in excess of $76 million in TUC to more than 200,000 unemployed workers from June 1958 through July 1959, which funds are repayable to the Federal Government starting January 1964 on 1963 taxable payrolls; and

"Whereas contribution rates of Michigan employers currently average in excess of 3 percent of taxable payroll (and is expected to go higher in the next few years) and are as high as 4.5 percent of taxable payroll, much higher than the maximum payable in most other States; and

"Whereas as a result of the operation of the repayment provisions governing both the advance obtained in 1958 and the moneys received to pay temporary unemployment compensation will result in a maximum tax rate in excess of 6 percent on some Michigan employers by January 1967; and

"Whereas such contribution rates put Michigan employers in a disadvantageous position wih respect to employers in other States and discourage necessary expansion of industry within the State; and

"Whereas the January 31, 1961, balance of the Michigan unemployment compensation fund was approximately $200 million and the obligations to the Federal Government total approximately $190 million, consisting of $113 million loan and the $76 million TUC advance; and

"Whereas the current rate of expenditures is in excess of the current rate of income to the Michigan unemployment compensation fund (even with a tax rate in excess of 3 percent), thereby making it impossible to repay the Federal obligation from the fund and maintain funds with which to pay benefits: Now, therefore, be it

"Resolved by the house of representatives, That the members of the Michigan Legislature respectfully request the Congress of the United States to enact legislation which will convert the moneys advanced to the several States for payment of temporary unemployment compensation from loans to grants; and be it further

"Resolved, That a copy of this resolution be transmitted to the President of the United States, the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to each member of the Michigan delegation in the U.S. Senate and House of Representatives.

"Adopted by the House March 16, 1961.

"NORMAN C. PHILLES,
"Clerk of the House of Representatives."

A resolution of the General Assembly of the State of Rhode Island; to the Committee on the Judiciary:

"RESOLUTION A

"Resolution ratifying the proposed amendment to the Constitution of the United States relating to granting representation in the electoral college to the District of Columbia

"Whereas the House of Representatives of the United States and the U.S. Senate, by the constitutional vote of two-thirds of each House concurring therein, did enact at the 2d session of the 86th Congress of the United States of America in 1960, a proposed amendment of the Constitution of the United States; and

"Whereas said proposed amendment was submitted to the States for ratification upon June 21, 1960, and said proposed amendment to the Constitution of the United States of America is in the following words, to wit:

"'ARTICLE —

"'SECTION 1. The District constituting the seat of government of the United States shall

appoint in such manner as the Congress may direct:

"'A number of electors of President and Vice President equal to the whole number of Senators and Representatives in Congress to which the District would be entitled if it were a State, but in no event more than the least populous State; they shall be in addition to those appointed by the States, but they shall be considered, for the purposes of the election of President and Vice President, to be electors appointed by a State; and they shall meet in the District and perform such duties as provided by the 12th article of amendment.

"'SEC. 2. The Congress shall have power to enforce this article by appropriate legislation': Now, therefore, be it

"Resolved, That the General Assembly of the State of Rhode Island and Providence Plantations does hereby ratify the above proposed amendment to the Constitution of the United States of America; and be it further

"Resolved, That certified copies of this resolution be immediately transferred by the secretary of state of the State of Rhode Island and Providence Plantations to the President of the United States, the President of the Senate of the United States, the Speaker of the House of Representatives of the United States, and the Administrator of General Services of the United States."

A concurrent resolution of the Legislature of the State of Hawaii; to the Committee on Labor and Public Welfare:

"CONCURRENT RESOLUTION 25

"Whereas millions of veterans of World War II and of the Korean conflict have been trained and educated under the provisions of the veterans educational program established by the Federal Government; and

"Whereas the education of said veterans has contributed to an increase in the educational level of this Nation and has produced a major national asset which has contributed much to the economy and strength of this Nation; and

"Whereas reliable statistics have proved that increased income to veterans arising out of their higher educational level will more than reimburse the Treasury of the entire cost of the GI training program by 1970; and

"Whereas the President of the United States, by Executive order on January 31, 1955, stopped the educational benefits for persons serving in the Armed Forces of the United States, after February 1, 1955; and

"Whereas such Executive order has deprived millions of Americans, including 13,000 citizens of Hawaii serving in the Armed Forces, of the educational benefits previously extended to veterans; and

"Whereas it is believed that as long as the draft is continued that all persons serving in the Armed Forces should be extended the educational opportunities enjoyed by veterans serving prior to February 1, 1955: Now, therefore, be it

"Resolved by the Senate of the First Legislature of the State of Hawaii, general session of 1961 (the house of representatives concurring), That the Congress of the United States be and is hereby requested to extend GI educational benefits to all veterans who entered, or who enter, military services from and after February 1, 1955, and that such educational benefits be extended so long as the provisions of the draft law exists; and be it further

"Resolved, That authenticated copies of this concurrent resolution be forwarded to the President of the Senate and the Speaker of the House of Representatives of the Congress of the United States, and to each Member of the Congress from the State of Hawaii."

Two joint resolutions of the Legislature of the State of California; to the Committee on Banking and Currency:

"SENATE JOINT RESOLUTION 8

"Joint resolution relative to the price of gold

"Whereas the State of California is cognizant of the current national crisis in the amount of gold reserves; and

"Whereas an increase in our national gold reserve would alleviate this situation and provide sound stability to our economy; and

"Whereas the State of California, since the gold rush days of 1849, has been highly interested in the gold mining industry; and

"Whereas practically all gold mines in this Nation have been closed due to increased costs of operation and the low price of gold; and

"Whereas the gold mining industry has been so severely depressed in this and other States with heavy losses being sustained by persons in the industry that it has almost been suppressed; and

"Whereas the State of California contains extensive land areas from which gold could profitably be extracted in the event of a gold price increase: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California (jointly), That it is the sense of the legislature that the following program should be adopted by the United States:

"1. A Treasury grant should be provided in the sum of $45 per ounce of newly mined domestic gold. This should be in addition to the present price of $35, thereby making a total price of $80.

"2. The Treasury grant price of $45 should apply for a minimum term of 14 years with right of extension for special development.

"3. To aid in early maximum production of gold without hindrance during the current gold crisis, all restrictions on mining on all Government lands should be removed, including the restrictions in connection with power and military withdrawals (excepting those lands in withdrawn areas actually in use) and the general mining law of 1872 should again become applicable.

"4. To further aid in an early resumption of gold mining, an examining board should be set up by Congress to assess the amount of damage and order payment to those mines that were closed by War Production Board Limiting Order No. L–208.

"5. A short term of 7 years should be allowed for amortization during this crisis period.

"6. An additional depletion allowance should be provided for deep mines to compensate for increased cost of operation. The amount should be 5 percent for mines requiring hoisting or pumping 200–300 feet deep, 10 percent for mines 1,000 feet deep, and 15 percent for deeper mines.

"7. The gold so produced should be only newly mined domestic gold with supporting affidavits to verify. Violation should carry heavy penalties; and be it further

"Resolved, That the Legislature of the State of California respectfully urges Congress to enact the above program into law; and be it further

"Resolved, That the Secretary of the senate is hereby directed to transmit a copy of this resolution to the Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

"ASSEMBLY JOINT RESOLUTION 20

"Joint resolution relative to the enactment of Federal laws regarding gold

"Whereas the existing reserves of gold of this Nation are not adequate to meet our obligations to other nations of the world; and

"Whereas the present Federal laws regarding gold have made it economically impossible for the gold mines of this country to continue to operate; and

"Whereas immediate action by the Federal Government is necessary to solve the crisis in gold: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of California, jointly, That the Legislature of the State of California respectfully memorializes the President and the Congress of the United States to enact the following legislation:

"1. A law to require that gold be treated as a commodity;

"2. A law to require the Secretary of the Treasury to purchase newly mined domestic gold at a rate of $105 per fine ounce and to require that such gold be stocked by the U.S. Treasury as backing for domestic currency;

"3. A law prohibiting withdrawals of gold from the U.S. Treasury for foreign aid, the international bank, or foreign commercial use until such time as gold sufficient to back deficit U.S. commitments has been accumulated by the Treasury;

"4. A law permitting citizens of the United States to own gold and renewing the Federal coinage of gold; and be it further

"Resolved, That the chief clerk of the assembly is directed to prepare and transmit copies of this resolution to the President and Vice President of the United States, the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on Foreign Relations:

"ASSEMBLY JOINT RESOLUTION 14

"Joint resolution relative to international traffic in narcotics

"Whereas it has been reliably estimated that over 70 percent of the heroin that reaches our State is derived from opium poppy fields in Mexico; and

"Whereas it has been reliably estimated that over 90 percent of the marihuana found in this State is illegally smuggled across the border from Mexico; and

"Whereas the enforcement problem at the border is aggravated by the large amount of traffic that crosses the border, the annual traffic across the United States-Mexico border having been as high as in excess of 6 million vehicles and nearly 18 million passengers and in excess of 5 million pedestrians; and

"Whereas the control of the smuggling of narcotics and the negotiating of cooperative agreements with friendly nations to eliminate the source of narcotics is a Federal responsibility; and

"Whereas one of the acknowledged requirements for the solution of narcotics problems is drying up the source of narcotics; and

"Whereas measures which would require closer surveillance of traffic across the border would also aid enforcement of the narcotics laws, and such measures can effectively be taken only by the Government of the United States: Now, therefore, be it

"Resolved by the Assembly and Senate of the State of California (jointly), That the Legislature of the State of California respectfully memorializes the President of the United States and the Congress of the United States to consider the negotiation and adoption of treaties with the purpose of controlling more effectively the import, export, manufacture, and use of heroin and marihuana, as between Mexico and the United States, with particular reference to California, and to consider the enactment of legislation, including, but not limited to, legislation requiring visas or identification and

legislation improving the surveillance of border traffic, in order that law enforcement authorities can better cope with the narcotics problem, and to consider the appropriation of greater sums of money for patrol of the border; and be it further

"Resolved, That the chief clerk of the assembly be hereby directed to transmit copies of this resolution to the President and Vice President of the United States, to the Speaker of the House of Representatives, and to each Senator and Representative from California in the Congress of the United States."

A joint resolution of the Legislature of the State of California; to the Committee on the Judiciary:

"SENATE JOINT RESOLUTION 30

"Joint resolution relating to the centennial of modern California viticulture

"Whereas the Legislature of California on April 1, 1861, enacted a joint resolution requesting the then Gov. John G. Downey to appoint a commission to consider ways and means best adapted to promote the improvement and culture of the grapevine in California; and

"Whereas this farsighted action resulted in the appointment of Col. Agoston Haraszthy to the commission and his subsequent voyage to Europe, a mission from which he returned with more than 100,000 cuttings of about 300 varieties of grapes, all choice wine types; and

"Whereas the foresight and initiative exhibited by Colonel Haraszthy was typical of the man, who also was among the first to advocate a State college of agriculture and who developed, at his Buena Vista ranch at Sonoma, one of the world's finest wineries which still is in existence; and

"Whereas the grape cuttings he supplied led to an increase in vineyard acreage in California from an estimated 7,000 acres in 1860 to more than 450,000 acres at present, to the end that Colonel Haraszthy was recognized as the father of modern California viticulture and this State is now the wine land of America; and

"Whereas, grapes and winegrowing constitute the State's leading fruit industry, with vineyards and winery property worth over $650 million, an annual return to farmers of $140 million, an annual grape crop of 2¾ million tons and an annual gross wine production of 160 million gallons; and

"Whereas the quality of the wine produced from descendants of the vines brought to California 100 years ago has become so widely and favorably known that this State now grows 85 percent of all wine produced and consumed in America; and

"Whereas Saturday, April 1, 1961, will mark the centennial of the legislative act which was instrumental in bringing about this result: Now, therefore, be it

"Resolved by the Senate and Assembly of the State of California (jointly), That the Legislature of the State of California does hereby urge the State's residents to join in honoring the memory of the pioneer California lawmakers responsible for this fruitful contribution to the State's economy and the welfare of its citizens, and to join in honoring the memory of Col. Agoston Haraszthy as the father of modern California viticulture; and be it further

"Resolved, That Saturday, April 1, 1961, be observed with appropriate ceremony as the centennial of modern California viticulture; and be it further

"Resolved, That the Congress of the United States is hereby respectfully requested to join the State of California in recognition of this historic event; and be it further

"Resolved, That the secretary of the senate is hereby directed to transmit copies of this resolution to the President and the Vice President of the United States, the Speaker of the House of Representatives, to each Senator and Representative from California in the Congress of the United States, and to the Governor of the State of California; two suitably prepared copies to the Wine Institute; and a suitably prepared copy to the owner of Buena Vista Vineyards, Sonoma, Calif."

A resolution of the Senate of the State of Alaska; to the Committee on Interior and Insular Affairs:

"SENATE RESOLUTION 23

"Resolution relating to the act of Congress of January 21, 1929, granting 100,000 acres of land for the support and maintenance of the University of Alaska

"Whereas the Congress of the United States by act of January 21, 1929 (48 USCA 354a) did grant to the Territory of Alaska 100,000 acres of land for the support and maintenance of the Alaska Agricultural College and School of Mines and did confirm said grant to the State of Alaska by the Alaska Statehood Act of July 3, 1958; and

"Whereas the Legislature of the Territory of Alaska by chapter 34, S.L.A. 1929, did accept the grant of lands and designate the board of trustees of the Alaska Agricultural College and School of Mines to select the lands granted and to sell or lease the same and cover the proceeds into the territorial treasury, which said designation was confirmed to the board of regents of the University of Alaska as successor to the board of trustees of the Alaska Agricultural College by chapter 49, S.L.A. 1935; and

"Whereas the restrictions contained in the original grant by the United States to the territory are still in full force and effect and severe in nature, providing that proceeds of sale or lease of lands must be placed in a special fund in the State treasury and invested by the State and further providing that only the income and not the principal from the invested funds shall be made available for the support and maintenance of the University of Alaska, and further providing that said income shall not be applied directly or indirectly under any pretense whatever to the purchase, erection, preservation or repair of any building or buildings; and

"Whereas the board of regents of the university is the proper agency of the State government to determine the investment or use of the proceeds from the sale or lease of the lands granted by the act of January 21, 1929, for the benefit of the university; be it

"Resolved by the senate in second legislature, first session assembled, That the U.S. Congress is respectfully urged to amend the act of January 21, 1929, 48 USCA 354(a), to provide that the proceeds from the sale or lease of lands granted thereunder be invested or used by the board of regents of the University of Alaska in whatever manner it deems to be for the best interests of the university; and be it further

"Resolved, That copies of this resolution be sent to the Honorable John F. Kennedy, President of the United States; the Honorable Lyndon B. Johnson, President of the Senate; the Honorable Sam Rayburn, Speaker of the House of Representatives; the chairman of the Interior and Insular Affairs Committee of the House of Representatives; the Honorable E. L. Bartlett and the Honorable Ernest Gruening, Senators from Alaska; and to the Honorable Ralph J. Rivers, Representative from Alaska, urging all said persons to support legislation carrying out the intent of this resolution.

"Passed by the senate March 14, 1961.

"_____,
"President of the Senate.

"Attest:

"EVELYN K. STEVENSON,
"Secretary of the Senate."

A resolution of the House of Representatives of the State of Alaska; to the Committee on Interior and Insular Affairs:

"HOUSE RESOLUTION 28

"Resolution relating to the act of Congress of January 21, 1929, granting 100,000 acres of land for the support and maintenance of the University of Alaska

"Whereas the Congress of the United States by act of January 21, 1929 (48 USCA 354(a)) did grant to the Territory of Alaska 100,000 acres of land for the support and maintenance of the Alaska Agricultural College and School of Mines and did confirm said grant to the State of Alaska by the Alaska Statehood Act of July 3, 1958; and

"Whereas the Legislature of the Territory of Alaska by chapter 34, S.L.A. 1929, did accept the grant of lands and designate the board of trustees of the Alaska Agricultural College and School of Mines to select the lands granted and to sell or lease the same and cover the proceeds into the territorial treasury, which said designation was confirmed to the board of regents of the University of Alaska as successor to the board of trustees of the Alaska Agricultural College by chapter 49, S.L.A. 1935; and

"Whereas the restrictions contained in the original grant by the United States to the territory are still in full force and effect and severe in nature, providing that proceeds of sale or lease of lands must be placed in a special fund in the State treasury and invested by the State and further providing that only the income and not the principal from the invested funds shall be made available for the support and maintenance of the University of Alaska, and further providing that said income shall not be applied directly or indirectly under any pretense whatever to the purchase, erection, preservation, or repair of any building or buildings; and

A resolution adopted by the Minnesota chapter of the Retired Officers Association, favoring the enactment of legislation relating to retired pay of military personnel; to the Committee on Armed Services.

A resolution adopted by the Oregon State Board of Forestry, Salem, Oreg., protesting against the enactment of Senate bill 174, the National Wilderness Preservation System,

until a report of the Outdoor Recreation Review Commission; to the Committee on Interior and Insular Affairs.

By Mr. JAVITS:

A concurrent resolution of the Legislature of the State of New York:

"RESOLUTION 31

"Concurrent resolution of the Legislature of the State of New York memorializing the President and Congress of the United States, to provide adequate funds to the U.S. Army Corps of Engineers for necessary surveys and plans for, and to initiate the construction of, a deepwater canal linking Lakes Erie and Ontario

"Whereas the United States has assumed an obligation with its good neighbor, the Government of Canada, to contribute its full share toward the successful operation of the St. Lawrence Seaway-Great Lakes shipping route; and

"Whereas the only existing navigable facility connecting Lakes Erie and Ontario is the Welland Canal which has been sorely pressed to meet the increasing demands of shipping; and

"Whereas the construction of an alternate ship canal would make a major contribution to the security of the United States as well as Canada, because:

"1. In the event of breakdown or destruction of the existing Welland Canal, the commerce of the entire Great Lakes area of the United States and Canada west of Lake Ontario would be denied access by water transportation to the St. Lawrence Seaway and international shipping lanes;

"2. It would provide a more secure inland route for the movement of iron ore in the event of war;

"3. It would ease the strain on congested rail facilities and east coast ports in the time of emergency; and

"4. It would allow the construction and repair of oceangoing vessels in the more secure areas of the Great Lakes; and

"Whereas the construction of the canal would contribute greatly to the prosperity of commerce, industry, and agriculture, not only in those States bordering the Great Lakes, but throughout the entire Nation; and

"Whereas the commerce of the lake ports of New York State—Buffalo, Rochester, Oswego, and Ogdensburg—would be increased by the benefits accruing to the St. Lawrence Seaway-Great Lakes shipping route; and

"Whereas the construction of the canal would stabilize employment, provide job security and expand job opportunities: Now, therefore, be it

"*Resolved* (*if the assembly concur*), That the Legislature of the State of New York hereby respectfully memorializes the President and Congress of the United States immediately to provide adequate funds to the U.S. Army Corps of Engineers for the necessary surveys and plans for, and to initiate the construction of, the canal, as aforesaid; and be it further

"*Resolved* (*if the assembly concurs*), That copies of this resolution be transmitted to the President of the United States, to the President of the Senate and the Speaker of the House of Representatives of the U.S. Congress and to each Member thereof from the State of New York, to the Governor of the State of New York, to the commissioner of commerce of the State of New York, to the chairmen of the port authorities of Buffalo, Rochester, Oswego, and Ogdensburg, and to the Governors and State legislative leaders of the States of Pennsylvania, Ohio, Michigan, Indiana, Illinois, Wisconsin, and Minnesota.

"By order of the senate:

"WILLIAM S. KING,
"*Acting Secretary.*

"By order of the assembly:

"ANSLEY B. BORKOWSKI,
"*Clerk.*"

TRIBUTE TO LATE SENATOR RICHARD NEUBERGER, OF OREGON—CONCURRENT RESOLUTION OF OREGON LEGISLATURE

Mr. MORSE. Mr. President, on a recent date the Oregon Legislature passed Senate Concurrent Resolution 11. It is a very moving tribute to my late colleague in the Senate, Senator Richard Neuberger.

I have been honored by being asked, on the part of the legislature, to insert this tribute to the late Senator Neuberger in the CONGRESSIONAL RECORD. It is a great privilege for me to do so, and I ask unanimous consent that the memorial resolution to the late Senator Neuberger be printed at this point in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SENATE CONCURRENT RESOLUTION 11

Whereas Senator Richard Neuberger, an illustrious former member of the Oregon House of Representatives and Oregon Senate, died March 9, 1960, after a brilliant journalistic and political career; and

Whereas Senator Neuberger, after his service in the Oregon Legislature, was elected U.S. Senator from Oregon, and served with great honor and distinction in that honored body; and

Whereas Senator Neuberger, in addition to being an inspiring leader and builder within the ranks of his own party, was a respected representative to the U.S. Senate of all the people of his State, regardless of political belief; and

Whereas Senator Neuberger was a recognized authority and legislative leader in such diverse fields as conservation, natural resources, water power, election laws, social legislation, and civil rights; and

Whereas Senator Neuberger brought great honor and attention to his community and the whole Northwest by his articles extolling the virtues of his native State: Now, therefore, be it

Resolved by the Senate of the State of Oregon (*the House of Representatives concurring*):

(1) The 51st legislative assembly by this resolution does express great shock and grief at the passing of Senator Richard Neuberger; and

(2) Directs that this expression of regret and sympathy be sent by the clerk of the senate to his widow, now U.S. Senator, MAURINE NEUBERGER; to his parents, Mr. and Mrs. Isaac Neuberger; to his sister, Mrs. James Goodsell; to the President of the U.S. Senate; and to all members of the Oregon delegation, with a request that it be entered in the CONGRESSIONAL RECORD as a tribute to him.

The PRESIDENT pro tempore laid before the Senate a concurrent resolution of the Legislature of the State of Oregon, identical with the foregoing, which was ordered to lie on the table.

CONCURRENT RESOLUTION OF KANSAS LEGISLATURE

Mr. CARLSON. Mr. President, the Kansas Legislature adopted a concurrent resolution memorializing the U.S. Congress to give immediate attention to granting a substantial increase in sugarbeet acreage allotments.

Kansas has a history of growing and refining sugarbeets for more than 50 years. Its soil and climatic conditions and abundant supply of irrigation water make our State an ideal place for growing sugarbeets.

Last week those of us interested in securing sugarbeet acreage for the Middle West failed to secure the adoption of the Anderson amendment, which would have given us additional acreage.

In the adoption of the conference report between the House and Senate, extending the Sugar Act for 1951 for 15 months, there is an understanding that the House and Senate will hold early hearings on a new sugar act, and I am hopeful that the Congress will in the next bill give our State and other Midwestern States additional sugar acreage.

I ask unanimous consent that Concurrent Resolution 14 be printed in the RECORD.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

SENATE CONCURRENT RESOLUTION 14

Concurrent resolution memorializing the U.S. Congress to give immediate attention to granting a substantial increase in sugarbeet acreage allotments

Whereas the U.S. Congress will this year be considering revision of the 1948 Sugar Act; and

Whereas greater domestic supplies of sugar are needed in the interest of the national defense of the United States; and

Whereas the State of Kansas has a history of growing and refining sugarbeets for more than 50 years; and

Whereas an increase in sugarbeet acreage allotments will be of great benefit to the people and economy of the United States and the State of Kansas: Now, therefore, be it

Resolved by the Senate of the State of Kansas (*the House of Representatives concurring therein*): That the Kansas Legislature respectfully urges the Congress of the United States to give immediate attention to the matter of granting a substantial permanen increase in national sugarbeet acreage allotments, and that the State of Kansas should receive a fair and equitable share of such increase; and be it further

Resolved, That the secretary of state is directed to transmit enrolled copies of this resolution to the President of the U.S. Senate, and the Speaker of the U.S. House of Representatives, the chairmen and members of the U.S. Senate and House Agriculture Committees, and to each of the Members of the Kansas congressional delegation.

Mr. SCHOEPPEL submitted a concurrent resolution of the Legislature of the State of Kansas, identical with the foregoing, which was referred to the Committee on Finance.

The PRESIDENT pro tempore also laid before the Senate a concurrent resolution of the Legislature of the State of Kansas, identical with the foregoing, which was referred to the Committee on Finance.

RESOLUTION OF TOWN BOARD OF UNION, N.Y.

Mr. JAVITS. Mr. President. I ask unanimous consent to have printed in the RECORD a resolution adopted by the Town Board of Union, N.Y., relating to the construction of a sewer system.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

Whereas the town of Union has heretofore established the following sewer districts, to wit:

(1) The Endwell Sewer District,

(2) The West Corners Sewer District, and

(3) The Nortn Endicott Sewer District and

Whereas it is proposed to construct a sewage disposal plant to serve said Endwell Sewer District, the location of said sewage disposal site to be in the town of Vestal, Broome County, N. Y., and to be constructed and operated in such a manner as to serve not only the Endwell Sewer District of the town of Union, but also sewer district No. 4 of the town of Vestal, on a contractual basis, each to contribute its proportionate share of the cost of construction and maintenance; and

Whereas it is proposed to construct sewer lines in the said West Corners and North Endicott Sewer Districts and connect the same with the village of Endicott sewer system and share the cost thereof on a contractual basis with said village of Endicott; and

Whereas the costs of said sewer systems are excessive and will constitute an undue burden on the taxpayers in the respective sewer districts above mentioned; and

Whereas the President of the United States has stated in a message to Congress in February 1961, that the matter of pollution of the public waters are of great concern to the Federal Government and has requested the Congress to appropriate sufficient funds to assist the local governments to defray the expenses of constructing sewage disposal plants to preserve the water resources of the country; and

Whereas Representative BLATNIK has introduced H.R. 4036 and Senator HUMPHREY (for himself and Mr. MCCARTHY, Mr. MOSS, Mrs. NEUBERGER, Mr. CLARK, Mr. LONG, Mr. MORSE, Mr. WILLIAMS, and Mr. PELL) has introduced S. 861, to provide for increasing the Federal grants to municipalities from a limit of $250,000 to a limit of $600,000, and to further provide that "in the case of a project which will serve more than one municipality (A) the Commissioner shall, on such basis as he determines to be reasonable and equitable, allocate to each municipality to be served by such project its share of the estimated reasonable cost of such project, shall then apply the foregoing limitations in this clause to each such share as if it were a separate project to determine the maximum amount of any grant which may be made under this section with respect to such project and (B) for the purposes of the limitation in the last sentence of subsection (d), the share of each municipality so determined shall be regarded as a grant for the construction of treatment works." and

Whereas it is the opinion of this town board that the passage of the foregoing legislation is of vital importance to the taxpayers of said Endwell, West Corners and North Endicott Sewer Districts: Therefore be it

Resolved, That this town board request Senators JAVITS and KEATING and Representative ROBINSON, to support the foregoing legislation, to the end that the taxpayers of said sewer districts in the town of Union, may be assisted in bearing the excessive costs of constructing and furnishing sewage disposal for said areas of the said town of Union; and be it further

Resolved, That the town clerk be and he hereby is directed to forward duly certified copies of this resolution to Senators JAVITS and KEATING, to Representative ROBINSON, and to Senators HUMPHREY, MCCARTHY, MOSS, NEUBERGER, CLARK, LONG, MORSE, WILLIAMS and PELL and Congressman BLATNIK; also to the Department of Public Works of the State of New York and to the Water Pollution Control Board of the State of New York.

RESOLUTION OF TOWN BOARD OF VESTAL, N.Y.

Mr. JAVITS. Mr. President, I ask unanimous consent to have printed in the RECORD two resolutions adopted by the Town Board of Vestal, N.Y., relative to the construction of a sewage treatment plant.

There being no objection, the resolutions were ordered to be printed in the RECORD, as follows:

Whereas the town of Vestal has previously hereto undertaken the construction of a sewage treatment plant to serve sewer district No. 1 in the town of Vestal; and

Whereas the town of Vestal is currently studying the feasibility of the construction of an additional sewage treatment plant to serve sewer district No. 4 in the town of Vestal; and

Whereas the study for sewer district No. 4 includes the possibility of a single sewage treatment plant to serve sewer district No. 4 and Endwell Sewer District of the town of Union; and

Whereas this board has familiarized itself with the costs of sewage treatment plants and the costs of construction and operation of sewage treatment plants to serve the needs of the citizens of the town of Vestal; and

Whereas to the knowledge of this board it appears that the costs of construction and operation of sewage treatment plants to serve the citizens of this town are such as to create a substantial additional tax burden upon its citizens; and

Whereas the pollution abatement program for the Susquehanna River is of benefit to numerous communities and municipalities in addition to the town of Vestal; and

Whereas the Federal Government has an existing program for aid to local municipalities for construction of sewage treatment plants; and

Whereas this board has given due and proper consideration to all of the relevant facts and circumstances appertaining to the construction of sewage treatment plants; and

Whereas this program of pollution abatement of streams and rivers is a desirable and commendable program and to the benefit of the citizens and industries of this town as well as other communities and municipalities; and

Whereas the State and Federal Governments have for the most part preempted the sources of revenues that are or might be available to local municipalities; and

Whereas this board considers it to be in the public interest to continue its program so as to effect complete compliance with the orders and directions of the water pollution control board and the department of health within the near and foreseeable future: Now, therefore, upon motion of William W. Castle, justice of the peace, seconded by D. Bernard Pierson, councilman, be it

Resolved, That the town of Vestal record by resolution in the minutes of this meeting that it recommend to Hon. Howard Robison, Member of Congress, from this congressional district, and Hon. Jacob Javits and Hon. Kenneth Keating, Senators from this State, as well as Hon. George Ingalls, State assemblyman from this State assembly district and Hon. Warren M. Anderson, State senator from this senatorial district, the early enactment of legislation at both the State and Federal levels for the participation by the State and/or Federal Governments in a program of increased aid to local municipalities for the construction of sewage treatment plants and for the payment of the operating costs thereof and for debt reduction incurred in connection therewith; and be it further

Resolved, That this board recommend to the aforesaid members of the legislative bodies hereinbefore referred to, the early enactment by the State and/or Federal Governments of a program of Federal and/or State aid which will recognize and aid two or more municipalities that combine for the construction of a single sewage treatment plant to serve their combined needs by permitting such projects that serve more than one municipality to receive a grant equal to the pro rata total of each project's allowable grant; and be it further

Resolved, That this resolution shall take effect immediately and that the town clerk shall be authorized, empowered and directed to furnish certified copies thereof to the State and Federal legislators hereinbefore named and set forth.

VESTAL-UNION SEWAGE TREATMENT PLANT

Whereas previously hereto the town of Union on behalf of Endwell Sewer District and town of Vestal on behalf of sewer district No. 4 have held joint conferences and made various studies concerning the proposition of constructing a sewage treatment plant in the town of Vestal to serve both municipalities; and

Whereas the town board has received and studied the Wegman report relating to the joint project and has received and studied a copy of the so-called Blatnik bill presently pending before the Congress; and

Whereas the town board has received assurances that the Blatnik bill will in all probability receive favorable action within the next few months and during the present session of the Congress; and

Whereas, the town board has given careful study and consideration to all of the relevant facts and circumstances pertaining to this matter, including the feasibility of constructing a plant to serve only sewer district No. 4, town of Vestal: Now, therefore, be it

Resolved, That the Town Board of the Town of Vestal record in its official proceedings the following declaration of its policy with relation thereto:

(1) That based upon the Wegman report and the assumption of favorable action and passage of the Blatnik bill by the Congress within the next few months and at the current session thereof, the town of Vestal finds that it would be in the best interest to join with the town of Union for the construction of a sewage treatment plant in Vestal, N.Y., to serve both Endwell Sewer District and sewer district No. 4, town of Vestal;

(2) That the town of Union should construct the improvement and that the town of Vestal enter into a long-term contract for the use thereof at a rate for its proportional use not in excess of the rate paid by the town of Union for its proportional use;

(3) That the town board will recommend the abatement of all real estate taxes upon the improvement to be assessed by the town of Vestal and Vestal Central School District;

(4) That the town of Vestal reserves the right after August 1, 1961, if this project for the construction of a joint facility is not consummated prior to that time, or if there is a change in circumstances, to proceed with the design and construction of its own sewage treatment plant on its site in Vestal in accordance with the preliminary plans therefor already filed with the New York Department of Health for sewer district No. 4, town of Vestal; and be it further

Resolved, That the town clerk be authorized, empowered, and directed to forward certified copies of this resolution to persons and agencies as directed by the supervisor; and be it further

Resolved, That this resolution shall take effect immediately.

RESOLUTION OF KANSAS RETAIL JEWELERS ASSOCIATION

Mr. CARLSON. Mr. President, the Kansas Retail Jewelers Association at its annual meeting in Wichita, Kans., on March 18 and 19 adopted a resolution in regard to the Federal excise tax now imposed on jewelry.

There is no doubt but what this is a burdensome tax and I am hopeful that when the extension of excise taxes is before the Senate for consideration, that this is one excise tax that will receive most thorough consideration.

I ask unanimous consent that the resolution be printed in the RECORD, and referred to the Senate Finance Committee.

There being no objection, the resolution was referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

To the Honorable U.S. Congress, Washington, D.C.:

Whereas the 180 members of the Kansas Retail Jewelers Association request that the Federal excise tax on jewelry be transferred from the retail to the manufacturer's level in order that they may eliminate the unfair competition and discrimination against the products they must sell to sustain a livelihood.

Whereas there is a definite relationship between those taxed products which the jeweler sells, competing with other items sold as gifts in substantial quantities which are untaxed, and taxed at the manufacturer's level. These items, therefore, discriminate against the jeweler. This tax acts as a deterrent to sales. The effect of the increase of the cost of the taxed article to the consumer, acts as a brake on sales. This was, in fact, the original purpose of the tax. That is, it was intended to cut down the sales of certain items in a wartime economy. The need to curtail sales has long passed—the present need is for more production and consumption to fit the needs and to expand our economy. This tax acts in exactly the opposite way.

This tax is difficult and costly to administer. Not only is a hardship placed upon the small retail jeweler who ordinarily does not have a complete accounting department to calculate, collect, and remit this tax on behalf of the Government; but it is extremely costly for the Government to administer this tax since there are so many outlets from which this tax must be collected. Manufacturers ordinarily have complete bookkeeping departments to calculate, collect, and remit. Therefore, transferring this tax to the manufacturer's level would not only grant relief to the small jeweler, but would also simplify collection on the Government's behalf because of the relatively small number of retailers and so-called wholesale retailers from which this tax is collected. Therefore, this would not only reduce the costs substantially, by saving the Government money administering the tax, but would plug many loopholes on the literally thousands of items where the tax status is doubtful, and the collection of the tax often has led to arbitrary practices. This would also increase revenues by plugging the loopholes in tax collection by taxing the articles at its source—the manufacturer's level—thereby eliminating many items sold through certain outlets, etc., on which the tax is overlooked: Now, therefore, be it

Resolved, That the Kansas Retail Jewelers Association and its 180 members respectfully request and urge the honorable Congress of the United States of America to take immediate action toward transferring this 10 percent Federal excise tax on jewelry at the retail level to a 10 percent Federal excise tax at the manufacturer's level thereby—

1. Eliminating unfair and discriminatory competition.

2. Removing sales deterrents placed in wartime for the duration and 6 months, to discourage sales of jewelry; thus fulfilling a need for more production by encouraging consumption, providing a much-needed expansion and employment in our economy.

3. Lowering administrative costs to the Government giving needed savings of tax dollars.

4. Removing loopholes to increase revenues by taxing the article at its source.

5. Relieving the hardships placed on the small businessman by removing from him the responsibility of calculating, collecting, and remitting this burdensome tax.

Respectfully submitted.

CHARLES ELLIOTT,
Secretary.

RESOLUTIONS OF COFFEY COUNTY FARMERS UNION, BURLINGTON, KANS.

Mr. CARLSON. Mr. President, I have copies of resolutions adopted by the Coffey County Farmers Union at its regular meeting in Burlington, Kans., on March 22, 1961.

These resolutions are in regard to the proposed program of health care for the aged and Federal aid to our schools.

I ask unanimous consent that the resolutions be printed in the RECORD, and referred to the appropriate committees.

There being no objection, the resolutions were received, appropriately referred, and ordered to be printed in the RECORD, as follows:

To the Committee on Finance:

"HEALTH CARE TO THE AGED

"Whereas according to Government statistics, 60 percent, or over 10 million of our citizens over 65 years of age, have less than $1,000 annual income; and

"Whereas 77 percent have chronic ailments; and

"Whereas those over 65 years of age require twice as much hospitalization as all others: Therefore be it

"*Resolved,* That we, the Coffey County Farmers Union, in session this 22d day of March 1961, at Burlington, Kans., favor health costs to the aged be financed through social security, as proposed by our present administration; be it further

"*Resolved,* That one copy of these resolutions be sent to each of our Senators, ANDREW SCHOEPPEL and FRANK CARLSON, a copy to Representative GARNER E. SHRIVER, one copy to State Farmers Union, and a copy spread on the minutes of this meeting; also a copy sent to each of the local papers for publication."

To the Committee on Labor and Public Welfare:

"FEDERAL SCHOOL AID

"Whereas over 50 percent of the property, or ad valorem tax paid by farmers is for the support of our public schools; and

"Whereas the farmer pays a large percent of the businessman's taxes when he buys their products; and

"Whereas the farmer cannot pass this tax on to the consumer, as the manufacturer, processor, and distributor can and do; and

"Whereas the Federal Government collects most of its taxes from corporate and individual incomes; and

"Whereas liberal Federal aid to education would give the farmer much needed tax relief: Therefore, be it

"*Resolved,* We, the Coffey County Farmers Union, in session this 22d day of March 1961, at Burlington, Kans., do favor liberal Federal aid to education even more than the present administration favors; especially for primary and secondary schools; be it further

"*Resolved,* That a copy of these resolutions be sent to Senators ANDREW SCHOEPPEL and FRANK CARLSON, a copy to Congressman GARNER E. SHRIVER, one copy to Kansas Farmers Union, copies to local papers for publication, and a copy be spread on the minutes of this meeting."

JUVENILE DELINQUENCY ACT OF 1961—REPORT OF A COMMITTEE—SUPPLEMENTAL VIEWS

Mr. HILL. Mr. President, from the Committee on Labor and Public Welfare, I report favorably, with amendments, the bill (S. 279) to provide Federal assistance for projects which will demonstrate or develop techniques and practices leading to a solution of the Nation's juvenile delinquency control problems, and I submit a report (No. 144) thereon. I ask unanimous consent that the report be printed, together with the supplemental views of the Senator from New York [Mr. JAVITS].

The PRESIDENT pro tempore. The report will be received and printed, as requested by the Senator from Alabama.

EXECUTIVE REPORTS OF A COMMITTEE

As in executive session,

The following favorable reports of nominations were submitted:

By Mr. FULBRIGHT, from the Committee on Foreign Relations:

G. Frederick Reinhardt, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary to Italy;

Joseph C. Satterthwaite, of Michigan, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary to the Union of South Africa;

Parker T. Hart, of Illinois, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary to the Kingdom of Saudi Arabia;

Raymond Telles, of Texas, to be Ambassador Extraordinary and Plenipotentiary to Costa Rica;

Mrs. Jane Warner Dick, of Illinois, to be the representative of the United States of America on the Social Commission of the Economic and Social Council of the United Nations; and

John M. Leddy, of Virginia, to be U.S. Executive Director of the International Bank for Reconstruction and Development.

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FULBRIGHT (by request):

S. 1506. A bill to authorize the appropriation of $1,500,000 as an ex gratia payment to the city of New York to assist in defraying the extraordinary and unprecedented expenses incurred during the 15th General Assembly of the United Nations; and

S. 1507. A bill to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other reasons; to the Committee on Foreign Relations.

(See the remarks of Mr. FULBRIGHT when he introduced the above bills, which appear under separate headings.)

By Mr. DIRKSEN (for himself and Mr. BENNETT):

S. 1508. A bill to amend the Subversive Activities Control Act of 1950 so as to require the registration of certain additional persons disseminating political propaganda within the United States as agents of a foreign principal, and for other purposes; to the Committee on the Judiciary.

(See the remarks of Mr. DIRKSEN when he introduced the above bill, which appear under a separate heading.)

By Mrs. NEUBERGER:

S. 1509. A bill to provide that the Legislative Reference Service of the Library of Congress shall conduct additional studies of foreign trade interests within the United States; to the Committee on Rules and Administration.

By Mrs. NEUBERGER (for herself, Mr. ENGLE, and Mr. LONG of Hawaii:

S. 1510. A bill to accord certain naturalization privileges to veterans of the Korean hostilities; to the Committee on the Judiciary.

(See the remarks of Mrs. NEUBERGER when she introduced the above bill, which appear under a separate heading.)

By Mr. HUMPHREY (for himself and Mr. MORSE):

S. 1511. A bill to amend the public assistance provisions of the Social Security Act to eliminate certain inequities and restrictions and permit a more effective distribution of Federal funds; to the Committee on Finance.

S. 1512. A bill to provide for assistance to and cooperation with States in strengthening and improving State and local programs for the diminution, control, and treatment of juvenile delinquency; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. HUMPHREY when he introduced the above bills, which appear under separate headings.)

By Mr. HICKEY (for himself and Mr. MCGEE):

S. 1513. A bill to amend title 23 of the United States Code to extend to July 1, 1963, the period within which certain agreements relating to outdoor advertisements may be entered into by the Secretary of Commerce and the States; to the Committee on Public Works.

(See the remarks of Mr. HICKEY when he introduced the above bill, which appear under a separate heading.)

By Mr. WILLIAMS of Delaware:

S. 1514. A bill to require the use of competitive bidding to the greatest practicable extent in the procurement of property and services by the Armed Forces through the establishment by the Secretary of Defense of specific standards governing the use of negotiated contracts for such procurement, and for other purposes; to the Committee on Armed Services.

(See the remarks of Mr. WILLIAMS of Delaware when he introduced the above bill, which appear under a separate heading.)

By Mr. WILEY:

S. 1515. A bill to provide additional funds for carrying out the National School Lunch Act in the fiscal year 1961; to the Committee on Agriculture and Forestry.

S. 1516. A bill to provide for continuity and support of study, research, and development of programs for peaceful uses in science, commerce, and other activities related to Antarctica, which shall include, but shall not be limited to, gathering, evaluating, correlating, and dispersing of information and knowledge obtained from exploration, research, and other mediums relating to weather, communications, travel, and other areas of information; also to coordinate Antarctic activities among those agencies of the United States Government and private institutions interested in or concerned directly with the promotion, advancement, increase, and diffusion of knowledge of the Antarctic and to direct and administer U.S. Antarctic programs in the national interest; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. WILEY when he introduced the above bills, which appear under separate headings.)

By Mr. GOLDWATER:

S. 1517. A bill to amend section 2319 of the Revised Statutes to allow the purchase of locatable mineral deposits on certain patented lands, and for other purposes; to the Committee on Interior and Insular Affairs.

By Mr. CURTIS:

S. 1518. A bill providing for the disposition of judgment funds of the Omaha Tribe of Indians; to the Committee on Interior and Insular Affairs.

By Mr. JOHNSTON:

S. 1519. A bill to amend the Internal Revenue Code of 1954 to allow an additional exemption of $600 for a dependent child of the taxpayer who is a full-time student above the secondary level; to the Committee on Finance.

(See the remarks of Mr. JOHNSTON when he introduced the above bill, which appear under a separate heading.)

By Mr. CASE of New Jersey:

S. 1520. A bill for the relief of Mary Elizabeth Sidor Polkowska; and

S. 1521. A bill for the relief of Georgeann K. Smith, Philip Nell Smith and Donna June Smith; to the Committee on the Judiciary.

By Mr. DWORSHAK:

S. 1522. A bill to provide a new basis for determining the amount of money made available to a State for schools and roads by the Secretary of Agriculture in the case of sales of certain forest products from national forests located within such State, and for other purposes; to the Committee on Agriculture and Forestry.

By Mr. HARTKE:

S. 1523. A bill for the relief of Mari Rose A. M. Dinha; and

S. 1524. A bill for the relief of Salvatore Spatafora; to the Committee on the Judiciary.

By Mr. CAPEHART:

S. 1525. A bill for the relief of Fang Ken Yung; and

S. 1526. A bill for the relief of Joey Kim Purdy; to the Committee on the Judiciary.

By Mr. MANSFIELD (for Mr. EASTLAND):

S. 1527. A bill for the relief of James D. Jalili; to the Committee on the Judiciary.

By Mr. BIBLE (by request):

S. 1528. A bill to make the Policemen and Firemen's Retirement and Disability Act Amendments of 1957 applicable to retired former members of the Metropolitan Police force, the Fire Department of the District of Columbia, the U.S. Park Police force, the White House Police force, and the U.S. Secret Service; and to their widows, widowers, and children; and

S. 1529. A bill to amend the act entitled "An act to regulate the height of buildings in the District of Columbia," approved June 1, 1910, as amended; to the Committee on the District of Columbia.

By Mr. JAVITS (for himself and Mr. KEATING):

S. 1530. A bill to provide for the publication of the Official Register of the United States by the U.S. Civil Service Commission; to the Committee on Post Office and Civil Service.

(See the remarks of Mr. JAVITS when he introduced the above bill, which appear under a separate heading.)

By Mr. MUSKIE:

S. 1531. A bill for the relief of Istvan Hegyi and Paula Hegyi; to the Committee on the Judiciary.

By Mr. HRUSKA:

S. 1532. A bill for the relief of Ljubica Dajcinovic; to the Committee on the Judiciary.

By Mr. JOHNSTON:

S.J. Res. 72. Joint resolution to establish a Commission To Study the Problem of Alcoholism in the United States and to make recommendations for the more adequate provision of facilities for the treatment, rehabilitation, and cure of alcoholics, and for the prevention of alcoholism; to the Committee on Labor and Public Welfare.

(See the remarks of Mr. JOHNSTON when he introduced the above joint resolution, which appear under a separate heading.)

RESOLUTION

SELECT COMMITTEE ON CONSUMERS

Mr. JAVITS (for himself, Mr. COOPER, Mr. KEATING, Mr. PROUTY, and Mr. SCOTT) submitted a resolution (S. Res. 119) to establish the Select Committee on Consumers, which was referred to the Committee on Banking and Currency.

(See the above resolution printed in full when submitted by Mr. JAVITS, which appears under a separate heading.)

EX GRATIA PAYMENT TO THE CITY OF NEW YORK

Mr. FULBRIGHT. Mr. President, by request, I introduce for appropriate reference a bill to authorize the appropriation of $1,500,000 as an ex gratia payment to the city of New York to assist in defraying the extraordinary and unprecedented expenses incurred during the 15th General Assembly of the United Nations.

The proposed legislation has been requested by the Secretary of State, and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose this bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill may be printed in the RECORD at this point, together with the letter from the Secretary of State, dated January 12, 1961, to the Vice President in regard to it.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and letter will be printed in the RECORD.

The bill (S. 1506) to authorize the appropriation of $1,500,000 as an ex gratia payment to the city of New York to assist in defraying the extraordinary and unprecedented expenses incurred during the 15th General Assembly of the United Nations, introduced by Mr. FULBRIGHT, by request, was received, read twice by its title, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That there is hereby authorized to be appropriated, out of moneys in the Treasury not otherwise appropriated, the sum of $1,500,000 for payment to the city of New York. The said appropriation shall be considered an ex

gratia payment to assist the city of New York to defray the extraordinary and unprecedented expenses which the city incurred in affording protection to visiting chiefs of state and heads of government during the Fifteenth General Assembly of the United Nations.

The letter presented by Mr. FULBRIGHT is as follows:

JANUARY 12, 1961.

The Honorable RICHARD M. NIXON,
President of the Senate.

DEAR MR. VICE PRESIDENT: There is transmitted herewith for the consideration of the Congress proposed legislation to authorize the appropriation of $1,500,000 as an ex gratia payment to the city of New York to assist in defraying the extraordinary and unprecedented expenses incurred by the New York City Police Department during the 15th General Assembly of the United Nations.

The presence in New York City during the early weeks of the 15th General Assembly of the United Nations of a large number of chiefs of state and heads of government was unforeseen and unprecedented. The burden placed upon the New York City Police Department to provide protection for members of General Assembly delegations and to meet the additional traffic control problems was unusual and extraordinary. It is believed, therefore, that the circumstances which existed during the early weeks of the Assembly session would make it inappropriate to expect the city of New York to bear this additional expense in its entirety. However, since there is no way of knowing to what extent the commercial institutions of the city profited from the great influx of travelers from all over the world because of the General Assembly session, it would seem that the city of New York should be prepared to assume responsibility for paying part of the overtime work performed by police department personnel.

Customarily, New York City police officers performing overtime duty are recompensed with time off. However, to resort to this method in a case involving a substantial portion of the city's police force would leave the city of New York partially unprotected for a substantial period of time. Consequently, the only alternative is to reimburse the men concerned in cash. According to estimates prepared by the New York City Police Department, the cost of reimbursing the overtime work performed, on the basis of the regular salary rate, would be approximately $2,936,000. The amount requested to be authorized in the proposed legislation represents approximately 50 percent of this cost. Funds in the amount that would be authorized by this proposal have been included in the President's budget for 1962 under the allowance for contingencies. It is contemplated that a supplemental estimate for the appropriation of such funds would be recommended if this measure is enacted by the Congress.

A similar communication is being sent to the Speaker of the House of Representatives.

The Department was informed by the Bureau of the Budget in a letter dated January 4, 1961, that there is no objection to the submission of this proposal to the Congress for its consideration.

Most sincerely,

CHRISTIAN A. HERTER.

FOREIGN SERVICE BUILDINGS ACT AMENDMENTS

Mr. FULBRIGHT. Mr. President, by request, I introduce, for appropriate reference, a bill to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other reasons.

The proposed legislation has been requested by the Secretary of State, and I am introducing it in order that there may be a specific bill to which Members of the Senate and the public may direct their attention and comments.

I reserve my right to support or oppose the bill, as well as any suggested amendments to it, when the matter is considered by the Committee on Foreign Relations.

I ask unanimous consent that the bill may be printed in the RECORD at this point, together with the letter from the Secretary of State, dated March 22, 1961, to the Vice President in regard to it and an enclosure thereto.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and letter will be printed in the RECORD.

The bill (S. 1507) to amend the Foreign Service Buildings Act, 1926, to authorize additional appropriations, and for other reasons, introduced by Mr. FULBRIGHT, by request, was received, read twice by its title, referred to the Committee on Foreign Relations, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4 of the Foreign Service Buildings Act, 1926, as amended (22 U.S.C. 295), is amended by adding at the end thereof the following new subsection:

"(d) For the purpose of carrying into effect the provisions of this Act there is hereby authorized to be appropriated, in addition to amounts previously authorized, an amount not to exceed $110,000,000 which shall remain available until expended."

SEC. 2. (a) Section 2 of the Foreign Service Buildings Act, 1926 (22 U.S.C. 293), is repealed.

(b) The first section of such Act (22 U.S.C. 292) is amended—

(1) by striking out ", subject to the direction of the commission hereinafter established,";

(2) by striking out "under such terms and conditions as in the judgment of the commission may best protect the interests of the United States,";

(3) by striking out ", to the extent deemed advisable by the commission,"; and

(4) by striking out ", which buildings shall be appropriately designed by the commission, and the space in which shall be allotted by the Secretary of State under the direction of the commission among the several agencies of the United States Government" and inserting a period and the following: "The space in such buildings shall be allotted by the Secretary of State among the several agencies of the United States Government."

(c) Section 3 of such Act (22 U.S.C. 294) is amended by striking out ", subject to the direction of the commission," and "in the judgment of the commission,".

(d) Section 4 of such Act (22 U.S.C. 295) is amended by striking out ", subject to the direction of the commission,".

(e) Section 9 of such Act (22 U.S.C. 300) is amended—

(1) by striking out "with the concurrence of the Foreign Service Buildings Commission"; and

(2) by striking out ", as in the judgment of the Commission may best serve the Government's interest."

(f) Section 1(e) of Reorganization Plan Numbered II of May 9, 1939 (53 Stat. 1432), is repealed.

(g) All references to the Foreign Service Buildings Commission, originally established by the Foreign Service Buildings Act, 1926, in all laws of the United States are hereby repealed.

The letter presented by Mr. FULBRIGHT is as follows:

Hon. LYNDON B. JOHNSON,
President of the Senate.

DEAR MR. VICE PRESIDENT: The Department encloses, and recommends for your consideration, proposed legislation to amend the Foreign Service Buildings Act, 1926 (22 U.S.C. 292–300) to permit continuation of the program for the acquisition, maintenance, and operation of real property required abroad by diplomatic, consular, and other activities of the United States operating in foreign countries.

Authorizations of appropriations to implement the provisions of the Foreign Service Buildings Act from 1926 to the present total $241,625,000, of which $225 million has been authorized in the last 15 years. After the current year's appropriation there remains only the $10 million subsequently authorized by Public Law 86–723, approved September 8, 1960, to provide operating and maintenance costs for the coming fiscal year. The appropriation request for the buildings program for the fiscal year ending June 30, 1962, aggregates $20 million, the remaining additional $10 million being dependent upon favorable consideration by the Congress of the proposed legislation.

Thus far the Department of State has acquired under its Foreign Service buildings program office buildings, residences, and staff housing which are valued far in excess of their cost of approximately $175 million. Even so, many of the personnel at oversea posts are working and living in accommodations far below the standards considered minimum in the United States of America. This is particularly true at certain posts in Asia and Africa. As a result of a post-by-post survey, the Department has developed a 4-year program to meet its most urgent needs which contemplates an expenditure of an estimated $110 million in the period from July 1, 1961, through June 30, 1965.

Acquisition of real properties under the Foreign Service Buildings Act has been financed largely through the use of foreign currencies and credits. However, many of the Department's most urgent and compelling buildings needs are in countries where credits or local currencies are not held by the United States in excess of current disbursing requirements. Further, appropriations for the buildings program fund the maintenance and operating costs of buildings located in areas where no local currency credits exist, and U.S. dollars must be expended to provide necessary maintenance and service in these areas.

In view of the unpredictability of future local currency holdings of the U.S. Treasury, the high concentration of holdings in a relatively few countries, and the recurring need for resources in areas in which local currency holdings do not exist, the proposed legislation does not contemplate specification of a definite amount to be used solely to acquire local currencies or credits from U.S. Treasury holdings. However, under regulations of the U.S. Treasury, now in effect for a number of years, the Foreign Service buildings program, as well as all other programs of U.S. agencies operating abroad, is required to utilize foreign credits and currencies owed to or owned by the United States before it can acquire needed foreign exchange from any other source.

During the course of the hearings relating to the Foreign Service Buildings Act Amendments, 1960, before the Subcommittee on State Department Organization and Foreign Operations of the Committee on Foreign Affairs, House of Representatives, it was pro-

posed to delete all references to the Foreign Service Buildings Commission as established by the original Foreign Service Buildings Act of 1926. The Department has agreed to this proposed deletion and has included appropriate provisions in the draft legislation to carry out the proposal.

The abolition of the Foreign Service Buildings Commission will not affect the basic authority of the Secretary of State under the Foreign Service Buildings Act, 1926, as amended with respect to the carrying out of the foreign buildings program.

The Department of State has been informed by the Bureau of the Budget that there is no objection, from the standpoint of the administration's program, to the presentation of the draft bill for the consideration of the Congress.

A letter similar to this is being sent to the Speaker of the House.

Sincerely yours,

DEAN RUSK.

			1962	[3] 19,000,000	[3] 1,000,000
Total	200,000,000	41,625,000		[4] 219,000,000	32,625,000

[1] Transferred from "Government in occupied areas" pursuant to Public Law 83-207.
[2] Of this amount, $1,000,000 was transferred from "Government in occupied areas" pursuant to Public Law 83-663.
[3] Of the $20,000,000 requested for 1962, the amount of $10,000,000 is authorized to be appropriated. Legislative authorization to permit appropriation of the remaining $10,000,000 has been requested.
[4] Appropriations for purchase of U.S. Treasury foreign exchange may exceed the amount specified as a minimum in the authorization, provided the combined foreign exchange and dollar appropriations do not exceed the total amount authorized to be appropriated.

FOREIGN COMMUNIST PROPAGANDA

Mr. DIRKSEN. Mr. President, on behalf of myself and the senior Senator from Utah [Mr. BENNETT], I introduce for appropriate reference a bill to amend the Subversive Activities Control Act of 1950 so as to require the registration of certain additional persons disseminating political propaganda within the United States as agents of a foreign principal.

The Foreign Agents Registration Act of 1938, as amended, now requires the registration with the Attorney General of those agents of a foreign power who disseminate political propaganda in the United States. Such propaganda must be marked or accompanied by a statement setting forth that the person sending same is registered with the Department of Justice as an agent of a foreign government.

An ever-increasing flood of Communist propaganda is pouring into the United States, and the Communists are taking advantage of existing discrepancies in the present act and are continually devising new techniques for evading its provisions and nullifying its effective enforcement. In order to escape the impact of the law upon a "foreign principal," the Communists have created various forms of organizations which they control under subterfuges, and have likewise created legal fictions as to the agency relationship between such organizations and a foreign power. The control of Communist and other foreign propaganda is weakened by being vested in several Government agencies.

The purpose of this proposal is to strengthen the present law by requiring the registration of certain additional persons who disseminate political propaganda within the United States as agents of a foreign principal, and to render the enforcement of the Foreign Agents Registration Act more effective by centralizing the responsibility for the control of foreign propaganda.

This measure would add to the Subversive Activities Control Act of 1950, provisions which would amend the Foreign Agents Registration Act so as first, to bring within the coverage of the definition of "foreign principal" a domestic organization which is supervised, directed, or controlled by a foreign government or foreign political party, regardless of whether such organization is financed or subsidized by a foreign government; second, to limit the exemption from the registration requirements of the act so that persons who now claim the exemption granted to certain commercial activities, but who abuse said exemption and disseminate political propaganda, will have to register under the new provisions; third, to require the registration of any political propaganda imported into the United States, regardless of whether it meets the cumbersome criteria contained in the present act, and to make unlawful the importation of such propaganda or the transmission of same in commerce without the required registration; fourth, to require the registration of a person not within the United States, who uses United States facilities of commerce to disseminate political propaganda as an agent of a foreign principal unless his activities are confined to the transmittal of such propaganda to a person registered under the act; and fifth, to establish in the Bureau of Customs of the Department of the Treasury, an Office of the Comptroller of Foreign Propaganda with a fixed responsibility for the control of foreign political propaganda and for a close liaison with the Congress.

Investigations at various ports of entry, and public hearings conducted by the Internal Security Subcommittee of the Senate Judiciary Committee at Chicago, New Orleans, New York, and San Francisco, over the past 4 years, indicate an increase in the flood of propaganda rolling into this country and the need for plugging the present loopholes in the Foreign Agents Registration Act.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1508) to amend the Subversive Activities Control Act of 1950 so as to require the registration of certain additional persons disseminating political propaganda within the United States as agents of a foreign principal, and for other purposes, introduced by Mr. DIRKSEN (for himself and Mr. BENNETT), was received, read twice by its title, and referred to the Committee on the Judiciary.

EQUAL NATURALIZATION BENEFITS FOR KOREAN WAR VETERANS

Mrs. NEUBERGER. Mr. President, I introduce, for appropriate reference, a bill to accord Korean war veterans equal naturalization privileges such as granted veterans of the First World War and World War II. This bill I am introducing for myself, the distinguished junior

Senator from California [Mr. ENGLE], and the distinguished junior Senator from Hawaii [Mr. LONG].

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1510) to accord certain naturalization privileges to veterans of the Korean hostilities, introduced by Mrs. NEUBERGER (for herself, Mr. ENGLE, and Mr. LONG of Hawaii), was received, read twice by its title, and referred to the Committee on the Judiciary.

Mrs. NEUBERGER. Mr. President, section 329 of the Immigration and Nationality Act provides that veterans who served honorably in the Armed Forces during the First and Second World Wars are entitled to naturalization, but no similar provisions were made for Korean war veterans. Our bill would correct this oversight.

This bill has an interesting legislative history. It was first sponsored by my husband in the 85th Congress and passed the Senate on August 18, 1958. Then Representative ENGLE, now the junior Senator from California, sponsored an identical bill in the 85th Congress. In the 86th Congress my husband and the Senator from California [Mr. ENGLE] reintroduced the bill, and a companion bill was sponsored by Representative SHELLEY of San Francisco. Representative SHELLEY's bill, H.R. 7209, passed the House of Representatives June 24, 1960, but unfortunately was not acted upon by the Senate. Thus this bill has passed both the House and the Senate, but in different sessions.

It is indeed a pleasure to report that both the American Legion and the Veterans of Foreign Wars have endorsed my proposal to grant equal naturalization privileges to veterans of the Korean war. Mr. President, I ask unanimous consent to have printed in the RECORD correspondence I have received from Francis W. Stover, director, national legislative service, Veterans of Foreign Wars, and Miles D. Kennedy, director, legislative commission, the American Legion.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

VETERANS OF FOREIGN WARS
OF THE UNITED STATES,
Kansas City, Mo., March 28, 1961.

Hon. MAURINE B. NEUBERGER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR NEUBERGER: This is to express the support of the Veterans of Foreign Wars for legislation which would grant equal naturalization privileges for Korean war veterans as was proposed in S. 1196, 86th Congress, and S. 2009, 85th Congress.

The record will indicate that these two bills received the vigorous endorsement of the Veterans of Foreign Wars and we were keenly disappointed when both failed to win the approval of the two previous Congresses. Accordingly, the VFW would be deeply appreciative for the reintroduction of legislation which will grant Korean war veterans the same citizenship privileges as veterans of previous wars. Rest assured such legislation will have the full cooperation and support of the VFW to advance the bill through the 87th Congress.

Thanking you for your interest and cooperation respecting the problems of veterans and their families and wishing you continued success as a most valued Member of the Senate, I am

Respectfully yours,
FRANCIS W. STOVER,
Director, National Legislative Service.

THE AMERICAN LEGION,
Washington, D.C., March 27, 1961.

Mr. WALTER DODD,
Care of Hon. MAURINE NEUBERGER,
Senate Office Building, Washington, D.C.

DEAR MR. DODD: In keeping with your recent telephone conversation with the assistant director, Clarence H. Olson, of this office I enclose two copies of Resolution 16 adopted at the April 1958 meeting of the national executive committee of the American Legion.

We would be very happy indeed if Senator NEUBERGER could see her way clear to introduce a new bill along the lines of S. 3009 which was introduced by her late husband on January 16, 1958.

Our people are interested in an amendment to section 329(a) of the Immigration and Nationality Act.

I also want to extend to Senator NEUBERGER our appreciation of her interest in this proposed legislation. We also thank you for your cooperation.

Sincerely,
MILES D. KENNEDY,
Director.

NATIONAL EXECUTIVE COMMITTEE MEETING, THE AMERICAN LEGION, HELD APRIL 30–MAY 2, 1958

RESOLUTION NO. 16

Committee: National Americanism Commission.

Subject: Amend section 329(a) of the Immigration and Nationality Act.

Whereas under section 329(a) of the Immigration and Nationality Act, any person who, while an alien or a noncitizen national of the United States, has served honorably in an active-duty status in the Armed Forces of the United States during either World War I or World War II, and who, if separated from such service, was separated under honorable conditions, may be naturalized; and

Whereas any person who has served honorably in the Armed Forces of the United States during the Korean war is not accorded the same rights and privileges of naturalization as given to the veterans of World War I and World War II, and

Whereas simple justice requires that Korean war veterans be treated alike for they fought and died in the same manner as the veterans of World War I or World War II, in the service of their country, in its hour of need, and

Whereas the Veterans' Administration treats all veterans alike in passing on their service-incurred disabilities: Now, therefore, be it

Resolved, That the American Legion in national executive committee assembled in Indianapolis, Ind., April 30–May 2, 1958, exert its wholehearted efforts to amend section 329(a) of the Immigration and Nationality Act to read as follows:

"Any person who, while an alien or a noncitizen national of the United States, has served honorably in an active-duty status in the military, air or naval forces of the United States during either World War I or during a period beginning September 1, 1939, and ending December 31, 1946, or during a period beginning June 25, 1950, and ending July 1, 1955, and who, if separated from such service, was separated under honorable conditions, may be naturalized as provided in this section."

Mrs. NEUBERGER. Mr. President, the need for this proposed legislation was first called to my husband's attention when he spoke in San Francisco before the Cathay Post, No. 384, of the American Legion. The post has been most helpful in furnishing information, and I should like to commend Mr. Joseph G. Jue, a young San Francisco attorney, who has made several trips to Washington in behalf of this proposed legislation. Mr. President, I ask unanimous consent to place at this point in my remarks a recent letter from Mr. Jue, which gives some indication of the number of veterans of our Nation's Armed Forces who will benefit from this proposal.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

TARBOX & JUE,
San Francisco, March 10, 1961.

Mr. WALTER H. DODD,
Assistant to Senator Maurine Neuberger,
U.S. Senate, Washington, D.C.

DEAR WALTER: Kindly excuse my long delay in answering your letter of above. Since receiving your much appreciated letter I have made an extensive inquiry into the question of how many veterans would benefit from passage of the Korean war veterans bill.

I have discussed the problem with my own Cathay Post No. 384, American Legion, Chinatown Post No. 4618, Veterans of Foreign Wars, and the leaders of the Chinese Chamber of Commerce, the Chinese Six Companies, the Chinese American Citizens Alliance, the major family associations, and the local Chinese American Democratic Club. My findings based upon an extreme conservative view of the number of potential recipients are as follows:

"In Cathay Post over 100 members of our American Legion post would benefit. There would be an additional 400 recipients in the greater bay area and the belief is that over 1,000 Korean war veterans in this State would benefit."

These submitted figures are based upon information gathered from the oriental community. Naturally, there would be recipients of other ethnic groups of which I cannot speak for, but do exist.

Obtaining these figures has been extremely difficult because the beneficiaries under this bill presently do not have the protection as World War II veterans under our immigration and naturalization laws, and consequently the fear of possible deportation and loss of citizen and our residence status.

I trust that I have been able to answer your letter and that a companion bill will forthwith be introduced in the Senate. I thank you for all your past efforts and rest assured that you will continue to so do in securing passage of this bill.

Very respectfully,
JOSEPH G. JUE.

Mrs. NEUBERGER. Mr. President, it is my hope that this bill will be promptly enacted into law. It has no opposition, and it will correct an injustice to our Nation's war veterans and thus make them eligible for citizenship.

HUMANITARIAN AND OLD AGE RIGHTS

Mr. HUMPHREY. Mr. President, I introduce, for appropriate reference, my Humanitarian and Old Age Rights Act to correct certain inequities and restrictions of the Federal public assistance program, to provide for more effective distribution of Federal funds, and to extend to children of needy unemployed parents eligibility for aid to dependent children benefits.

The purpose of my proposal is summarized in the introductory policy statement which states:

It is the purpose of this act to provide more effectively for the protection, care and assistance of the people of the United States who are in need thereof, and to promote the welfare and happiness of the people of the United States by providing public assistance to its needy and distressed * * * administered promptly and humanely, with due regard for the preservation of family life * * * to encourage self-respect, self-reliance, and the desire to be a good citizen.

We have a great moral obligation to the needy aged, the blind, the physically handicapped, and the dependent children. In a society as rich as ours there is no justification for such people being denied their human dignity.

Yet the fact of the matter is that in all too many States our public assistance programs are administered in such a manner as to strip from these recipients their rights as an American citizen to be treated with respect and dignity and to deny assistance often when wisdom and compassion indicate that needs should be met with public aid.

AID TO DEPENDENT CHILDREN

I am particularly concerned about the welfare of children whose families are struck by unemployment. Under the present aid to dependent children program, needy children are eligible for assistance if their fathers are deceased, disabled, or family deserters.

As President Kennedy declared in recommending action by Congress to include children of the needy unemployed in the ADC program:

In logic and humanity, a child should also be eligible for assistance if his father is a needy unemployed worker—for example, a person who has exhausted unemployment benefits and is not receiving adequate local assistance.

In a similar vein, the Advisory Council on Public Assistance last year put it this way:

On the premise that a hungry, ill-clothed child is as hungry and ill-clothed if he lives in an unbroken home as if he were orphaned or illegitimate, the program for aid to dependent children should be expanded to include any financially needy children living with any relative or relatives.

The present restrictions of the ADC program too often result in real or pretended desertion by fathers who are unable to support their families and hope to qualify their children for public assistance. Many other fathers disqualify their needy children from ADC eligibility simply by remaining with their children to preserve genuine family life in spite of desperate need brought about by continued involuntary unemployment.

To correct this unfortunate situation, to help preserve and promote healthy family life, my proposal would enlarge the definition of dependent child for purposes of ADC eligibility to include children of the needy unemployed.

I am pleased that the House of Representatives has passed such a measure in accord with President Kennedy's request. And I feel confident that the Senate will approve this worthy measure without delay.

AGE REQUIREMENT FOR OLD-AGE ASSISTANCE

My proposal would also make the age requirement for old-age assistance recipients the same as that established for old-age beneficiaries under title II of the Social Security Act.

The need for this is obvious when we consider the low minimum benefits now paid under the OASI program. Many beneficiaries who fall into the low category cannot exist on a benefit payment of $50 to $60 per month and must therefore apply for public assistance to supplement this inadequate income.

Therefore, when we lowered the age for women OASI beneficiaries to 62 as we did in 1956, and did not make a corresponding change in the public assistance program, our original purpose was to a large extent defeated.

EARNINGS ALLOWANCE

My bill would allow the aged and handicapped on public assistance to earn up to $50 per month; the parents of needy children up to $30 per month, and the needy children themselves, up to $30 per month to supplement their assistance checks. The blind are already permitted to earn $50, without penalty of reduction in aid.

Such action helps public assistance recipients to develop self-reliance and eventually to become self-supporting. We should encourage such efforts instead of penalizing them.

This privilege was extended to the aged by the Senate in 1956, but unfortunately, it was knocked out of the social security amendments by the conference committee.

HOMEOWNERSHIP

This bill would allow public assistance recipients to own a home of an assessed value, less all encumbrances, up to $5,000 free from the imposition of a lien. The practice of forcing an old person to sign over his little home that he has spent most of his life acquiring as a condition of receiving aid in time of need is abominable.

My bill would exempt household furnishings and other personal effects plus an insurance policy or burial arrangements up to $500 in value when considering need and would also establish a floor of $1,200 under the amount of personal property which a single recipient is allowed to have.

I see no earthly reason why we should require people to be absolute paupers before we consider them in need of help to get the day-to-day necessities of life. To force them to use up every last resource before they are given aid is to strip them of any feeling of security should they become ill, or should their checks be held up in tangle of redtape or for other reasons. If they have been thrifty enough to purchase a burial policy so that their last remains can be covered with a semblance of dignity, are we to force them to cash this in, thereby finally sentencing them to potter's field?

It is wrong to grind them right down into the dust of absolute poverty before they can expect any help.

STOP HARASSMENT OF RELATIVES

My bill would further prohibit the practice of some States whereby the public assistance laws are used to enforce the general support laws of the State. This is the so-called responsible relatives law where children of pensioners are often subjected to continual harassment by State and county administrators even though they are in no way financially capable of supporting their aged parents.

While I firmly subscribe to the theory that it is the moral responsibility of children to care for their parents if they can reasonably afford to do so, I feel that this should be a matter for State support laws, and not be used merely as a harassment in the public assistance program.

To show the hardship this so often works on our oldsters, in some States the mere existence of a relative deemed capable of supporting the old person is reason enough—according to State law—for denying that old person aid. Whether or not the relative is actually supporting the needy person is not taken into consideration. The fact that the relative exists is enough.

OUTLAW "SHAME" LIST

As another consideration, this bill provides that the public assistance program is to be administered by each State so as to insure uniform treatment of the needy in all its political subdivisions.

It would further reinstate the original policy adopted by Congress that the names of recipients be held confidential.

That is, it would outlaw the "shame list," which is used by all too many States to ridicule recipients of aid. This law reminds me of the old practice of putting town drunks or wifebeaters in stocks in the public square to shame them in front of fellow townsmen. We hardly think that such a theory has any place in the 20th century.

RESIDENCE REQUIREMENT

We come now to the question of the residence requirement imposed by a majority of our States. The Public Assistance Act says that a State shall not impose a residence requirement exceeding 5 years out of the 9 years preceding application. And many States impose this maximum.

Even on the surface, this whole idea of a residence requirement seems ridiculous and even downright un-American to me. Though I come from the great State of Minnesota, I am also an American citizen. I am not restricted to living in Minnesota. When I come to Washington, it is not necessary that I take out a visa to remain or that I obtain a passport to travel to California if I choose to do so. I am just as much an American citizen in California or Nebraska as I am in Minnesota.

To help alleviate this problem, my bill reduces the State-imposed residence requirements now allowed by the Federal Government from 5 years to 1 year and provides that should an otherwise qualified person to fail to meet State residence requirements, the Federal Government will pay its share direct to the person until they have met the State residence requirement.

Finally, this bill provides that no person receiving such public aid shall be deemed a pauper and no warrant drawn

in payment shall contain any reference to indigency or pauperism, and that the value of any U.S. surplus food made available to a public assistance recipient shall not be deducted from the recipient's public assistance benefits.

Mr. President, I ask unanimous consent that this bill lie at the desk for 1 week for Senators who may wish to join as cosponsors, and I ask that the text of my proposal be printed at this point in the CONGRESSIONAL RECORD.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD, and will lie on the desk, as requested by the Senator from Minnesota.

The bill (S. 1511) to amend the public assistance provisions of the Social Security Act to eliminate certain inequities and restrictions and permit a more effective distribution of Federal funds, introduced by Mr. HUMPHREY, was received, read twice by its title, referred to the Committee on Finance, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Humanitarian and Old-Age Rights Act."

STATEMENT OF PURPOSE AND POLICY

SEC. 2. It is the purpose of this Act to provide more effectively for the protection, care, and assistance of the people of the United States who are in need thereof, and to promote the welfare and happiness of the people of the United States by providing public assistance to its needy and distressed. It is the policy of the Congress that assistance under titles I, IV X, and XIV of the Social Security Act, as amended by this Act, shall be administered promptly and humanely, with due regard for the preservation of family life and without discrimination on account of race, religion, or political affiliation, and that such asistance shall be so administered as to encourage self-respect, self-reliance, and the desire to be a good citizen, useful to society. Titles I, IV, X, and XIV of the Social Security Act shall be liberally construed in order to carry out this purpose and policy.

OLD-AGE ASSISTANCE

SEC. 3. (a)(1)(A) Section 2(a)(1) of the Social Security Act is amended to read as follows:

"(1) provide that it shall be in effect in all political subdivisions of the State;".

(B) Section 2(a)(3) of such Act is amended to read as follows:

"(3) provide for the establishment or designation of a single State agency to administer the plan;".

(2) Section 2(a)(10)(A) of such Act is amended to read as follows:

"(A) provide that the State agency shall, in determining need, take into consideration any other income and resources of an individual claiming old-age assistance; except that in making such determination, the State agency shall disregard (i) the first $50 per month of earned income, (ii) the ownership by such individual (alone or with his or her spouse) of a home having an assessed value, less all encumbrances of record thereon, of less than $5,000 (except to the extent that he is receiving rental income therefrom), (iii) the ability of such individual's family and relatives to provide for his support, (iv) any donations of surplus food which may have been made to such individual from stocks of the Commodity Credit Corporation, and (v) the first $1,200 in value (over and above all encumbrances of record) of personal property owned by such individual;".

(3) Section 2(a) of such Act is further amended by striking out the period at the end of paragraph (11) and inserting in lieu thereof a semicolon and by adding at the end of such section 2(a) the following new paragraph:

"(12) provide that there will be no discrimination based on sex in determining the needs of individuals receiving assistance under the plan."

(4) Section 2(a) of such Act is further amended by adding after paragraph (12) the following new sentence: "For purposes of paragraph (10)(A)(v), no life insurance policy shall be valued at more than its present surrender value to the individual, and the term 'personal property' shall not include (i) the individual's clothing, furniture, household equipment, foodstuffs, fuel, personal jewelry, or other personal effects, or (ii) interment plots, money placed in trust or insurance for funeral, interment, or similar expenses, or any contract rights connected therewith, if such money, insurance, or contract rights do not exceed $500 in value."

(5) Section 2(b)(1) of such Act is amended to read as follows:

"(1) an age requirement at any given time of more than the age which at such time constitutes retirement age for purposes of title II of this Act; or".

(6) Section 2(b)(2)(A) of such Act is amended to read as follows: "(A) which excludes any resident of the State who has resided therein continuously for one year immediately preceding the application; and".

(b) The second sentence of section 1 of sucn Act is amended by inserting before the period at the end thereof a semicolon and the following: "but no payment shall be made under this title to any State which has not also submitted, and had approved by the Secretary, State plans for assistance under titles IV, X, and XIV".

(c) Section 4 of such Act is amended by striking out "or" at the end of paragraph (1), by adding "or" at the end of paragraph (2), and by inserting after paragraph (2) the following new paragraph:

"(3) that in the administration of the plan there is imposed, as a condition of old-age assistance to any individual, a requirement that such individual subject his home to a lien of any kind or transfer to the State agency any interest in his home;".

(d) Title I of such Act is amended by adding at the end thereof the following new sections:

"DIRECT PAYMENTS TO INDIVIDUALS NOT SATISFYING RESIDENCE REQUIREMENTS

"SEC. 7. If an individual, after making application for old-age assistance, is denied such assistance by the State agency solely because he does not satisfy the residence requirements imposed under the State plan, and if such individual is not entitled to old-age assistance by reason of prior residence in another State, the State agency shall promptly notify the Secretary of the fact that such individual has made such application and would be eligible for old-age assistance if he satisfied such requirements. The Secretary shall thereupon pay directly to such individual for each month, beginning with the first month (after the month of such individual's application) in which such individual would have been eligible for old-age assistance if he satisfied such residence requirements and ending with the month preceding the first month in which he satisfies such requirements, an amount (as determined under regulations prescribed by the Secretary) equal to the Federal Government's proportionate share of the old-age assistance which such individual would receive for such month if he then satisfied such requirements.

"ASSISTANCE FOR NEEDS OF RECIPIENT ONLY

"SEC. 8. Assistance paid to any individual under this title is to assist him in meeting his individual needs and is not for the benefit of any other person; and such assistance shall not be regarded as income of any person other than such individual."

AID TO DEPENDENT CHILDREN

SEC. 4. (a)(1)(A) Section 402(a)(1) of the Social Security Act is amended to read as follows: "(1) provide that it shall be in effect in all political subdivisions of the State;".

(B) Section 402(a)(3) of such Act is amended to read as follows: "(3) provide for the establishment or designation of a single State agency to administer the plan;".

(2) Section 402(a)(7) of such Act is amended to read as follows: "(7) provide that the State agency shall, in determining need, take into consideration any other income and resources of any child claiming aid to dependent children; except that in making such determination the State agency shall disregard (A) the first $15 per month of income earned by such child and the first $30 per month of income earned by his parent or guardian, (B) the ownership by such child (or by his parent or guardian) of a home having an assessed value, less all encumbrances of record thereon, of less than $5,000 (except to the extent that he is receiving rental income therefrom), and (C) any donations of surplus food which may have been made to or for such child from stocks of the Commodity Credit Corporation;".

(3) Section 402(a) of such Act is further amended by striking out the final period and inserting in lieu thereof a semicolon and the word "and", and by adding at the end of the subsection the following new clause: "(13) provide that there will be no discrimination based on sex in determining the needs of individuals receiving assistance under the plan."

(b) The second sentence of section 401 of such Act is amended by inserting before the period at the end thereof a semicolon and the following: "but no payment shall be made under this title to any State which has not also submitted, and had approved by the Secretary, State plans for assistance under titles I, X, and XIV".

(c) Section 404 of such Act is amended by striking out "or" at the end of paragraph (1), by adding "or" at the end of paragraph (2), and by inserting after paragraph (2) the following new paragraph:

"(3) that in the administration of the plan there is imposed, as a condition of aid to any dependent child, a requirement that such child (or his parent or guardian) subject to his (or their) home to a lien of any kind or transfer to the State agency any interest in such home;".

(d) Title IV of such act is amended by adding at the end thereof the following new section:

"DIRECT PAYMENTS TO DEPENDENT CHILDREN NOT SATISFYING RESIDENCE REQUIREMENTS

"SEC. 407. If a dependent child, after making application for aid to dependent children, is denied such aid by the State agency solely because he does not satisfy the residence requirements imposed under the State plan, and if such child is not entitled to aid to dependent children by reason of prior residence in another State, the State agency shall promptly notify the Secretary of the fact that such child has made such application and would be eligible for such aid if he satisfied such requirements. The Secretary shall thereupon pay directly to such child for each month, beginning with the first month (after the month of such child's

application) in which such child would have been eligible for aid to dependent children if he satisfied such residence requirements and ending with the month preceding the first month in which he satisfies such requirements, an amount (as determined under regulations prescribed by the Secretary) equal to the Federal Government's proportionate share of the aid to dependent children which such child would receive for such month if he then satisfied such requirements."

(e) Section 406(a) of such act is amended to read as follows:

"(a) The term 'dependent child' means a needy child under the age of 18, who has been deprived of parental support or care for any reason (including, but not limited to, the following reasons: the death, continued absence from home, physical or mental incapacity, or unemployment, of a parent), and who is living with his father, mother, grandfather, grandmother, brother, sister, stepfather, stepmother, stepbrother, stepsister, uncle, aunt, first cousin, nephew, or niece, in a place of residence maintained by one or more of such relatives as his or their own home;".

AID TO THE BLIND

SEC. 5. (a)(1)(A) Section 1002(a)(1) of the Social Security Act is amended to read as follows: "(1) provide that it shall be in effect in all political subdivisions of the State;".

(B) Section 1002(a)(3) of such Act is amended to read as follows: "(3) provide for the establishment or designation of a single State agency to administer the plan;".

(2) Section 1002(a)(8) of such Act is amended to read as follows: "(8) provide that the State agency shall, in determining need, take into consideration any other income and resources of an individual claiming aid to the blind; except that, in making such determination, the State agency shall disregard (A) the first $50 per month of earned income, (B) the ownership by such individual (alone or with his or her spouse) of a home having an assessed value, less all encumbrances of record thereon, of less than $5,000 (except to the extent that he is receiving rental income therefrom), (C) the ability of such individual's family and relatives to provide for his support, (D) any donations of surplus food which may have been made to such individual from stocks of the Commodity Credit Corporation, and (E) the first $1,200 in value (over and above all encumbrances of record) of personal property owned by such individual;".

(3) Section 1002(a) of such Act is further amended by striking out the final period and inserting in lieu thereof a semicolon and the following: "and (14) provide that there will be no discrimination based on sex in determining the needs of individuals receiving assistance under the plan."

(4) Section 1002(a) of such Act is further amended by adding after clause (14) the following new sentence: "For purposes of clause (8)(E), no life insurance policy shall be valued at more than its present surrender value to the individual, and the term 'personal property' shall not include (i) the individual's clothing, furniture, household equipment, foodstuffs, fuel, personal jewelry, or other personal effects, or (ii) interment plots, money placed in trust or insurance for funeral, interment, or similar expenses, or any contract rights connected therewith, if such money, insurance, or contract rights do not exceed $500 in value."

(5) Section 1002(b)(1) of such Act is amended to read as follows:

"(1) Any residence requirement which excludes any resident of the State who has resided therein continuously for one year immediately preceding the application; or".

(b) The second sentence of section 1001 of such Act is amended by inserting before the period at the end thereof a semicolon and the following: "but no payment shall be made under this title to any State which has not also submitted, and had approved by the Secretary, State plans for assistance under titles I, IV, and XIV".

(c) Section 1004 of such Act is amended by striking out "or" at the end of paragraph (1), by adding "or" at the end of paragraph (2), and by inserting after paragraph (2) the following new paragraph:

"(3) that in the administration of the plan there is imposed, as a condition of aid to any individual, a requirement that such individual subject his home to a lien of any kind or transfer to the State agency any interest in his home;".

(d) Title X of such Act is amended by adding at the end thereof the following new sections:

"DIRECT PAYMENTS TO INDIVIDUALS NOT SATISFYING RESIDENCE REQUIREMENTS

"SEC. 1007. If an individual, after making application for aid to the blind, is denied such aid by the State agency solely because he does not satisfy the residence requirements imposed under the State plan, and if such individual is not entitled to aid to the blind by reason of prior residence in another State, the State agency shall promptly notify the Secretary of the fact that such individual has made such application and would be eligible for such aid if he satisfied such requirements. The Secretary shall thereupon pay directly to such individual for each month, beginning with the first month (after the month of such individual's application) in which such individual would have been eligible for aid to the blind if he satisfied such residence requirements and ending with the month preceding the first month in which he satisfies such requirements, an amount (as determined under regulations prescribed by the Secretary) equal to the Federal Government's proportionate share of the aid to the blind which such individual would receive for such month if he then satisfied such requirements.

"ASSISTANCE FOR NEEDS OF RECIPIENT ONLY

"SEC. 1008. Assistance paid to any individual under this title is to assist him in meeting his individual needs and is not for the benefit of any other person; and such assistance shall not be regarded as income of any person other than such individual."

AID TO THE PERMANENTLY AND TOTALLY DISABLED

SEC. 6. (a)(1)(A) Section 1402(a)(1) of the Social Security Act is amended to read as follows: "(1) provide that it shall be in effect in all political subdivisions of the State;".

(B) Section 1402(a)(3) of such Act is amended to read as follows: "(3) provide for the establishment or designation of a single State agency to administer the plan;".

(2) Section 1402(a)(8) of such Act is amended to read as follows: "(8) provide that the State agency shall, in determining need, take into consideration any other income and resources of an individual claiming aid to the permanently and totally disabled; except that, in making such determination, the State agency shall disregard (A) the first $50 per month of earned income, (B) the ownership by such individual (alone or with his or her spouse) of a home having an assessed value, less all encumbrances of record thereon, of less than $5,000 (except to the extent that he is receiving rental income therefrom), (C) the ability of such individual's family and relatives to provide for his support, (D) any donations of surplus food which may have been made to such individual from stocks of the Commodity Credit Corporation, and (E) the first $1,200 in value (over and above all encumbrances of record) of personal property owned by such individual;".

(3) Section 1402(a) of such Act is further amended by striking out the final period and inserting in lieu thereof a semicolon and the following: "and (13) provide that there will be no discrimination based on sex in determining the needs of individuals receiving assistance under the plan."

(4) Section 1402(a) of such Act is further amended by adding after clause (13) the following new sentence: "For purposes of clause (8)(E), no life insurance policy shall be valued at more than its present surrender value to the individual, and the term 'personal property' shall not include (i) the individual's clothing, furniture, household equipment, foodstuffs, fuel, personal jewelry, or other personal effects, or (ii) interment plots, money placed in trust or insurance for funeral, interment, or similar expenses, or any contract rights connected therewith, if such money, insurance, or contract rights do not exceed $500 in value."

(5) Section 1402(b)(1) of such Act is amended to read as follows:

"(1) Any residence requirement which excludes any resident of the State who has resided therein continuously for one year immediately preceding the application; or"

(b) The second sentence of section 1401 of such Act is amended by inserting before the period at the end thereof a semicolon and the following: "but no payment shall be made under this title to any State which has not also submitted, and had approved by the Secretary, State plans for assistance under titles I, IV, and X".

(c) Section 1404 of such Act is amended by striking out "or" at the end of paragraph (1), by adding "or" at the end of paragraph (2), and by inserting after paragraph (2) the following new paragraph:

"(3) that in the administration of the plan there is imposed, as a condition of aid to any individual, a requirement that such individual subject his home to a lien of any kind or transfer to the State agency any interest in his home;".

(d) Title XIV of such Act is amended by adding at the end thereof the following new sections:

"DIRECT PAYMENTS TO INDIVIDUALS NOT SATISFYING RESIDENCE REQUIREMENTS

"SEC. 1406. If an individual, after making application for aid to the permanently and totally disabled, is denied such aid by the State agency solely because he does not satisfy the residence requirements imposed under the State plan, and if such individual is not entitled to aid to the permanently and totally disabled by reason of prior residence in another State, the State agency shall promptly notify the Secretary of the fact that such individual has made such application and would be eligible for such aid if he satisfied such requirements. The Secretary shall thereupon pay directly to such individual for each month, begining with the first month (after the month of such individual's application) in which such individual would have been eligible for aid to the permanently and totally disabled if he satisfied such residence requirements and ending with the month preceding the first month in which he satisfies such requirements, an amount (as determined under regulations prescribed by the Secretary) equal to the Federal Government's proportionate share of the aid to the permanently and totally disabled which such individual would receive for such month if he then satisfied such requirements.

"ASSISTANCE FOR NEEDS OF RECIPIENT ONLY

"SEC. 1407. Assistance paid to any individual under this title is to assist him in meeting his individual needs and is not for the benefit of any other person; and such assistance shall not be regarded as income of any person other than such individual."

MISCELLANEOUS PROVISIONS

SEC. 7. (a) As used in the provisions of the Social Security Act amended by this Act, the term "Secretary", except when the context otherwise requires, means the Secretary of Health, Education, and Welfare.

(b) Section 618 of the Revenue Act of 1951 (relating to public access to State public assistance records) is repealed.

(c) No check or warrant drawn in payment of assistance to any individual under title I, IV, X (or XIV of the Social Security Act, and no envelope or other outer covering therefor, shall bear any printing or marking which indicates or implies that such individual is indigent or a pauper.

(d) The amendments made by sections 3 (d), 4 (d), 5 (d), and 6 (d) shall apply with respect to months beginning after the date of the enactment of this Act. Section 7 (b) shall apply with respect to payments to which the States (including the agencies and political subdivisions thereof) become entitled after the date of the enactment of this Act. Sections 7 (a) and 7 (c) shall take effect on the date of the enactment of this Act. The remaining amendments made by this Act shall take effect on July 1, 1962.

JUVENILE DELINQUENCY CONTROL

Mr. HUMPHREY. Mr. President, during the past 10 years there has been an alarming increase in juvenile delinquency, and we face a dangerous acceleration of this trend unless we soon launch a broad national effort to control juvenile delinquency.

Juvenile crime is still rising at a fast rate—faster than our population growth, and much faster than adult crime is increasing.

The recent FBI report on crime in 1960 shows that arrests of adults in 1960 were up 2 percent over 1959.

But arrests of youngsters under 18 years of age were up 6 percent over the 1959 total. More than 400,000 juvenile lawbreakers were in trouble with police in 1960.

Since 1949, there has been a steady increase in national delinquency statistics—a rise that far exceeds the growth of our child population. Statistics from the Children's Bureau indicate juvenile delinquency cases increased more than 200 percent between 1948 and 1956, while the child population increased during the same period by only 19 percent.

From 1952 to 1957, arrests of young people under 18 years of age increased 2½ times as fast as the population in the 10- to 17-year-old age bracket.

Juvenile delinquency is not confined to urban areas. It is not confined to one region. A study of 520,000 juvenile court cases in 1956, showed that 24 percent of these cases were in semiurban areas and 11 percent were in rural areas.

Clearly, juvenile delinquency is a national problem. It requires Federal action as well as action by our States and local communities. We need improved methods to deal with juvenile delinquency and we need a great increase in the number of trained, qualified, experienced personnel to help our young people.

I am proud to note that the University of Minnesota launched a training project in delinquency control in 1953. Prof. John R. Ellingston, of the University of Minnesota, in testimony before the Juvenile Delinquency Subcommittee, stressed the need for trained personnel. He said:

> People are all-important in rehabilitation. Consequently, the selection and training of all personnel who deal with delinquent children becomes indispensable to rehabilitation and prevention. To stimulate and facilitate the teaching of this group seems to me to offer the greatest opportunity in this area to Congress. The biggest returns from any investment by Congress in the delinquency control field will come from aid to training personnel.

The Department of Health, Education, and Welfare has estimated the shortage of trained social workers at more than 15,000. There is also a shortage of trained juvenile probation officers—only 1 out of 10 has professional training.

Only one-half of middle-sized communities and one-fourth of communities with less than 10,000 population have specialized units for handling children's cases with specially trained police officers, although most bigger cities have better facilities and better trained juvenile police officers.

In the 86th Congress, legislation was introduced to stimulate a national effort to help control juvenile delinquency. The senior Senator from Pennsylvania [Mr. CLARK] very ably conducted hearings on this subject in 1959, and we approved juvenile delinquency control legislation early last year, but I regret to say that this bill did not receive any action in the House of Representatives.

I wish to pay tribute to the fine leadership of the chairman of the Senate Committee on Labor and Public Welfare [Mr. HILL] and the senior Senator from Pennsylvania [Mr. CLARK], and I pledge my full cooperation in their efforts to enact constructive legislation in this field.

Mr. President, I am proposing legislation to provide for Federal assistance and cooperation with States to strengthen and to improve State and local programs for control of juvenile delinquency. This proposal makes the broadest possible allowances for local direction, local autonomy, and local decision.

A Federal Advisory Council on Juvenile Delinquency would be created in the Department of Health, Education, and Welfare to advise the Secretary and to present programs for decreasing the delinquency problem and for its control and treatment.

Under my proposal, Federal funds authorized for State and local delinquency control programs would be $5 million the first year, $7,500,000 the second, $10 million the third year, and for the following 4 years, such amounts as Congress may decide.

Allotments to each State would be based on the ratio of its child population to the total child population of all the States, but there would be a minimum allotment of $50,000 per State.

My proposal authorizes $5 million a year for 7 years to help States and nonprofit institutions of higher learning to support personnel training for control and treatment of juvenile delinquency.

It also authorizes $1 million a year for 7 years for research, demonstration, and development projects—projects which may eventually pave the way toward great improvements in our attack on juvenile delinquency.

The total cost of my proposal would not exceed $16 million a year. This is an essential investment in the welfare of our young people, and I am confident that it will pay great dividends.

Many authorities on juvenile problems agree that the career of one juvenile delinquent can cost the taxpayers $25,000 in police, court, confinement, and parole expenses. Every time we save a youngster from delinquency, we are saving the taxpayers an average of $25,000—and this is quite apart from the contribution that delinquency prevention and control can make to the moral and spiritual welfare of our Nation.

Certainly we must rely on the home, the church and the school to help combat juvenile delinquency, but let us give national support to stimulate cooperative efforts by our States, our local communities, and our local agencies which are working on this serious problem.

Mr. President, I introduce for appropriate reference my bill entitled "The Delinquent Children's Act of 1961."

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1512) to provide for assistance to and cooperation with States in strengthening and improving State and local programs for the dimunition, control, and treatment of juvenile delinquency, introduced by Mr. HUMPHREY (for himself and Mr. MORSE), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. MORSE. Mr. President, I consider it an honor and a privilege to join with the distinguished Senator from Minnesota in cosponsoring the bills which he has introduced.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the name of the distinguished senior Senator from Oregon [Mr. MORSE] be added as a cosponsor of my bills on humanitarian and old-age rights and on juvenile delinquency control.

The PRESIDENT pro tempore. Without objection, it is so ordered.

EXTENSION OF TIME WITHIN WHICH CERTAIN AGREEMENTS RELATING TO ADVERTISEMENTS MAY BE ENTERED INTO

Mr. HICKEY. Mr. President, I introduce for appropriate reference, for my colleague the senior Senator from Wyoming [Mr. MCGEE] and myself, a bill to amend title 23 of the United States Code to extend to July 1, 1963, the period within which certain agreements relating to outdoor advertisements may be entered into by the Secretary of Commerce and the States.

It is the thought of the Wyoming State Highway Commission that the enactment of the amendment would give the State additional time to better utilize facilities the State has set in motion to promote the Interstate Highway System as it relates to Wyoming.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1513) to amend title 23 of the United States Code to extend to July 1, 1963, the period within which certain agreements relating to outdoor advertisements may be entered into by the Secretary of Commerce and the States, introduced by Mr. HICKEY (for himself and Mr. MCGEE), was received, read twice by its title, and referred to the Committee on Public Works.

DEFENSE CONTRACTS FOR LABOR-DISTRESSED AREAS

Mr. WILLIAMS of Delaware. Mr. President, I am very much concerned over recent statements that have been released by the new administration to the effect that defense contracts and other types of Government procurement contracts are to be directed to labor-distressed areas apparently without regard to the possibility that contractors in those areas may not always be the lowest bidder.

In this connection, President Kennedy in a recent message to the Congress stated:

> And I have today sent a directive to the Secretary of Defense, the Secretary of Labor, and the General Services Administration requesting prompt steps to improve the machinery by which Federal contracts can be channeled to firms located in labor-surplus areas.

Lately there has been appearing in the press statements that the Defense Department and the General Services Administration would speed up their purchases and that they would try to channel their procurements into areas of substantial unemployment.

The General Services Administrator frankly stated that the aim was to help ease the Nation's economic plight.

Under this order, it is assumed that contracts on which competitive bids would normally be in order will now be negotiated with factories in these labor-surplus areas, and the administration will then direct procurements to those areas even though the cost to the Government under these negotiated contracts may be higher than the lowest available bids from other areas.

Apparently President Kennedy in issuing this directive overlooked an amendment which was incorporated in last year's Defense appropriation bill—Public Law 601 of the 86th Congress.

This amendment, as approved July 7, 1960, specifically prohibits any of the Defense Department appropriations for fiscal year 1961 being used for the purpose of directing contracts to areas to relieve economic dislocations.

I quote the language of this amendment as adopted:

> *Provided further,* That no funds herein appropriated shall be used for the payment of a price differential on contracts hereafter made for the purpose of relieving economic dislocations: *Provided, however,* That none of the funds appropriated in this Act shall be used except that, so far as practicable, all contracts shall be awarded on a competitive basis to the lowest responsible bidder.

This provision specifically prohibits any of the appropriations contained in the Defense Appropriation Act of fiscal year 1961 from being used for the payment of any contract which is negotiated and awarded to any manufacturer at prices higher than the lowest responsible bidder, and it prohibits any of the funds under that appropriation from being used for the payment of any price differentials on any contracts made for the purpose of relieving economic conditions.

Neither the Defense Department nor the General Services Administration is operating a relief agency. Their job is to buy the supplies of the Government at the lowest possible prices, and under the law this must be done at least as far as expenditures of the 1961 Defense appropriations are involved.

Furthermore, if this new policy were adopted as a standard procurement policy for the U.S. Government, it would mean the establishment of the greatest era of influence peddling this Capital has ever known.

To adopt this procedure as standard buying practice would be an open invitation to contractors in surplus labor areas not to figure their prices down to levels where they would be the lowest bidders in order to obtain Government business, but rather to establish their prices for all that the traffic would bear and then depend upon political influence at the congressional or State levels to bring pressure upon the procurement offices of the Defense Department and the General Services Administration to award the contracts to their States or congressional districts.

It has always been my contention that if a factory is operating below capacity and is located in a labor surplus area, there is no reason why it cannot bid on Government procurement at prices as low as its competitors unless there is inefficiency in its management or unless it is depending on its ability to cash in on political influence.

For several years, I have introduced legislation the purpose of which was to require that all procurement agencies of the U.S. Government be required to request competitive bids and to award contracts to the lowest responsible bidder—except only in those cases wherein the solicitation of competitive bids would not be feasible from a defense standpoint, such as in cases of the building of the first nuclear submarine, missiles, and so forth.

I am today again introducing this legislation which would establish this requirement as general law, and expressing the hope that this time the appropriate committee will see fit to approve this greatly needed legislation.

In the meantime, I am calling to the attention of the executive branch the law which is already in effect as far as any expenditures under the 1961 Defense appropriations are involved.

I am today writing both the Secretary of Defense and the Administrator of the General Services Administration, calling their attention to this provision of Public Law 601 of the 86th Congress which specifically prohibits the awarding of contracts in labor surplus areas at prices higher than those available under responsible competitive bids.

At the same time, I am writing the Comptroller General of the United States, asking that his Department give particular attention to see that this law as it affects the 1961 Defense appropriations is complied with.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1514) to require the use of competitive bidding to the greatest practicable extent in the procurement of property and services, by the Armed Forces through the establishment by the Secretary of Defense of specific standards governing the use of negotiated contracts for such procurement, and for other purposes, introduced by Mr. WILLIAMS of Delaware, was received, read twice by its title, and referred to the Committee on Armed Services.

SUPPLEMENTAL FUNDS FOR SCHOOL LUNCH PROGRAM

Mr. WILEY. Mr. President, I introduce for appropriate reference a bill to provide supplemental funds amounting to $10 million for the fiscal year 1961.

Over the years, the national school lunch program—benefiting more than 13½ million students—has been first, an important factor in maintaining the health of our youth; and, second, a significant outlet for surplus commodities. About 265,000 students in Wisconsin are enjoying and benefiting from lunches served in the schools.

Unfortunately, the program is running out of money.

Recently, for example, Gordon Gunderson, director of the school lunch program for Wisconsin, informed the participating schools that it would be necessary, on May 1, 1961, to cut back Federal reimbursement for lunches from 5 to 1½ cents per lunch. This threatens serious curtailment of this important program—not only in Wisconsin but other States throughout the Nation.

Based upon national school lunch program expenditures for reimbursement of lunches served July 1960 through January 1961, and upon projections for the remainder of the year, it appears that about half the States will run out of money before the end of the year. They will either have to reduce reimbursement rates for lunches served or not pay all claims submitted in the latter months of the school year.

The history of the school lunch system, I believe, well justifies Federal support at the current level of reimbursement. To help accomplish this objective, I am introducing a bill to provide an additional $10 million supplemental appropriation for the current year.

Moreover, I believe Congress should take early and favorable action on such legislation.

At this time, I request unanimous consent to have the following materials printed at this point in the RECORD:

First, a list of the States which are expected to run out of money prior to

the end of the school year; and, second, a series of messages from directors of the school lunch program throughout the country stressing the need for supplemental funds for the school lunch program.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the matters referred to will be printed in the RECORD.

The bill (S. 1515) to provide additional funds for carrying out the National School Lunch Act in the fiscal year 1961, introduced by Mr. WILEY, was received, read twice by its title, and referred to the Committee on Agriculture and Forestry.

The matters presented by Mr. WILEY are as follows:

LIST OF STATES

Arkansas, Colorado, Georgia, Illinois, Indiana, Iowa, Kansas, Kentucky, Massachusetts, Michigan, Mississippi, Missouri, New Hampshire, New Mexico, New York, North Dakota, Oklahoma, Puerto Rico, South Carolina, South Dakota, Tennessee, Washington, Wisconsin, Wyoming.

ASHLAND PUBLIC SCHOOLS,
Ashland, Wis., March 30, 1961.

Hon. ALEXANDER WILEY,
U.S. Senate, Washington, D.C.

DEAR SIR: This morning I was shocked when I received a letter from the department of public instruction, Madison, Wis., division of school lunch program, in which we were informed that the school lunch program reimbursement rates will be reduced effective May 1, 1961. I am writing immediately because of the grave concern I have as administrator of a large school area in Ashland County, namely the joint school district, city of Ashland, as to the effect this will have on our very vital school lunch program.

I am quite sure you are aware of the implication and the financial repercussions of this change in policy and the effect on an area such as Ashland. Furthermore, I am well aware of your real concern and your fight throughout your period in office for the use of dairy and agricultural products, which are the backbone of the State of Wisconsin. Your stand has always been admirable in the defense of Wisconsin's basic economy.

We have been informed that as of May 1, 1961, the reimbursement on type A lunches, with milk served, will be reduced to 1½ cents per lunch. I am sure you realize that this, if not altered, will place not only Ashland schools, but many schools in the State of Wisconsin, in a position of grave financial condition and possibly the discontinuance of such type A lunches. We have been informed that because of the greater participation in the lunch program this aid money has not been sufficient to continue our original grant of 5 cents per lunch. I know that this has happened before and that emergency grants have been made to continue the program until the end of the school year. We have also been informed that there is such legislation in committee but, that in plain English, "the committee is sitting on the recommendation." This, to me, certainly indicates a very poor attitude and a disastrous approach to the solution of this problem. I urge you, not only in behalf of the boys and girls in my school system, but thousands of others, that something be done immediately to remedy this situation.

In order that you might have a little specific background as to how it might affect Ashland, I should like to explain our situation. You are well aware that Ashland and three other counties in this area are in a distressed area zone, as determined by survey. We are in no position to be spending, or even securing additional tax funds to make up for this reduction. We have been feeding, in our school system, approximately 700 to 800 children. We are a consolidated district of 400 square miles. Many of the students come from remote areas and need this lunch. We have, for the past number of years, found it necessary, in spite of all aids, to subsidize our lunch program out of local tax moneys to the extent of $9,000 to $10,000 per year. Within the past year we have increased the cost of student payment to the State average which is 25 cents. With a reorganization of buying, efficient management, and the increased student payment, we still will be operating, in all probability, with a deficit of $1,000 to $2,000. This must be made up from local school funds. We need this aid desperately. It does not make sense to me to have the aid on a type A lunch, which is a complete, well-balanced plate lunch, with half pint of milk included, to be reduced from 5 to 1½ cents in aids and still continue a 4-cent aid on each half pint of milk that the child drinks during the day, which is not connected with the actual meal. In other words, if this reduction goes through, we might as well forget about the A lunch and just operate the milk program and collect its aid. This, I will admit, would defeat the intent of the full lunch program.

I hope I have explained our specific situation. Last fall, because of economic conditions, my budget for the schools was reduced by the city council in the amount of $42,000. Someplace we will have to make up that money and we are not in a position to absorb any other unanticipated expenditures. Aside from the financial condition, it seems to me that an area such as we have in the northern part is vitally concerned with the health of children. We had better be concerned with the continuing of lunch aids at the original figure. I sincerely hope you will give this your immediate attention and see if this temporary Federal appropriation cannot be ferreted out of the committee for immediate action.

Thank you again for your efforts and your consideration for the boys and girls of Ashland and the Nation.

Yours very truly,
ROGER B. HOLTZ,
Superintendent of Schools.

STANLEY PUBLIC SCHOOLS,
Stanley, Wis., April 4, 1961.

Hon. ALEXANDER WILEY,
U.S. Senate, Washington, D.C.

DEAR SENATOR: We have been informed of a cut in our school lunch refund from 5 cents to 1½ cents for the months of May and June. Our school budget, like others, has been set up on a 5-cent basis. This drastic cut will mean in our area, as in the State, a definite added burden to our taxpayer. It could even mean, in some instances, a discontinuance of the school lunch program, a program that has become a very vital and necessary part of our educational system. Unquestionably, many students get their only real balanced meal at the school lunch. I am certain that you realize that we are reaching the saturation point in property tax for school purposes, and additional taxes will certainly create hardships. This is especially so in our present economic situation.

I sincerely hope and urge that you will use your influence to see that the original aid is provided for our school lunch program, and that it may continue as it is at present. May I assure you that your assistance will be appreciated by school people and parents in this State?

Very truly yours,
LINCOLN H. HALVERSON,
Superintendent.

SHEBOYGAN FALLS, WIS.,
March 29, 1961.

Hon. ALEXANDER WILEY,
U.S. Senate, Washington, D.C.

DEAR SENATOR WILEY: The department of public instruction has notified us that effective May 1, 1961, the reimbursement rate for school lunches will be 1½ cents per lunch. We have been currently receiving 5 cents.

This is a tremendous reduction in the Federal aid program, and I am wondering why this has taken place before the end of the school year. Our budgets were set last July. The State informs us that Federal funds have not been increased to meet the increase in participation this year.

Can we expect more Federal reimbursement next year? Will you do everything you can to make Federal funds available for this particular program, so that Wisconsin boys and girls and the public schools can continue to receive the same Federal aid allotment for lunches that they have been receiving in the past years?

Sincerely,
HENRY M. TALL,
Superintendent.

ONDOSSAGON PUBLIC SCHOOLS,
Ashland, Wis., March 29, 1961.

Hon. ALEXANDER WILEY,
U.S. Senator, Senate Office Building, Washington, D.C.

DEAR MR. WILEY: We have just received notice that the reimbursement rate applicable to all type A lunches with milk served on and after May 1, 1961, will be reduced from 5 to 1½ cents per lunch because of the lack of availability of Federal funds.

This reduction will work a tremendous hardship on most school districts as the operating budgets for the program were based on the 5-cent rate of reimbursement.

We hope that you will realize and understand the hardships that will be created by this cut in reimbursement and will introduce and support necessary legislation to raise the necessary funds to restore the original rate of reimbursement.

Thank you for your careful consideration of this important matter.

Yours very truly,
RONALD R. STUBER,
District Superintendent.

DES MOINES, IOWA, *April 5, 1961.*

Senator ALEXANDER WILEY,
Senate Office Building, Washington, D.C.:

At present 4-cent rate of reimbursement, fund will be exhausted with payment of 50 percent of March school lunch claims. Need additional $550,000 to pay all claims in full for year.

PAUL S. JOHNSTON,
Superintendent, Department of Public Instructions.

DENVER, COLO., *April 5, 1961.*

Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

You have the support of all of us who are engaged in school feeding programs in your effort to obtain additional funds for the national school lunch program. Schools have tried desperately hard to keep the charge for lunches at a minimum. If they are forced to raise the charge the last couple of months because of not getting Federal assistance many children will be forced to drop out of the program. Many schools now are unable to meet their obligation to furnish free meals to needy children.

CHARLES W. LILLEY,
Chairman, Legislative Committee, American School Food Service Association.

CHARLESTON, W. VA., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Funds available under the national school lunch program in West Virginia will provide Federal reimbursement this year at the rate of only 5 to 6 cents per lunch. Nineteen percent of total lunches served public-school children during month of February 1961 were free or at reduced price.

FAITH CHALMERS,
School Lunch Program,
State Department of Education.

DENVER, COLO., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senator Office Building,
Washington, D.C.:

Colorado will not be able to pay March school lunch claims in full in spite only paying 3½ cents reimbursement with most protein commodities used up and heavy demand for free meals in some areas will make it difficult for schools to carry on unless additional Federal funds appropriated. We had a 25 percent increase in participation in December.

BYRON W. HANSFORD,
Colorado Commissioner of Education.

BALTIMORE, MD., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senator from the State of Wisconsin,
Senate Office Building, Washington, D.C.:

Insufficient funds necessitated reduction of reimbursement rate for type A school lunches served to children in public schools of Maryland from 4 cents to 2½ cents effective April 1, 1961.

GEORGE A. MYERS,
Assistant State Supervisor,
School Lunch Program.

COLUMBIA, S.C., *April 5, 1961.*
Hon. ALEXANDER WILEY,
U.S. Senator,
Senate Office Building, Washington, D.C.:

Appreciate effort in securing supplemental school lunch appropriation. Present Federal funds 5 cents reimbursement for school lunches in South Carolina will be exhausted end April.

KATHLEEN E. GASTON,
State Supervisor, School Lunch Program, State Department of Education, School Lunch.

LANSING, MICH., *April 5, 1961.*
Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Re supplemental school lunch appropriation May and June claims in Michigan reduced to 1.8 cents per lunch. Total amount needed for 100 percent reimbursement, $280,000.

JAMES L. BOROUGH,
Chief, School Lunch Division,
Department of Public Instruction.

SPRINGFIELD, ILL., *April 5, 1961.*
Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Happy to hear that you are introducing bill Thursday for supplemental school lunch appropriation. Illinois will be out of funds by June 1, 1961. We will pay no June claims. In other words, we will be out of funds completely by June 1, 1961, and cannot pay much more than 50 percent of May claims. This will reduce our reimbursement to a very small figure of approximately 4 cents per plate lunch. Help here is urgently needed.

JOHN C. DELAURENTI,
Director, School Lunch Division.

PROVIDENCE, R.I., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Expect school lunch funds to be exhausted with payment of May claim for reimbursement in Rhode Island.

ELIZABETH F. ANGELL,
Chief, School Lunch Services.

TALLAHASSEE, FLA., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Florida needs $150,000 supplemental school lunch apportionment to meet essential needs remainder this school year.

THELMA G. FLANGAN,
Supervisor, School Lunch Program.

SALEM, OREG., *April 5, 1961.*
Hon. ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Supplemental school lunch appropriation urgently needed. Current reimbursement rate of 3.2 cents all time low with 10 percent increase in number of programs and 9 percent increase in number of meals being served this year.

LAURA P. WELLS,
Director, Oregon School Lunch Program.

BOISE, IDAHO, *April 5, 1961.*
Senator ALEXANDER R. WILEY,
Senate Office Building,
Washington, D.C.:

Pleased that you will introduce supplemental school lunch appropriations bill tomorrow. Our present uniform rate of 4 cents per lunch will be reduced to 3 cents on May 1. If increase in participation continues it will be lower. Hope this information will assist you.

Good luck.

CECIL F. OLSON,
Idaho School Lunch Director.

HARTFORD, CONN., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Connecticut allotment school lunch funds for 1961 fiscal $779,527. About $2,165,000 needed to pay full reimbursement at 9 cents for 10 months; payment of .036 per meal for April and May will liquidate present allotment; deficiency appropriation of $430,686 will enable 9 cents reimbursement through June.

Mrs. EDITH M. BLAKELEY,
Director, Connecticut State
School Lunch Program.

ST. PAUL MINN., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Because of existing deplorable economic conditions in our eight northeastern counties, particularly our less than 3-cent per lunch reimbursement rate from Federal funds and remote possibility any help from additional surplus Federal commodities balance this school year Minnesota is definitely interested in your school lunch deficiency bill.

A. R. TAYLOR,
Director, Community School Lunch Section, State Department of Education.

ATLANTA, GA., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Georgia school lunch funds will be exhausted after April. Need funds to pay May school lunch reimbursement. Average rate now is 3.7 cent need for free lunches continues to increase.

ELEANOR PRYOR,
State Supervisor,
School Lunch Program.

LITTLE ROCK, ARK., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Supplemental school lunch appropriation is seriously needed in Arkansas; unable to pay May claims in full. Two programs closed March 30 due to low reimbursement rate. Three-meal load increasing daily because of unemployment.

RUTH POWELL,
Director, School Lunch Program,
State Department of Education.

FRANKFORT, KY., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Kentucky lunch funds will be exhausted April 13, 1961. Estimate $230,000 needed to complete fiscal year.

C. E. BEVINS,
Director, Division of School Lunch,
Bureau of Instruction, Kentucky
State Department of Education.

MADISON, WIS., *April 5, 1961.*
Hon. ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Am grateful for your action introducing bill for additional school lunch funds. Wisconsin will need $150,000 to pay 5 cents per lunch for the remainder of this school year.

GORDON W. GUNDERSON.

MONTGOMERY, ALA., *April 5, 1961.*
Hon. ALEXANDER WILEY,
Senator, State of Wisconsin,
Senate Office Building,
Washington, D.C.:

Will need approximately $500,000 to pay 5 cents per lunch in Alabama schools for the year 1960–61. This estimate based on 7.8 percent increase as indicated by program comparison through November 1959 and 1960. Payment for 1959–60 averaged 4.8 cents per lunch.

ROY T. ALVERSON,
State Supervisor,
School Lunch Programs for Alabama.

CONCORD, N.H., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Legislative chairman of American School Food Service Association requests we submit you our evidence for supplemental school lunch appropriation.

New Hampshire will reimburse 5 cents per meal on school lunch program through April. All May claims will be prorated—estimated reimbursement will be 2 cents. No reimbursement for June.

RUTH M. CUTTER,
New Hampshire State Director,
School Lunch Program.

LINCOLN, NEBR., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Encourage supplemental school lunch appropriation. Nebraska reduced rate 2 cents this year resulting in hardship most schools.

ALLEN A. ELLIOTT,
Director, School Lunch Program.

SANTA FE, N. MEX., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

New Mexico cut school lunch reimbursements drastically at beginning of fiscal year.

This was necessary due to decrease in appropriation as result of per capita income rise in New Mexico. There has been a 15-percent increase in participation this year. Schools have been notified that beginning April 1, reimbursements will again be reduced. This is a hardship on all programs and it means that a number of schools are discontinuing their programs for the balance of this year. Additional reimbursement at this time would be of great help.

TOM WILEY,
Superintendent of Public Instruction.

BISMARCK, N. DAK., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Reimbursement rate type A lunch in North Dakota was 4 cents for meal with milk and 2 cents for meal without milk first 5 months of school year. Rate reduced to 3 cents and 1 cent for remainder of school year. Expect to pay reimbursement at reduced rate for remainder of school year. Present reimbursement rate so low as to be almost meaningless. Would urge supplemental appropriation.

ETHEL HEISING,
Director, State School Lunch Program,
Department of Public Instruction.

SALT LAKE CITY, UTAH, *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.:

Utah share of Federal school lunch funds now 3.2 cents per meal. Percent funds at 6 cents would have been exhausted on January 31, 1961.

RODNEY A. ASHBY,
State Director,
Utah School Lunch Program.

DOVER, DEL., *April 5, 1961.*
Senator ALEXANDER WILEY,
U.S. Senate Building,
Washington, D.C.:

A supplemental school lunch appropriation is imperative for the good operation of a lunch program in Delaware since our reimbursement rate now is 3 cents for a type A lunch while we get 4 cents for half pint milk. Anything you can do will be greatly appreciated.

MARTHA BONARD,
State Director, School Lunch.

OLYMPIA, WASH., *April 5, 1961.*
Senator ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

April rate of reimbursement reduced 50 percent additional reductions for May and June unless supplemental funds received.

LOUIS BRUNO,
State Superintendent of
Public Instruction.

JEFFERSON CITY, MO., *April 5, 1961.*
Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.:

Greatly encouraged your action on supplemental funds for school lunch program. Missouri received allocation $116,000 less than last year. Participation by children increased 7 percent. Reimbursement reduced to 4 cents all year. Funds will become exhausted with payment approximately 90 percent March claims. Free lunch requests on increase many areas because of unemployment. Would need additional $500,000 to continue present reduced rate throughout remainder this school year. Senator SYMINGTON informed on Missouri situation.

Best wishes.

EARL M. LANGKOP,
Director, School Lunch Section,
State Department of Education.

PIERRE, S. DAK., *April 6, 1961.*
Hon. ALEXANDER WILEY,
U.S. Senator, Wisconsin,
Senate Office Building,
Washington, D.C.:

Federal allocation for South Dakota school lunch was reduced $41,924 present school year. With increased participation this forced 2-cent reimbursement reduction January 1, 1961. Would have required about $95,000 above this year's allocation to hold last year's rate.

PAUL M. MASCHALK,
Director, School Lunch Division,
Department of Public Instructions.

GALE-ETTRICK SCHOOL DISTRICT,
Galesville, Wis., April 4, 1961.
The Honorable ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

DEAR SIR: I have been notified by Gordon W. Gunderson, director of school lunch programs for the Department of Public Instruction of the State of Wisconsin, that effective May 1, 1961, the reimbursement rate for type A lunches will be reduced from 5 to 1½ cents per meal.

I am sure you realize the hardships that this reduction will have on many school districts throughout the Nation. Our school budgets are established during the month of July and are closely related to expenditures and receipts which are anticipated. A sudden reduction of hot lunch receipts will force many schools either to discontinue their hot lunch programs or raise the cost to the students. In the latter case, many students of families unemployed will be faced with additional hardships.

I am requesting that you do all in your power to get additional aids for the current year.

Sincerely,

VERMONT JOHNSON,
Superintendent of Schools.

AUGUSTA COMMON SCHOOLS, DISTRICT NO. 1, JOINT, EAU CLAIRE COUNTY, WIS.,
Augusta, Wis., April 4, 1961.
The Honorable ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILEY: I am in receipt of a letter dated March 28 from the department of public instruction, school lunch division, Madison, Wis., stating that the reimbursement rate applicable to all type A lunches with milk served after May 1, 1961, will be reimbursed at the rate of 1½ cents per meal. This is a drop of 3½ cents per meal for the rate of reimbursement.

To say the least, this was not a pleasant surprise. The reason given in this letter for this drastic cut in reimbursement rates is that the rate of increase in participation this year over previous years has doubled and that Federal funds made available for the program for this period have not increased. I will accept the two reasons given without question. I will not, however, accept the short notice given as to such a decrease in the amount of reimbursement we will be receiving.

It would seem to me that an organization such as our Federal Government, considering the number of employees they see fit to hire, should have realized before this date that a cut in the rate of reimbursement would be forthcoming, and that those of us on the local level in charge of this activity could have been notified somewhat earlier. We at least then would have been able to do a little future planning with regard to the financing of our lunch programs.

I would also like to seriously recommend that you investigate every possibility with regard to finding available funds so that this drastic cut in reimbursement rates would not be necessary. I could understand cutting it a cent or 1½ cents, but I think you will have to agree that 3½ cents per meal in an operation such as this, which is certainly not of a profitmaking type, is going to cause hardships at the local level. If one would know this were to take place a year ahead so that we could make adjustments in our budget, it would not be nearly as hard to substantiate to boards of education and local communities.

It would seem to me that care should be taken in the future in the methods used for determining the rate at which funds are being expended so that something of this type does not happen again. Thank you.

Sincerely yours,

NEAL J. FELLRATH,
Superintendent.

JOINT SCHOOL DISTRICT NO. 1,
Black Earth, Wis., April 4, 1961.
Senator ALEXANDER WILEY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR WILEY: As the administrator of one of Wisconsin's many small school districts, I appeal to you for help. Ever since I received notice of the reduced income from Federal funds for the operation of our hot lunch program during May and June I have been in a quandary.

The loss of reimbursement from 5 cents per meal to 1½ cents will mean quite a loss to the district this year. It is just natural that it upsets the whole budget that we have set up where tax funds have been collected and already allocated.

I know that you are aware of the slight recession in employment. This factor also carries over to this lunch program where the school district pays for reduced and free lunches for underprivileged children.

I again appeal to you to do everything in your power to help get an additional appropriation of funds for the remainder of the school year.

Sincerely,

KENNETH E. RIPPLE,
Supervising Principal.

MANITOWOC, WIS., *April 4, 1961.*
Hon. ALEXANDER WILEY,
U.S. Senator,
Washington, D.C.

DEAR SENATOR WILEY: This letter is written to you regarding a notice which we have just received indicating that the funds for the school lunch program in Wisconsin are about to be exhausted and that it will be necessary for us to increase the rates which we charge our pupils for their lunches for the remainder of the school term.

This is a most disturbing situation because, as you can imagine, there will be a considerable amount of readjustment and at the present time, with many families having a struggle after having been unemployed for some time, I fear that the girls and boys will not be able to avail themselves of the hot lunches which they have had previously. It is unfair for us to assume that the board of education will take up the slack, and for us to raise the price of the lunches at this time of year would undoubtedly cause some of our cooks to be thrown out of work as well as the children being deprived of their hot lunch program. No doubt when the appropriation was set, it was thought that it would be sufficient to carry the program through the school term.

I wish to urge emergency legislation which will permit us to continue with our hot lunch program.

Sincerely yours,

ANGUS B. ROTHWELL,
Superintendent, Manitowoc, Wis., Public Schools.

GREEN BAY, WIS., *April 4, 1961.*

Hon. ALEXANDER WILEY,
Senate Office Building,
Washington, D.C.

DEAR SENATOR WILEY: We have just received notice that because of the exhaustion of the school lunch funds, there will be a decrease in the reimbursement to us for lunches served during May and June. This will mean an unanticipated expense to us of approximately $1,000, which must eventually go directly on the tax roll here.

At this time, when economic conditions make the continuance of the lunch program important for many individuals, I hope that you will use your efforts to attempt to get supplementary appropriations to cover this amount for the balance of the year.

Sincerely,

JOHN F. DAVID,
Supervising Principal, Preble-Humboldt-Bellevue School District No. 1.

CENTRAL HIGH SCHOOL,
JOINT DISTRICT No. 1,
KENOSHA COUNTY,
Salem, Wis., April 4, 1961.

Senator ALEXANDER WILEY,
New Senate Office Building,
Washington, D.C.

DEAR SENATOR WILEY: Speaking in behalf of our board of education, we were quite shocked to be informed of the drastic reduction in Federal aids for our hot lunch program. Permit us to say that this approximates a 65-percent reduction which will be felt severely and directly by the school children and parents. Likewise, the shortage for the month of May will be felt severely and directly by the students and parents in our district.

May we ask that you take immediate steps to seek additional funds to cover the month of May? It is further hoped that Federal funds will be provided for the hot lunch program by September 1.

Like many other schools, we object to this drastic and sudden reduction.

Sincerely yours,

A. H. ERICKSON,
Principal.

PUBLIC SCHOOLS OF THE
DISTRICT OF COLUMBIA,
Washington, D.C., April 5, 1961.

Hon. ALEXANDER WILEY,
Old Senate Office Building,
Washington, D.C.

MY DEAR MR. WILEY: Reference is made to the supplemental school lunch appropriation bill. The department of food services, the State agency for administering the program in the District of Columbia will need at least $20,000 additional school lunch funds to carry our program for the same periods as last year. This is the minimum we feel we will need.

Thank you for your help.

Very truly yours,

ALETA E. SWINGLE,
Director, Department of Food Services.

ESTABLISHMENT OF A RICHARD E. BYRD ANTARCTIC COMMISSION

Mr. WILEY. Mr. President, I introduce for appropriate reference a bill to establish a Richard E. Byrd Antarctic Commission.

The Great White Continent offers great unexplored opportunities to serve humanity.

This would include programs in science, commerce, communications, weather reporting, and other fields.

In 1960, the United States signed and ratified a 12-nation treaty. The objective is to attempt to first guard against exploitation of the continent for military purposes and second to encourage greater cooperation among the member nations in utilization of the potentials of the polar region—equal in size to Europe and the United States of America.

In this scientific, technological age—more closely meshing the interests of all nations—the United States has a vital interest in the development of Antarctica.

Unfortunately, U.S. activities until now, have been scattered, suffered from lack of coordination, and generally lack a centrally responsible body to create and execute policies. For example, approximately 14 agencies have participated in or expressed interest in research programs.

I am proposing the establishment of an Antarctic Commission to fill this vacuum. If established, the responsibilities of the Commission would include the following:

The design and execution of effective programs to serve U.S. interests.

Correlation of scattered activities.

Maintaining a depository of information relating to Antarctica.

Conduct of field and laboratory studies to further knowledge in science, commerce, weather reporting, communications, and other areas of potential significance.

Publish scientific, technical, historical, or other information relating to progress in our exploratory program.

Approve plans for and provide guidance for Antarctic expeditions conducted or supported by other agencies, and other purposes.

The establishment of this agency—proposed as the Richard E. Byrd Antarctic Commission—would serve, first, to create more effective policies relating to Antarctica; second, protect U.S. interests; and third, design more effective programs for utilization of the potentials of the area to serve the interests of the United States and humanity.

Until now, the Great White Continent has been wrapped in a veil of mystery. For the most part, Antarctica has been a little-known frozen ice cap in a far-distant polar region.

Scientific exploration, however, provides new evidence that the continent offers a real potential for serving the world in science, commerce, communication, weather reporting, and other fields.

During the latter part of 1960, Laurence C. Eklund, Washington correspondent for the Milwaukee Journal, wrote an outstanding series of articles on Antarctica. Joining the expeditionary forces at the South Pole, he created—in my judgment—one of the most interesting, informative, and valuable series of articles yet produced on a heretofore little-known topic. Accomplished under the most adverse conditions, these articles, I believe, deserve the consideration of Congress. As well, they merit high recognition as one of the outstanding reporting jobs of 1960.

Presenting a realistic picture of the Great White Continent—as well as the human side of our endeavors to conquer the frozen region, I request unanimous consent to have the bill, followed by a number of the articles by Mr. Eklund, printed at this point in the RECORD, and that the bill lie on the table for 1 week so that fellow Senators who wish to do so may join in sponsoring this legislation.

The PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill and articles will be printed in the RECORD, and the bill will lie on the desk, as requested by the Senator from Wisconsin.

The bill (S. 1516) to provide for continuity and support of study, research, and development of programs for peaceful uses in science, commerce, and other activities related to Antarctica, which shall include, but shall not be limited to, gathering, evaluating, correlating, and dispersing of information and knowledge obtained from exploration, research, and other mediums relating to weather, communications, travel, and other areas of information; also to coordinate Antarctic activities among those agencies of the U.S. Government and private institutions interested in or concerned directly with the promotion, advancement, increase, and diffusion of knowledge of the Antarctic; and to direct and administer U.S. Antarctic programs in the national interest, introduced by Mr. WILEY, was received, read twice by its title, referred to the Committee on Labor and Public Welfare, and ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Richard E. Byrd Antarctic Commission Act of 1959".

DEFINITIONS

SEC. 2. When used in this Act:

(1) "Commission" means the Richard E. Byrd Antarctic Commission.

(2) "Director" means the Director of the Commission.

(3) "Board" means the Board of Governors.

(4) "Commissioned officer" means a commissioned officer of the Armed Forces of the United States.

THE COMMISSION

SEC. 3. There is established in the executive branch of the Government, the Richard E. Byrd Antarctic Commission. The Commission shall consist of a Director, two Deputy Directors, and a Board of Governors.

FUNCTIONS OF THE COMMISSION

SEC. 4. The Commission shall—

(1) maintain a depository of information relating to the Antarctic including: (A) all records of the Commission, (B) originals or copies of records within the executive branch relating to the Antarctic, (C) books, pamphlets, periodicals, and articles dealing with the Antarctic, and (D) such other information as the Commission considers desirable;

(2) conduct such field and laboratory studies and evaluations as it considers advisable to further the knowledge of the Antarctic in science, commerce, and related activities, which shall include, but shall not be limited to gathering, evaluating, and dispersing of information and knowledge obtained from exploration, research and other mediums, relating to weather, communications, travel, and other areas of information;

(3) publish or arrange for the publication of scientific, technical, historical, and general information so as to further the dissemination of information about the Antarctic, when the dissemination is consistent with the interests of national security and

the public interest (publication may be made without regard to section 87 of the Act of January 12, 1895 (ch. 23, 28 Stat. 622), and section 11 of the Act of March 1, 1919 (ch. 86, 40 Stat. 1270; 44 U.S.C. 111));

(4) with the concurrence and approval of the Board, perform, at the request of the head of any executive agency, specific research, investigation, or experimentation in connection with matters relating to the national defense and/or the interests of the United States;

(5) approve the plans for and supervise Antarctic operations or expeditions conducted by, or supported by, other agencies of the United States except for operations or expeditions or parts thereof which are military in character;

(6) assist private Antarctic expeditions or research programs when such assistance is in the best interests of the United States;

(7) accept and utilize the services of voluntary and uncompensated, personnel and provide transportation and subsistence as authorized by section 5 of the Act of August 2, 1946 (ch. 744, 60 Stat. 808), as amended (5 U.S.C. 73b-2), for persons serving without compensation; and

(8) acquire by purchase, lease, loan, or gift, and hold or dispose of by sale, lease, or loan, real or personal property necessary for, or resulting from, the exercise of authority under this Act;

(9) receive and use funds donated to the Commission if such funds are donated without restriction other than that they be used to carry out the general purposes of this Act;

(10) report to the President before September 16 of each year, summarizing the activities of the Commission and making such recommendations as it considers appropriate. The report shall include the recommendation of the Board.

THE DIRECTOR OF THE COMMISSION

SEC. 5. (a) The Director shall be appointed by the President, by and with the advice and consent of the Senate, for a period of six years and shall be paid at the rate prescribed in section 107(a) of the Federal Executive Pay Act, 1956 (70 Stat.). He may be a person appointed from civilian life or a commissioned officer in an active or retired status.

(b) The Director shall—

(1) manage the affairs of the Commission;

(2) issue such regulations as he considers necessary to carry out this Act;

(3) appoint and fix the compensation of such personnel as may be necessary to carry out this Act; and

(4) be a member of the Board of Governors ex officio.

(c) The appointments made and the compensation fixed shall be in accordance with the Classification Act of 1949 and the regulations of the Civil Service Commission. However, the Director may employ such technical and professional personnel, and fix their compensation, as he considers necessary, without regard to the Classification Act of 1949 or the regulations of the Civil Service Commission. The Director may terminate the employment of any officers or employees, except the Deputy Directors, whenever he considers that termination to be in the best interests of the United States, except that no person in the classified service may be removed of suspended without pay unless it is accomplished under the Act of August 24, 1912 (ch. 389, 37 Stat. 555), as amended (5 U.S.C. 652).

DEPUTY DIRECTORS

SEC. 6. (a) The Deputy Directors shall be appointed by the President, by and with the advice and consent of the Senate, and shall perform such duties as he may prescribe.

(b) The Deputy Directors may be appointed from civilian life or may be commissioned officers in an active or retired status. However, if the Director is appointed from civilian life, only one Deputy Director may be a commissioned officer. If the Director is a commissioned officer, both Deputy Directors shall be appointed from civilian life.

(3) The Deputy Directors shall be paid $ a year.

MILITARY STATUS OF DIRECTOR AND DEPUTY DIRECTORS

SEC. 7. (a) When a commissioned officer is appointed as Director or Deputy Director, he is not subject to military authority and may not exercise command over any members of the Armed Forces of the United States except as the President may prescribe.

(b) The appointment of a commissioned officer as Director or Deputy Director does not affect his status or rank or the pay and allowances incident to his status or rank. He is entitled to receive the pay and allowances payable to an officer of his rank and length of service, for which the appropriate department shall be reimbursed from any funds available to defray the expenses of the Commission. He is also entitled to be paid by the Commission the amount by which the compensation provided for the Director or Deputy Director exceeds his annual military pay and allowances.

BOARD OF GOVERNORS

SEC. 8. (a) The Board—consisting of eleven members—shall be appointed by the President, by and with the advice and consent of the Senate. The Board shall consist of the President of the National Academy of Sciences; Director of the National Science Foundation; Secretary of Defense; Secretary of State; Secretary of Interior; Secretary of Commerce, or their designees, plus four selected from civil life who are eminently qualified in their professions so as to provide, in addition to Federal administration, a broad field of knowledge and experience which will properly relate the activities of the Commission to the national welfare.

(b) The members of the Board, in addition to the President of the National Academy of Sciences; Director of the National Science Foundation; Secretary of Defense; Secretary of State; Secretary of Interior; Secretary of Commerce, or their designees, shall be appointed for a period of six years, except that, (1) any member appointed to fill a vacancy occurring before the expiration of the term of his predecessor shall be appointed for the remainder of the term; (2) the term of office of the members first taking office after the date of enactment of this Act shall expire, as designated by the President at the time of appointment, one at the end of two years, one at the end of four years, and two at the end of six years, and (3) a member may be reappointed to the Board for not more than one additional term; and (4) the members of the Board who are Cabinet members shall be members of that Board during the tenure of office as Cabinet members.

(c) Members of the Board shall be paid at the rate of $50 per day—for each day—except members of the President's Cabinet during their services as members of the Board, and shall be allowed travel expenses as authorized by section 5 of the Act of August 2, 1946 (ch. 744, 60 Stat. 808), as amended (5 U.S.C. 73b-2).

(d) The Board shall—

(1) meet annually on the first Monday in November and at such other times as the Chairman determines;

(2) elect a Chairman and Vice Chairman, at the regular annual meeting, to serve for the following year;

(3) review and assess the research and exploration activities relating to the Antarctic; and

(4) make such recommendations to the Commission as they consider appropriate for the advancement and dissemination of knowledge of the Antarctic.

RESEARCH CENTERS

SEC. 9. (a) Under the provisions of this Act there shall be established a minimum of five, and not more than eight, research centers at academic and/or research institutions having special competences or interests in scientific aspects of polar research.

The Commission shall determine that each such center shall meet criteria prescribed by the Commission under the policy guidance provided by the Board of Governors, and the Commission shall be responsible for the overall development and coordination of programs of research which may be approved for development within the research centers in, and related to the Antarctic region. Such programs of research as may be initiated at the research centers with the approval of the Commission shall be supported by Federal or private funds.

(b) Due to the unique requirements of polar research, a designated number of fellowships shall be provided to permit qualified students to conduct studies at the research centers and also in Antarctica. The Commission shall be authorized to grant funds in support of fellowships specifically associated with polar research, recommended by the Director of the Commission and approved by the Board of Governors.

SERVICES AND FUNDS OF OTHER AGENCIES

SEC. 10. (a) The Commission may, with the consent of the agency concerned, accept and utilize on a reimbursable basis the officers, employees, services, facilities, and information of any agency of the United States. However, such services and facilities may be furnished only if it does not interfere with the performance of the primary mission of the agency concerned. An agency having custody of data relating to the matters within the jurisdiction of the Commission shall, upon request of the Director, make that data available to the Commission without reimbursement.

(b) Funds available to any agency of the United States for scientific or technical research, educational, or other public service are available for transfer, with the approval of the head of the agency concerned, to the Commission for such use as is consistent with the purposes for which those funds were provided. Funds so transferred shall be spent by the Commission for the purposes for which the transfer was made or for general administrative expenses until such time as an appropriation is made available to the Commission.

ACTS AMENDED

SEC. 11. Subsection 107(a) of the Federal Executive Pay Act of 1956 is amended by adding the following after clause (22):

"(23) Director of the Antarctic Commission."

SEC. 12. Section 505 of the Classification Act of 1949, as amended (70 Stat. 762; 5 U.S.C. 1105), is amended by adding the following subsection:

"(f) The Director of the Antarctic Commission is authorized, without regard to any other provision of this section, to place a total of seven positions in the Antarctic Commission in grades 16, 17, and 18 of the General Schedule. Such positions shall be in addition to the number of positions authorized to be placed in such grades by subsection (b)."

The articles presented by Mr. WILEY are as follows:

NEW OPERATIONS NEAR FOR UNITED STATES IN ANTARCTIC—TASK FORCE TO LEAVE FOR 1961 EXPEDITION; AGENCY IS SOUGHT FOR COORDINATION

(By Laurence C. Eklund)

WASHINGTON, D.C.—For the sixth straight year, Navy Task Force 43, composed of all

branches of the Armed Forces, is poised for an ambitious assault on the frozen continent of Antarctica.

Using 3,000 men, 9 ships and more than 30 aircraft, the Navy will again transport United States scientists to stations set up in the 1957–58 international geophysical year.

The vanguard of this elite corps of scientists is winging its way south.

The whole of Operation Deep Freeze 1961, as this venture is called, will cost about $20 million.

This year's expedition has assumed a special significance in view of the historic action of the U.S. Senate on August 10 in ratifying the antarctic treaty.

PEACEFUL FUTURE VOWED

Through this treaty, the United States, the Soviet Union and 10 other nations, including all 7 that have territorial claims to Antarctica, have agreed that the "white continent" shall be used exclusively for peaceful purposes.

All 12 signers of the treaty have agreed that nuclear explosions and radioactive waste disposal shall be banned in Antarctica. No territorial claims or rights shall either be recognized or affected.

The United States, at the cost of more than $200 million in Government funds and 17 lives, has done more exploring in Antarctica than any other country, but has never claimed any territory.

But now the antarctic treaty gives us access to the entire continent, whether we claim it or not.

MILESTONE FOR INSPECTION

And despite the cold war rantings of Soviet Premier Khrushchev at the United Nations, the fact remains that the new treaty sets a vitally important milestone for international inspection to prevent atomic explosions. That is something the Russians have never before accepted.

President Eisenhower reminded the U.N. General Assembly that the 12 nations had united in declaring Antarctica off limits for military preparations.

"We could extend this principle to an even more important sphere," Mr. Eisenhower told the delegates.

"National vested interests have not yet been developed in space or in celestial bodies. Barriers to agreement are now lower than they will ever be again."

SCIENTISTS TO COOPERATE

This year, as in the last 4 years, United States and Russian scientists will cooperate in projects ranging from bird banding to making seismic soundings to determine the thickness of the Antarctic icecap.

Russia's Sveneld Evteev will accompany the University of Wisconsin traverse from McMurdo Sound to the South Pole. Gilbert Dewart of Cloverdale, Calif., who is presently at the Soviet Miarny Station, will accompany a Russian traverse next season before returning home.

Now that the treaty decision has been made, a number of Congressmen are pushing for a showdown in the next Congress on a proposal to coordinate our antarctic activities in a new commission.

LAWMAKERS OFFER BILLS

Representative ZABLOCKI, Democrat, of Wisconsin, and Senator WILEY, Republican, of Wisconsin, are authors of companion bills to create the Richard E. Byrd Antarctic Commission.

The measure didn't get anywhere in this Congress because of President Eisenhower's opposition, but the House Interior and Insular Affairs Committee has ordered an interim study looking to action next year.

ZABLOCKI protested that we were handling our antarctic activities in a piecemeal fashion among 14 Government agencies.

WILEY said the United States faced not only physical but organizational challenges in Antarctica.

Records from previous Antarctic expeditions are scattered all over the country for want of a central agency to take care of them, WILEY pointed out, and he insisted that this shortcoming must be remedied.

PERMANENCY IS HINTED

One gets the impression, listening to Government experts on Antarctica, that we are there to stay. In fact, there is serious talk of supplanting our temporary bases in that most inhospitable of the world's climates with permanent colonies of Americans, with men taking their wives with them.

Paul A. Siple, a veteran of 32 years of polar exploration who began as a Boy Scout, deplored the fact that we did not have a long-range program for the exploration of Antarctica. He suggested colonization. He is scientific adviser to the director of the Army research office.

"Operational as well as scientific pursuits should provide a means of career opportunity for those willing to dedicate their lives to such efforts," said Siple, who has left his family to spend periods of more than a year in the Antarctic.

ENTIRE FAMILIES

"Our current procedures do not encourage this type of exploration of Antarctica. We must look forward eventually to the establishment of permanent communities occupied by entire families to handle collection of required routine scientific data and to activate industrial exploitation of antarctic resources," he said.

Our most populous settlement in Antarctica is the naval air facility at McMurdo Sound, which is home to 130 Americans during the 5-month-long winter night.

In the summer months now approaching, the population will swell to more than 500 as it serves its role as a staging base.

There are 19 Americans at Amundsen-Scott Station at the South Pole, 21 at the inland Byrd Station, 17 in Hallett, operated jointly with New Zealand, 4 at Wilkes, now operated by Australia, and 1 each at Ellsworth, now operated by Argentina, and Mirny, one of the Russian stations.

THIRTY-EIGHT ARE SCIENTISTS

The makes a total of 193 Americans, including 38 scientists and 155 military men, who have spent the last winter season on this continent of almost 6 million square miles.

Siple predicted that Antarctica would become increasingly important as the rest of the world grew overpopulated and short of land space.

Other testimony pointing to the importance of Antarctica in our future comes from Lloyd V. Berkner, the eminent organizer of international scientific activity, and Senator HENRY M. JACKSON, Democrat, of Washington.

"Antarctica offers many physical and strategic advantages and promises to become an important connecting link in transportation between east and west," said Berkner, a native of Milwaukee.

Calling Antarctica "truly the world's last frontier," Senator JACKSON said that despite our investment of money and lives, we still knew less about the Antarctic today than did the pilgrims about America when they landed at Plymouth Rock.

[From the Milwaukee Journal, Oct. 12, 1960]

EKLUND, JOURNAL MAN, IS ON HIS WAY TO COVER DEVELOPMENTS IN POLAR VENTURE

Laurence C. Eklund of the Washington bureau of the Milwaukee Journal is on his way to Antarctica and, if the breaks are with him, to the South Pole. He is carrying a Wisconsin flag, presented by Governor Nelson, to plant in the eternal ice at the bottom of the earth. It is as certain as flight can be that Eklund will reach the American base at McMurdo Sound (about 8,000 miles from here), on the ice shield, the end of this week. Whether the Navy subsequently will fly him on to the pole, a thousand miles beyond McMurdo, will depend on the weather.

The Journal has assigned Eklund to report on polar activities, with particular attention to Wisconsin men and projects there. Watch for his stories in the weeks ahead.

As the Journal reported in a Washington bureau story August 29, the University of Wisconsin will become a polar and geophysical research center under a grant from the National Science Foundation.

GETS $634,000 IN GRANTS

The university's growing importance as the leading center of antarctic research was emphasized by a total of $634,000 in Foundation grants to it for antarctic research in the year beginning this month.

Eklund is in the first party of five for reporters scheduled to visit Antarctica for about about 3 weeks each. His Navy plane left Washington Monday with stops scheduled for San Francisco, Honolulu, the Fiji Islands and Christchurch, New Zealand, "where the Navy issues cold weather clothing and where we might switch to a C–124 Globemaster cargo plane," Eklund wrote in telling of his plans.

"We should try to have some stories on the general, overall picture in Antarctica as well as the strictly local Wisconsin angles," Eklund said.

STATE REFLECTED IN NAMES

In doing research on Antarctica, I have been struck with the fact that a number of features down there have been named after Wisconsin people—Kohler Range, Horlick Mountains, and so forth—and some current ones not yet decided by the Board on Geographic Names.

"I think we should have something, too, on the new atomic reactor—the first of a series of three—which will be installed at McMurdo and for which preparations will be underway while I am there.

"Then, of course, I want to have a separate roundup on what the University of Wisconsin scientists are doing down there, since they will have a key role. There ought to be something on the Navy's new under-the-ice camp at the Byrd station. Also, I want to see how the modern polar explorer lives.

GRADUATE OF UW

"And if I should get to the pole with Wisconsin's flag—well, that ought to be worth something in the Journal."

Eklund, 55, is a University of Wisconsin graduate and a native of Tomahawk. He was a political writer for the Journal before transferring to the Journal's Washington bureau in 1947. His interest in cold regions runs in the family. In fact, a group of islands in the King George VI Sound bears his family name.

Eklund Islands were named for his younger brother Carl, a polar explorer of international stature, in tribute to his contribution toward the world's knowledge of Antarctica.

Carl was scientific leader of the Wilkes Station, one of the U.S. bases set up in Antarctica in the International Geophysical Year (1959). He got that assignment on the basis of his accomplishments in Admiral Byrd's 1939–41 antarctic expedition. He is now Chief of the Polar Branch of the Army Research Office.

MADE DISCOVERIES

While with Byrd, Carl Eklund and Finn Donne made one of the major antarctic treks. They discovered Donne entrance, Eklund Islands, and the fact that Alexander I Land was an island, linked to the mainland only

by floating ice in a trough more than three times the length of Long Island Sound.

In one incident in the trek, Capt. (now admiral) Richard B. Black headed a search party when Ronne and Eklund were feared lost. He saw a dark object on a ridge ahead. It seemed to move, but he thought little of it, but * * *.

"From long habit I put up my binoculars and the object was moving and was plainly outlined as a dogteam and two men," Captain Black wrote later of that dramatic moment.

"FEELING OF JOY"

"I have rarely experienced such feeling of joy. Our search with all the uncertainty, the possibility of passing without contact, was ended. I shouted to the rest and there was a spontaneous cheer at what they saw, now clearly visible on the crest of the rise and less than a mile away. We headed at full speed for them, even the dogs catching the spirit of the happy occasion, and we were soon pumping hands and giving loud congratulations.

"Both Ronne and Eklund looked badly burned and very tired, but they certainly did not look to be in need of rescue. Eighty-four days and 1,200 miles of walking had made them as hard and tough as wolves."

[From the Milwaukee Journal, Oct. 16, 1960]

ANTARCTIC HAS FASCINATED WISCONSIN PEOPLE—MANY GEOGRAPHICAL FEATURES IN THE FROZEN LAND HAVE BEEN NAMED FOR THOSE FROM STATE; INCLUDED ARE EXPLORERS AND SCHOLARS

(By Laurence C. Eklund)

MCMURDO SOUND, ANTARCTICA.—This vast continent which until recent times has been unknown to man, has had a peculiar fascination for Wisconsin people.

It was no accident this year when the National Science Foundation announced its financial support of a polar and geophysical research center at the University of Wisconsin that will be the focal point of antarctic research for the entire country.

Much remains to be learned of the geography of this land mass, but already a score of features have been named for persons with a Wisconsin background, and several more have been proposed.

Some of the features were named for Wisconsin explorer-scientists who actually discovered them.

The U.S. Board on Geographic Names only within the last few weeks has approved naming several antarctic mountain peaks for University of Wisconsin scientists, so the names don't even appear on the maps yet.

Others whose names appear on the map are scholars and financial supporters who have never been in Antarctica but who have thrilled vicariously as the secrets of the continent have been revealed by new explorations.

RANGE NAMED FOR MANUFACTURER

The Kohler Range, for instance, was named by Rear Adm. Richard E. Byrd for Walter J. Kohler, Sr., former Governor of Wisconsin.

This is an extensive mountain range about 15,000 feet high, standing south of the base of the Martin Peninsula and estimated to extend as far as 80 miles in an east-west direction on the Walgreen coast.

The Kohler Range was discovered from a distance on February 24, 1940, by Byrd and other members of the U.S. Antarctic Service Expedition in a flight from the ship *Barkentine Bear*.

Kohler was one of the financial supporters of the Byrd Antarctic Expedition of 1933–35, and he helped furnish the seaplane from which the Kohler Range was discovered.

Another Wisconsinite who helped support that expedition was William Horlick, Racine malted milk manufacturer. The Horlick Mountains, named for him, were discovered in 1934 by the Byrd Expedition.

The Horlick Range lies southeast of the head of the Ross ice shelf and is tentatively interpreted as a continuation of the Watson Escarpment.

OBSERVATIONS MADE IN 1934

It was located on the basis of two observations, by Kennett L. Rawson on a flight on November 22, 1934, and by Quin A. Blackburn in December 1934 from a position looking up to two tributaries of the Robert Scott Glacier.

Mount Sidley, a 12,000-foot peak and the most imposing summit in the Executive Committee Range in Marie Byrd land, was named by Byrd for Horlick's daughter, Mrs. Mabelle Sidley. It was discovered by Byrd on November 18, 1934.

Belated recognition was accorded in 1957 to Malcolm P. Hanson, formerly of Madison, for his pioneering work in developing radio communication apparatus in polar regions with the Byrd Expedition of 1928–30.

The 1,500 foot Mount Hanson in the Harold Byrd Mountains was named for him. It was discovered by a geology party of that early expedition.

The Martin Peninsula was named for the late Prof. Lawrence Martin, who taught geology and geography at the University of Wisconsin from 1906–17 and who was an authority on the history of antarctic exploration.

This peninsula is about 20 miles wide and projects about 70 miles into the Amundsen Sea from its mountainous base on the Walgreen coast.

PICTURES TAKEN FROM AIR

It was photographed from the air in February 1940 by the U.S. Antarctic Service Expedition and later dilineated from aerial photographs taken by the U.S. Navy's Operation Highjump in December 1946.

Martin was honored at the suggestion of the U.S. advisory committee on antarctic names.

Martin was best known in Wisconsin for his report for the State geological survey, completed in 1915, on the physical geography of Wisconsin.

His work in this field was accomplished before automobiles were common, and on many of his trips to little known parts of the State he was accompanied by his fellow professor, Fredrick T. Thwaites, who supplied a car. The Thwaites ice tongue, an extensive ice formation about 30 miles wide, was named for Thwaites by the advisory committee on antarctic names.

FAMED AS GLACIAL GEOLOGIST

At UW, Thwaites gained fame as a glacial geologist and geomorphologist, meaning that he was an expert on the form of the earth's surface.

Another noted University of Wisconsin glaciologist and geomorphologist was Thomas C. Chamberlin, after whom the Chamberlin Glacier was named by the British Falkland Islands dependencies survey, which charted the glacier in 1947.

The glacier flows northeast into Whirlwind Inlet on the east coast of the Palmer Peninsula.

The Chamberlin Glacier was discovered by Sir Hubert Wilkins, an Australian, on a flight of December 20, 1928. It was photographed from the air in 1940.

In the same area are the Engel Peaks, a series of aligned peaks, named for Bud Engel, president of the Albert Richard Division of the Osterman Co. of Milwaukee.

These peaks extend for about 4 miles near Cape Rymill on the east coast of the Palmer Peninsula. They were photographed from the air in 1928 by Sir Hubert Wilkins and again in 1940 by members of the United States Antarctic Service Expedition.

GARMENTS CONTRIBUTED

They were sighted again by the Ronne Antarctic Research Expedition of 1947–48, whose leader, Capt. Finn Ronne, named them for Engel, who contributed garments suitable for winter use to the expedition.

Ronne entrance and Eklund Island were discovered in December 1940, by Ronne and Carl R. Eklund, a native of Tomahawk, Wis., when they were on a dog sledging trip.

An island about 5 miles long, with an elevation of 1,300 feet, was named by Ronne for Eklund, ornithologist and assistant biologist for the U.S. antarctic service expedition.

Nine years later Sir Vivian E. Fuchs, who in 1958 was to gain international fame for his dash across the Antarctic Continent, was able to determine that because of a recession of the ice in George VI Sound, the island is the largest of a group.

NAME GIVEN ENTIRE GROUP

On the basis of original discovery, the advisory committee on antarctic names applied the name "Eklund" to the entire group.

Musselman Cape was named for Lytton C. Musselman of Highland Flats, in Lincoln County near Tomahawk. This is a black rock promontory forming the south side of the entrance to Palmer Inlet on the east coast of the Palmer Peninsula. It was discovered in 1940.

Musselman was a member of the east base party that sledged across Dyer Plateau to the Eternity Mountains.

PIEDMONT NAME PROPOSED

The British Antarctic Place Names Committee proposed the naming the Bertrand ice piedmont for a Green Bay man, Prof. Kenneth J. Bertrand, geomorphologist, geographer, antarctic historian and member of the U.S. Advisory Committee on Antarctic Names.

This piedmont lies on the west coast of the Palmer Penisula between Rymill and Mikkelsen Bays. It was first surveyed in 1936.

Bertrand, whose mother, Mrs. Carrie Bertrand, still lives in Green Bay, is now an associate professor of geography at Catholic University in Washington, D.C.

For 10 years he was a student and teacher at the University of Wisconsin, where he got his Ph. D in 1940. He taught geography for 2 years at university extension centers at Wausau, Rhinelander, Merrill, Wisconsin Rapids, and Antigo.

The Conger Glacier flowing from the continental ice to the Knox coast was named for WO Richard R. Conger, a veteran of several expeditions who has taken some of the finest photographs ever to come out of Antarctica. The glacier was photographed in 1946.

SHELF'S SIZE FOUND BIGGER

Conger, the son of Richard O. Conger, 4215 W. Martin Drive, Milwaukee, has frequently visited his father there and plans to retire to Milwaukee after his Navy service.

As a chief photographer's mate with Operation Windmill in 1947–48, Conger assisted in establishing astronomical control stations along the Knox coast.

Conger was recommended for the Distinguished Flying Cross for his part in the rescue of six crewmen of a downed plane.

A significant discovery of the Ellsworth Base traverse in the 1957–58 International Geophysical Year (IGY) was that the Filchner Ice Shelf is much bigger than previously supposed.

Preliminary calculations by the traverse party of five led by Edward C. Thiel, a native of Wausau and a University of Wisconsin geophysicist, indicate its area to be about 160,000 square miles. A member of the party was John C. Behrendt, a native of Stevens Point who is also a geophysicist.

In this ice shelf is an island about 150 miles long, first sighted by the U.S.

IGY expedition, that has just been named Berkner Island on Thiel's recommendation, in honor of Lloyd V. Berkner, a native of Milwaukee.

Berkner's parents lived in North Dakota, but he was born in Milwaukee when his mother was visiting her parents, Mr. and Mrs. W. F. Viel, at 652 Fifth Street (old number). He grew up in Sleepy Eye, Minn., spending summers with his grandparents in Milwaukee.

ACCOMPANIED BYRD GROUP

In 1928–30 Berkner spent 2 years in the antarctic with the first Byrd expedition.

An inlet in Berkner Island has been named for Lt. (now Lt. Comdr.) Charles J. McCarthy, from New Richmond, who had charge of flying at Ellsworth Station.

A proposal by Thiel to name Wisconsin Peak in recognition of the contribution of Wisconsin scientists is certain to be approved. It will be in the Dufek massif, sighted by the Ellsworth traverse.

Pending before the board on geographic names are recommendations by Ronne that a mountain peak in the same area be named for Senator ALEXANDER WILEY, Republican, of Wisconsin and that an inlest be named for Representative ALVIN E. O'KONSKI, Republican, of Mercer.

Bradford Rock, in the Windmill Islands off the Budd coast, has been named for Donald Bradford, the Navy's radio operator at the Wilkes IGY station in 1957–58. Mrs. Bradfords' parents, Mr. and Mr. Ernest G. Farris, live at 234 North 72d Street, Milwaukee.

Bradford Island was named by Carl Eklund, scientific leader of the Wilkes Base, in recognition of Bradford's outstanding work as a radio operator and for his contribution to the Wilkes scientific effort. Bradford now is a naval radio operator in French Morocco.

Three mountain peaks sighted by the Byrd Station traverse in IGY were named for Wisconsin scientists by Charles R. Bentley of the University of Wisconsin, who led the traverse.

PEAK IS 13,100 FEET

They are Mount Bentley, standing 13,100 feet high in the main ridge of the Sentinel Mountains; Mount Ostenso, a summit 12,900 feet high in the same ridge, and Mount Woollard, which is 8,726 feet high.

Ned A. Ostenso, a native of Chippewa Falls, was a member of the party, and G. P. Woollard of the University of Wisconsin geology department helped plan this and other traverses.

Helfert nunatak, standing 6,900 feet high near the Sentinel Mountains, was named for Norbert F. Helfert, a native of Sheboygan who was a member of the wintering over party at Byrd Station as a weather observer.

It was used as a southern control station for a survey of the mountains. A nunatak is a hill or mountain surrounded by glacial ice.

[From the Milwaukee Journal, Oct. 17, 1960]

UNITED STATES PREPARING SITE FOR ATOMIC REACTOR IN ANTARCTIC—COUNTRY IS FIRST TO APPLY NUCLEAR ENERGY PROGRAM TO FROZEN AREA; STATIONS ARE SLATED AT MCMURDO SOUND, TWO OTHER LOCATIONS

(By Laurence C. Eklund)

MCMURDO SOUND, ANTARCTICA.—Due to congressional persistence, the United States has become the first Nation to apply the atoms for peace program to Antarctica.

Engineers are on the scene here preparing the site for the first of several atomic reactors at this and two other antarctic stations that will save lives and millions of dollars. This represents a triumph over bureaucratic lethargy.

Test pits are being blasted by Navy Seabees under the direction of Philip P. Brown, soil expert of the Navy's Bureau of Yards and Docks, and Arthur E. Ritch, geophysics engineer for the Martin Co., which has contracted to deliver the reactor here by November 1, 1961.

If it is confirmed that this site has a hard basalt rock base, a hole 30 feet deep will be blasted out of the rock for a foundation of steel and timbers arriving here by ship about Christmas Day.

The short season of shipping through the antarctic ice makes it difficult to get materials here, but the pressure is on to have the new plant installed 60 days after delivery and brought to full power 15 days after that.

After the 1,500 kilowatt reactor has been put into operation at McMurdo Sound, a 1,000 kilowatt plant will be installed at the inland Byrd station, one producing 800 kilowatts at the South Pole station and then two more 1,500 kilowatt reactors at McMurdo.

The program contemplates that at the end of four building seasons the three stations will be rehabilitated and completely electrified. The work can be done only in the antarctic summer.

SAVING OF $80 MILLION SEEN

It is estimated that in 20 years the atomic plants will pay for themselves and save an additional $80 million, but it took nagging and table pounding by members of the Joint Congressional Committee on Atomic Energy to get the project going this year.

The trouble was caused principally by the reluctance of the Budget Bureau to approve the project.

Senator HENRY M. JACKSON, Democrat, of Washington, a member of the Joint Committee, recommended the reactors after visiting Antarctica and learning of the high cost, in money and lives, of transporting oil for heating for diesel generators.

Subsequent hearings before the committee brought out that due to extremely difficult and hazardous transportation conditions, the delivered cost of fuel oil is from $1 to $3 a gallon at McMurdo and between $7 and $10 a gallon at the South Pole and Byrd stations.

To deliver 1,000 gallons of fuel oil from McMurdo to our South Pole and Byrd stations, each about 800 miles away by air, requires 4,500 gallons of airplane fuel, it was brought out.

More than 70 percent of available cargo space of ships providing logistical support for our antarctic stations is taken up by fuel.

Since the start of the first Operation Deep Freeze, 17 lives have been lost. This includes those lost in aircraft crashes and other logistical operations, such as with tractors, Weasels and Snowmobiles.

Seventeen aircraft have been lost, including 15 Navy aircraft costing $5,373,000 and two Air Force Globemasters costing $5 million. Globemasters have been used to drop 50 gallon drums of fuel by parachute to the inland stations.

ADMIRAL CITES DRUM COST

Rear Adm. David M. Tyree, commander of the operation, advised the joint committee that each drum cost $7.10 and each parachute $56.25, that "another important factor on which no dollar value can be placed is the hazard to human life in these aircraft operations."

Acting on such testimony, the joint committee recommended, and Congress authorized, a study to get information on the economic potentials of nuclear power in Antarctica.

The study indicated that there would be major economic advantages, and the committee, accordingly, added $13 million to the Atomic Energy Commission's authorization bill to build atomic reactors in Antarctica.

But despite the compelling testimony in favor of the proposal, the Budget Bureau failed to include the project in its request to Congress for authorization or appropriations. And the administration took no positive action.

Then, despite congressional authorization of the project and the results of the comprehensive study asked by the committee, the Budget Bureau on May 17 asked the Defense Department to review the advantages of nuclear reactors in Antarctica. That would have delayed the project a full year.

The Joint Committee hit the ceiling. Its chairman, Senator CLINTON P. ANDERSON, Democrat, of New Mexico, JACKSON, and Representative CHET HOLIFIELD, Democrat, of California, fired off a hot letter to Budget Director Maurice H. Stans, saying:

"It is incomprehensible to us that the executive branch has still not formulated definite plans for the project and has not taken any positive action to start work on the plants.

"We are very much concerned with the lack of initiative and responsibility shown by the Budget Bureau in regard to the project and with the consequences of the loss of a whole year if responsible action is not taken immediately."

LETTER PROTESTS DELAYS

In a letter to the Atomic Energy Commission, the three Congressmen protested that the history of the project was a "classic example" of how delays were developed in getting started on an important project. It had not been sought in the Navy's budget because of the Navy's more pressing defense needs.

The needling Congressmen served notice on Stans that Senate members of the committee were taking steps with the Senate Appropriations Committee to transfer AEC funds for the project to the Defense Department.

Bureaucratic redtape was cut and the Martin Co., which had bid on the project even before funds were available, contracted to build the first McMurdo reactor for $3,950,678. The contract was signed August 10, the day the U.S. Senate ratified the treaty dedicating Antarctica to peaceful use.

Now being built by the company's nuclear division at Baltimore, it is big enough to supply the average electrical needs of about 3,000 Americans.

A fuel core about the size of a single 55 gallon drum will power the plant for 3 years or more because it will not be operating continuously at peak power. It will be doing the job of millions of gallons of fuel oil.

The engineers on the job here complain that they are faced with an impossible, ridiculous schedule, but all hands concerned are feeling the pressure from Washington, which doesn't want any excuses, and it is assumed that the deadlines will be met, despite the difficulties.

One of the reasons for the pressure, it is believed, is a suspicion that the Russians might be planning some surprise at one of their bases here. To quote Senator JACKSON, our international prestige is at stake in this situation.

[From the Milwaukee Journal]

ANTARCTICA'S WATER: PLENTIFUL BUT SOLID—MAINTAINING SUPPLIES FOR DRINKING, COOKING, LAUNDRY IS BIG JOB—SNOW IS "MINED" FROM HILLSIDE NEAR BASE AND MELTED—BATHS LIMITED TO ONE A WEEK

(By Laurence C. Eklund)

MCMURDO SOUND, ANTARCTICA.—If all the ice on Antarctica melted, the level of the oceans would be raised 200 feet, but fresh water is hard to come by at all of our U.S. stations here.

The visitor to Antarctica is warned to go easy on the water and not to take more than

one bath a week. Most of the men here do not shave.

The water is here all right, but in solid form, and it costs plenty to manufacture it.

To get water for drinking, cooking, washing, and laundry it is necessary to haul snow from a nearby hillside "mine" to snow melters where it is turned into water.

Big traxcavators equipped with buckets holding about a ton of snow are busier than usual now, since the population of the base here is up to 400 from the 135 who wintered over and is moving toward a summer peak of 700.

Hauling the snow is a mighty cold job and when the wind starts blowing, the tractor drivers have to put on facemasks in addition to their regular heavy clothing.

The big cost is for fuel to drive the tractors and to fire the heater under the hopper where the snow is dumped.

Fuel costs up to $3 a gallon delivered by ship to McMurdo and from $7 to $10 a gallon airdropped at the inland Byrd and South Pole stations, where water must be produced in the same manner.

PURIFIED FOR DRINKING

Water used in the laundry and photo laboratory is filtered and purified further if used for drinking and in the washrooms.

Delbert Means, Seabee from Charleston, W. Va., who has charge of the melter, estimates that 4,000 gallons of water are produced each day.

Since these are to be permanent U.S. stations, something will have to be done eventually about improving the water supply.

Lt. Ralph Fortenberry, Jackson, Miss., who is leaving soon after wintering here as the camp doctor, believes a flush toilet system can be provided by pumping sea water from under the ice of McMurdo Sound.

Fortenberry, who has asked that sanitary engineers make a survey of the situation, indicated that a modern scientific station would have an atomic reactor costing $3,900,000 should not have 17th century sanitary conditions.

The cold weather is the only thing standing between this camp and serious outbreaks of illness, he said.

While this is a comfortable camp for such a remote outpost, it is a fact that "golden glacier," formed from liquid human wastes dumped from latrine outlets, is an odoriferous eyesore.

PROBLEM SOLVED IN GREENLAND

The Army has solved the water and sanitation problem at its newly constructed Camp Century under the Greenland icecap. This camp, equipped with an atomic reactor, will have the first hot showers ever installed in a glacier.

The Army's engineer research and development laboratory designed a steam drill that melted a 4-foot shaft 165 feet down into the Greenland icecap.

At that level the bit melted a pool of pure water 36 feet deep and 44 feet across. The water is kept from freezing since the bit stays in that position.

Joseph Kumbar, an expert on sanitation who is a civilian employee of the Army, estimates that the well would provide 10,000 gallons of water a day for the residents of Camp Century.

Water from the well will be used for showers, flush toilets and the messhall. Heated wooden pipes will carry Camp Century's garbage and sewage to the surface several hundred yards from the nearest underice tunnel. There it will be dumped, to sink into the glacier.

McMurdo has a different problem, since it is built on volcanic ash, but the Byrd and South Pole stations, scheduled for reconstruction and atomic reactors, rest on thick ice similar to the Greenland icecap.

[From the Milwaukee Journal, Nov. 6, 1960]

BELOIT MAN PREPARES FOR ANTARCTIC MAPPING—PHOTOGRAPHER'S MISSIONS HAVE COVERED 500,000 SQUARE MILES; HE IS SPENDING HIS FIFTH SEASON IN POLAR CONTINENT AND HAS SUCCUMBED TO ITS CHARM

(By Laurence C. Eklund)

MCMURDO SOUND, ANTARCTICA.—John D. Reimer of Beloit, Wis., has personally photographed, for mapping purposes, 500,000 square miles of Antarctica. That could be a record.

It is possible that, due to the nature of his work, this 31-year-old veteran of 12 years in the Navy has seen more of this continent than any other person.

Reimer, who was recently promoted to chief photographer's mate, joined the Navy immediately after graduation from Beloit High School, and he learned all his photography in the Navy. This is his fifth season in the Antarctic.

He has just arrived to prepare for a mapping mission out of the inland Byrd station that will involve photographing 17,000 miles of flight lines in addition to mileage to the flight lines and back.

NEPTUNE FLIGHTS SLATED

His photographs will be taken from Navy P2V–7 Neptunes equipped with skis. Included in the areas to be photographed are the Thurston Peninsula, the Kohler Mountains, the Walgreen coast and the Hal Flood Range.

Last year Reimer photographed the Horlick and Sentinel Mountains and the Executive Committee Range. His mission discovered an extension of the Sentinel Mountains no one had ever seen before, and the job of photographing that extension will be completed this year.

The Neptune has a crew of nine while on its high altitude mapping missions. It flies at 20,000 feet above sea level. Reimer, as photo technician, operates an electronic computer that tells how often exposures should be made.

SERVED ON FIGHTERS

For 5 years Reimer was a photographer and radar operator on night fighters on carrier cruises to the Mediterranean, the North Atlantic, and elsewhere. He was stationed for 18 months at Glenview, Ill., where it was easy to make frequent trips to visit his many relatives in Beloit, and he was not pleased when assigned to Operation Deep Freeze II in September 1956.

Reimer left for the Weddell Sea in the icebreaker *Staten Island* to take part in the work of the Ellsworth station in the International Geophysical Year. The *Staten Island* and the vessel it was escorting, the *Wyandotte*, were stuck in the ice for 11 days.

When the Ellsworth station was finally set up, Reimer flew photographic missions over the Filchner ice shelf and the large, newly discovered island since named for Lloyd V. Berkner, the Milwaukee-born scientific researcher.

VOLUNTEERED EVERY YEAR

It didn't take long for Reimer to succumb to the majestic grandeur of Antarctica, and after that first year he volunteered every year for service here.

"There is no other place in the world where you can see the things you see here," said the enthusiastic Badger. "Down here I feel like an explorer, because every day I am going out to see things no one has ever seen before. I must confess I get a satisfaction photographing these rugged mountains that have never before been photographed.

"Certainly this is the last frontier, and I consider it a privilege to be here doing something I think is important, especially when I realize that my pictures of last year are used for this year's maps."

Reimer's father, John K. Reimer, a Beloit railroad man, recently retired with his wife to Clearwater, Fla. Young Reimer's grandmother, Mrs. J. W. Brunton; three uncles, Irving, James and Roderick Brunton; and aunt, Mrs. William Becker, and scores of cousins live in Beloit.

UNITED STATES IS TRESPASSING AT ANTARCTIC BASES—NEW ZEALAND CLAIMS LARGE AREA; KEEPS A LOCAL MAGISTRATE AND POSTMASTER

(By Laurence C. Eklund)

SCOTT BASE, ROSS SEA DEPENDENCY, ANTARCTICA.—Lt. Comdr. James Lenox-King, commander of this snug New Zealand scientific station, hospitably offered a cup of tea when the American reporter paid a social call.

The 2-mile trip over here from McMurdo was by vessel, but the return trip was made trudging over the snow with two other reporters.

Like the U.S. stations at McMurdo, Hallett, and Little America, Scott Base is located in the big pie shaped wedge of Antarctica claimed by New Zealand as the Ross Sea Dependency.

New Zealand claimed the area on the basis of British exploration, and although the New Zealand administrator was long invested with powers of magistrate and justice of the peace in this domain, it was only recently that he had ever set foot in the area.

POSTMASTERS—NO MAIL

For many of the years that New Zealand claimed it, the Ross Sea Dependency was inhabited only by penguins and seals. The United States has never recognized the claim, and while New Zealand is a signer of the Antarctic Treaty freezing all claims, it has not relinquished its claim.

For years the dependency had postmasters with no mail to handle and magistrates with no cases to try, an absurd situation remedied somewhat by the establishment of this station, with American help, in the 1957–58 International Geophysical Year.

As a device to support New Zealand's claim to the dependency, Lenox-King, handsome in a full beard, has been duly installed as postmaster and magistrate.

Through his post office and under his canceling stamp flows mail, highly prized by philatelists, bearing the full set of special Ross Dependency stamps costing 40 cents, or 2 shillings 11 pence.

What really delights the stamp collector is to get a letter also bearing American stamps that have also been canceled in the U.S. post office at McMurdo. Such a letter now ranks as a collector's item along with one enclosing a small American flag that has been flown over the South Pole.

CALL FOR SHERIFF?

Complete amity exists between Americans and New Zealanders in this area, although Mack Vincent, the gnomish old pixy who is covering Operation Deep Freeze for the Auckland (New Zealand) Star, waggishly threatened to summon a sheriff from Wellington to evict his American colleagues from "New Zealand territory."

This station was set up on Pram Point, a windy spot 10° colder than McMurdo, on a site chosen after a reconnaissance in a helicopter provided by Rear Adm. George Dufek, then commander of Operation Deep Freeze. Americans helped transport the materials here.

Throughout this dependency as well as in other parts of Antarctica claimed by Australia, France, Norway, Great Britain, Chile, and Argentina, the flags, claims sheets, and other emblems dropped from the planes of various nations lie congealed in Antarctic ice.

Rear Adm. Richard E. Byrd for many years insisted that American interest in Antarctica

be kept alive, and since 1939 official U.S. expeditions had been ordered to raise the flag and deposit special form letters at key places.

One of the objections to our ratification of the Antarctic Treaty raised by the 21 Senators who voted against it was that the Johnny-come-lately Russians would be placed on an equal footing here with countries that have explored this continent for decades.

SENATOR URGES CLAIMS

Contending that we should assert claims to 80 percent of Antarctica, Senator ERNEST GRUENING, Democrat, of Alaska, protested that as other nations moved in "our great period of discovery, exploration, and occupation in Antarctica will fade into the past and the Russians will be there alleging retroactively that they were there all the time."

Members of the House Territorial Subcommittee pricked up their ears last June when Carl R. Eklund, Chief of the Army Polar Research Branch, testified that the Russians had claimed discovery of territory previously discovered by Americans.

He said that when he was the Wilkes station scientific leader in December of 1957, a rescue group from his station, searching for a lost trail party, found a cairn set up by the Russians.

BOTTLED MESSAGE

In an empty vodka bottle was a message which, translated, claimed that the archipelago in the Windmill Islands had been discovered October 10, 1956, by the Russian antarctic expedition "whose members are discussing the beginning of this further occupation."

Eklund and Lt. Donald R. Burnell, military commander at Wilkes, left a message in the vodka bottle for the Russians stating that the same group of islands had been discovered 10 years earlier by our Navy's Operation High Jump.

Despite our earlier discovery, the Russians had done a much better job of mapping the area, said Eklund in testifying for the Zablocki bill creating an Antarctic Commission that would take responsibility for such matters.

Representative CLEMENT J. ZABLOCKI, Democrat, Milwaukee, author of the legislation, expressed concern that through the treaty we were relinquishing some of our rights in Antarctica. He argued that the Commission "would fill a vacuum which has serious implications for our Nation's interests and efforts in the Antarctic."

In recommending ratification of the Antarctic Treaty over the objections raised, the Senate Foreign Relations Committee reported:

"While the risks of entering into agreements with Communist countries are not discounted, the committee subscribes to the belief that a breakdown in communications between the Communist bloc and the free world is an immeasurably greater risk."

LIVING IN ANTARCTIC RUGGED, BUT HEALTHY—MEN ASSIGNED POLAR DUTIES ARE STRONG BREED WHO NEED LITTLE DOCTORING

(By Laurence C. Eklund)

MCMURDO SOUND, ANTARCTICA.—(Delayed)—Despite the rugged living and the constant danger inherent in antarctic exploration, this is a surprisingly healthy place.

To begin with, persons who volunteer for service in Antarctica are given a thorough physical and psychiatric examination. Even a visiting newspaper reporter has to get a statement from his physician that he can withstand the rigorous antarctic climate.

The scientists and Navy men finally selected to man U.S. stations in the antarctic are a rugged breed who don't need much doctoring.

If they show the slightest sign of not being able to get along with other men—sulkiness, discontent, shyness, or "inappropriate" laughter—they are turned down.

SORE THROATS COMMON

The medical men of Operation Deep Freeze proceed on the theory that "no psychiatric case ever got better in the cold."

They consider an applicant's chief psychiatric asset to be "high motivation—the urge to new adventure, to see the other side of the mountain, to conquer nature in her most rugged aspect and to be willing to cheerfully endure hardships to accomplish those ends."

Lt. Ralph Fortenberry of Jackson, Miss., the McMurdo medical officer, reported that there wasn't a single cold among the 137 men who wintered here, but that the new personnel and summer "tourists" would probably import disease germs that would produce colds.

The most common ailment, he said, is sore throat, accompanied by coughing, caused not by the cold weather but by dryness, since there is practically no humidity in the heated buildings.

WATER IS SCARCE

Outside air at from zero to 110° below zero has a relative humidity of 80 percent, but when warmed to 70 degrees it has only a fraction of 1 percent relative humidity.

Water is scarce here and expensive to produce, and there is not enough of it to bring the relative humidity up to the 25 to 30 percent necessary to prevent sore throat and much coughing.

Dr. Fortenberry treats these cases with liquid cough medicine, throat lozenges and he prescribes gargle tablets. The discomfort lasts about 3 weeks, after which the men become acclimated.

Dr. Fortenberry and the Navy doctors at our other antarctic stations have a few frostbite cases and an occasional broken leg. Two medical corpsmen help Dr. Fortenberry in the five bed hospital here that is equipped with an operating room, X-ray and pharmacy.

The beds are used mostly by men exhausted from long, hard hours of work in the cold. The doctor keeps them in the hospital until they are fully rested.

Lt. John S. Lindsay, Dannemora, N.Y., has his dental office in the same building. He is the only U.S. dentist in Antarctica, and before coming here he gave the medical men at the three other stations a 1-week course in dentistry. He also gave them a dental manual.

Dr. Clarence Du Mais, the medical man at the South Pole station, benefited from Dr. Lindsay's instruction in pulling one of his own wisdom teeth. He also extracted a tooth for one of the scientists at the pole.

INSTRUCTIONS RADIOED

Dr. Lindsay has X-rays of the teeth of all the men at inland stations and is prepared to give advice and consultation over the short wave radio.

He radioed instructions 2,100 miles away to Christchurch, New Zealand, for treatment for a Navy pilot who had trouble with his dentures.

Frankly, there isn't much a medical doctor can do, without equipment, about tooth trouble at a remote station.

It has been suggested that men selected for antarctic service should have teeth on which a dentist would wager $1,000 that there would be no trouble within an 18 to 24 month period.

[From the Milwaukee Journal, Nov. 10, 1960]

ADVENTURE, CURIOSITY ARE ANTARCTIC LURES—WISCONSIN MAN SAYS AREA'S PECULIARITIES PROVIDE CHANCE TO LEARN NEW THINGS

(By Laurence C. Eklund)

MCMURDO SOUND, ANTARCTICA.—Some who volunteer for wintering over service here are motivated by a quest for adventure.

Most of the scientists are working for academic degrees but among the Navy personnel willing to leave their families for a year are men of all ranks who figure that they, too, can learn something down here.

Listed in that category would have to be Donald R. Drumm, radioman chief petty officer, from Edgar, Wis., who has just arrived for a year of service in the McMurdo communications center.

Asked why he volunteered for a job that meant leaving his wife and two daughters for so long, he said:

"My curiosity was aroused by Antarctica and what I had heard about it. In communications down here you can learn things you couldn't learn elsewhere because of the ionospheric and magnetic disturbances."

Drumm, the son of Mrs. William H. Drumm of Edgar, never finished high school in Edgar but completed his high school education in the Navy, where he has served a total of 10 years.

WORKED ON EDGAR FARM

After serving in World War II he was out of the Navy for 6½ years. He worked on his father's farm at Edgar and did railroad work in Wausau. He was working for the railroad when he met his wife, the former Alvina Wiegert of Fond du Lac, whose mother, Mrs. Hazel Bogie, now lives at Plymouth.

After rejoining the Navy in 1953, Drumm went to the radio school at Bainbridge, Md. He served on a destroyer and patrol craft and was assigned for 2 years to the Naval Academy at Annapolis.

Drumm's wife and daughters, Denise, 12, and Carol, 11, who were born at Fond du Lac and Wausau, respectively, are now at Kingston, R.I., where the girls are the center of special attention at school because their father is in Antarctica.

Many persons besides Drumm have sought to learn about the ionosphere since three-quarters of a century ago, when the Scottish physicist and meteorologist Balfour Stewart, puzzled over the fact that the earth's magnetic field fluctuated from day to day.

Stewart proposed what seemed at the time an unlikely idea. He suggested that somewhere in the upper atmosphere there might be a layer of air that conducted electricity.

The motion of this air in the earth's magnetic field, reasoned Stewart, would generate electric currents, which in turn would produce small magnetic fields accounting for the daily variations in magnetic measurements.

Since the upper atmosphere was a wilderness unplumbed by any instrument man had yet invented, the significance of Stewart's brilliant suggestion was not widely appreciated at the time.

But the upper atmosphere took on a new interest in 1901 when Guglielmo Marconi sent wireless signals across the Atlantic Ocean around the curvature of the earth.

HAD DIFFERENT VIEW

Up to that time physicists had supposed that radio waves traveling beyond the horizon would continue through the atmosphere in a straight line and disappear into space.

Seeking to explain Marconi's around-the-world transmission, Arthur E. Kennelly in the United States and Oliver Heaviside in England revived the idea that an electrically conducting region high in the atmosphere would reflect radio waves back to the ground.

What is now known as the ionosphere is a thick mantle of ionized air consisting of at least four different layers occupying the region of the atmosphere from 45 to 200 miles above the ground.

A $59,740 National Science Foundation grant for research in ionospheric physics here has sought to determine the geomagnetic latitude control of very low frequency and extra low frequency phenomena along the line of 20 degrees of latitude.

AIR LIFTED SURVEY

A four-man party from Stanford University conducted an air-lifted survey along a series of sites in Marie Byrd Land, the Ross Ice Shelf and Victoria Land.

The party was transported from site to site by a ski-equipped DC-3 aircraft and spent 3 days in a tent camp at each location. Observations were made at each and were coordinated with the routine observations at Byrd station and with space probes and satellite experiments.

New Science Foundation grants to Stanford, totaling $130,019, call for a continuation of these studies.

[From the Milwaukee Journal, Dec. 4, 1960]

UW MEN IN ANTARCTIC TO GET HELP FROM CHILE—WAUWATOSA EXPERT WILL STUDY RELATION OF ANDEAN, POLAR MOUNTAIN RANGES

(By Laurence C. Eklund)

WASHINGTON, D.C.—A cooperative antarctic research program supported by the United States and Chile, in which University of Wisconsin scientists will play the key role, was announced Saturday by the National Science Foundation.

UW geologist David A. Link, 6301 Washington Circle, Wauwatosa, and Martin Halpern, Madison, will leave Monday for Antarctica from Valparaiso, Chile, with three other U.S. scientists.

TRAINING PROVIDED

Dr. Alan T. Waterman, Director of the Science Foundation, said that by providing field assistance to U.S. scientists, Chile was making possible work by our geologists and entomologists in an area where our scientists had not worked in recent years.

The United States will help Chile establish a geomagnetic program at its Presidente Gabriel Gonzales Videla station on the Palmer Peninsula by providing equipment. A scientist from our Coast and Geodetic Survey has spent the last 2 months in Santiago training a Chilean to use the equipment.

Chile, in return, will provide transport and helicopter support throughout the current antarctic summer for our research expedition on the Palmer Peninsula.

Presidente Gabriel Gonzales Videla station fills a gap between existing geomagnetic observatories in Antarctica and on subantarctic islands now operated by Argentina and the United Kingdom.

FAMILY OF GEOLOGISTS

The new Chilean observatory will supplement the work of these stations and others maintained in western Antarctica by the United States and New Zealand. They provide data on the annual changes in the earth's magnetic field.

Link, who got his bachelor's degree in geology from the UW last June, is a member of a famed family of geologists. His father, Walter K. Link, is a geologist in Rio de Janeiro. His mother, Mrs. Marshal L. Wilcox, was one of the first women geologists graduated from UW.

His brother, Peter, who has a master's degree in geology, is now in Tripoli, Lybia, and his sister, Mrs. Marion Coles of Salt Lake City, Utah, has a Ph. D. degree in geology.

Young Link and Halpern will conduct geological research with the aid of a $16,523 Science Foundation grant to Prof. Robert H. Dott, Jr., of the UW geology department, director of the project.

STUDY GEOLOGIC HISTORY

They are especially interested in the relationship of the Andean Mountains in South America, their extension into the Palmer Peninsula and the mountains of the Ellsworth Highland in Antarctica, where the team hopes to work in future years.

The Dott group may determine the broad areas within this long and continuous mountainous belt that have a similar geologic history.

Link, Halpern, and two American entomologists will be picked up at the Chilean station next March by the *Glacier*, an American icebreaker, and will continue their work in the Amundsen Sea and the islands off the Palmer Peninsula.

Meanwhile, across the Antarctic at McMurdo Sound, another team of UW scientists this week will begin a $41,639 study of patterned ground, found on most ice-free areas of the continent.

The team, working under the direction of Prof. Robert F. Black, consists of Thomas Berg of Onalaska, Wis., who is working for a Ph. D., and James Sullivan of Ahoskie, N.C., who is completing his work at UW for a master's degree.

Patterned ground usually appears as polygons (figures having many sides) associated with sand and ice wedges.

Berg and Sullivan hope to find out what causes them, how they develop and whether they may serve to aid in dating geological events in the region.

In about a week, Forrest Dowling of Boscobel, Wis., UW exploration geophysicist, will leave Byrd station on a hazardous trek from McMurdo Sound to the pole. His principal mission is the delivery of three 37-ton tractors.

America's scientific effort in Antarctica this year is costing upward of $5 million and it is costing the Navy $15 million to support this effort.

QUESTION OF COST

It is natural to raise the question of whether we are getting our money's worth, but regardless of the high cost it is apparent that we are in Antarctica to stay, especially since Russia seems to be there to stay.

The value of the work was cited in this comment by Chairman OREN HARRIS, Democrat, of Arkansas, of the House Interstate and Foreign Commerce Committee, after an on-the-spot visit there:

"We are convinced that it is one of the most important undertakings and could have the most far-reaching implications of any scientific work we have anywhere. The American people should not get any other idea because some of the things that are being found out about the behavior of the earth as it reacts to some of the happenings of the solar system will have great bearing on the future course of human existence."

QUICK DECISIONS NEEDED

The United States had to make some quick decisions after the adoption of the Antarctic Treaty, and the cost of logistical support probably could have been held down, had there been an opportunity for long-range planning.

Congress at its next session may have to decide whether to create the Richard E. Byrd Antarctic Commission, as proposed by Senator ALEXANDER WILEY, Republican of Wisconsin, and Representative CLEMENT ZABLOCKI, Democrat of Milwaukee. WILEY and ZABLOCKI insist that there can be no long-range planning of an antarctic program without an overall agency in control as in all other countries operating in the Antarctic.

FOURTEEN AGENCIES INVOLVED

The Navy now runs the logistics end of the program and the National Science Foundation the science end. A total of 14 Government agencies are involved in what ZABLOCKI complains is a piecemeal operation.

And eventually Congress will have to decide whether to put up the money for a permanent airport in Antarctica to replace the temporary landing field on the frozen surface of the Ross Sea, at McMurdo Sound, which can be operated for only about 50 days a year.

Rear Adm. David M. Tyree, commander of Operation Deep Freeze, indulging in what he called a bit of crystal ball gazing, said there was no doubt the day was coming when an international airstrip would be needed in Antarctica to cut flying distances.

The only trouble, the admiral said, is that such an airport would cost several hundred million dollars.

The strip would make possible commercial flights over Antarctica to link Africa, South America, New Zealand, and Australia.

Members of the House Interstate and Foreign Commerce Committee reported after a visit to Antarctica that the potential tourist and commercial travel as the result of a great circle antarctic route staggers the imagination.

ADDITIONAL TAX EXEMPTION FOR CERTAIN SCHOOLCHILDREN

Mr. JOHNSTON. Mr. President, I introduce, for appropriate reference, a bill to amend the Internal Revenue Code of 1954 so as to allow an additional exemption of $600 for a dependent child of the taxpayer who is a full-time student above the secondary level.

This amendment is primarily designed to give tax relief to help parents whose dependent children are attending college. Anyone who has sent children to college knows of the terrible financial strain such an undertaking puts upon the average family budget. In most instances parents must borrow money, mortgage their homes, take on extra work, and engage in other financial jugglings in order to put children through college. The least we can do is to give them a boost with a little tax relief, which this amendment does.

We have programs underway to lend students money, grant them scholarships, and otherwise assist them in gaining a higher education. There are innumerable taxpayers who, when given tax relief such as my amendment does, could send their child to college without looking to these other assistances from the Federal Government.

Another objective of my amendment is to induce college enrollment among young people. There are many young people who would do well in college if they were assured the opportunity to attend, but who, unfortunately, are discouraged from attending because of financial hardships at home. Given the incentive of an additional $600 exemption, many parents would feel inclined to strive to put their children through school.

It has been pointed out many times in the United States that we are in a life and death struggle with an ideology alien to our free land. We must have well trained and properly educated minds if we are going to maintain a strong will to resist communism. My amendment will help accomplish this objective.

I would point out here that there are no loopholes in this proposed legislation. Only parents of dependent children attending school on a college level will be entitled to the additional $600 exemptions per student. Children with private incomes will not be considered and neither will adults who may be attending school. I ask that this amendment be referred to the appropriate committee for consideration with the first proper legislation coming before us for action.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1519) to amend the Internal Revenue Code of 1954 to allow an additional exemption of $600 for a dependent child of the taxpayer who is a full-time student above the secondary level, introduced by Mr. JOHNSTON, was received, read twice by its title, and referred to the Committee on Finance.

ANNUAL PUBLICATION OF OFFICIAL REGISTER OF THE UNITED STATES

Mr. JAVITS. Mr. President, on behalf of myself and my colleague [Mr. KEATING], I introduce, for appropriate reference, a bill which directs the Civil Service Commission to resume annual publication of the Official Register of the United States, which was discontinued last year after 144 years. Many members of the Washington press corps have expressed concern that the discontinuance of this publication represented an incursion into the traditional freedom of information to which the public is entitled with respect to Federal officials.

The Official Register has been an invaluable reference work since the days of President Madison not only to the various media of information but to the general public. The Register contained the most comprehensive list of Federal officials and was the only practical source from which could be determined their salaries, job titles, departments, and State and congressional district of appointment.

Nothing is more sacred than the public's right to information about its Government officials. Depriving the public of a convenient means for implementing this is hardly justified in the name of economy, especially when the publication cost is relatively so small. Moreover, the change in administration, with the resulting vast turnover in personnel, makes it even more essential that such information be accessible to the public. I earnestly hope Congress will rectify its action of last year and restore this historic and valuable document.

The discontinuance of the Official Register was accomplished by a rider to the 1961 Independent Offices Appropriations Act. The amendment specifically denied $30,000 for printing the Register and also repealed the basic authority for its publication.

The PRESIDENT pro tempore. The bill will be received and appropriately referred.

The bill (S. 1530) to provide for the publication of the Official Register of the United States by the U.S. Civil Service Commission, introduced by Mr. JAVITS (for himself and Mr. KEATING), was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

COMMISSION TO STUDY THE PROBLEM OF ALCOHOLISM

Mr. JOHNSTON. Mr. President, I introduce a joint resolution to establish a commission to study the problem of alcoholism in the United States, and to make recommendations for the more adequate provision of facilities for the treatment, rehabilitation, and cure of alcoholics, and for the prevention of alcoholism.

I ask that this resolution be referred to the appropriate committee and that I be allowed to accompany my introductory remarks with a prepared statement on the problem of alcoholism.

The matter of alcoholism has been of tremendous concern to me, and increasingly so during recent years. I made an intense personal study into the problems which alcoholism entails. I made contact with doctors, industries, State governments, hospitals, and many organizations such as Alcoholics Anonymous which are working on this disease.

It has been estimated there are 5 million alcoholics in America, and there is no telling what it is costing America in broken homes, broken lives, and dollars and cents. Alcoholism is a cancer on our spirit.

Mr. President, I ask unanimous consent to have printed along with my remarks the statement in support of my resolution on alcoholism.

The PRESIDENT pro tempore. The joint resolution will be received and appropriately referred; and, without objection, the statement will be printed in the RECORD.

The joint resolution (S.J. Res. 72) to establish a Commission to study the problem of alcoholism in the United States and to make recommendations for the more adequate provision of facilities for the treatment, rehabilitation, and cure of alcoholics, and for the prevention of alcoholism, introduced by Mr. JOHNSTON, was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

The statement presented by Mr. JOHNSTON is as follows:

STATEMENT BY SENATOR JOHNSTON

One of the major problems confronting modern society is alcoholism.

This addictive disease accounts for an almost countless number of woes: it makes life a living hell for more than 5 million Americans and their families. It is a disease which brings pain, mental, financial, and physical suffering to victims, causes personality breakdowns, broken homes, high divorce rates, delinquency, adult and juvenile crimes of various sorts, an appalling toll of accidents, industrial and traffic, serious financial loss to business and industry. Not the least ill-desired byproduct of alcoholism is the corrosion of morale it brings to substantial segments of the population and the yet undetermined physical damage to human minds and bodies. Alcoholism, in short, is a problem of great national concern.

Alcoholism is not a new problem to man. It has been with civilization for centuries. For a long, long time it has been a serious problem. But only in recent years has it been recognized as a disease. We know now the alcoholic should not be treated with social shame, but as one who is ill with a disease. In the opinion of many experts in the field of alcoholism, the changed public attitude toward the alcoholic is one of the major gains of the past several decades.

Compassion rather than condemnation must be the keynote in dealing with alcoholics. It is with this view that I address myself to the challenging problem of alcoholism. It was with the thought that we can further the good work already being done by the several States and others in this vital field by developing national interest and providing leadership and auxiliary help that I undertook a comprehensive survey and study of this whole problem.

The results indicate to me and others that a challenging task confronts us in the extension of activity to deal with alcoholism. In the areas of education, prevention, treatment, and rehabilitation, much remains to be done despite the excellent efforts of the several States in their respective programs.

Before proceeding with the presentation of the material recruited in my study of alcoholism, I am pleased to acknowledge the very splendid cooperation of the Governors of the several States as well as the respective directors of the various State commissions on alcoholism. I have had a most hearty and prompt response from those officials in my request for information on what their States are doing for the treatment and prevention of alcoholism. I also want to record my thanks to the many private and public organizations that have given their wholehearted and valuable cooperation.

An impressive volume of achievement has been realized over the country in programs on alcoholism. It is readily apparent from the encouraging results through the Nation that the attitude of the public, the medical fraternity, and Government has taken a tremendous change for the better.

Most encouraging is the realization that something worthwhile in the way of a cure can be effected, that individuals can be reclaimed from the rubble heap and brought back to sound health, self-respect, and useful places in society. The work of Alcoholics Anonymous has been most effective in this field—the activities of this group is a saga of understanding, tolerance, helpful support, and practical therapy. It is most heartening to read the accomplishments of Alcoholics Anonymous and it is all the more noteworthy because the work was started originally by two men who had been addicted to drinking. From this humble, spontaneous operation Alcoholics Anonymous has spread to a nationwide organization which commands the voluntary, inspired services of thousands of men and women who have been fellow sufferers.

Giving credit to all the pioneers in the field of alcoholism, public officials, lay men and women, and members of the medical profession, social workers, and others, I am of the opinion, based on my studies, that despite the vast amount of good that has been accomplished, the surface really has been only scratched. Present programs in many States are the beginnings of what hold the promise of real achievement. In State after State, the start has been made and the course has been charted. But facilities, personnel, and funds are at a bare minimum. The foundation is here upon which we can build the pillars of solid achievement to universally overcome alcoholism.

A significant aspect of the reclamation work being done on alcoholics in the several States is the genuine enthusiasm with which the work has been undertaken. As I remarked earlier, we have come a far way in our thinking on alcoholism in the past 20 years. And this is one of the most promising things about the whole problem, for the alcoholic is a supersensitive person, quick to detect hostility, just as he responds to kindness that respects him as a person and attributes to him the dignity which he has largely forfeited. As Dr. Selden D. Bacon, Ph. D., an expert in the field, states: "The greatest number of clients (alcoholics) are lost at the diagnostic interview."

It has been well said that "alcoholics are not drinkers—they are compulsive consumers of alcohol." This is the considered opinion of Dr. Bacon. Actually,

in the consideration of the subject of alcoholism we must realize that for millions of Americans social drinking is no problem. Dr. Bacon points this out in the following words: "It should be noted that the use of alcohol is not alcoholic for more than 60 million of the 65 million drinkers of this country." We do well to keep this fact in mind as we proceed with our consideration of this problem. Otherwise, we are going to build walls of resentment that will militate against an overall effective program on rehabilitation of alcoholics. Public understanding, public cooperation are essential to spur the rehabilitation activities now underway in the Nation to the goal of impressive accomplishment.

My purpose is not to present something that will gobble up the various State programs on alcoholism. To the contrary, I propose by a centralized review, a fair appraisal, the suggestion of fairly uniform standards and the providing of assistance in research and leadership to strengthen and give encouragement to those who are already valiantly progressing this good work. It is my hope that in this way we can lend moral support, guidance, and supplement the work of the several States which see the greater need but are not able to go all the way because of their limited resources. National attention for the several programs would be most helpful, additional research, as I have said, the amplification of the literature of the subject and a wider educational program—all of these would aid the cause.

It is an interesting fact that since the first State study of alcoholism was set up in Oregon in 1943 all but 6 of the 48 States have given recognition in some kind of legislation that alcoholism is a public health problem. Of further interest is the fact that 33 States and the District of Columbia have enacted enabling legislation providing for State-sponsored treatment, research and/or educational programs. In three States, action has been taken to admit alcoholics to certain State institutions. At the end of 1956, two additional States, Illinois and Iowa, had appointed study commissions to review the problem with a view toward recommending suitable legislation.

According to the American Medical Association, which is giving increased attention to the problem of alcoholism, one quarter of all the hospitals in the country treat alcoholics routinely. An encouraging growth of recognition of the disease nature of alcoholism is that the Blue Cross and Blue Shield insurance plans as well as a number of other commercial insurance companies are accepting alcoholics as beneficiaries.

The statistics on alcoholics and alcoholism are rather appalling and I propose to submit a number of them in certain essential categories for information. At the same time I hasten with the reminder that the extent and scope of the problem must not blind us to the possibilities and the accomplishments in rehabilitation.

Dr. Marvin A. Block, chairman of the committee on alcoholism of the council on mental health, American Medical Association, is authority for the statement that the annual cost of accidents due to alcoholism is $125 million, while the annual cost of alcoholics in mental hospitals is $30 million, and the annual cost of alcoholics in penal institutions is $25 million. Dr. Block also presents the further impressive figures that the sum of $40 million is spent annually by public and private agencies for the care of families of alcoholics, $20 million by the public agencies and another $20 million by the private agencies.

In the opinion of Raymond G. McCarthy and Edgar M. Douglass in an informed article in the Journal of Studies in Alcohol, Inc., entitled "Alcohol and Social Responsibilities," the information is furnished that "alcoholism costs society more than $1 billion ($1,168,354,750) according to an estimate for the single year 1946." Later figures, I am certain, will revise even this large cost upward.

On the economic front we further find, according to Harrison M. Trice, of the New York State School of Industrial Labor Relations, of Cornell University, that "on the average, 3 percent of the work force are problem drinkers." In "Problem Drinking," by Henderson and Bacon, dealing with the findings of the Yale Plan for Business and Industry, it is set forth that "the alcoholic loses an average of 22 working days each year from alcoholism alone." The same source also claims that "alcoholics lose a total of over 36 million working days each year." It is likewise claimed by their authorities that "the alcoholic's lifespan is 12 years less than that of the nonalcoholic."

The annual loss in wages alone because of excessive drinking is $432 million, according to Benson Y. Landis, in Public Affairs Committee Pamphlet No. 118, published in 1946.

It is an interesting fact that the public has the image of an alcoholic as a visible Skid Row type. As a matter of an educated estimate by Robert Straus, Ph. D., professor of medical sociology, Medical Center, University of Kentucky, "the remaining 85 to 90 percent (alcoholics) are to be found in homes, offices, places of business, in every walk of life, apparently trying to lead normal lives."

The scope of this problem is realized in the statement that: "Seven million adult Americans are 'heavy, addictive drinkers'; and the number is increasing at the rate of 250,000 a year. One in nine Americans is destined to become an alcoholic * * * the great difficulty now is that the young people are not being told the complete and scientific facts of this problem." This is the opinion of Dr. Andrew C. Ivy, chairman of the Institute of Scientific Studies for Prevention of Alcoholism, Loma Linde, Calif. I am sure the religious and school and social leaders of any American community can confirm this fact.

Consider these dismally impressive statistics from the National Safety Council in the category of alcoholism and fatal driving accidents:

Twenty-two out of every 100 had been drinking; over the Christmas holidays, the percentage jumped to 55 percent; over the Labor Day holiday, the total was 48 percent.

In like manner, the percentage was high in the number of pedestrians who had figured in fatal automobile accidents. Out of every 100 persons so involved, 22 had been drinking.

These statistics are all the most discouraging in view of the intensive educational and warning campaign put on by the American Automobile Association on the eve of the holidays.

The National Council of Alcoholism in a special report to the National Institute of Mental Health states that Dr. Leo Bartemeier reported that a recent Gallup poll showed 14 percent of families interviewed were found to have some problem regarding drinking.

This finding shows the corrosive penetration of alcoholism into the American home, into our contemporary civilization.

Each alcoholic is an individual with individual problems. One responds to one set of stimuli, one to another. Dr. Bacon states: "Rehabilitation may start in the jail, in the home, in a hospital, even on the street corner. It is important to remember, however, that wherever it starts it must continue in and be oriented to the individual's ordinary life situation."

What is the goal of rehabilitation? Again, according to Dr. Bacon, "the Connecticut Commission on Alcoholism (which I might add parenthetically is among the leaders in the field) has stated its goal in rehabilitation to be the return of the individual—more acceptable to himself, increasingly independent, and not using alcohol—to the community in which he should be an accepted member. The commission believes that there are varying degrees of success in rehabilitation and that cases should be followed at least 3 years."

Let us not delude ourselves that the disease of alcoholism is a simple one. It is not just the problem of overconsumption of alcohol. Just what strange motivations prompt a man, a woman, or a teenager to blot out consciousness in a drunken stupor is something to puzzle the experts. Dr. Sidney Vogel, engaged in the private practice of psychiatry and a member of the National Council of Alcoholism makes this pertinent contribution:

"Treatment of the alcoholic is not the sole province of the psychiatrist, internist, endocrinologist, sociologist, minister, or any one scientific or lay discipline. Recognition of this is fundamental. A total 'push' and mobilization of all methods and facilities is necessary to improve results and make help available to more alcoholics.

"We must not follow in the footsteps of the six blind sages of Hindustan who on touching an elephant described him variously as a fan, a rope, a snake, a tree, a spear, and a wall. Rather we must coordinate and synthesize psychiatric, biological, and sociological research and knowledge to understand and master the problem of alcoholism. Only with this new-found knowledge will further inroads be made on this widespread and devastating disease."

In like vein, Corwin states: "Best informed modern opinion calls for the appliance to the problem of alcoholism of all such available research techniques as have been used in the study of other serious individual afflictions. This can best be done in medical institutions such as hospitals and clinics where all the resources of modern medicine and psychiatry can be utilized to contribute toward the understanding of the causes of uncontrolled drinking and the nature of its developmental process. Only in such well-equipped surroundings can adequate therapeutic and rehabilitative techniques be devised and methods for the prevention of the disorder developed."

The involuntary commitment of alcoholics to suitable places of treatment and cure has some supporters among those who have made a study of alcoholism. One such is Dr. Melvin L. Selzer, psychiatrist at the University of Michigan's department of mental hygiene. Dr. Selzer is convinced the alcoholic will not admit to his drinking or invoke voluntary treatment, hence something has to be done about compelling treatment. He states:

"State laws regarding commitment for uncomplicated alcoholism are inadequate or nonexistent. Many States still require evidence of psychosis before committing alcoholics, a rather archaic approach since it implies that only far advanced cases will be considered for treatment * * * courts tend to commit only persons who are called to their attention by obnoxious behavior. Without enforced commitment and treatment, it is safe to say that the bulk of the alcoholic population will remain alcoholic most or all of their shortened lives."

Dr. Selzer insists that psychiatrists and public officials gradually are acknowledging the futility of the efforts to rehabilitate alcoholics without some method of enforcing an initial period of abstinence and therapy.

Dr. Selzer adds the additional point that "alcoholism is malignant." He states that about 65 percent of the unobtrusive alcoholics die between the ages of 35 and 39. He adds that enforced treatment pioneered in North Carolina and Michigan hospitals indicates a sufficiently high percentage of re-

habilitation—up to 40 percent or better—to make the procedure worthwhile.

"The alcoholics received very little specific treatment other than supportive psychotherapy, reassurance, medical treatment if they are ill, an opportunity to keep occupied and a period of time to discover that sobriety was not a threat to their existence. A period of sobriety is essential for these individuals to learn that they can handle their anxieties without alcohol—an important fact that they may never discover if a bottle can be readily obtained, or if they can desert the hospital at will."

It is an interesting aspect of this whole problem that 9 out of 10 alcoholics cannot be detected as such other than by their families or close friends and intimate associates. The alcoholic in many instances possesses real talent for secret drinking, for covering up. Many an individual the public respected as an outstanding person has been addicted to secret, heavy drinking. This frequently happens with women who are given to lone drinking in the home. Only about 10 percent of alcoholics are of the identifiable "skid row" type.

"The ability of the alcohol addict to conceal his excessive drinking is well documented," Dr. Selzer states. "They learn to drink quickly and silently with a minimum of activity afterward so as not to betray themselves by clumsy motions or slurred speech. Driving is usually avoided since this may readily call their attention to their inebriety."

In an excellent article on alcoholism in the Washington Sunday Star of May 11, 1958, Phil Yeager and John Stark, in discussing Dr. Selzer's views and findings, quoted Dr. Selzer's apt example of the quiet drinker covering up in the following language:

"Dr. Selzer quotes this passage from Betty Smith's 'A Tree Grows in Brooklyn' as a penetrating observation of the camouflage employed by the majority of alcoholics today:

" 'Francie got to know when (her father) was drinking more than usual. He walked straight coming home. He walked carefully and slightly sidewise. When he was drunk, he was a quiet man. He didn't brawl, he didn't sing, he didn't grow sentimental. He grew thoughtful. People who didn't know him thought he was drunk when he was sober because he was full of song and excitement. When he was drunk, strangers looked on him as a quiet, thoughtful man who minded his own business.' "

This is a masterly treatment of the addictive drinker—the character portrayed so ably has many thousands of counterparts throughout the country today.

All of us know the part alcoholism plays in that scourge of society—the broken home. Let us look then to the views of an expert in juvenile delinquency, Dr. John Otto Reinemann, director of probation for the municipal court in Philadelphia. Dr. Reinemann states that broken homes are the leading cause of juvenile delinquency. "Sociologists and psychologists agree that such a broken home is one of the most significant factors contributing to juvenile misbehavior and delinquency. Girls seem to be even more affected than boys by the lack of normal family life, as evidenced by the fact that only 29 percent of all delinquent girls live in their own family home with both natural parents."

The parents, who through overindulgence in alcohol, cause a home to be broken sets in motion a chain reaction of antisocial activities that frequently roll up to a costly toll of violence.

In connection with this aspect of the problem of alcoholism, it is worthy of note that the latest figures from the Federal Bureau of Investigation reveal that juvenile arrests in 1,220 cities throughout the United States increased by the high figure of 9.8 percent. Consider the fact that the FBI concluded that youths under 18 years of age accounted for 12.3 percent of the overall arrest increase of 4.3 percent. The statistics show the juveniles committing the startling total of 67.6 percent of auto thefts, 54.8 percent of burglaries and 51.3 percent of larcenies. Also juveniles committed 9 percent of aggravated assaults and 6 percent of the murders. Major crimes committed during the year amounted to 2,796,400, an increase of 9.1 percent over 1956 and 23.9 percent over the average for the last 5 years. City crimes rose 9 percent and rural offenses 11 percent.

Holding this mirror up to the face of society does not produce a very pleasing reflection. It is not my intent or purpose to endeavor to tax alcoholics with this total of crime, but there is a very definite and substantial relationship, as we have shown, between alcoholism and broken homes and juvenile delinquency and crime. The newspapers these days only too frequently carry distressing stories of the latter-day offender, the direct perpetrator of crime, the juvenile, under the influence of alcohol, who strikes out in violence, usually upon any innocent person who has the misfortune to cross his path at the moment he wants to wreak his revenge upon society.

This raises the obvious question: Is alcoholism inherited? In the booklet, "Facts and Fancies About Alcoholism," by Helena H. Shea, of the Rhode Island State Division of Alcoholism, there is this interesting answer to this question: "As yet there is not much reason to believe that the tendency toward compulsive drinking is inherited from the parents, but alcoholic parents tend to have more alcoholic children than nondrinking parents do. Also, children tend to imitate their elders, and in a family upset by alcoholism there will be more instability, more maladjustment, and more drinking than in a normal family group. However, since science has not ruled out the physical causes, it is possible that a constitutional factor may be responsible, at least to some extent, for a psychological craving for drink."

What one of us does not cringe when we see the wrecks in human form barely able to beg for a pittance so they can buy something more with alcohol in it to blot out reality? These are the living without hope; these are the truly dead, they who trod the streets of forgotten men; they are the wound stripes of our civilization.

We have seen men in their animal cravings drink "smoke," the diabolical concoction of the "jungle." We have seen addicts resort to the desperate expedient of consuming radiator alcohol. We have seen them embrace slow suicide in liquid mixtures that four-legged animals would repulse.

Who knows what dark motivations cause men, born in the image and likeness of God, to do such degrading harm to themselves? What gushing springs of self-pity are at work drowning the self-respect of individuals when they literally sink in a sea of alcohol. What real or fancied wrongs have caused them to indulge in such spiritual and physical lacerations? Where along the line has the damage been done to their healthy ego-strengths? What was the first step that caused this headlong plunge down the ladder of self-debasement? What hidden guilts goad the alcoholic into despair?

What a vista of enriching exploration beckons in this troubled and challenging disease of alcoholism. What an opportunity presents itself to our society to go forward in research, armed with charity, equipped with compassion and tolerance, with kindness and a sense of fellowship as members of the human race, to get the answers that will light the way of hope for curing this dread disease.

From the viewpoint of the public's interest in the problem of alcoholism, the case is simply and well put in the following words by Dr. Anthony Zappia, Director of the Alcoholic Rehabilitation Program Clinic in the Department of Public Health, District of Columbia:

"The community loses in many ways when it has disabled persons among its residents. An alcoholic is handicapped because of his behavior, which is often unacceptable to the community. His illness makes him nonproductive during many of his working hours. In the long run a community will gain by working to prevent alcoholism before the excessive drinker has reached an advanced stage of the illness and, where alcoholism exists, by bringing the alcoholic back to productivity and usefulness."

In this vein there is an excellent statement of the problem in the 1957 edition of the booklet published by the Licensed Beverage Industries, Inc., entitled: "Programs on Alcoholism Research, Treatment and Rehabilitation in the United States and Canada." In its introduction, the organization states: "A public health problem may be defined as any problem affecting the health and well-being, directly or indirectly, of people, the solution of which is attainable through organized community efforts. Within this framework alcoholism is a public health problem. During the past two decades, by this definition, it has proved to be amenable to solution through group effort." It further states: "The recognition in recent years that alcoholism was a disease amenable to treatment in public understanding and action concerning this problem marked the beginning of a new era. Public action in the form of State medical care, research, and treatment programs were an inevitable and predictable consequence."

From the studies of the Licensed Beverages Industries, Inc., we learned that the sum of $4 million was allocated by the States for programs on alcoholism in 1956. These moneys were divided on the following basis: 14 percent for research; 9 percent for education; 13 percent for administration; 3 percent for other purposes; and 61 percent for treatment. In 1956, a total of 22,906 were treated in State operated or supported treatment facilities, hospitals, or clinics.

Thus we can see that already a fine start has been made in this troubled field. Of course, as I stated before, many of the State programs are marginal, are the beginnings, represent, in fact, what may be properly termed pilot programs. But from them considerable has been learned, valuable experience has been reaped, standards are being established, and the road for future progress well marked with directional signs.

Alcoholics Anonymous has a total of 6,859 groups, so-called. Of these, 4,755 are in the United States and 706 in Canada. In other parts of the world, excluding the United States and Canada, there are an additional 790 groups. They have 287 groups affiliated with hospitals and 321 groups serving with correctional institutions. Then there is a classification known as "loners." These represent several hundred men and women living in isolated areas throughout the world (or in areas where it has not been possible to form a local group), are registered at general service headquarters as lone members. They correspond with headquarters and with their counterparts in other sections of the world. It is stated of them by the national organization: "In a number of cases, notably in U.S. military installations overseas, loners have been responsible for establishing local groups."

Another interesting development of the A.A. idea is the group of international seamen. This includes about 150 persons, including a handful of women, in naval service or the merchant marine. They correspond with each other and have been responsible for standing and encouraging local A.A. groups in many foreign ports.

The recognition of alcoholism as a medical responsibility is gaining new adherents each passing year. There is a significant increase in the number of hospitals that are admitting alcoholics, including the out-patient departments. The American Medical Association's Council on Mental Health reports on the aspect of alcoholism as a medical problem as follows:

"1. Alcoholic symptomatology and complications which occur in many personality disorders come within the scope of medical practice.

"2. Acute alcoholic intoxication can be and often is a medical emergency. As with any other acute case, the merits of each individual case should be considered at the time of the emergency.

"3. The type of alcoholic patient admitted to a general hospital should be judged on his individual merits, consideration being given to the attending physician's opinion, cooperation of the patient, and his behavior at the time of admission. The admitting doctors should then examine the patient and determine from the history and his actions whether he should be admitted or refused.

"4. In order to offer house officers well-rounded training in the general hospital, there should be adequate facilities available as part of the hospital program for care of alcoholics. Since the house officer in a hospital will eventually come in contact with this type of patient in practice, his training in treating this illness should come while he is a resident officer. Hospital staffs should be urged to accept patients for treatment and cooperate in this program.

"5. With improved means of treatment available and the changed viewpoint which places the alcoholic in the category of a sick individual, most of the problems formerly encountered in the treatment of an alcoholic in a general hospital have been greatly reduced. In any event, the individual patient should be evaluated rather than have general objection on the grounds of alcoholism.

"It is recognized that no general policy can be made for all hospitals. Administrators are urged to give careful consideration to the possibility of accepting such patients in the light of the newer available measures and the need for providing facilities for treating these patients. In order to render a service to the community, provision should be made for such patients who cooperate and who wish such care.

"In order to accomplish any degree of success with the problem of alcoholism, it is necessary that educational programs be enlarged, methods of case finding and follow-up be ascertained, research encouraged, and general education toward acceptance of these sick people be emphasized. The hospital and its administration occupy a unique position in the community which allows them great opportunities to contribute to the accomplishment of this purpose. It is urged that general hospitals and their administrators and their staffs give thought to meeting this responsibility."

This is impressive evidence of the increased medical and hospital interest in alcoholism, a most heartening development of the past several years.

Thus we can see progress being made on many fronts in the battle against alcoholism.

For a clue to an understanding of how deep seated are the impulses which move the alcoholic, I would urge a reading of "Motivation of the Alcoholic for Recovery" by Dr. Lorant Forizs, from the March 1958, "Quarterly Journal of Studies on Alcohol."

I know of no better way to bring this whole matter into proper focus than to quote, in part, from the foreword of the annals from which I have selected several of these expert articles. The section of the foreword I have chosen, you almost say as a text, reads as follows:

"Because alcoholism is an emergent condition stemming from chemical, physiological, psychological, and sociologic preconditions, because responses to alcoholism cut across every segment and institution of our society, and because the painful and destructive impact of the condition is not only extensive but is experienced and for generations has been experienced in almost every sector of our society, there is practically no subject relevant to American life which is not relevant to alcoholism."

No segment of American life is wholly free from the problem, directly or indirectly; somewhere it cuts across all our paths and so it has become a common responsibility and a challenge to all.

Let us not turn our backs on the fact that alcoholism has been a national scourge of such proportions in some countries that it has brought on a condition of decadence, followed by national decline. America, let it be noted, holds no monopoly on the problem. Alcoholism is no respecter of national boundaries—its realm is the world-at-large—it plys its damaging work in Africa and south of the Sahara as well as in our own rural areas and effete cafe society. Hollywood may get the headlines because of the antics of its celebrated addictive drinkers but lesser known victims around the globe are struggling with "the demon of the bottle" 'round the clock. The problem is not unknown to the United Nations. Human nature in its universality is the target of alcoholism.

It is with a keen sense of my limitations before this limitless subject, but propelled by the unremitting necessity to endeavor to do something constructive about it, that I have drawn up a resolution which, I fervently hope, will mark the beginning of an effort on a national scale to deal adequately with the problem of alcoholism.

The resolution was the logical outcome of my studies on this engrossing subject. I am encouraged to suggest this course of action because of the very splendid work the several States are doing in this field, as well as the outstanding programs of private organizations and agencies.

As I have remarked before, pioneers have broken the trail in this prior social jungle, the way has been marked, much has been accomplished—so much in fact that the Nation would be letting down the movement's pioneers if something were not done at the national level.

The resolution I have the privilege to present calls for the establishment of a commission, comprising members from the executive branch of the Government and the Congress and qualified professional people to make a complete and exhaustive study of alcoholism in all its forms and manifestations with a view to reporting back to the Congress its findings for appropriate action.

As I have indicated, the several States in their programs on alcoholism have pointed the way for future accomplishments. There is need, as I have shown, for education of the public of the true nature of alcoholism, for extended research, for facilities in which rehabilitation may be carried on.

I am satisfied that when such a commission is created and its findings have been brought in and the results made known, this body will be convinced that in authorizing this comprehensive study of alcoholism it will have done one of the most truly constructive and meritorious works in its distinguished history. It is my great hope that a concerted effort to bring the resources of our mighty country to grips with the problems of alcoholism will evolve and finally strike down this terrible cancer of the spirit.

SELECT COMMITTEE ON CONSUMERS

Mr. JAVITS. Mr. President, on behalf of myself and Senators COOPER, KEATING, PROUTY, and SCOTT, I submit a resolution to establish a Senate Select Committee on Consumers; and I request the appropriate reference of the resolution.

I point out that I have now submitted the resolution during two sessions; and I am happy to note that the junior Senator from Oregon has submitted a similar resolution in the present session.

The PRESIDENT pro tempore. The resolution will be received and appropriately referred.

The resolution (S. Res. 119) was referred to the Committee on Banking and Currency, as follows:

Resolved, That (a) there is hereby established a select committee of the Senate to be known as the Select Committee on Consumers (referred to hereinafter as the "committee") consisting of seventeen Members of the Senate, of whom eleven shall be members of the majority party and six shall be members of the minority party. Members and the chairman thereof shall be selected as soon as may be practicable after the date of adoption of this resolution, and at the beginning of each Congress commencing thereafter, in the same manner as members and chairmen of standing committees of the Senate are selected. Vacancies in the membership of the committee shall not affect the authority of the remaining members to execute the functions of the committee, and shall be filled in the same manner as original appointments thereto are made.

(b) The committee shall adopt rules of procedure not inconsistent with the rules of the Senate governing standing committees of the Senate, and from time to time may establish such subcommittees thereof as it may determine to be required for the performance of its duties. A majority of the members of the committee, or any subcommittee thereof, shall constitute a quorum thereof for the transaction of business, except that such committee or subcommittee may fix a lesser number thereof as a quorum for the purpose of taking sworn testimony.

(c) No legislative measure shall be referred to the committee, and it shall have no authority to report any such measure to the Senate.

SEC. 2. (a) It shall be the duty of the committee to conduct a continuing comprehensive study and investigation with respect to—

(1) the nature and extent of economic problems of consumers within the United States;

(2) the extent to which authority heretofore conferred by law upon executive, administrative, and regulatory agencies of the United States provides effective means for the solution of consumers' problems; and

(3) the nature of any additional legislative or other measures necessary or desirable for the solution of such problems.

(b) The committee shall report to the Senate from time to time the results of its studies and investigations, together with its recommendations for any additional legislative or other measures which it may determine to be necessary or desirable for the solution of economic problems of consumers.

SEC. 3. (a) The committee, or any duly authorized subcommittee thereof, is authorized to (1) hold such hearings; (2) sit and act at such times and places during the sessions, recesses, and adjournment periods of the Senate; (3) require, by subpena or

otherwise, the attendance of such witnesses and the production of such correspondence, books, papers, and documents; (4) administer such oaths; (5) take such testimony either orally or by deposition; and (6) employ and fix the compensation of such technical, clerical, and other assistants and consultants as it deems advisable, except that the compensation so fixed shall not exceed the compensation prescribed under the Classification Act of 1949, as amended, for comparable duties.

(b) With the prior consent of the executive department or agency concerned and the Committee on Rules and Administration, the committee, or any duly authorized subcommittee thereof, may utilize the services, information, and facilities of any such department or agency, and may employ on a reimbursable basis the services of such personnel of any such department or agency, as it deems advisable. With the consent of any other committee of the Senate, or any subcommittee thereof, the committee may utilize the facilities and the services of the staff of such other committee or subcommittee whenever the chairman of the committee determines that such action is necessary and appropriate.

SEC. 4. Until an appropriation is made for the payment of the expenses of the committee, such expenses, in an amount not to exceed $, may be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee.

EXTENSION OF TIME FOR JUDICIARY COMMITTEE TO FILE REPORTS

Mr. HUMPHREY. Mr. President, on behalf of the Committee on the Judiciary, I ask unanimous consent that the time for the filing of reports pursuant to Senate Resolution 226, and Senate Resolutions 231 through 234, and Senate Resolutions 238 and 241, of the 86th Congress, be extended to April 30, 1961. This request concerns annual reports of certain subcommittees of the Committee on the Judiciary.

The PRESIDENT pro tempore. Without objection, it is so ordered.

AMENDMENT OF SECTION 314 OF PUBLIC HEALTH SERVICE ACTS OF 1944—ADDITIONAL COSPONSORS OF BILL

Under authority of the order of the Senate of March 29, 1961, the names of Senators MOSS, HICKEY, MCCARTHY, RANDOLPH, MCGEE, BARTLETT, CHAVEZ, and YOUNG of Ohio were added as additional cosponsors of the bill (S. 1467) to amend section 314 of the Public Health Service Act of 1944, introduced by Mr. MUSKIE on March 29, 1961.

NOTICE OF CHANGE OF DATE OF HEARING ON NOMINATION OF REYNALDO G. GARZA TO BE U.S. DISTRICT JUDGE FOR SOUTHERN DISTRICT OF TEXAS

Mr. MANSFIELD (for Mr. EASTLAND). Mr. President, on behalf of the Committee on the Judiciary, I desire to give notice that the hearing on the nomination of Reynaldo G. Garza, of Texas, to be U.S. district judge for the southern district of Texas, vice James V. Allred, deceased, has been rescheduled for Wednesday, April 12, 1961, at 10:30 a.m., in room 2228, New Senate Office Building.

At the indicated time and place persons interested in the hearing may make such representations as may be pertinent.

NOTICE CONCERNING CERTAIN NOMINATIONS BEFORE COMMITTEE ON THE JUDICIARY

Mr. MANSFIELD (for Mr. EASTLAND). Mr. President, the following nominations have been referred to and are now pending before the Committee on the Judiciary: Robert M. Morgenthau, of New York, to be U.S. attorney, southern district of New York, for a term of 4 years, vice S. Hazard Gillespie, Jr., resigned; and David C. Acheson, of the District of Columbia, to be U.S. attorney for the District of Columbia, for a term of 4 years, vice Oliver Gasch.

On behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in these nominations to file with the committee on or before Thursday, April 13, 1961, any representations or objections they may wish to present concerning the above nominations, with a further statement whether it is their intention to appear at any hearings which may be scheduled.

ADDRESSES, EDITORIALS, ARTICLES, ETC., PRINTED IN THE RECORD

On request, and by unanimous consent, addresses, editorials, articles, etc., were ordered to be printed in the RECORD, as follows:

By Mr. WILEY:

List of officers and trustees of the Friday Morning Music Club Foundation, Inc., together with a list of honorary members and past scholarship awards.

BARRY GOLDWATER: RADICAL OF THE RIGHT

Mr. MANSFIELD. Mr. President, there appeared in a recent issue of the Progressive magazine an article, by Karl E. Meyer, entitled "BARRY GOLDWATER: Radical of the Right." The alliterated title obscures what otherwise is an excellent study of the character and views of our distinguished colleague from Arizona. It is also a perceptive treatment of the highly significant role of Senator GOLDWATER in the Republican Party and in the current political life of the Nation. Those of us who know the Senator, regardless of our political views, will agree on at least one of the observations made in the article: that the Senator from Arizona is a gentleman, with a high sense of decency and fairplay, who states with great clarity and conviction the philosophy of the Republican Party.

The able Senator from Arizona is a vigorous exponent of his views—with many of which, I may say, I disagree. Nevertheless, there has never been anything personal in these disagreements. The Senator is not given to personal pique or vindictiveness; so it is possible to disagree with him and at the same time to have the highest respect for his integrity and his straightforwardness.

In this respect, the Senator from Arizona reminds me very much of the former Senator from California, Mr. Knowland. With that gentleman, I also found myself in disagreement from time to time, on various issues. Nevertheless, I had a high regard for him personally and a deep appreciation of the fact that one always knew where he stood. That is the same regard in which I hold the Senator from Arizona; and I ask unanimous consent that the article previously referred to be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

BARRY GOLDWATER: RADICAL OF THE RIGHT

(By Karl E. Meyer)

The leading radical in Washington today is a 52-year-old businessman and licensed jet pilot who looks more like a handsome television commentator than a U.S. Senator. With the bounce and bravado of a Hotspur in battle, he is urging the drastic revision of practically every liberal measure enacted since 1932, and possibly since 1896.

BARRY MORRIS GOLDWATER, the Republican Senator from Arizona, misleadingly calls himself a conservative. He is really nothing of the sort. The late Senator Robert A. Taft might have been called a conservative, but measured by GOLDWATER's standards, the Ohio Republican was tilted way over to port.

It is an odd phenomenon. While liberalism is the mood of the hour in the White House, the most arresting personality on Capitol Hill is this unreconstructed Old Frontiersman. His book, "Conscience of a Conservative," was a surprise best-seller (150,000 copies in hard-cover; 500,000 in paperback). He is the most sought-after speaker in his party, and on the college campus he is in close competition with bed-pushing as the fad of the moment. As many as 500 letters pour into his office every day, and when he debated an errant liberal (Senator EUGENE MCCARTHY) on television, some 1,500 persons took the trouble to write him a note.

Although his aids prudently discount it, there is also talk about a Goldwater presidential boom. The Senator seems half-serious about the idea. He has come up with a new slogan, "The Forgotten American," and news stories reflect a new concern with his image—a sure symptom of the presidential virus. According to the New York Times, his will be a popular conservative image. (The Senator shows no sign of being disheartened by the spoofing stickers on some Washington cars—"Goldwater in 1864.")

In some respects, it is not strange that GOLDWATER has caught the public fancy. Flamingly irrelevant as his ideas may seem, Senator GOLDWATER exhibits more dash and zeal in behalf of his convictions than do most of his counterparts on the liberal side of the aisle. In a housebroken and relatively tame Congress, the earnest Arizonian stands out as a relentless rebel—yes, as a radical.

Dare I suggest in the pages of the Progressive that possibly this is a good thing?

Let me try to make clear that I am not succumbing to sentimentalism in giving BARRY GOLDWATER the credit to which I think he is due. Outside of Washington, the Senator's intellectual limitations are painfully

evident; what does not come through as clearly is the stoutness and general decency of his character.

"He really believes all that stuff." The remark was made by a veteran Capitol reporter who has frequently written about the Senator. It is this quality of sincerity that sets the Senator apart from other conservatives in Congress. There is no shortage of politicians who express a glib public agreement, in varying degrees, with what GOLDWATER says. But the typical congressional conservative is more like CHARLES A. HALLECK of Indiana, the Republican minority leader of the House, a careerist cynic or there are many members like Virginia's HOWARD W. SMITH, the clever and courtly chairman of the House Rules Committee. Judge SMITH is a conservative all right, but does not like to submit his convictions to the test of reasoned debate. Instead, he wears his conservatism like a frock coat, and if you don't like it, he will smilingly invite you to look the other way.

With BARRY GOLDWATER it is different. Like a college seminarian, he is fully prepared to set forth his views in the most explicit and clearly formulated way. He is so wedded to the logic of his position that he paints himself into quixotic corners in the name of consistency. He cares about principles, and if his principles seem silly to such sophisticated folk as you and I, at least there is something to wrestle with besides the usual basket of eels that passes for conservative (and—too often—liberal) discourse.

Secondly, Senator GOLDWATER fights cleanly and has usually shown a scrupulous regard for the rules of the game. I say usually, because he transgressed in the case of his bete noire, Walter Reuther, whom he has variously called a liar, and more dangerous than the sputniks or anything Russia can do to us. But characteristically, GOLDWATER has made known his regrets for these extravagances. Unlike Senator Joseph R. McCarthy, for whom GOLDWATER expressed qualified praise, the Arizonian does not enjoy spattering mud through the CONGRESSIONAL RECORD, and he does not employ the calculated lie to ruin a reputation.

Thirdly, the Senator is known for his personal courtesy. When you ask people on Capitol Hill what they think of BARRY GOLDWATER, the first words invariably are, "He's a nice fellow," followed by expressions of wonderment at his ideas. Typical of GOLDWATER's personal consideration was an incident in 1954, when he was angered by an article that a Washington newspaperman had written about the FBI. Before he attacked the journalist on the floor of the Senate, his office called up the offender to advise him that he was about to be upbraided by GOLDWATER and would he care to be present and to comment? Senators more often reserve such courtesies solely for each other.

Lastly, the Senator has a sense of humor. He can laugh when HUBERT HUMPHREY twits him about signing a Hollywood contract—with 18th Century Fox. He enjoys telling the story of a visit to a snooty country club that barred Jewish members. The Senator asked if he could play nine holes of golf, since he was only half Jewish. It is difficult, I say, to dislike the man.

As to BARRY GOLDWATER's convictions, the usual phrase is that they are either pre-Silurian or somewhere to the right of Charlemagne. This is not quite fair. GOLDWATER's beliefs date back only to the 19th century. In economics he is, if he will excuse the term, a liberal of the classic variety: he simply does not believe that the Government should tinker in any way with the market economy. Thus the Senator sees the Constitution as a series of inhibitions against Government rather than as an instrument of national power. Essentially, he concurs with the four doughty justices of the Supreme Court who, in the 1930's, felt that nearly every New Deal measure was unconstitutional.

To enter the world of BARRY GOLDWATER in the year 1961 is to move into a realm as strange and as exotically colored as the landscapes of his beloved Arizona which hang on his office walls. Questions which most Americans thought were settled a generation or more ago remain burning issues to the Senator. Take Federal programs to assist agriculture. To GOLDWATER, they are repugnant to the Constitution; he writes in "Conscience of a Conservative": "No power over agriculture was given to any branch of the National Government." And that settles that. Or consider Federal aid to education: "* * * Any Federal aid program, however desirable it might appear, must be regarded as illegal until such time as the Constitution is amended."

The graduated Federal income tax raises a special problem because a constitutional amendment specifically permits this diabolic innovation. So the Senator shifts his ground—it is contrary to natural right and therefore immoral.

In the area of basic rights, the Senator, however, has it b th ways. Although he believes that it is both wise and just for Negro children to attend the same schools as whites, he finds that no powers regarding education were given the Federal Government. But when the Senator turns to the question of the rights of union members, he sees no philosophical or constitutional objection to using the full force of Federal power to help assure the liberty of workers within unions. But, it might be objected, if the Federal Government has no power over agriculture, where does the power come to regulate trade unions?

Concerning foreign affairs, the Senator is no less marvelously dogmatic. This is GOLDWATER's view of foreign economic assistance programs: "* * * Except as it can be shown to promote America's national interest, the foreign aid program is unconstitutional." Paradoxically, although GOLDWATER wants to curb the powers of the Federal Government, he also wants to adopt a tough line toward the Soviet Union. His language comes close to advocacy of preventive war. Negotiations with the Communists, he asserts, are useless; what is needed is the will to win once and for all. In addition to parrying Russian blows, "We must strike our own. In addition to guarding our frontiers we must try to puncture his." And all this on a balanced budget.

In reality, it would be impossible to operate a government like ours on the principles that Senator GOLDWATER espouses. Even Senator Taft favored Federal housing and aid to education legislation, though neither program is specifically authorized by the Constitution. To some extent, GOLDWATER has backed away from the logical abyss of his analysis and is offering what he asserts are constitutional programs for meeting national needs. His proposals, especially his complex plan for indirect Federal help to schools, are ingenious, interesting, and wholly unrealistic. Like his brethren on the far left, GOLDWATER is finding that extreme principles are better suited to sonorous speechmaking than to legislation. But if the Senator continues his search for constructive counterproposals, he may wind up by being as sensible, moderate, and dull as everybody else.

This seems unlikely. There is a streak of wild dogmatism in BARRY GOLDWATER which seems to propel him to the end of every available limb. Last November, he showed up as a speaker at the National Interfraternity Council. As a loyal Sigma Chi, he hailed fraternities as a "bastion of American strength," and added that "where fraternities are not allowed, communism flourishes." The Senator went on to cite Harvard as an example of a university where, in the absence of fraternities, Communist and Socialist philosophies are allowed to flourish.

But even when he is talking through his sombrero, BARRY GOLDWATER brings some welcome gusts from the old frontier. He grew up in Arizona, where the cowboy days are still a living memory; his family album suggests an episode from Gunsmoke. Grandfather Michael Goldwater came to California in 1852 on the traces of the gold rush. When a new gold strike developed on the Gila River in what was later Arizona, Michael drove a wagon across the desert to do business in the mining camps. Soon, Michael, and his brother, Joseph, started a chain of stores in the territory, beginning with an adobe store in Ehrenberg in 1862 which served as city hall, post office, and jail as well as the supplier of gunpowder and gingham. There were more than the usual risks for an entrepreneur—at one point, in Skull Valley, the brothers were seriously wounded in a skirmish with Apaches. Two of Mike's sons, Morris and Baron (father of the Senator), helped to extend the business from Prescott to Phoenix, Tombstone, and Bisbee. The store in Bisbee was the scene of a celebrated massacre in which five passers-by were shot, five bandits subsequently hung, and one culprit strung up by citizens who were dissatisfied with the courtroom verdict.

GOLDWATER's family traditions and his love for Arizona explain a good deal of his political style. He grew up with a passion for the strenuous life, and threw himself into every activity—family business, sports, exploring, photography, cookery, Indian studies, and aviation—with the same peppery enthusiasm. During the war he served with distinction in the Air Force and he has kept in trim as a Reserve pilot.

He sailed into State politics with the same breezy determination. The obstacles he faced were considerable. Arizona is normally a Democratic State, and his opponent in 1952 was Ernest McFarland, then Democratic majority leader of the Senate. GOLDWATER's previous experience consisted of two terms on the Phoenix City Council and his service as campaign manager in 1950 for the successful Republican gubernatorial candidate. But between his indefatigable campaigning and a ride on the Eisenhower coattails, GOLDWATER won by a narrow 1-percent margin. He was overwhelmingly reelected in 1958, when he was virtually the only leading rightwing Republican Senator to survive the Democratic tide.

Part of his appeal has been explained by Secretary of Interior Stewart Udall, who served two terms as a Democratic Representative from Arizona. Udall has remarked that many Arizonians who voted for him also voted for GOLDWATER in 1958. "They may not have agreed with BARRY," he said, "but they darn well knew where he stood."

The rest of the country, if it was in any doubt, also found out where BARRY stood at the Republican convention in 1960. The square jaw, the muscular frame, the pugnacious oratory came over well on television and established firmly and clearly the Goldwater image. There was no doubt of the fact that the scepter once held by Robert A. Taft had passed to GOLDWATER—he was now the enthroned leader of the regular Republicans, the party stalwarts who look back to Herbert Hoover with nostalgia and speak of Dwight D. Eisenhower as if he were a Fabian Socialist.

Since the convention, GOLDWATER has considerably broadened the base of his influence. Arizona is a small State, with not many more than a million residents; its traditions are as special and as locally flavored as the Grand Canyon and the Painted Desert. But

the junior Senator from this State has somehow struck a responsive chord with thousands of conservative Republicans who live in small towns and medium-sized cities across the country—and who perhaps find in GOLDWATER the embodiment of their romantic political fantasies. He is a personable link with the old frontier which, in the minds of many Republicans, is still as real as Abilene was to President Eisenhower.

There are some who can argue plausibly that it is basically unhealthy for the Republican Party to fall into irresponsible opposition by flirting with the GOLDWATER line. As a pragmatic political matter, it would be more sensible for the Republicans to imitate their Tory brethren in Great Britain by unreservedly accepting the welfare state. And unquestionably Senator GOLDWATER'S intransigence in foreign policy does not recommend itself as a model in the days ahead.

But there is another aspect to the problem. Whether we who regard ourselves as liberals like it or not, an appreciable sector of the population feels frustrated and cheated by liberal political success since 1932. In an almost paranoid way, some ultrarightists feel that a conspiracy of union leaders, big city bosses, eastern financiers, Harvard professors, and the National Association for the Advancement of Colored People has captured the country. This view is more prevalent than a liberal might suppose; it extends from suburban dowagers and small businessmen to uprooted poor whites in city slums.

In addition to this cranky element, there is a larger group which simply feels—and the view is not wholly irrational—that what the Government can do for you it can do to you. There is a restive distrust of Washington, and a feeling that centralization can mean the loss of certain vital local functions. Behind this distrust is a slight touch of anarchism, of suspicion of the state per se—again, an attitude that has some basis in reality.

These groups have a legitimate right to their views in a democratic society; even the cranks have their place in the political spectrum. The great danger is that demagogs can exploit this emotional electorate for malignant ends—to turn, as the late Senator Joseph McCarthy did, a legitimate impulse to illegitimate purposes. The danger is especially acute during a period of liberal ascendancy in the White House when, on the surface at least, the left seems to have a corner on power and publicity.

What I am saying is that we who disagree with Senator GOLDWATER may soon be glad that he is around. No one could seriously maintain that GOLDWATER is a seditionist or a malevolent demagog. On the contrary, he is a decent, upright, and thoroughly attractive politician. The groups he speaks for deserve a spokesman, and a good one. They could do far worse than BARRY MORRIS GOLDWATER.

ANNIVERSARY OF CROATIAN INDEPENDENCE

Mr. DIRKSEN. Mr. President, the Croatian people of Yugoslavia declared their independence on October 29, 1918; but it was short lived, for the Croatians and other peoples of Yugoslavia, such as the Serbians, the Slovenians, the Dalmatians, and the Montenegrins, fell under the yoke of Tito Communists, under which they live today. In the past few months, Members of Congress have been raising their voices to give hope to the peoples of Eastern Europe and sectors of the Balkans who have fallen under the brutality and subjugation of the Communists' power.

The Croatians are a proud people, and were true friends and protectors of the American World War II airmen who were shot down over Croatia. They not only aided the American airmen, but also helped them escape and return to the free world.

Mr. President, the United States has always believed in the basic principle of the right of self-determination for all peoples; and it is hoped that continuing efforts will be made by the United Nations to impress upon the Communists the need to permit all of the proud nations who have fallen behind the Iron Curtain to have an opportunity for free elections, so the people may determine the form of government under which they desire to live. During this Easter week, when peace on earth and good will toward men are in the hearts and the souls of most people, it is appropriate that all freedom-loving nations should renew their requests that these people behind the Iron Curtain be given an opportunity for self-government.

LAOS

Mr. DIRKSEN. Mr. President, this morning there appeared in the Washington Post a very interesting and incisive editorial, under the caption "Where Is the Victory?" I know that as one talks from time to time about Laos and the Laotian situation, some might believe that was being done to exploit some partisan advantage. However, I am sure no such charge can be made against the Washington Post—and certainly not as to the exploitation of any partisan advantage for the party of which I am proud to be a member.

There are some rather significant statements in the editorial; and I believe I should emphasize one of them, in particular, as follows:

But let no one delude himself that this will be any victory for Britain, for the United States, or for the non-Communist countries generally. It may be the best solution that can be obtained without enlarged war and at a price that the allies are able or find it prudent to pay. Actually, however, it will confirm a substantial setback.

Mr. President, I presume that if I had said that on my own responsibility, I might have been sharply criticized. But I believe it will serve a useful purpose to have this editorial, from the Post, published in the RECORD as part of my remarks; and I ask unanimous consent for that purpose.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

WHERE IS THE VICTORY?

Let us hope that a cease-fire will prove possible in Laos along the lines envisaged by Britain. Soviet conversations with the British Ambassador point to agreement on a cease-fire with simultaneous reactivation of the International Control Commission composed of representatives of India, Poland, and Canada to verify the truce. A 14-nation conference would then be called to meet shortly, presumably in Phnom Penh, Cambodia.

We shall soon know whether Soviet acceptance of such conditions involves any hidden hooks. If a relatively satisfactory procedure is worked out, it will be quite a feat for the combination of British diplomacy and the quiet firmness displayed by President Kennedy.

But let no one delude himself that this will be any victory for Britain, for the United States, or for the non-Communist countries generally. It may be the best solution that can be obtained without enlarged war and at a price that the allies are able or find it prudent to pay. Actually, however, it will confirm a substantial setback. And the dangers which it is bound to entail not only for Laos but also for her neighbors ought to warn against any rosy or facile assumption that peace suddenly will have arrived.

There is cause for grave misgiving, for example, about the effectiveness of truce supervision. The International Control Commission did not work well in Laos before; such delayed investigations as it was able to conduct were largely futile. Much will depend upon the attitude of the Indian member in responding promptly to complaints of violation. In addition, there will be the manifest difficulties of negotiating with the militant Communist states of China and North Vietnam in a peace conference.

If, as now widely assumed, the settlement requires a coalition government in a neutral and unalined Laos, the chances will be very "iffy" indeed. Perhaps such a coalition would not lead inevitably to Communist absorption if Communists were kept out of key ministries such as defense, foreign affairs, and interior. It might be possible to have a government that would include the King, former Prime Minister Souvanna Phouma, and such other leaders as Gen. Phoumi Nosavan and former Prime Minister Phoui Sananikone. But such an arrangement to match Communist skill would presuppose a degree of national unity and determination that does not now exist.

In short, what is likely to emerge will be at best a new chapter and a more worrisome challenge. Whether any real stabilization results will depend upon far more effective methods of helping Laos economically, as well as upon more attention to the problems of Cambodia, Vietnam, and Thailand, which will be understandably skittish. This is a very large order. It can be approached more realistically if we understand the dimensions of what has happened and resist any notion of exultation about a nonexistent triumph.

THE FOREIGN STUDENT SERVICE COUNCIL OF WASHINGTON

Mr. FULBRIGHT. Mr. President, the issuance of the first formal annual report of the Foreign Student Service Council of Washington offers me a welcome occasion to say a few words about this outstanding group. The report, which has been put together with taste and imagination, describes the activities of an organization which began in 1956, as an experiment in supplemental education and hospitality for foreign students, and now is a successful reality. The council's success rests on the fact that its more than 600 personnel are volunteers, who therefore regard their activities with special enthusiasm and interest. A number of them are professionals in the field of international exchange, and all of them are interested and talented citizens.

In 1960 the Foreign Student Service Council, often in cooperation with other community groups and agencies serving foreign visitors, rendered services to some 3,900 people from abroad. Although many of these students and visitors are engaged in nonpolitical fields,

nearly all will return—and are aware that they will return—to positions of leadership in their countries. The opportunity to bring together these important young people from abroad and the multitude of talents to be found in Washington provides the Foreign Student Service Council with a unique atmosphere in which to work.

In order to insure the fullest use of the students' time, the activities of the Foreign Student Service Council include a series of seminars on contemporary America, and an educational events program designed to encourage discussion of recent history with some of the individuals who were in close touch with it. Last year, I had the honor to participate in the latter program; and I found myself in the distinguished and representative company of former Secretary of State Dean Acheson, Mr. Edward P. Morgan, and Dr. Howard Mitchell, to name only a few. These and other activities, such as tours of the National Institutes of Health, the World Bank headquarters, and other places of specialized interest, provide the students with face-to-face contacts with Americans in responsible positions. The informal and frank meetings with Foreign Student Service Council volunteers also give the students and ourselves valuable insights into the nature of present world realities.

The very success of the Foreign Student Service Council in helping foreign students, through a variety of services, underscores the urgency of a vital problem we confront. All too often the student from abroad is turned loose amidst our frequently bewildering college life, with little or no further orientation, guidance, or hospitality. All too often there is consequent embitterment, which tends to destroy the positive values of the students' experience here.

Our universities are struggling manfully with this problem; but they are waging a losing fight, because of increasing competitive financial drains on their resources. In this connection, the mutual educational and cultural exchange bill, S. 1154, which I introduced on March 2, provides a means of assisting with this immensely important effort. I am very hopeful that the bill will receive the approval of Congress at this session, and thus will at an early date bring reinforcements to bear.

Although the activities of the Foreign Student Service Council implicitly stress the need for exchange program improvements, the generosity of the Foreign Student Service Council volunteers with their time and their imagination provides a convincing demonstration of the worth and the mutual excitement of international student exchange programs. The Foreign Student Service Council report is subtitled "Washington Welcomes the Foreign Student." I submit, Mr. President, that Washington equally welcomes the Foreign Student Service Council.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, with the distinguished chairman of the Foreign Relations Committee on the floor, the Senator from Arkansas [Mr. FULBRIGHT], and after consultation with the minority leader, the Senator from Illinois [Mr. DIRKSEN], I ask unanimous consent that the Senate now proceed to the consideration of executive business, to consider a number of nominations which on yesterday were approved by the Foreign Relations Committee and were reported from it.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDENT pro tempore. Without objection, the nominations will be stated.

AMBASSADORS

The Chief Clerk read the nomination of G. Frederick Reinhardt, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Italy.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Joseph C. Satterthwaite, of Michigan, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Union of South Africa.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Parker T. Hart, of Illinois, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Saudi Arabia.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

The Chief Clerk read the nomination of Raymond Telles, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Costa Rica.

Mr. MANSFIELD. Mr. President, all these nominations are excellent, and deserve the approval of the Senate; and I wish to say a few words, in particular, about the nomination of the mayor of El Paso, Tex., the Honorable Raymond Telles, who is to be our next Ambassador to Costa Rica.

I believe this appointment marks a milestone in the affairs of the people of Mexican-Spanish descent. Mr. Telles has served for three terms as mayor of El Paso; and he was a candidate for a fourth term, until he was asked by President Kennedy to consider accepting this particular position. Mr. Telles has an outstanding record of civic responsibility, and he served his country in both the Second World War and the Korean conflict. I am delighted—as I know all my colleagues on the committee, all my colleagues in the Senate, and the people of the United States are—with the appointment of this gentleman of Mexican-American descent to be our Ambassador to Costa Rica.

Mr. FULBRIGHT. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. FULBRIGHT. I should like to associate myself with the remarks of the distinguished majority leader. While Mr. Telles is a noncareer appointee, he has many accomplishments directly related to his responsibilities in this post, and I think it is an excellent appointment.

I do not want this occasion to pass without congratulating the administration on the high quality of its appointments, most of whom are career personnel of the highest quality. It has been very pleasing, indeed, to have persons of fine experience and accomplishments in every respect appointed to positions of great responsibility. I think the administration is to be commended for the discrimination in its appointments.

Mr. MANSFIELD. Mr. President, I wish to associate myself with what the distinguished chairman of the Committee on Foreign Relations has just said, because this is an excellent list of appointees; and we know they will serve our country with distinction in the posts to which they have been appointed.

The PRESIDENT pro tempore. The question is, Will the Senate advise and consent to the nomination of Raymond Telles, of Texas to be U.S. Ambassador to Costa Rica.

The nomination was confirmed.

Mr. DIRKSEN. Mr. President, I do have some familiarity, and a rather intimate one, with three of the nominees whose names appear on the list.

I note that Frederick Reinhardt will be our new Ambassador to Italy. I last encountered him, I think, in the Orient, in South Vietnam, when I was there. He has given splendid indications of his qualifications for this post.

As much could be said of Joseph C. Satterthwaite, who has been nominated to be U.S. Ambassador to the Union of South Africa.

Mrs. Jane Warner Dick, of Illinois, who has been named to be the U.S. representative to the United Nations Social Commission of the Economic and Social Council, has been extremely prominent in civic and public affairs of our State, and bears a high reputation, and her appointment is well and favorably received. I know she will discharge her responsibilities with high credit to herself and her country.

UNITED NATIONS SOCIAL COMMISSION OF THE ECONOMIC AND SOCIAL COUNCIL

The PRESIDENT pro tempore. The next nomination will be stated.

The Chief Clerk read the nomination of Mrs. Jane Warner Dick, of Illinois, to be the representative of the United States of America on the Social Commission of the Economic and Social Council of the United Nations.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

The Chief Clerk read the nomination of John M. Leddy, of Virginia, to be U.S. Executive Director of the International Bank for Reconstruction and Development for a term of 2 years.

The PRESIDENT pro tempore. Without objection, the nomination is confirmed.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the President be immediately notified of the nominations today confirmed.

The PRESIDENT pro tempore. Without objection, the President will be so notified.

LEGISLATIVE SESSION

Mr. MANSFIELD. Mr. President, I move that the Senate return to legislative session.

The motion was agreed to; and the Senate resumed the consideration of legislative business.

NATIONAL BARBERSHOP HARMONY WEEK

Mrs. SMITH of Maine. Mr. President, National Barbershop Harmony Week will be observed throughout the United States and Canada April 8 to 15.

The State of Maine has again demonstrated the validity of the adage, "As Maine goes, so goes the Nation." Gov. John H. Reed on March 24 proclaimed the week of April 8–15 as Barbershop Harmony Week in Maine, and immediately thereafter harmonized with the Downeasters, Portland barbershop quartet. Historic precedents were shattered as the Downeasters sang before both houses of the legislature a song written especially for the occasion by Marie R. Hoyt, of Richmond, Maine. This song commemorates the 100th anniversary of the Maine Legislature.

"Keep America Singing," theme song of the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America, Inc., which has chapters in Portland, Calais, and Presque Isle, dating back for as many as 12 years, also was sung for the Senate by the Downeasters. This quartet is led by Richard H. Place, of Waterboro. His singing mates are Theodore Sawyer, of Portland, Richard Wheeler, of Falmouth, and James Gilchrest, of Bar Mills.

The Nation's Capital will celebrate Barbershop Harmony Week by having an hour's concert on Sunday, April 9, at 3 p.m., on the Capitol's east steps, by the Chorus of the Potomac, 400 voices at full strength. The public is invited to hear this magnificent chorus comprising singers from the District of Columbia, Alexandria, Arlington, Fairfax, Manassas, and Montgomery County chapters of the 28,000-member society.

Arrangements for the Washington Harmony Week celebration are in charge of Edward R. Place and Dee Paris of SPEBSQSA international public relations committee.

Three years before the barbershop quartet society was founded in Tulsa, Okla., Edward and Richard Place, brothers, sang in 1935 in the State of Maine quartet with Senator Harold Schnurle and Judge Samuel Pinanski, further evidence that Maine is a harmonious place to live and was in the forefront of the revival of the traditionally American art of four-part male harmony singing.

Barbershop Harmony Week will be ushered in April 8 at Portland City Hall by the 11th annual Parade of Quartets, sponsored by Portland chapter, and presenting talent from the local area and throughout New England. In the other 49 States, as well as the Provinces of Canada, voices will be raised in harmonizing the good old songs as a reminder to all of the blessings of music in our national life.

GRASSROOTS DIPLOMACY

Mr. MORSE. Mr. President, we have a great Ambassador in our ambassadorial ranks in the Honorable John M. Cabot, our Ambassador to Brazil, who recently wrote in the Foreign Service Journal an article entitled "Grassroots Diplomacy."

On my last trip to Brazil I had an opportunity to observe the operation of the program that Ambassador Cabot describes in this article, and I came away from Brazil more enthusiastic about the work of Ambassador Cabot than I was before I went to Brazil, and at that time I had a very high regard for our Ambassador to Brazil.

I ask unanimous consent that the article be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

GRASSROOTS DIPLOMACY

(By John M. Cabot)

There are undeniably many real controversies between free nations. These controversies are the subject matter of classical diplomacy—the diplomacy which seeks to eliminate even the most aggravated sources of dispute between nations acting in good faith. There are many occasions when rulers and people do not really want to eliminate controversies, and then diplomacy is helpless. But when there is a will to peace on both sides a way to peace can generally be found. Contrary to popular belief, diplomats almost invariably work overtime for peace.

Many controversies exist, however, largely or wholly in the minds of opinion molders and people; the controversy itself could be solved by normal diplomatic means if public opinion on one or both sides had not been needlessly inflamed. How often have we thought of suitable solutions if only public opinion would permit. The problem is to get people to understand what the score is.

More and more in democratic nations the major decisions of diplomacy are made, not by the government or an elite of diplomats who determine the course to be followed from an intimate knowledge of the factors involved, but by a public which may be very badly misinformed. In a democracy it is clear that basic policy must be decided by the people. But that is all the greater reason why the people must be well informed. It is, incidentally, a reason why diplomats should know what people are thinking, not just what a noisy minority is saying.

How many misconceptions and misunderstandings arise simply because people have never really listened to the other side of the dispute. Some international controversies have arisen from nothing more substantial; most have been greatly exacerbated by it. Given the control of policy by the people, it is clear that it is not enough for the diplomat to have a good solution for the problem; he must also condition public opinion in the countries involved in the dispute to accept his solution. I frankly fear that that involves techniques with which the professional diplomat is all too often not familiar, and with which he should be in these changing times.

The diplomat is indeed becoming increasingly familiar with the speech, the press release, and the press conference. These techniques can accomplish a good deal. But to be effective, they must be noted, and that by people whose inclination it is to be critical. Too often those who pay any attention to them do so because they already agree with them. Even when a critic notices them, it is generally more in a mood of picking holes in them than of seeking enlightenment.

It was with these thoughts in mind that I sought when Minister to Finland to find some technique which would permit us to get our message across to a sector where criticism of us was particularly disturbing—the Finnish labor movement. Labor is powerful in Finland, as it is in all the northern countries. Though a great majority in all the labor movements in that area is probably anti-Russian and a smaller majority pro-United States, criticism of some aspects of American life is very widespread. So often these criticisms seemed so grotesque that I would feel "If I could talk to them." And then one day I thought: "Why not?"

Let no one think I did not recognize the dangers of such a departure. There was the danger that I would make a fool of myself, or that hostile listeners would make a fool of me. There was the danger of nasty incidents. There was the danger that I would find myself hopelessly caught between the Scylla of saying nothing with all reservations and the Charybdis of saying something all too indiscreetly quotable. And yet the possible gains attracted me and persuaded me the risks were worth running. Although it was obviously a departure from classic diplomatic techniques, I did not think that should discourage me. In today's unusual battle we need a little imagination.

My technique has been simply to sit down with a group and let them ask me whatever they will. My usual meetings in Finland and later in Sweden had 35 to 75 labor leaders at them. Since the labor movement is highly organized in both countries, it was fairly simple to arrange meetings through it. I early discovered it was helpful to serve light refreshments (such as coffee and a sandwich) at the meetings; it helped the atmosphere and I doubt I have ever used representation funds to better advantage. In Finland I made several trips, each with a series of meetings; in Sweden, I systematically covered the country to visit practically every industrial town with over 10,000 people. In Colombia and Brazil I have used almost the same technique with student groups, and my only regret is that I have not been able to do more of it. I think it is suitable for almost any intelligent group critical of us. And I may add I have gotten extra mileage rather than trouble by admitting the press to my meetings, provided this was agreeable to the group. I have been misquoted, but my thoughts have reached many people not at the meetings. We do not accomplish anything worthwhile by refusing to take risks.

Naturally, my techniques evolved with experience, but my original thoughts have in the main stood all tests. The meetings should be as informal as possible. I should not tell those present (as in a speech) what

they should think; except for a few preliminary remarks to explain what the meeting was all about, my comments should be directed only to questions asked me. My remarks would generally be pitched in a low key, and I quickly discovered that candor in admitting faults made my listeners more receptive of my other points. I had to be careful never to lose my temper and never to rant or bluster; sweet reasonableness awoke a clearly echoing sentiment. By questions and answers one feels much closer to one's audience than in a speech; it is a curious bit of psychology that people listen more attentively and are more inclined to be swayed.

In Sweden people thought I would never get labor leaders to start asking questions; Swedes have a horror of making themselves conspicuous. But I had already evolved in Finland a solution to that problem; the organizers of the meeting were strictly enjoined to have two people prepared to ask questions—any questions so long as they were asked. Once the ice was broken, the problem always was to break the meeting up at a reasonable hour.

People have often asked me how I could be prepared to answer all the questions that might be asked me. My answer is that they have always followed an extraordinarily consistent pattern—it was rare to get something which hadn't been asked before. And when a question is asked many times, one naturally tends to improve one's answer to it. I always had my labor attaché with me to answer technical questions, but it was not wise to have too many people on my team—generally the only other man on it was a translator. People have also been surprised to learn that there were Communists at many meetings. Personally, I always welcomed having them; they made the meetings livelier. When the questions were blunt, one could make a blunt answer. But the best of it was that the Communists were so frequently the victims of their own propaganda. They would smugly ask some question to which the answer was perfectly easy—for example, "Why is the United States opposed to the control of the atomic bomb?" And when I described the early efforts of the United States to establish controls (to be blocked by the Russians—something which those present had half, but only half, forgotten), one could almost hear the snickers of the Social Democrats present at the discomfiture of the Communists. Communist questions were also so much in a groove that it was easy to be prepared for them.

I have never had any real incidents in the course of over a hundred meetings. I have, of course, had many hostile questions—sometimes harangues masquerading as questions. But the more extreme the question, the more likely it was to prove self-defeating. I always let the haranguers rant on as long as they would; the longer they went on, the more people they turned against them and the easier they made it to puncture their more violent sallies while remaining discreetly silent about their better points. There is also a certain restraint which arises from the host-guest relationship.

The meetings have more than justified themselves from the information which I have derived from them. It is impossible to be at one without getting a pretty good idea of what people are thinking—from the questions asked, from the way they are phrased, from the reaction to them and to my answers.

Needless to say, the meetings gave rise to numerous amusing incidents. I recall one in a town in north Sweden at which the Communist who headed the labor organization insisted on presiding. Since there were many Communists at the meeting we expected the worst and, indeed, we had a lively evening. At the end, the Communist rose to say that when he had heard I was coming he had been sure I would just spout propaganda—but (as our mouths opened wider and wider) he went on to say that it had been a most informative evening, and he wished to compliment me for coming. Or the time in another town when one man got up to say he couldn't understand why he, the president of the local Swedish-American Society, couldn't get an American visa. The fact that he was also head of the local Communist organization was surely not pertinent.

I do not wish to exaggerate the impact of this technique. Obviously it is limited. Few people are going to change their opinions radically no matter how cogently I answer questions. And yet I do believe it has an impact. It makes people think, it exposes Soviet mendacities, it reminds people of things they had forgotten in the deafening roar of Communist propaganda. I am not one of those who subscribe to the doctrine that propaganda is no better than the policy behind it. Soviet propaganda is much more effective than the policy behind it should permit—and we should never forget it. We must devise techniques to get our message across in the sectors where it will count. I shall be very pleased if I have made a modest contribution to this.

LAOS AID PROGRAM

Mr. MORSE. Mr. President, there appeared in this morning's Washington Post an article by Drew Pearson entitled "United States Bungled Laos Aid Program."

I ask unanimous consent that the article be printed in the RECORD at this point in my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Apr. 6, 1961]

UNITED STATES BUNGLED LAOS AID PROGRAM

(By Drew Pearson)

Now that the Kennedy administration has taken the courageous though perhaps injudicious task of picking up the intricate broken pieces of the problem of Laos, it has an obligation to the American people to do three things:

Focus full light on the past corruption, inefficiencies, and errors which led to the present tragedy of Laos.

Punish, not reward, those responsible for the tragedy.

Concentrate on finding good men to undertake the administration of foreign aid, not only in Laos but in other parts of the world, so the tragedy of Laos will not be repeated.

Instead, the Kennedy administration recently rewarded the former U.S. Ambassador in Laos, J. Graham Parsons, who had also served as Assistant Secretary of State under President Eisenhower. Parsons was made Ambassador to Sweden. True the Ambassador is a career diplomat. True also, the career boys like to protect each other just as West Pointers and Annapolis grads belong to the Career Protective Association. But that does not mean that President Kennedy needs to accept their recommendations for self-promotion.

In the initial stages of foreign aid it was administered with care by dedicated public servants. Of late it has tended to become a giant boondoggle administered in some cases by footloose Americans who either can't get or don't want jobs at home.

The administration of foreign aid in Laos helped negate its own main objective—the prevention of communism.

TABULATION OF ERRORS

Here is how American aid was administered in the tiny Kingdom of Laos, which, belatedly, we are trying to save from both communism and our own errors.

Listless Laotian Army: Though the Joint Chiefs of Staff recommended vigorously against it, the State Department, under the guidance of J. Graham Parsons, decided to organize an army of 25,000 men to fight communism. U.S. military advisers said it would be impossible to organize an army of more than 12,000 to 15,000 men and make it effective. This proved to be correct.

The present Lao Army just doesn't fight. It's the highest paid army in the world, and its pay raises in 1955 and 1959 added $3.8 million every year to the tab of the American taxpayers. If the pay check didn't come from Uncle Sam, the Lao officers and men would go home the next day. Furthermore, a lot of the arms sent by the United States even turned up on the pro-Communist side.

U.S. Corruption: Edward T. McNamara, public works and industry officer of the U.S. Operations Mission, has been charged by the House Government Operations Committee with "accepting bribes totaling at least $13,000 from Willis H. Bird and Gerald A. Peabody of the Universal Construction Co., in return for helping them secure lucrative contracts and overlooking deficiencies in their performance."

William E. Kirby, U.S. transportation adviser, was instrumental in securing a contract for the supply of ferry barges to the Hong Kong Transportation Co., and, according to the Government Operations Committee, "was recipient of $500 from the Hong Kong Transportation Co., while the contract was being negotiated." Later he went to work for one of Hong Kong's affiliates.

Brig. Gen. Lacey Murrow, retired, head of Transportation Consultants, was under retainer to Vinnell Co., at the same time he was employed by the International Cooperation Administration in Laos for the purpose of advising on construction projects. During this period Vinnell Co. was seeking to obtain contracts with ICA in Laos.

Upon leaving Laos, Carter de Paul, former U.S. Operations Mission director, sold his 1947 Cadillac to the head of the Universal Construction Co. at an inflated price, despite the fact that it couldn't run, according to the official report of Representative PORTER HARDY, Democrat of Virginia. It stood rusting in front of Universal's main office, the laughing stock of local Lao, then was cut up into pieces and dropped into a well.

Punishing the alert: When Haynes Miller, an auditor for the General Accounting Office in Washington, came to Laos to check on expenditures, he reported the above improprieties and problems both to Washington and to local U.S. officials in Laos.

Instead of being heeded, Miller was railroaded back to Washington on the ground that he was unable to adjust. Ambassador Parsons, according to official findings, abetted this removal and lent it color with his name and office.

This is the Ambassador who has now been promoted to be envoy to Sweden. And this is just a small part of our tragedy of errors in the little kingdom in defense of which the United States has now put its national prestige on the line.

Mr. MORSE. Mr. President, the article is highly critical of our new Ambassador to Sweden. I have had a good many reservations in regard to our new

Ambassador to Sweden. I did not raise any questions about his appointment, for two reasons. First, I do not want to give the impression that I am constantly opposing nominations of the Executive. Second, I well know, from experiences I have already had, it is hopeless, in this stage of the administration's political honeymoon, to succeed in opposing any nomination, no matter how bad it may be. But I do wish to say that the Kennedy administration owes it to the American people to see to it that the Pearson article is answered, if it can be answered. I think the American people ought to know what many of us who serve on the Foreign Relations Committee do know, that for the past several years American policy in Laos has not been well handled. I think there is no question that there has been both inefficiency and corruption in connection with American foreign aid in Laos.

We have just about reached the point that, if one is a career officer, no questions are going to be raised as to whether or not he should be promoted up the ladder of Foreign Service. I happen to be one Senator serving on the Foreign Relations Committee, Mr. President, who knows that the fact that someone is in the career service does not necessarily qualify him for an ambassadorial appointment.

It is very important that we have a check, within the administration of American foreign policy, by seeing to it that a number of our Ambassadors are not career service officers. Woe be it unto us if we ever reach the time when all of the appointments of our Ambassadors are from the ranks of career service employees. It would create an ambassadorial monopoly which would make a union closed shop look like a democracy.

I have grave doubts in regard to the desirability of developing a monopolistic career service for Ambassadors in our Foreign Service. Much has been said, by way of an example, pointing to the British career service. I am one Senator who hopes that we will never adopt the British career service as an example of what the American career service should be.

I am very much disturbed by developments in Laos, because I think we must see to it that the Communist advance does not continue in Laos. But, at the same time, I think we ought to inform the American people about our own mistaken policies of the past in regard to Laos. We have much to answer for in regard to the developments in Laos.

Mr. MORSE subsequently said: Mr. President, I wish to supplement the comments I made a few minutes ago relative to the Foreign Service. One reason why I would not be agreeable to pattern our Foreign Service on the British Foreign Service is that I do not believe in foreign policy by secrecy. There is a great deal of it in the administration of foreign policy in the British Empire as compared with the administration of foreign policy in the United States. Let us never forget that foreign policy in the United States belongs to the American people, not to the President, not to the Secretary of State, not to our Foreign Service.

The President and the Secretary of State and the Foreign Service are but the administrators of our foreign policy belonging to all of the American people. It is of great importance that the American people be kept informed about their foreign policy, and that we bring to an end secret diplomacy in the administration of American foreign policy. I have great hopes that under the new administration that trend will develop.

I wish to say to the Senate that under the advise-and-consent clause of the Constitution, the Senate cannot escape its responsibilities and obligations in respect to the administration of American foreign policy. I intend to continue to raise my voice in calling attention to the shortcomings of American foreign policy, as I have been doing for 16 years in the Senate. I hope that this year, when the whole matter of the foreign aid program comes before the Senate, it will receive a scrutiny the like of which it has not received for many a year.

Mr. President, I see on the floor of the Senate the Senator from Louisiana [Mr. ELLENDER], who time and time again has raised questions in respect to the administration of our foreign aid in some parts of the world, where the American people have been "bled white."

We have reached the point where the national debt of the United States is greater than the national debts of all our allies, combined. One reason, of course, why it is greater than all of our allies combined is that the American taxpayers have paid off so much of the national debts of our allies.

Furthermore, I believe that the American people need to be told, and to have the facts presented to them—and I intend to do that again this year, as I have in the past—that a great deal of our foreign aid is really a subsidization of American industry. In fact, Mr. President, American businessmen, when it comes to receiving a subsidy, make the subsidy to the American farmers look like economic peanuts.

I raise this point today because it will not be many weeks, in my judgment, before we will be confronted in the Senate with the whole subject and the necessity for a careful scrutiny of our foreign aid program.

I am in favor of a foreign aid program which is based on a loan program. I believe the time has come for us to bring to a halt our giveaway programs in the field of foreign aid. One need look only at the contributions we are making for military purposes to some of the nations in the world. In my opinion, if we should get into a war, many of these nations, such as Laos, would not be any asset to us in that war because they do not have the will to fight. There is no will to fight in Laos. That has been demonstrated over and over again. I think much of the money we have spent in so-called military aid to Laos is money which has been completely wasted.

CHURCHES BACK HEALTH CARE THROUGH SOCIAL SECURITY SYSTEM

Mrs. NEUBERGER. Mr. President, the National Council of Churches, the Nation's largest church federation, has endorsed the principle of providing health care for the aged through the social security system.

The Council's 250-member governing board, representing 34 Protestant and Orthodox denominations with 38 million adherents, gave unanimous approval to the social security approach at its February 22 meeting at Syracuse, N.Y. The governing general board authorizes representatives of the National Council to testify at public hearings along the lines of its resolution.

Mr. President, I considered it a privilege to join with 16 other distinguished Senators in sponsoring the Kennedy administration's health coverage bill, S. 909, which would provide health care under the social security system. It is my earnest hope that this needed legislation will promptly be enacted into law by the Congress so that the benefits of adequate health care will be available to our retired citizens. As a member of the recently created special Senate Committee on Aging, I am particularly concerned regarding the many problems in this field, but the single most pressing problem is that of adequate health coverage.

The medical care resolution of the general board of the National Council of Churches pointed out that most persons over 65 cannot afford the high cost of adequate private health insurance.

While it is to be preferred that health needs be met without resort to governmental action, the general board declared, where needs of people can be met only by united, socially planned action, the Christian will choose such action rather than the neglect of basic human needs. Therefore the National Council of Churches supports in principle legislation which will extend the benefits of old age, survivors' and disability insurance to include health care for retired aged persons.

Rejecting the means tests qualifications for health benefits under a Government program, the general board declared:

> In planning and developing any government insurance program to help older people meet the cost of their medical care, there is a Christian obligation to include provisions for its administration that will adequately safeguard freedom, dignity, and self-respect.

The general board also urged the Nation's doctors to support such a program, declaring:

> The values to be realized from an improved level of health for America's older citizens are so great that we are confident that cooperation will be forthcoming from all who in our day are custodians of the almost miraculous capacity to maintain the health and cure the diseases of their fellow human beings.

Mr. President, the resolution of the National Council of Churches dated February 22, 1961, states in the clearest

terms I have seen the need for health care under the social security system. I ask unanimous consent that part of the resolution be printed in the RECORD at this point in my remarks so that a wide audience might have available to it the Council's valuable contribution in this field. Following the printing of the resolution I request unanimous consent that there be printed a list of the member churches of the National Council and the officers of this organization.

There being no objection, the excerpt and list were ordered to be printed in the RECORD, as follows:

We should seek to bring the blessings of modern medical care within reach of all by nongovernmental action to the extent that such methods can accomplish this. But we should not fail to support governmental action in circumstances where other methods are clearly inadequate or impossible.

On the average, American families spend nearly $300 a year for health purposes. Most of this money is spent to secure hospital and physician services, medicines and prosthetic and other appliances after illness has already become serious. Comparatively little of it is spent for the maintenance of optimum health. This contributes substantially to demands on hospital facilities and to a lower level of general health and well-being than could be had by a wiser and more orderly expenditure of the same amount of money for preventive care. The rapidly rising cost of modern medical care puts it beyond the ability of most retired persons and low-income families to purchase such care on an emergency fee-for-service basis.

A very wise variety of nongovernmental efforts have been and are being made to meet this problem of medical economics. They range from indemnity health insurance provided by commercial insurance companies to prepayment, group practice health plans providing comprehensive, including preventive, care for nearly all the health needs of their subscribers through teams of physicians which include specialists and general practitioners.

The voluntary sharing among groups of people of the risks and hazards of illness, and the voluntary pooling of some of their funds to meet the cost of care for any in their group who may need it is indeed a Christian approach to this problem, whether this method is utilized by churches, labor unions, industrial managements, fraternal organizations, cooperatives, community groups, or by subscribers for health insurance. The National Council of Churches commends it and urges its widest possible application.

It is noteworthy, however, that the cost of health care and consequently of health insurance is rising so rapidly as to make it difficult for the average family to afford adequate coverage for its comprehensive health needs. While some 73 percent of the American people have some form of health insurance, nonetheless, only 25 percent of the total private medical expenditures are paid from such insurance.

About 4 million Americans who are today obtaining comprehensive medical care from group practice or other direct service health care prepayment plans pay for it by monthly subscription premiums amounting to less per year than the average $300 per family annual expenditure. It appears that one method of making the best of modern medical care available to more and more people lies in a rapid growth and expansion of voluntary health plans of this character.

There are, however, certain groups in the population for whom even their ordinary medical needs cannot be met by voluntary prepayment plans, namely, low-income families and most people 65 years of age or older. Eighty percent of persons with family income of $5,000 or more have some form of health insurance, but only 33 percent of those with family income under $3,000. Only 35 percent of persons 65 or more years of age have any health insurance.

Voluntary health plans are unable to offer coverage for even a fraction of health care needs at charges either of these groups can possibly afford. Eighty percent of people 65 years of age or older have annual incomes of less than $2,000; about 60 percent incomes less than $1,000. At least 7.6 million older people have liquid assets of less than $500. Yet 77 percent of people 65 years of age and older have chronic ailments, and the percentage increases to 83 percent for those 75 and older. The group 65 and older now require, for less than optimum health care, more than twice as much hospitalization per person as is needed by the rest of the population, and they spend on the average twice as much for health care as does the population as a whole.

Full advantage should be taken of recent amendment to title I of the Social Security Act which offers Federal funds to improve State medical care programs for aged persons on public assistance rolls and also provides matching funds for States desiring to aid medically needy older people not now on relief rolls but able to pass a means test as a condition of eligibility. The program offers the States opportunity to provide help for older persons at the bottom of the economic scale. However, it does not offer aged persons of moderate means and many of low income any solution to their problem.

About three out of every four policyholders in voluntary group prepayment plans are completely excluded from coverage upon retirement, and studies indicate that less than 5 percent can convert to individual policies without reduction in benefits. The voluntary prepayment plans, necessarily based upon experience rating, discriminate against high-risk groups and are not geared to the problems of chronic illness characteristic of old age. Policies commercially written for older people are not only beyond the means of most, but they are not based upon a philosophy of preventive medicine and optimum health, nor do they include provisions for diagnosis, followup, and restorative medicine.

As previous noted, the general board has stated, "If voluntary prepayment plans cannot accomplish the desired ends, government should protect the health of people by making possible the prepayment of health services." This is precisely what the social security system would be able to provide efficiently through the mechanism of old-age, survivors, and disability insurance. Therefore, the National Council of Churches supports in principle legislation which will extend the benefits of old-age, survivors, and disability insurance to include adequate health care for retired, aged persons.

There are human values that are inseparable from the economics of medical care. Two call for special consideration:

1. Quality of care: While high quality medical care has been achieved under a number of different methods of payment, it is unrealistic to think that quality is ever completely separable from the economics of medical care. The National Council urges that in the development of prepayment and insurance plans—under both private and public auspices—careful attention be given to arrangements which give maximum encouragement to the highest quality of care and the enhancement of the best relationship between physician and patient.

2. Individual dignity and freedom: Government participation in any welfare program does not necessarily involve loss of individual freedom or affront to personal dignity. In some circumstances, indeed, individual freedom is enhanced by the utilization of government to achieve a social goal, though it is obvious that such enhancement does not come about automatically. As the instrument of government is employed by a free people, they must be ever vigilant to guard their freedoms. In planning and developing any government insurance program to help older people meet the cost of their medical care, there is a Christian obligation to include provisions for its administration that will adequately safeguard freedom, dignity, and self-respect.

The counsel, cooperation, and active participation of the medical profession and other health workers in both planning and execution of a government health program are essential. The values to be realized from an improved level of health for America's older citizens are so great that we are confident that cooperation will be forthcoming from all who in our day are custodians of the almost miraculous capacity to maintain the health and cure the diseases of their fellow human beings.

In the light of the above concerns the general board authorizes representatives of the National Council to testify at public hearings along the lines herein indicated.

MEMBER CHURCHES OF THE NATIONAL COUNCIL

African Methodist Episcopal Church.
African Methodist Episcopal Zion Church.
American Baptist Convention.
American Evangelical Lutheran Church.
Armenian Church of North America, Diocese.
Augustana Evangelical Lutheran Church.

OFFICERS OF THE NATIONAL COUNCIL OF CHURCHES

President: Rev. Edwin T. Dahlberg (American Baptist Convention).

Vice Presidents at large: Bishop of Elaia Athenagoras (Greek Archdiocese of North and South America; Mrs. Guy A. Benchoff (United Church of Christ, Evangelical & Reformed); Arthur Gardiner Coons (United Presbyterian Church in the United States); Francis S. Harmon (American Baptist Convention) Charles C. Parlin (The Methodist

Church); Bishop B. Julian Smith (Christian Methodist Episcopal Church); Charles P. Taft (Protestant Episcopal Church); Mrs. Theodore O. Wedel (Protestant Episcopal Church).

Vice Presidents for divisions: Bishop Reuben H. Mueller (Evangelical United Brethren), Christian Education; Bishop G. Bromley Oxnam (The Methodist Church), Christian Life & Work; Rev. Virgil A. Sly (Christian Churches), Foreign Missions; Rev. Willard M. Wickizer (Christian Churches), Home Missions; Treasurer, Charles E. Wilson (American Baptist Convention); Associate Treasurer, John H. Platt (United Presbyterian Church in the United States); Recording Secretary, Rev. Norman J. Baugher (Church of of the Brethren); General Secretary, Rev. Roy G. Ross; Associate General Secretaries, R. H. Edwin Espy, James W. Wine.

CONSUMER PROTECTION

Mrs. NEUBERGER. Mr. President, there are signs of awakening in the enforcement of those protections the Federal Government currently provides for the consumer. I speak particularly of the recent announcements by the Department of Justice, the Federal Trade Commission, and the Department of Agriculture.

The Department of Justice has announced that it is looking into the problems of administered prices in the processed meat industry. One of the most important extant consumer protections is the vigorous enforcement of the antitrust laws. I am confident that Judge Loevinger will be energetic in protecting the consumer by careful investigation of price fixing and monopolistic agreements.

The Justice Department has impaneled a grand jury in the southern district of New York to look into this question. While I do not know what evidence the Department will present to the grand jury, it is probably safe to assume that there will be some discussion of the restrictive practices of processed meat suppliers and a delicatessen owners' association. One of such practices is an apparent agreement not to service a new kosher delicatessen that opens within a five-block radius of any delicatessen association member. This type of restrictive practice is certainly not in the best interest of the consumer.

The Federal Trade Commission has recently undertaken an investigation into deceptive and misleading practices in advertising certain brands of aspirin and other proprietary drugs. The FTC complaints are based on the claims of the producers of Anacin, Bufferin, St. Joseph's aspirin, Bayer aspirin and Exedrin. The advertisers of these products represent that they have properties of speed in relieving pain or particular qualities in reducing tension or depression when in fact such is not the case. Any help that the public can receive in making a reasoned choice among these competing products is certainly welcome.

In some remarks I made in the Senate on March 24, I indicated that one of the major problems faced by the consumer was the confusion caused by false and misleading advertising. The Federal Trade Commission has recently published two orders dealing with this problem.

In one case, a retail furniture dealer was quoting a price for wall-to-wall carpeting at "$2.50 per yard, regularly $7.95." In fact, the dealer had no regular retail prices for this carpeting, but would sell the articles for whatever the traffic would bear.

In a second case, manufacturers of sleeping bags ticketed their products with fictitious and misleading prices representing them falsely as the usual retail prices. The manufactures further misrepresented the size of the bags by setting out on attached labels such phrases as "cut size" or "full size." Almost invariably, these sizes were larger than the actual sizes of the finished product. In both of these cases, the FTC has filed cease-and-desist orders.

Secretary of Agriculture Freeman has indicated his concern for the consumer, and that of his Department, by his recent decision to reopen the question of watered hams. Secretary Freeman has directed the Agricultural Research Service to conduct public hearings to gather additional information on the allowable water content in smoked hams and other pork products.

In announcing these hearings, the Secretary specifically stated that he wishes:

> To emphasize that this administration is strongly concerned with the needs and problems of the consumer, and that this Department shall constantly seek to serve the best interest of the public. In doing this, we are serving the best interests of the Nation's farmers.
>
> We shall seek the counsel of the housewife as avidly as we seek the opinion of the food processing industry. The content of the market basket is of vital importance to both, just as it is to the farmer.

Finally, Mr. President, I am delighted to report that 14 Senators have joined with me as cosponsors of Senate Resolution 115, to create a Select Committee of the Senate on Consumers Interests. It is encouraging to see the widespread support this measure has received from my colleagues, and, indeed, from the public.

Mr. President, the Senator from Michigan [Mr. HART], the Senator from Illinois [Mr. DOUGLAS], the Senators from Rhode Island [Mr. PASTORE and Mr. PELL], the Senator from Montana [Mr. METCALF], my colleague from Oregon [Mr. MORSE], the Senator from Missouri [Mr. LONG], the Senator from Ohio [Mr. YOUNG], the Senator from Wisconsin [Mr. PROXMIRE], the Senators from Alaska [Mr. GRUENING and Mr. BARTLETT], the Senator from Wyoming [Mr. MCGEE], the Senator from West Virginia [Mr. RANDOLPH], and the Senator from Kentucky [Mr. COOPER], are the cosponsors of this resolution. I know that they share my interest in the early consideration of this measure.

FEDERAL AID TO EDUCATION

Mr. CURTIS. Mr. President, for the past 90 years a variety of forceful arguments have been employed to stimulate congressional action for underwriting a Federal supplement to the cost of public education. So, we have not given birth to a new concept in recent years.

Let me quote from the speech of an earlier proponent:

> This bill involves a congressional commitment only for a set, limited period. It is entitled a bill for temporary aid. It has no purpose—so far as I know there is no purpose on the part of anyone interested in the enactment of the bill into law that the aid shall be permanent. I myself am one of those who would be very reluctant indeed to see the school system of the United States become permanently dependent upon aid from the General Government.

These were the words of Senator Henry W. Blair, of New Hampshire, spoken in the 1880's during debate on a Federal aid bill. It has a familiar ring, it illustrates the characteristic public concern over Federal invasion of our public school systems. After the War Between the States the standard cliche among Federal aid proponents was the need for education to repair and uplift a nation ravaged by war.

Succeeding excursions into Federal aid proposals were debated in volume and with ardor during some period of each of the past four decades. Each recognized an existing emergency from one cause or another and each proposed, in solemn and unquestioned honor, that any program enacted need only be temporary.

Despite the failure of all the earlier proposals, our ever-expanding and constantly broadening system of public education has flourished—it has grown faster than any other public activity. Note that school expenditures have multiplied 100 times since 1890—enrollment has multiplied $2\frac{7}{10}$ times. No economic formula for relating this growth to a constant dollar can deny a tremendous acceleration over other public programs.

Other nostrums dear to the proponents of Federal aid are the alleged historical bases for proposed action. Favorite among them are citation of the Northwest Ordinance of 1785, the land-grant colleges, vocational training under the Smith-Hughes Act, and the school lunch program.

Despite repeated use of the first example, it does seem historically accurate that grants for schools under the Northwest Ordinance were made to encourage settlers to inhabit the virgin lands west of the Appalachian Mountains. At that time the Federal Government owned no lands and seven States owning the land west of the mountains ceded it to the Government. From it grants were made in a variety of ways, including use for schools, to move people west. If this grant for schools ordained a continuing Federal obligation, is there a like obligation, for example, to grantees who built railroads, opened mining and timber claims, homesteads, et cetera? Compare the grant of vast and almost valueless land with a money grant in a year of Federal deficit today—with a $9 billion annual outlay to service the national debt.

Land-grant colleges were conceived, also, by a solvent Federal Government. They were established to provide training in the agricultural and mechanical

arts at a time when it was felt the emphasis on higher education ran to the liberal arts and to nonagricultural and nonmechanical pursuits.

If anyone doubts that teaching under the Smith-Hughes Act is not standardized and directed from Washington, I invite him to study its operation.

It is my hope to help stimulate, in a few short speeches, a depth of understanding, a degree of soul-searching about the issue of Federal aid to education which rarely attends our deliberations. I submit that this is perhaps the most profound issue upon which any of us will cast a vote in the Congress. It must be given deep and undiluted attention. We must ask ourselves—Is it necessary? Is it prudent? Is there a desirable alternative?

Not one of us wants to deny public education its needs, but is the Federal agency the only agency? Increased support for education from any level of government will ultimately be paid by the same taxpayer. An honest appraisal of this simple fact should avoid our merely being expedient.

Not yet have I heard any proponent of Federal aid say "We need this program so we must abandon or curtail X Federal program and Y Federal program." Never have I heard any proponent suggest that perhaps there is an area of current Federal taxation which might be relinquished to the several States to enhance income for public education. If we enact Federal aid, will we feel ennobled to rush back home and say "Look, we have given you something—more deficit and debt" and forget to add "But you will have to pay for it sometime."

The PRESIDING OFFICER (Mr. HICKEY in the chair). The time of the Senator from Nebraska has expired.

NINETEENTH ANNIVERSARY OF THE FALL OF BATAAN

Mr. RANDOLPH. Mr. President, this coming Sunday, April 9, will be the 19th anniversary of the fall of Bataan. Though one of the darkest moments in American military history, this event cast a glow which illuminated a brilliant chapter in the story of man's quest for liberty.

The Philippine and American soldiers fighting side by side at Bataan and Corregidor gave eloquent testimony of the feelings of mutual trust and respect which have characterized the relations of our two peoples since that time.

This lesson should not be lost to us or to the world today, when so many former colonial countries are undergoing the birthpangs of national independence, for it showed that the old and outmoded relationship of colonial power and subject peoples can be replaced by one of greater equality, mutual understanding, and social justice. It proved also that underlying the diversity of the cultures of East and West, the Philippine and American peoples were united then, and remain united today, in their determination to uphold the ideal of human freedom.

Mr. HARTKE. Mr. President, natives throughout Africa and Asia are aflame with the spirit of nationalism. Once independent nations in Europe groan under the yoke of modern imperialism.

In the midst of this, we in the Capital of this great Nation will be privileged Sunday to dedicate two streets to our concept of self-government and liberty. On Sunday, two streets near the Philippine Chancery will be named, respectively, "Bataan" and "Corregidor." The day has been selected because it is the 19th anniversary of the fall of Bataan.

But these two words symbolize not only the fighting alliance of Filipino and American people both in the darkest hours of 1942 and in today's brighter, if also troubled, times. They symbolize the brotherhood of our two nations which was cemented in the Philippines.

More important, they symbolize that this brotherhood and today's mutual esteem and affection of our two countries follows a period during which the Philippines were an American colony. Independence was granted freely, willingly, without violence and without "strings." Yet, the bonds of esteem, love of justice and freedom bind us together far more strongly than any legal strings might have.

Today the relationship of the Philippines and the United States proves that it is not we who are imperialists. The naming of the streets next Sunday is added demonstration.

THE GREAT GAIN IN PER CAPITA PURCHASING POWER OVER THE PAST 30 YEARS

Mr. SYMINGTON. Mr. President, many statements have been made deploring the passing of the good old days when the dollar was worth 100 cents."

Tears have been shed about how inflation has devastated the "savings of poor widows and orphans."

There have been some painful experiences. But the facts do not bear out all the tragic stories we hear so often.

Let us take a brief look at the extent of inflation in the past 40 years.

For 1920, the consumer price index was 85.7.

Forty years later, in 1960, the same index was 126.5; an average rise in consumer prices of 40.8 points—or one point a year.

It is true that a dollar of income in, say, 1930, would buy more than a dollar will buy today.

But the point so often overlooked is the number of additional dollars the average individual now has.

Today his quantity of dollar income is so much greater that he has far more net purchasing power than before, even though his dollar is worth less.

The statistics on this latter point are interesting. Let us look at the per capita income at various dates in the past and the per capita income in 1960; and then translate those incomes into uniform dollars.

I ask unanimous consent that a table showing per capita disposable personal income or income after taxes for various years—in the current dollar value for each year, and also in 1960 dollars—be printed at this point in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Year	*Current dollars*	*1960 dollars*
1930	604	1131
1935	458	1039
1940	576	1274
1945	1075	1669
1950	1369	1676
1955	1660	1822
1960	1969	1969

Mr. SYMINGTON. The table shows that, on the average, every man, woman and child in the United States had 74 percent more purchasing power in 1960 than the average individual had in 1930.

Although in the last 8 years of the past 30, the rate of increase was but 1½ percent, the average annual per capita purchasing power increase for those 30 years was 2½ percent.

This analysis is based upon statistical data contained in the 1961 Economic Report of the President. That report was released January 18, 1961.

THE WORK OF THE SENATE COMMITTEE ON ARMED SERVICES

Mr. RUSSELL. Mr. President, I have been in public life much too long ever to be surprised by a misquotation in the press. I have also learned from experience over many years that it is impossible ever to catch up with any story after it is printed, and have it corrected. But there is such a terrible distortion in the story dealing with the work of the Senate Committee on Armed Services appearing on page 5 of today's issue of the Washington Post, that I feel I must at least undertake to correct it. I read the following quotation from the article:

> Chairman RICHARD B. RUSSELL, Democrat, of Georgia, predicted yesterday that the Senate Armed Services Committee would overrule President Kennedy and vote extra funds for the B–70 superbomber and the Nike-Zeus antimissile missile.

Further in the article, I read:

> RUSSELL made clear, however, that he and other congressional defense experts would fight to restore funds cut from the B–70 and Nike-Zeus programs by Mr. Kennedy.

Skipping some more, I read:

> RUSSELL forecast that his committee would authorize more spending for these weapons and that the Senate Appropriations Committee would vote to provide the actual money.
>
> He made no prediction of what would happen on the Senate floor or in the House.

Having so completely misquoted me, I do not understand why the writer did not go the whole way and quote me as buttoning it all up as to what would happen in the House and with respect to overriding a Presidential veto.

I made no such statement. On emerging from the committee room I was asked by some representatives of the press as to what was going on in the committee room. I told them we were discussing these programs. In the course of our conversation I said that the controversial items in the President's

message would be the items dealing with the B–70 and the Nike-Zeus programs.

I was asked for my own belief about them. I said I was disposed to support the President on the Nike-Zeus program. That is directly contrary to the statement attributed to me by the newspaperman who wrote the article. I said that I would make some further investigation into the B–70 program.

I made that statement because I have held to the specific policy since my days in the General Assembly of the State of Georgia of never predicting what a committee will do with any item that is under consideration by it.

I wish to have the RECORD show that the statements I have read from the articles published in the newspaper are complete fabrications, and evidently the result of someone's very vivid imagination.

I ask unanimous consent that the entire article be printed at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

UNIT TO VOTE B–70 MONEY, RUSSELL SAYS

(By Hale Montgomery)

Chairman RICHARD B. RUSSELL, Democrat, of Georgia, predicted yesterday that the Senate Armed Services Committee would overrule President Kennedy and vote extra funds for the B–70 superbomber and the Nike-Zeus antimissile missile.

RUSSELL said Mr. Kennedy's proposed cutbacks in the programs would touch off the biggest congressional fight over the Kennedy administration's defense plans. Despite cutting the B–70 and Nike-Zeus, Mr. Kennedy has proposed a $2.3 billion rise in former President Dwight D. Eisenhower's defense spending proposals.

RUSSELL made the statement to reporters as his committee questioned Defense Secretary Robert S. McNamara and Gen. Lyman L. Lemnitzer, Chairman of the Joint Chiefs of Staff.

RUSSELL praised McNamara's review of the proposed defense spending increase for the 12 months starting July 1.

He said the committee had been given a better idea than ever before about the Defense Department's plans for the forseeable future.

He applauded Mr. Kennedy's plans to modernize and strengthen nonnuclear forces so that the Nation will be better prepared to fight any "brushfire" wars.

While expressing a wish for even bigger spending for limited war forces, RUSSELL said he was willing to go along with the President's blueprint.

"They have gone perhaps as far as they can go this year," he said.

RUSSELL made clear, however, that he and other congressional defense experts would fight to restore funds cut from the B–70 and Nike-Zeus programs by Mr. Kennedy.

Mr. Kennedy recommended that work on the 2,000-mile-an-hour bomber be reduced drastically and be carried on primarily as a research project. He proposed that research continue on the Nike-Zeus missile killer—but without the production the Army wants.

McNamara told the committee Tuesday there was doubt whether the Nike-Zeus ever would be deployed.

RUSSELL forecast that his committee would authorize more spending for these weapons and that the Senate Appropriations Committee would vote to provide actual money.

He made no prediction of what would happen on the Senate floor or in the House.

QUESTIONABLE VALUE OF RAILROAD MERGERS

Mr. MANSFIELD. Mr. President, there has long been a trend toward railroad merger and consolidation in the Nation. In recent years it has reached enormous proportions. I wish to register my vehement objection to this trend. It has not resulted in improved service to the public. It has ignored the human element of displaced railroad workers and their families and the thousands of businesses which depend on them. So far as I can see, it has not provided any real solution to the basic financial plight of the railroad companies themselves. It is time for the railroads to think in larger terms rather than in terms of shrinking still further their services to the public, as the Great Northern and the Northern Pacific are attempting to do at the present time between the Twin Cities and the west coast. It is my hope that the Government will help them in this process. It is time to call a halt to the merger and consolidation process and to take a careful look at where it will eventually lead.

At this moment, there is also a proposal to discontinue the passenger traffic service on the Milwaukee line between Minneapolis-St. Paul and the west coast which would work a serious hardship on the traveling public, the railroad workers and their families, and the businesses which depend upon them. This is an example of the kind of shortsighted action which should be halted.

Mr. President, I ask unanimous consent to have printed at this point in the RECORD an extremely well-written article on the subject, which was published in the Wall Street Journal of today, April 6, 1961.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

MERGER BARRIERS: UNIONS, STATES STEP UP EFFORTS TO CURB TREND TO RAIL CONSOLIDATIONS—LABOR BATTLES WITH POSTERS, $2 BILLS; MONTANA ALLOTS FUNDS TO FIGHT A MERGER—PUBLIC'S STAKE IS SIZABLE

(By James R. Macdonald)

In Missoula, Mont., site of a car repair shop and freightyard for the Northern Pacific Railroad, now involved in merger talks with three other lines, this message is posted on telephone poles and on walls of buildings around the town:

"If only 100 railroad employees lose their jobs or move away after the merger, Missoula will lose $70,000 in annual grocery sales, 112 households, 107 passenger cars, and $30,000 in food-drink business."

The signs in Missoula are signs of the times in the railroad industry. As a mounting number of railroads chug along toward merger opposition is increasing on a number of fronts. Most vociferous of the merger foes are the Nation's 23 railroad unions, which, collectively, have adopted a policy of opposition to all mergers. The unions fear mergers will result in large layoffs.

By no means are the unions the only obstacles along the track toward consolidation, however. More and more Congressmen and State officials have announced they will intervene before the Interstate Commerce Commission, which must approve railroad mergers, to try to block such moves. The Justice Department has disclosed it is looking more closely at rail mergers with antitrust action in mind. Even railroads are stepping in to fight the mergers of other railroads, fearing the sharper competition sure to stem from combined operations.

DELAYS PROBABLE

All this is somewhat frustrating for many of the Nation's rail executives, who look on mergers as the best cure for the industry's ills. These officials believe that if the mergers now in the works or being negotiated are not derailed by the forces fighting them, the consolidations will at least be delayed, postponing the savings the carriers might make through elimination of duplicate facilities. Delayed in turn, of course, would be any beneficial effects of these savings on the railroad's earnings. Class I railroads—those with annual revenues of more than $3 million—had total earnings of $445 million last year, down 23 percent from 1959, and the lowest for any year since 1949.

No small number of carriers stand to lose. The ICC has before it applications from 14 railroads to form half as many larger systems. Better than a dozen more of the Nation's 106 class I railroads are now in various stages of negotiating consolidations and almost every road of any size at all is toying with the notion.

The public is bound to be affected by mergers or, for that matter, by the failure of mergers to come off. Through mergers, the railroads contend they would be able to operate more efficiently, providing better service and possibly even offering lower freight rates. Prices consumers pay for everything from apples to autos reflect these shipping fees. The merger movement also is important to truckers and bargeline operators. A more efficient rail system naturally would mean stiffer competition for them.

Union resistance to mergers probably is nowhere better illustrated than between St. Paul and the Pacific Northwest, where the Northern Pacific, along with the Chicago, Burlington & Quincy Railroad and the Great Northern Railway, plan to merge, giving the region a giant rail system. Under the merger proposal, the combined company also would operate under a lease arrangement, the Spokane, Portland & Seattle Railway, which is wholly owned by the Great Northern and Northern Pacific.

MOST TRACKAGE

If approved, this consolidation would create the biggest single U.S. railroad in terms of miles of track. The combined roads would use what is now Great Northern's transcontinental main line, which goes through North Dakota, Montana, and Washington. Most of Northern Pacific's present main line, which parallels Great Northern but some 100 to 300 miles to the south, would be used for intermediate and local freight service.

All along the Great Northern and Northern Pacific routes, unionmen are attaching stickers on automobiles. The stickers have even shown up on cars belonging to rail executives, much to these officials' annoyance. Most of the union effort is concentrated in Missoula and other towns along the Northern Pacific route since it is this route that is scheduled to lose its main-line status. Since the middle of February, when the roads officially petitioned the ICC for permission to merge, the unions have flooded these towns with circulars and pamphlets detailing how the unions believe each town will suffer from the merger.

In Billings, Mont., many railroad employees are paying their bills with silver dollars on which are affixed stickers conveying this warning: "This is a railroad dollar. After the merger it will disappear."

Prodded by reports that following merger the railroads would furlough workers in Jamestown, N. Dak., the unions devised a plan to impress residents there with the importance of the railworkers' payroll. The unions arranged with local bankers to have all union workers paid in $2 bills, a denomination rarely seen in that part of the country. Thus, the bills served as a reminder to Jamestown merchants where the money originated.

In all towns along the Northern Pacific's track, the union stamps this message on each bill it pays: "Railroad-earned union dollars paid this bill."

The railroads contend the unions are distorting the facts. Declares Northern Pacific's president, Robert S. Macfarlane: "Most of this union propaganda is pure nonsense. In the first place, we never have said that certain employees stationed along the track will definitely be laid off after the merger. There will be some reduction in the work force, of course. But it will be gradual, over a 5-year period following the effective date of the merger. In the second place, we have offered, even begged, the union to come and negotiate the work force problem with us. They flatly refuse to even talk to us."

Adds Great Northern President John Budd: "The unions claim they're worried about employment. Don't they realize we're concerned, too? Sure, railroad employment has declined in recent years. But you'd think the brotherhoods would realize that what we're trying to do is build a stronger railroad through mergers that will allow us to better compete with truckers and provide a more stable employment picture. I just can't understand why they are fighting us."

Mr. Budd and Mr. Macfarlane also say that most union workers who would be laid off after merger are guaranteed up to 5 years of severance pay both by Federal law and by contract agreement between the carriers and the unions.

LETTER FROM KENNEDY

Some union leaders believe they may be making progress in fighting rail mergers on another front, the Federal Government. Some months ago, Kenneth Tuggle, chief of the ICC's finance division, which processes merger petitions, declared that Federal agency was "ready, willing, able—and I might add anxious" to give sympathetic consideration to well-conceived mergers. But now the political climate has shifted, rail union leaders insist. They point to a recent letter from President Kennedy in which the Chief Executive agreed the problem of rail mergers is "a serious one and warrants investigation and consideration of possible corrective measures."

How have the railroads reacted to the President's words? The head of one Western carrier puts it this way: "I wouldn't say the Kennedy Administration will be openly hostile to railroad mergers, but I'd sleep a lot easier if the Republicans were in."

Merger-minded railroads also can count on opposition from Congressmen, Governors and State legislatures from areas they serve.

In Washington State, the Governor, both houses of the State legislature, and the Washington State Public Utilities Commission have all declared their opposition to the Northern Pacific-Great Northern-Burlington merger. In Montana, the public service commission has declared it is against the consolidation and the State legislature has authorized the commission to spend as much as $7,500 to present its arguments against the merger to the ICC.

The Governor of Minnesota has directed the State's railroad and warehouse commission to intervene at ICC hearings to protect the interests of the State. The commission elected to intervene in opposition to the merger. The mayor of St. Paul, where both Northern Pacific and Great Northern are based, has announced his opposition, too.

TOWNS OPPOSE MERGER

J. S. Turrell, general chairman of the Order of Railway Conductors and Brakemen on the Northern Pacific, brandishes a yard-long list of towns along the carrier's track that have lined up to oppose the merger. The railroads say they have been trying to get their side of the story across. "But," concedes one Northern Pacific official, "from the looks of things we haven't been trying very hard."

In the East, an official of the Seaboard Air Line Railroad reports that carrier is "having some difficulty convincing towns along the track that the merger (with the Atlantic Coast Line Railroad) is really in their best interests."

The Maryland Port Authority has elected to intervene in the proposed merger of Chesapeake & Ohio Railroad with Baltimore & Ohio Railroad. The authority says it won't decide whether to oppose the consolidation until a thorough study of the effects of consolidation on freight moving through the port of Baltimore has been completed.

Perhaps of even greater significance is the stand being taken by key congressional leaders. Senate Majority Leader MIKE MANSFIELD, Democrat of Montana, has said he is opposed to the proposed merger in the Northwest, and lining up with him are Senators WARREN G. MAGNUSON, chairman of the Senate Committee on Interstate and Foreign Commerce, and HENRY JACKSON, former Democratic national chairman. Both Senator MAGNUSON and Senator JACKSON are from Washington State. Another merger foe is Minnesota Senator HUBERT HUMPHREY, the Senate majority whip.

In the face of all this opposition, the railroads currently are stepping up their "public information" campaign aimed at "getting the facts straight."

OPPOSITION FROM RAILROADS

In some cases, however, the railroads are getting in their own way. Almost every carrier petitioning the ICC for permission to merge will bump into some competing line's efforts to block it. These conflicting railroad claims are certain to drag out ICC hearings and add to the delays already expected due to other opposition and due also to the sheer volume of merger proposals before the commission.

A prominent example of conflict within the industry centers around the fight for control of the Western Pacific Railroad, a small line that operates between San Francisco and Salt Lake City. The two main contestants are the Southern Pacific Co. and the Atchison, Topeka and Santa Fe Railway Co. However, the fight now involves a total of eight carriers. Great Northern and Western Pacific itself have sided with Santa Fe, while Union Pacific Railroad and the Chicago, Rock Island and Pacific Railroad have come to the support of Southern Pacific.

"These control and merger battles do the cause of mergers no good at all," says the president of one line. "Not only will the ICC get all bogged down, but the fights may cause the Commission to think twice before approving any consolidation."

One of the prime incentives for rail mergers may be yanked from under the carriers when the U.S. Supreme Court rules any day now on a union suit to force one recently merged line—the Erie-Lackawanna Railroad—to freeze all of the jobs existing before the consolidation. If the Court should decide for the union, it would in effect be going far beyond past interpretation of the present laws and agreements.

The Washington Job Protection Agreement of 1936 between the railroads and the unions provides that employees furloughed because of a merger are eligible for up to 5 years of severance pay. The Federal Transportation Act of 1940 requires that for a period of 4 years after a merger no employee can be placed in a worsened financial condition.

Thus, until now, a carrier has been required after a merger to keep employees on the payroll at the same wage scale or give him up to 5 years of severance pay if it can't find the employee another job. But it hasn't been required to insure the continuation of the job itself.

A common practice has been for a merged road to keep on most of its employees, but to reduce its work force gradually to the desired level simply by not replacing many of those workers who retire or go on to other jobs. This reduction in the number of employees results in a significant part of the savings that are usually expected from a merger and if roads were prevented from cutting their work forces there probably wouldn't be such a rush to merge.

"I can tell you right now," says one rail executive, "that if the Supreme Court decision goes against the carriers, it will kill the whole merger movement in an instant."

VICE PRESIDENT JOHNSON ACCLAIMED ON VISIT TO SENEGAL

Mr. HUMPHREY. Mr. President, on April 3, the small country of Senegal celebrated its first year of independence. No more illustrious or capable person could have been chosen by President Kennedy to represent the United States at the 2-day ceremony than Vice President LYNDON B. JOHNSON. This statement is more than justified in light of the enthusiastic welcome given to the Vice President by the Senegalese people. However, such acclaim is not surprising, for we all know of the unqualified diplomatic abilities of the Vice President.

I wish to commend Vice President JOHNSON for a job well done—we are all proud of him.

Mr. President, I ask unanimous consent that the following articles on the Vice President's visit to Senegal be printed at this point in the RECORD: "Senegalese Cheer JOHNSON," Christian Science Monitor, April 4, 1961; "Senegalese Acclaim JOHNSON as Soviet's Malik Cools His Heels," Washington Post, April 4, 1961; and "JOHNSON To Help Senegal Celebrate and Stop at Geneva, Paris, Madrid," Washington Post, April 5, 1961.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, Apr. 4, 1961]

SENEGALESE CHEER JOHNSON

DAKAR, SENEGAL.—U.S. Vice President LYNDON B. JOHNSON conferred at length Monday night with Soviet Deputy Foreign Minister Jacob Malik.

The two men, who talk with the help of interpreters and aides, refused later to say anything about what had been discussed. They talked at a reception given by Premier Mamadou Dia at the Justice Ministry.

Mr. JOHNSON and Mr. Malik are in Dakar as official representatives to Senegal's first independence day anniversary.

It was not known which of the two had asked for the talk or if it was an impromptu conference arising out of a casual meeting at the party.

PRAISE FOR DE GAULLE

Senegalese President Senghor praised French President de Gaulle Tuesday and warned the new nations of Africa not to fall into the error of attacking their former rulers.

"Remember that the colonizers of yesterday are the friends of tomorrow," Mr. Senghor told a vast crowd and nearly 100 foreign delegations assembled for the first anniversary of the west African nation's independence from France.

Mr. Senghor saluted General de Gaulle as a statesman who foresaw the end of colonialism and eased the road of independence for much of Africa. He said Senegal's relations with her former rulers were based on friendship which would help the future consolidation of peace.

"We hope that the process of decolonization will finally bring a settlement of the Algerian question, a problem so painful to our African hearts," he added.

COLD WAR CONDEMNED

The President also condemned the cold war and the "campaign of vituperation which has been unleashed between East and West."

"We refuse to take any part in this campaign," he declared.

As Senegalese troops marched past the reviewing stand looking out over Dakar harbor, planes and helicopters of the Senegalese Air Force passed overhead.

Mr. JOHNSON continued to make a big hit with the crowd, drawing loud cheers when he drove up to the reviewing stand. He was almost mobbed Monday by thousands shouting "long live the United States, champion of independence" as they broke through police lines to surround his car.

CROWD SWARMS OVER AUTO

Mr. JOHNSON presented President Senghor, President Kennedy's personal gift, a crystal cup engraved with the arms of the United States and a token dedication by Mr. Kennedy. Mr. Johnson received from Mr. Senghor the token gifts bestowed upon all official delegates.

As Mr. JOHNSON was leaving the presidential palace after a reception Monday a crowd of several thousand broke through police lines and swarmed over his car.

Mr. JOHNSON, who was riding with Ambassador Henry Villard and New Hampshire businessman Romeo Champagne, rolled down the car window and shook hands with those who managed to squeeze close enough to reach his outstretched arm.

"The enthusiasm was genuine and real and I witnessed how happy they were to see a representative of the United States among them," Mr. JOHNSON said later.

VISIT TO VILLAGE

Mr. JOHNSON and the Aga Khan Monday afternoon attended a handicraft exhibit in a village 3 miles outside Dakar. Mr. JOHNSON was given a rousing welcome by an impromptu string quartet and cheering women.

Mrs. Johnson, who accompanied her husband on the trip to the village, was greeted by one of the local dignitaries, Chief Camara Amadou, who insisted on sheltering her and her husband under his multicolored umbrella.

Unfortunately, the umbrella snapped shut on Mrs. Johnson's head. She laughed while they worked to open it again.

The Vice President turned to a small child and handed him a ballpoint pen saying, "Son, you write me when you are a big man."

Upon his return to Dakar, Mr. JOHNSON was host at a reception for the American colony at Ambassador Villard's villa overlooking the Atlantic, then was guest at a state reception.

[From the Washington Post, April 4, 1961]

SENEGALESE ACCLAIM JOHNSON AS SOVIET'S MALIK COOLS HIS HEELS

(By Andrew Nash)

DAKAR, SENEGAL, April 3.—Senegalese celebrating their first year of independence gave U.S. Vice President LYNDON B. JOHNSON a roaring welcome today but chilly treatment to Soviet Deputy Foreign Minister Jacob A. Malik.

JOHNSON also got a warm reception from President Leopold Senghor at the presidential palace while Malik cooled his heels outside with scores of others. JOHNSON and Malik are representing their countries at 2 days of independence celebrations in this West African nation, formerly French.

Malik finally was received by the President near the end of the long list of delegates.

As JOHNSON emerged, many broke out of the crowd of thousands through police lines and swarmed over his car, shouting: "Long live the United States, champion of independence."

JOHNSON rolled down a window and shook hands with all who could get close enough to grasp his hand.

"The enthusiasm was real and I witnessed how happy they were to see a representative of the United States among them," he said later.

At a later ceremony, in a small nearby village, an umbrella snapped shut on Mrs. Johnson's head, but she emerged laughing.

With hundreds of guests jammed into the French-built palace, Senghor distributed decorations to both Europeans and Africans who had steered his West African country through its first year of independence.

Along the streets a strong breeze whipped the flags of 82 nations recognizing Senegal's independence. The presidential palace was guarded by towering Senegalese "red guards," the tough soldiers with red fezzes who once were among the most respected of French colonial troops.

The guests included heads of eight other former French African possessions which have won their independence in the past year and a half.

[From the Washington Post, Apr. 5, 1961]

JOHNSON TO HELP SENEGAL CELEBRATE AND STOP AT GENEVA, PARIS, MADRID

Vice President LYNDON B. JOHNSON left yesterday on his first oversea mission for President Kennedy. The weeklong trip will take him to Africa, Geneva, Paris, and Spain.

Addition of the European stops was announced only a few hours before JOHNSON and his wife started their journey. Their Air Force jetplane took off from nearby Andrews Air Force Base at 1:50 p.m.

Among those aboard the plane with the Vice President were Senator THOMAS KUCHEL, Republican, of California and Representative JOHN ROONEY, Democrat, of New York, and their wives.

JOHNSON told reporters just before entering the plane that he was taking the two Congress Members along at the suggestion of the President because of their broad knowledge of and interest in international affairs.

JOHNSON's first assignment is to represent the United States Monday at the independence celebration of Senegal, a former French colony on Africa's Atlantic coast.

TO MEET WITH DEAN

This was the official purpose of the trip, but an aid said that Mr. Kennedy also has requested JOHNSON to go to Geneva to meet with Arthur Dean, the U.S. representative at nuclear test ban negotiations now underway there.

The President also has asked JOHNSON to go to Paris to confer with the new U.S. Ambassador to France, Gen. James M. Gavin, and with Gen. Lauris Norstad, commander of the North Atlantic Treaty forces.

In addition, George Reedy, JOHNSON's press secretary said, Secretary of Defense Robert S. McNamara has requested the Vice President to inspect defense installations in Spain.

JOHNSON will undertake all these assignments after attending the independence ceremonies in Senegal Monday. The details of the schedule have not been completed, but Reedy said he assumed JOHNSON would go to Geneva from Africa and then to Paris and then to Spain.

Reedy said that JOHNSON expects to return here by the end of this week.

STOP IN PUERTO RICO

JOHNSON will make an overnight stop in Puerto Rico tonight on his way to Africa.

Veteran politicians were keeping a sharp eye out for any repercussions on the American political scene from JOHNSON's oversea tour.

The Texan's predecessor as Vice President, Richard M. Nixon, captured headlines with his foreign jaunts for President Eisenhower. Among highlights were Nixon's "kitchen debate" with Soviet Premier Nikita S. Khrushchev in Moscow and his stoning at the hands of a mob in South America.

During last year's election campaign, Nixon cited his oversea experience as one reason why the voters should send him to the White House.

JOHNSON, 53, a Democratic presidential aspirant himself until Mr. Kennedy won the nomination, was expected to get further oversea assignments from Mr. Kennedy later.

Last November, as Vice President-elect, JOHNSON attended a NATO parliamentarians' meeting in Paris, and also conferred in London with Prime Minister Harold Macmillan. The present oversea trip is his first as an official representative of the U.S. Government.

Mr. HUMPHREY. Mr. President, the people of this new republic cheered not only the Vice President but also cheered the United States of America. They cheered and acclaimed the fact that the United States was the protector of independence and freedom. Surely it should have been good news to the American people to learn of such a heart warming response to the visit by our Vice President and of such great appreciation for the part played by the Government of the United States and its people to insure independence and freedom for all nations, not merely the fine nation of Senegal but all nations everywhere in the world.

YUL BRYNNER, SPECIAL CONSULTANT OF UNITED NATIONS TO HIGH COMMISSIONER FOR REFUGEES

Mr. MORSE. Mr. President, I call the Senate's attention to the activities of one of Hollywood's most famous film stars, one who has most notably served the United Nations as Special Consultant to the High Commissioner for Refugees.

I speak of Yul Brynner, who for the past 2 years has visited many of the refugee camps in Europe and the Middle East. He did this unselfishly to see what

he could do to help alleviate a crucial situation abroad for millions of stateless and homeless men, women, and children.

He has done much. He wrote a book, based on these trips, entitled "Bring Forth the Children," which is dramatically illustrated with photographs taken by Mr. Brynner and Inge Morath. Proceeds from the sale of the book have been donated to the Refugee Fund.

The new High Commissioner for Refugees in the United Nations, Mr. Felix Schnyder, has written Mr. Brynner praising him for his film entitled "Rescue," which appeared earlier this year on a national network. The letter said in part:

> This film does certainly help to make the public opinion aware of the tragic refugees' problems and the necessity to meet them with concerted efforts. In a particularly fortunate way it shows the misery of millions of refugees of our time and strikes at the same time a strong and encouraging note of hope.

At the request of Mr. Schnyder, Mr. Brynner has generously agreed to continue his work as special consultant and has also been appointed to a similar post with the U.S. Department of State in relation to refugee affairs.

Mr. Brynner's work is but another example of a side of the Hollywood motion picture industry which does not receive the attention it so richly deserves. I can think of no other industry that has so generously given its time and its talent to so many humanitarian causes.

PROPOSED AMENDMENT OF MINIMUM WAGE LAW—STATEMENT BY SENATOR ROBERTSON

Mr. STENNIS. Mr. President, announcement has already been made on the floor that next week a major bill will come before the Senate, doubtless for extensive debate. The bill is S. 895, to amend the minimum wage law.

The distinguished Senator from Virginia [Mr. ROBERTSON], who is an able constitutional lawyer, has prepared a speech on the bill and had intended to deliver it on the floor of the Senate today. However, due to an illness, which is not serious, and from which the Senator from Virginia has improved already, although he will not be able to come to the floor for a few days, he is unable to be present today and has asked me to place his speech in the body of the RECORD. I have read the speech, with its clear logic and its forceful, sound reasons, and I commend its reading to every Member of the Senate. The Senator from Virginia is an outstanding authority on the Constitution of the United States and makes a very strong argument on the constitutional aspect of the bill. He is also well versed on the practical economics of our Nation and has discussed that aspect of this major bill. The Members of Congress, and the people of the Nation will find this speech illuminating and helpful.

Mr. President, I ask unanimous consent that the statement prepared by the Senator from Virginia [Mr. ROBERTSON] be printed at this point in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT BY SENATOR ROBERTSON

During the period in which I have had the great honor of serving Virginia in this distinguished body, two fields of interest—by their very importance—have demanded and received a major share of my attention. These areas are constitutional government and fiscal integrity. Both will be seriously damaged if S. 895 becomes law.

CONSTITUTIONAL ASPECTS

A Virginian naturally has a strong interest in constitutional government and its corollary in America, the principle of a central government's having limited powers. Our forefathers played an active part in developing these principles. Patrick Henry and Thomas Jefferson, who championed the cause of freedom from a tyrannous king, made every effort to insure that this freedom would not fall into the hands of another autocratic authority. George Washington refused the suggestion that he become king in a limited monarchy because he understood the full consequences of such a step. James Madison, one of our Constitution's leading architects, advocated limited powers for a central government because he knew that no man or group of men should be given absolute authority in governing other men. Lord Acton has well said: "Power tends to corrrupt; absolute power corrupts absolutely."

Recalling the wisdom of our forefathers and the experience of history, I am appalled to see slipping from us the liberties for the preservation of which our Founding Fathers pledged their lives, their fortunes, and their sacred honors. Perhaps the cause of our carelessness is the fact that we were born citizens of a constitutional government and—like the son who squanders what his father's labor has earned—have failed to give restraints placed upon Federal power by the Constitution the attention and respect which that foundation of our personal freedom so richly merits.

Mindful of the dangers of an all-powerful central government, the Virginia Convention that ratified the Philadelphia Constitution insisted upon clarifying amendments to protect more fully the rights of individuals and of the sovereign States that were to form a more perfect union. Twelve of those amendments were offered in the First Congress by James Madison, 10 of which were ratified. Lest we forget the emphasis placed by the Founding Fathers upon the creation of a Federal union of delegated powers, let me quote the 10th amendment:

"The powers not delegated to the United States by the Constitution, nor prohibited by it to the States, are reserved to the States respectively, or to the people."

The framers of the Constitution and of the first 10 amendments thereto had just come to grips with one form of tyranny, and they were not eager to supplant it with another. Why should we not heed the advice of those to whom experience itself had issued a clear warning?

Under the Constitution, the Federal Government is given the right to control interstate commerce. If that interstate commerce clause is expanded by the Congress to include intrastate commerce, the 10th amendment is violated, and all commerce becomes a pawn on the Federal chess board.

Last year the Senate considered and passed H.R. 12677, "An act to amend the Fair Labor Standards Act of 1938, as amended, to provide coverage for employees of large enterprises engaged in retail trade or service and of other employers engaged in activities affecting commerce, to increase the minimum wage under the act to $1.25 an hour, and for other purposes."

Fortunately, this bill never became law. One of the most objectionable features of the bill dealt with the expansion of coverage to include certain enterprises whose activities affected commerce that is, interstate commerce. According to section 3(s) of the bill an "activity affecting commerce" was to include "any activity, business, or industry in commerce or necessary to commerce, or to the production of goods for, or the distribution of goods in commerce."

It takes no Blackstone to see that since enterprises engaged in intrastate commerce affect, even though in a minute degree, interstate commerce, the Fair Labor Standards Act would soon envelop enterprises now considered to be performing a basically intrastate business. The foundations would have been laid for bringing virtually all business under the jurisdiction of the Federal Government.

Nor has this objection been met by S. 895, which is at present before this body.

Admittedly we see no language which would specifically include under the bill's coverage certain enterprises whose activities affect interstate commerce. Nevertheless, S. 895 would do by indirection what last year's bill would have done by direction. In other words, the intention to bring eventually all business activities under this act is the same as when actually spelled out in the bill last year.

I would like to refer to section 2(s) which reads in part:

" 'Enterprise engaged in commerce or in the production of goods for commerce' means any of the following in the activities of which one or more employees are so engaged, including employees handling, selling, or otherwise working on goods that have been moved in or produced for commerce by any person:"

A comprehensive list follows, indicating the types of establishments to which this vastly expanded coverage will apply.

"Person," according to the present act, means "an individual, partnership, association, corporation, business trust, legal representative, or any organized group of persons."

I submit that section 2(s) not only brings certain presently exempted categories under the Fair Labor Standards Act but also—and much worse from a constitutional point of view—broadens the definition of what is to be considered interstate commerce.

As I read the suggested definition, if one employee of certain enterprises handles, sells, or works on goods which have been moved in or produced for commerce by another enterprise, the former enterprise is covered by the Fair Labor Standards Act no less than the latter. This, to me, results in a very substantial, and I might add, unconstitutional extension of coverage. At present the applicability of the act depends primarily upon whether an enterprise is in interstate commerce, such as a railroad, or producing goods for interstate commerce, such as a large-scale manufacturer. If these qualifications are to be extended to include certain enterprises in which some employees merely handle, sell, or work on goods moved in or produced for interstate commerce by someone else, there will be few enterprises indeed that will not be covered. How many enterprises with an annual gross volume of sales above $250,000 do not have some employees who either handle, sell, or work on goods which have come from out of State? Very few.

Let us suppose that a Virginia consumer buys a pair of shoes from a Lexington, Va., retailer whose annual gross volume of sales exceeds $1 million. Let us further assume that this retailer has purchased his supply

of shoes from a wholesaler in Richmond, Va., who, in turn, has bought them from out of State.

Under the interstate commerce clause the wholesaler is within the jurisdiction of the Federal Government. He is directly in the stream of interstate commerce.

But let us look at the retailer. What of him? Under present law he is already potentially subject to the provisions of the National Labor Relations Act, the Taft-Hartley Act, and the Labor-Management Reporting and Disclosure Act, for his activities affect interstate commerce. The Supreme Court, I might add, has been very liberal in its interpretation of affecting interstate commerce.

Fortunately for this retailer, however, he, thus far, has not been subjected to the coverage of the Fair Labor Standards Act. Not only is he specifically exempted from the provisions of the act, but also he is neither "engaged in [interstate] commerce" nor—if his sales are local—is he "in the production of goods for [interstate] commerce."

If, however, S. 895 becomes law, the retailer will lose his freedom on both counts: He will be denied the exemption, and he will, furthermore, be swallowed by the act's broadening of the definition of an "enterprise engaged in commerce or in the production of goods for commerce" to include, among others, enterprises whose employees handle goods which have been produced by someone else for interstate commerce. Coverage would be extended to the Virginia retailer even though he had purchased his goods from a Virginia wholesaler and later sold every shoe for local consumption.

And what of the consumer? Why, perhaps eventually he, too, can look forward to the dubious privilege of having the Federal Government determine when, where, and how much he walks. After all, when he wears out shoes, he must buy more, and does this not affect commerce?

In all seriousness, although this last extension of my analogy may seem facetious, I submit that it is no more extreme than the Supreme Court's present interpretation of the interstate commerce clause would have been considered 30 years ago.

In *Kidd* v. *Pearson* (128 U.S. 1), the Court has this to say:

"If it be held that the term [commerce with foreign nations and among the several States] includes the regulation of all such manufactures as are intended to be the subject of commercial transactions in the future, it is impossible to deny that it would also include all productive industries that contemplate the same thing. The result would be that Congress would be invested, to the exclusion of the States, with the power to regulate, not only manufactures, but also agriculture, horticulture, stock raising, domestic fisheries, mining—in short, every branch of human industry."

The early, and I think correct, state of the law insofar as it related to the Interstate Commerce clause found full approval in *U.S.* v. *E. C. Knight Co.* (156 U.S. 1); *Schechter Poultry Corp.* v. *U.S.* (295 U.S. 495); and *Carter* v. *Carter Coal Co.* (298 U.S. 238).

In the Knight case, Chief Justice Fuller, with remarkable foresight, had this to say in delivering the Court's opinion:

"Doubtless the power to control the manufacture of a given thing involves in a certain sense the control of its disposition, but this is a secondary and not the primary sense; and although the exercise of that power may result in bringing the operation of commerce into play, it does not control it, and affects it only incidentally and indirectly. Commerce succeeds to manufacture, and is not a part of it * * *. It is vital that the independence of the commercial power and of the police power, and the delimitation between them, however sometimes perplexing, should always be recognized and observed, for while the one furnishes the strongest bond of union, the other is essential to the preservation of the autonomy of the States as required by our dual form of government; and acknowledged evils, however grave and urgent they may appear to be had better be borne, than the risk be run, in the effort to suppress them, of more serious consequences by resort to expedients of even doubtful constitutionality."

Unfortunately, however, this balanced approach to interstate commerce has in recent years lost favor with the courts. In writing the dissenting opinion of the Supreme Court in the *National Labor Relations Board* v. *Jones and Laughlin Steel Corporation* (301 U.S. 1), Mr. Justice M. Reynolds had the following to say regarding the majority's decision to expand the coverage of the interstate commerce clause beyond its previously accepted bounds:

"Manifestly that view of congressional power would extend it (that is, Federal control) into almost every field of human industry.

* * * * *

"The Constitution still recognizes the existence of States with indestructible powers; the 10th amendment was supposed to put them beyond controversy.

"We are told that Congress may protect the 'stream of commerce' and that one who buys raw material without the State, manufactures it therein, and ships the output to another State is in that stream. Therefore it is said he may be prevented from doing anything which may interfere with its flow.

"This, too, goes beyond the constitutional limitations heretofore enforced. If a man raises cattle and regularly delivers them to a carrier for interstate shipment, may Congress prescribe the conditions under which he may employ or discharge helpers on the ranch? The products of a mine pass daily into interstate commerce; many things are brought to it from other States. Are the owners and the miners within the power of Congress in respect of the miners' tenure and discharge? May a mill owner be prohibited from closing his factory or discontinuing his business because so to do would stop the flow of products to and from his plant in interstate commerce? May employees in a factory be restrained from quitting work in a body because this will close the factory and thereby stop the flow of commerce? May arson of a factory be made a Federal offense whenever this would interfere with such flow? If the business cannot continue with the existing wage scale, may Congress command a reduction? If the ruling of the court just announced is adhered to, these questions suggest some of the problems certain to arise."

Events have proved Justice McReynolds a prophet. Many of the extensions of the Federal arm which this Justice feared have now come to pass. For example, in the passage which I just quoted he asks the rhetorical question, "If the business cannot continue with the existing wage scale, may Congress command a reduction?"

In but a year Congress commanded a rise in the existing wage scale by passing the original Fair Labor Standards Act. We are now asked to imperil the very identity of the States by widening the base and extending the coverage of this act. Are "interstate" and "intrastate" to become synonymous?

The great Chief Justice John Marshall in delivering a judgment of the court in *McCulloch* v. *Maryland* (4 Wheat. 316), had this to say, "No political dreamer was ever wild enough to think of breaking down the lines which separate the States and of compounding the American people into one common mass." Unfortunately for our Nation there are those who would do just that.

I urgently implore the Senate to refrain from further impairing the balance of power between the States and the Federal Government. This distressing trend toward centralization will eventually lead to the individual's total loss of liberty.

ECONOMIC ASPECTS

Nor is the constitutionality of this proposed legislation my only objection to it. The bill may well have serious shortcomings on economic grounds. It raises some basic questions that need to be answered before the Congress acts.

S. 895, in my opinion, represents another unwarranted extension of Federal control into the domain of private enterprise. By extending coverage beyond the present 23.9 million workers to an additional 4,333,000 employees, the proposed minimum wage legislation would be one step farther toward dictating a minimum hourly wage for all workers. And then what? Will this precedent lead toward a Federal guarantee of a minimum yearly wage? In the labor group, there are those who have advocated such a plan. From there, will we move toward Federal guarantees of minimum output, prices, and profits for each industry?

The Fair Labor Standards Act of 1938, as amended, provides that congressional policy toward minimum wages shall be effected "without substantially curtailing employment * * *." In my opinion, the proponents of S. 895 have still to prove that employment will not be curtailed at a time when unemployment is at the highest level in two decades.

If the Congress, by enacting minimum wage legislation, could automatically guarantee higher employment and higher wages without inflating production costs and prices, we may well ask the proponents of S. 895 why they failed to provide for an even higher minimum wage and a much shorter standard workweek. If the Congress could legislate higher employment, wages, and output without higher prices perhaps the advocates of this bill might want to reconsider their proposals. They might even want to double the minimum wage and cut the 40-hour week to 30 hours in order to assure a better world for all.

The absurdity of this proposition seems obvious. There is no legislative fiat that can automatically produce prosperity. Nor can the Congress guarantee that any particular action—such as raising the minimum wage—will prove to be beneficial to the general economy. Let us analyze what this bill proposes and see what the consequences may be if it were enacted.

By raising minimum wages and expanding coverage, S. 895 would eventually bring about an increase of at least $1.7 billion in the annual wage bill for an estimated 4,686,000 workers. The number of workers whose incomes would be directly increased over a period of several years would be more than twice the number affected by the latest change in minimum wages to $1 an hour from 75 cents, effective March 1956. The increase in the amount of wages paid to these workers would be more than three times larger than before.

The Department of Labor has estimated that, if S. 895 were enacted, it would result in raising the minimum hourly wages of a total of 3,021,000 nonsupervisory workers in private industry who earn less than $1.25 an hour and who are now covered by minimum wage legislation. Over a 2-year period, their wage bill would rise by a total of $836 million.

Of the 4,333,000 workers for whom minimum wage coverage would be newly provided by the bill, 1,665,000, or more than

half, now receive less than $1.25 hourly. After 3 years, it is estimated that these workers, if still employed, would receive annually $860 million more than they are now being paid.

S. 895, when fully operative, would thus directly bring about an increase in the wage bill of an estimated 4.7 million workers. This number would be far greater than the 2 million workers whose wages were directly affected when previous legislation became effective in 1956, and the 1.3 million workers so affected in 1950.

The impact of the proposed legislation would be greatest upon retail trade. About two-thirds of the 4,333,000 workers who would be brought under the coverage of the Fair Labor Standards Act for the first time are employed in retail trade enterprises. Of these newly covered workers in retail trade, an estimated 1,347,000, or nearly one-half, now earn less than $1.25 an hour. To increase their wages to the proposed minimum would require their employers to increase their wage costs by 7½ percent. Measured in these terms, the impact of the $1.25 rate upon wage costs in retail trade will be over nine times as large as was the impact of the $1 minimum in manufacturing in 1956, when wage costs increased only 0.8 percent.

The proponents of S. 895 have said that if the bill were enacted, it would have little adverse effect upon unemployment and upon prices. It would, however, increase wages and thus push up hourly labor costs.

But no precise estimate has been offered of the ultimate effects of the proposed legislation upon employment or unemployment. Nor has a comprehensive estimate been made of the total impact upon wage costs which would reflect so-called outward, upward, and overtime factors.

If past experience is any guide, wage increases required under this bill would tend to spread outward to include noncovered workers. They would likewise spread upward over a period of time because wages of higher paid workers would also be raised in order to preserve wage differentials at least in part. When you jack up a house, you don't just lift the first floor. In addition, wage costs would be increased through overtime payments made for work performed in excess of the standard 40-hour week. This overtime provision would apply to all 4,330,000 newly covered workers, regardless of their present level of hourly wages. For these reasons, it seems likely that the proposed increase in minimum wages will be compounded through outward, upward, and overtime effects. Yet none of the estimates so far submitted by the proponents of this bill indicates what the full effect would be.

Previous studies have shown the diverse impacts upon costs, prices, output, productivity, employment, and unemployment by the adoption of earlier minimum wage legislation at various stages of the business cycle. Different firms within the same industry may even experience different results. The ultimate consequences of increasing minimum wages are particularly difficult to trace, because increases may be phased out over a number of years.

Since these complex factors may have a significant influence upon our general economy, it seems all the more important for the advocates of this proposed legislation to furnish additional information about what we may expect. Fortunately, we can learn something by looking to the record of experience to find out what happened the last time the minimum wage was increased and on that basis speculate more intelligently about the future. As the Secretary of Labor pointed out in a report, dated January 1961, submitted to the Congress in accordance with the requirements of section 4(d) of the Fair Labor Standards Act, "the only basis for predicting the effect on employment of changes in the minimum rate is previous experience."

What was this previous experience? According to a similar report submitted by the Secretary of Labor a year earlier:

"The Wage and Hour Division's studies of the economic effects of the $1 minimum wage show that, during the period of adjustment to the higher minimum, there were significant declines in employment in most of the low-wage industry segments studied. In many instances employers were successful in adjusting to the minimum-wage increase through increased productivity, but did not increase output, resulting in a reduction of employment. In these situations, production per hour of labor was increased, so that labor costs per unit of output did not go up even though costs per hour of labor were higher. This was accomplished in a variety of ways, including installation of more efficient machinery or equipment, improvement of plant layout, changing product lines, raising production quotas, and replacing the less efficient workers.

"Some employers reported that prices for their products increased. Higher prices might in time have resulted in lesser demand and consequently in cutbacks of production and curtailment of employment. No information was obtained on the extent to which cutbacks in production in the low-wage industries were offset by increased production and employment in competing industries which paid higher wages and were not substantially affected by the minimum wage.

"It was not possible to obtain information on the subsequent work experience of employees who lost jobs as a result of the minimum wage. It is not known to what extent they obtained jobs in other establishments at wages lower than, or perhaps even higher than, the minimum wage. However, if alternative employment is not available, workers in low-wage communities may remain unemployed rather than obtain higher wages as a result of the minimum wage. The situation in such communities is not alleviated by offsetting increases in employment in other areas.

"It may be expected that the economic climate in which the higher minimum becomes effective will be an important determinant of the extent of employment effects. The increase in the minimum wage to $1 an hour took place at a time of expanding economic activity, and this facilitated adjustment to the minimum wage increase. Had the minimum wage increase become effective during a period of recession, its adverse effects on employment might have been much greater."

Note that the report states that "had the minimum wage increase become effective during a period of recession, its adverse effects on employment might have been much greater." We are now at a time when unemployment is unusually high. In February, 5.7 million persons were reported to be unemployed, the largest number in two decades. In March 1956, the effective date of the last increase in minimum wage, 2.8 million persons were unemployed, or less than half the current total. In view of the unemployment situation, can the proponents of this legislation really assure us that it will not bring even greater significant declines in employment? Remember that over a period of years the bill will directly bring about an increase in the wages of more than twice as many workers as before.

Besides the numbers of workers who may be given dismissal notices rather than higher wages as proposed by this bill, I hope my colleagues will also consider what types of workers will most likely be penalized rather than helped by S. 895.

Undoubtedly, among the first workers to be laid off with an increase in the minimum wage will be employees whose abilities are marginal and whose skills are limited. These are the very persons least able to care for themselves and their families during periods of high unemployment. These are the very persons least capable of finding new jobs in order to become self-supporting again. This suggests that benefits that accrue to workers who remain employed and receive taxable wage boosts of varied amounts may be gained at the expense of the less fortunate who lose their jobs and suffer a 100-percent reduction in wages.

Minimum-wage legislation is often advocated in the name of liberalism. For workers whose wages are increased under such legislation, benefits may be real and direct if they are not offset by higher prices. But little attention is given by the same liberals to the plight of workers who—because higher minimum wages are imposed—are thrown out of work at a time when new jobs are harder than ever to find.

Then there is the question of the effect of this proposed legislation on production costs and prices. According to surveys made by the Bureau of Labor Statistics in 1960, the impact of S. 895 on wage costs would vary greatly among industries. By raising the minimum hourly wage to $1.25, the bill would directly increase the wages of more than a fifth of all nonsupervisory employees in private wholesale trade who even now are covered by the Fair Labor Standards Act. In private manufacturing industries, it would increase the wages of one-eighth of all such nonsupervisory workers. In all other private industries, the ratio would be one-ninth.

The impact of the proposed legislation would also vary greatly from region to region. Here again, a Bureau of Labor Statistics survey made in the fall of last year indicated that in nonmetropolitan areas of the South, a $1.25 minimum wage would require raising the wages of 56 percent of all nonsupervisory employees in wholesale trade in order to meet the minimum. In manufacturing, the wages of 38 percent of all employees would have to be raised in order to comply with the Federal requirement. These ratios for the nonmetropolitan areas of the South are much higher than those for similar areas in the north-central region or in the entire United States.

The effect of S. 895 upon wage costs as contrasted to hours will also be different in various industries, even if there were little or no change in employment. The Bureau of Labor Statistics reported late last year that within nonmetropolitan areas in the South, wage costs within wholesale trade would have to be increased nearly 8 percent in order to bring up to the minimum those workers earning less than $1.25. For manufacturing industries within the same area, wages would have to be increased by only 4 percent.

None of these estimates apparently takes into account outward, upward, or overtime effects. In this respect, the estimates may considerably underestimate the consequences of raising the minimum wage further. To the degree that increased wage costs were reflected in higher prices, inflationary trends would be stimulated. The increased prices would have an adverse effect not only upon families with fixed incomes, such as the elderly. They would also complicate fiscal policy. A rise of only 1 percent in what the Federal Government pays for goods and services will cause an additional budget deficit of $800 million.

If there is an increase in minimum wages at this time, the resultant rise in wage costs could force some marginal firms out of business or into failure. Already, failures of industrial and commercial business are at the highest level in more than two decades. Last year, the rate of failures per 10,000 industrial and commercial business concerns was 57, the largest since 1940. To the degree that business failures or discontinuances increase through the action of this bill, there will be fewer—not greater—employment opportunities.

The present circumstances are quite different from those prevailing when the National Industrial Recovery Act of 1933 and the Fair Labor Standards Act of 1938 were enacted. Then the general aim of minimum wage legislation was a 40-hour week to spread employment. The 25-cent minimum wage was a minor factor. Now we are in a situation where the emphasis is on wages which, if raised without regard to increased productivity, could have an inflationary effect.

The report of the Secretary of Labor, dated January 19, 1961, to which I referred earlier, indicated that the last increase in minimum wages had little net adverse effect upon the ability of American business to compete in foreign markets. The report stated that "an analysis of the available data does not support the view that a moderate increase in the minimum wage will have a significant adverse effect on the ability of American producers to compete with foreign producers in either the domestic or foreign markets. Most U.S. firms which compete with foreign producers would not be directly affected by an increase in the minimum wage, since they pay wages far in excess of the minimum rate. This analysis disclosed that more than four-fifths of imported and exported commodities are produced in the United States by industries which would not be significantly affected by a moderate increase in the minimum wage."

The report went on to say that "the position of low-wage firms competitive with foreign producers may tend to be adversely affected if a minimum wage change were to result in higher prices. However, as is noted above, the Department of Labor's studies of the effects of minimum wage increases indicate that they did not result in any general pattern of increases in the prices of products of low-wage industries."

But what guarantees can the proponents of S. 895 now give us on this subject. Can they assure us that the estimated increase of at least $1,700 million annually in the wages of workers eventually affected by S. 895 will not impair our competitive position? And what of the additional effects of outward, upward, and overtime factors? These questions demand serious consideration.

Our economy is already faced with a series of widespread wage increases this year even if S. 895 is not enacted. As pointed out in U.S. News & World Report for March 27, wage increases are scheduled in 1961 under the terms of 2,311 outstanding wage agreements. More than 2.9 million workers will receive pay raises under 1,905 long-term contracts signed in 1960 or earlier years. In March, for example, operating employees of railroads received raises of about 5 cents an hour. On October 1, steelworkers are scheduled to receive wage boosts of about 9 cents an hour.

So far this year, wage increases have averaged 8½ cents an hour under the terms of 406 new settlements made through mid-March. These agreements, of course, exclude possible wage increases which may be granted later this year. In the case of automobile workers, present contracts expire August 31 at Chrysler, General Motors, and Ford plants.

The total of 2,311 agreements which call for wage boosts this year will take effect despite the timely recent warning of the President's Council of Economic Advisers that "continuing efforts should be made to enlist the cooperation of labor and management in a voluntary program of price and wage restraint." These outstanding agreements will undoubtedly be cited by unions as precedents for additional wage increases under any new contracts to be negotiated whenever current agreements expire.

Besides the scheduled wage increases which will occur this year regardless of whether or not S. 895 is enacted, pressures are also being brought to bear to reduce the standard 40-hour workweek required by the Fair Labor Standards Act. The National Maritime Union, for example, has proposed that the 40-hour standard workweek be cut to 30 hours, at least for its members. To make up for any hours worked in excess of the 30-hour schedule, sailors would be given extra time off in the form of vacations. Overtime rates would begin at 40 hours, according to the union's proposal.

These recent developments, coupled with the complex and complicated ramifications of the proposed minimum wage legislation, argue for more detailed estimates of the impact of S. 895 before the Congress makes an irrevocable decision that might be damaging to the economy. A decision to enact S. 895 will make the $1.25 minimum wage a condition of employment, whatever the ultimate impact on production, prices, and unemployment. It will penalize every worker who fails to keep or secure a job if he cannot find an employer who will pay at least the minimum wage.

By adopting S. 895 and superimposing these Federal minimum wage standards upon our States, the Government would set a legal floor on wages generally much higher than the several States now require. Eleven States, in fact, have no minimum wage law. At the other extreme, Alaska has the highest—$1.50 per hour. Next highest are 11 States, with $1 per hour in most industries. Other States have lower minimums.

The original Fair Labors Standards Act provided for a minimum rate of 25 cents an hour, effective October 1938, 30 cents effective October 1939, and 40 cents effective October 1945. In January 1950, the minimum rate became 75 cents, and in March 1956, it became $1. As a result, the minimum rate is now four times what it was when the act first became effective. The proposed increase to $1.25 would mean that the rate would then be five times what it was in 1938. Before considering this further step, the Congress is entitled to additional information from the proponents which would tell us more completely how the entire economy will be affected.

In conclusion, I object to this bill on both constitutional and economic grounds. Enactment of S. 895 would mock the Interstate Commerce clause and the 10th amendment of the Constitution and would, in my opinion, be detrimental to the best interests of the United States. If this bill becomes law, it might well aggravate both our domestic and international economic difficulties by adversely affecting employment, costs, prices, and the deficits both in our Federal budget and in our balance of payments.

I urge that we reject S. 895.

TRIBUTE TO LT. GEN. E. C. ITSCHNER, FORMER CHIEF OF ARMY ENGINEERS

Mr. STENNIS. Mr. President, the U.S. Army Corps of Engineers fulfills a vital mission in a difficult field of activity. Its responsibilities are many, and it discharges them with efficiency and wisdom.

Leadership in the great work done by that group of professional engineers rests on the shoulders of the Chief of Army Engineers.

Many men have held that office in the long history of the corps, but none other has ever been more able and dedicated to the task than Lt. Gen. E. C. Itschner who occupied that high office for 6 years before retiring March 31.

The value of General Itschner's labors are everywhere evident in the great flood-control projects, river and harbor development programs and related activities throughout Mississippi and the Nation.

I ask unanimous consent to insert the following editorial which appeared in the Memphis, Tenn., Commercial Appeal on April 5, 1961, into the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

HAS BEEN ONE OF THE BEST

Any officer who attains the coveted post of Chief of Engineers in the U.S. Army has to be especially talented. He must constantly utilize his engineering knowledge for the public good; he must be an effective commander of the many thousands of engineer soldiers in his branch and he must be an able administrator responsible for the expenditure of many billions of dollars every fiscal year.

The normal tenure of a Chief of Engineers is 4 years. Lt. Gen. E. C. Itschner made such a fine record that then President Eisenhower extended his tour for 2 years. It was a rare compliment but one he had earned. He has been one of the best of a long line which stretches back to the building of the Bunker Hill fortifications.

Because of the vast flood control, navigation, and water resources development projects to which this valley's economy is geared and the relation of the Chief of Engineers to it, any change in that post is of major importance to it.

General Itschner has been extremely sympathetic toward the lower valley's water resources needs and kept himself thoroughly conversant at all times with its complex flood control and navigation problems. He never permitted the worldwide scope of his responsibilities to cause him to forget those of a domestic character having bearing on the lives and well-being of the millions of Americans to whose service his 37 Army years had been dedicated.

He proved himself to be a sincere friend of Memphis and the Midsouth and this section's good wishes go with him as he takes up his new post as chief technical adviser on Pakistan's vast Indus River development project.

VISIT TO UNITED STATES BY PRIME MINISTER ERLANDER

Mr. HUMPHREY. Mr. President, I wish to take this opportunity to express my pleasure over the visit to the United States of the Prime Minister of Sweden and Mrs. Erlander.

We in the United States have strong ties with Sweden. From the earliest days of our history, the men and ideas coming from Sweden have contributed appreciably to the development of the American system. Swedish colonists first settled on our eastern shores in 1638, and I do

not have to emphasize the influence of Swedish settlers in my own State or its neighbors in the Midwest. In this centennial year of the Civil War, we particularly remember John Erikson whose engineering genius created the *Monitor*. We cannot forget the many contributions of Sweden's writers, artists, philosophers, and scholars, particularly the monumental studies of Dr. Myrdal, which have had a profound influence in this country.

Americans admire Sweden's dedication to humanitarian causes around the globe. We are especially grateful for the services of Dag Hammarskjold in the United Nations. His unstinting labors in the cause of peace have engraved his name in the hearts of men the world over who cherish liberty. We are also aware of the willingness of the Swedish people and their Government to defend the principles of the United Nations Charter. We have not forgotten that Swedish officers and men served in Lebanon in the summer of 1958, kept order in the Gaza Strip, assisted in Korea, and that they continue to contribute to security, through service in the Congo.

I remind my colleagues that only yesterday Swedish troops, along with Irish troops, maintained order in Elisabethville, in the Congo. These are perilous and expensive undertakings, but they speak eloquently of Sweden's desire and determination to bear its share of international responsibility.

The Nordic Council, in which Sweden is a leader, is a model of international cooperation for the world to see. Sweden's participation in the European Free Trade Area—EFTA—in the Organization for European Economic Cooperation—OEEC—and its successor, the Organization for Economic Cooperation and Development—OECD—demonstrates continued interest in the orderly regulation of trade and commerce for the common good.

Mr. President, recently I read a report which showed the many millions of dollars' worth of imports that Sweden receives from the United States. Sweden is one of our best customers. Surely the visit of the Prime Minister is a further aid to the cementing of the wonderful relationships between our two countries.

The Social Democratic Party, which Prime Minister Erlander heads, is Sweden's largest party, and has been dominant in the Government since 1932. The Social Democratic Party today enjoys greater support than it has previously received at any time since Mr. Erlander became Prime Minister in 1946. Since the war the Swedish economy has grown at a rapid rate, and supports full employment. Sweden's traditional policy of nonalliance in time of peace and neutrality in time of war enjoys the full support of all political parties.

We are delighted to welcome Prime Minister Erlander to the United States and, in particular, to Minnesota. We hope that he and his charming wife, whose first trip to our country this is, will take back to Sweden increased appreciation of the depth and the extent of Swedish-American friendship.

Mr. President, I make this brief comment today because I have had the privilege of knowing the Prime Minister and his wife as friends, as well as the privilege of knowing them as public officials and outstanding personalities; and I desire to use this occasion to express to Sweden and to the Government of Sweden, and particularly to the Prime Minister, our everlasting gratitude for their wonderful cooperation in the cause of justice and freedom.

At this time, Prime Minister of Sweden is visiting Minnesota. Today, he is in Duluth. Tomorrow, he will be in Minneapolis. We consider it a high honor to have this distinguished statesman with us.

THE 170TH ANNIVERSARY OF THE POLISH CONSTITUTION

Mr. CARROLL. Mr. President, on May 3 the people of Polish heritage in this country will commemorate a day of great glory to them and to freemen everywhere: the 170th anniversary of the Polish Constitution.

Mr. Edward Zalewski, president of the Polish Club of Denver, has written to me a letter describing the significance of this occasion in so incisive and memorable terms that I wish to share it with my fellow Members of the Congress through the CONGRESSIONAL RECORD.

I ask unanimous consent that Mr. Zalewski's letter be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

POLISH CLUB OF DENVER,
March 31, 1961.

Hon. JOHN A. CARROLL,
U.S. Senator,
Senate Office Building,
Washington, D.C.

DEAR SENATOR: On May 3, 1961, the Polish people everywhere will commemorate the 170th anniversary of the Polish Constitution, one of the world's greatest documents of freedom.

The Polish Constitution, written on May 3, 1791, resembles closely the principles of the Constitution of the United States of America.

Never before has this eventful day in the lives of the Polish people been more important than it is today, since Poland during this year is also celebrating the thousandth year of becoming a Christian nation, and ironically finds herself under the yoke of godless communism.

The Polish nation's freedom and Christian faith are going through the most crucial test in the history of mankind. The people of Poland are looking to the West for a word of encouragement in their struggle for freedom and liberty they so dearly cherish.

The Polish people in Denver and in Colorado realizing the importance of this occasion would greatly appreciate it if on the 3d day of May, you will be willing to recognize this fact on the Senate floor.

On Saturday, October 7, 1961, we will commemorate the death of Gen. Casimir Pulaski, the hero of two continents, and also will celebrate the thousandth year of Polish Christianity at the Lincoln Room of the Shirley Savoy Hotel. The members of the Polish Club of Denver sincerely hope that you, dear Senator, will be able to attend. An official invitation will follow at a later date.

Thank you very much and best wishes to you and your family.

Respectfully yours,

EDWARD J. ZALEWSKI,
President, Polish Club of Denver.

CHRONIC UNEMPLOYMENT—A HARD CORE PROBLEM—AGE DISCRIMINATION

Mr. JAVITS. Mr. President, the recent report of the National Planning Association on the problem of chronic unemployment emphasizes the prevalence of job discrimination because of age and makes special reference to the waste of skill, talent, and ability resulting from the fact that the most acute and widespread unemployment problem is in the 45 to 64 age group. Nearly 28 million Americans in our Nation's labor force are 45 years of age or older, and legislation such as I have proposed (S. 350, S. 351, and S. 352) is essential to protect them from discrimination.

Federal leadership must prevent and eliminate this injustice if our resources of skilled manpower are to prove adequate to the demands of an expanding economy. It would make it possible for many of the mature citizens now on the public assistance rolls to regain their dignity as productive working members of society. Artificial and arbitrary age limitations severely limit job opportunities and lead to premature retirement of valuable workers.

Job discrimination because of age has already been recognized as a primary economic problem in nine States, New York, Pennsylvania, Massachusetts, Connecticut, Rhode Island, Delaware, Oregon, Wisconsin, and Alaska. Their laws ban age discrimination in private industry as well as in union and employment agencies. Under the legislation I have proposed, the Federal Government would supplement existing State law against employment discrimination by giving the State agency authority to prohibit such practices by local firms engaged in interstate commerce.

I ask unanimous consent to include with my remarks in the RECORD the column by Roscoe Drummond entitled "U.S. Faces Real Problem of Chronic Unemployment," and the report by Joel Seldin entitled "Unemployment Figure Likely to Stay Virtually Unchanged for 10 Years," both of which appeared in the New York Herald Tribune, April 3; and the editorial entitled "Focus on Chronic Joblessness" in the New York Times, April 3.

There being no objection, the articles and report were ordered to be printed in the RECORD, as follows:

[From the New York Herald Tribune, Apr. 3, 1961]

IN GOOD TIMES AND BAD: UNITED STATES FACES REAL PROBLEM OF CHRONIC UNEMPLOYMENT

(By Roscoe Drummond)

WASHINGTON, April 2.—The Kennedy administration may not be giving us all the

right answers, but the President is raising the right questions about the distressing and increasing unemployment in the United States.

It is getting worse, not better. Great harm can come from ignoring it. The anomaly is that unemployment and employment have been rising simultaneously.

Nothing could be more hurtful than to lose sight of the problem by focusing the debate on the "prosperity records" of past administrations, Republican or Democratic.

Many Republicans feel that the Eisenhower years have been the greatest ever. Many Democrats contend that the recessions were frequent, the recovery too little and the rate of economic growth too slow.

The need now is to get away from the blurred cliches of "campaign oratory" so that we can look at the problem frankly and realistically.

PERSISTENT UNEMPLOYMENT

Throughout the last decade, despite remarkable prosperity for many, despite high average wages and high consumer purchasing power, persistent unemployment has been steadily mounting.

The most revealing fact of all—and this seems to me to cut through the distracting argument over how good or bad things have been during the last 8 years—is that persistent unemployment has been increasing even when prosperity has been highest.

Chronic unemployment, according to the latest report of the National Planning Association, went from about 500,000 in the third quarter of 1953, to about 2 million in the first quarter of 1960. This is not the total unemployment which is now about 7 million. It is the mounting hard core of unemployment which has persisted and grown through both the least prosperous and most prosperous years of the 1950's decade.

A WARNING

This is why the National Planning Association, a nonpolitical organization made up of leaders in business, labor, agriculture, and the professions, warns that such unemployment will rise further unless countermeasures are forthcoming.

To reduce unemployment and underemployment within a year to 4 percent of the labor force would require some 7 million new job opportunities—a gigantic challenge.

The NPA describes chronic or structural unemployment as not caused primarily by the ups and downs of the business cycle. There are more deep-seated factors, such as inadequate growth, more automation, economic changes abroad, movement of industry to new locations, and "discrimination against age and racial groups practiced by some employers and in some cases by unions."

THE AGE PROBLEM

Those most affected by chronic unemployment are men 65 and older. The tendency for widespread, persistent unemployment in the 45-to-64 age group is also very acute. In February 1961, the proportion of unemployed who had been looking for work more than 15 weeks in this age group was as high as 32 percent.

Since workers in this middle-age bracket have usually assumed substantial family responsibilities, the NPA strongly urges action to end age discrimination. This is critical, since during the next few years 40 percent of the labor force will be 45 years or older.

REMEDIES SUGGESTED

To combat both age discrimination and racial discrimination in employment, the NPA urges public education stressing the need to use these workers, increased vocational training, and retraining, and wider use of the U.S. Employment Service, as well as other means.

However much the partisans may disagree over the prosperity of the Nation in recent years, chronic unemployment has been growing in good and bad times alike. It now confronts industry, labor, and Government with a problem too persistent to be ignored.

[From the New York Herald Tribune, Apr. 3, 1961]

UNEMPLOYMENT FIGURE LIKELY TO STAY VIRTUALLY UNCHANGED FOR 10 YEARS

(By Joel Seldin)

In the years to 1970, if the economy develops as expected and there is no depression, the number of unemployed will remain about what it has been in the last few months. If things go particularly well and President Kennedy's goal of 4 percent unemployed is achieved, the number of jobless will remain about what it was in 1960.

The difference between those two possibilities is the difference between 3,400,000, or 4 percent of the expected labor force in 1970, and 5,100,000, or 6 percent of the same labor force. Economists argue about what the minimum rate of unemployment should be, but few of them suggest anything greater than 6 percent.

CHANCES FOR 1965

In any intervening year before 1970, because the labor force will not have grown so large, the actual number of unemployed corresponding to 4 percent or 6 percent will be lower. In 1965, for instance, the range would be from 3,100,000 to 4,600,000.

A rough guess at how 6 percent unemployment in 1970 would feel for both employed and unemployed, can be estimated by comparing the prediction of 5,100,000 jobless with the actual situation last January, when 5,400,000 were out of work.

The estimate is rough because unemployment varies from month to month, and it is not quite accurate to compare a monthly rate with an average annual rate. At a yearly rate of 6 percent, January 1970 would probably have higher unemployment than January 1961, though the unadjusted rate was 7.7 percent in the first month of this year. Still, the average situation over the course of 1970 would be something like the state of things at the start of this year. At a rate of 4 percent, the situation would be much better.

Within the scope of that estimate, trends in the composition of the labor force during the 1950's, projected into the 1960's, indicate the kind of people apt to be among the jobless in the next 10 years.

PROSPECTS FOR YOUNG WORKERS

If a worker is under 25 or over 45, he or she is more likely to become unemployed than those between 25 and 44. The under-25 group is expected to increase by 46 percent in 1970 over the 1960 figure, and the increase for those over 45 is predicted at 20 percent. Both groups, but especially the younger, have higher rates of unemployment than those between 25 and 44.

It is expected that 20,200,000 workers, almost a fourth of the entire labor force in 1970, will be under 25. The unemployment rate in that age range in recent years has been from 2 to 3 times higher than for older workers. This difference is expected to intensify in coming years.

It is also expected, however, that those in the younger group will continue to experience relatively short-term unemployment, while the older workers who become unemployed will continue so for a protracted period, or have more than one spell in the year without a job.

A study of the characteristics of unemployment in 1957 showed that short-term unemployment ranged from 49.2 percent for those under 17 to 9.9 percent for those 65 and over. In unemployment of 15 weeks or more, those under 17 were 23.3 percent and those over 65 were 51.4 percent.

Men will still outnumber women in the work force by 1970, but the proportion of women will be higher. While the actual number of male workers increases 15 percent from 50 million now to 57.4 million in 1970, the number of women will increase by 25 percent from 23.6 million to 29.6 million.

Though the overall increase in the labor force will be largest in the group under 25, the increase among workingwomen will be largest among those over 35. Since women tend to take jobs with high rates of unemployment, there is a good chance that an unemployed worker in 1970 will be an older woman.

The unemployed woman, like the younger man, will be less subject to periods of protracted unemployment. Of the short-term unemployed in 1957, 60.5 percent were men and 39.5 percent were among. Among those with long-term unemployment, 72.4 percent were men and 27.6 percent were women.

The most significant single factor in unemployment will be education. The need for workers in professional, technical and managerial jobs will grow fastest. Though the labor force will have grown 18 percent by 1970, from 73,600,000 to 87,100,000, it is expected that the number of unskilled workers will remain unchanged and the number of farmworkers will drop sharply. Employment will grow faster in the service industries than in production.

THE 1959 STUDY CITED

A special study of unemployment as of March 1959 showed that the number of workers who did not complete high school was only slightly higher than the number of those who did. Among those unemployed for 15 weeks or more, however, 72.3 percent had not completed high school.

High school graduates made up only 33.2 percent of those unemployed less than 15 weeks. Of those working part time because they could not find full-time jobs, 25.2 percent had completed high school.

The importance of education was more critical for men than for women. Among men unemployed over 15 weeks, those without high school diplomas accounted for 75 percent, while the rate for women was 65.4 percent.

It has also been found that men with less schooling retire earlier, probably because they have been engaged in work requiring physical strength. Between 1952 and 1959, the percentage of men still working after 65 who had less than grade school education dropped from 40 to 30 percent. The rate for college graduates dropped from 58 to 53 percent.

OTHER FACTORS

It is expected that during the late 1960's, 3 million new young workers will enter the labor force each year, compared with 2 million a year now. Of the total of 26 million new young workers in the decade, 30 percent will lack a completed high school education. In the same period, high school enrollments will increase from 9 million to 13 million, and college enrollments from 3,500,000 to 7 million. Those without high school diplomas will be less able to compete for jobs in 1970 than they are now.

The trends described above are predictable with fair accuracy and will affect the rate of unemployment with an impact relative to the state of the economy. There are other factors, however, which are equally important but less predictable because their impact depends on what the country chooses to do about the problems from which they stem.

One such factor is the problem of depressed areas, where large numbers of workers have been unemployed or partially employed for years. In testimony before Congress last month, Ewan Clague, Commissioner of Labor Statistics, said BLS studies indicate that half the unemployed in chronically depressed areas have been without jobs even when the economy is in good shape.

The administration has proposed legislation to aid depressed areas. If the measure is passed by Congress and if it is effective enough in practice to bring depressed areas unemployment to national averages, Mr. Clague said, the 500,000 jobless in those areas would be cut by half, with two-thirds of the reduction among long-term unemployed. The national proportion of long-term unemployed would become 15 percent of total unemployment, or 500,000.

BIAS PROBLEM

Part of the problem of dealing with this hard core of long-term jobless is the problem of employment discrimination against Negroes. In both long- and short-term unemployment, the pattern for Negroes will depend on developments over the years in the total national pattern of discrimination.

In 1957, a full-employment year with a national unemployment rate of 4.3 percent, the unemployment rate for nonwhites was double the rate for white workers. Among the long-term unemployed, the rate was 21.4 percent for nonwhites and 18.6 percent for whites.

Unlike the national pattern, in which the unemployment rate is higher for women than for men, the situation is worse for Negro men than for Negro women. The unemployment rate in 1957 for white men was 3.7 percent and for white women 4.3 percent. For nonwhite men, the rate was 8.4 percent, compared with 7.4 percent for nonwhite women.

One possibly hopeful sign in the pattern of Negro employment stems from a peculiarity in the age distribution for the labor force over the next 10 years. The age group between 35 and 45 will actually decrease, and the age group between 25 and 34 will increase less than the national average.

If Negroes can break through the pattern of discrimination in education, especially in technical education, and can acquire the skills required by the expanding needs in industry for technicians, managers and craftsmen, their opportunities for steady, well paid employment will rise. Employers, faced with a labor shortage in these categories will have no recourse but to hire Negroes if they are qualified.

Louis F. Buckley, New York regional director of BLS, commenting on this idea last month in a speech at Notre Dame University, said: "There will not be enough white workers in the prime age group to meet the needs of industry. This will bring to light the high price we have paid for moral neglect in terms of waste of talent and skill, which we cannot afford to continue."

In summary, the decade of the 1960's will find many more young workers in the labor force of whom a higher percentage than now will have high school and college educations. Those who do not have this education will account for a large number of the short-term unemployed.

The rate of unemployment among older workers will not be higher than in other age groups, but there will be a considerably higher number of older workers among the long-term unemployed.

In addition to more young workers, there will be an increase in the proportion of adult women in the labor force. The two groups will produce an increase in the proportion of workers seeking part-time employment, mostly in services, finance and trade.

[From the New York Times, Apr. 3, 1961]

FOCUS ON CHRONIC JOBLESSNESS

There could hardly be a better time than now to focus public attention on chronic unemployment. When some signs of recovery appear, it is all too easy to assume that, as general business conditions improve, the number of those out of work will decrease. The National Planning Association's "Joint Statement on the Rise of Chronic Unemployment" shows that, on the contrary, the number of those actually deprived of their jobs has increased even at the peak of business prosperity in the past—and is likely to do so in the future. The statement makes a strong plea to distinguish this particular kind of unemployment and to adopt separate measures to combat it—in addition to policies designed to promote the overall growth of the economy.

The NPA document includes some provocative measurements and estimates of chronic unemployment now and in the future—due to major geographical shifts of industries and firms and to the growing capacity of industry to produce more and more with fewer employees through increased automation. For example, the NPA says that today's output can be turned out next year with 1.8 million fewer workers than now. By March 1962 the economy will have to provide jobs, not only for them but for at least another 5 million to achieve "reasonably full employment.

The statement suggests a series of a dozen or so specific Government policies to reduce the chronic unemployment with which we are now faced. It does not, however, give as much consideration as it might to measures that could be taken by industry on its own initiative or under collective bargaining agreements. Its signers recognize full well all such measures can be fully successful only if additional job opportunities are created by an adequate rate of growth in the economy as a whole.

The roster of those who signed the statement adds both weight and interest to the substance of the document. There are 66 of them, representing outstanding leadership in business, labor, agriculture, education, and social welfare. Their views deserve wide attention and discussion.

TRAVEL U.S.A.

Mr. JAVITS. Mr. President, while the United States has been slow to recognize the important service that an international travel office such as Senator MAGNUSON and I have proposed could provide, private travel carriers and travel organizations are demonstrating in a modest way what can be done in response to the growing tourist travel market. The need for brochures, pamphlets, posters, and other promotional materials to persuade foreign travelers in their native language to include the United States in their tours can only be met in sufficient quality and quantity by the Federal Government. The United States, however, is the only world power that does not maintain a tourist information service.

I ask unanimous consent to have printed in the RECORD a survey of some of the needs which exist overseas by Irwin Robinson, entitled "Signposts for 'Travel U.S.A.'" which appeared in Travel Weekly, March 14.

There being no objection, the survey was ordered to be printed in the RECORD, as follows:

[From Travel Weekly, Mar. 14, 1961]

SIGNPOSTS FOR "TRAVEL U.S.A."

(By Irwin Robinson)

A group of earnest U.S. domestic travel promoters set out a few weeks ago to explore the possibilities of inducing European travel agents to send more clients to America.

They discovered before long that in addition to handing out information about attractions and rates and facilities, they were gathering in just as much information about the European market and its potential for the "Travel U.S.A." movement.

The facts and impressions they brought back with them can play a very important role in future efforts to develop westbound traffic. Whether or not the trip serves this useful purpose depends on how much attention the rest of the trade pays to the lessons learned by the SAS-sponsored team, and how realistically those who guide the destiny of the new U.S. Travel Office approach their jobs.

It is well to note here that people who exercise initiative always run a greater risk of making mistakes than those who sit back and watch. This applied to the SAS mission. And, while that airline as well as the domestic carriers, hotels, sightseeing companies and tour operators who participated should benefit greatly from their experiences in Europe, so will the other transatlantic carriers, the other domestic airlines (which did not take part but sent observers), and the other hotels, sightseeing companies and wholesalers.

The recent tour seemed to indicate that:

1. In travel, as in any other merchandising, new markets must be studied in terms of sales potentials, purchasing power and established buying habits. A great deal of additional information is needed along these lines if European markets are to be cultivated systematically.

2. Travel "merchandise" offered to European vacationers should be tailored to their interests and their needs. Merely offering domestic tours and packages because they are handy is not enough to make inroads on the new market.

3. The physical presentation of information intended to interest and excite European travel agents should be designed specifically for this audience. Material prepared for domestic audiences does not always hit the mark. While it can be assumed that the European agents who come to hear a U.S. presentation in English are familiar with the language, there is still a barrier.

QUESTION "RECEPTION"

4. European agents remain unconvinced that the reception, transfer and guide services they feel their clients require are sufficiently well organized in the United States to permit them to recommend such travel on a large scale. Either these services must be improved and expanded or European agents must be convinced they are adequate.

These are samples of the negative side of the picture. On the positive side, European agents recognize the deep-rooted desire among most of their countrymen to satisfy their curiosity about the U.S.A. They are frank to admit also that the income potential of the long haul to America and the relatively long stay is attractive enough to warrant their interest.

The question now is how to tap the potential most effectively in the shortest possible space of time. The points mentioned above deserve consideration by both domestic and international travel interests. They should be noted especially by the govern-

ment officials and the experts they retain to help them make two-way travel a reality.

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ALLIANCE FOR PROGRESS FOR LATIN AMERICA

Mr. JAVITS. Mr. President, today I wish to discuss briefly what I consider to be the appropriate first major task which could be undertaken by the Organization for Economic Cooperation and Development, which the Senate recently ratified.

I believe it especially timely to discuss this now, for two reasons: First, it will give a very practical turn to the Organization, and thus I hope will provide an additional reason why there should be prompt ratification, in a parliamentary sense, by the other nations which will be members of the Organization; and, second, because I believe we are more and more concentrating our attention on where our foreign policy can do the most good in a constructive sense, long before we get into major difficulties. I see such signs written very clearly on the wall, in terms of Latin America; and, thus, I believe that not only is President Kennedy correct—as was President Eisenhower—in calling our attention to the need for a specific program there, but also we are under the responsibility of seeking a massive effort by all the countries of the world that are able to provide foreign aid, at the time when it will do the most good, to an area which at present is ready to receive it.

President Kennedy has called on the people of the United States and Latin America to join in a new "Alliance for Progress"—a vast 10-year cooperative program for the social and economic development of this hemisphere. The major Latin American governments have given support to this proposal, which is in accord with the Act of Bogotá, drawn up at the initiative of the Eisenhower administration. As a first step to implement the program, Congress has been asked to appropriate $500 million for the Inter-American Fund for Social Progress, and $100 million for the reconstruction of earthquake-battered areas of Chile.

I ask unanimous consent to have printed at this point in the RECORD an editorial entitled "America's Responsibility," which was published in the New York Times of March 31, 1961.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

THE AMERICAS RESPOND

The response to President Kennedy's "Alliance for Progress" plan for Latin America from some of the leading statesmen of the hemisphere and a number of the most responsible newspapers has been gratifying. This is important because the success of the Kennedy program depends in large measure on the cooperation of the Latin-American governing classes.

Friendly and enthusiastic messages have reached the White House from the Presidents of Venezuela, Colombia, Chile, Argentina, Peru, Mexico, and some smaller countries.

The letter from President Betancourt of Venezuela, the text of which has just been made available here, was exceptionally interesting. Señor Betancourt feels that there has been "a change of direction in United States conduct toward Latin America" and "the White House begins to speak a language that has not been heard since the days of Franklin Delano Roosevelt." Since President Betancourt, like other liberal democratic leaders of Latin America, has been critical of the Eisenhower administration policies, this is intended as a high compliment to the new administration in Washington.

The President's letter is most interesting in his assertion that there has to be "a revolution" in Latin America, especially with agrarian reform, but that it can be done "by evolutionary methods."

This is what the Betancourt government is trying to do in Venezuela and it is what the United States, in its new policies, wants to see done. It is the answer—the only possible effective answer—to the revolutionary drive of the combined forces of Fidelismo and communism in Latin America.

The obstacles to winning full and effective cooperation in Latin America from the ruling classes are far greater than generally realized in the United States. This is why the favorable reception President Kennedy's plan has received from democratic statesmen in Latin America is so encouraging.

Mr. JAVITS. Mr. President, today I am proposing that the United States take the lead in broadening the base of this effort, by enlisting the participation of the other 19 prospective members of the Organization for Economic Cooperation and Development—OECD—in the "Alliance for Progress."

Without assigning any relative priorities, Latin America represents an area of great opportunity for effective and constructive action in the field of economic development by all the industrial nations of the free world, organized in the OECD and in its Development Assistance Committee.

There can be created a program of self-help and mutual cooperation, having the full and active participation of the Latin American governments concerned in every phase of the undertaking, and calling for the best efforts of the new Inter-American Development Bank and other regional and international economic and financial agencies active in the area. The vast experience of the Western European countries in the self-help aspects of the Marshall plan which they undertook through their cooperation in the Organization for European Economic Cooperation, which preceded the OECD, can furnish vital elements for the success of this program.

In that respect, I call attention, with great approval, to the expressions contained in President Kennedy's message to the Congress, in which he made it very clear that he would expect that in connection with this "Alliance for Progress," each recipient nation would live up to the principles of self-help and domestic reform which are outlined in the message; and the President stated that he hopes funds will not be allocated until the operating agency receives assurances that the country to be aided will take the necessary measures to insure that the particular project will result in the maximum amount of social progress.

This is the very kind of experience the European countries can bring to a cooperative effort with us in the tremendous joint undertaking for Latin America which I propose.

Latin America will take pride in its participation and in meeting the standards of self-help referred to so specifically by the President in his message. Administration of such a program can take place through the existing regional agencies and organizations, which have nearly all of the American Republics as members, and which are already slated to carry out the declarations of the Act of Bogotá. Leading among these organizations is the Inter-American Development Bank, with $450 million from the United States, and an aggregate of $1 billion, and to which most of the sister American Republics now adhere.

A most vital aspect of this proposal includes also the cooperation of the private economic systems of the Western European countries in the OECD—the United States, Canada, and Japan, which was here represented through its membership in the Development Assistance Committee.

Private investment has been, and will continue to be, an integral and essential element of Latin American development, and the technical assistance resources of these private economic systems—when added to the technical assistance resources of their governments—can tremendously enhance the chances for success of the "Alliance for Progress."

In short, I suggest that the governments of the prospective members of the OECD, in cooperation with the private economic systems concerned, undertake an initiative comparable in importance to the initiative undertaken through the Marshall plan for Western Europe—this time for the development of Latin America.

I address myself to this subject because I have a rather special interest in regard to the cooperative positions of our European friends and allies.

It will be my purpose to submit this proposal to the next meeting of the NATO Parliamentarians' Economic Committee, of which I have the honor to be the Chairman, for their consideration in enlisting the prospective members of the OECD to undertake this effort. Let us remember that three-fourths of the nations of the new OECD are members of NATO.

I consider this committee especially qualified to take such initiative, since it has proven to be one of the primary centers of activity leading to the establishment of the OECD and of the new concept in cooperative development assistance for the benefit of the less-developed areas of the free world.

The program which I shall place before the committee cannot be undertaken by NATO itself, because NATO is not an operating organization in the field of development assistance. But planning to

meet the urgent economic development problems in Latin America cannot await the time when the OECD becomes fully operational, and therefore, cooperative action should be discussed now, within existing organization structures. When the OECD is ready to become active, its facilities for cooperative action should give top priority to Latin American development.

A pivotal role in this plan could be played by Puerto Rico, which is itself located in Latin America. The economic success and prestige of Puerto Rico in Latin America could be integrated and be utilized fully in such a cooperative effort.

All Americans hail with great pleasure the fact that the citizens of Puerto Rico are represented by an Assistant Secretary in our State Department and in the new Ambassador to Venezuela.

There are two final points I should like to discuss in this respect.

The requirements for Latin American economic development break down into two categories: First, the need for public loans and grants; and second, the need to provide an expanding market for Latin-American exports, which is at least equally important.

PUBLIC LOANS AND GRANTS

The present foreign public loan and grant inflow to Latin America totals about $600 million annually. Latest estimates indicate that for the next 10 years, the foreign public loan and grant needs of Latin America will average between $1.5 billion and $2.5 billion annually—at least three times greater than the present inflow. It is hoped that about $600 million annually, or one-third of this amount, could be made available in soft loans—loans not repayable in hard currencies—and that the Western European countries would be especially helpful in this sector.

It should be emphasized that these estimates deal with public loans and grants only. Between 1950 and 1958, net private capital investment, including reinvested profits, averaged $488 million annually, of which $413 million, or 83 percent, came from the United States. However, about half of this U.S. investment in Latin America went into the Venezuelan petroleum industry, and by the end of 1959, out of the $8.2 billion total U.S. private capital investment in Latin America, $4.2 billion—more than half—was in the extractive industries. The fluctuations in private investment, varying from $200 million in 1954 to $1.2 billion in 1957, also require attention.

It is obvious that the $500 million U.S. program for Latin America—plus $100 million for disaster relief in Chile—asked for in 1960 by President Eisenhower, and now by President Kennedy, is not adequate to what should be the free world's objectives. Both administrations spoke of this program as a first step, and put no time limit upon the expenditure of the money. The $1 billion total lending authority of the newly operational Inter-American Development Bank also cannot hope to meet adequately the estimated annual need of $1.5 to $2.5 billion in public loans and grants.

The $500 million now requested are really only an initial social-economic capital investment. It must be accompanied by public and private capital investments in the more orthodox sense. The $500 million initial investment is a first step in establishing those tangible and intangible bases for economic growth which already existed in Europe, even after the devastation of World War II: the knowledge of channels of trade, the traditions of financial institutions—in other words, the infrastructure of economic life. It should be emphasized that there is a great potential for action to enlist the technical know-how of the private economic system in the creation of this social-economic infrastructure. Much also needs to be done in meeting the basic needs in education, compiling of statistics, land reform, health facilities and tax reform.

In all these ways, Western Europe and Japan can be of help in working with us in meeting the needs of Latin America.

The export part of the situation is too little emphasized in what we have been considering for the development of Latin America. Latin America will live or die by its exports. It will live or die by the capital which is invested there. In order to live, it must develop.

LATIN AMERICAN EXPORTS

Western Europe and its associated territories take more than $3 billion or 35 percent of Latin American exports. This is only slightly less than the 44 percent share taken by the United States. Many of these exports are absolutely essential to the industrial operations of the Western World. Among such exports are tin, copper, lead, zinc, iron ore, and petroleum. However, Latin America, with practically no preferences established in the European Economic Community, must face the danger of having an increasing share of its exports of coffee, cocoa, bananas, and other products which are in competition with the exports of the EEC oversea territories diverted from the European market and losing the most favored nation treatment position. In addition, some of the Latin American products—notably coffee—face high excise taxes which restrict consumption in Europe, and hence are another impediment to Latin American development, which Europe could help undo.

While there has been an unprecedented increase in world trade during the past decade, the value of annual Latin American exports increased by only $1.4 billion, reaching $8.2 billion in 1959. Thus, Latin America's share of world exports actually dropped, from 11.1 percent in 1950 to 7.1 percent in 1959. Unless Latin America's exports rise at a rapid rate, there will be a $5 billion annual gap between Latin American exports and import needs by 1975. Thus, it will be necessary for Western Europe to increase its imports from Latin America, rather than decrease them, as now seems to be the danger.

Clearly, in terms of policy, in terms of the purpose of the OECD, in terms of the money needed, and in terms of the trade interest which obtains in Western Europe so far as Latin America is concerned, there is a great need for cooperation between the OECD countries and the United States along the broad outlines of the Marshall plan, in aid in the development of Latin America. Just as the burden of economic development of the present and former oversea territories of the European nations, through investment and trade, has not been and is not the sole concern of the Europeans but has been greatly shared by the United States, so must the European nations now share the U.S. responsibility in Latin America. This cooperation and sharing is inherent in the new concept of development aid which is leading to the establishment of the OECD. Latin America cannot wait and needs the cooperative action of the industrialized free world nations as soon as possible.

We cannot carry that responsibility alone. Munificent as is the program which has been authored for us by former Secretary Herter and President Eisenhower, now by Secretary Rusk and President Kennedy, it is still not adequate to the occasion and to the time in which we have to move. This, it seems to me, Mr. President, represents a splendid opportunity for a first initiative on the part of the Organization for Economic Cooperation and Development. I therefore urge it and suggest it for that reason.

Mr. President, in closing I state what I said when I began: I feel a responsibility to speak not because I have been involved so intimately in the affairs of Latin America but because I have been involved most intimately in the affairs of Western Europe, through my work in the NATO Parliamentarians' Conference and, before that time, when I was a Member of the House of Representatives, as chairman of the Subcommittee on Foreign Economic Policy.

I feel, from what I know of the situation, that the time is ripe. I feel that the Committee of which I have the honor to be Chairman, because the Senate sent me to the NATO Parliamentarians as a delegate, has an unusual opportunity to carry the initiative forward. I suggest it now so that it may be an additional inducement to the early ratification of and the early operation of the Organization for Economic Cooperation and Development by all the countries which have adhered to it.

CREATION OF NEW JOBS IN IDAHO

Mr. DWORSHAK. Mr. President, State legislators in my home State think Idaho's climate must be a vital concern of each citizen.

Climate to Democrats and Republicans of the recently completed 36th session meant more than rainfall or days of sunshine. They studied a special kind of climate—the business climate. It

drew serious bipartisan attention. Our legislators concluded that attitudes and decisions which build an unfavorable business climate could deter job-creating businesses from expanding or coming to the Gem State.

Faced with these challenges, Democrats and Republicans, much to their credit and farsightedness, recognized that Idaho competes with other States for product markets. In their deliberations they did not turn, as is now the vogue, to the Federal Government for preferential treatment or subsidy. Instead they adopted unanimously a resolution which promises, among other things, fair legislative treatment for business, equitable tax policies and fair decisions for all in labor-management relations.

I am proud of the State legislators of my State for this action. This sort of an awareness of the factors which encourage or discourage business and industry will be beneficial to Idaho.

Only when there is recognition of what high taxes and punitive laws and regulations can do to retard development can the forces of progress make real headway. The actions and intentions of the Idaho legislators should have a good effect upon improvement of the business climate of our State. The growing legion of paternalistic planners who are ever increasing their control over every facet of our American life would do well to read and to heed this resolution of the Idaho State Legislature.

Mr. President, I ask unanimous consent to have the resolution printed in the RECORD at this point.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION RELATING TO THE CREATION OF NEW JOBS IN IDAHO

(Senate Concurrent Resolution 9, p. 15, Senate Journal, Feb. 14, 1961)

Whereas good business climate is hereby defined as follows:

1. Fair and equitable treatment in general legislation and administrative regulation for all segments of Idaho's economy.

2. A framework of government the support of which adds no greater cost to doing business than the cost of government imposed by other States of similar industrialization and favorable climate.

3. Equitable tax policies and restriction of the cost of government to reasonable levels.

4. Fair treatment for all in legislation and administration of labor-management relations affairs.

5. Fostering, in the public interest, an economic atmosphere which will enable Idaho agriculture, forestry, mining and industry to compete for out-of-State markets, remembering that wide marketing of Idaho products brings wealth into the State, thereby raising the standard of living of all our people; and

Whereas during the last 10 years, under its generally favorable business climate, Idaho has attracted some 450 new manufacturing plants and expansions with a capital investment of close to $220 million; and

Whereas for reasons hereinafter set forth, it will be critically important for Idaho to continue to maintain and improve its business climate; and

Whereas Idaho's population is increasing at the rate of about 8,000 persons annually and is expected to reach 720,000 by 1965, when population forecasts indicate Idaho will begin to reach higher growth potentials; and

Whereas the capital investment necessary to provide jobs for the expected 2,500 new workers each year will be in excess of $35 million annually; and

Whereas basic industry broadens the tax base, thereby providing much needed revenues for community facilities and government services for all our people; and

Whereas in this era of rapid industrial expansion and relocation throughout the United States, industries, selecting locations, are vitally concerned about the relative business climate among the States; and

Whereas a favorable business climate attracts needed industrial payrolls; attitudes which build an unfavorable business climate could tend to deter the coming to Idaho of manufacturing plants which, in the relocation process, are free to seek the most favorable locations to themselves elsewhere in the West for serving Western markets; and

Whereas preservation of our good business climate is in the public interest and can be continued without discriminating against any other interest in Idaho: Now, therefore, be it

Resolved, by the Assembly of the State of Idaho (the senate thereof concurring), That this legislature henceforth shall examine all proposed legislation relating to business, industry, and agriculture in terms of its effect upon the business climate of the State, and shall determine whether such legislation may have any future discriminating or deterring effect upon the investment of capital and the creation of needed payrolls in Idaho; and be it further

Resolved, That the members of this legislature hereby request the Governor, the director of the budget, the director of finance, the treasurer, and the director of each department in the State government to examine their own discretionary actions and orders in any way relating to business, industry, mining, forestry, and agriculture in terms of the effect of such governmental action upon the business climate in Idaho; and be it further

Resolved, That the chief clerk of the assembly is hereby directed to transmit suitable copies of this resolution to the Governor, the secretary of state, the director of the budget, the treasurer, and to each director or head of every department in the government of the State of Idaho.

PROGRESS REPORT ON NEW DISTRICT OF COLUMBIA STADIUM AND APPOINTMENT OF MR. JAMES FRANCIS REILLY TO DISTRICT OF COLUMBIA ARMORY BOARD

Mr. BIBLE. Mr. President, on October 1, 1961, the country's newest and most modern stadium will be opened in Washington, D.C., to serve not only for sports contests but also as a site for civic, political, religious and other events, both local and national in scope.

Over the past 38 years many Members of Congress, some of whom still serve with distinction in the Senate, and many of Washington's outstanding civic leaders, have worked long and hard to build a stadium befitting the Nation's Capital City. Today, as chairman of the Senate Committee on the District of Columbia, I wish to make a report on this project in which Congress has played such a key role.

On Wednesday, March 29, the Honorable James Francis Reilly, a prominent Washington, D.C., attorney and civic leader, was appointed to the District of Columbia Armory Board by the Honorable JOHN MCMILLAN, chairman of the House Committee on the District of Columbia, and myself. In accordance with custom, Mr. Reilly is expected to become Chairman of that Board, which administers both the armory and the new $20 million stadium. Other members are the President of the District of Columbia Board of Commissioners, Walter Tobriner; and Maj. Gen. Harry Abendroth, commanding general of the District of Columbia National Guard.

I ask unanimous consent to have printed in the RECORD a statement issued by Representative MCMILLAN and myself at swearing-in ceremonies for Mr. Reilly in the Old Supreme Court Chambers of the Capitol on March 29; a summary of facts and figures about the new 50,000-seat stadium, showing background information and facilities it will offer to everyone; an editorial from the Washington Evening Star of March 31.

There being no objection, the statement, summary, and editorial were ordered to be printed in the RECORD, as follows:

JOINT STATEMENT BY SENATOR ALAN BIBLE, DEMOCRAT, OF NEVADA, AND REPRESENTATIVE JOHN L. MCMILLAN, DEMOCRAT, OF SOUTH CAROLINA, CHAIRMEN OF THE SENATE AND HOUSE COMMITTEES ON THE DISTRICT OF COLUMBIA, OLD SUPREME COURT CHAMBERS, U.S. CAPITOL, MARCH 29, 1961

This forum has a dual purpose this morning. First, the chairmen of the Senate and House Committees on the District of Columbia desire to make a joint announcement of their selection of the Honorable James Francis Reilly, prominent Washington, D.C., attorney, as a member of the District of Columbia Armory Board.

Secondly, many of Mr. Reilly's friends, District of Columbia officials, such as President Walter Tobriner of the Board of Commissioners, and his colleagues on the Armory Board, have come to do him honor by witnessing his swearing-in ceremonies.

Mr. Reilly will succeed Mr. Floyd D. Akers, who resigned recently from the Armory Board, after a 10-month term and after 17 years of civic activity in helping the planning and construction phases of the new 50,000-seat stadium, which is to be opened this fall for Washington and the country.

Jim Reilly is not a newcomer to Washington, coming here originally in 1928 as a law student and remaining to raise a fine family and practice law. He was an assistant corporation counsel for the District and served with distinction as executive assistant to the Chairman of the Civil Aeronautics Board. He won appointment by President Franklin D. Roosevelt as a member of the District of Columbia Public Utilities Commission in 1944, returning thereafter to the private practice of the law.

Over the years, he has given of his time and talent in civic, political, educational, and charitable activities to this city, its people, its local government, and to the Federal Government as well. Less than 2 months ago, he was general chairman of the first annual St. John's scholastic indoor track and field games at the National Guard

Armory, helping 750 youngsters from 50 area schools to become better athletes today and better citizens tomorrow.

It is a real pleasure for both chairmen of the Senate and House Committees of the District of Columbia to make this appointment and to express the hope that Mr. Reilly becomes Board Chairman in accordance with custom.

It will be the task of Mr. Reilly to assist his fellow Board members in overseeing the final construction phases and initial operation activities of this great stadium, the country's newest and most modern. This structure will be a real asset in many ways to the life of this great Capital City and will mark another step in making Washington, D.C., the showplace of democratic government in the free world.

WASHINGTON, D.C., PRESENTS ITS NEW $19,800,000 STADIUM

Stadium site: Located adjacent to the District of Columbia National Guard Armory at 2001 East Capitol Street, Washington 3, D.C. Telephone Lincoln 7-9077.

Parking: Parking area of 92.2 acres with facilities for 12,500 cars, 300 buses and 200 taxis.

Dimensions: The stadium covers a total of 10 acres, of which the playing field constitutes 3½ acres. The structure itself occupies the remaining 6½ acres. Playing field surface measures 340 feet to left and to right field foul poles, 425 feet to center field.

Seating capacity: 50,000 for football; 43,500 for baseball. Every seat will provide an unobstructed view of the entire field. Design of the stadium provides an original seating arrangement to furnish maximum utilization for multipurpose use. This is accomplished through the ability of a section of the lower stands to be rotated, thus making 80 percent of the total seats adjacent to the foul lines for baseball and 50 percent of the total seats along the sidelines for football. All seats will be theater type and will average 20 inches in width for complete comfort; 60 percent of the seats will be under cover.

Cost: $19,800,000—construction financed through bonds issued under the authority of the act of Congress known as the District of Columbia Stadium Act of 1957, as amended. The bonds are guaranteed both as to principal and interest by the U.S. Government.

Management: The District of Columbia Armory Board, a three-member, policymaking body, was authorized by Congress to build, operate and maintain the stadium. The Armory Board Manager, Arthur J. "Dutch" Bergman, handles all details of the stadium operation and is responsible to the Board.

Scoreboard: The most modern and complete scoreboard for both baseball and football. Board includes a novel "Magic-Message" center which is controlled electronically. Scoreboard to be 369 feet long and 40 feet high. Two auxiliary boards will also be used for football and baseball.

Lighting: Batteries of floodlights to deliver 200 foot-candles of light to the infield, and a uniform 150 foot-candles of light to the outfield and for football.

Concessions: A total of 26 concession stands, conveniently located throughout the stadium, will be capable of handling capacity crowds.

Public restrooms: 45 restrooms, for men and women, conveniently located throughout the stadium, on all levels.

Gates and ticket booths: 48 turnstiles, 7 gates, 14 pairs of ramps, 3 passenger elevators and 1 freight elevator. Full capacity of the stadium can be cleared out in 15 minutes. Twenty-four ticket booths, all serviced by pneumatic tube carrier service.

Dressing rooms: Modern dressing rooms will provide every convenience for athletes and performers.

Press facilities: For baseball: a 155-foot press box and a 150-foot photographers' platform located behind the home plate area.

For football: a 125-foot press box and an 80-foot photographers' platform located adjacent to the 50-yard line area.

In addition, broadcast booths are provided for both baseball and football. All accommodations to be enclosed in glass and to provide facilities for press, radio, newsreel and television personnel and their equipment.

Ideal location—

By helicopter—special landing pad in stadium area.

By boat—via Anacostia River to stadium docks, being planned for future development.

By car—just minutes from practically anywhere in the Washington area.

Minutes from Union Station and airport.

This new, ultramodern stadium will be the home of the Washington Senators, the Washington Redskins and George Washington University Colonials. It will provide needed facilities for all major athletic events including football, baseball, boxing, wrestling, as well as for circuses, music and folk festivals, civic and national affairs, religious functions and all other large-scale events.

[From the Washington Evening Star, Mar. 31, 1961]

ARMORY BOARD SHIFT

The selection of James F. Reilly to succeed Floyd D. Akers on the District Armory Board assures a continuity of competent management for two important enterprises of special interest to sports fans as well as to the general public, namely, the armory and the new $20 million stadium nearby. The chairmen of the Senate and House District Committees deserve commendation for their choice of the only appointed member of the Board.

Mr. Akers wisely withdrew from the Board because of a conflict of interests that would result from his financial stake in the Washington Baseball Club, which is negotiating for use of the stadium next season. He leaves behind a record of substantial achievement in behalf of the stadium, of which he was one of the pioneer advocates.

Mr. Reilly, an attorney well known in local trade, civic, and sports circles as well as in the legal profession, will serve with two ex-officio members, District Commissioner Tobriner and Major General Abendroth, Commander of the District National Guard. The trio will have much work to do in the immediate future, for it will be the Board's responsibility to complete the stadium and negotiate contracts for its use. Mr. Reilly's legal experience should be of considerable value in these undertakings.

FALL OF BATAAN

Mr. HUMPHREY. Mr. President, this coming Sunday will be the 19th anniversary of the fall of Bataan. To commemorate it, the Board of Commissioners of the District of Columbia is naming two streets near the Philippine chancery, "Bataan" and "Corregidor."

Man's brotherhood to man was never more clearly demonstrated than on that little peninsula and that little rock where the American and Filipino people fought side by side in a common cause—the cause of freedom.

Bataan and Corregidor—how strange those names seemed to us in those dark days in 1942. They became, however, the bloody corridors to freedom and showed the world the great adherence to the ideals of democracy and freedom of the Filipino people.

The military defeat of Bataan was overshadowed by the symbolic spiritual victory of that battle.

After the war in the Pacific came to an end, the United States redeemed its pledge of freedom and independence for the people of the Philippine Islands. This was the beginning of the march to freedom of formerly subject peoples in Asia and Africa in the postwar period.

Bataan and Corregidor will always remain as a symbol of brotherhood, freedom, and the dignity of man.

Mr. HILL. Mr. President, Sunday, April 9, will be the 19th anniversary of the fall of Bataan. Commemorating Bataan Day this year, the Board of Commissioners of the District of Columbia will name two streets near the Philippine Chancery "Bataan" and "Corregidor." This action will memorialize our common history and will symbolize the spiritual brotherhood of Filipinos and Americans. For this and more we are grateful.

The people of the Philippines and the United States have stood steadfastly together in war and in peace; dedicated to liberty and freedom; loyal to the ideals of democracy. Together, we bear a sacred obligation to those who suffered and died at Bataan. To their memory, we must face the future unafraid. We must labor resolutely and courageously, as they did, and ever be true to the cause of liberty whenever it is threatened.

We shall not soon forget the struggle of those brave men at Bataan and Corregidor. The days were dark in war. Japanese invaders bombed Luzon in December, and less than a month later Manila and Cavite fell. In the face of overwhelming might Maj. Gen. Jonathan M. Wainwright commanded and entrenched his few thousand troops for an heroic holding action along narrow Bataan Peninsula which overlooks Manila Bay.

After 4 tortuous months, our men were reduced to less than one-fourth rations. Their ammunition was exhausted and they had hardly any artillery. A large number were barefooted and clad only in rags. Wounds, disease, and sheer fatigue plagued them until less than half were capable of walking any distance. Only then did the weary men of Bataan, in the words of their commander, surrender to the superior force of the enemy—superior only in numbers and equipment but not in courage or in morals or in devotion to the cause they were defending.

Bataan Day is a time of deep significance—a national memorial. We are proud and honored to share in its observance with the people of the Philippines. Yesterday perhaps the people of the Philippines depended more on us. But tables turn. Today grave problems in Asia and Africa challenge our utmost wisdom, courage, imagination, and vision. Our common devotion to liberty and freedom is still at stake. Fortu-

nately, our friends of the Philippines are with us to the task.

In honor of Bataan Day, 1961, I commend to the attention of the people of both nations a splendid, inspiring article of a great statesman and stanch friend of the United States, Gen. Carlos P. Romulo, Philippine Ambassador to the United States. Few, if any, could write of Bataan with deeper feeling; for General Romulo was General MacArthur's aide-de-camp in Bataan, Corregidor, and Australia. He returned to the Philippines with the U.S. forces that landed in Leyte. But in his article "The Victory of Bataan," General Romulo writes not to the past; his call is to the future. I strongly commend to the American people the words of the brave and the valiant, the gallant Carlos P. Romulo.

Mr. President, I ask unanimous consent that General Romulo's article be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE VICTORY OF BATAAN

(By Gen. Carlos P. Romulo, Philippine Ambassador to the United States)

Sunday, April 9, is the 19th anniversary of the fall of Bataan. To commemorate the event, the Board of Commissioners of the District of Columbia decided to name two streets near the Philippine chancery "Bataan" and "Corregidor." At the official naming ceremony which will take place at 3:30 in the afternoon, Secretary of State Dean Rusk will deliver the main address.

That Bataan and Corregidor should thus be remembered in the Capital City of the United States recalls the inner meaning of the blood brotherhood between the American people and the Filipino people that was sealed on that little peninsula and on that little rock whose names are enshrined in the histories of both our countries.

Bataan fell but its fall was really a victory. It was the victory of the human spirit. It was such a victory because it was a strange and wonderful symbol of what the 20th century could mean to the human race. Ever since those terrible days of 1942 we have been aware of this symbolism. It does no harm to repeat it now—because, like all great verities, it seems to acquire new truth each time it is repeated.

We recall the victory of Bataan: The demonstration to the whole world that people of different races, different origins, different backgrounds, have a common cause in liberty. That the old and despicable balance of mastery and slavery, of colonial power and subject nation, can be wiped out in a spirit of mutual trust and respect. That the man of the West and the men of the East can face a common foe in absolute and unquestioned equality.

That was the victory of Bataan. It sealed the bond of friendship between Filipinos and Americans—a bond already established through the long years that led up, before the great war came, to the guarantee of national independence. As the long shadows of military defeat fell over those Filipino and American warriors in the tropical night in Bataan, the victory of the free spirit hovered overhead. It foretold the irreversible march of nationalism in Asia and Africa, the massive and exciting roster of nations that would quickly win their freedom in the years to follow—India, Pakistan, Burma, Ceylon, Indonesia, and all the others.

The victory of Bataan showed the way. It was important in time of war. It is even more important now. For we can now place the troubled problems of relationships between nations against the background of the lesson we taught ourselves on Bataan. Today we are faced with a new menace.

We are really still fighting the battle that we fought on Bataan. It is a new threat, this menace of imperialistic Communism. We see it in Laos, in South Vietnam, in Berlin, in the Congo, even in the august halls of the United Nations. And under the leadership of President Carlos P. Garcia, we are meeting it in the Philippines with the same determination and the same courage that we showed in Bataan 19 years ago.

Asia and Africa are afire with nationalism. This powerful force, which in a different incarnation gave Europe its bloodiest centuries and its most magnificent civilizations, can now do the same, one or the other, in the rich and vast continents peopled by human beings in the millions. American survival and that of freedom itself depends on the capacity of the people of the United States to recognize what is happening in the world; and, having recognized the nature of the upheaval, on the ability of American leadership to act with wisdom and imagination.

To us in the Philippines and to you here, Bataan is a symbol of the bond between us. Bataan is of the past; but the bond lives, and must never be shaken. And today we look to America for more than maintenance of that bond. It may be a natural human impulse to pay closest attention to those who waver than to those who are trusted; to give greater help to the uncertain, the uncommitted, than to the committed, to take stanch allies for granted. But it may be good to remember that this impulse, however human, does not always coincide with the realities of world affairs. Bataan should always stand as a reminder of the continuing mutuality of Philippine-American friendship.

So today, in 1961, we Filipinos and Americans recall the symbolism of Bataan—the spiritual victory that makes the military defeat look puny—and in the remembrance of that great moment in our common history we have the right to stand side by side through all the years to come, certain of the rightness of our cause and the timelessness of our friendship.

(EDITOR'S NOTE.—General Romulo was General MacArthur's aide-de-camp in Bataan, Corregidor, and Australia and returned to the Philippines with the U.S. forces that landed in Leyte.)

Mr. HUMPHREY. Mr. President, will the Senator yield?

Mr. HILL. I yield.

Mr. HUMPHREY. I am delighted that the Senator from Alabama has commented as he has upon General Romulo. I have never known a man more dynamic and enlightened in his expression and in his interpretation of the affairs of the world than Carlos Romulo. He is a great friend of the American people, and he is a great leader of his own country. He is a giant for freedom. He has a magnetic and magnificent personality. The Senator from Alabama has appropriately commended him. I did not want this occasion to pass without joining in that commendation.

Mr. HILL. I thank the Senator for his very kind and generous words. As the Senator said, General Romulo is a great champion of and fighter for freedom as he was a great fighter at Bataan and Corregidor, and in Australia. He came back with the American forces to Leyte. When I think of General Romulo—and I have told him this—I am reminded that Napoleon Bonaparte said that when he saw Marshal Ney, he felt braver. When I see Carlos Romulo, I feel braver.

NUCLEAR TEST NEGOTIATIONS

Mr. HUMPHREY. Mr. President, I wish to address myself to the subject of the Geneva nuclear test negotiations which are underway at Geneva, Switzerland. I do so in my capacity as chairman of the Subcommittee on Disarmament of the Senate Committee on Foreign Relations, and as one Senator who has long been interested in this important, yet complex, and at times very stressing, series of negotiations.

On March 21, 1961, the United States resumed negotiations with the United Kingdom and the Soviet Union for the discontinuance of nuclear weapons testing. These negotiations, which began in October 1958, have covered some 280 meetings, three technical working groups, and scores of informal sessions.

In 1958 it was my privilege to attend some of the meetings in Geneva. I noticed in today's press that Vice President JOHNSON is in Geneva with the Senator from Tennessee [Mr. GORE] and others, who are visiting in Geneva and working with our negotiator, Mr. Arthur Dean, in the effort of our country to arrive at a satisfactory agreement. Before many weeks have passed we shall know whether a treaty with the Soviets is at all possible. We shall know whether nuclear weapons testing shall cease for the duration of that treaty. We shall know whether a first step toward the reduction and control of armaments shall have been taken.

The United States negotiating team is well prepared and is determined to conduct serious negotiations.

I commend the President on his selection of Mr. Arthur Dean, one of the outstanding legal minds of our Nation, as our chief negotiator. Prior to Mr. Dean's departure for Geneva, I had the privilege of discussing with him our negotiating program or our articles of negotiation. I believe that we are better prepared at this time for serious negotiations than at any time in recent years.

The position of the United States on all unresolved questions before the conference is being communicated promptly to the Soviet Union and, of course, to our ally, Great Britain. In fact, our proposals and our position on these unresolved questions of the past year have been arrived at in close consultation with Great Britain. If the Soviet Union wants a treaty and is prepared to accept a control and inspection system, the Soviet representative at the test ban talks will find the United States and Great Britain receptive. We are sincere in wanting to get down to business, and we want to complete the drafting of an acceptable treaty.

If, however, the Soviet Union elects to follow a tactic of stalling—and, regrettably, this now appears to be the case—of refusing to agree on a system of inspection and control, and of shifting its

position, as it has, by proposing a tripartite administration with built-in veto, then we shall know that once again a first step toward disarmament has been snatched from our grasp. If the Soviet Union follows this tactic, nuclear testing may well be resumed. Nuclear testing may be resumed not only by the Soviet Union, the United States and the United Kingdom. It will be continued by France. It may be begun by Communist China, and perhaps a half dozen or so other powers which are able to achieve a nuclear weapons capability.

I do not believe that any person ought to dismiss the possibility that within the very near future Communist China will have the technical capacity and know-how to develop a nuclear weapon. The day that Communist China has its own nuclear weapon factories will be the day that the peace of the world will definitely be threatened, if not destroyed. Therefore, the problem of trying to arrive at an agreement to stop further nuclear weapons tests is not merely a problem of convenience as between ourselves and the Soviet Union, but it relates directly to the survival of mankind.

I shudder to think what would happen in this world if the leaders of Communist China and some of the leaders in the Middle East who brandish their weapons rather readily were in the possession of nuclear weapons. I shudder to think what would happen if Mr. Castro had nuclear weapons. These weapons are dangerous in the hands of any nation. They become unbelievably dangerous in the hands of capricious dictators.

The whole world ought to be shocked at the position now taken by the U.S.S.R. on the Administrator for the test ban control organization. The Soviets had last year agreed with the United States and the United Kingdom that "the Administrator shall be the chief executive officer of the system and head of the staff of the control organization."

That was an agreed-upon provision in the draft of the treaty.

The Soviets propose an administrative council composed of three administrators; one representing the United States, the United Kingdom and its allies, one representing the Soviet Union and its satallites, and one representing neutral states. According to the new Soviet view, the three administrators would have to be in unanimous agreement before decisions could be made and carried out.

This is the veto in new clothing. It is completely unacceptable. I cannot imagine the Senate approving a treaty with such a provision contained in it. What is more, I cannot imagine our negotiators ever agreeing to such a provision. As one who has been keenly concerned with and interested in this subject of nuclear test suspension and who has advocated it under proper safeguards of inspection and control, I wish to make my position quite clear that any draft treaty with an administrative organization such as proposed by the Soviet Union in recent days is totally unacceptable. It would be a fraud, and it would indeed endanger the very safety of the United States and the free world.

If this is the position the Soviet Union plans to maintain in the test ban and all other disarmament negotiations, then the Soviet Union is saying, in effect, it is really not interested in any type of disarmament or even in steps leading to disarmament.

I might add that this is about the same position the Soviets are taking with respect to the United Nations itself and the office of its Secretary General. They are seeking to abolish the single officer, namely, the Secretary General, and to set up, instead, a committee of three to take on the administrative and executive responsibilities of the office of the Secretary General.

The Soviet Union knows that this is a completely unacceptable proposal in the United Nations and in the disarmament control mechanism. I brand them with plain stalling and using tactics to delay and to confuse. I hope their representatives will give some careful reconsideration to this type of activity in which they are now engaged.

Let the world know that if these test ban talks fail because of the Soviet Union's intransigence, and because of the Soviet tactics, then the responsibility for the arms race and its continuance will rest squarely upon the leadership of the Soviet Union, and, all of their peace talk to the contrary, the arms race and the threat to the peace of the world is the responsibility of the Soviet Union and due to the impatience of their leaders.

Mr. President, many of us have worked hard for several years trying to persuade the nuclear powers to take a first step toward curbing the arms race. We must have continued patience. We shall continue to seek progress toward reducing and controlling the world's arms.

But patience does not include sitting indefinitely at the negotiating table under conditions of an unmonitored and uncontrolled moritorium on all nuclear tests, including even tests for research on detection and for peaceful purposes. If the United States is forced to renew nuclear testing, the fault will lie squarely at the doors of the Kremlin. The recent Soviet conference table filibuster on nuclear test cessation proposals is irresponsible and dangerous. Let the world know that fact.

I trust that the recent Soviet tactics of retrogression and of filibustering are a temporary aberration. Perhaps the Moscow winter has been unduly severe. Perhaps the crisis in Soviet agriculture has gotten the better of Mr. Khrushchev. Perhaps the Soviet hierarchy once again has found itself unable to allow even a little opening up of its territory which the modest control and inspection system for an agreement would entail. It is difficult for me to think the present Soviet position, against concluding an early test ban agreement and thus forcing the resumption of tests, is one that would command the support of the Soviet people.

There is no hope for any kind of disarmament unless we can at least take the first step of an inspected nuclear test cession treaty. If we cannot take that step, then the talk of disarmament is an exercise in futility.

My hope—and I believe the hope of my fellow citizens—is that the Soviet Union, the United Kingdom, and the United States will succeed in drafting a treaty to end nuclear weapons testing. Such a treaty, if carried out in good faith according to its letter and its spirit, would demonstrate that it is possible to combine steps involving the reduction of arms with steps involving effective control and inspection.

Let us make no mistake about it, Mr. President, there can be no disarmament, there can be no reduction of armaments without inspection and control because the element of trust has been destroyed by the activities of the Soviet Union and its leaders. We must build a system that is the alternative to trust; namely, a system of inspection and control. We must substitute a mechanism for that quality which makes treaties likely of their fulfillment—trust and confidence.

The world has been stymied on this point since the end of World War II—almost 16 years. To achieve success on this difficult and delicate task would inspire us to seek other arms reductions and control measures.

The United States has entered the present negotiations prepared to reach agreement. I know of what I speak, because it was my privilege to be briefed and to be fully informed as to the position of the United States at the conference in Geneva.

I repeat that we went to the conference prepared to negotiate every single item in the draft treaty. For the first time, every unresolved point had a position taken upon it by the U.S. delegation. Every position that was in controversy in preceding negotiations was reviewed, and a new U.S. position on it was established. We have unfolded our position to the Soviet Union. We have kept nothing back. We have attempted to put on the conference table every unresolved point. We are seeking accommodation with the Soviet Union on these points. The United States has entered these negotiations in order to reach agreement, but the United States will not, must not, and cannot seek agreement that would have such loopholes as to invite cheating with impunity. Any agreement—and the Soviet Premier knows this—in fact, I had an opportunity of telling him so 2½ years ago, and it has been stated repeatedly by responsible officials of our Government—must receive the support of two-thirds of the U.S. Senate. Such support will only come if the treaty contains effective safeguards.

The control system now being sought by the United States does contain safeguards. I wish the RECORD to show the safeguards for study by the American people and Members of Congress.

First. One is that there would be placed in the Soviet Union several con-

trol posts, equipped with sensitive instruments, to record phenomena which might be nuclear explosions. Control posts would also be located eventually in all parts of the world. These control posts would also be able to record events in the Soviet Union.

Of course, such control points would also be located in the United States and in other parts of the world.

Second. A second safeguard is that there would be allowed several on-site inspections per year in the Soviet Union, in the United States and in the United Kingdom, to check a suspicious event, to determine whether it was or was not a nuclear explosion. Any inspection system which does not provide on-site inspection cannot possibly be effective.

Third. A third safeguard is that the majority of the technical personnel at the control posts, at the headquarters of the control system, and on the inspection teams will not be nationals of the country being inspected and controlled. In other words, there would not be self-inspection.

Fourth. A fourth safeguard is that the personnel of the control system would not be hampered in the pursuit of their duties. If they were hampered, this would be grounds for abrogation of the treaty. The personnel are to have rights of movement similar to all diplomatic agents. They are not to be prevented from going immediately to the site of a possible nuclear test, if the instruments of the control posts indicate such an event may have taken place.

Fifth. A fifth safeguard is that the control organization will not be hampered by a veto. Decisions of the control commission will be made by simple majority vote, except in a few cases, to be stated in the treaty, where the United States, and the United Kingdom, and the Soviet Union have agreed either on unanimity or to a two-thirds majority. The United States, I know, will not budge from this position. We shall not condone the use of a veto in the day-by-day operations of the control system.

Sixth. A sixth safeguard is that the control organization will provide for a research program for the improvement of techniques in the detection and identification of nuclear explosions and natural phenomena. Furthermore, the treaty will provide that the results of research can be incorporated into the control system.

Seventh. A seventh safeguard is that if countries such as France and Communist China do not sign the treaty and abide by its obligations, the United States would be freed thereby of its obligations to refrain from nuclear weapons testing.

In listing these safeguards I would not want Senators to think that it is possible to have a 100-percent foolproof or cheat-proof system to monitor the cessation of nuclear weapons tests. We must face the fact that no such perfect system is presently possible, given the present state of technology in detection and the fanaticism of the Soviets towards secrecy and their fear of an open society. On both these counts, however, a test ban treaty could improve the situation. A treaty offer opportunity for increasing our knowledge of detection. A test ban treaty could also contribute to breaking down the wall of secrecy and suspicion which surrounds so much of Soviet thinking and action.

Yes, I agree, a test ban treaty would contain some risks. There is the possibility that the Soviet Union might conduct a nuclear test and not be detected. Still, what neither the U.S.S.R. nor the United States knows is whether such a test might be detected by the control system or by methods of conventional intelligence. The risks of cheating occur for both sides; our side in not catching the violator, the Soviet side in getting caught.

We must also make judgments about how much our own security would be weakened if the Soviets tested one, two, or a few nuclear devices without getting caught. One sneak test would not necessarily alter the military balance of power, but the expansion of nuclear weapons to other nations surely would alter the balance of power. The expansion of nuclear weapons to other nations, such as Communist China, the United Arab Republic, Cuba, and indeed to all other nations, certainly would alter the balance of power.

The Test Ban Conference is an opportunity for the major powers to demonstrate they have a mutual interest in limiting their weapons, of slowing down the arms race, of being willing to accept international controls. For my part, I am satisfied that the position to be followed by the United States is sound and is reasonable.

Mr. President, I have made this statement after a very careful analysis of our proposals. In fact, I had intended to make a statement on this subject on the 21st of March. I have checked my information carefully with the responsible officials of this Government. I want to see a workable treaty, having safeguards. I feel that it is the only possible way to alter or to check the spread of nuclear technology for weapons purposes.

I have the feeling that we are actually at high noon at Geneva in the nuclear test cessation conference. The Soviet Union has again applied the kind of brinksmanship, as characterized by Mr. Harriman the other day, which really threatens the peace and security of all mankind. It is about time that the United States of America spoke openly, fearlessly, and frankly about these matters. We have gone to the conference prepared to negotiate—indeed, to compromise. We are finding that the conference is being used as a part of a total diplomatic maneuver on the part of the Soviet Union—including Berlin, Laos, the Congo, Geneva—all over the world. The Soviet Union understands straight talk. That is all it understands. The straight talk needs to come not only from the executive branch of our Government, as it is coming, but also from Congress. It should not be talk which is belligerent in nature, because this Senator seeks reconciliation, seeks an agreement with proper safeguards and controls. I do not seek to have a proliferation of these weapons or an expansion of them. I seek to halt the arms race before it consumes us.

But I must say that this result cannot be achieved by us alone. It requires that the peace-loving peoples of the world bring whatever pressure they can upon the great powers to come to an agreement. The peace organizations of America must speak up fearlessly, not only to our own Government, as they do so repeatedly, but also to other governments, particularly to the Soviet Union. The Soviet Union is today bargaining with the future of mankind, and it is bargaining recklessly. I wish the people who believe in the cause of peace to understand what is taking place. I am hopeful that in the weeks ahead, after a careful reexamination of the American proposals and the British proposals, the Soviet delegates at Geneva will receive instructions from their home office at the Kremlin, as they always do, to bargain in good faith. If they do that, then much of the talk about easing world tensions will at least have its first possible chance of success.

COMPETITIVE TRANSPORTATION RATEMAKING

Mr. HARTKE. Mr. President, I have cosponsored Senate bill 1197, to amend the Interstate Commerce Act with respect to the rule of ratemaking where competition between carriers of different modes of transportation is involved.

I believe the interest of all segments of American transportation is best served when the letter and the spirit of the national transportation policy is vigorously pursued. S. 1197 would implement the Interstate Commerce Act to provide strict adherence to that policy. It is pronational transportation policy. It is not "anti" any mode of transportation. Substandard rates do not create advantages for any carrier. They deny to carriers the revenues to which they are entitled for the services they provide. They deny to competitors revenues because of destructive competition. I support S. 1197 because it aims to restore economic and competitive balance to our transportation industry.

I support S. 1197 because it will:

First. Clarify section 15(a)3 of the Interstate Commerce Act to state more concisely the philosophy of competitive ratemaking which was the will of Congress when passing the National Transportation Act of 1958.

Second. Require the ICC to consider the "value of services" in determining rates, as the Commission had traditionally done.

Third. End any destructive rate policies of various modes of transportation which have arisen since the 1958 Act was passed.

Fourth. Provide more just compensation to all forms of transportation by setting rates to consider value of services they perform.

There is evidence that the bill has been misinterpreted, either innocently or intentionally, by some people who believe it would force the ICC to discriminate unjustly against one or another mode of transportation when establishing competitive rates. The bill is intended to supplement the national transportation policy and restore this policy as the guiding standard by which all decisions relative to competitive practices in transportation are judged. In other words, the intent of the bill is to be fair and impartial.

The national transportation policy provides that a national transportation system by water, highway, and rail, adequate to meet the needs of the commerce of the United States and its national defense, be "developed, coordinated and preserved." It provides for fair and impartial regulation of all modes of transportation, administered so as to recognize and preserve the inherent advantages of each; for the promotion of "safe, adequate, and economical and efficient service"; for the fostering of "sound economic conditions in transportation and among the several carriers."

When the Interstate and Foreign Commerce Committee considered the National Transportation Act of 1958, many suggestions for changes were made.

Outstanding among the proposed revisions in the rate standards were the so-called three shall-nots. These suggested that the Interstate Commerce Commission in passing upon the reasonableness of rates "shall not consider the effect of such rates on the traffic of any other mode of transportation; shall not consider the relation of such rates to the rates of any other mode of transportation; or shall not consider whether such rates are lower than necessary to meet the competition of any other mode of transportation." The Committee on Interstate and Foreign Commerce unanimously rejected this proposal and emphasized a statement of the Subcommittee on Surface Transportation in support of their action.

The subcommittee held that—

> The national transportation policy is clear * * * that such ratemaking (if competitive forms of transportation) should be regulated by the Commission to prevent destructive practices on the part of a carrier or group of carriers.

In competitive transportation ratemaking, there is a policy and a pattern established from years of experience and periods of trial and error. When carriers have been allowed to deviate from historical concepts in making rates, the gains have been short term and short lived. Rate structures which do not adhere to the historical pattern seem more vulnerable to evasion and abortion than those which follow the time tested standards. Many times they fail of their own weight and inadequacies.

A practice which has grown up since the passage of the National Transportation Act of 1958 is the use of an "all-freight" rate for shipment of goods by the several forms of transportation. Since items of freight which would travel at a relatively high rate are mixed by a carrier with those that travel relatively cheaply, a median rate has always seemed acceptable.

When a carrier sets an all-freight rate that is unreasonably low, it is open to abuse which is damaging to the carrier who moves the freight at a less satisfactory compensatory rate. It also is damaging to other competing modes of transportation.

It is a matter of record, for example, that a carrier has set all-freight rates for movement of mixed loads which are so low that the only freight moving more cheaply is bulk waste products. These mixed loads might easily include commodities or goods which are of an extremely high classification.

A good example was when ICC Hearing Examiner G. A. Dahan in his report of docket No. 32533 condemned the practice of a railroad which had established an all-freight rate for class 3 and class 4 "piggyback" service that was so low that the only products which would be moved in full carload shipments at similar or lower rates were 10 of the 12,000 classified commodities such as lime sludge; lead or zinc mine refuse; sand, slag or gravel NOIBN—"not otherwise indexed by name"—tailings of iron ore with no value for further metal extraction; and various other low-grade stone and gravel commodities, all shipped in bulk with high weight minimums.

Indeed the railroad services are minimal. They furnish only route and power, but when shippers can move high-grade articles that are rated class 100 or better in boxcar service at ratings lower than those assigned to low-grade bulk commodities, I believe the railroads are losing revenue that should be theirs. And they are not losing it to competitors; they are losing it to substandard rates.

Destructive competitive practices are dangerous to all forms of transportation—those using the low rates to attract business and competing forms which suffer loss of traffic because of the competitive rates. S. 1197 is necessary to restore the competitive balance which is essential to the preservation and encouragement of our national transportation system and is necessary to insure rates to carriers which are consistent with the traditional "value of services" rate standard. It is urgent that we move to restore the competitive and economic stability to our transportation industry.

EXECUTIVE SESSION

Mr. HUMPHREY. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

The PRESIDING OFFICER (Mr. HICKEY in the chair). The nomination on the calendar will be stated.

The Chief Clerk read the nomination of Wilbur J. Cohen, of Michigan, to be an Assistant Secretary of Health, Education, and Welfare.

Mr. HUMPHREY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The Chief Clerk proceeded to call the roll.

Mr. HUMPHREY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUMPHREY. Mr. President, on behalf of the leadership on this side and in the committee, I wish to make a statement concerning the nomination of Dr. Wilbur J. Cohen. The nomination was considered very thoroughly by the Senate Finance Committee, and was reported favorably by it, with—as I understand—only one opposing vote in the committee.

Dr. Cohen was connected with the Federal Government for some 21 years. He served with the Social Security Administration and with the predecessor agencies of the Department of Health, Education, and Welfare. In 1956, he left the employ of the Federal Government, of his own volition, and became professor of public welfare administration at the University of Michigan, where he served until his appointment by President Kennedy. In Michigan, he was a member, by appointment of the Governor, of the State board of health and other health advisory committees. He was appointed by President-elect Kennedy to be the chairman of his Task Force on Health and Social Security. Since the latter part of January, he has been serving on a per diem basis in the Department of Health, Education, and Welfare.

I wish to read to the Senate an excerpt from a letter which the Secretary of Health, Education, and Welfare, the Honorable Abraham Ribicoff, wrote to the chairman of the Committee on Finance, in commenting on Dr. Cohen's ability and exceptional qualifications for this position:

> During the first busy month of this administration, Mr. Cohen has been outstanding. His knowledge, ability, and dedication are of the highest. I have discussed him personally with Members of Congress and of the Cabinet who have known him for many years. All of them vouch for his ability, integrity, and sincerity. While there may be sincere differences among Members of Congress and the public concerning Mr. Cohen's philosophy, yet in the final analysis it will be I who will make the policy decisions of this Department, subject of course to the policies established by the President and the laws passed by the Congress of the United States. Mr. Cohen fully understands that within this framework, he will carry out the decisions.

Mr. President, I hope the nomination will be readily confirmed.

I understand that the distinguished Senator from Nebraska [Mr. CURTIS] has comments to make in regard to this nomination.

Mr. CURTIS. Madam President——

The PRESIDING OFFICER (Mrs. NEUBERGER in the chair). The Senator from Nebraska is recognized.

Mr. CURTIS. Madam President, it is true that the nomination of Mr. Cohen received a majority vote in the Finance Committee. However, no yea-and-nay vote was taken in the committee on the nomination. Therefore, I do not believe it quite fair to the members of the committee to have the RECORD show that in the committee there was only one vote against making a favorable report on the nomination. In the committee it was apparent that there was sufficient support of the nomination to report it favorably to the Senate; but there was no yea-and-nay or rollcall vote there. Until such time as the other members wish to speak for themselves, I believe that correction should be made.

Madam President, I have opposed confirmation of the nomination of Wilbur J. Cohen, who has been nominated to be an Assistant Secretary of the Department of Health, Education, and Welfare, because I believe his social security program goes too far, is too extensive, and would be too costly.

First, let me make it abundantly clear that I want our present social security program to work. I believe it should be supported in full faith. I believe that every implied promise concerning a benefit for our people should be kept. I believe there are times and instances when the benefits, or some of them, should be raised. I do not favor extending social security into new fields, such as the proposed medical care for the aged under social security or any form of compulsory health insurance.

Perhaps it would be advisable if we make it clear at the outset how our present system works. It is not a system wherein each person pays for his own benefits and his payments accumulate over a period of years and are kept for him. Rather, it is a system wherein the people who earn are taxed currently to pay a social benefit to other groups, such as our retired aged and widows and orphans. I wish to call attention to the testimony of Mr. Cohen himself, which supports what I have just said. This testimony is found on pages 100 and 101 of the hearings.

Senator CURTIS. Well, now, Mr. Cohen, about what is the social security reserve now?

Mr. COHEN. About $21 billion to $22 billion.

Senator CURTIS. If we closed out the system, which I am not in favor of doing—I want to make a success out of it—would that $21 billion pay out the pensions of the people already on the rolls?

Mr. COHEN. Of the people already, just the people already, on the rolls?

Senator CURTIS. Yes.

Mr. COHEN. I have not looked at that recently, but I do not think it would.

Senator CURTIS. I am sure it would not; and there is nothing in there for the people who are eligible who have not gone on the rolls, is there?

Mr. COHEN. That is correct.

Senator CURTIS. So regardless of high-sounding words and the use of semantics, we have a tax program here that we are taxing the producers currently to pay benefits to another group? Isn't that correct?

Mr. COHEN. That is correct.

A great deal of misunderstanding also exists as to the function of the social security reserve. I do not criticize the investment of the reserve in U.S. Government bonds. If we permitted this reserve to be invested in private securities, the Social Security Administrator might someday control great portions of our business concerns. I wish to point out that my real criticism is that there is no way we can have an adequate reserve. If our reserve is in Government bonds, those bonds must be turned to cash in order to pay benefits. Here again I wish to call attention to the testimony of Mr. Cohen. In a colloquy with the Senator from Illinois [Mr. DOUGLAS] the contention had been made that the interest accumulations of the social security reserve would lower the cost of the program. I wish to call attention to Mr. Cohen's testimony beginning at the bottom of page 128 and extending to page 129:

Senator CURTIS. One question. Mr. Cohen, this trust fund interest income, where will that come from?

Mr. COHEN. Well, the interest has to come, of course, from appropriations for payment of interest on the national debt, made by Congress out of general revenues from the general taxpayer.

Senator CURTIS. Yes; now, do you propose that we pay benefits in bonds or in cash?

Mr. COHEN. Cash.

Senator CURTIS. We have so many bonds in the trust fund. The recipients want cash. To get them cash, you either have to tax the people to get cash to pay off those bonds, do you not, or sell some more bonds?

Mr. COHEN. Right.

Senator CURTIS. Or inflate the money?

Mr. COHEN. I hope not the latter.

Senator CURTIS. So when you go to pay these benefits, would it make any difference whether you have this size reserve fund, or one that measures much bigger? You are going to have to pay it in dollars. The only honest way you get dollars is to tax the people then or to sell more bonds. That is true, is it not?

Mr. COHEN. Yes.

Madam President, the social security taxes are scheduled to go up automatically. There will be a great increase in the social security burdens if we do not add any new programs. I inquired of Mr. Cohen about this, and I wish to quote from his testimony on page 98:

Senator CURTIS. Now, the social security taxes at the presently scheduled rate for 1969 are 4½ percent for employees, and 6¾ percent for the self-employed; is that not true?

Mr. COHEN. At the present time?

Senator CURTIS. No, by 1969.

Mr. COHEN. By 1969, yes sir; that is correct.

We should keep in mind that people of lower income pay social security taxes. The social security tax applies from the first dollar of earnings. There are no personal exemptions. A mother with one child who has an income not to exceed $1,325 pays no Federal income tax. A married couple with two children whose net income does not exceed $2,675 pays no Federal income tax. A family of six pays no Federal income tax if they do not have a net income of $4,000. I approve of this. I wish the exemptions could be higher. But these people will be paying a heavy social security tax. Again I quote Mr. Cohen on pages 98 and 99, as follows:

Senator CURTIS. * * * Now, the employee's tax will range from around $60 for a family with $1,325 in earnings, to $180 for a family with $4,000 earnings, will it not?

Mr. COHEN. I think the mathematics are correct; yes, sir.

Senator CURTIS. Yes. In other words, this group that we are not collecting any Federal income taxes from because their income is too low, some of them will be paying up to $180 social security taxes, and the self-employed tax will be 50 percent more, will it not?

Mr. COHEN. Yes, sir.

Senator CURTIS. Which means that self-employed people, which includes farmers in my State, and the cobbler who runs a one-man shop, will be paying from $90 to $270 in social security taxes, will he not?

Mr. COHEN. Yes, sir.

Senator CURTIS. Even though he is not liable for Federal, any Federal income taxes.

Mr. COHEN. Yes.

The figures just given relate to our present program when we consider the automatic raises that will come about in the tax. Mr. Cohen further testified, on page 99, as follows:

Senator CURTIS. A still higher tax on these family earnings would be required, would it not, to finance the proposed more generous social security and also the addition of medical care of the aged; would it not?

Mr. COHEN. Yes, sir.

I made it a point in the committee hearings to inquire of Mr. Cohen concerning his proposals for increasing present social security benefits and adding new benefits and new programs. Mr. Cohen naturally supports the proposed medical care for the aged under social security. I asked him about the cost. This testimony is found on pages 105 and 106.

Senator CURTIS. All right. What would the level premium be then?

Mr. COHEN. For the President's program? Six-tenths of 1 percent of payroll.

Senator CURTIS. The level premium?

Mr. COHEN. The level premium is six-tenths of 1 percent of payroll.

Senator CURTIS. I noticed in your task force report carried in the January 12, 1961, CONGRESSIONAL RECORD that the level premium cost of providing medical care for all OASI beneficiaries would be estimated at 0.96 percent of payroll.

Mr. COHEN. That is the figure for including beneficiaries of all ages. A figure of 0.91 percent represented the level premium cost for the Anderson-Kennedy amendment, modified to bring down eligibility to age 65 for men and 62 for women, and eliminating the $75 deductible that was in that bill, and using a $4,800 tax base. In my report, Senator, I gave——

Senator CURTIS. It would be something over nine-tenths of a point instead of six-tenths of a point?

Mr. COHEN. For that particular set of specifications; yes, sir.

We should keep in mind that the tendency is to increase a program and add to its cost as time goes on. On page 105, we find this interesting testimony by Mr. Cohen with respect to pressures for an increase.

Senator CURTIS. At the present time, do the administration health amendments have an entrance-fee requirement and other cost-saving restrictions?

Mr. COHEN. It has no entrance-fee requirement, but it does have some cost restrictions in the nature of deductibles.

Senator CURTIS. And if social security legislation moves in the direction that it has moved since it was enacted, some of those cost-saving restricions would, in a mater of time, be removed, would they not?

Mr. COHEN. Yes. I think there would be substantial pressures for their removal, particularly from the hospitals. The hospital groups are the ones which, interestingly enough, are the most interested in eliminating the deductibles because they feel they might otherwise have to bear the cost of the deductible.

Senator CURTIS. The pressure is already on?

Mr. COHEN. Yes.

Senator CURTIS. So this suggested tax, starting out low, is already commencing to waiver.

Mr. COHEN. There are always pressures, Senator, you and I know that.

The administration's proposal calls for hospital benefits only for those eligible for social security benefits who are over 65. We should remember that the Wagner-Murray-Dingell bill before Congress in 1946 called for compulsory health insurance for all people, those under 65 as well as over 65. This would amount to a payroll cost of perhaps 5 percent or more.

It is not my purpose to discuss the administration's proposal for adding medical care for the aged to social security, but I will point out one thing about it which illustrates its unfairness and unsoundness. This is from page 102 of the hearings and from page 124.

Senator CURTIS. Now, a person, if he is entitled to social security but not drawing it, he could be a man perhaps 65, independently wealthy, carrying on his business, drawing a salary of $100,000 a year, and he would be eligible for hospital benefits, would he not?

Mr. COHEN. Yes, sir.

Senator CURTIS. Now, does H.R. 4222 call for three funds in the Treasury for social security, three accounts?

Mr. COHEN. Yes, it does, sir. There would be three accounts in the social insurance trust fund: OASI, disability insurance, and health benefits.

Senator CURTIS. Now, the health fund—all of the retired beneficiaries of OASI would be eligible to draw from that, would they not?

Mr. COHEN. Yes, sir.

Senator CURTIS. In case they applied.

Mr. COHEN. Yes, in case they had applied. Yes.

Senator CURTIS. None of them would have or will contribute to that account, will they?

Mr. COHEN. That is correct.

Mr. Cohen advocates that the wage base upon which social security taxes are assessed be increased from its present $4,800 to $9,000 a year. He advocates that it be done in steps. Quoting from pages 108 and 109 of the testimony, Mr. Cohen states as follows:

Senator CURTIS. Now, Mr. Cohen, I would like to have your views with respect to the expansion of the social security wage base. Some of the University of Michigan press releases quote you as recommending an immediate increase and in the next few years getting it up to $9,000 per year; is that correct reporting?

Mr. COHEN. I believe it is, Senator.

Senator CURTIS. Now, the present benefit formula provides a $59 primary benefit for a person with $100 a month for the average wage; $24 ore for the second $100, $22 more for the third $100, and $22 more for the next $100, making $127 as the present maximum; isn't that correct?

Mr. COHEN. I think that is correct, sir.

Senator CURTIS. That is based on $4,800?

Mr. COHEN. That is correct.

Senator CURTIS. Now, with your expanded wage base to $9,000, maximum average wages would increase by $350 per month, would they not?

Mr. COHEN. Yes; that is right. I am just doing that mentally; I may be wrong, but I think that is correct.

Senator CURTIS. I think that if the wage base were raised from $4,800 to $9,000, the increase would be $350 a month.

Mr. COHEN. Yes, sir.

Senator CURTIS. Would you propose to increase the maximum primary benefit at the $22 per $100 rate to the maximum of $204?

Mr. COHEN. I would say this: Yes, or somewhat about that figure.

Later on page 109 he testified as follows:

Senator CURTIS. Now, if this went up to $9,000 this would increase maximum benefits around 60 percent, would it not?

Mr. COHEN. I have not figured it out—that sounds correct. From $127 to $204, I guess was the correct figure, was it not?

Senator CURTIS. Yes. But it would increase maximum taxes to over 87 percent?

Mr. COHEN. Yes. The taxes would increase somewhat higher percentagewise than the benefits would; that is correct.

Senator CURTIS. Now, that is, to raise the base to $9,000 would do that?

Mr. COHEN. Yes. I am not proposing $9,000 today, Senator.

Senator CURTIS. Oh, no; I realize that. You have advocated that it be done in steps.

Mr. COHEN. That is correct, sir.

Congress has always related the size of the social security benefit to the average covered wage. This means that the individuals earning $9,000 or nearly so will get a substantial increase in benefits but the people whose pay is very low will not benefit by this particular proposal. We should keep in mind that the social security program should first take into account those citizens who find it most difficult to provide for their own retirement. This means the people who must live on a very low income.

In addition to added programs for our social security system Mr. Cohen favors an increase in the general level of social security benefits during the next 10 years. The following testimony is from the bottom of page 116:

Senator CURTIS. As a matter of fact, you repeatedly are recommending a 50 percent increase in the level of social security benefits in the next 10 years, are you not?

Mr. COHEN. Yes, by the end of the 10-year period.

Another increase in social security benefits that Mr. Cohen advocates relates to the widows benefit. Here I wish to quote from his testimony on page 118.

Senator CURTIS. A widow's social security benefit is three-fourths of her husband's primary amount?

Mr. COHEN. Yes, sir.

Senator CURTIS. In other words, her benefit is half what her husband and she would receive together or have been receiving as a retired couple?

Mr. COHEN. Yes, sir.

Senator CURTIS. Do you feel that this proportion should be continued or changed, and if so, in what manner?

Mr. COHEN. I think it should be increased.

Senator CURTIS. To what?

Mr. COHEN. I think it should be changed immediately to 85 percent.

Senator CURTIS. And eventually to what?

Mr. COHEN. I would hope eventually, if funds permitted, to 100 percent.

Senator CURTIS. How soon?

Mr. COHEN. I would hope within this 10-year period that we are talking about.

Senator CURTIS. In other words, you believe a widow should get as much in social security benefits as would a retired woman worker, whose benefits are based on her own record of covered earnings?

Mr. COHEN. I did not say the same benefit in dollars, but the same proportion. That is, that a single person, whether a single woman or a single man or a widow living alone, should be treated as one unit and get 100 percent of the primary benefit.

Senator CURTIS. Now, you have always argued for a wage-related benefit?

Mr. COHEN. Yes, sir. This would still be wage related.

Senator CURTIS. Men's wages are higher than women's wages, generally, are they not?

Mr. COHEN. Generally so.

Senator CURTIS. The widow within this 10-year period would get a benefit equal to 100 percent of her husband's?

Mr. COHEN. Right.

Senator CURTIS. She suffered no wage loss. A woman who was working and retires would get 100 percent of her own wage record, would she not?

Mr. COHEN. She would probably get a lot higher in dollar benefits, because——

Senator CURTIS. No, she would get lower.

Mr. COHEN. It would depend on what her wages would be; it would be generally lower, yes, sir. In some cases, it would be higher but I would say generally, it would be lower, yes, sir.

I point out that what this procedure amounts to is that the working women of America, because they receive a lower wage, will receive a lower social-security benefit in dollars than will widows of working men, because the men have received a higher average wage. Yet the working women have worked all through the years and have consistently paid into the fund.

Another change advocated by Mr. Cohen relates to the children's benefit. Here I wish to quote from page 120 of the hearings:

Senator CURTIS. Now, do you believe the present age of 18 should be the top age limit when children's benefits are discontinued?

Mr. COHEN. Well, as I said in one of my articles, I would hope that ultimately it would be increased to 21.

Senator CURTIS. Did you change your mind?

Mr. COHEN. No, sir.

Mr. Cohen favors an increase in the maximum family benefit. I call attention to his testimony on page 122:

Senator CURTIS. * * * you do recommend a family maximum benefit should be raised from $250 to maybe $350?

Mr. COHEN. Something like that; yes, sir.

I believe that this Congress should make a success of our present social-security program and that we should seek the soundest possible financing to the end that promises are not broken and the program does not become greater than our economy can bear. I do not believe in a cradle-to-the-grave program wherein millions of our middle class people might be paying more in social-security taxes than they will be paying for all other purposes of government, including carrying the mail, running the courts, developing our resources, carrying and paying the national debt and providing for the national defense. The program advocated by Mr. Cohen points in that direction. His own words prove it. I wish to call attention to the following testimony found on page 125 of the hearings.

Senator CURTIS. * * * According to the information given to the committee today changes in the present social-security program which you, Mr. Cohen, think we should achieve by the end of this decade would mean that with the wage base of $9,000, the combined tax rate would amount to 14 percent—that is, 7 percent on employees and 7 percent on employers. If medical care was extended to all those under 65 the tax rate would be an additional 5 or 6 percent, would it not?

Mr. COHEN. I do not know what you added in there. But you say 5 to 6 percent of payroll?

Senator CURTIS. Yes.

Mr. COHEN. On a $9,000 wage base?

Senator CURTIS. Yes. If you apply the administration's proposal to everybody, like the Wagner-Murray-Dingell——

Mr. COHEN. Oh, under 65?

Senator CURTIS. Yes.

Mr. COHEN. Yes; I think that is correct—which I am not proposing.

Senator CURTIS. But you did in 1946?

Mr. COHEN. Yes.

Senator CURTIS. This means that by the end of this decade social security will be costing about 14 or 15 percent of payroll if the health insurance benefits are limited to those over 65. If compulsory health insurance was extended to everybody, the total payroll tax would be up to 19 or 20 percent. If it was a 20-percent rate, the self-employed rate would be 15 percent. This would be a maximum tax on an employer of $900 per year and a like amount on an employee, and the maximum tax on a self-employed person making $9,000 would be $1,350 if we do what you advocated today plus what you advocated in 1946.

Under the present income tax laws, a man making $9,000 and self-employed, if he is married, pays $1,438 in Federal income taxes. If he has two children, he will pay $1,174. Yet, in the hypothetical case I have made, that man, married, with two children, with income taxes of $1,174, would have social security taxes of $1,350.

Do you feel that as much of that man's earnings of $9,000 as a Federal tax source should be devoted to this one single program of social security as is available to help finance all other activities—the functions of the Government, the paying of the national debt, and defense of our country?

Mr. COHEN. Yes; I do, Senator.

In fairness I want to say that Mr. Cohen defends his position and explains, and that can be found in the testimony that follows the above quotation.

Madam President, my position in regard to Mr. Cohen is based on the program he advocates. I do not believe his proposals are fair to the young and middle-aged workers, nor to our present aged who are not eligible for social security benefits and those whose benefits are small. An expensive, far-reaching social security program, coupled with the concept of big government in all fields, is not in the interests of the people we serve, both young and old, or to the unborn.

Madam President, I oppose the nomination, and I ask for an immediate vote.

The PRESIDING OFFICER. The question is, Shall the Senate advise and consent to the nomination of Wilbur J. Cohen as Assistant Secretary of Health, Education, and Welfare?

Mr. HUMPHREY. Madam President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HUMPHREY. Madam President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The question is, Will the Senate advise and consent to the nomination of Wilbur J. Cohen to be an Assistant Secretary of Health, Education, and Welfare?

Mr. WILLIAMS of Delaware. Madam President, on this vote, I ask for a division.

On a division, the nomination was confirmed.

Mr. HUMPHREY. Madam President, I ask that the President be immediately notified of the confirmation of the nomination.

The PRESIDING OFFICER. Without objection, the President will be notified forthwith of the confirmation of the nomination.

Mr. CURTIS. Madam President, I shall not insist that the President be notified that the nomination of Mr. Cohen was confirmed by a margin of one vote. However, I think the RECORD should be clear on that point, because today the Senate has confirmed the appointment of a man who will be the chief architect of social security; and if he carries out the program which he advocates today, and which he has advocated in times past, the person who today earns $9,000 a year and below will, 10 years from now, be paying more social security than he is paying in Federal income taxes for all purposes of government, including the defense of our country.

Mr. MANSFIELD. Madam President, I think it is very unfair to state that the nomination of Mr. Cohen was confirmed by one vote. I believe the Senator from Nebraska will recall that the consideration of Mr. Cohen's nomination had been held up for 2 weeks, possibly 3 weeks, at the specific request of one Senator. The nomination of Mr. Cohen would not have been taken up today had not the leadership been informed by that particular Senator that he was prepared to have the Senate consider the nomination because he had at his disposal all the information he wished to lay before the Senate at that time.

The Senator knows, of course, that because of the schedule of the Senate this week, many Senators are out of town, while a substantial number are attending committee meetings this afternoon. The Committee on Armed Services and the Committee on Banking and Currency are two committees which I can think of offhand which are holding meetings. Also, the Senator from Nebraska knows that approximately 15 Senators have been in attendance at a luncheon given by the chairman of the Committee on Foreign Relations [Mr. FULBRIGHT] for the Honorable Harold Macmillan, the Prime Minister of Great Britain.

I think the RECORD ought to be made very clear that the consideration of the nomination of Mr. Cohen was held up by one Senator; that his wishes were given every consideration; and that the nomination was brought up on the floor of the Senate today when that Senator informed the leadership on both sides that he was ready to have it considered.

Mr. CURTIS. Madam President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. CURTIS. What the distinguished majority leader says is correct. The Committee on Finance considered the nomination on March 22 or 23; I do not know which date it was. That matter was followed by the consideration of other proposed legislation. The junior Senator from Nebraska asked for a delay in the consideration of the nomination. The majority leader, with his usual courtesy, was very cooperative. He did not crowd me. I advised him that I had gathered my information from the record, and that I was ready to vote.

I do not criticize any Senator for being absent. I realize that many functions are taking place. Nevertheless, the fact remains that on a division vote of the Senators who were present, the statement I made was correct.

Mr. MANSFIELD. Madam President, will the Senator yield?

Mr. CURTIS. I yield.

Mr. MANSFIELD. The statement just made by the Senator from Nebraska is correct. I think it clears away the implication of his previous statement. I know that the Senator from Nebraska, had he so desired, could have asked for the presence of a quorum. Had he insisted, we could have had many more Senators present. However, to the best of my knowledge—and I have discussed this subject with the minority leadership during the past several weeks—the opposition to the nomination of Mr. Cohen at the very most consisted of three Senators. It was my further understanding that of the three whom I can think now, one indicated he did not wish to be present for the consideration of the nomination and did not desire to vote on it.

Mr. CURTIS. Madam President, will the distinguished majority leader further yield?

Mr. MANSFIELD. I yield.

Mr. CURTIS. I am delighted to have the Senator's statement. The distinguished Senator from Minnesota [Mr. HUMPHREY] presented the nomination with the statement that there was only one vote against it in the committee. The distinguished majority leader has corrected me. There was no rollcall vote in the committee, just as there was none today.

I freely concede that the Senate is operating during a holiday time, when the leadership has entered into an agreement that there will be no yea-and-nay votes. However, I believe the junior Senator from Nebraska is as much within his right in stating that there is substantial opposition to the far-reaching program advocated by Mr. Cohen as it is for the leadership on the other side of the aisle to imply that in the committee the junior Senator from Nebraska was the only Senator who was not satisfied with Mr. Cohen's presentation.

Mr. MANSFIELD. Madam President, I did not make any statement to that effect, as the distinguished Senator from Nebraska has pointed out, but it was my understanding that there was only one vote against the nominee in the committee. I am glad the correction has been made.

I am certain there is no question in the mind of the Senator from Nebraska that had the full Senate been present, and had a yea-and-nay vote been taken, the nomination of Mr. Cohen would have been confirmed by at least 90 percent of the Senators in attendance. I think that is the kind of statement which ought to appear in the RECORD, rather than a statement to the effect that the nomination was confirmed, on a division, by a margin of one vote.

Mr. CURTIS. The test of whether he has the support of 90 percent of the membership will come when the Senate votes on the proposals made in connection with his program.

I have made no case against Mr. Cohen in regard to anything other than the social security program he advocates. I do not believe he can get any part of it through Congress by 90 percent of the votes.

Mr. MANSFIELD. I thank the Senator from Nebraska.

Mr. HUMPHREY. Madam President, the nomination of Mr. Cohen has now been confirmed, has it not?

The PRESIDING OFFICER. That is correct.

Mr. HUMPHREY. And an order to give immediate notification of that action to the President has been entered, has it not?

The PRESIDING OFFICER. That is correct.

Mr. HUMPHREY. Madam President, I wish the RECORD to show clearly that I would not attempt to deceive my colleagues in connection with any vote. The statement I presented to the Senate, on behalf of the committee and on behalf of the leadership, was a prepared statement which indicated that in the committee only one vote against the nomination was registered. That was the fact as I had it.

So I feel that what has developed here is most unusual and most unfortunate, because every Senator knows that in connection with nomination after nomination, a Member of the leadership or the chairman of the committee has stood at the leadership desk and has requested confirmation of the nomination, at a time when only one or two Senators were present; and the nomination has been confirmed with supposedly a unanimous vote, simply because no protest or opposition was registered.

So I do not think it proper to have it appear that a different situation existed in the Senate in regard to its action on the nomination of Mr. Cohen.

By the way, Madam President, Mr. Cohen will not put his program before the Congress. The program which will be before the Congress, insofar as social security or health, education, and welfare are concerned, will be President Kennedy's program and Secretary Ribicoff's program; and Mr. Cohen will be the faithful and loyal servant of the President and of the Secretary of Health, Education, and Welfare, or else Mr. Cohen will no longer be in the employ of the Government. So Senators should not discuss Mr. Cohen's program, because he did not run for election to any position.

Instead, Madam President, we are discussing President Kennedy's program and Secretary Ribicoff's program.

I wish it clearly understood—because I had the responsibility of standing at the majority leader's desk when the Senate proceeded to consider the nomination of Mr. Cohen—that the nomination received a favorable report from the Senate Finance Committee. I want it equally clear that, insofar as I knew, only one Senator was to speak here in opposition to confirmation of the nomination.

I want it equally clear that if we had pressed for completion of the quorum call, the nomination of Mr. Cohen would have received resounding support by a majority of the Members of the Senate; and I want it equally clear that, on the division, instead of a difference of only one, there was a difference of two, because in that connection I include the Presiding Officer of the Senate.

In fact, Madam President, when it is found that one has been 50 percent wrong in regard to so small a number, it is obvious that he could be very greatly wrong in terms of the call of the roll of the entire membership of the Senate.

Mr. CURTIS. Madam President, again I must object to my dear friend's juggling of the figures. He has made a point of the fact that only one speech was made in the Senate against confirmation of the nomination of Mr. Cohen. However, it is also true that only one speech was made in the Senate in favor of confirmation of the nomination of Mr. Cohen—although perhaps the one speech in favor of confirmation was more convincing than was the one speech on the other side.

Mr. HUMPHREY. Or shorter.

Mr. CURTIS. Yes; shorter. [Laughter.]

Mr. MORSE. Madam President, I was not involved in the debate on the question of confirmation of the nomination of Mr. Cohen. But because I have known Mr. Cohen for many years, I wish to say that I believe his nomination is one of the finest made to date by this administration. Mr. Cohen personifies a rule to which I like to refer; namely, that in the public service there is no substitute for brains.

Mr. Cohen is an exceedingly brilliant man; and that fact and his unquestioned integrity and his dedication to the public service qualify him especially, I believe, to serve in the position to which he has been nominated, and in which he will serve, now that his nomination has been confirmed.

I wish to say that as chairman of the Subcommittee on Education, I have had the privilege in recent weeks of working very closely with Mr. Cohen. I also know him to be one of the best informed persons with whom I am acquainted in his field.

THE SITUATION IN CUBA

Mr. MORSE. Madam President, I rise now to discuss briefly two items.

As chairman of the Subcommittee on Latin American affairs, I am very much concerned about what I consider to be a worsening of conditions in Cuba. I believe it very important that our Government make use of all possible procedures which might prove to be helpful in at least alleviating some of the conditions in Cuba that affect United States nationals and the nationals of other countries who are now in Cuba.

I am very much concerned about the reports, which I am satisfied are sufficiently reliable not only to justify, but also, I believe, to make imperative, the use by our Government of all available procedures in order to seek to bring some relief to United States nationals and the nationals of other countries who are languishing in Cuban jails.

I am sure the State Department and the White House are receiving very large quantities of mail similar to the considerable quantity of mail I am receiving, these days, in my capacity as a member of the Subcommittee on Latin-American Affairs. The volume of such mail which I am receiving is sufficient to warrant my stating, without any fear of successful rebuttal here in the Senate, that throughout our country there is growing concern in regard to our country's policies toward Cuba. Our people are disturbed as regards the lives of U.S. citizens who now are imprisoned in Cuba.

It is one thing to suffer great economic losses because of various forms of confiscation that Dr. Castro has been guilty of, during his ill-fated regime in Cuba. It is an entirely different matter when the rules of morality and of humanitarian treatment of prisoners who are citizens of sovereign powers are violated.

I stress that we seek a peaceful solution of our difficulties with Cuba. But,

Madam President, if the reports we are receiving are accurate—and I believe that a prima facie case in support of their accuracy has been made—then I believe our Government should proceed forthwith, in view of the fact that the General Assembly of the United Nations is now in session, to call upon the United Nations, under the procedures of the General Assembly, to conduct an investigation, in Cuba, in regard to the treatment of persons, now languishing in Cuban jails, who are citizens of foreign nations.

As a former delegate to the United Nations, I am familiar with some of the problems which will be involved in connection with putting that procedure into operation. But I believe we should at least begin to make a record in that connection. In my opinion, it is possible that the making of the request for a United Nations Study Commission will result in a favorable response from Cuba. It will at least give the Cuban regime an opportunity to prove its claims—if it can prove them—that humane treatment is being extended to the U.S. nationals who today are in Cuban jails.

Madam President, if it continues to be true—and the evidence of it appears to prove it—that U.S. citizens now in Cuban jails are being treated contrary to international law then my proposal is a sound one. It should be remembered that there are definite principles, recognized by civilized nations, which are applicable to the treatment of citizens of another sovereign power who are held prisoner in a foreign country. If it is true that a vindictive, inhumane, and cruel policy is being pursued by the Castro regime in respect to Americans in Cuban jails, if it is true that they are being denied bodily necessities and medical attention to which they are entitled under the existing principles of international law, then I respectfully say this Government has an obligation to use all the peaceful procedures available to it to seek to bring justice and humane treatment to those jailed Americans.

The American people have a right to expect it. The American people do expect it. And in my judgment, if this situation continues to worsen, the American people are going to demand the release of these prisoners.

We have available to us, it seems to me, the procedures of the United Nations. At least we should make the attempt in the United Nations first to see to it that justice is brought to the Americans in Cuban prisons.

There was a time in our history when the world knew that the United States would not permit the practice of inhumanity upon American citizens anywhere in the world. I sincerely hope that my Government will proceed, without any further delay, to raise this matter within the United Nations, if the Swiss continue to report to us—and the Swiss are representing us in Cuba—that they do not have any success at all with the Cuban administration in seeking to bring even Red Cross assistance to Americans in Cuban jails.

Madam President, I have checked a bit in regard to what is recognized as international convention in respect to the International Red Cross. I say on the floor of the Senate today that, if it is true—and the Swiss can certainly give us reliable information as to whether or not it is true; and I make my statements on the basis of press reports quoting the Swiss—that in Cuba today the International Red Cross is not even allowed to check into the conditions of Americans in Cuban jails, then the United Nations should be asked to act. I understand the imprisonments are not limited entirely to American nationals. I think we have a clear case for requesting official intervention on the part of the United Nations. We have a duty at least to ask the United Nations to call upon the Cuban delegation in New York to show cause as to why the findings of the Swiss as reported to us should not be investigated by the United Nations.

I mention this matter on the floor of the Senate because I think it is my clear duty, in my capacity as chairman of the Subcommittee on Latin American Affairs, to call the attention of this administration and to call the attention of the American people to what I think is a shocking example of inhumanity to man being practiced against our fellow Americans now incarcerated in Cuban jails.

I turn now to another subject.

Mr. SMATHERS. Madam President, will the Senator yield for just a moment?

Mr. MORSE. Yes, I yield.

Mr. SMATHERS. I congratulate the able Senator from Oregon on the statement which he has made. I think it is most important that this Government look into the reports and take some fitting action along the line recommended. I think the Senator is performing a great service, not only for those who are incarcerated and who may be treated inhumanely, but, more than that, I think he is performing a service in making it clear to the world what type of government today is governing Cuba, so that the people of the free world may pretty soon make up their minds that they must begin to correlate their thoughts and their actions as to some means of getting rid of the government of Fidel Castro.

I wish to commend the Senator from Oregon for calling the matter to the attention of the Congress and the administration, and I am sure only good can result from it.

Mr. MORSE. I thank the Senator from Florida for his gracious comments. As he knows, this is no new position for the Senator from Oregon. I have taken this position on the floor of the Senate for some years now, with respect to Red China. I have taken the position that an attempt ought to be made—again through the United Nations, because, in my judgment, it is a problem of the United Nations, and not of the United States primarily—to seek to negotiate some commitment out of Red China in regard to the treatment of American nationals who are languishing in Chinese jails. Red China also has imprisoned some nationals from other countries.

I have always said, and say again, I think the United Nations has a clear duty to use its procedures, to the extent that they can be put to use, in determining whether or not the nationals of foreign sovereign powers have been convicted by the application of principles of civilized law. To that extent, at least, the United Nations has jurisdiction in carrying out what I think is its clear obligations under the charter. The United Nations should at least seek conversations with the Red Chinese in respect to the treatment of foreign prisoners. Likewise the United Nations should call upon Cuba to give proof that foreign prisoners are not being denied civilized treatment in Cuban jails.

Misunderstood as I have been time and time again in respect to my position on Red China, I repeat it. I do not favor, and I have never favored, the diplomatic recognition on the part of the United States of Red China until it is possible, prior to such recognition, to negotiate, so far as diplomatic negotiations are concerned, commitments out of Red China in regard to bilateral problems that exist between the United States and Red China.

Likewise, with respect to the recognition of Red China by seating her in the United Nations, I have taken the position, and take it again today, that Red China should not be seated in the United Nations until the United Nations, as a condition precedent, succeeds in negotiating commitments with Red China that give assurance to the world that we have a right, at least, to expect Red China to comply with the jurisdiction of the United Nations.

I have said before that those commitments should involve Formosa; they should involve the prisoner problem; they should involve obedience to the resolution of the United Nations on Korea which Red China has continued to violate until now; they should involve the whole list of problems, really, that exist between Red China and the United Nations. There should be such commitments before Red China is ever seated in the United Nations.

I have been roundly criticized because I have said—as I repeat today—that in my judgment it is only a matter of time before a majority of the members of the United Nations General Assembly will vote at least to take up the Red China issue for debate in the General Assembly, and that might well be next September. Probably it is only a matter of time before a majority of the members of the General Assembly will vote to seat Red China as a delegation in the United Nations.

I think we have a duty to continue to press upon the United Nations its clear obligation to use the existing procedure, which the United Nations has not used, in an endeavor to get some commitments from Red China prior to taking up the question as to whether Red China is eligible for a seat in the United Nations. That is up to her. She can make herself

eligible by the commitments she might be willing to enter into with the United Nations.

I must say two things in criticism of U.S. policy. Many Americans do not like to hear them, but they are unanswerable because they are factual.

We have used our great power in the United Nations to prevent the issue from going on the agenda of the United Nations for debate purposes. We should have been using these many years the great influence we have in the United Nations to get the United Nations to take the first step which I think is essential, namely, the step of starting negotiations with Red China for commitments in the interest of peace before the issue of recognizing Red China as a delegation to the United Nations is put on the agenda for debate.

Many people miss that simple procedural step, which the senior Senator from Oregon has emphasized for many years. I say we have made a mistake in using our influence to prevent the issue from being put on the schedule for debate, when we should have been using our influence to get negotiations for commitments started.

I think we have also made the mistake of using our great influence in the United Nations upon other countries which have been more or less reliant upon us for foreign aid. The result is that the impression has been created among many of the so-called noncommitted nations that in order to demonstrate their independence from the United States they must make clear to us they are not going to vote with us on the Red China issue. After I served 3 months on the U.S. delegation last fall, I came away with the impression freedom from U.S. pressure is a much more important factor with some of the delegations than we like to admit.

Again I stress that we ought to try to get the United Nations to start negotiations with Red China for commitments prior to even consideration of whether the issue of Red China being seated in the United Nations shall go on the agenda.

The prisoner matter is involved in the Red China issue. I say again, as I have said on many platforms in this country, I would not vote either for diplomatic recognition on a bilateral basis or for a recognition of Red China in the United Nations until this issue, among others, is first settled. I think the evidence is perfectly clear that, in respect to many of the Americans now in Red Chinese jails, there was no justification for their commitment. I do not see how we could possibly agree to vote in favor of a nation which has committed the type of cruelties we know have been committed upon Americans in Red Chinese Communist jails. We know of the sad case we now read about in the newspapers, of an American who has suffered in a Red Chinese jail some 10 years, and who is now coming out to live for what I understand will be a very brief period of time because apparently there is no hope for his long survival. He is suffering from a serious cancerous condition.

The American people, with their wonderful sensitivity about human values, know we cannot justify proceeding to look with approval in any diplomatic capacity upon a nation which is as guilty as Red China is guilty of inhumanity which has been practiced upon Americans languishing in Chinese jails.

Madam President, I now turn to the other matter I wished to discuss.

The PRESIDING OFFICER. The Senator from Oregon has the floor.

ECONOMIC DISCRIMINATION AGAINST OREGON

Mr. MORSE. Madam President, I spoke before the Senate about 3 weeks ago in regard to a very serious economic problem which exists in my State. I said at that time that so long as economic discrimination by the Federal Government against Oregon continued I would continue to speak on the floor of the Senate in protest against it with increasing frequency.

Madam President, for 8 years under the Eisenhower administration I from time to time took the floor and protested the discrimination being practiced by that administration against my State from an economic standpoint. In the early years of that administration I fought against one proposal after another to give away the great electric power potential of my State to private utilities. It was a giveaway concealed in a very plausible package known as partnership in connection with multiple-purpose dams. The partnership, of course, was one in which the American people paid for all the nonreimbursable costs of those dams, including flood control and irrigation and navigation costs, and the private utilities were brought in as partners in order to take the profits, at very low cost to themselves, of the electric power generated in the so-called partnership dams.

I shall always be proud to point to the record, because the record is irrefutable. I led the fight against the so-called partnership giveaway proposal for Green Peter Dam, and we beat the proposal. Time and time again the administration offered it, and used various devices to gain its ends. It was audacious enough, as the record will show, to suggest, "Go ahead with appropriations including construction," if a partnership plan were approved, but in the absence of approval of a partnership plan the administration would continue to fail to recommend the necessary funds for even completion of the planning on Green Peter Dam.

Madam President, even though my stubborn resistance to that proposal resulted in a certain amount of criticism in my State from those who were willing to take their bowl of pottage, I knew that the partnerships scheme for Green Peter Dam would be in the longtime best interests of my State. We held out against the partnership giveaway which was proposed for Green Peter Dam, and waited until we could build that multiple-purpose dam for the benefit of all the taxpayers of the United States rather than for the selfish interests of private utilities.

The record will show that even during the Eisenhower administration, I succeeded on several occasions in getting an appropriation from the Congress above the amount recommended by the President. In fact, one year he did not recommend a single red cent, but we did get an appropriation to continue the planning of the Green Peter Dam. Finally, over the opposition of the Eisenhower administration, we got the planning completed, and we got the first appropriation for construction. Now Green Peter Dam is being erected. It is a great monument, I think, to a very important principle, namely, that the Congress should never forget that it is the people of all the United States who own the rivers of this country. All the people of the United States are entitled to the benefits from a multiple-purpose dam. The profits from electric power generated at a multiple-purpose dam should flow into the coffers of the Treasury of the United States to pay for the dam, which can be done in the case of every multiple-purpose dam and as has been done in the case of those that were built years ago and have now been paid for.

As the present Presiding Officer of the Senate [Mrs. NEUBERGER] well knows, we had the same fight over the Cougar Dam. In that historic battle I was ably assisted by her brilliant and able late husband when he was a Senator from Oregon, as we insisted that Cougar Dam be saved for the taxpayers of all the United States.

From Holly Creek down the line, in connection with the issues involved in the construction of dams in my State, we held out against the partnership program, and succeeded in preventing the Eisenhower administration from giving away the benefit of this great national resource of electric power development flowing from the waters of the people's streams.

But we were not so successful during that administration in regard to obtaining for the State of Oregon the necessary appropriations in order to prevent what I protested time and again was an unfair discrimination against the economic life of my State when compared with other States on the Pacific coast, specifically, the States of Washington and California. We had a Republican President and we were at a great disadvantage under a Republican President because he was able, with the use of his great office, to exercise great influence in Congress. It was possible to form various political coalitions in the Congress. The result was that Oregon suffered economic discrimination throughout the life of the Eisenhower administration.

We had a change of administrations last fall. I shall always be proud of that fact, and I shall always be proud of the part that I played—in a small way, but to the extent of my time and my abilities—in helping to elect the Kennedy administration.

As I said the other day on the floor of the Senate, I made 54 speeches under

the direction of the national committee of my party in support of the Democratic ticket, 22 of them in my own State. But with that change of administration, as the senior Senator from Oregon, I think I not only have the right but also I have a duty to make clear to this administration that the economic discrimination against my State should end.

There has recently been reported by the Congressional Quarterly an analysis of the expenditure of Federal money on defense contracts. If the President needs any more proof than the proof I have been submitting to him, then I would respectfully suggest that he take a look at this proof. The studies show that while California has been receiving 23.7 percent of the total expenditures for defense contracts and that the State of Washington has been receiving 3.5 percent of the total expenditures for defense contracts, the State of Oregon has been receiving 0.1 percent—one-tenth of 1 percent.

I wish to say respectfully to the administration of my party that such a situation is not resulting in a great deal of Democratic enthusiasm in the State of Oregon. But from a political standpoint it is resulting in Republican jubilation, although the Republicans in my State fail to tell the people of my State that the economic discrimination developed under the Eisenhower administration. It is not right; it is not fair, just or equitable that it should continue under this administration. I say most respectfully to the President of the United States that he ought to make these conditions clear to the various departments of his administration, because the people of my State are entitled to have this economic discrimination end.

Recently, the Republicans in Oregon have been having field days in pointing to another subject, as revealed by statistics on naval installations. Oregon is bordered by the Pacific Ocean. I sometimes wonder if the Navy Department is aware of that fact. The statistics indicate that California has 20 naval installations; the State of Washington has 8, Oregon had one—a very tiny naval installation at Tongue Point, Oreg., which this administration has just closed. I am sure that this administration is politically sagacious enough to understand that a continuation of this kind of discrimination in the location of naval installations will not result in enthusiastic approval by the people of my State—Republicans, Democrats, and Independents alike—nor should it. As the senior Senator from Oregon, I want once more to make clear to this administration that I intend to continue to call to the attention of the administration and to the people of my State and to the Nation what I consider to be an inexcusable discrimination against the State of Oregon in respect to the expenditure of Federal dollars.

I also serve notice on the administration today that I shall scrutinize with great care any proposal in any budget item that may come to the floor of the Senate for a new naval installation anywhere, or, for that matter, for any Federal installation anywhere, until I am satisfied that the administration has met its burden of proof; namely, justification for the building of a new Federal installation anywhere in the country if the Tongue Point Naval Base, with reasonable, moderate remodeling, can be used for the purpose for which any recommended new project is designed.

I have already made this clear to the President, but I shall continue to repeat it until my State has justice done to it.

There are many uses to which the Tongue Point naval installation could be put. I want to say, however, that if the administration is satisfied that from the standpoint of defense needs of my country the Tongue Point Naval Base is no longer needed, then I will support it in closing the installation, as I would support closing a naval base anywhere else in the country. Let the record be perfectly clear—and I have made it clear to the people of my State—that I have never and I shall never ask to continue an uneconomic or unneeded project in my State. If every Senator would take that position, there would be a great saving for the taxpayers of this country, amounting to billions of dollars over the years. What I do object to is, first, the discrimination against my State in the original location of installations and, second, the deactivation of any installation without putting it to good use for some other Federal purpose. Until closed stations are put to some other use then the administration cannot justify proposing new appropriations for a new project to be located somewhere else.

The Tongue Point Naval Base is a very valuable piece of Federal property. I know it well. It is an installation in excellent physical condition. It is a set of buildings which can be used as a training installation for a variety of Federal uses, as I have suggested to the President, and as I repeat for the RECORD today. There are such possible potential uses as a headquarters for a project on oceanography. If we are going to go through with the President's proposal on an oceanographic research program, it will need a headquarters. It will employ a considerable number of personnel. Here is an installation that is really being washed by the waters of the Pacific. That is one possibility.

Then there is much that is being said about the Peace Corps. I assume the Peace Corps will function in the Pacific area. A peace corps will need a headquarters, although not necessarily a very large one. I wish respectfully to recommend to the President and his associates that they had better take a look at the Tongue Point installation, which is being deactivated, as a possible headquarters for a Pacific area Peace Corps headquarters.

Then we have heard a great deal about a training program in connection with an enlarged submarine program. I want cause to be shown, before I vote for appropriations for building a project somewhere else, why Tongue Point cannot be used for that purpose.

I believe I have made my point with regard to Tongue Point, although I shall repeat it from time to time if it becomes necessary to do so. When I say this about Tongue Point, let me say that I am speaking in behalf of people living in the economic environment of some 50 other naval installations, most of them small, I understand, which are being deactivated elsewhere. They have the same sort of interest that the people of my State have—they and their deactivated installations and the people of my State in respect to Tongue Point.

What I want demonstrated by the administration is that it does not come to Congress and ask for an installation starting from scratch, until it first makes its case with regard to the use for other purposes of naval installations which have been ordered deactivated by the recent order which every Senator received across his desk.

Madam President, I know of no one who is more familiar with the controversy that is involved in another Pacific Northwest issue, namely, the moving of the regional post office from Portland, Oreg., to Seattle.

I wish to stress the fact that this decision was first made by a Republican Postmaster General. At a later time I shall document my charges, if it becomes necessary, but I have made very clear in communications with the Post Office Department and in communications with the President that the original order was a political maneuver. It was obviously one which the Republican administration thought might be helpful in the 1960 campaign.

With the assistance of the very able Senator from South Carolina, the chairman of the Committee on Post Office and Civil Service [Mr. JOHNSTON], a stop order was agreed to until the Senate committee could conduct an investigation of the proposal.

However, immediately after the election, and before the Senator from South Carolina could implement a study of the recommendation of the Postmaster General, Mr. Summerfield, another order went out to go ahead with the move. The move has started, and I believe about 30 percent of the regional office has been moved from Portland to Seattle.

Madam President, I recognize the delicacy of a problem such as this. I can well recognize that the delegation from the State of Washington would hail with enthusiasm such a move because of the economic benefits to Seattle. However, I wish respectfully to say that controversies such as this do not in the long run work to the benefit of either State. I do not believe in economic piracy in American politics. I am satisfied on the merits, I am satisfied on the economic facts, and I am satisfied on grounds of efficiency that the move of the regional office from Portland to Seattle cannot be justified. In my judgment it is a great mistake when there develops within the Senate or between representatives of certain States and the administration a conflict over the location of regional offices. If a move of a regional office is justified in the public interest then that

is another matter but this proposed move cannot be justified.

If it could be justified then, Madam President, I would be the first to admit that the move should be made. However, I have made a very thorough study of the regional post office issue. As the Presiding Officer knows, the Oregon delegation was instrumental in asking the Postmaster General to bring back to Washington, for conference and interview, the director of the regional post office, Mr. Schwartz, because we knew that from the very beginning of this controversy Mr. Schwartz had made it clear that efficiency and economy dictated that the office should remain in Portland. That has been his recommendation from the very beginning, and he made that recommendation to former Postmaster General Summerfield. Mr. Schwartz came to Washington, and at my request he met with members of the Oregon delegation or their representatives. He verified again the economic facts and the facts in regard to the efficient operation of the regional post office located in Portland. Mr. Schwartz further confirmed our opinion that the regional post office should remain in Portland.

I say to the President and to the Postmaster General that it may be—I hope it is not true—that political considerations or political pull or political influence may result in proceeding with former Postmaster General Summerfield's political deal, but that will not make it right. Such action will not be forgotten in the State of Oregon. I hope the administration will take note of that warning, because I seek only the welfare and the best interests of this administration. But as the senior Senator from Oregon, let me serve notice again that I intend to fight for and protect the interests of the people of my State, even if it means that I have to take on my own administration.

Madam President, I never have and never will let party considerations at any time cause me to sacrifice what I believe to be a matter of right or to sacrifice what I consider to be the rightful due of the people of my State.

I say to Postmaster General Day: "You are wrong if you make any decision which changes the status quo in regard to this regional post office headquarters because of any course of action your predecessor started."

It is too bad, but this action may result in differences of opinion being expressed by Senators from the Pacific Northwest. Let those differences come, so far as I am concerned, and so long as I am convinced that the merits of the issue are on the side of the people of Oregon.

It has been said that the regional post office was once in Seattle. That does not happen to be the case. The record shows that when the regional post office program was first blueprinted, Seattle was originally designated as the site for the Pacific Northwest regional post office. Before there was any implementation of the original blueprint, there was a review. The decision was then made, as Mr. Schwartz has made clear in his statement, that efficiency and economy called for a change in the original blueprint, and the regional post office in the first instance was established in Portland, not in Seattle, as is alleged by some persons.

I respectfully call the attention of the President of the United States to one of the political realities of this situation. If under a Democratic administration evidence continues to accumulate that the people of Oregon are to suffer unfair discrimination in respect to the expenditure of Federal dollars, this administration cannot expect resolutions of commendation to be passed in the secret voting places of Oregon in 1962 and 1964.

Madam President, I turn to another phase of the problem. My State is one of the hardest hit States in the entire Union in respect to unemployment. To date, not a single one of the special emergency programs of this administration has been applied to Oregon. Oregon has been the recipient of some of the general program that has been applied throughout the Nation and will be a recipient of some of the program in regard to the improvement of the unemployment insurance program. But Oregon has not been a recipient of any of the food stamp program, although many of the areas that were the recipients—and I thank God they got the assistance—could not demonstrate, from the standpoint of need, a need greater than that of certain areas in my own State.

I call the administration's attention to the fact that newspaper after newspaper and local group after local group in my State are asking the question: When will this administration take cognizance of the exceedingly distressed situation that exists in the State of Oregon? Men need to be put to work. In Oregon there are men in the skilled trades who are now unemployed, who had not been out of a job for 12 to 15 years, as they write to me. There are those I have heard in Washington who seek to pass this situation off with the rationalization, "Well, is it not pretty much seasonal, and will not conditions improve with the return of good weather?"

The weather does not have anything to do with the problem in my State. The fact is, as we all know, that there has been a great letdown in the construction industry across the country. The result is that the lumber mills in Oregon have shut down in large numbers, far beyond the seasonal unemployment in the lumber industry. There is always a certain amount of seasonal unemployment. Unemployment in the lumber industry this year has far exceeded any seasonal unemployment of the past. The cause-to-effect relation is perfectly clear and is being brought out by editor after editor. The reason is that construction is down.

The Government can be of assistance in a construction program. In 1946, the RECORD will show, I spoke for and fought for on the floor of the Senate a great piece of legislation offered by the late Senator from Montana, Mr. Murray. It is known as the full-employment law of 1946. But, sad to say, it is chiefly characterized by a failure to use it. That law is on the statute books; and I felt that during the recessions in the Eisenhower administration, the Government had the duty to put the 1946 unemployment law to work. But not once did the President of the United States ever resort to its use.

I respectfully call the attention of the new President of the United States, who was an ardent supporter of the principle of that law, to the fact that one way to put it to work is to proceed with a public-works program in the areas of the country in which people should be put to work.

One of the great needs of our economy is to expand it. It is very interesting to note what happens when a stimulation of the economy is started by means of—and I emphasize these words—needed, reimbursable, wealth-creating projects. I am not talking about a pork-barrel program; I am not asking for pork for my State. I am asking for wealth-creating projects that will put men back to work—so that I shall no longer receive letters from electricians, plumbers, carpenters, and plasterers who, for the first time in 12 or 15 years, find themselves out of work. These wealth-creating projects will pay for themselves. In fact, they will do far more than that; they will create wealth from which will come new tax dollars, which will result in further expansion of the Nation's economy.

I hope the President will take a long look at, and will give close attention to, the needs for an expanded public-works program in connection with the development of the natural resources in various parts of the country, including my own.

I know that, on principle, no one in the Government is a more enthusiastic believer in the importance of conserving and developing the natural resources of the Nation than is the President of the United States. Time and time again, he has spoken most eloquently on that subject matter. But action is needed; and this program offers an opportunity to end the kind of economic discrimination from which my State has been suffering.

The development of the electric power potential of the Nation is one of its great defense needs. And, of course, as the electric potential of the Nation is developed, the security of the country and also the economy of the country are developed.

Every once in a while someone asks me, "If more electric energy is developed, will there be a need for it?"

Madam President, the fact is that a great increase in the use of electric power can well be made in all parts of the country, not only in the Pacific Northwest.

I have said before, and I now repeat, that I will support the development anywhere in the Nation, of any engineeringly sound dam that can be justified on the basis of its cost-to-benefit ratio, because when I vote to develop the electric power potential of the Nation, I am striking a more effective blow against communism than I do when I vote for the production of more missiles. I have al-

ways voted for the missile programs, and I will continue to vote for them until the dawn of the day when Russia will fully understand that she has everything to lose and nothing to gain by a nuclear war.

But, Madam President, in the long run we shall defeat communism in the world by demonstrating the superiority of our economic system—the superiority of economic freedom. When I vote for the development of the electric power potential of the United States, I am also voting in favor of strengthening the economic freedom of our Nation, because by that vote I shall be helping to make possible a greater expansion of the Nation's economy. I shall be voting for a resulting increase in the job opportunities and a resulting increase in the private ownership of homes, and in supplying an adequate education to the children of the American families, and also in bringing to every family in the Nation a greater degree of the enjoyment of economic freedom.

Madam President, in the course of your service in this body, you are doing a magnificent job, in my opinion, in calling the attention of the country to the needs and the rights of the consumers of the United States. I feel that I buttress your work—as you cooperate with me, too—in my battles for the development of the electric power potential of the streams of our country.

So today I most respectfully ask the President of the United States to look at the rivers of the Pacific Northwest and to recall some of the eloquent and sound speeches he made in Oregon in regard to the development of the economic power of the streams in our part of the country, and in the entire Nation. I do not know how there could possibly be greater justification for immediate action than there is now, in view of the economic plight which confronts my State.

Madam President, I have talked longer than I intended; but I wish to make perfectly clear to the President that I speak in dead earnest. I have taken sufficient time at least to give him the benefit of a few broad brushstrokes in regard to some of the opportunities to assist the economic plight of my State. I shall speak again.

This weekend I shall go home for a personal inspection of the situation in Oregon, from the standpoint of its economic needs. I assure the President that upon my return I shall speak again and again and again, until finally we get through to the administrators of his administration the justification for the increasing demand on the part of the leaders of my State that this administration proceed to take cognizance of what the documented facts show to be an economic discrimination against Oregon during the 8 years of the Eisenhower administration and thus far during this administration.

But, in fairness to the President, let me make very clear that I am not critical of the fact that, during his busy days since he was sworn in to be the President of the United States, he has not given to this problem the attention that I am confident he will give to it, once he becomes fully aware of it.

One of the purposes of this Senate forum is educational. I look upon my job as also carrying with it the responsibility of political education and economic education with respect to the needs of my State. I assure the President that I make my speech today in that spirit; but I also assure him that I intend to use my obligations in this office, my trust in my duty in this office, to do what I can to protect the economic rights of my State. And I ask for no more. I ask for no favoritism. I do not ask to be put in a preferred position. But I do ask that the President take the steps necessary to end the unfair and uncalled-for economic discrimination the State of Oregon has suffered for the last 8 years.

THE AMERICAS MUST COME FIRST

Mr. SMATHERS. Madam President, one of the ablest and wisest and most perceptive men in the Western Hemisphere is Pedro G. Beltran, a former newspaperman who, because of his beliefs and his fervent advocacy of democracy, finally had to spend many years in jail, and was freed only when a change was brought about in his government. Today he is the Prime Minister of Peru.

I do not know of anyone who has a greater understanding of the problems of the Western Hemisphere than does Pedro Beltran.

On March 22 he made a speech at the University of California at Los Angeles entitled "The Americas Must Come First."

I should like to quote a few paragraphs from his speech, as follows:

Has there not been evidence of a political vacuum in the Western Hemisphere? The tragedy of Cuba, its repercussions in other countries, the doubts, the cynicism, the talk of neutralism, all clearly warn us that our hemispheric solidarity is threatened.

The leadership which will fill this vacuum is one which must recognize the mutual interdependence of the United States and the other Republics of this hemisphere—a realization that we constitute a family of nations living, so to speak, in houses on the same block. Such leadership recognizes that a fire in any house in our block is an immediate threat to every other house and to every member of the family.

Let me be clear on one thing. This is not an argument for grants, and aid. We are not suggesting that the North American people make a philanthropic gesture. This is not the question.

The problem is far more serious than one of mere help. It is a matter of survival, of salvation for all of us. Let us be clear on this at the start: communism is gaining ground here in our own hemisphere, before our very eyes. If the United States does not step forward now with dynamic leadership to meet the unceasing conspiracy, on our own shores, of the Soviet Union and Red China, Latin America is lost. And if Latin America, with all its 200 million people, is lost, so also is the United States.

So the burdens which are laid upon you are immeasurable. You cannot find a no man's land in the conflict which has divided the world. There can be no truce, no respite in the endeavor to show that liberty and dignity are better and more fruitful than totalitarian servitude. The United States must be equal and surpass Russia in the conquest of space. To preserve peace and guarantee the security of the free peoples, it cannot stint on defense. The banner of the Western World must never be furled in Berlin. The Iron Curtain must not be allowed to fall on the remote kingdom of Laos, nor Red imperialism to establish, among the Congo tribes, a beachhead for domination of the African Continent.

But would it not be tragic if, the United States won the Congo, secured Berlin, triumphed in Laos, Ghana, and the islands of Quemoy and Matsu, while in the end a victorious Communist thrust for power took place in the heart of its own hemisphere? You could have won, thousands of miles away, and been beaten by the Kremlin in your own block. Now, this hypothetical case, which you here suppose to be impossible is, unfortunately, not impossible south of the Rio Grande, in your sister Republics of Latin America.

I myself have always stressed that we live on the same continent, and any loss, in any part of it is of necessity a loss for all of us. Must we not say, with Donne, that "any man's death diminishes me." No ground should be lost, anywhere. But the loss of any Latin American country is infinitely more serious than the loss of the Congo, or even the loss of Western Berlin. And this can be said even from a strictly military point of view.

First things should come first. Therefore the Western Hemisphere must come first in Washington, for the risk of victory abroad and defeat at home will exist just so long as the Western Hemisphere family of nations does not occupy first place on Washington's overloaded schedule.

Madam President, I ask unanimous consent to have printed in the RECORD at this point the entire speech of Dr. Beltran. I should like to say at this point that this is a most perceptive and thought-provoking speech. I completely agree with the conclusions which have been reached by Dr. Beltran. It is my fervent hope that attention will be given to this matter, just as attention is being given today to the very tragic situation which exists in Cuba, and the attention which is given to Laos and Berlin and Congo and to the other trouble spots of the world. I cannot help feeling, as Dr. Beltran has so well stated, that it would certainly be the height of irony if we should win victory in these faraway places in stopping communism but at the same time permitted it to gain a permanent foothold in our own Western Hemisphere or, so to speak, in our own block, in our own neighborhood.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

THE AMERICAS MUST COME FIRST

(Address by Pedro G. Beltran, Prime Minister and Minister of Finance, Republic of Peru, University of California at Los Angeles, Charter Day, March 22, 1961)

Mr. President, Mr. Chancellor, members of the board of regents, distinguished faculty, alumni, and friends of the University of California at Los Angeles, I think we can all agree that today's problems are so serious and the need to solve them is so pressing that on occasions such as this each moment and each word should be used for the purpose of defining the tasks to be performed, by men of good will, in the world in which we live. If the problems are not clearly defined, it is hard to find a solution.

Throughout the ages those nations which have led the world have had heavy burdens laid upon them. This was never more true than today. Indeed, never have the destinies of so many people depended in such grave measure upon the wisdom and fortitude of one nation.

It is an irony of history that the very burdens under which the leading nations struggle tend to subject them to implacable criticism and the bitterest recriminations.

This is worth mentioning now, because the United States is being subjected to just such recriminations in a form which is becoming quite familiar to all of you. I refer to the anti-American sentiment which the United States encounters, sometimes with astonishment, in many parts of the world. It is found not only in countries openly antagonistic, but even in those which are your friends, or at least should be expected to be friends.

But you should not be astonished. Rightly or wrongly, the strongest nations have always been the target of such hostility. It is not greatly different from the anti-British feeling which existed before the two World Wars, or the anti-French feeling in the days of Louis XIV or of Napoleon, or the resentment against the Spain of Philip II and Charles V, or even the anti-Roman feeling in the time of the Caesars. Such things are the price of power and greatness, along with sacrifices and perils, and constant vigilance. History lays its moral obligations upon nations, and only the mediocre fail to live up to them. In the words of Arnold Toynbee, the death of civilization is the result of their failure to respond adequately to the challenges which put them on trial.

On the occasion of this university gathering I shall speak not from the viewpoint of a member of a government, nor even of an inhabitant of the Americas. I speak as a son of Western culture who realizes, as do all of you, the magnitude of the perils which are threatening the civilization into which we have been born and which we hope to pass on to our children.

It is not a question of a simple clash of ideologies, of a struggle for the balance of power as the 19th century politicans understood it, nor of the interplay of influence, nor of territorial controversies. It is not even a question of endeavoring to preserve the comfort and material advantages characteristic of the American way of life, and much less of returning to the "splendid isolation" which came to an end for the United States in the terrible bloodshed of two World Wars.

What is happening now, in 1961, here and throughout the whole world, is that the very principles on which we have been nurtured are in jeopardy. Our worship of God, our concept of the dignity of the individual, our inborn habit of exercising man's inherent liberties; the freedom of the ballot box and of economic choice, and the right of labor to organize and to strike, are threatened. True scholarship and freedom of thought and inquiry, as carried on in our great free universities; honor and decency; property and family; our sense of the true value of life itself—all these things are hanging in an awful balance.

We who have studied your history and who know you cannot help but be convinced that you will defend this Western Christian heritage. We believe that you will accept this world responsibility with the same epic spirit of your first settlers and your Founding Fathers, and of the wonderful rank and file of American farmers, soldiers, statesmen, workers, industrialists, educators, who have forged the greatness of your country. We have grown to understand your courageous, creative—I would say, heroic spirit, and we rejoice to see vigorous signs of it in President Kennedy's recent speeches.

Your magnificent revolution, and the high principles enunciated in your Declaration of Independence and your Constitution ignited the revolutionary flame which created our Republics. The example of your Founding Fathers inspired our revolutionary leaders and our people to throw off the yoke of colonialism. Destiny today summons you to an even higher responsibility. Leadership is the key, for where leadership falters a political vacuum is created.

Has there not been evidence of a political vacuum in the Western Hemisphere? The tragedy of Cuba, its repercussions in other countries, the doubts, the cynicism, the talk of neutralism, all clearly warn us that our hemispheric solidarity is threatened.

The leadership which will fill this vacuum is one which must recognize the mutual interdependence of the United States and the other Republics of this hemisphere—a realization that we constitute a family of nations living, so to speak, in houses on the same block. Such leadership recognizes that a fire in any house in our block is an immediate threat to every other house and to every member of the family.

Let me be clear on one thing. This is not an argument for grants, and aid. We are not suggesting that the North American people make a philanthropic gesture. This is not the question.

The problem is far more serious than one of mere help. It is a matter of survival, of salvation for all of us. Let us be clear on this at the start: communism is gaining ground here in our own hemisphere, before our very eyes. If the United States does not step forward now with dynamic leadership to meet the unceasing conspiracy, on our own shores, of the Soviet Union and Red China, Latin America is lost. And if Latin America, with all its 200 million people, is lost, so also is the United States.

So the burdens which are laid upon you are immeasurable. You cannot find a no man's land in the conflict which has divided the world. There can be no truce, no respite in the endeavor to show that liberty and dignity are better and more fruitful than totalitarian servitude. The United States must equal and surpass Russia in the conquest of space. To preserve peace and guarantee the security of the free peoples, it cannot stint on defense. The banner of the Western World must never be furled in Berlin. The Iron Curtain must not be allowed to fall on the remote kingdom of Laos, nor Red imperialism to establish, among the Congo tribes, a beachhead for dominion of the African Continent.

But would it not be tragic if the United States won the Congo, secured Berlin, triumphed in Laos, Ghana, and the islands of Quemoy and Matsu, while in the end a victorious Communist thrust for power took place in the heart of its own hemisphere? You could have won, thousands of miles away, and been beaten by the Kremlin in your own block. Now, this hypothetical case, which you here suppose to be impossible is, unfortunately, not impossible south of the Rio Grande, in your sister Republics of Latin America.

I myself have always stressed that we live on the same continent and any loss in any part of it is of necessity a loss for all of us. Must we not say, with Donne, that any man's death diminishes me. No ground should be lost, anywhere. But the loss of any Latin American country is infinitely more serious than the loss of the Congo, or even the loss of Western Berlin. And this can be said even from a strictly military point of view.

First things should come first. Therefore the Western Hemisphere must come first in Washington, for the risk of victory abroad and defeat at home will exist just so long as the Western Hemisphere family of nations does not occupy first place on Washington's overloaded schedule.

The principle of priority for the common destiny of the Americas as a cardinal point of foreign policy of the United States and the other American Republics has intrinsic validity, and historical sanction.

The people of the United States—all segments of your national life—will grasp the clear and compelling logic of this policy, and will sympathize with whatever necessary measures of a political or economic nature the United States must take in order to give it life and vigor. It is a demonstrated virtue of your citizenry that when the wisdom and logic of a course is made clear to them they invariably respond with all the sacrifices necessary to make it succeed.

While the policy I am proposing is, I believe, clear and logical, and will clarify the position of the Americas before the world, it is not necessarily a panacea. For it deals, after all, with 20 Latin Republics. I should tell you that Latin America, with homogenous traits which identify it as a group, is nevertheless divided and complex to a degree undreamed of by the superficial observer. South of the Rio Grande there are not only 20 republics, but each Latin American—as each Spaniard, according to Angel Ganivet—is himself a self-willed, autonomous republic. We are fired by an individualistic propensity in contrast with the mature self-discipline which today characterizes Anglo-Saxon communities. Your institutions are deep rooted, and I dare say indestructible. In Latin countries, the individual is still the supreme institution, to a remarkable degree.

This calls for human understanding, wisdom in leadership, and capable diplomacy. It calls for a broad and universal outlook. The United States would not deserve to hold the leadership of the free world if its statesmen, politicians, intellectuals, and those who mold public opinion, were not imbued with a universal outlook.

We must admit with the Spanish philosopher, Ortega y Gasset, and the German philosopher, Karl Jaspers, that provincialism, the mistaken sense of values which attaches more importance to the immediate and the insignificant than to the enduring and the transcendent, constitutes the greatest internal threat to Western civilization. To undertake a universal mission, a universal mentality is an irreplaceable requirement.

The hour is ripe for such thoughts as I have dared suggest to you. In the United States a new administration is starting. The President's pronouncements fill us with optimism. He speaks as a citizen of the Americas, aware of the problems we are facing and of the solidarity that should bind us together to find solutions worthy of our history and of our destiny. At one point in his speech he says:

"The genius of our scientists has given us the tools to bring abundance to our land, strength to our industry, and knowledge to our young. For the first time we have the capacity to strike off the remaining bonds of poverty and ignorance—to free our people for the spiritual and intellectual fulfillment which has always been the goal of our civilization."

And he adds:

"Yet at this very moment of maximum opportunity we confront the same forces which have imperiled America throughout its history—the alien forces which once again seek to impose the despotisms of the Old World on the people of the New."

This brings us again to the case of Cuba which, while so far isolated, is nevertheless frighteningly symptomatic. Some newspapermen who have already reported this to you have gone so far as to say that the Latin American revolution is inevitable.

Since it is more convenient for the United States to be on the winning side, they argue, it should place itself on the side of the revolution and not against it.

This is true—but what revolution? The Soviet revolution is not the same as the French Revolution, nor the American Revolution. In the name of revolution more crimes can be committed in Latin America than were committed in France in the name of liberty, as Madame Rolland sadly noted at the foot of the guillotine. If revolution means loss of liberty, muzzling of the press, confiscations, suppressions of the right to unionize and to strike, terror and tyranny, domestic spying and firing squads, if revolution means Communist revolution, then the United States would commit a crime and a monumental act of irresponsibility in letting us fall into the hands of Moscow.

But let us not play with words: A revolution can mean something quite different. It can mean the assumption of greater responsibility by our Latin American governments. It can mean the creation of a more democratic climate within our countries which would inspire youth and reward ambition. It can mean abolition of privileges, and more equality. It can mean a set of broader social attitudes on the part of landowners, employers, and union leaders. It can mean broader education and greater opportunity for the young. It can mean wider civil liberties and courageous economic development, sounder fiscal administration and advances in housing, land tenure, roads and industries, science and health. It can mean higher standards of living. Such developments could well be called revolutionary in many areas of the hemisphere.

So that while we unconditionally repudiate the Communist revolution, we earnestly desire a revolution inspired by and dedicated to the principles of Washington, Jefferson, and Lincoln, on your part, and Bolivar, Sarmieto, and Marti on ours, and by no means a revolution after the manner of Karl Marx and Nicolai Lenin, or Fidel Castro and Che Guevara.

I close with thanks to the great university which has done me the honor to invite me to its charter day convocation. In all of the tense and perilous political subjects on which I have felt obliged to dwell today it goes without saying that the great hope for all of us is in an educated youth in both the United States and Latin America, dedicated to the great common destiny of our hemisphere. You at the University of California at Los Angeles are doing wonderful work. When the clouds of political tension and economic stress are cleared, it may well be that the cultural accomplishments of the free universities of the Western Hemisphere will have achieved more for the common good than all the politicians and propagandists.

Thank you, and keep up your magnificent work.

ADJOURNMENT TO NEXT MONDAY

Mr. MORSE. Madam President, as in legislative session, I move that the Senate stand in adjournment until Monday at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 10 minutes p.m.) the Senate adjourned until Monday, April 10, 1961, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate April 6, 1961:

U.S. ATTORNEYS

David C. Acheson, of the District of Columbia, to be U.S. attorney for the District of Columbia for a term of 4 years, vice Oliver Gasch.

Robert M. Morganthau, of New York, to be U.S. attorney for the southern district of New York for the term of 4 years, vice S. Hazard Gillespie, Jr., resigned.

U.S. COAST GUARD RESERVE

Ernest R. Feidler for promotion to the permanent rank of rear admiral in the U.S. Coast Guard Reserve.

CONFIRMATIONS

Executive nominations confirmed by the Senate April 6, 1961:

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Wilbur J. Cohen, of Michigan, to be an Assistant Secretary of Health, Education, and Welfare.

DIPLOMATIC AND FOREIGN SERVICE

AMBASSADORS

G. Frederick Reinhardt, of California, a Foreign Service officer of class 1, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Italy.

Joseph C. Satterthwaite, of Michigan, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Union of South Africa.

Parker T. Hart, of Illinois, a Foreign Service officer of the class of career minister, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to the Kingdom of Saudi Arabia.

Raymond Telles, of Texas, to be Ambassador Extraordinary and Plenipotentiary of the United States of America to Costa Rica.

UNITED NATIONS

Mrs. Jane Warner Dick, of Illinois, to be the representative of the United States of America on the Social Commission of the Economic and Social Council of the United Nations.

INTERNATIONAL BANK FOR RECONSTRUCTION AND DEVELOPMENT

John M. Leddy, of Virginia, to be U.S. Executive Director of the International Bank for Reconstruction and Development for a term of 2 years.

EXTENSIONS OF REMARKS

National Scholarship Auditions of Friday Morning Music Club Foundation, Inc.

EXTENSION OF REMARKS

OF

HON. ALEXANDER WILEY

OF WISCONSIN

IN THE SENATE OF THE UNITED STATES

Thursday, April 6, 1961

Mr. WILEY. Mr. President, most of us are aware that when George Washington directed Maj. Pierre L'Enfant to plan a Federal city 170 years ago, he specified that it should be planned as a cultural and civic center for the new United States. The father of our country recognized, even at that early date, that our Capital City would be a showpiece of our way of life—a window through which much of the world would view our new Republic and its people. And, in his great wisdom, he recognized, too, that the fine arts and education would continue to reflect the true status of our Nation—the values which, in the words of President Eisenhower, "make our civilization endure and flourish."

We in America have every right to be proud of the diversified cultural life of our country and of the continued efforts by our citizens to encourage and expand appreciation of the creative output of our poets, playwrights, composers, and visionaries of the past and present. We, here in the Congress, have demonstrated our recognition of the significance of the national level of our cultural heritage through enactment of Senate bill 3335 during the 85th Congress—which bill I was happy to cosponsor, and which resulted in Public Law 874 for the establishment of a National Cultural Center here in the Nation's Capital. Many of my colleagues will recall the long and sometimes discouraging battle fought by many dedicated Members in both Houses of the Congress in order to secure legislative approval for such an international cultural beacon, which will be commensurate with our leadership in world affairs. Many public-spirited citizens maintained the courage of their convictions that here was a project which would enrich countless numbers of lives through expansion of cultural horizons. They realized that this was an absolute necessity in order for our Capital City to fufill its role of importance as a tourist center from which local and foreign visitors derive their knowledge and lasting impressions of the United States. And, a splendid example of how Members from both sides of the aisle can work together in harmony for the cultural advancement and mutual benefit of our great country was shown in the commendable bipartisan spirit which marked enactment of this legislation.

Since that time great progress has been made by many prominent individuals who are contributing their time, efforts, and funds toward eventual realization of this center which will belong to every citizen of the United States. Such a national cultural establishment will develop a greater knowledge, understanding, and appreciation of the fine arts by providing a suitable building for the presentation of music, opera, drama, dance, and poetry.

Mr. President, I wish to call attention at this time to an outstanding example of our Nation's cultural maturity to be found right here in our Capital City—the Friday Morning Music Club, Inc. Founded in 1885, this pioneer organization is well qualified to assume its place

in the forefront of our expanded cultural horizons; for the objectives of the Friday Morning Music Club are dedicated generally to the ennoblement of the spirit and specifically toward the promotion of musical culture among its members and in the community. One of the largest and most active musical organizations in the Capital, the club has a membership of 600 women musicians—active, associate, honorary, and student—who periodically sponsor concerts of local and world renowned artists.

In 1949, through the untiring efforts of one of its distinguished members—Mrs. Florence Howard, the club expanded its objectives to the younger generation by forming the Friday Morning Music Club Foundation. Incorporated in 1948, the foundation—of which Mrs. Howard is the capable director—establishes a legal means for the club to receive and administer bequests and gifts in order to promote and provide musical education for the especially gifted student; and particularly for those who need help to launch their careers or to provide further training.

As a result of this fine program, national scholarship auditions are held every 18 months for young musicians who compete for awards of $1,500, $1,000, and $300. After 3 days of elimination competitions, in which selected members of the music club choose six finalists, the winners are chosen by judges of outstanding reputation in the music field.

On Friday night, April 7, the foundation will hold the finals in its national scholarship auditions at the John Wesley Powell Auditorium, here in Washington. The auditions this year are for singers between the ages of 18 and 26 and applications for the contest came from 165 young singers from all our 50 States, including Hawaii. Applications were carefully screened by members of the foundation and 40 were accepted to compete in the auditions. The finalists on Friday night will be judged by a panel of distinguished musicians including Boris Goldowski ("Mr. Opera"), Julius Rudell, director of the New York City Opera Co., and Rose Bampton, former leading soprano of the Metropolitan Opera Co. Previous winners of the national auditions have included violinists, pianists, singers, and a cellist; all of whom are now actively pursuing their careers and some of whom have already made such names for themselves as to give promise of becoming stars in future years.

The top award this year has been named by the Friday Morning Music Club "The Florence Howard Award," in honor of the founder and director of the foundation; who, through her untiring efforts, has fulfilled so completely the club's purpose of "promoting musical culture among its members and in the community."

Mr. President, in these times when the United States is faced with the challenge of providing the alternative to the path toward communism, I believe that we need more such constructive efforts which prove to the world that the citizens of our great country are not materialistic—that our own unique approach to private action, endowment, and support of the arts produces the finest artists; and that we are truly worthy of being the leader among nations—culturally and spiritually, as well as economically and defensewise.

I ask unanimous consent that there be printed in the CONGRESSIONAL RECORD a listing of the officers and trustees of the Friday Morning Music Club Foundation, Inc.; along with a listing of honorary membership in the foundation and past scholarship awards.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

THE FRIDAY MORNING MUSIC CLUB FOUNDATION, INC.

OFFICERS

Director of the foundation, Florence Howard; chairman of auditions, Kathryn Hill Rawls; secretary, Constance Russell McKay; treasurer, Katherine Riggs Burchard; assistant to the director, Jane Lea; assistant to the chairman of auditions, Lenore Bryan; president of the Friday Morning Music Club, Dorothy Raynor.

TRUSTEES

Nabiha Gazda, Helen Grimes, Neva Garner Greenwood, Evelyn Swarthout Hayes, Alma Mitchell, Alice Nagle, Miriam Taylor, Margaret Tolson, Olive McD. Witters.

HONORARY MEMBERSHIP IN THE FOUNDATION

National Judges

Miss Alice Eversman, Dr. Rudolph Ganz, Mr. Walter Golde, Mr. Julian de Gray, Mr. John Gutman, Mr. Mieczyslav Horszowski, Mary Howe, Mr. Alexander Kipnis, Mr. Boris Kroyt, Mr. Marks Levine, Mr. Eugene List, Miss Mildred Miller, Mr. Mischa Mischakoff, Dr. Howard Mitchell, Mr. Homer Mowe, Miss Elena de Sayn, Mr. Mischa Schneider, Mr. Leonard Shure, Mr. Martial Singher, Dr. Reginald Stewart, Mr. Roman Totenberg.

SCHOLARSHIP AWARDS

September 8, 1950: The Friday Morning Music Club Foundation and Patrick Hayes $1,000 award. Winner, Diana Steiner, violinist, Philadelphia, Pa.

April 16, 1952: The Friday Morning Music Club Foundation Award for Singers. Winner, first award, $700—Madelaine Chambers, White Plains, N.Y.; winner, second award, $300—Bettye Brown, Nashville, Tenn.

September 11, 1953: The Bonita Crowe $1,000 Piano Scholarship. Winner, Naomi Weiss, New York, N.Y.

April 13, 1955: The Friday Morning Music Club Foundation $1,000 Scholarship for Strings. Winner, Elaine Skorodin, Chicago, Ill.

September 12, 1956: The Friday Morning Music Club Scholarships for Singers. Winner, first award, $1,000—Robert Kerns, Detroit, Mich.; winner, second award, $300—Gilderoy Scott Memorial—Robert Moulson, Atlanta, Ga.

April 11, 1958: The Friday Morning Music Club Scholarships for Pianists. Winner, first award, $1,000—Virginia Hutchings, Atlanta, Ga.; winner, second award, $300—Jerome Rose, San Francisco, Calif.; winner, third award, $100—Emily Zachary Bayly Memorial—Anton Baker, New York, N.Y.

September 11, 1959: The Friday Morning Music Club Scholarships for Strings. Winner, first award, $1,000—Toby Saks, cellist, New York, N.Y.; winner, second award, $300—Charles Castleman, violinist, Braintree, Mass.; winner, third award, $100—Frances Steiner, cellist, Philadelphia, Pa.

April 5–7, 1961: The Friday Morning Music Club Scholarships for Singers. The Florence Howard Award, $1,500 (honoring the founder and director of the foundation); the second award, $1,000, the Church-Lyons-Scott Memorials Award, $300.
